receiver design with almost zero
IF 08 p1226 A66-19535
Phase frequency characteristics of two-and
three-circuit band pass filters used in radio
receiving devices 09 p1354 A66-20450
Radio receiver design for precisely given
signal and nonsteady Gaussian
noise 11 p1658 A66-23221
Test instrumentation for threshold
sensitivity and noise bandwidth
measurement of narrow band phase-locked
receivers, employing statistical
techniques 13 p2079 A66-25659
Solid state tuned RF radiometric receiver
using low-noise broadband tunnel diode
amplifier 14 p2290 A66-27063
Receiver noise factor, discussing CW and
dispersed signal source measurement
techniques 16 p2649 A66-30549
Optimal receiver of PWM telemetering
signals 17 p2873 A66-32071
Receiver consisting of integrated
millimeter wave mixer and solid state IF
amplifier chain for operation at 94
gc 17 p2895 A66-33118
Air shower detection with radio receiving
system, broadband band helical antenna and
Cerenkov particle
detector 18 p3115 A66-35119
Phase comparison telemetry consisting of
passive VHF receivers and CW transmitters
for satellite detection 19 p3301 A66-35692
Receiver design and results of dual VLF
transmissions for obtaining timing
information 19 p3357 A66-35693
Spectral receiver of Nancay radiotelescope
of correlation type, for extragalactic
observations on 21-cm neutral hydrogen
band 19 p3319 A66-36259
Receiver with n-type indium antimonide
detector for investigating absorption spectra
in submillimeter wave
range 20 p3561 A66-37999
Solid state millimeter wave receivers for
space vehicle environments, discussing
integral mixer IF amplifiers, oscillators and
varactor multipliers 22 p3879 A66-40733
Engineering analysis of heterodyne
modulation method of checking heterodyne
receivers, considering input-signal circuits
having minimum effects on heterodyne
characteristics 23 p4043 A66-41060
RADIO RECEPTION
Information-bearing artificial signal from
extraterrestrial civilizations is
indistinguishable from natural
noise 12 p1814 A66-23892

Phase observations of 20-and 60-khz signals
received at different
locations 17 p2875 A66-32535
HF long-distance radio signal transmission
and high and low antenna
sighting 20 p3521 A66-38358
RADIO RELAY
Detachable radio relay pods /RRQ-5/ to
increase range of UHF and VHF
communications systems
[AIAA PAPER 65-728] 03 p0336 A66-13050
Ferrite component for radio relay
equipment such as antenna insulator,
waveguide and coaxial equipment insulator
and circulator 11 p1664 A66-22658
Microwave communications, discussing
radio relay techniques, carrier telephony,
satellite microwave communications,
television, laser light wave communication,
etc 11 p1655 A66-22696
Reliability of short-haul microwave radio
relay systems operating in common carrier
bands 13 p2029 A66-25149
Assessment of troposcatter radio relay
systems in terms of CCIR /Geneva 1963/
recommendations regarding allowable noise
power in radio relay
systems 13 p2023 A66-25568
Approaches to microelectronics, application
of microelectronics to telecommunication
equipment, noting logic circuits, radio relay,
etc 13 p2043 A66-26316
Cost and performance comparison of
satellites, relay links, waveguides and lasers,
showing line-of-sight microwave relay is best
wideband data transmission
medium 14 p2238 A66-27667
Breguet 941 STOL aircraft, considering
possibilities as television relay platform with
Citroen ID 19 station
wagon 14 p2238 A66-27677
Detachable radio relay pods /RRQ-5/ to
increase range of UHF and VHF
communications systems
[AIAA PAPER 65-728] 16 p2654 A66-31326
Graphical method extended to problems of
interference between terrestrial line-of-sight
radio relay systems and communication
satellite systems 17 p2871 A66-31816
Computer model study of diversity
augmented vehicular radio relay
communication system in man-made noise
environment 18 p3069 A66-34167
RADIO SCATTERING
Scattering of radio waves by oscillating
reradiators randomly arranged on planar
absorbing discontinuity 02 p0190 A66-11409
Interplanetary medium observation from
zodiacal light and radio wave scattering
during radio source occultation and
influence on galactic and solar cosmic
rays 03 p0425 A66-12852
Approximate method for solving inverse
scattering of radio waves from convex
conducting bodies of complex
shape 08 p1185 A66-19604
Lunar radar scattering behavior indicates
wide range of structure sizes on
Moon 09 p1452 A66-20124
Radar scattering maps of Moon created by
delay-frequency analysis of lunar radar
echo 09 p1452 A66-20126
Radar scattering, discussing cross section
characteristics, quasi-optical approximation,
boundary value solutions,
etc 10 p1497 A66-21588
Frequency-stepping system for obtaining
frequency-averaged radar cross section data
and high range resolution data implemented
in X-band 10 p1501 A66-21622
Frequency correlation in radio
communication using scattering
media 10 p1504 A66-21677
Dispersion angle of radio waves in
interplanetary plasma 14 p2242 A66-28153
Correlation of simultaneous optical and
radio auroral data showing that radio wave
scattering belt includes visual auroral
belt 16 p2692 A66-30329
Quasar 3C-48 radio wave scattering by
interplanetary plasma
inhomogeneities 17 p3003 A66-32666
Approximate method for solving inverse
scattering of radio waves from convex
conducting bodies of complex
shape 18 p3072 A66-34962
Coronal scattering of radiation from solar
radio source, considering angular deflections

and brightness 18 p3199 A66-35044
Angular scattering of reflected radio waves
from ionosphere, giving results of 300
cases 19 p3344 A66-35266
Phase angle irregularities in scattering of
ionospheric radio waves 20 p3521 A66-38357
Coexistence of different types of sporadic
E layers corresponding to specularly
reflected and diffusely scattered fields
demonstrated, using radio
link 22 p3864 A66-39963
Vector scatter theory for backscatter of
circularly polarized waves from Moon and
Venus 22 p3866 A66-40174
Data processing of signal reception from
Soviet satellites indicates radio signals
scintillation caused by diffraction of waves
from ionospheric
nonuniformities 22 p3866 A66-40467
Incoherent scattering of radio waves by
plasma extended to include effects of
unequal ion and electron temperatures and
magnetic field 22 p3867 A66-40550
Scattering angle of spherical radio waves
on isotropic and radially elongated
inhomogeneities of supercorona of
Sun 22 p3983 A66-40754
RADIO SIGNAL
SA WHISTLER
Radio signals from artificial earth satellites
and survey of propagation, operation and
reception 03 p0335 A66-12896
Group delay time and group velocity
measurement methods in radio technology,
noting phase-characteristic transconductance,
pulse modulation, etc 04 p0482 A66-13902
Measurement of small coefficients of
nonlinear distortions from ratio between
effective voltages of first harmonic and
total signal 04 p0497 A66-13916
Relationships between VLF phase
fluctuations, radio signal fading and natural
geomagnetic background observed in British
Columbia 04 p0487 A66-14367
Clutter rejection in radar systems using
mismatched filter when Gaussian noise is
present, giving results for decaying RF
signal and rectangular RF
pulse 06 p0828 A66-16137
Characteristic distortion of Doppler curves
and radio signals of artificial satellite from
behind horizon 07 p1000 A66-17209
Distinguishability of distributions of radio
signal envelope, using statistical
distance 11 p1655 A66-22716
One-dimensional probability density of
phase derivative of mixture of radio signal
and Gaussian noise 11 p1658 A66-23222
Detection of fluctuating signal packets
from noise background with unknown
parameters 11 p1658 A66-23223
Radio occultation measurement of Martian
atmosphere over two regions by Mariner IV
space probe 15 p2602 A66-29958
Jodrell Bank experiment testing Askarian
hypothesis on radio pulses coincident with
EAS under mutual coherence effects and
checking coherent condition, internal
reflection, shower energy, threshold and
polarization 18 p3209 A66-35118
Group delay time and group velocity
measurement methods in radio technology,
noting phase-characteristic transconductance,
pulse modulation, etc 20 p3518 A66-37860
Measurement of small coefficients of
nonlinear distortions from ratio between
effective voltages of first harmonic and
total signal 20 p3532 A66-37874
Millisecond radio pulses from
Jupiter 22 p3980 A66-40400
Probability densities of geometric
parameters of polarization ellipse of quasi-
monochromatic, partially polarized radio and
noise signals in circular-and linear-base wave
representations 23 p4036 A66-41051
Distinguishability of distributions of radio
signal envelope, using statistical
distance 23 p4037 A66-41454
RADIO SOURCE
SA QUASI-STELLAR RADIO SOURCE
/QSO/
Parkes catalog of radio sources declination
zone minus 60 to minus 90
degrees 02 p0282 A66-11473
Discrete radio source scintillation,
considering irregular diffraction pattern
caused by ionospheric
irregularities 04 p0575 A66-13380

High energy electron influence on electron distribution function and effect on spectra of nonthermal galactic and extragalactic radio sources 04 p0575 A66-14171

Soviet radio telescope observation /1964/ of 3.3 and 0.8-cm radio emission sources from Tau-A, 3C 84, 3C 273 and 3C 279 05 p0759 A66-14872

Spectral measurements of 18 discrete radiation sources below 40 mc range, using interference radio telescope 05 p0748 A66-14878

Occultation of Tau A radio source by solar corona, noting interaction of radio source with corona irregularities 05 p0749 A66-15128

Dynamics and radiation of expanding cloud containing relativistic particles and magnetic field, approximating extended radio source 05 p0762 A66-15277

Flux density of Cas A measured, using horn-reflector antenna, response compared with output of reference-noise source 05 p0762 A66-15278

Radio source spectrum, discussing spectral indices, electron energy and H II density in quasi-stellar and high brightness-temperature sources 05 p0762 A66-15279

Measuring radio source diameter comparable to or smaller than resolution limit of telescope 05 p0763 A66-15287

Six faint radio sources identified with quasi-stellar objects, radio positions agreeing with optical positions 05 p0764 A66-15294

Characteristics of radio sources over active regions of Sun 05 p0764 A66-15317

Radio sources at 612 and 1400 mc/s and flux density for spectral index and spectral curvature parameter 05 p0769 A66-15843

High energy photons from discrete sources of cosmic radiation, verifying radio source electron production through proton-nuclei-matter interaction 06 p0947 A66-16572

Catalog of radio sources and description of Bologna radio telescope 07 p1134 A66-17527

Extraordinarily enhanced radio emission when radio source Taurus A was occulted by supercorona, concluding that supercorona shape is affected by intensity and direction of inclined interplanetary magnetic field 07 p1136 A66-17643

Rocket and satellite observations of LF radio waves from extragalactic sources 10 p1603 A66-21114

Cosmological-galactic creation, steady state expansion and high energy particle production associated with radio sources 11 p1774 A66-23068

Interferometric determination of radio source positions and use of Royal Radar Establishment 11 p1657 A66-23191

Interferometer 11 p1657 A66-23191

Peculiar galaxies and associated radio sources and quasars 12 p1947 A66-23659

Criteria for artificial radio sources developed by radio astronomical techniques include spectrum with maximum at 3 to 10 cm, small angular dimensions and variability in time 12 p1947 A66-23891

High resolving power interferometric observations of angular diameters of anomalous high flux density HF radio sources 12 p1950 A66-24390

Electron irregularity size and motion in interplanetary medium determined from radio source scintillation phenomena 13 p2182 A66-25571

Radio sources observation during immersion phase of lunar occultation 13 p2183 A66-25608

Quasi-stellar radio source declination measurements using radio telescope at 6.4 cm 13 p2186 A66-26049

Measurements of positions of 22 radio sources by one-mile radio telescope in England, using three parabolic reflectors 14 p2384 A66-27845

LF spectrum measurements of radio source 3C84, including plot of flux density vs frequency 14 p2384 A66-27846

Linear polarization of 54 discrete radio sources at 10.6 cm 14 p2385 A66-28118

Cosmic ray anisotropy and gamma rays in Orion analyzed, using Geiger counter and Cerenkov telescope 15 p2579 A66-29525

High energy photons from radio sources, registering EAS with Cerenkov telescope 15 p2579 A66-29526

Strong radio sources as accounted for by

repulsive effect of relativistic origin 16 p2796 A66-30149

Discrete source of cosmic gamma rays above 1 gev in balloon-borne detection 16 p2792 A66-30171

Radio source location by observing occultation of source by Moon 16 p2806 A66-31582

Flux density of nonthermal radio sources at 8000 mc noting measurement correction, correlation between curvature index spectral index and component separation 17 p2995 A66-31911

Solar supercorona wave scattering effect on position and shape of discrete radio source 17 p2999 A66-32235

Horizontal dimensions of ionospheric irregularities determined from differences in angular diameter observed in discrete radio sources 18 p3108 A66-34533

Brightness distribution of 3C444 radio source obtained from lunar occultation 18 p3235 A66-34658

Galactic magnetic field strength and distribution determined from synchrotron emission of relativistic electrons, noting Faraday rotation of polarized radiation from distant radio sources 18 p3235 A66-34744

Relativistic gas expansion into intergalactic space noting energy content, modes of expansion and radio source distribution 18 p3236 A66-34761

Coronal scattering of radiation from solar radio source, considering angular deflections and brightness 18 p3199 A66-35044

Stars and galaxies in field of 18 southern radio sources observed in Australia 18 p3237 A66-35084

Radio source identification between declinations -20 and -30 degrees 18 p3238 A66-35088

564 radio sources between declinations 0 and 20 degrees from Parkes catalogue 18 p3238 A66-35235

Faraday rotation variation with galactic coordinates studied for emission from 86 linearly polarized radio sources 18 p3238 A66-35236

Spectra of nine discrete radio sources in 20-40 mc/s range 19 p3459 A66-35491

Galactic evolution and structure - Solvay Physics Conference, Brussels, September 1964 20 p3645 A66-36957

Radio and optical observations of discrete radio sources, evaluating flux density measurement, position, brightness distribution and polarization 20 p3645 A66-36959

Synchrotron theory to calculate energy content of radio sources as function of relativistic electrons and magnetic flux 20 p3645 A66-36961

Cosmic ray origination from extragalactic radio sources 20 p3630 A66-37252

Radio-source fringe visibilities survey with NRAO interferometer of 21,500-wavelength base line 20 p3649 A66-37323

Identification of radio source 05 21-36 with N-galaxy, noting high optical luminosity and tabulated spectrogram 20 p3650 A66-37342

Cosmic radiation theories and experimental supporting evidence, origin of cosmic ray particles and relation between cosmic ray sources and radio wave sources 20 p3631 A66-37436

Relativistic expansion effect on observable properties and age of radio sources 21 p3813 A66-39209

High-energy gamma-ray absorption in photon field between sources and Earth and within radio sources themselves 21 p3809 A66-39210

Interferometric observation of cosmic emission at OH frequency, noting emission source dimensions 21 p3814 A66-39268

Diameters and positions of three sources of 18-cm OH emission determined, using 90-ft steerable paraboloids 21 p3814 A66-39269

Radio source flux density relation to antenna temperature studied, using antenna integral and convolute integral 22 p3862 A66-39814

Microwave background radiation field accounted for by integrated effect of population of radio sources if CN excitation is collisional in origin 22 p3978 A66-40004

Stokes parameters measurement as

function of frequency for anomalous polarized OH emission originating near thermal radio source W3 22 p3978 A66-40004

Galactic radio sources noting disk model brightness distribution, relativistic particle energies, continuous particle acceleration and ratio between proton and electron component of cosmic radiation 22 p3985 A66-40909

Line-of-sight velocities in gas in peculiar extragalactic radio source NGC 4038-4 measured in orientations across object 23 p4129 A66-41809

Evolving synchrotron self-absorption model of extragalactic nonthermal radio sources 23 p4132 A66-42040

Coordinates, flux densities and spectral indices of various radio sources believed to be extragalactic 24 p4273 A66-42404

Time evolution of synchrotron radiation spectrum of radio sources, considering only radiation losses where magnetic field is isotropic with constant intensity and random space orientation 24 p4278 A66-42709

RADIO SPECTROSCOPY

Emission and absorption lines with anomalous intensity distributions indicating hydroxyl molecule concentrations in Sagittarius A 07 p1133 A66-17460

Transverse optical pumping of mercury isotope to show existence of new magnetic resonance lines 08 p1232 A66-18640

Wide band solar radiospetrography employing untuned parametric upconverter 11 p1704 A66-22550

Microwave spectrometer technique using nonlinear properties of resonance saturation in gases for detection of absorption lines 15 p2501 A66-29000

Spectroscopy of radio galaxies and quasars stellar radio sources showing radio emission production 20 p3645 A66-36960

Solar radio bursts, discussing metric and decametric emission classification via ground-based and satellite mounted radio spectrographs 24 p4264 A66-42660

RADIO SPECTRUM

Variations of flux of solar radio emission in 3 to 450 cm range over 11-year cycle /1953 to 1963/ 05 p0748 A66-14860

Radio source spectrum, discussing spectral indices, electron energy and H II density in quasi-stellar and high brightness-temperature sources 05 p0762 A66-15277

27-day variation of solar radio flux at 10.7 and 20 cm 11 p1768 A66-22370

Lunar line waveguide parameters calculated for inner conductor displacement and ratio of radii 19 p3311 A66-35300

Synchrotron radiation measurements near magnetic equator, noting radio spectrum radiation due to injection of relativistic electrons into trapped orbits of geomagnetic field 20 p3644 A66-38340

Line shape of RF dimensional effect in metals showing correlation with electromagnetic wave attenuation in skin layer 24 p4172 A66-42520

RADIO STAR SIGNAL

Continuous radio emission in our Galaxy discussing radio stars, background features corona, emission mechanisms, etc 11 p1767 A66-22250

Correlation method measuring far-field patterns of large-aperture antennas, using radio star sources and auxiliary antenna for providing reference signal for cross correlation with test antenna signal 11 p1662 A66-22540

Calibration of communication satellite Earth station antenna system, using radio stars 14 p2238 A66-27530

Latitudinal variations of ionospheric irregularities studied via synchronous and 1000 km satellites, noting Early Bird data scintillation index graphs, radio star signals etc 15 p2496 A66-30070

Varactor diode parametric amplifier compared for various applications in satellite communication ground station including FM reception, tracking and radio noise reception 17 p2890 A66-32900

Spread F and ionospheric F region irregularities relation to magnetic field alignment, discussing radio star scintillations 17 p2923 A66-33440

Red shifts of quasi-stellar objects and relation to radio and optical magnitudes

concluding that red shifts have no relation to distance 18 p3235 A66-34718

RADIO TELEGRAPHY

Autocorrelation function and energy spectrum of radiotelegraph signal, noting channel parameter dependency on transmission speed 23 p4036 A66-41050

RADIO TELEMETRY

Signal to noise ratios for band-limited signals and filtering processes, using simultaneously noise and modulated carrier, noting limiter, summation and bias noise 04 p0477 A66-13586

RADIO TELESCOPE

Flexible satellite attitude control, analyzing satellite as thin circular plate with application to radio telescopes, noting vibration modes and nonlinear gyroscopic coupling terms 01 p0142 A66-10674

Steerable radio telescopes noting Mark I radio telescope at Jodrell Bank, England 01 p0139 A66-11156

Radio telescopes and capabilities, resolution and collecting areas noting interferometric, cross-synthesis and aperture-synthesis types 01 p0139 A66-11158

Radio telescope with solid-surface paraboloid reflector of 140 ft diameter 02 p0231 A66-11865

Interferometric method of measuring angular sizes of discrete sources of radio emission to obtain high resolution 04 p0576 A66-13463

Radio astronomic techniques for locating radio sources, measuring intensity and mapping distribution 04 p0576 A66-13464

Catalog of radio telescope sky survey covering declination range between plus 40 and plus 44 degrees 05 p0759 A66-14806

Quasi-stellar radio source 3C 273 observed with on-off and dual-beam techniques at millimeter wavelength, noting flux variation 05 p0764 A66-15292

First observations at short wavelengths with 140-ft radio telescope at Green Bank, West Virginia 06 p0955 A66-16789

Tuning antennas of radio telescopes with flat reflectors by in-phase addition of reflected fields 06 p0859 A66-17193

Parabolic antenna design for millimeter wavelength radio telescope [AIAA PAPER 64-423] 08 p1202 A66-18814

Radio telescope techniques applied to astronomy, noting data processing and antenna receiving systems including masers, parametric amplifiers, etc 10 p1602 A66-21064

Phase shifters for signals arriving from North-South arm elements of Northern Cross radio telescope reflector antenna array 12 p1836 A66-24304

Alteration of antenna spatial frequency response due to time constant of radiometer and scan velocity 12 p1837 A66-24311

Control of radio telescope, noting servosystem ability to keep tracking position errors and wind-caused error within certain limits 12 p1851 A66-24319

Radiotelescope of 40-sec-of-arc resolving power, composed of compound interferometers with small antennas 13 p2058 A66-25569

Antenna drive with feedback control system for radio telescope, noting design, construction and operation 13 p2038 A66-25640

Resolving power of radio telescopes and radio interferometers as affected by condition of propagation of radio waves in Earth atmosphere and cosmic medium 14 p2239 A66-27735

Measurements of positions of 22 radio sources by one-mile radio telescope in England, using three parabolic reflectors 14 p2384 A66-27845

OH emission and narrow spectral features made with circularly polarized field horn on 140-ft radio telescope in November 1965 14 p2384 A66-27901

Ninety meter radio telescope at Bonn 16 p2673 A66-30270

Receiver of ionospheric diffusion probe noting radio telescope, low noise parametric amplifier, filters, signal detection, etc 16 p2662 A66-30957

Radio telescopic temperature measurements of Venus at 3.75 cm wavelength over full cycle of planetary phase angle 17 p3006 A66-33017

Radiation characteristics of circular aperture and linear antenna with partially coherent illumination 18 p3074 A66-33536

Calibration of spherical reflector of Arecibo Ionospheric Observatory antenna, using analytical photogrammetric methods 18 p3075 A66-33746

High precision 85-ft paraboloidal reflector radio telescope, U.S. Naval Research Laboratory, Maryland Point Observatory 18 p3094 A66-34052

Jodrell Bank 250-ft Mark I radio telescope as part of long baseline interferometer 18 p3094 A66-34054

Structural vibration of large microwave steerable radio telescopes and large paraboloidal reflectors due to wind loading 18 p3255 A66-34268

Antenna design techniques, describing methods of improvement in resolution and sensitivity of radio telescopes 18 p3081 A66-34272

Angular measuring system for radio telescopes, noting application of Raksyn variable capacitor block as nonwearing rotating pinion 18 p3113 A66-34274

Feed system design for radio telescope emphasizing microwave performance, noting gain, efficiency, resolution, application, etc 18 p3082 A66-34287

Vibration analysis of CSIRO 210-ft radio telescope, discussing natural frequencies, structure resonance effects, error detection, etc 18 p3083 A66-34297

Design factors for fully steerable radio telescopes in 400-ft diameter size range for operation at 10 cm wavelength 18 p3083 A66-34300

Design specifications for fully steerable radio telescope with 80 m parabolic opening 18 p3084 A66-34305

Aperture efficiency and surface errors of 210-ft radio telescope at Parkes 18 p3084 A66-34309

Improved feed synthesis using multimodes for large circular paraboloids at Parkes 18 p3084 A66-34310

Bowl-distortion and dynamic measurements of reflector profile of modified Goonhilly no. 1 antenna 18 p3085 A66-34313

Modified Goonhilly No. 1 aerial noise-temperature, gain and figure of merit 18 p3085 A66-34316

Synthesis radio telescope at Westerbork, Holland 18 p3085 A66-34320

Reflector dishes of 210-ft diameter radio telescope at Parkes, Australia, and 150-ft diameter radio telescope at Lake Traverse, Ontario 18 p3095 A66-34321

Jodrell Bank Mark II radio telescope control system 18 p3096 A66-34327

Pencil-beam radio telescope operating at 178 megacycles which uses aperture synthesis to obtain precise right ascension and declination, noting profiles of sample region of sky 18 p3087 A66-34572

Tuning antennas of radio telescopes with flat reflectors by in-phase addition of reflected fields 19 p3314 A66-35551

Spectral receiver of Nancy radiotelescope of correlation type, for extragalactic observations on 21-cm neutral hydrogen band 19 p3319 A66-36259

Parabolic radio telescope at Bordeaux solar observatory operating at 930 mc 19 p3466 A66-36613

Radio astronomy instrumentation, describing antenna parameters, design characteristics, instrumentation needs, etc 20 p3524 A66-36962

Soviet RT-15 radio telescope control system, noting two-reflector system telescope antennas, parabolic mainreflector and automatic and visual tracking possibilities 20 p3540 A66-37026

First spectral observation at 21-cm line with radiotelescope at Nancy, France 20 p3654 A66-37825

Direction response of meson telescopes with vertical and inclined axes used in recording of cosmic ray variations 20 p3632 A66-38073

Magnetic field-aligned ionization detected during minimum sunspot activity, using radio telescopes of radio interferometer 22 p3908 A66-39964

Radio emission from Venus, Jupiter, Pluto and other planets at 1.9 cm analyzed, using

radio telescope, noting effective temperatures 23 p4131 A66-41818

RADIO TRACKING

Satellite and space-probe tracking by radar, radio and optical observations from Earth 02 p0191 A66-11693

RADIO TRANSMISSION

SA SHORT WAVE RADIO TRANSMISSION

Small slope phase-frequency for minimum phase loops with adjustable transmission band, using cascading tuned individual or connected circuits 02 p0209 A66-12267

Comments on Volland paper about analytical model of Earth-ionosphere waveguide supposedly agreeing with Austin radio transmission formula 05 p0632 A66-14840

Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605

Parameters of dielectric walls of various structures with optimal radio-engineering characteristics treated by graphical method 10 p1511 A66-21676

Small slope phase-frequency for minimum phase loops with adjustable transmission band, using cascading tuned individual or connected circuits 12 p1848 A66-23871

RF transmission through plasmas created by rocket exhaust of Saturn vehicle [AIAA PAPER 65-185] 12 p1820 A66-24690

Semiautomatic digital data processing system used in ground control of interceptor aircraft, noting track marking on PPI display, control of height radar, radio message transmission, etc 14 p2271 A66-28299

Receiver design and results of dual VLF transmissions for obtaining timing information 19 p3357 A66-35693

VHF communications system for S-band transmission link 20 p3515 A66-37228

Cosmic radio wave, whistler and transmitted radio wave interactions with ionospheric magnetoplasma in collision-dominated, photoequilibrium and photoionization-dominated regions 22 p3916 A66-40873

Electromagnetic wave transmission through and reflection from homogeneous nonlinear anisotropic slab between two linear isotropic media 24 p4173 A66-42706

RADIO TRANSMITTER

Wideband FM transmitters and RF-to-RF repeaters for space application in S-and X-band frequency ranges 01 p0032 A66-11129

Pulse shape radiated by miniature micropower telemetry transmitter 04 p0477 A66-13583

Propagation between Earth and ionosphere up to 100 km of VLF radio waves sent by ground transmitter, calculating field pattern 05 p0672 A66-15041

Statistical model of random quasi-sinusoidal function of constant amplitude represented by emission of laser or radio transmitter 08 p1244 A66-18637

Solid state transmitters for Gemini spacecraft telemetry system, noting PCM system operation and design 08 p1181 A66-18728

Disk-seal triode coupled with transmitting tube for establishing radio contact between Mariner IV space probe and Earth 11 p1665 A66-22682

TWT delivering CW power in L, S, C and X-band designed for space environment, considering size, weight, voltage, etc, and comparing klystrons, amplifiers, circuit design, etc 12 p1844 A66-24775

Radar observation of Sun, noting continuous wave transmitter, antenna, etc 13 p2022 A66-25537

Field separation of ground transmitter into ordinary and extraordinary modes when traversing lower boundary of anisotropic ionosphere, noting effect of incidence angle, magnetic azimuth, etc, on energy dissipation of VLF ground wave 14 p2238 A66-27613

Low power long-range digital communications system based on narrow bandwidth portable transmitter and fixed station receiver 15 p2450 A66-28972

Analog telemetering system, discussing design, transmitter principle, receiver elements, special features and test

results 15 p2451 A66-29361
Solid state transmitter with triggered Si controlled rectifiers /SCRs/ for high power efficiency in LF and ULF bands 17 p2895 A66-33120
Narrow band transmitters for response code of secondary radar installations containing identity of aircraft and altitude for air traffic control 21 p3706 A66-39634

RADIO WAVE

SA COSMIC RADIO WAVE
SA GALACTIC RADIO WAVE
SA SOLAR RADIO WAVE

Nondeviated absorption of radio waves in intermediate region between E and F layers 01 p0031 A66-11051
Ionospheric interference with cosmic radio waves, analyzing scintillation, noting diffraction of wavefront passing through ionospheric electron density layer 03 p0335 A66-12855
Book on lower ionosphere physics noting radio wave propagation, ionospheric currents, solar radiation and flares, ion kinetics, electron collision frequencies, etc 04 p0515 A66-13835

Difference in Doppler shifts of radio waves emitted at various frequencies by satellite Elektron I radio station, plotting electron concentration dependence on altitude 04 p0515 A66-13837
Meteor wake diffusion model used for data interpretation on radio wave dispersion due to wake produced by Mariner VI capsule landing 04 p0481 A66-13847
Wave propagation for LF radio waves analogous to geometrical optics with path integral describing effects of Earth conductivity, curvature and reflection height 05 p0632 A66-14841

Radio wave absorption coefficients calculated, using approximations of magnetoionic formulae 09 p1341 A66-19860
Absorption coefficient of water vapor in relative windows of transparency for millimeter and submillimeter radio waves 09 p1343 A66-20338

Excitation, internal reflection and limiting polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369

Anomalous ionization of lower ionosphere at medium latitudes during worldwide geomagnetic storm result in increased radio wave absorption in ionosphere 11 p1696 A66-22416

Classical problem of diffraction of radio waves around spherical Earth 11 p1652 A66-22462

Radio waves and circuits - URSI Conference, Tokyo, September 1963 11 p1653 A66-22626

Antenna orientation effect on polarization components of radio waves reflected from ionosphere, noting occurrence and properties of magnetoionic component of polarization 12 p1869 A66-24273

Phase variation dependence at receiver output on polarization of wave incident on antenna of phase measuring system 12 p1817 A66-24277

Vertical incidence fading amplitude experiment using array of receiving antennas, obtaining data on ground diffraction pattern of reflected radio waves, noting correlation function shapes 12 p1824 A66-24840

Circuits incorporating varactor diodes, pumped at IF, as mixers, analyzing circuit characteristics 14 p2236 A66-27352

Correctors for variations in group propagation time of AM wave transmitted by radio carrier wave, noting circuit analysis for matched and unmatched all-pass IF filters 14 p2252 A66-27353

Transmission loss in whistler mode of propagation of VLF radio waves for path portion underneath ionosphere, using geometrical optics 16 p2652 A66-30709

Altitude-time distribution of electron concentration, noting satellite measurements of ionospheric inhomogeneities and difference in Doppler shifts of coherent radio waves emitted by Electron I satellite 16 p2696 A66-30920

Rocket attitude determined by simultaneous measurement of geomagnetic

field and electromagnetic field generated by radio wave transmitted by rocket-mounted dipole 16 p2810 A66-30958

Short distance expansion method used to calculate ground radio wave propagation over mixed path on spherical Earth 19 p3305 A66-36421
Scanning antenna operating principles, noting adjustment of directivity to receive radio waves from long distance 20 p3530 A66-37713

Collision effects on full-wave and ray-optics virtual height computations for LF radio waves reflected from stratified ionosphere 20 p3521 A66-38360

Electron density and collision frequency profiles for D region obtained through simultaneous measurement of radio wave phase and amplitude interaction 22 p3906 A66-39953

Kaufman assumption regarding universe expansion considered untenable because it requires intergalactic hydrogen temperature to remain constant while hydrogen has expanded in volume 22 p3978 A66-40008

RADIO WAVE REFRACTION

Polar interferometric method for measuring north-south component of ultrashort wave refraction in ionosphere and optical thickness gradient 02 p0190 A66-11415
Ground diffraction pattern caused by radio wave reflection from F region, using array of three aerials 11 p1651 A66-22374

Refraction angle of radio waves in troposphere and stratosphere, using refractive index of air 11 p1658 A66-23220

Radio-polarization method of investigating stresses in bodies which are opaque to visible light but transparent to SHF radio waves 13 p2194 A66-25095

Oscillations of vertical component of ionospheric refraction measured, using cliff radio interferometer and signals from satellites 13 p2020 A66-25223

Reflection coefficients for electromagnetic waves in variable refractive index medium from approximate solution of linear differential equations 13 p2025 A66-26040

Frequency correlation of ionospheric radio waves in inhomogeneous thin layer medium and effect of irregular horizontal ionization gradients 15 p2451 A66-29111

Atmospheric refractive index variation measured by microwave refractometer 16 p2693 A66-30337

Doppler frequency shift for radio waves radiating coherently from satellite in ionosphere, considering electron concentration and angles of refraction 22 p3869 A66-40779

RADIOACTIVE CONTAMINATION

Radioactive contaminant detection on surface of high altitude transports, noting passenger protection 04 p0458 A66-14462

Radioactive contamination of aircraft and effects on maintenance, discussing washing and monitoring procedures for containment and personnel protection 06 p0816 A66-16059

RADIOACTIVE DATING

Exobiology concepts suggest that apparent inherent limitations on temperature, pressure or chemical environment for living matter are geocentric myths 02 p0181 A66-11602

Radiogenic, spallogenic and primordial noble gases in stone meteorites, determining helium and neon content 05 p0756 A66-14506

Secular variations of cosmic ray produced carbon 14 in 150 wood samples up to 2000 years old 05 p0747 A66-14795

C 14 content in tree rings, Tungusk meteor and supernova explosions 05 p0765 A66-15334

Strontium-rubidium age of iron meteorite 07 p1132 A66-17234

Age of Bosumtwi crater area, Ghana, determined by mass spectrometry of rubidium, strontium and strontium isotopic composition, compared to Ivory Coast tektite age 10 p1608 A66-21741

Carbon 14 content of dendrochronologically dated tree rings used to determine atmospheric C-14 variation over past six millennia 11 p1697 A66-22568

Lower limit of age of cosmic ray nuclei, flux ratio of Be nuclei to B nuclei and intergalactic cosmic ray propagation 12 p1938 A66-24092

Iron meteorites with low cosmic ray

exposure ages examined via analysis of product of argon 39 and 38 13 p2177 A66-2518

Iron and stony meteorite evolution, cosmic radiation ages and space erosion model 14 p2390 A66-2840

C 14 content in tree rings, Tungusk meteor and supernova explosions 15 p2603 A66-2998

Cosmic radiation age spectrum of chondrites by calculation based on interplanetary erosion rate, discussing asteroidal origin for meteorites 18 p3232 A66-3452

Radiation age of 74 iron meteorites estimated from content of cosmogenic isotopes Ga and Ge 19 p3456 A66-3533

Minerals responsible for thermoluminescence of meteorites identified and radiation age derived 19 p3465 A66-3638

Determination of constancy of cosmic radiation and of terrestrial and cosmic age of ferrous meteorites by radioactivity of A 26 and Be 10 20 p3651 A66-3741

Thermal history of Bruderheim meteorite showing lost of 90 percent radiogenic argon 40 20 p3651 A66-3759

Shield of volatile matter acting as cosmic radiation barrier as possible explanation of contraction between radiation ages of stony and iron meteorites 23 p4065 A66-4183

Radiotrionium ratios in precipitation from two extratropical cyclones containing nuclear debris of different ages 23 p4124 A66-4184

Solar activity variations, C 14 production by cosmic rays and reevaluation of C 14 dating 24 p4265 A66-4273

RADIOACTIVE DEBRIS

Cosmos V satellite measurement of July 9, 1962 high altitude nuclear detonation used to determine fission debris over Johnston Island 08 p1219 A66-1941

Radioactive debris over Fairbanks, Alaska on February 18, 1965, investigating bremsstrahlung X-rays in auroral zone 12 p1875 A66-24896

Vertical distribution and transport of radioactive strontium aerosols in rain and air across trade wind inversion at Hawaii 23 p4124 A66-4184

RADIOACTIVE DECAY

SA VECTOR CURRENT
Origin of anomalous xenon 129 in meteorite from decay within meteorite itself 04 p0580 A66-14488

Potassium content and K-A ages of 18 amphoteric chondrites determined from isotope dilution technique 04 p0580 A66-14488

Mean lives of 3s, 3d, 4s, 4p and 4d states in hydrogen and relative initial radiation intensities 07 p1083 A66-18420

Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift method 07 p1083 A66-18423

Tritium diffusion constants of stone meteorites and dependence on tritium production mechanism 09 p1456 A66-20421

Hartree-Fock approximation method for calculating efficiencies of multiple-photon processes 11 p1737 A66-22495

Production rates of Cl 36 and Ar 39 in metallic and stone phases of Leedey chondrite 12 p1948 A66-23904

Lunar surface layer radioactivity from diffusion of radon and thoron 17 p3004 A66-32942

Periodic and height-dependent solutions for disturbances of concentrations of radon and thoron and decay products above Earth surface, considering turbulent diffusion and radioactive decay 19 p3453 A66-36385

RADIOACTIVE ELEMENT

SA ACTINIDE
SA PLUTONIUM

Radioactive krypton-85 diffusion technique for temperature mapping of turbine blade surfaces [SAE PAPER 650704] 06 p0944 A66-17078

Mean probability of coupling between electrons of flame on electronegative gas and radioactive bromium tracer injected into flame, calculating electrons coupling cross section on bromium atoms 16 p2763 A66-31208

RADIOACTIVE FALLOUT

Sudden increase in radioactive fallout

- traced to stratospheric origin due to debris age exceeding assumed mean tropospheric residence time of one month 11 p1699 A66-23095
- Meteorological effects on atmospheric concentrations of radon beta activity in ground proximity, noting effects of wind, temperature, radioactive precipitation and atmospheric scavenging 11 p1731 A66-23489
- IGY and IGC data on atmospheric washout of radioactive fission products by precipitation 14 p2376 A66-27540
- Vertical atmospheric distribution of Rn, Tn and short-lived decay products under stationary conditions 16 p2698 A66-31345
- Natural purification of lower troposphere from radioactive aerosols through deposition and absorption by atmospheric precipitation 18 p3108 A66-34612
- RADIOACTIVE ISOTOPE**
- SA ALUMINUM 26
- SA ARGON 40
- SA BERYLLIUM 10
- SA COBALT 60
- SA HELIUM 3
- SA NUCLEAR ISOTOPE
- SA MONOPROPELLANT
- SA PLUTONIUM 238
- SA POTASSIUM 40
- SA STRONTIUM 90
- SA URANIUM 235
- Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 01 p0046 A66-11040
- Nuclear power systems for spaceflight considering isotope batteries, energy source reactors and nuclear drives 04 p0544 A66-13547
- Lattice and grain boundary self-diffusion coefficients of radioactive nickel 63 into high purity nickel measured over temperature range 650-475 degrees C 04 p0535 A66-13746
- Radioisotope-photovoltaic energy conversion system, discussing principal elements, radiative exchange and efficiency calculations 07 p0990 A66-17231
- Ablation measurement using sensor with radioactive dispersions being carried away with char 07 p1034 A66-17812
- [AIAA PAPER 65-363] 07 p1034 A66-17812
- Radioisotope-fueled thermoelectric generator for long life and reliability 07 p0994 A66-18319
- Design and operation of radioisotope-powered battery using direct beta-particle collection to negatively charge electrode, noting choice of isotope, dielectric, collector, etc 08 p1172 A66-19657
- Radioactive isotopes of Mo99 and W185 used to study diffusion of two components of Mo-W alloy at intervals of 100 degrees over temperature range 1500 to 2400 degrees C 09 p1389 A66-20540
- Distribution coefficient and electrical behavior of indium in cadmium telluride crystals, using In 114 /half-life 49 days/ as tracer 10 p1574 A66-21352
- Diffusion of selenium in cadmium telluride, using radioactive Se as tracer 10 p1574 A66-21353
- Properties of production and decay of neodymium 141, examining nuclear reaction /n, 2n/ 10 p1558 A66-21962
- Secular variation of atmospheric radiocarbon concentration, noting dependence on geomagnetic field strength 11 p1698 A66-22569
- Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 11 p1671 A66-23286
- Reliability, durability and reduction of failure probability in radioisotope energy source design 13 p2085 A66-25285
- Nuclear-electric power supply for manned space stations using radioactive isotopes [AIAA PAPER 64-711] 13 p2004 A66-26605
- Phosgenation procedure for synthesis of carbon-14 labeled isocyanates, noting isotope distribution in compounds 14 p2231 A66-26871
- Sliding wear evolution and radioactive tracer measurement 14 p2305 A66-28466
- Low energy cosmic neutrino detection with radiochemical methods, noting mass spectrometric and nuclear emulsion methods based on Pontecorvo-Davis reaction 15 p2590 A66-29592
- SNAP-15A design and performance, comparison with semiconductor or metal thermocouples, test results, safety, etc 15 p2429 A66-29603
- Brayton cycle, Rankine cycle and thermoelectric systems considered as radioisotope secondary power systems for MOL [ASME PAPER 65-AV-18] 16 p2636 A66-30856
- Design of isotopic heat sources for space missions, noting atmospheric contamination when source burns on reentry, source and shield weights, sealing of alpha emitters, etc 16 p2745 A66-31710
- Mean absolute particle velocity in fluidized bed calculated by radioactive isotope method 18 p3267 A66-35058
- Rare gas mass spectrometric analysis of He, Ne and Ar in Bursa and Canakkale chondrites 20 p3651 A66-37578
- Meteorite size prior to entering atmosphere, noting radius and use of isotope activity nomogram 21 p3812 A66-38953
- Isotopic composition of lithium in chondrules from Bruderheim and Bjurböle meteorites 22 p3975 A66-39681
- Rare gas isotope composition of Estherville mesosiderite and Haralaya, Juvinas, Shergotty and Stannern achondrites 22 p3975 A66-39682
- Troilite-graphite phase from Toluca meteorite analyzed to determine concentration and isotopic composition of lead using mass spectrometer, noting radiogenic problem 22 p3976 A66-39684
- Sensitivity and safety of Kr-85 /radiokrypton/ for leak detection 22 p3928 A66-40497
- Unmanned lunar roving vehicle power requirements, comparing radioisotope thermoelectric generator and solar cell/battery systems 23 p4017 A66-41104
- Isotope power systems for lunar roving vehicles noting fuel, radiation shielding, performance, weight, etc 23 p4024 A66-41770
- Zn diffusion effect on uniformly Mn-doped GaAs wafer showing via radiotracer technique changes in impurity concentration profile 24 p4250 A66-42255
- RADIOACTIVE MATERIAL**
- Automatic program conversion system for operations with radioactive materials 06 p0838 A66-16604
- RADIOACTIVE NUCLIDE**
- Radionuclide production in iron targets bombarded with 400-mev protons investigated by Monte Carlo method for cosmic ray effects on meteorites 11 p1775 A66-23145
- Al-26 and Be-10 radioactivities in cores of Pacific sediments and implications regarding low-energy proton flux in interplanetary space over last 100,000 years 12 p1943 A66-24236
- RADIOACTIVITY**

- Radiostrontium ratios in precipitation from two extratropical cyclones containing nuclear debris of different ages 23 p4124 A66-41844
- Antimony abundance in meteorites determined by neutron activation analysis 24 p4274 A66-42432
- RADIOGRAPHY**
- SA AUTORADIOGRAPHY
- SA PHOTOGRAPHY
- SA X-RAY PHOTOGRAPHY
- Radiographic acceptance standards for setting limits on size and distribution of porosity in steel weldments [ASME PAPER 64-WA/MET-3] 06 p0884 A66-16207
- Radiographic examination through steel using cold neutrons produced by placing polycrystalline beryllium neutron filter and single crystal bismuth gamma-ray filter in beam tube 06 p0884 A66-17030
- Unsharpness and contrast effect on slit detection studied by radiography 13 p2086 A66-25820
- Radiography and principal factors variation at energies below 400 kvp 15 p2509 A66-29318
- Radiographic examination of large filament-wound solid propellant motor cases 21 p3744 A66-39152
- Neutron radiographic techniques to solve nondestructive testing problem of pyrotechnic cartridge inspection 21 p3806 A66-39153
- RADIOLOGY**
- Ionizing radiation as potential lightning hazard, noting lightning protection device for medical and industrial buildings 03 p0423 A66-13266
- Hazards, effect, safety and precaution for prevention of physical injuries from laser radiation 04 p0529 A66-13694
- Radiological prediction and monitoring of tests at Nuclear Rocket Development Station 12 p1911 A66-23671
- Antiradiation protection and relative biological effectiveness of seldom-ionizing radiation 15 p2435 A66-29455
- RADIOLYSIS**
- Radiolysis of pure liquid nitrogen tetroxide, detailing product formation kinetics and effects of added oxygen and nitric oxide 02 p0188 A66-11593
- Xenon sensitized radiolysis of propane, examining heterogeneous neutralization of isopropyl radical 18 p3162 A66-34502
- Radiolysis applied to effects of ionizing radiation on volatile inorganic compounds of fluorine, oxygen and nitrogen, noting mass spectrometric peaks 23 p4032 A66-41235
- RADIOMETER**
- SA DICKE TYPE RADIOMETER
- SA MICROWAVE RADIOMETER
- Parametric amplification in millimeter-wave range, detailing parametric amplifier with germanium epitaxial diodes for use in radiometers 03 p0346 A66-13322
- Modulation type radiometer with input parametric converter used for observation of weak radiation from Moon, Jupiter and other celestial sources 04 p0520 A66-13883
- Cavity type radiometer for absolute total intensity measurement of visible and IR radiation [ISA PREPRINT 1.11-3-65] 05 p0683 A66-15505
- Spectral radiometer to measure radiant power emitted by reentry event 07 p1030 A66-17296
- Antenna array and radiometer selection for orbiting LF radio astronomical observatory 10 p1507 A66-21122
- Brown-Twiss radiometer circuit for measuring power level of weak noise sources 10 p1503 A66-21650
- Two-channel satellite-borne radiometric

system to furnish temperature information for SST flight planning, discussing conceptual design, operating mode and data handling procedures [AIAA PAPER 66-372] 12 p1872 A66-24500

Solar burst radiometer for radio astronomy Explorer satellite, measuring spectral energy distribution below ionospheric cut-off level 12 p1883 A66-24679

Pulsed type radiometer, which samples noise emitted by ionized medium, used to measure electron temperature of nonpermanent plasmas 14 p2290 A66-26823

Parametric amplification in millimeter-wave range, detailing parametric amplifier with germanium epitaxial diodes for use in radiometers 14 p2260 A66-28296

Molecular inelastic collision cross sections from radiometer force curve 15 p2543 A66-28782

CAT detection by radiometric measurement of mm wave emission from oxygen molecules and measurement of ambient air temperature and temperature gradient 15 p2532 A66-28926

Modulation type radiometer with input parametric converter used for observation of weak radiation from Moon, Jupiter and other celestial sources 15 p2503 A66-29695

Atmospheric moisture from balloon radiometer measurements of atmospheric profiles of long wave irradiance [AIAA PAPER 65-461] 16 p2706 A66-30910

Two-radiometer technique for rapid verification of total emittance without surface temperature measurement for quality control [AIAA PAPER 65-431] 16 p2706 A66-30912

Design and test flying of transistorized sonde used with Suomi-Kuhn radiometer for measurement of heat loss by long wave radiation from atmosphere 19 p3353 A66-35316

Ultrasonic field intensity in liquid measured with microradiometer, discussing instrument design concepts, advantages and operation 21 p3735 A66-38518

Radiometer measuring total intensity of UV, visible and IR radiation 22 p3918 A66-40228

RADIOMETRY

Correlation of monochromator and filter radiometry determinations of spectral distribution in large solar simulators 02 p0212 A66-11224

Hertzian and IR radiometry applied to temperature determination for use in aerial navigation 02 p0257 A66-12032

Cloud height, ground-and sea-surface temperatures, ice forms, terrain features and soil moisture information from Nimbus I satellite equipped with TV cameras and IR radiometer 03 p0360 A66-12365

Radiometric performance of solid state superheterodyne receiver comparable to that obtained with masers and parametric amplifiers 03 p0339 A66-12437

Radiometric and photometric measures including radiant and luminous flux, radiant and luminous emittance, radiance, luminance, wavelength region, etc 06 p0882 A66-16897

Recording sampling system for measuring energy incident on biological system exposed to laser beam 07 p1030 A66-17293

Radiometric observation of Venus near inferior conjunction and Mars near opposition of 1965 at 430 mc/s 08 p1289 A66-18790

Venus cloud layer and brightness temperature from radiometric microwave observations from nocturnal side of planet 09 p1451 A66-20112

Radiometric mapping and determination of lunar brightness temperature at 3 mm wavelength 09 p1455 A66-20389

Spectroradiometric pyrometry of shock heated gases by IR emission and absorption measurements 09 p1382 A66-20508

Visual, photographic and radiometric observation of Mars surface and atmosphere 13 p2013 A66-25278

Modification of Cary Model 14 for spectral irradiance measurements 13 p2080 A66-25987

Evidence that Martian maria corresponds to elevated land areas, citing radiometric measurement results 13 p2189 A66-26601

Concepts, symbols, units and nomenclature

for transmission of radiant flux through Earth /variable density/ atmosphere 14 p2335 A66-27776

Optimum wavelength intervals for surface temperature radiometry from total reflectance measurement of common surface minerals 15 p2498 A66-28833

High resolution IR radiometer on Nimbus I satellite for providing detailed night cold information 17 p2927 A66-33344

Coolant passage wall temperature measurement in nuclear rocket nozzle during chemical stimulation testing by radiometry without affecting hot gas or coolant flow or disrupting heat flow 19 p3356 A66-35632

Quantitative IR radiometric skin temperature measurements, using simple radiometer and method for measuring surface temperature of forearm and hand 20 p3507 A66-38418

Statistical correlation of IR cooling measurements by Tiros II /Channel 2 and Channel 4/ and radiometersonde measurements of radiation divergence within atmospheric layers 22 p3944 A66-40431

Millimeter waves applications in atmospheric research, discussing radar meteorology, forward scatter or troposcatter and passive or radiometric techniques 22 p3869 A66-40731

Electronically-scanned K-band passive phased array for spaceborne radiometry 22 p3882 A66-40752

Calibration problem of using vidicon for making radiometric and spectrometric measurements, examining application to digital TV spectrometer system 23 p4069 A66-41666

Radiometric capability of S-10 image orthicon system evaluated for quantitative radiation measurements against reentry vehicles 23 p4070 A66-41668

RADIOPATHOLOGY

S RADIATION SICKNESS

RADIOSENSITIVITY

Radar receiving equipment sensitivity measurement by analog method and by time selection scheme 08 p1195 A66-19350

Radiosensitivity differences in yeast cells in terms of differences in chromosome-replication and genetic-structure-restoration intensities 15 p2438 A66-29486

Sensitivity and safety of Kr-85 /radiokrypton/ for leak detection 22 p3928 A66-40497

RADIOSONDE

SA ENDORADIOSONDE

Secular trend of cosmic ray intensity in stratosphere and primary cosmic ray energy spectrum based on 3000 radiosonde measurements 07 p1123 A66-17993

Radiometersonde observations of atmospheric IR irradiance, noting measurement results with improved equipment 09 p1369 A66-19869

Radiosonde for stratospheric cosmic ray intensity measurement, noting structure, operation and results 09 p1379 A66-20236

Strong electric-field radiosonde for thunderclouds, noting sounding results 11 p1725 A66-22198

Ambient temperature measurements from radiosondes flown on constant-level balloons 17 p2949 A66-33342

Freiberg radiosonde aneroid capsule design modification, using U-shaped axle which is synchronized with capsule deflections 18 p3110 A66-33964

Counting rate of high latitude NM-64 neutron monitors, examining dependence on atmospheric temperature and water vapor content 18 p3195 A66-34861

Modified RK-1 radiosonde circuit for stratospheric cosmic ray measurements 19 p3352 A66-35274

Upper wind evaluation by pilot and radiosonde balloon radar tracking for flat Earth and effects of Earth curvature 22 p3943 A66-40428

Radiosonde for high altitude balloon soundings using large polyethylene balloons to carry payloads of electronics, cosmic ray and nuclei counters 23 p4087 A66-42084

RK-1-F radiosonde for stratosphere measurements of X-ray photon energy spectrum, charged particle density and X-ray photon density 24 p4213 A66-42941

RADIOSONDE THERMISTOR

Design and test flying of transistorized sonde used with Suomi-Kuhn radiometer for measurement of heat loss by long wave radiation from atmosphere 19 p3353 A66-35316

RADIOTELEPHONY

Correlation between lost time due to propagation on HF radio circuits and annual and sunspot cycles 03 p0337 A66-13322

Medium-capacity satellite receiving system for multiplex FM telephony transmission 08 p1183 A66-1894

RADOME

Evaluation of AD560 Doppler by Qantas discussing ground-speed run-down problem radome design, along-track error and low altitude accuracy over land and sea 07 p1078 A66-1781

Optimum antenna placement within metallic enclosure 13 p2044 A66-2674

Losses due to uniform rainwater layers on antenna 18 p3095 A66-34290

Wind effects on antenna structures studied to determine feasibility of operation without radome in various weather conditions 18 p3083 A66-34290

Space-frame radome design and buckling analysis for wind and deadweight static load using digital computers 18 p3095 A66-34290

Rain effect on satellite communications Earth terminal rigid radomes, determining transmission loss and water film thickness 24 p4192 A66-43196

RADON

Meteorological effects on atmospheric concentrations of radon beta activity in ground proximity, noting effects of wind temperature, radioactive precipitation and atmospheric scavenging 11 p1731 A66-23486

Periodic and height-dependent solutions for disturbances of concentrations of radon and thoron and decay products above Earth surface, considering turbulent diffusion and radioactive decay 19 p3453 A66-36385

Turbulent diffusion coefficient determined from vertical profiles of concentration of daughter products of radon 23 p4124 A66-41839

RAE SATELLITE

S RADIO ASTRONOMY EXPLORER /RAE/ SATELLITE

RAIL TRANSPORTATION

New concepts in railroad management oriented to logistics market and return on investment 15 p2621 A66-29801

Comparison of air, rail, bus and private car traffic within continental U.S. and within metropolitan France, excluding suburban traffic 20 p3495 A66-37397

RAIN

Liquid and particulate content of atmosphere noting surface rates of rainfall, particle size distribution, cloud data, aerosols, etc 09 p1398 A66-20272

Q band propagation test carried out over 12-km path, comparing rainfall attenuation with rainfall rate over path, noting scatter of measured values 13 p2023 A66-25567

Dark areas in West Texas photographs taken by Gemini IV shown to indicate heavy rainfall 18 p3129 A66-34215

Losses due to uniform rainwater layers on antenna 18 p3095 A66-34290

Precipitation model explaining formation of rain drops from clouds less than several kilometers thick, assuming Gaussian frequency distribution of vertical currents 18 p3130 A66-35015

Phosphorus 32 and 33 produced by interactions of secondary neutrons from cosmic rays with argon in atmosphere determined radiochemically from rainwater samples 23 p4124 A66-41845

Rain effect on satellite communications Earth terminal rigid radomes, determining transmission loss and water film thickness 24 p4192 A66-43196

RAIN EROSION

Solids erosion by repeated liquid impact at relatively low velocities to determine impact pressure and load distribution 20 p3586 A66-37807

Rain impact-induced erosion of high speed aircraft surfaces and shock wave disintegrating effect on raindrops prior to impact 20 p3495 A66-37809

Velocity and angle dependence of rain

- erosion for various materials, using rotating arm apparatus with high circumferential speeds 20 p3588 A66-37810
- Supersonic airflow effect on rain droplets measured in wind tunnel, shock tube and sled tests 22 p3894 A66-40647
- [AIAA PAPER 66-766]
- RAIN IMPACT DAMAGE**
- Deformation of solids by impact of liquids and relation to rain damage in aircraft and missiles, to blade erosion in steam turbines and to cavitation erosion - Meeting, London, May 1965 20 p3546 A66-37801
- Chemical etch pitting techniques, determining dislocations in crystal structure caused by liquid droplet impacts, calculating stress distribution due to collision 20 p3547 A66-37806
- Solids erosion by repeated liquid impact at relatively low velocities to determine impact pressure and load 20 p3586 A66-37807
- Rain impact-induced erosion of high speed aircraft surfaces and shock wave disintegrating effect on raindrops prior to impact 20 p3495 A66-37809
- RAIN REMOVAL SYSTEM**
- Rain effect on visibility through windshield tested in large wind tunnel including construction, calibration and removal devices 02 p0176 A66-11204
- Rain repellent polymers for aircraft windshields 13 p2116 A66-26544
- RAINDROP**
- Combined effect of turbulent gravitational and electrostatic coagulation on growth rate of cloud droplets estimated by two-layer model of process 01 p0096 A66-10658
- Behavior of freely falling raindrops during and after intercollision studied, using synchrodropper 03 p0389 A66-12700
- Cloud raindrop sizes and concentration measurement by airborne flow device 06 p0880 A66-16556
- Cloud raindrop sizes and concentration measurement by airborne flow device 14 p2297 A66-28228
- Rain impact-induced erosion of high speed aircraft surfaces and shock wave disintegrating effect on raindrops prior to impact 20 p3495 A66-37809
- RAM**
- S RADAR ABSORBING MATERIAL**
- /RAM/
- RAMAN EFFECT**
- Gain measurements of Raman amplifier pumped by diffuse ruby radiation 06 p0891 A66-16388
- Stimulated Raman effect in gaseous plasma analyzed by coupled-mode method, noting plasma optical pumping 07 p1091 A66-18427
- Optical nonlinearities of plasma, including second-harmonic generation and stimulated Raman effects 07 p1091 A66-18433
- Coherence and stimulation threshold of Stokes line 08 p1232 A66-18648
- Equations obtained from Hamiltonian for coupling, first Stokes line, first anti-Stokes line and coherent field for Raman laser 11 p1711 A66-22490
- Stimulated Raman effect and tunability of Raman laser 13 p2089 A66-25062
- Angular distribution of stimulated Raman radiation, discussing axial and off-axial Stokes and surface radiation mechanism 13 p2090 A66-25189
- Light coupling with phonons, magnons and plasmons, deriving wave equations and coupling constants, observing Raman effect in spin systems and in plasmas, noting second harmonic generation 13 p2132 A66-26154
- Nonlinear quantum effect in solid state lasers using paramagnetic crystals, noting Raman effect and gain dependence on pumping power 13 p2098 A66-26172
- Laser frequency tuning by dielectric material interaction to produce nonlinear effects 14 p2305 A66-26867
- Spectral line broadening due to collisions in stimulated Raman effect 14 p2309 A66-27942
- Stimulated Raman effect in acetone and acetone-carbon disulfide mixtures, noting similarity of Stokes radiation pattern to Raman effect 15 p2513 A66-28881
- Length dependent threshold data for stimulated Raman emission in liquids, noting correlation between laser beam self-focusing and onset of Raman emission 16 p2716 A66-30157
- Resonant enhancement of Raman cross section for phonons in CdS at frequencies near absorption edge 18 p3156 A66-34468
- Raman effect in solutions and in potassium dichromate crystals studied, using helium-neon laser generated exciting line 20 p3580 A66-37824
- Coupling of adjacent axial modes in external Raman resonator observed as first Stokes frequency with benzene as Raman medium and Q-switched ruby laser as pump source 21 p3747 A66-39109
- Molecular oscillation difference frequency generation in IR spectrum by beating together laser and laser-stimulated Raman emission 24 p4221 A66-42544
- RAMAN SCATTERING**
- Interaction between electromagnetic waves and turbulent plasma 02 p0191 A66-11731
- Current status of theoretical and experimental studies of variant of Raman effect encountered in scattering of laser light 02 p0241 A66-12065
- Stimulated Brillouin and Raman scattering in gases, discussing sound velocity calculation from frequency shift and argon, hydrogen and nitrogen 04 p0531 A66-13981
- Stimulated Raman and Brillouin scattering for Stokes radiation parallel to laser beam in rectangular waveguide 05 p0694 A66-14901
- Nonlinear Maxwell equation for optics of many-particle system, noting Raman scattering from electron plasma 05 p0695 A66-14905
- Geometrical UV reflectivity of Jupiter in terms of Rayleigh scattering determined from objective-grating rocket spectrometer 05 p0762 A66-15281
- Resonance Raman effect in crystals, discussing spontaneous and simulated scattering efficiency 08 p1259 A66-19233
- Combination scattering of UHF electromagnetic waves in turbulent plasma in external electromagnetic field 09 p1347 A66-20767
- Raman scattering and IR absorption spectra of gaseous, liquid and crystalline benzoyl benzoic acid and O-and M-toluic acids 09 p1339 A66-20941
- Raman laser materials selection, emphasizing frequency shifts and excitation power threshold 11 p1721 A66-23477
- Laser application and techniques noting amplification, modulation, interferometry, scattering, plasma diagnostics, nonlinear optics, etc 12 p1889 A66-23931
- Light frequency multipliers for nonlinear optical effects at various wavelengths, considering focusing, laser beam finite divergence, air breakdown, stimulated Raman emission, etc 13 p2096 A66-26146
- Nonlinear optical effects in plasma, optical mixing of three light beams and scattering of light-by-light, noting dominant Raman scattering 13 p2132 A66-26152
- Coupled wave formalism, giving unified description of parametric down conversion of light, stimulated Brillouin and Raman effects, etc, stressing exponential character of gain 13 p2132 A66-26156
- Discrepancy between calculated and experimental values for Raman gain in pulsed laser suggests higher energy distribution due to light trapping or Brillouin scattering 13 p2096 A66-26157
- Effect of fluctuating laser pump on stimulated Raman scattering, noting growth of coupled Stokes-anti-Stokes waves in presence of two-mode pump 13 p2096 A66-26158
- Angular emission properties of stimulated Raman radiation from liquids, noting two classes of radiation 13 p2097 A66-26159
- Raman light forward emission in liquids when illuminated by laser, obtaining stimulated Raman action without feedback, which suggests existence of mechanism contributing to modulation of medium polarizability 13 p2097 A66-26160
- Interaction between stimulated Brillouin and Raman scattering in carbon disulfide, using optical resonator and laser beam 13 p2097 A66-26162
- Combination scattering of UHF electromagnetic waves in turbulent plasma in external electromagnetic field 14 p2236 A66-27302
- Raman scattering of microwaves by plasma oscillations 16 p2758 A66-30296
- Induced Raman scattering of longitudinal waves in homogeneous unbounded plasma in homogeneous magnetic field 17 p2965 A66-32324
- Two-phonon Raman scattering in cubic crystals, noting use of polarization effect to determine active irreducible representations 17 p2981 A66-32818
- Intermediate state peculiarities effect on Raman scattering spectra of excited gas molecules 17 p2960 A66-33508
- Ultrasonic light diffraction, deriving line intensity in form of quadratures with parametric dependence 20 p3601 A66-37147
- Selective feedback and saturation mechanisms of Raman lasers using secondary Raman lines, emphasizing cyclohexane 20 p3579 A66-37777
- Quenching of stimulated Raman scattering of coherent radiation by two-photon absorption in organic liquids 24 p4226 A66-43039
- RAMAN SPECTROSCOPY**
- SA INFRARED SPECTROSCOPY**
- Helium-neon gas laser used in Raman spectroscopy 08 p1233 A66-19232
- RAMAN SPECTRUM**
- Inverse stimulated Raman spectra during Stokes absorption in terms of stimulated emission of optical phonons 05 p0697 A66-15108
- Crystal-Diffusion Spectra-International Colloquium, Paris, July 1965 08 p1233 A66-19231
- Raman diffusion spectra from crystals excited by gas laser 13 p2104 A66-26345
- Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and rotationally inelastic collisions 16 p2750 A66-30118
- Conduction-electron plasmons interaction with longitudinal optical phonon in Raman spectrum of gallium arsenide 17 p2975 A66-31888
- Vibrational spectrum of liquid, solid and gaseous tetradeuterated hydrazine and Raman study of hydrogen bonding in hydrazine 19 p3295 A66-36801
- RAMJET ENGINE**
- Air conditions, flight altitude and fuel composition effects on ramjet engine, specific impulse and efficiency 01 p0130 A66-10925
- Refractory metals for gas turbine and ramjet aircraft engines, noting niobium and tantalum alloys 02 p0245 A66-11746
- Solid propellant ramjets for target aircraft, missiles and space vehicle boosters, noting advantages as compared to liquid propellant ramjets 05 p0745 A66-15847
- Interstellar travel using ramjet technique and interstellar gas in conjunction with nuclear fusion 06 p0953 A66-16073
- Supersonic ramjet fuel injection, fuel-air mixing and combustion in turbulent air stream, noting mixing and combustion time 09 p1434 A66-20473
- Aircraft and missiles operating at Mach 2 to 5 using air breathing propulsion systems, noting roles of ramjet and turbine engines 09 p1435 A66-20667
- Impact-induced combustion in hypersonic ramjet engines, determining hypersonic fuel-air mixing from hydrogen concentration at Laval nozzle outlet 10 p1591 A66-21359
- JP-5 fuel-air mixture ignition by platinum catalytic igniters, using ramjet engine baffle combustors 13 p2171 A66-25594
- Soviet book on automation and control of air breathing gas turbine and ramjet engines 13 p2173 A66-26463
- Overall structure of combustion process in jet flow of hydrocarbon-air mixtures stressing conditions for ramjet engines, noting flame propagation angles, flow computation, etc 18 p3264 A66-34444
- [AIAA PAPER 66-573]
- Model study of aerodynamic oscillations in ramjet diffuser and combustion chamber prior to booster separation in ramjet missile indicates that venting may solve problem 19 p3468 A66-35630

Turbine engines and ramjet for SST and space boosters 22 p3971 A66-40123

RANDOM DISTRIBUTION

Gnedenko problem of characterizing distributions class for case where sequence of random quantities contains different quantities 02 p0250 A66-12108

Book on probability theory covering mathematical models, randomness concepts, switching logic concepts, integration on abstract space, etc 03 p0386 A66-12369

Stability of linear stochastic distributed parameter dynamical systems by differential integral equations [ASME PAPER 65-WA/APM-12] 05 p0717 A66-15434

Space and time dependent randomly distributed stress and temperature fields in cylinder with deformable surface calculated, using approximation method 12 p1959 A66-23864

Stability of linear stochastic distributed parameter dynamical systems by differential integral equations [ASME PAPER 65-WA/APM-12] 12 p1914 A66-23989

Effect of random distribution of point-like obstacles on dislocation movement analyzed, proving existence of critical applied stress, deriving structure of work-hardened crystal 12 p1971 A66-24924

Radiative energy losses for charge moving in magnetoactive plasma with random electron density inhomogeneities 13 p2148 A66-26038

Abridged Hamming and Fire code efficiency with respect to randomly distributed disturbances 14 p2245 A66-26794

Fokker-Planck equation of wave propagation in medium with regular and random inhomogeneities, determining spatial angular distribution function of ray 14 p2245 A66-28474

Statistical test of randomness applied to lunar crater data, noting distribution and density 15 p2598 A66-29264

Random distribution function of nonfailure operation time, taking into account exponential time distribution law of fault occurrence 16 p2672 A66-31407

Randomness tests of lunar crater distribution based on data from relatively small regions or most recent craters, results indicate internal origin 18 p3233 A66-34573

Optimal feedback control of linear discrete-time stochastic system with quadratic performance measure for bounded input 19 p3335 A66-36695

Multielement antenna scanning grid-phasing method having random function distribution at aperture 20 p3533 A66-37994

RANDOM ERROR

Random error in finite difference approximation of stochastic nonlinear equations in theory of random signals and noise 01 p0093 A66-10381

Statistical determination of error variance and application to variance analysis of electrical or mechanical components 01 p0095 A66-10872

Differential correction algorithm in orbit and attitude determination having optimal property in system data error 05 p0635 A66-15800

Rounding off effects on mathematical expectation of random error in measurements involving n-dimensional quantity given in vector form 07 p1061 A66-18508

Linear perturbation theory computation of target errors in lunar impact trajectories due to random injection errors 08 p1289 A66-18828

Random errors of derivatives obtained from least squares approximations to empirical functions 10 p1550 A66-21341

Best linear unbiased /BLU/ estimator for large class of error correlation models 12 p1904 A66-24197

Random and burst channel error affects output signal-to-noise ratio of delta modulation system 13 p2019 A66-25145

Random error of drift measurements using airborne Doppler radar from observed drift output during short flight over fixed course, calculating rms values 13 p2125 A66-26449

Random variable representation of errors in control system 14 p2263 A66-26767

Random error effect on directional gain of sectional parabolic antenna with automatic phasing, setting sections effectively by three control points method 14 p2250 A66-27141

Orbit measurements by radar with random error and radar with random and bias errors [AIAA PAPER 65-31] 14 p2381 A66-27420

Angular noise induced random error in direction finding as affected by target properties and sense 14 p2242 A66-28149

Random error estimation for Mach-Zehnder interferometer interference fringe measurements 15 p2502 A66-29383

Calibration and testing of temperature measuring devices in -200 to 3000 degrees C 16 p2704 A66-30632

Integral equations for weight function of optimum filter and correlation function of random absolute error 24 p4188 A66-42475

RANDOM LOAD

Fatigue analysis calculations of systems with non-Gaussian output, using crest and extremal statistics of strain 01 p0147 A66-10127

Statistical aspects of height of rise and fall in continuous random loading relevant to fatigue failure 01 p0147 A66-10128

Space-time correlation function of response of finite cylindrical shell to purely random pressure field and to subsonic boundary layer pressure fluctuations 01 p0147 A66-10131

Fatigue crack propagation in airframe materials under axial narrow and broadband random loading 01 p0148 A66-10139

Optimal surface damping in two-layered cantilever for random periodic loading decreasing in symmetrical cycle 01 p0160 A66-11180

Static problem of elasticity for random loads 03 p0434 A66-12529

Probability method for fatigue strength, assessing damage from random values, time variation of stress range and statistical relationships of addition 04 p0594 A66-14400

Thermomechanical response studies of solid propellants subjected to cyclic and random loading [AIAA PAPER 65-160] 10 p1590 A66-21776

Circular ring loaded by constant direction forces used to illustrate kinetic instability of elastic system under random time-dependent forces 12 p1960 A66-23950

Determination of number of times per unit time that various strength margin levels are exceeded under combined random stresses, useful to structural design in aerospace industry 13 p2195 A66-25592

Stability of elastic thin plate subjected to self-equilibrating stresses acting in its plane with random intensity and distribution 17 p3018 A66-31835

Metal fatigue under randomly distributed stress noting crack propagation, computer solution of integral recurrence relations, etc 17 p3029 A66-32790

Maximum entropy in estimating damage distribution of single degree of freedom system subjected to random loading, noting reliability 20 p3571 A66-37942

Response of continuous structure to random forces distributed over surface of structure estimated through normal mode method, exemplifying with aircraft fuselage in vibration 21 p3824 A66-38575

Statistical properties of dynamic response of structure to random load field, examining simple deterministic loadings 22 p3993 A66-40359

Three-dimensional stresses near border of discontinuity plane under arbitrary loading, obtaining solution for uniform shear applied to surface of crack 24 p4285 A66-42148

RANDOM NOISE

SA GAUSSIAN NOISE

Fatigue failure in aircraft panels studied by determining spectral densities of response of continuous skin stringer panels under random noise excitation 01 p0147 A66-10130

Acoustic fatigue characteristics of beryllium panels exposed to high intensity random noise environment 01 p0149 A66-10143

Programming method for determining modulation parameters required to change siren sine wave output to random Gaussian

noise 01 p0053 A66-10149

Sampling techniques for extraction of periodic signals from background of random noise 03 p0333 A66-12477

Stochastic differential equations specifying dynamical structure of filters generating posterior probability distribution when inputs are time functions 03 p0351 A66-13255

Subsystem checkout in operation termed on-line checkout, noting use of digital computer with random noise signals and role of correlation and transfer functions 04 p0493 A66-13601

Statistical description of noise wave including moments, probability distribution and density, spectral density, correlation and covariance and characteristic function 04 p0485 A66-14101

Response of linear and nonlinear device to noise calculated by constant time-varying parameters, covariance, integral transform and characteristic function methods 04 p0485 A66-14111

Electronic components, considering noise characteristics, particularly effect of gamma radiation on resistors, capacitors, diodes, etc 05 p0650 A66-15833

Dual-mode acquisition and tracking system using random noise as carrier signal 06 p0842 A66-15977

Adaptive parametric two-input detector analyzed and compared to nonparametric detector/polarity coincidence correlator under assumption of quasi-stationary inputs 06 p0864 A66-16731

Feedback shift register connection using chain, discussing pseudorandom noise generator 06 p0867 A66-16983

Graphoanalytical calculating method of statistical characteristics of step extremal control systems under steady state operation in presence of random noise 07 p1014 A66-17434

Slope quantized binary pulse code modulation by coding signal slopes with unidigit 1/0 pulses, using special feedback circuit and threshold in coder-comparator 07 p1002 A66-18244

Carrier number fluctuation in semiconductor conduction band due to generation and recombination of charged carriers 07 p1105 A66-18371

Optimum filtering of signal of given shape from background of nonstationary random noise 08 p1201 A66-19674

Design of parallel frequency-shift keying system for use in multipath channels 10 p1504 A66-21661

Ultimate performance of m-ary transmissions, showing signal filtering by use of energy measurement 10 p1505 A66-21837

Correlation function of response of multichannel electronic multiplier to Gaussian input noise 11 p1676 A66-22711

Information recovery from noisy measurements, employing steady quantity measurements, known waveform detection and transfer function evaluation 11 p1656 A66-22825

Numerical dynamic predictor for control systems disturbed by random noise, discussing Fokker-Planck equation, Crank-Nicolson difference model, etc 11 p1680 A66-23279

System controllers for signal reproduction in noise conditions, noting limitations on regular and random components, controller optimality criterion, etc 11 p1681 A66-23341

Derivation of explicit form of output signal from noise perturbed oscillator by perturbation technique 12 p1834 A66-24126

Distribution of response peaks of simple oscillator pulses of nonstationary random noise 12 p1970 A66-24716

Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian white noise 13 p2053 A66-26086

Trajectory prediction for moving stochastic systems 13 p2028 A66-26476

Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746

- Residual error probability for cyclic binary code data transmission on symmetrically random noise channels 14 p2245 A66-26795
- Energy spectrum of input and output of near multichannel summing system of relayed stochastic signals 14 p2264 A66-27243
- Smoothing of stationary random noise by discrete smoothing network, analyzing conditions for discrete white noise, harmonic noise, etc 14 p2264 A66-27359
- Narrow band LF direct-reading random noise measurement and reduction of time requirements, using integrating RC network with time-variable components 14 p2295 A66-27716
- Detectability criterion for signal received against random noise background 14 p2242 A66-28151
- Filter design minimizing maximum value of estimation error over all admissible signal waveforms 15 p2474 A66-29380
- Random noise effects and optimal control of nuclear rocket start-up for rapid and precise attainment of full power 16 p2745 A66-30881
- Theoretical probability densities of amplitude-comparison, and phase-comparison monopulse radars excited by Gaussian signals and Gaussian noises 17 p2872 A66-31962
- Stationarity, using time averages, of laboratory electronic random noise generators 18 p3076 A66-33833
- Frequency measurement using autocorrelator as frequency discriminator, noting technique and high-noise sensitivity 19 p3306 A66-36657
- Optimum filtering of signal of given shape from background of nonstationary random noise 20 p3538 A66-37266
- Amplitude and phase detection for predetermined signal with nonstationary noise, using generalization of Levin method 20 p3516 A66-37385
- Optimal detection of signals by spatially distributed receiving system against random noise background, using space-time signal selection method 20 p3517 A66-37744

- Existence of optimal stochastic controls 11 p1682 A66-23457
- Sufficient conditions for optimal stochastic control of diffusion processes governed by vector equations satisfying local Lipschitz conditions 11 p1682 A66-23459
- Confidence ratio for Gaussian random processes satisfying certain linear differential equations 12 p1902 A66-23769
- Optimum prognosis for random processes by applying asymptotically optimal succession of automatic systems 12 p1848 A66-24006
- Russian monograph on random processes

covering measure and probability theory, Markov processes, limiting functions, etc 12 p1903 A66-24067

Stochastic processes in microscale relativistic fluid mechanics, discussing Dirac fluid, Klein-Gordon equation, diffusion, quantum potential, spin fluids, etc 12 p1914 A66-24093

Probabilistic stability of random processes with distributed parameters 12 p1904 A66-24340

Optimal control and stability for stochastic systems, viewing linear diffusion models based upon Gaussian-Markov process as finite dimensional linear system driven by white noise 12 p1854 A66-24637

Amplitude distribution density measurements of stochastic processes with intensity spectra ranging from 30 cps to 20 kc, using multichannel pulse-height analyzers 12 p1856 A66-24940

Statistical distribution of first occurrence and recurrence of crossing of given level in continuous random process determined, using approximate forms and exponential distribution 13 p2116 A66-25141

Programming under uncertainty and stochastic optimal control for two-stage system treated by derivation of equivalent convex program 13 p2047 A66-25351

Charged particles in nonadiabatic magnetic traps, noting behavior in mirror machine with spatially modulated central field, using model with square wave modulation 13 p2145 A66-25727

Asymptotically stable linear system controlled by scalar random input 13 p2048 A66-25849

Dynamic programming for stochastic systems applied in designing controller for transferring linear system from initial to final position in specified time interval 13 p2048 A66-25852

Random variations in beam waveguide components and effects on light propagation 13 p2024 A66-25939

Optimum control of linear systems in presence of random disturbances, noting choice between cost design and cost variance methods 13 p2051 A66-26066

Random phase approximation of electron conductivity of turbulent plasma and effects of random static inhomogeneities 13 p2149 A66-26245

Computer programming method for analysis of complex systems 13 p2028 A66-26474

Spatial selective fading as random process, discussing spatial coherence, wave number dispersion profile, time delay profile, etc, in ionospheric propagation 14 p2234 A66-26859

Adaptive servocontrol equalization system using true integrator instead of RC averager in feedback loop and memory circuit 14 p2267 A66-27664

Solution of stochastic differential equation with Markov coefficients by reduction to nonrandom PDE of Fokker-Planck type 14 p2324 A66-27932

Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray intensity 14 p2377 A66-28086

Black body radiation law deduced from stochastic electrodynamics 14 p2414 A66-28173

Algorithm for mathematical expectation and dispersion of two-dimensional random sequences, obtaining linear estimation of norm of meteorological elements minimizing rms error 14 p2327 A66-28222

Random lighting exposure effects in rats and changes caused in adrenal cortical function, circadian rhythm, endocrine system, group running activity, etc 15 p2429 A66-28487

Sufficient conditions for recurrence and positivity of diffusion process defined by stochastic differential equation, using Liapunov function 15 p2525 A66-28512

Optimal control process with stochastic feedback for automatic control system 15 p2469 A66-28540

Number of intersections of level by Gaussian stochastic process 15 p2525 A66-28605

Analysis of means, using decision lines for nonrandom variability of set of means,

noting correlation between analysis of means and error variance 15 p2508 A66-28807

Pearson universal random distribution generator, noting analysis of randomly chosen variables for unimodal underlying distribution 15 p2526 A66-28808

Correlation analysis technique for stochastic processes in RLCM circuits with random parameters in case of stochastic input functions 15 p2469 A66-29055

Instrument methods determining function and density of length distribution of random radio emissions 15 p2451 A66-29123

Gyroscopic system motion under random forces effect 15 p2541 A66-29172

Lunar crater filling by dust or lava in stochastic model based on impact formation 15 p2598 A66-29263

System measurement and identification, considering stochastic transformation between input and output functions, noting connection with radio communication problems 15 p2473 A66-29375

Stochastic extensions of techniques for using Liapunov second method in design and analysis of feedback controls, using differential equations 15 p2473 A66-29376

Linear stochastic filtering theory assessing Kalman-Bucy filter and equivalence with Kolmogorov-Wiener problem 15 p2473 A66-29377

Optimal demodulation of analog-type signal transmitted through randomly fading channel, assuming additive Gaussian noise and using vector space approach 15 p2474 A66-29379

Dielectric constant, permeability and conductivity of random media determining electric field, current, magnetic field, etc, assuming these quantities are time harmonic plane waves 15 p2451 A66-29619

Mean of stationary random process estimated from average of equally weighted samples taken periodically in closed interval 16 p2732 A66-30595

Function approximation from finite number of arbitrary points, using iteration methods 16 p2734 A66-30760

Simulation of controlled diffusion-type Markov processes applied to two stochastic equations related to problem of misadjustment on analog computer 16 p2656 A66-30763

Nonlinear stochastic system, determining distribution law for variables 16 p2670 A66-30834

Two-dimensional correlation time relation to spectral bandwidth and corresponding one-dimensional quantities of Lampard 16 p2671 A66-31336

Text on relation between dynamic programming and variational calculus, noting application to Mayer problem, optimization and stochastic processes, etc 16 p2739 A66-31750

Text on random processes in nonlinear control systems, covering statistical analysis, nonlinear transformation with and without feedback, extremal systems, etc 16 p2673 A66-31753

Exact solutions derived for problems of mathematical expectation and density distribution of maxima for two types of nonstationary random processes 17 p2945 A66-31852

Flowgraph techniques for closed systems, discussing properties, approximation method, topology equation, frequency response, constraints, oscillatory and stochastic processes, etc 17 p2898 A66-31954

Mean-square response of thin elastic plate to random pressure acting normal to plate surface 17 p3021 A66-32010

Stochastic analysis of systems described by linear differential equations subject to random disturbances, noting application to variational behavior of optimal control systems 17 p2900 A66-32076

Variation of mean square error of linear system with time, applying parameter perturbation process to random or deterministic input 17 p2901 A66-32289

Robbins-Monro stochastic approximation method extended and results applied to least squares method 17 p2946 A66-32296

Stochastic equation applied to investigating second boundary value problem for parabolic differential equations with small

parameters 17 p2946 A66-32297

Generalized measures and integration in function spaces, giving problems and application 17 p2946 A66-32298

Plasma heating rate in stochastic electric fields determined, using nonrelativistic collisionless lossless test particle 17 p2967 A66-32343

Stochastic processes, formulation and solution using characteristic functionals transformations, and measure theory 17 p2947 A66-33098

Random turbulence in wall shear layer discussing practical application of theory 17 p2916 A66-33481

Level quantization effect in statistical analysis of closed-loop digital automation systems 18 p3089 A66-33738

Dual control of plant with random amplification factor as Bayesian problem 18 p3089 A66-33738

Statistical structure of meteorological field, with attention to ergodic properties 18 p3129 A66-34100

Time harmonic wave propagation in perfectly conducting large waveguides containing random media, emphasizing computation and physical interpretation of wave motions 18 p3072 A66-34570

Analog simulation of operations on stochastic matrices using random transitions in automata aided by relay-contact circuits 18 p3073 A66-35000

Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879

Optimal control for stochastic differential equation system, noting existence and uniqueness of solution for coefficients satisfying Lipschitz condition 19 p3325 A66-35983

Asymptotic behavior of transition probability matrices, analyzing limit theorems involving capacities in Markov chains 19 p3389 A66-35984

Homogeneous linear differential equations, examining stochastic processes for perturbations causing discontinuous solutions and for perturbations acting on entire bounded intervals 19 p3390 A66-36334

Linear continuous time stochastic optimal control process, obtaining optimum performance achievable as function of total effort at initiation of optimization period 19 p3335 A66-36694

Stability problems in randomly excited dynamic systems, discussing partial differential equations governing evolution of conditional probabilities and expectations 19 p3471 A66-36718

Liapunov functions for finite time stochastic stability and analysis of tracking system 19 p3338 A66-36738

Time-domain and frequency domain statistics for random step-wise sampled data systems 20 p3535 A66-36847

Optimal control analysis of system behavior described by linear stochastic differential equations 20 p3537 A66-36893

Behavioral analysis of stochastic automata in random media, discussing automata design with quasi-linear behavior and expedient behavior 20 p3537 A66-36895

Subadditive functional expectations and inequality of variables 20 p3590 A66-37111

Maximum sample excursions of Kiefer-Wolfowitz stochastic approximation processes 20 p3590 A66-37364

Distribution function for probability density of random process at output of multiplier acted upon by envelopes consisting of Gaussian noise and pulse signal 20 p3515 A66-37380

Operational reliability of finite automatic systems in terms of entropy in individual components 20 p3538 A66-37486

Continuous plane with circular inclusion with different elastic properties, giving solution in form of boundary equation in random variable 20 p3668 A66-37530

Monograph on approximate analysis of randomly excited nonlinear controls, discussing feedback system performance, functional and quasi-functional representation, zero mean systems,

- Solar cycle effects on random variation in
attenuation length of primary cosmic ray
nucleon component 20 p3538 A66-37577
- Distortions and errors in calculating

value and constant power spectral
density 09 p1356 A66-20666
- Optimization of five second and third-order
systems with saturating and relay
controllers and with random Brownian
Motion input 11 p1674 A66-22222
- Nonlinear system optimizing by analytical
method, deriving expression for random
telegraph signal 11 p1676 A66-22756
- Operation of nonlinear servosystem with
autocorrelator as measuring element in
presence of noise 11 p1677 A66-22759
- Inertial and noninertial detection of sum
of signal and fluctuation noise by amplitude,
frequency and phase
detectors 11 p1656 A66-22789
- Statistical characteristics of various
uniform phase distribution processes and
envelopes 12 p1813 A66-23873
- Construction of Bayes estimator, using
prior estimates of random parameter, with
mean square error less than that of
maximum-likelihood estimator when a prior
distribution of parameter is
unknown 12 p1816 A66-24195
- Automatic system optimization techniques
using independent random trial signals,
relying on correlation

functions 12 p1853 A66-24332
Occipital evoked potential correlated with visual anomaly under stimulus of incoherent succession of randomly patterned optical images 12 p1806 A66-24393
Power response of two-element interference frequency correlation interferometer to point source of broadband random noise 12 p1840 A66-24626
Amplitude probability density of random stationary signal potential and variation of free carriers in germanium semiconductor at near-ambient temperature 13 p2170 A66-26758
Controlled-delay circuit with flip-flop oscillators for alignment of random pulse sequences 14 p2264 A66-27207
Solution of optimum filtering problems when input signals of automatic control system are described by different differential equations at successive time intervals 14 p2265 A66-27523
Automatic control of wideband vibration testing of nonrigid structure with wide range of acceleration levels requiring computation of feedback signal 14 p2267 A66-27665
Posterior probability density of parameters of signals modulated by Gaussian random processes, noting radar signals 15 p2469 A66-28541
Pulsed transient functions determination from control channels of multidimensional plant, assuming output signal correlation functions are determined by double averaging 15 p2469 A66-28643
State variable determination for linear time invariant plants with known parameters, noting noise suppressing characteristics of technique 15 p2471 A66-29329
Synthesis problem of optimum dynamic characteristics of multivariate linear control systems with random input signals 16 p2668 A66-30752
Determination of output voltage of square law device ascertained from input voltage 17 p2898 A66-31905
Detection of random signal with normal distribution by formulas which can be generalized for case of nonzero regular component 17 p2873 A66-32223
Redundancy removal processes, classification and nomenclature compared by plotting compression ratio vs rms error and stressing ZVA process 18 p3070 A66-34261
Amplitude analysis and statistical implications of random data analysis applied to evaluation of random signals 18 p3135 A66-34498
Detection and measurement of parameters of signals in white noise 18 p3091 A66-34985
Synthesizing nonlinear converter in presence of random input signals with normal distribution 18 p3092 A66-34991
Pseudorandom binary signals as perturbation signals in simultaneous multi-input cross correlation method of obtaining linearized impulse response of system 19 p3307 A66-35730
Sensitivity to variations in parameter of signals in networks of linear transfer functions and instantaneous function generators, noting relay characteristics 19 p3327 A66-36018
Inertial and noninertial detection of sum of signal and fluctuation noise by amplitude, frequency and phase 20 p3511 A66-37129
Analyzer of characteristic function of random phase of quasi-harmonic signal using statistics 20 p3529 A66-37520
Geometric diffraction theory for scalar wave incident on plane screen, emphasizing normally and nonnormally incident plane waves and spherical waves 21 p3769 A66-38601
Optimum recognition of binary signals passed through channels with random parameters, examining case where variances are equal and case of exact estimation of parameters 21 p3705 A66-39147
Systematic method of obtaining complex formulations of problems involving white noise, considering deterministic narrow-band signal detection of random phase 21 p3721 A66-39642
Frequency meter for measuring center frequency of random pulses distributed

according to Poisson law, consisting of integrating circuit with high time constant 22 p3918 A66-40404
Power spectrum analysis of short-time transient response of one degree of freedom system to random excitation, evaluating error generated, using Laplace method 24 p4286 A66-42164

RANDOM VARIABLE

Variance of number of zeros in narrow band normal noise of finite duration calculated from energy spectrum of phase derivative 02 p0190 A66-11406
Energy spectrum of output noise of frequency detector approximated by Nakagami m-distribution instead of generalized Rayleigh distribution 04 p0497 A66-13920
Book on theory of random functions in probability methods for automatic control systems 05 p0657 A66-15066
Variance of parameter defined by product of powers of several independent random variables estimated in target cross section given by radar range equation 06 p0833 A66-16655
Limit theorems for sum of sequence of independent random variables 06 p0903 A66-16914
Method for eliminating random factors in analysis of sequential systems 07 p1004 A66-18070
Higher order correlation function evaluated for shot noise statistics 09 p1342 A66-19925
Sequential estimation technique for correlated stochastic variables 12 p1850 A66-24260
Correlation functions of amplitude and intensity fluctuation for laser model near threshold obtained by using distribution functions evaluated by Fokker-Planck equation, treating amplitude as random variable 12 p1892 A66-25018
Shannon model for capacity of time-continuous and time-discrete Gaussian channel with inputs perturbed by independent noise random variable 13 p2024 A66-25938
Random balance statistical method of identifying major causes of performance variations in jet engine fuel control units 15 p2572 A66-28863
Dependent random variables containing independent variables, m-dependent variables, stationary and nonhomogeneous Markov processes, etc 15 p2529 A66-29849
Stability of mean solution, probability solution and almost-everywhere solution to random parameter differential equation 15 p2529 A66-29854
Random variation of Earth rotation relation to amplitude of free nutation 16 p2693 A66-30589
Existence, uniqueness and continuous initial function-dependence theorems and asymptotic nature of solutions for stochastic differential equations with constant delay 16 p2737 A66-31406
Asymptotic efficiency for maximum likelihood estimator 17 p2946 A66-32295
Asymptotic methods of nonlinear mechanics applicable to nonlinear differential equations with random arguments 17 p2958 A66-32711
Boundedness of solutions to nearly differential equations with random arguments 17 p2947 A66-32712
Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency 17 p2959 A66-32802
Summability of independent random variables, discussing convergence properties of sequence 19 p3389 A66-35982
Random variable-dependent probability measures induced in Borel body from uniform catenaries and related to Lebesgue measures 19 p3391 A66-36434
Rigid body rotational attitude control in three dimensions with linear transformation as output variable, noting advantages, applications and results 19 p3471 A66-36693
Wiener filtering theory for stationary ergodic inputs with known spectral densities and optimal control transfer functions of random-input nonlinear saturating systems with random unwanted disturbances 20 p3536 A66-36859
Energy spectrum of output noise of

frequency detector approximated by Nakagami m-distribution instead of generalized Rayleigh distribution 20 p3532 A66-3787
Functions equations with stochastic variables as initial values 21 p3755 A66-3853
Distortion, fill and noise effects on pattern discrimination 23 p4030 A66-4157
Optimum pulse transfer functions for multivariable digital ergodic stochastic processes 23 p4051 A66-4185
Probability of overlapping intercept by system of random intercepts and application to detection of flying objects in cloud skies 24 p4231 A66-4244
Unambiguous transition probability densities describing inhomogeneous stochastic continuous-to-right Markov processes with finite number of states 24 p4232 A66-4302

RANDOM VIBRATION

Analog computer application to prediction of nonlinear response of panel structure to random forcing function 01 p0148 A66-1013
Vibration response of steel panels to fluctuating pressures in turbulent boundary layer of wind tunnel compared to random excitation caused by jet noise and siren 01 p0148 A66-1013
Random vibration testing and evaluation of optimization criteria in designing random vibration simulators 01 p0156 A66-1082
Reflection of acoustic /electromagnetic waves from geometrically complex body oscillating according to random law 04 p0433 A66-1404
Perturbation calculation of average rate of energy transfer in random vibration of nonlinearly coupled modes 05 p0716 A66-1505
Random vibrational system, solving first passage time via conversion to first order Markov process [ASME PAPER 65-WA/APM-18] 05 p0777 A66-1544
Spectral density analog and digital analyses used for random vibration testing program for on-line equalization and off-line response [ISA PREPRINT 1.5-4-65] 05 p0683 A66-1550
Damping and spring forces acting on single mode oscillator considered as power series, deriving power spectral density of response through perturbation 05 p0717 A66-1573
Predicting and measuring FM of reflex klystron noise performance when subjected to random acoustical and mechanical vibration 07 p1008 A66-1751
Asymptotic method of integral estimation of space-time broadband random vibrations boundary value problem for elastic systems 11 p1781 A66-22616
Vibration and shock isolation of electronic equipment, examining isolation theory of periodic vibrations and random vibrations 11 p1667 A66-22764
Random vibrational system, solving first passage time via conversion to first order Markov process [ASME PAPER 65-WA/APM-18] 12 p1961 A66-23990
Response to multiple random excitation of system with multiple degrees of freedom, connecting spectral density matrix of generalized coordinates with corresponding generalized forces 12 p1972 A66-25004
Equalization systems for stochastic processes, discussing automatic adaptive servocontrol, feedback control and vibration simulation equipment 13 p2048 A66-25848
Sine wave and wide band random vibration testing 14 p2399 A66-27568
Static-equivalent load approach to designing structures for vibration environment 14 p2406 A66-28002
Dynamic analysis of lunar surface vehicle including power spectral density terrain definition, vehicle velocity limiting criteria and nonlinear analysis of vehicle freedom to pitch, bounce and roll 14 p2393 A66-28022
Mean square asymptotic stability of linear system described by nth order equation with random coefficients 15 p2537 A66-28964
Optimization of data acquisition and reduction systems generated by random vibration, considering dynamic ranges 16 p2655 A66-30447
Random vibration testing, discussing

erritron vibration control oscillator and frequency measurement by splitting into narrow bands 16 p2715 A66-31202

Hologram construction and sources of image degradation including random vibrations, film transfer characteristics, etc 16 p2707 A66-31243

Autocorrelation functions and spectra for mechanical systems subjected to random vibrations

ONERA TP-340] 16 p2823 A66-31687

Natural environmental random excitation used to measure eigenfrequencies of linear structure 17 p3018 A66-31839

Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 17 p2873 A66-32214

Random delay effect on excitation of vibrations in nonlinear systems, using Krylov-Bogoliubov method 17 p2958 A66-32710

Power spectral density computer program for vibration-acceleration calculation 17 p2878 A66-33039

Simple model for idealized form of plastic deformation of randomly excited single-degree-of-freedom oscillator 18 p3259 A66-35027

Dynamic instability of longitudinal and transverse oscillations of rod, emphasizing fluctuation having property of white noise with unit spectral density 20 p3670 A66-37680

Dynamic system response to separable nonstationary random excitation, describing statistical properties and application to launch vehicle response calculation 20 p3672 A66-38175

Vibration test specifications for flight vehicle components developed from broad engineering viewpoint 21 p3822 A66-39609

Asymptotic solution of broadband random vibration BVP for elastic systems, based on excitation spectral width and natural frequency density 23 p4142 A66-41953

Response spectrum of random vibration of nonlinear oscillator predicted by applying classical perturbation method to statistical moments of random response of nonlinear systems 23 p4097 A66-41954

First passage problems for lightly damped linear oscillator excited by white noise, discussing time probability distribution, densities, application of computers to obtain numerical solutions, etc 24 p4284 A66-42140

RANGE

S BALLISTIC RANGE

S FREQUENCY RANGE

S MISSILE RANGE

S RADAR RANGE

S RADIO RANGE

S REENTRY RANGE

S TEST RANGE

RANGE AND RANGE RATE TRACKING

Goddard Range and Range Rate System concept, design and performance for near-Earth and cislunar spacecraft tracking 04 p0479 A66-13618

Digital-mode FM CW laser ranging and tracking system using compound axis servomechanism 13 p2024 A66-25982

Video recording and playback systems applied to radar systems provides capability of measuring reentry phenomenon and tracking more than one object 20 p3514 A66-37220

RANGE CONTROL

Optimum control for supersonic winged vehicle, allowing for inequality-type limitations in solution algorithm for maximum range in nonmaneuvering flight 11 p1733 A66-23340

Dynamic range bounds of error detection circuits of tracking radars, minimizing probability of excluding Raleigh distributed signal 12 p1817 A66-24302

ETR range control modification for greater flexibility to meet overload 14 p2272 A66-28439

RANGE ERROR

Range instrumentation systems calibration and evaluation at Air Force Eastern Test Range 14 p2272 A66-28447

RANGE INDICATOR

Range height indicator radar observation of bright band, radar reflectivity and dissipating stage of convective precipitation cells 11 p1730 A66-23099

RANGE MEASUREMENT

Final range tests of Polish Meteor 1 noting tracking efficiency 01 p0144 A66-11066

Radar cross section measurement, principles and techniques 10 p1498 A66-21600

Range requirements in radar cross section measurements in terms of permissible variations in amplitude and phase of incident field at target 10 p1498 A66-21601

Sand table simulation of full-scale ground-plane range 10 p1502 A66-21631

Measurement accuracy of antenna test range evaluated for gain, ellipticity, polarization angle, boresight axis and ground reflected energy 12 p1836 A66-24155

Radar range measurement accuracy shown to depend on receiver filter 13 p2023 A66-25666

Goddard Range and Range Rate System for near-Earth and cislunar cooperative target tracking, noting design and operation 13 p2025 A66-26014

Fading channel simulator for performance testing of spacecraft communication and ranging equipment 14 p2271 A66-28406

Satellite range measurements using laser in conjunction with photoelectric receiver and Baker-Nunn camera 15 p2453 A66-29998

Monopulse radar air-to-surface slant range measurement 17 p2872 A66-31958

Radar echo range distribution determined from meteor stream measurements 17 p3004 A66-32964

Laser system for measuring surface contours in large steerable antennas 18 p3119 A66-34296

Helium-neon laser assessment as source in high precision range measurements 19 p3372 A66-35362

Three-station range trilateration for establishing orbit of visible satellite used for calibrating ground tracking network 20 p3514 A66-37223

Approximate atmospheric entry trajectories on cylindrical planet, noting minor circle turn maneuver and bank angle schedule 21 p3811 A66-38705

Traveling disturbance in ionosphere due to nuclear detonation detected as acoustic-gravity wave modes, noting range-time diagrams 24 p4200 A66-42594

RANGE SAFETY

Redundant electrical systems for Titan II and Gemini Titan II launch vehicles 20 p3499 A66-37193

RANGEFINDING

S OPTICAL RANGEFINDER

RANGER IX LUNAR PROBE

Launch vehicle guidance, premidcourse orbit determination and midcourse maneuver of Ranger IX spacecraft lunar mission and merger 02 p0260 A66-12056

Determination of lunar luminance to set video gain of Ranger TV cameras 08 p1222 A66-18733

RANGER VII LUNAR PROBE

Ranger television system designed to transmit close-up pictures of lunar surface to Earth 02 p0189 A66-11364

Lunar crater-diameter-depth relationship from Ranger VII photographs in excellent accord with terrestrial impact crater parameters 02 p0291 A66-12186

Lunar maria surface features and formation from Ranger VII photographs 03 p0424 A66-12455

Depth of lunar dust estimated by comparison with laboratory craters overlain by various thicknesses of sand, including Ranger VII photographs 06 p0955 A66-16783

Strength of overlay of granular material on Moon estimated from Ranger VII photographs, showing fairly steep slopes covered with dust 06 p0955 A66-16784

Origin and nature of three structures in 235-mi diameter lunar crater photographed by Ranger VII 07 p1133 A66-17456

Ranger VII and VIII photography shows nature of lesser lunar ray systems, including images of crater Delambre and Bonpland J 08 p1293 A66-19265

Lunar crater distribution measurement from Ranger VII photographic data analysis, deriving approximate expression for secondary distribution 08 p1297 A66-19417

Lunar dust depth in Mare Cognitum determined by comparing Ranger VII photographs with laboratory crater

photographs 11 p1770 A66-22571

Hypothesis that Luna IX rocket exhaust during soft landing caused formation of shallow crater visible in Ranger VII lunar probe photographs 15 p2593 A66-28681

Frequency distribution of secondary lunar craters determined from Ranger VII photographs, hypothesizing that part of these depressions are subsidence formations 15 p2598 A66-29265

Lunar photographs of Ranger VII analyzed, noting lunar surface 16 p2806 A66-31700

Photographic atlas of Moon, particularly Ranger VII transmissions and Pic-du-Midi ground observation, with discussion of lunar physical and dynamic properties 16 p2807 A66-31747

Model formulation of fine structure of lunar topography in Mare Cognitum based on Ranger VII satellite photographs 19 p3456 A66-35439

Baldwin formula for diameter and depth of lunar ring mountains and craters in sea of clouds, noting Ranger VII photos 24 p4279 A66-42722

RANGER VIII LUNAR PROBE

Ranger VII and VIII photography shows nature of lesser lunar ray systems, including images of crater Delambre and Bonpland J 08 p1293 A66-19265

RANGER BLOCK III

Ranger Block III television system for lunar surface photography 06 p0958 A66-15934

RANGER LUNAR LANDING VEHICLE

Cathode ray tube device for digital video processing of Ranger pictures 23 p4071 A66-41677

RANGER PROJECT

Design and test procedures for batteries and voltage regulator of power subsystem for Ranger TV system 04 p0459 A66-13582

Ranger lunar probe photograph analysis, crater size and shape measurements and dominant topographic features, including camera and command systems 07 p1132 A66-17208

History, background and purpose of Ranger missions to Moon, including spacecraft, television subsystem, testing and calibration 07 p1139 A66-18360

Data processing procedures used on flights of Rangers VII, VIII and IX, evaluating lunar photographs 11 p1775 A66-23079

Thermal history, chemical composition and interior of Moon evaluated from Ranger VII, VIII and IX and terrestrial photographs 19 p3456 A66-35438

Ranger VII, VIII and IX lunar probes scientific results on texture of maria, crater rays, crater classification, mare ridges, rilles, lineaments and bearing strength of mare floor 19 p3457 A66-35441

Hypervelocity projectile impact cratering from Ranger photographs of lunar surface 19 p3457 A66-35443

Shutters, lenses, vidicons, data rates and calibration techniques for TV cameras of Rangers VI, VII, VIII and IX 23 p4070 A66-41671

RANKINE CYCLE

Rankine cycle technology programs noting use of stainless steel bimetallic systems, boiler and condensor problems, turbine operation, etc 05 p0612 A66-15169

[AIAA PAPER 65-465]

Cavitation damage in high-temperature liquid metal pumps for Rankine cycle space power plants studied in water model 07 p1038 A66-18175

Mercury lubricated hybrid bearings for lubrication requirements of mercury Rankine Silent Compact Auxiliary Power /SCAP/ system 13 p2001 A66-26254

[ASLE PREPRINT 65AM 3A3]

Design characteristics and status of SNAP Mercury Rankine nuclear power plant system 13 p2005 A66-26625

Weight, size and volume characteristics of Mercury Rankine solar power supply for spacecraft

[AIAA PAPER 64-724] 13 p2005 A66-26633
Solar dynamic space power energy conversion system using Rankine cycle and organic fluid

[AIAA PAPER 64-725] 13 p2005 A66-26634
Two-phase flow and material attrition problems for Rankine cycle liquid metal power plants

[ASME PAPER 66-GT/CLC-4] 14 p2224 A66-26979
Optimal working fluid for Rankine cycle engine

[ASME PAPER 66-GT-84] 14 p2411 A66-26990
Brayton cycle, Rankine cycle and thermoelectric systems considered as radioisotope secondary power systems for MOL

[ASME PAPER 65-AV-18] 16 p2636 A66-30856
Two-dimensional radiation-coupled wedge flow analyzed, using integral relations method and Rankine-Hugoniot relations

18 p3100 A66-34599
Rankine cycle technology programs noting use of stainless steel bimetallic systems, boiler and condenser problems, turbine operation, etc

[AIAA PAPER 65-465] 19 p3280 A66-35619
Criteria for use of Rankine MHD systems in space

19 p3280 A66-35802
Dynamic power generating systems using Rankine and Brayton cycles for space application

20 p3598 A66-37256
Thermodynamic conversion of reactor thermal energy into mechanical, using Carnot and Stirling cycles applicable for space

22 p3853 A66-40795
SNAP Mercury Rankine space power conversion program and testing of Combined Rotating Unit-V /CRU-V/

23 p4020 A66-41751
Potassium Rankine-cycle space power plant design for four turbine inlet temperature levels, noting construction materials

23 p4023 A66-41765

RARE EARTH
SA CERIUM
SA DYSPROSIUM
SA ERBIUM
SA EUROPIUM
SA GADOLINIUM
SA HOLMIUM
SA LANTHANIDE
SA LANTHANUM
SA NEODYMIUM
SA PRASEODYMIUM
SA SAMARIUM
SA THULIUM

Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet

01 p0079 A66-10241
X-ray L band absorption spectra of rare earth atoms in hexaborides, collecting evidence on valence state

01 p0126 A66-10980
Ionization potential of thulium obtained from hfs of thulium I, using discharge tube and Fabry-Perot etalon

03 p0393 A66-12322
Preparation of single crystals of double molybdates of Na and La /or other rare earth elements/ doped with Nd, Tb or Pr for laser application

04 p0529 A66-13478
Solar abundance of rare earths analyzed, using spectroscopy of ionized lines

10 p1605 A66-21208
Magnetostrictively generated microwave acoustic pulse in thin films of Dy, Ho, Gd and Er

14 p2350 A66-26876
Rare earth research - Conference, Phoenix, April 1964

14 p2361 A66-27460
Superconductivity and origin of magnetic field at nucleus and ferromagnetism problems analyzed in rare earth metals and alloys

14 p2362 A66-27461
Hypothesis that system sodium fluoride-yttrium trifluoride serves as model for each of binary systems of rare earth trifluorides SmF₃ to LuF₃ with sodium fluoride

14 p2315 A66-27466
Faraday effect in rare earth garnet ferrites and metallic ion g values in IR spectrum

14 p2364 A66-27703
Coherent emission from trivalent holmium ions in rare earth substituted yttrium aluminum garnet, noting three energy transfer combinations in YAG

15 p2512 A66-28690
IR quantum counter based on energy transfer between two rare-earth ions in tungstate mixture

15 p2568 A66-29642

Growth of single crystals of rare-earth fluorides for laser application, using hydrogen fluoride atmosphere, noting ion exchange purification

16 p2779 A66-31082
Low temperature resistivity, magnetic susceptibility and superconductive transition point in La containing rare earth impurities

17 p2982 A66-32972
Reflection spectra of polished polycrystalline samples of various rare earth chalcogenides

19 p3442 A66-35820
Lowest of UV absorption bands attributed to 4f-5d transition of trivalent rare earth ions in calcium fluoride crystals

19 p3443 A66-36004
Crystal growth of rare earth tungsten bronzes using electrolytic reduction of fused mixture of rare earth tungstate and tungsten trioxide

19 p3381 A66-36037
Fluorescence of rare earth, actinide and transition metal ions in insulating crystals as result of optical excitation, discussing spectroscopic properties and operating characteristics

20 p3575 A66-36969
Organic laser systems including luminescence for achieving laser action, fluorescent and phosphorescent systems and chemistry and spectroscopic properties of rare earth chelates

20 p3576 A66-36970
Theoretical band structure, Fermi surface, electronic structure, magnetic and optical properties of rare earth metals

20 p3614 A66-37277
Electronic energy band structure and optical properties of heavy rare earth metals

20 p3614 A66-37278
Rare-earth element abundance patterns in Hawaiian basalts determined by neutron activation analysis

21 p3735 A66-39492
Barium titanate semiconductors containing controlled amounts of neodymium prepared, showing dependence of electrical properties on preparative conditions and amount of rare earth

23 p4109 A66-41128
Equiatomic rare earth germanide magnetic structural characteristics

24 p4252 A66-42353
Solar abundances of seven rare earths deduced for center of solar disk with weighting function

24 p4279 A66-42711
method

Crystalline solid lasers, considering rare Earth and transition metal impurities and host materials, noting CW laser characteristics

24 p4224 A66-42799

RARE EARTH ALLOY
SA ERBIUM ALLOY

Exchange interaction between f-electrons and s-electrons in atomic shells of crystal lattice of rare-earth metals, examining calculation methods for Hamiltonian of s-f exchange

20 p3617 A66-37476

RARE EARTH COMPOUND
Theoretical optical resonator for laser with rare earth liquid solutions as active components

10 p1543 A66-21970
Refractory oxides from alkoxides for group IVB transition and rare-earth metals applied to powders and coating of zirconia materials by thermal decomposition

16 p2730 A66-30249
Chemical bonds between rare earth metals and nitrate radicals in lanthanum, gadolinium and yttrium nitrates studied from IR absorption spectra

18 p3063 A66-33842
Lanthanum germanide synthesis using arc furnace, noting chemical properties

20 p3584 A66-37416
Theoretical optical resonator for laser with rare earth liquid solutions as active components

21 p3749 A66-39549

RARE GAS

Electron beam pumping of noble gas ion laser

01 p0081 A66-10350
Quantum theoretic probability of trapping inert gas atom on solid surface with linear lattice

01 p0108 A66-10634
Noble gas ion beams produced by duoplasmatron magnetically analyzed while varying gas pressure in source

01 p0114 A66-10850
Aluminum cold cathodes with single mode 6328 angstrom helium-neon gas laser

lifetimes exceeding 3000 hours

01 p0043 A66-10855
Charge distribution in ion beams after passage through nitrogen and inert gases

02 p0267 A66-11724
Nonisothermal pulse discharge column in argon-cesium and helium-cesium systems with produced plasma studied for nonisothermal conductivity

03 p0398 A66-12508
Graphite-carbon thermocouple used for measuring high temperatures in reduction and inert gas media

03 p0370 A66-12838
Negative resistance in xenon planar triode due to Ramsauer effect

03 p0343 A66-12969
Pressure range determination where stable plasmoids exist in electric field discharge, with measurements made on rare gases

03 p0405 A66-12987
Dielectric properties of noble gases afterglows following electrodeless discharge over signal frequency and pressure ranges

04 p0551 A66-13813
Continuous absorption coefficients for x-factors of neutral argon, krypton and xenon by spectroscopic measurements using shock tube with membrane

04 p0553 A66-14280
Isotopic ratios and location of light primordial rare gases in stony meteorites and correlation with diffusion coefficients

04 p0580 A66-14482
Solar wind as source of primordial inert gases in stony meteorites

04 p0580 A66-14483
Rare gas measurements in iron meteorites and troilite and schreibersite inclusions, using mass spectrometer

04 p0580 A66-14484
Z-pinch discharge in rare gases and light phenomena as described by model of converging cylindrical shock waves impelled by magnetic piston

04 p0558 A66-14495
Rare gas content of stony meteorites measured by dissolving diverse mineral fractions in solvents on step-by-step basis

04 p0580 A66-14497
Thermal conductivity of Ar, Ne and Kr from 1500 to 5000 degrees K

[ASME PAPER 65-HT-3] 05 p0782 A66-14733
Helium-neon laser output characteristics as function of laser parameters

05 p0694 A66-14897
Noble gas-filled thermionic converter characteristics, performance and application

05 p0617 A66-15555
Inert gas-filled controllable thermionic generator in form of gas triodes based on gas discharge phenomena

05 p0618 A66-15556
Lifetime and stability of emitter and collector materials in noble gas converters with barium covered tantalum electrodes

05 p0619 A66-15561
Excitation cross sections of helium lines in electron/atom collisions

07 p1044 A66-17874
Time dependence of electron density during afterglow of plasma in helium-hydrogen, neon-hydrogen and argon-hydrogen mixtures measured by microwave cavity

07 p1091 A66-18398
Beat frequency and rotation of polarization plane in He-Ne laser with axial magnetic field

07 p1046 A66-18430
Noble gases and isotopic abundances in Peace River, La Lande and Achilles chondrites

08 p1291 A66-19090
Rare gas evidence for paired meteorite falls of Accalana-Arttracoona-Carraweena and La Lande-Melrose-Taiban

08 p1291 A66-19091
Isolation of 1.0621 line in He-Ne gas laser by multilayer dielectric-coated mirrors with sharp spectral cut-off characteristics

09 p1386 A66-20517
Plasma generation by fission fragment ionization of noble gases, discussing theory, ionization tube and data analysis

10 p1564 A66-21545
CW laser action on triple state phosphorus-sulfur transition, using hydrogen sulfide-noble gas mixtures

10 p1543 A66-21577
Cermet face seals for inert gas environment sealing shaft of liquid-metal pumps employing conventional lubrication system

[ASLE PREPRINT 65AM 4C4] 10 p1540 A66-22039
Thermal conductivity of Ar, Ne and Kr from 1500 to 5000 degrees K

[ASME PAPER 65-HT-3] 11 p1785 A66-22185
MHD generator characteristics, temperature and pressure requirements and

scaling laws it obeys, temperatures above 2000 degrees K needed for efficiency 11 p1638 A66-22241

Shock wave structure in binary gas mixtures that are monatomic and chemically inert, using Mott-Smith method 11 p1691 A66-22914

Optical excitation due to impact of very slow helium ions on Ar and Kr attributed to transfer of kinetic energy into internal electron energy 11 p1740 A66-22971

Characteristics of periodic fluctuations in voltage, current and luminous intensity of discharge through inert gases and mercury vapor, using commercial discharge tubes 11 p1747 A66-23369

Perturbation theory of ionization of hydrogen and rare-gas atoms by simultaneous absorption of several photons 11 p1715 A66-23388

Interaction potential of inert gases defined in terms of transport properties, noting contribution of nonadditivity to static lattice energy 12 p1917 A66-23936

MHD nuclear electric space power systems using noble gases seeded with alkali metal vapors as working fluid 13 p1998 A66-25526

Rare gas concentrations and isotopic compositions in Khor Temiki meteorite 13 p2186 A66-25877

Laser pumping by intense noble gas discharge in zeta-pinch geometry 13 p2092 A66-25995

Ionization cross section for rare gases and hydrogen atoms calculated from perturbation theory, noting ruby laser photon absorption 13 p2133 A66-26188

Atomic ionization by intense optical field, noting ruby laser-pulse effect on inert gas between electrodes 13 p2134 A66-26189

Threshold data for ruby and neodymium laser pulse-induced breakdown in Xe, Ar, Kr, Ne, He, oxygen, nitrogen, air and carbon dioxide 13 p2100 A66-26191

Bethe-Born approximation and partial ionization cross sections of singly and doubly charged helium and neon ions 14 p2336 A66-26830

Bethe-Born approximation and partial ionization cross sections of argon, krypton and xenon ions 14 p2336 A66-26831

Laser oscillator study of coherent stimulated emission of IR transitions in rare gases 14 p2308 A66-27336

Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 15 p2557 A66-28564

Radiative cascade patterns in helium-neon gas system using idealized model, computing spontaneous decays which are compared with laser experiments 15 p2512 A66-28699

Actual line shape expected from accelerating radiating ion, errors due to Lorentzian approximation and results for ion laser transition in rare gas lasers 16 p2716 A66-30181

Modulated molecular beam techniques used to measure spatial distribution of rare gases reflected or scattered from metal surface 16 p2753 A66-30393

Rare gases and age distributions in stone meteorites 16 p2804 A66-31353

High voltage pulsed electrodeless discharge in rare gas as light source for ruby and Nd glass laser excitation and observation of output characteristics 16 p2720 A66-31448

Oxygen consumption of rabbits decreases in proportion to inert gas concentration dissolved in tissues 17 p2857 A66-32174

Mass spectrometric analysis of Kr and Xe in silicates extracted from slab of Estherville stony iron meteorite 17 p3002 A66-32530

Changes in massive amorphous boron filaments by heat treatments under reduced pressures and in presence of inert gases 17 p2943 A66-32852

Rare gases distribution in pyroxene and feldspar of Khor Temiki meteorite 17 p3007 A66-33280

Chemical analysis of stony meteorites with sharp boundaries between light and dark structure, noting differences found in achondrites and chondrites 17 p3007 A66-33281

Ion-molecular reactions of hydrogen with inert gases caused by low energy electrons

in low temperature plasmas, considering energy level populations, reaction cross sections, etc 18 p3064 A66-34026

Optical frequency breakdown threshold of inert gas mixtures, using focused beam radiation from Q-spoiled neodymium laser 18 p3138 A66-34236

Decay cross section of pumped metastable He atoms in He-Ne laser 18 p3119 A66-34695

Radiation from high-energy-level transitions excited in He-Ne laser during optical pumping with He lamp 18 p3120 A66-34697

Lennard-Jones potential application to properties of simple gases, noting values of second and third virial coefficients, molecular interaction, collision integrals, etc 18 p3140 A66-34926

Vibrational relaxation of carbon dioxide in mixtures with noble gases 19 p3295 A66-35494

Multiphoton ionization of krypton and argon by ruby laser radiation may occur by absorption 19 p3403 A66-36721

Graphite-carbon thermocouple used for measuring high temperatures in reduction and inert gas media 19 p3362 A66-36779

Geometry of steady state annular electrodeless discharge in argon and xenon as function of discharge power, type of gas, gas pressure, etc 20 p3607 A66-36976

Simplified model of relation between electron concentration and ionization rate in steady-state inert gas discharge column leading to contraction of column 20 p3608 A66-37464

Rare gas mass spectrometric analysis of He, Ne and Ar in Bursa and Canakkale chondrites 20 p3651 A66-37578

Continuous wave UV ionized gas laser emission over four transitions in neon, krypton and argon 20 p3579 A66-37771

Germanium damage due to low energy He, Ne, Ar and Kr ion bombardment 20 p3623 A66-38392

Rare gas isotope composition of Estherville mesosiderite and Haraiya, Juvinas, Shergotty and Stannern achondrites 22 p3975 A66-39682

Flare ion fluxes in space by mass-spectrometric measurements of solar flare rare-gas ions stopped in extraterrestrial material 22 p3973 A66-40016

Dynamic conversion of solar and chemical energy, discussing power conditioning, Brayton-cycle system with inert gas and spacecraft batteries 22 p3851 A66-40128

Transverse separation of rare gas-metal vapor mixture components in positive nonisothermal plasma column in plain-symmetric glow discharge 22 p3958 A66-40934

Inert gas effect on performance characteristics of cesium thermionic converter, noting saturation current increase 22 p3853 A66-40944

Hydrolytic reactions of nitrogen fluorides, noting inertness of nitrogen trifluoride to pure water and reaction with aqueous base to give nitrite and fluoride 23 p4118 A66-41242

Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 23 p4112 A66-41285

Optimum seed concentrations of alkali metal in rare gas for maximum electroconductivity of slightly ionized nonequilibrium plasma 23 p4104 A66-41511

High temperature testing and evaluation of graphite helical-screw expanders and compressors for use with inert gas Brayton cycle 23 p4075 A66-41755

Initial phase of shock produced ionization in argon, krypton and xenon to elucidate atom-atom ionization reaction to determine cross section 23 p4098 A66-42079

Amphoteric chondrite, St. Meslin, noting primordial rare gases associated with dark portions 24 p4274 A66-42610

RAREFIED GAS

Uniform shear motion in rarefied monatomic gases in finite space, discussing distribution function of intrinsic molecular velocity 01 p0108 A66-10472

Simple wave interaction in polytropic rarefied gases flowing from parallel wall channel 01 p0006 A66-10473

Existence and uniqueness of Cauchy problem for Boltzmann equation describing flow past convex body of rarefied gas of

structureless particles 02 p0261 A66-12022

Random motion of rarefied gas described by probability densities 03 p0359 A66-13182

Liquids used in manometers for pressure and pressure difference measurement in rarefied gases, considering cadmium boron tungstate, polymethylsiloxanes, etc, noting lack of toxicity, low viscosity, etc 03 p0371 A66-13204

Aerodynamic characteristics of flat rectangular plate placed normal to flow of highly rarefied gas 04 p0456 A66-14141

Slip and compressibility effect on velocity and pressure drop characteristics of rarefied gas flows in rectangular and annular ducts [ASME PAPER 65-FE-20] 06 p0871 A66-16218

Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas 08 p1165 A66-19484

Plane Poiseuille flow analyzed by method of elementary solution 09 p1365 A66-19967

Iterative solution to shock wave structure in highly rarefied flows through kinetic theory and full Boltzmann equation 11 p1690 A66-22910

Shock front density distributions in Ar and He determined in shock tube, using electron beam attenuation 11 p1691 A66-22916

Molecular collision effect on transitional drag on cylinder traversing rarefied gas at hypersonic Mach numbers, discussing departure from free flow 11 p1632 A66-22920

Modified first-collision model theory that agrees with experimental data on drag coefficient of cylindrical bodies in flow of rarefied gases 11 p1633 A66-22921

Drag measurement for grid of wires in rarefied gas slip flow and transition flow 11 p1633 A66-22927

Hypersonic rarefied gas flow in short ducts, measuring wall static pressure and stream total pressure distributions 11 p1634 A66-22932

Mass flow of nitrogen gas through circular orifice at five Knudsen number values from 0.13 to 1.78 and range of upstream to downstream pressure ratios 11 p1692 A66-22936

Impact tube pressure probe response to free molecular rarefied gas flow for arbitrary angle of attack 11 p1692 A66-22939

Generalized theorem of minimum entropy production in terms of fluctuation theory and variational principle, noting application to heat flow in rarefied gases 12 p1974 A66-23541

Aerodynamic characteristics of rectangular plates in hypersonic flow of rarefied gas differing in aspect ratio, thickness and angles of attack, determining maximum lift-drag ratio 12 p1798 A66-24442

Rarefied gas flow problems solved by hydrodynamic equations and representations of stress tensor and heat flux reproducing Navier-Stokes continuum limit and free molecule limit, noting velocity distribution interpolation 13 p2061 A66-25163

Rarefied gas mechanics based on Boltzmann equation with prescribed boundary conditions 13 p2071 A66-26726

Existence and uniqueness of Cauchy problem for Boltzmann equation describing flow past convex body of rarefied gas of structureless particles 14 p2334 A66-27573

Macroscopic equations for nonequilibrium processes in rarefied gases by disrupting moment equations infinite chain, using function of maximum entropy distribution 14 p2336 A66-28059

Solution to dispersion equation of linearized Boltzmann equation in kinetic theory of rarefied gases, noting root behavior and distribution function structure 14 p2278 A66-28285

Scanning-electron-beam densitometer for measuring density distributions in rarefied gas flow 14 p2298 A66-28342

Rarefied gas flow described by Boltzmann equation 15 p2477 A66-29175

Ionospheric flight simulation in which ion distribution of neutral gas expanding into rarefied ionized gas under magnetic field is measured 16 p2759 A66-30374

Response of impact and static pressure probes in rarefied high speed gas flow 16 p2628 A66-30378

Effect of orifice dimensions and heat transfer to surface with orifice on pressures

- measured in low density gases 16 p2628 A66-30379
- Electrical discharge probe for transient density measurements in rarefied gas flow, noting density range, flow velocity, etc 16 p2701 A66-30380
- Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients, shock wave behavior, etc 16 p2825 A66-30383
- Energy transfer measurements in gas-solid surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397
- Shock wave excited by pulsed current flowing between two plane parallel electrodes in rarefied air 16 p2690 A66-31621
- Poiseuille flow of rarefied gas in annular tube analyzed numerically for inverse Knudsen number, using Bhatnagar-Gross-Krook model and transport integro-differential equation 18 p3102 A66-34920
- Couette flow and heat transfer through hard-sphere rarefied gas enclosed between parallel walls analyzed by Monte Carlo method 19 p3478 A66-35803
- Thermoconductivity through rarefied gases at rest contained between concentric cylinders, varying pressure 19 p3478 A66-36061
- International Union for Vacuum Science, Technique and Applications - International Congress, Stuttgart, June-July 1965 20 p3621 A66-38083
- Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084
- Vacuum technique application to space research, discussing partial pressure measurements, space simulation procedures and rarefied gas flow 20 p3544 A66-38089
- Heat conduction in rarefied gases between concentric spheres by moment method, considering accommodation coefficients at inner sphere surface 21 p3834 A66-38708
- Density distribution and shock wave profile of rarefied gas slip flows past blunt bodies determined, using multibeam interferometer 21 p3724 A66-38903
- Temperature associated with longitudinal thermal velocities overshoots for Mach numbers slightly higher than 1 for monatomic gases in rarefied gas flows 21 p3727 A66-39184
- Free convective heat transfer in thermal boundary layer of rarefied gas 22 p3902 A66-40922
- Integral operator for solving aerodynamic problems for slightly rarefied viscous gas 23 p4054 A66-41356
- Moment method in hypersonic flow of rarefied gas around bodies of arbitrary shape 23 p4054 A66-41357
- Quantitative fast response visualization technique for low density flow fields based on electron beam fluorescence probe 24 p4210 A66-42201
- High sensitivity method of visualization of supersonic flow of rarefied gas, using glow from cathode parts of glow discharge 24 p4196 A66-42876
- RAREFIED GAS DYNAMICS**
- Shock wave propagation phenomena including ionization relaxation, electron diffusion from shock wave front and structure of shock waves in highly rarefied gases 04 p0508 A66-13503
- Ion recombination effects on inhomogeneous cylinder deceleration in rarefied plasma 04 p0551 A66-13858
- Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964
- Two-fluid shock wave model involving Boltzmann equation and inelastic collision theory for rarefied gas 08 p1204 A66-18524
- Heat transfer and mass flux expressions for recombination interactions at solid-gas interface due to transport of atomic and ionized particles to spacecraft in ionosphere 08 p1161 A66-18747
- Book on dynamics of rarefied gas discussing kinetic theory, shock wave structure, Couette flow, gas flow between coaxial cylinders and plasma dynamics 08 p1208 A66-19321
- Cylindrical Poiseuille flow of rarefied gas for inverse Knudsen number from zero to 10 10 p1524 A66-21806
- Cauchy problem for linearized Boltzmann equation, deriving high accuracy equations of motion of rarefied gases 11 p1735 A66-22338
- Gas flow in free-molecular regime with negligible collision approached by diffuse reflection model 11 p1688 A66-22525
- Rarefied gas dynamics - International Symposium, Institute for Aerospace Studies, University of Toronto, July 1964, Volume 1 11 p1688 A66-22901
- Sound wave propagation in rarefied gas dynamics, using kinetic theory 11 p1736 A66-22903
- Steady state sound disturbances induced in monatomic gas by oscillating plane boundary 11 p1737 A66-22904
- Rarefied compressible gas flow analysis by study of collisions between molecules, molecule-surface collisions and distance molecules travel between collisions 11 p1739 A66-22907
- Shock wave structure in gas composed of rigid sphere molecules initially in thermal equilibrium between two infinite plane parallel specularly reflecting walls 11 p1691 A66-22913
- Asymptotic solution of rarefied gas flow, using free molecular approximations 11 p1692 A66-22919
- Rayleigh problem at low Mach numbers and arbitrary Knudsen number investigated in rarefied gas dynamics according to kinetic theory 11 p1692 A66-22922
- Heat transfer and pressure data extended from classical thin boundary layer regime to near-free-molecule flow in study of low density effects in hypersonic wedge flows 11 p1633 A66-22928
- Fundamental phenomena in hypersonic flow - Conference, Buffalo, June 1966 13 p2060 A66-25152
- Rarefied flow transition at leading edge of flat plate examined, using Navier-Stokes equation, noting new low density jump conditions, viscous layer characteristics, effect of normal pressure gradient, etc 13 p2061 A66-25164
- Rarefied gas flow in hydrodynamic entrance region of circular tube, noting variation with density level, velocity profile and pressure drop for developing flow 13 p2070 A66-26713
- Rarefied gas dynamics, Advances in applied mechanics - International Symposium, University of Toronto, July 1964 16 p2751 A66-30370
- Two-stage radial-flow turbomolecular vacuum pump noting design, measured and predicted performance, application, etc 16 p2710 A66-30382
- Supersonic molecular beam apparatus, noting maximum intensity for variation of inlet stagnation pressure and nozzle-skimmer distance 16 p2746 A66-30385
- Continuum source molecular beam facility, examining effect of source-skimmer distance variation on flux and spatial distribution of beam in collimation chamber 16 p2746 A66-30386
- Hydrogen, He, Ne and Xe high energy molecular beam scattering from gold film surfaces during evaporative deposition 16 p2752 A66-30392
- Pulsed molecular nitrogen beam-ballistic pendulum measurements of normal momentum accommodation coefficients 16 p2701 A66-30395
- Improved Monte Carlo method for calculating steady state monatomic rarefied-gas flows, using computer for calculating possibility of collision in given geometrical cell 16 p2753 A66-30787
- Linearized model of Boltzmann equation to examine problems of kinetic theory of nonuniform gases 17 p2911 A66-32961
- Free-molecular flow of rarefied gas in plane channels or through cells of heat conducting grid whose cells are smaller than mean free path of gas molecules 19 p3277 A66-36480
- Rarefied gas motion instability, constructing general solution for effect of various force fields 19 p3343 A66-36846
- Boltzmann-Krook equation in Knudsen layers for Rayleigh shear flow and related flow of rarefied gas 21 p3731 A66-39578
- Electron beam density measurements discussing effect of elevated rotational and vibrational temperatures 22 p3918 A66-40365
- Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air 23 p4010 A66-41733
- Boltzmann equation for dilute monatomic gas, discussing asymptotic interpretation of Hilbert and Chapman-Enskog theories 23 p4097 A66-42011
- Nearly free molecular flow in rarefied gas dynamics in comparison of theoretical and experimental results with reference to drag 23 p4060 A66-42025
- Density and temperature measurement in base region flow field of clustered rocket model, using electron beam technique 24 p4210 A66-42200
- RAREFIED PLASMA**
- Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 01 p0109 A66-10260
- Macroscopic conservation equations for ionized dilute hydrogen plasma derived directly from Bogoliubov-Born-Green-Kirkwood-Yvon equations 01 p0110 A66-10338
- Cyclotron heating of electrons creating plasma at HF field 01 p0115 A66-11108
- Space charge convection effect on magnetic field transition, with reference to pressure-balance condition of unified rarefied plasma flow and wall 03 p0417 A66-12324
- Criteria for occurrence of spatially periodic solutions of self-consistent problem in steady state rarefied plasma 04 p0556 A66-14419
- Nonsteady cylindrical waves propagating in cold rarefied plasma situated in strong magnetic field 04 p0557 A66-14430
- Excitation of collisionless shock waves in rarefied plasma, examining neutron radiation and charged particle flux at chamber walls and magnetic field structure in plasma volume 04 p0557 A66-14431
- Plasma interaction of rapid movement of object with electrically conducting surface through ionized gas, representing particle motion by Schroedinger equation 06 p0917 A66-16400
- Flute oscillations of rarefied plasma situated in cylindrically symmetric magnetic field with nonzero shear 07 p1086 A66-17650
- Potential and forces acting on charged body in rarefied plasma flow 07 p1090 A66-18141
- Particle distribution in neighborhood of charged sphere in weakly ionized rarefied plasma 08 p1263 A66-19022
- Drift and flute instability of rarefied inhomogeneous plasma in short traps 08 p1266 A66-19636
- Space charge effects on electrical field and plasma structure in vicinity of charged cylinder of small radius 08 p1299 A66-19790
- Spacecraft motion in rarefied plasma in ionosphere and space, considering plasma stability and effects of magnetic and electric fields 09 p1464 A66-21015
- Deceleration of body in rarefied plasma owing to interaction with neutral and charged particles and electromagnetic fields 09 p1465 A66-21016
- Asymptotic structure of remote parts of wake of bodies moving in rarefied plasma, using linearized perturbation theory 09 p1465 A66-21017

S THRUST-WEIGHT RATIO
RATIONAL FUNCTION
Rational approximations to generalized
hypergeometric functions and error function
proven to converge to desired
limit 01 p0093 A66-10384
Active RC filters employing operational
amplifier to obtain biquadratic rational
functions 05 p0658 A66-15125
Pontryagin rational classes as topological
and homotopic invariants 08 p1246 A66-19712
Theorems for uniform approximations by
algebraic and trigonometric rational
functions, noting application in determining
functional properties 10 p1552 A66-21984
Construction of rational second order
kernels with aid of rational functions of
order n, applying result to theory of
approximation of
functions 12 p1902 A66-23765
Approximation theory by generalized
rational functions 17 p2947 A66-32843
Orthogonal sets of rational functions on
unit circle 18 p3128 A66-34700
Theorems for uniform approximations by
algebraic and trigonometric rational
functions, noting application in determining
functional properties 19 p3390 A66-36189
RATSCAT PROGRAM
S RADAR TARGET SCATTER SITE
/RATSCAT/ PROGRAM
RAVEN ROCKET
Skylark upper atmosphere research
sounding rocket, unguided vehicle powered
by Raven solid propellant rocket
motor 23 p4132 A66-41169
RAY
S INCIDENT RAY
S LUNAR RAY
S RADIATION
S REFLECTED RAY
S REFRACTED RAY
S SOLAR COSMIC RAY
S X-RAY
RAY TRACING
Propagation and diffraction of
electromagnetic waves in inhomogeneous
magnetoelectric medium, noting exoionospheric
propagation and Hamiltonian
optics 02 p0192 A66-12208
Spatial distribution of electron density
along given path inferred from oblique
incidence soundings taken at terminal of
path 04 p0515 A66-13679
Ray dispersion of electromagnetic waves
by free electrons produced in cone-shaped
ionized wake 04 p0481 A66-13843
Periodic gas lenses, discussing structure
ray optics properties of alternating gradient
focusing systems 05 p0717 A66-15180
Improved HF prediction using ray tracing
techniques to determine F-2 layer scale
heights and scale height h for alpha-
Chapman electron density
distribution 08 p1217 A66-19218
Reception of LF signals by radio
astronomy satellites, utilizing mathematical
techniques for ray tracing in spherical
ionosphere 11 p1651 A66-22367
Smith subprotonospheric whistlers and
digital computation of ion effects on
whistler-mode ray tracing 14 p2282 A66-26858
Image luminance of paraxial rays, image
formation and ray tracing in holography,
using Fresnel-Kirchhoff diffraction
formula 15 p2501 A66-28975
Curve equation describing ray surface
cutting by arbitrary plane of symmetry in
crystals 17 p2989 A66-33486
Wavefronts and construction tolerances for
cat-eye retroreflector 19 p3354 A66-35382
HF and VHF guided propagation in
ionospheric whispering gallery treated by
geometrical optics, emphasizing long-range
paths between two terminals in
ionosphere 22 p3863 A66-39933
Computer ray tracing study of image-
forming in eyes as affected by pupil size,
refractive indices and curvatures of cornea
and lens 23 p4025 A66-41149
Solar corona pictures during July 1963
eclipse, analyzing polar rays frequency
distribution along Sun limb and deviation

from radial direction, all linked to solar
activity cycle 23 p4123 A66-41810
RAYLEIGH DISTRIBUTION
Dynamic range bounds of error detection
circuits of tracking radars, minimizing
probability of excluding Rayleigh distributed
signal 12 p1817 A66-24302
RAYLEIGH EQUATION
SA MATHEU FUNCTION
Boundary layer solutions for Rayleigh
problem in MGD with Hall effect, using
Karman-Pohlhausen
technique 05 p0728 A66-15779
Rayleigh problem at low Mach numbers
and arbitrary Knudsen number investigated
in rarefied gas dynamics according to
kinetic theory 11 p1692 A66-22922
Linearization of Rayleigh problem for
viscous compressible conducting fluid,
considering compressibility effects by
evaluating solution of pressure
equation 12 p1924 A66-24580
Plane wave diffraction by infinitely
conducting network representing diffracted
electric field by Rayleigh
expansion 13 p2021 A66-25457
Application of Rayleigh principle to obtain
sharp upper bounds for increase of first
eigenvalue of membrane submitted to
parallel and equidistant rectilinear
constraints 20 p3669 A66-37544
Boltzmann-Krook equation in Knudsen
layers for Rayleigh shear flow and related
flow of rarefied gas 21 p3731 A66-39578
Mass transfer into aerodynamic body flow
fields, examining model shear flow in
Rayleigh problem for blowing current across
gas-solid interface 23 p4058 A66-41900
RAYLEIGH FADING
Frequency diversity can increase degree of
compensation for multipath fading and thus
improve communication reliability of
airborne UHF
communications 01 p0031 A66-10876
Advantages gained by amplitude and/or
phase adaptivity in optimum reception of
on-off signals subject to Rayleigh fading in
presence of additive receiver
noise 06 p0828 A66-16109
Detection performance for typical cases of
multiplicative radar signal processing used
for nonfading and Rayleigh-fading signal
amplitudes 23 p4041 A66-41702
RAYLEIGH NUMBER
SA BUOYANCY
Rotating fluid sphere, discussing power law
for dependence of Rayleigh number on
Taylor number 04 p0599 A66-14471
Cellular convection in horizontal layers
heated from below, noting effect of critical
Rayleigh number and width-height ratio of
cells 05 p0666 A66-14543
Asymptotic theory where limit R /Rayleigh
number/ approaches
infinity 12 p1976 A66-23550
Instability criterion in air, argon and
carbon dioxide at various pressures and
layer depths, detecting convection and
determining Rayleigh number for application
in transport properties of
gases 12 p1980 A66-24942
Steady finite-amplitude motions existing
for range of Taylor number, with values of
Rayleigh number smaller than critical value
required for overstability 12 p1866 A66-24948
Stability to infinitesimal disturbances of
plane Couette flow in presence of negative
vertical temperature gradient, noting
instability at critical Rayleigh number for
convection without shear 15 p2481 A66-29741
Energy method applied to stability of flows
governed by nonlinear Boussinesq equations,
establishing universal stability region in
Reynolds-Rayleigh number
plane 19 p3478 A66-36199
RAYLEIGH-RITZ METHOD
SA VARIATIONAL PRINCIPLE
Microwave propagation through metallic
waveguides filled with dielectrics, using
field theory, network theory, Rayleigh-Ritz
procedure, reaction concept,
etc 02 p0206 A66-12009
Rayleigh-Ritz method, stationary
complementary and potential energy
principles and Lagrange undetermined
multipliers applied to free vibration of
elastic body 11 p1781 A66-22611
Principle of stationary complementary

- energy applied to buckling of column, noting Rayleigh-Ritz method 12 p1969 A66-24362
- Approximate solution of free axisymmetric oscillations of circular structurally orthotropic plate of specific laws of variable thickness 15 p2613 A66-29436
- Vibration analysis of static plates and shells by finite element method 17 p3019 A66-31950
- Vibration analysis method for plate-like wings with variable thickness whose shape may be either parallelogram, trapezoid or triangle 18 p3253 A66-33784
- Strain-energy exposition of creep deflection theory and Ritz-Rayleigh method prediction of creep deformations of laterally loaded circular plates 18 p3256 A66-34561
- Linearized equilibrium conditions for force densities of aircraft oscillating in flight, determining Rayleigh-Ritz equations, measuring elastomechanical parameters by vibration tests 21 p3825 A66-38579
- Free vibration of composite system analyzed, using Rayleigh-Ritz method 21 p3825 A66-38583
- Approximate solution of two-dimensional boundary layer problem using Rayleigh-Ritz method, coordinate functions and interpolation 21 p3831 A66-39351
- RAYLEIGH SCATTERING**
- Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 01 p0133 A66-10756
- Numerical solution to equation of radiative transfer for plane parallel horizontal homogeneous medium 02 p0304 A66-11827
- Scattering of microwaves from bodies smaller than one wavelength used for plasma diagnostics 04 p0487 A66-14368
- Diffuse day skylight intensity rocket measurements, discussing exponential variation of intensity with height in upper atmosphere 05 p0668 A66-14916
- Geometrical UV reflectivity of Jupiter in terms of Rayleigh scattering determined from objective-grating rocket spectrometer 05 p0762 A66-15281
- Absorption effect on Rayleigh atmosphere, calculating reflected and transmitted intensities and polarizations for C wavelength pair used for Umkehr measurements 07 p1028 A66-17364
- Rayleigh region in terms of radius of convergence of Rayleigh or LF expansion 09 p1348 A66-20961
- Intensity and polarization of radiation diffusely transmitted and reflected by Rayleigh atmosphere for optical thickness from 1.0 to 10.0 13 p2072 A66-25800
- Velocity and lifetime of microwave thermal phonons in liquids and solids determined by spectrum of light scattering from laser illuminated sample 13 p2133 A66-26166
- Spectral energy distribution and Doppler broadening of Rayleigh light scattered from hydrogen and argon gas at low density, using Fabry-Perot interferometer 13 p2133 A66-26169
- Rayleigh scattering intensities in upper atmosphere 13 p2075 A66-26737
- Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 14 p2285 A66-27855
- Horizon profile of Earth calculated from solutions of plane-parallel Rayleigh scattering atmosphere 14 p2328 A66-27880
- Rocketborne spectrograph measurement of UV reflectivity of Venus and Jupiter, noting atmospheric Rayleigh scattering effects 15 p2603 A66-29963
- Ground reflection effect on polarization of radiation scattered from top of Rayleigh atmosphere, using Fresnel and Lambert models [AIAA PAPER 66-514] 16 p2699 A66-31498
- Temperature structure of early type stellar atmospheres noting sources of opacity, electron Rayleigh scattering, etc 16 p2806 A66-31703
- Rayleigh scattering scalar source functions and source matrix computed by iteration of auxiliary equation 17 p2917 A66-31922
- Phonon-drag thermopower variation in dilute copper alloys assuming Rayleigh law for phonon scattering 17 p2984 A66-33152
- Earth albedo estimation, backscattered interplanetary radiation and resonance scattering of dayglow 20 p3553 A66-38194
- Complete Rayleigh scattered field within homogeneous plane parallel atmosphere, noting scalar transfer equation extension 23 p4065 A66-41813
- Scattering of plane elastic compressional pulse by circular cylindrical cavity in infinite homogeneous isotropic linear elastic solid 23 p4145 A66-41984
- RAYLEIGH WAVE**
- Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 01 p0125 A66-10775
- Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 11 p1749 A66-22287
- Rayleigh turning-point criterion in velocity profile extended to spatially increasing flow disturbance 22 p3900 A66-40395
- Surface Rayleigh waves and resonance effects in elastic bodies, noting motion of wedge or load on surface 24 p4291 A66-42842
- RC NETWORK**
- RC circuit filter properties during operation under complex load in form of parallel connection of resistance and capacitance 01 p0036 A66-10224
- Maximum amplification in transistorized RC amplifiers 01 p0045 A66-10994
- Surveying transistorized differentiators and integrators, giving fundamental RC and equivalent circuits 01 p0045 A66-11022
- Load resistance effect on selectivity of notch filters using hyperbolically shaped RC lines 02 p0200 A66-11876
- Coordinate transformation for synthesizing network functions, considering matrix equation used in Foster form realization for RC driving point 02 p0207 A66-11881
- System coefficient matrices and finite number of derivatives are sufficient conditions for controllability of linear time-variable systems 02 p0208 A66-11901
- Universal definition of figure of merit associated with variable parameter one-port for RF switching and modulation 02 p0201 A66-11903
- Gyrator circuit with only three transistors designed by providing active feedback path so that circuit behaves like two-way feedback system 02 p0201 A66-11903
- Figure of merit and methods of finding optimal filters for pulse-forming networks, taking into account frequency response as well as time response 02 p0208 A66-11910
- Binary-ternary switching algebra used to analyze multiterminal two-position contact networks which include resistors and ideal rectifiers 02 p0209 A66-11911
- Network containing only two gyrators and two capacitors sufficient to synthesize given positive real driving-point function 02 p0209 A66-11913
- Active RC synthesis using operational amplifier, noting analog computer simulation of transfer function 03 p0339 A66-12434
- Inductance into integrated circuit, noting techniques involving RC networks 04 p0503 A66-13765
- RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 04 p0496 A66-13908
- Frequency analysis of wideband RL and RLC phase shifters, using Chebyshev polynomials 04 p0501 A66-14406
- Steady state and transient response of arbitrary tapered distributed RC networks with lumped load terminations 05 p0651 A66-14574
- Synthesis of rational transfer functions by using thin film distributed RC active networks incorporating single-pole partitioned capacitance devices 05 p0652 A66-14584
- Graphical display of transfer function of loaded and null-adjusted symmetrical parallel-tee network 05 p0656 A66-14628
- Negative impedance converters as RC active ladder units 05 p0658 A66-15123
- Parallel decomposition of linear three-terminal RC network 05 p0658 A66-15124

- Active RC filters employing operational amplifier to obtain biquadratic rational functions 05 p0658 A66-15123
- Synthesis of RC active filters with prescribed pole sensitivity, noting shunt feedback solution of complex conjugate phantom zeros 05 p0658 A66-15123
- Correlation relations of output voltage of switched RC integrator 06 p0823 A66-15883
- Design charts for transient response time of thin film networks used in digital circuits 06 p0842 A66-16000
- Transfer functions synthesis by passive RC networks with two or three computing amplifiers 06 p0861 A66-16363
- Stable tunable RC filters with fixed capacitors, variable resistances and positive feedback 06 p0853 A66-16653
- Distributed model of junction transistor and application in prediction of emitter-base diode characteristic, base impedance and pulse response of device 06 p0855 A66-16763
- Transfer matrix derived for cascade of simple commensurate uniformly distributed RC four-port unit elements 06 p0867 A66-16973
- RC active networks, describing circuit using voltage or current amplifiers with gain larger than unity 06 p0858 A66-16983
- Transistor RC oscillator with single-element tuning, using two push-pull driven half-lattice phase shifters 07 p1004 A66-17211
- Nonnumerical examples of three-terminal RC network, finding complete set of equivalent parallel-ladder decompositions for each case, valid over whole allowable parameter range 07 p1015 A66-17755
- Active network synthesis involving voltage amplifier with fixed voltage transfer ratio and two-terminal RC network 08 p1199 A66-18670
- Ferrite-based microelements as quasi-resonant RC circuits 08 p1191 A66-18914
- Method determining variance and correlation function fluctuations on limited inertial RC circuit system 09 p1344 A66-20440
- Rheostat-capacitance generators of FM oscillators with multilobe feedback 09 p1354 A66-20452
- Maximum amplification in transistorized RC amplifiers 10 p1510 A66-21674
- Lumped-parameter analogs of nonuniform RC distributed networks and lossless transmission lines 11 p1675 A66-22388
- Transient and frequency response of distributed resistance-conductance-capacitance network 11 p1675 A66-22388
- Matrix coefficient expression for film-type distributed-parameter RC circuit with arbitrary number of films and parameter distribution function 11 p1666 A66-22731
- Distributed RC network synthesis, determining necessary and sufficient conditions for driving point impedance, frequency response of transfer functions and Foster type realizations 11 p1678 A66-23240
- Tapered distributed RC networks with similar immittances examined for poles and zeros of two-port short circuit admittance parameters 11 p1678 A66-23241
- Mathematical approximation for alpha of drift transistors derived in terms of equivalent dominant pole and excess phase 11 p1671 A66-23245
- Simplified formulas relating parameters and geometry of film-type two-terminal RC networks with distributed parameters 12 p1830 A66-23736
- Microelectronic composite lumped-distributed transmission systems, two-port networks, voltage transfer function, root locus construction, pole and zero locations, etc 12 p1856 A66-24657
- High performance active RC band pass filter design providing for independent adjustment of poles 12 p1843 A66-24675
- Lumped-element circuit model used to accurately and effectively analyze transients in thin film RC microcircuits 12 p1843 A66-24724
- Band pass characteristics realized by four-layer distributed RC network without series resistance and amplifier scheme used as model for integrated circuits, noting frequency characteristics variation 13 p2051 A66-26063

T-type carrier-frequency RC correcting circuits calculated by equivalent transfer function 14 p2264 A66-27205

Two active parallel-T circuit variations of RC networks in filter design 14 p2264 A66-27458

Narrow band LF direct-reading random noise measurement and reduction of time requirements, using integrating RC network with time-variable components 14 p2295 A66-27716

Passage of pulse signal through distributed RC circuit with nonlinear p-n junction capacitance 14 p2254 A66-27740

Critical excitation function used to estimate transient response of thin film devices at time intervals exceeding greatest time constant 15 p2459 A66-28895

RC network and ideal current negative immittance converter with unity gain used in obtaining RLC voltage transfer functions 15 p2471 A66-29326

Closed loop active networks with distributed RC elements, noting circuit composition, parameters and application 15 p2471 A66-29327

Transfer function realization using RC network and control source, noting constraints such as multiplicative factors, poles, boundary frequencies, etc 15 p2471 A66-29328

RC active filter synthesis using common-base and common-collector configurations 15 p2475 A66-29862

Inhomogeneous semiconductor RC-circuit for case of small sinusoidal signal in presence of bias voltages 15 p2475 A66-29927

Parametric amplification in selective RC-circuit depends on pumping amplitude and phase shift between input-signal voltage and pumping voltage 15 p2475 A66-29930

Tabulated data method for synthesizing third order linear transfer functions, using chain of inverted L-sections of passive resistor-capacitor elements in conjunction with single operational amplifier 16 p2671 A66-31203

Simulation of fourth order type I linear system, using one-operational amplifier and two-terminal network consisting of four resistors and four capacitors 16 p2672 A66-31385

Double sideband capacitance and resistance modulation of systems and calculation of noise and amplification factors 16 p2666 A66-31561

RC circuit filter properties during operation under complex load in form of parallel connection of resistance and capacitance 17 p2880 A66-31908

Feasibility of solid state negative feedback amplifiers based on use of RC networks meeting requirements of frequency stability, high tolerance and long shelf life 17 p2880 A66-31955

Discriminating RC amplifier using compound reactive transistor for higher Q-factor 17 p2888 A66-32707

Transistor-tunnel diode RC emitter circuit for binary numeration 17 p2888 A66-32841

Design criteria for active filters using resistance and capacitance elements in feedback circuits 17 p2896 A66-33297

Inductorless filters, noting increased sensitivity of RC active networks to component tolerances 18 p3078 A66-34092

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 20 p3532 A66-37866

Parallel-T RC network designed with prescribed unsymmetrical transfer characteristic represented by quadratic rational function of frequency 20 p3539 A66-38286

Necessary and sufficient condition derived for generating rational functions of n-port rectangular structure for distributed RC networks 20 p3540 A66-38287

Bandpass amplifier design by selecting peak frequencies occurring in active high- and low-pass RC filter sections 21 p3711 A66-39200

Multiplier with nonlinear capacitance and resistance showing improvement in conversion efficiency, allowable input power

and converted output power 21 p3712 A66-39227

Block diagrams and frequency characteristics of resistance capacitance resonance amplifier 21 p3713 A66-39254

RC network model applied to study of transient response of semiconductor diode, obtaining accuracy estimates for finite-difference representation of one-dimensional diffusion equation 21 p3713 A66-39298

Simplified formulas relating parameters and geometry of film-type two-terminal RC networks with distributed parameters 22 p3876 A66-40079

Matrix coefficient expression for film type distributed parameter RC circuit with arbitrary number of films and parameter distribution function 23 p4045 A66-41469

Active and passive multiplication of RC time constants for subaudio frequency integrated filters 23 p4046 A66-41581

Low pass elliptic function filter fabricated from RC network and low gain voltage amplifier 23 p4050 A66-41611

Horowitz minimum sensitivity decomposition does not lead to optimally sensitive networks for selected class of RC networks 24 p4181 A66-42372

RC filter with staggered notch frequencies for ease of adjustment and maintenance 24 p4183 A66-42628

Laplace transform analysis of transistor switching circuit controlled by RC time constant, using PWM circuit as example 24 p4185 A66-42946

REACTION CONTROL

Reaction control system for V-STOL aircraft including power source, working fluid, delivery system, thrust producing devices and control point [SAE PAPER 650830] 05 p0610 A66-15014

REACTION JET

Low thrust cold gas reaction jet system for small spacecraft with nitrogen, ammonia, Freon-12 and Freon-14, analyzing thrust chamber pressure history [ASME PAPER 65-WA/AUT-11] 05 p0624 A66-15608

Three-axis limit cycle operation of reaction jet attitude stabilization system 08 p1304 A66-19515

Impulse bit-size, gas consumption and specific impulse of cold-gas attitude control reaction jet system 12 p1954 A66-24710

Optimum three-dimensional attitude control of spacecraft with two pairs of reaction jets 18 p3244 A66-33863

High-pressure supersonic fluid amplifier design and performance, noting effect of nozzle expansion ratio on design operating pressures [ASME PAPER 66-MD-29] 21 p3697 A66-38485

Optimum stabilization of axisymmetric satellite by system of n reactive jets 22 p3986 A66-40464

Control moment gyros with reaction control jet torque sources for attitude control of spinning and nonspinning space stations [AIAA PAPER 65-405] 23 p4132 A66-41097

REACTION TIME

SA PERCEPTUAL SPEED

SA PSYCHOMOTOR PERFORMANCE

Behavior and physiological correlates of human response time to high intensity auditory stimuli 02 p0187 A66-11832

Effects of physical location of visual stimuli on intentional response time /IRT/ 02 p0183 A66-12075

Light and noise level, stimulus intensity and background shade variation effect on reaction time 02 p0183 A66-12076

Reaction dwell time and cooling rate in

single pulse shock tube covering laboratory techniques and geometric and flow parameters 04 p0508 A66-14013

Supersonic commercial aircraft, discussing piloting problems such as reaction time, visual acuity reduction, etc 06 p0816 A66-16060

Ion-molecule reaction rates and recombination coefficients from mass spectrometric ionospheric data 11 p1702 A66-23492

Age, cardiac output and choice reaction time of airline, military and test pilots, attempting resolution of data discrepancy 12 p1806 A66-24397

Glow-discharge shock tube examination of chemiluminescent, surface-catalytic and gas-phase reaction rates, noting temperature dependence of NO-O and CO-O chemiluminescent reactions 13 p2016 A66-25368

Dislocation rate magnitudes and relative collision frequencies influencing relaxation profiles in diatomic gases 14 p2274 A66-27447

High temperature rate constants for H-atom transfers involving light atoms evaluated, using hard sphere collision theory 22 p3950 A66-39924

Psychomotor test equipment, describing Two-hand Device, Reaction Sensing Device and Rudder Control Test 23 p4029 A66-41042

EEG relation to average evoked potentials and human reaction time to visual stimuli for trials with and without feedback 23 p4029 A66-41550

Square-wave electropulse evaluated as more effective tactile stimulus for cross modality comparison of reaction times than more traditional stimuli 23 p4030 A66-41576

Reaction time to electrocutaneous stimulation confirmed as being faster to onset than to cessation of stimulation 24 p4163 A66-42318

Possible sustentation of observing behavior in pigeons by stimuli of chain schedule or by stimuli correlated with passage of time in interval schedules 24 p4167 A66-42366

REACTION WHEEL

Attitude control by means of reaction wheel driven by photoelectronically commutated DC torquer 02 p0179 A66-11278

Brushless DC reaction wheel operation, examining use of current limiting to achieve constant torque 02 p0179 A66-11279

Stabilite system, three-axis attitude control system utilizing single reaction wheel [AIAA PAPER 66-307] 12 p1955 A66-24774

Minimum-energy control law derived for attitude acquisition of satellite about single axis, using reaction-wheel control system [AIAA PAPER 65-434] 19 p3468 A66-35602

 SNAP-10A nuclear-reactor heat source and thermoelectric conversion and shutdown causes 06 p0907 A66-16321
 Control system construction and development for SNAP-2, -8 and -10A nuclear reactor systems 12 p1911 A66-23673
 SNAP-10A instrumentation and control subsystems and ground test program 12 p1911 A66-23676
 NERVA reactor control systems, using limiter circuits to protect nuclear subsystem from controller malfunctions and for pressure control 12 p1912 A66-23701
 NERVA reactor instrumentation noting core temperature thermocouples, neutron detectors, vibration and pressure transducers, strain gauges, etc 12 p1912 A66-23703
 Performance of SNAP-10A instrumentation during component qualification, ground system and flight system tests, noting environmental conditions 16 p2744 A66-30439
 Automatic starter for nuclear reactor rocket engine with automatic power control system 18 p3133 A66-33875

REACTOR CORE
 High temperature thermocouples as in-core sensors provide NRX and KIWI reactor temperature control [AIAA PAPER 65-598] 10 p1555 A66-21944

REACTOR DESIGN
 Snaptran Transient Test Machine for evaluation of aerospace nuclear accidents [ASME PAPER 65-WA/SAF-1] 05 p0714 A66-15602
 Neutron and gamma radiation measurements during low and high power NERVA reactor tests, determining leakage and radiation environment 12 p1911 A66-23700
 Clustering of multiple identical solid-core nuclear engines in polygon arrangement for space propulsion, evaluating reactivity coupling effect 12 p1912 A66-23702
 Reliability, durability and reduction of failure probability in radioisotope energy source design 13 p2085 A66-25285
 SNAP-8 reactor and shield designs and operating experience as heat source for long-term power supply [AIAA PAPER 65-473] 19 p3398 A66-35618

REACTOR FUEL
SA FISSION PRODUCT
SA FUEL ELEMENT
SA NUCLEAR FUEL
 Autoradiography of components of disassembled nuclear reactor as final phase in evaluating performance of experimental Kiwi rocket engine 06 p0907 A66-16430
 Convective heat transfer in thin rectangular channels commonly found in nuclear reactor fuel assemblies 07 p1148 A66-17299

REACTOR IN-FLIGHT TEST /RIFT/ PROJECT
 System for nuclear auxiliary power, covering spaceflight test of SNAP-10A, system testing, performance evaluation, etc 06 p0907 A66-15926

REACTOR MATERIAL
 Prototype of cesium plasma converter implementing heavy-duty electric power generator with nuclear reactor as primary energy source 05 p0617 A66-15547
 Nuclear fuel-cladding diffusion and interactions in uranium-tungsten and uranium-molybdenum systems, covering compatibility, transport rate, thermal cycling effects and cladding surface contamination 05 p0714 A66-15588
 Uranium-containing materials, refractory metals and alloys, discussing interface interaction, thermionic properties and parameters of vacuum electron emission stability 05 p0714 A66-15589
 Rupture life prediction for several high temperature alloys under linearly increasing stress in nuclear reactors

[ASME PAPER 65-MET-1] 06 p0895 A66-16205
 Graphite properties relationship to microstructure and control by fabrication techniques and material selection 07 p1053 A66-18295
 Refractory materials properties used in nuclear fuel element 07 p1079 A66-18302
 High temperature and vacuum effects on sliding friction and surface film formation between dry lubricated and nonlubricated pair combinations of metals, carbon and ceramics, noting SNAP reactor data [ASLE PREPRINT 65AM 6A1] 10 p1540 A66-22040
 Control system construction and development for SNAP-2, -8 and -10A nuclear reactor systems 12 p1911 A66-23673
 SNAP-8 reactor oscillating bearings to provide low friction self-lubrication at 1150 degrees F 16 p2712 A66-30414

REACTOR PHYSICS
 Average steady-state omnidirectional trapped electron flux due to beta decay from orbiting leakage reactor neutrons 05 p0747 A66-14786
 Solution of reactor kinetics equation numerically unconditionally stable for all values of reactivity or integration step size 13 p2126 A66-25791
 Thermionic converter and use in reactor 14 p2226 A66-28033

REACTOR TECHNOLOGY
 Nuclear engineering - AICE Conference, Chicago, December 1962 07 p1079 A66-17298
 Nuclear reactors for space and near-Earth propulsion 07 p1111 A66-18304
 Radiation detector, nuclear reactor, measurement, etc - Nuclear Science Symposium, San Francisco, October 1965 12 p1910 A66-23670
 Radiological prediction and monitoring of tests at Nuclear Rocket Development Station 12 p1911 A66-23671
 Nuclear reactor as power source in remote location 23 p4089 A66-41608

READOUT
 Recombination emission process in direct semiconductor devices for realization of high speed nondestructive readout from tunnel diodes without direct measurement or perturbation 05 p0647 A66-14828
 Readout technique for laser fog disdrometer 17 p2927 A66-33346

REAGENT
S HEXAMETHYLENETETRAMINE
REAL GAS
 Equilibrium thermodynamics from transport theory including interaction studied up to second virial coefficient, determining velocity of first sound and zero sound 01 p0161 A66-10327
 Introductory book on hypersonic aerodynamics covering continuum flow of inviscid nonheat-conducting perfect gas and real gas, viscous and low density effects in hypersonic flow 02 p0176 A66-11875
 Gas phase nonideality and mean column pressure effects on sample retention in gas-solid partition chromatographic systems with real carrier gases 04 p0472 A66-13396
 Equilibrium properties of system of interacting molecules calculated from differential equation of state for real gas, employing classical and thermodynamic relations 06 p0912 A66-16841
 Radiant flux to base region of axisymmetric real gas system with nonisothermal temperature distribution 07 p1151 A66-17588
 Invariance of differential equation systems in real gas dynamics considered in affine space-time 07 p1022 A66-18104
 Head wave of frictionless flow of real gas past positioned circular cone for small or zero angles of attack 17 p2842 A66-33169
 Correlation method of law of corresponding states for calculating thermodynamic properties of real gases and their mixtures 18 p3287 A66-35060
 Separated shock wave distance from free flying blunt body influence by real gas oscillation excitation 19 p3341 A66-35746
 Stagnation point heat transfer in dissociating or ionizing real gases for case of discontinuous Prandtl numbers 19 p3478 A66-35749
 Correlation formulas improvement for

laminar shock tube boundary layer for air and argon 21 p3727 A66-39169
 Similarity laws in hypersonic flow of real gas around thin blunted bodies, particularly bodies with rough lateral surface 23 p4009 A66-41720
 Thermodynamics of real air expansion using state equation applied to large temperature range, including contribution of vibrational energy 24 p4293 A66-42158

REAL TIME
 Data automation system /DAS/ on Mariner IV Mars probe involving real and nonreal time for experiments during cruise and encounter flights 01 p0034 A66-11111
 Echo II TV system to observe deployment inflation and injection into orbit 01 p0073 A66-11124
 Computerized tools and constant analysis for real time experiment flight management planning system 02 p0306 A66-11638
 FM telemetry digitizing system operating on-line in real time environment results in automatic data processing 04 p0489 A66-13600
 Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 04 p0479 A66-13615
 One-tape off-line Turing machines covering crossing sequences, recognition problems, and computation times 05 p0637 A66-14929
 Deep space tracking stations, discussing digital computers for monitoring functions such as real time measure, station performance, failure detection, etc [ISA PREPRINT 1.11-1-65] 05 p0635 A66-15498
 Processing satellite data at Goddard Center noting Tiros IR data, cloud pictures and Imp measurements 06 p0837 A66-15933
 Simultaneous measurement of multipath and Doppler spread in real time involving fading transmission media such as HF and troposcatter [IEEE PAPER CP 65-524] 06 p0830 A66-16336
 Interferometric hologram evaluation and real time vibration analysis of diffuse objects 07 p1144 A66-18040
 One-tape off-line Turing machine, analyzing characteristics and computation time minimization 10 p1506 A66-21075
 Real time on-line man-computer graphics system that may obviate need for special-purpose, complex and cumbersome computations 11 p1660 A66-23176
 Probability distribution data analysis in real time, using delay-line time-compression storage as information source in analog and digital form 12 p1825 A66-23760
 Real time ground computer for Athena system and input/output data requirements in multiprocessing jobs 12 p1827 A66-23836
 Design and fabrication of computer subsystems for Apollo guidance and navigation systems 13 p2027 A66-25781
 Coherent memory filter for real time spectral analysis of Doppler radar echoes in single circuit coherent integrator 13 p2039 A66-25782
 Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 14 p2243 A66-28348
 Iterative derivation of approximation of real function by exponential series 15 p2527 A66-29056
 Intensity display system similar to radar output, showing real time intensity and pattern variations created by solar lamp modules in testing of spacecraft systems in simulation facilities 16 p2680 A66-30497
 Digital computer application as real time telemetry processor 16 p2651 A66-30565
 Human factor aspects of digital computer programming for simulator control, discussing application and operation 17 p2869 A66-33449
 Large aperture millimeter wave antenna for high resolution tracking measurements and real-time data reduction 18 p3084 A66-34303
 Automatic telemetry checkout station for Saturn V systems using real time signal digitizer and general purpose computer 19 p3339 A66-35677
 Real time cardiorespiratory rate monitor for data converter on Gemini space program 19 p3288 A66-35703

Periodic burst technique for real-time retransmission of data from multiple asynchronous PCM telemetry links, providing accurate determination of individual sample time 20 p3513 A66-37200

Real-time data gathering and flight-test technique for aircraft-carried weapons system development 20 p3495 A66-37207

Testing 20 p3495 A66-37207

Microminiaturized R-11 digital computer for real time computational requirements in radar data processing, fire and command control, automatic navigation, checkout, etc 21 p3707 A66-38675

Trajectory optimization as part of real time flight operations in Lunar Orbiter program 21 p3765 A66-38866

True height in-line computation of electron density profile from ionograms, using analog computer in real time 22 p3908 A66-39969

Multichannel computer controlled Mobile Micrometeorological Observation System, automatic data acquisition, processing and recording system for observational analyses of turbulence of atmospheric boundary layer 22 p3943 A66-40427

Japanese air traffic control using real time computer data processing 22 p3945 A66-40617

Real time computer technique for least squares estimates of current system state for noisy nonlinear system, using Pontryagin maximum principle 23 p4050 A66-41615

REATTACHED FLOW

Base heating of launch vehicles examined by studying heat transfer processes in two-dimensional recirculation zone behind blunt trailing edge in Mach 3 wind tunnel [AIAA PAPER 65-825] 04 p0454 A66-13690

Perturbation factors in turbulent reattachment, with theory based on Korst [ONERA TP 275] 05 p0663 A66-15322

Supersonic flow over downstream-facing step on circumference of ducted axisymmetric body used in flow reattachment, measuring surface pressure distributions 17 p2839 A66-32440

Static characteristics of symmetrical wall reattachment jet amplifier over range of Reynolds number 20 p3501 A66-37646

Flow model analysis of shape of curved two-dimensional jet reattaching to offset inclined wall with ventilated cavity beneath jet 20 p3501 A66-37647

Mixing and reattachment of two-dimensional supersonic flow, noting parasitic factors 23 p4014 A66-42023

RECEIVER

SA DELAY LOCK

SA LINEAR RECEIVER

SA LOGARITHMIC RECEIVER

SA MULTICHANNEL RECEIVER

SA RADAR RECEIVER

SA RADIO RECEIVER

SA SINGLE-SIDEBAND RECEIVER

SA SUPERHETERODYNE RECEIVER

Optimum receiver structure for detecting regular and fluctuating signals with noise sources correlated and located on surface of finite sphere 05 p0635 A66-15877

Degradation of matched filter receiver operating in non-Gaussian noise, considering performance in presence of ideal impulse noise 06 p0856 A66-16864

Receiver noise-temperature measurement uncertainty and dependence on source impedance 14 p2238 A66-37584

Signal handling curves in receiver design including vacuum-tube capability, demodulator circuit, etc 16 p2660 A66-30579

Receiver of ionospheric diffusion probe noting radio telescope, low noise parametric amplifier, filters, signal detection, etc 16 p2662 A66-30957

Envelope distortion effects overcome in receivers by using transistor signal handling curves 18 p3074 A66-33555

Airborne UHF telemetry receiver utilizing solid state components and high-density packaging technique 19 p3316 A66-35691

Digital-computer controlled receiver functions and application 23 p4044 A66-41313

Signal and filter waveshape deviations for binary correlator receivers, noting degradation in performance of matched filter systems 23 p4040 A66-41592

RECEIVING SYSTEM

Feasibility of guard channel receiver, transmitter and marker receiver system by

thin film circuit techniques, noting reliability with minimum servicing 02 p0203 A66-11920

Noise performance of antenna and advantage when added to receiver system 03 p0339 A66-12448

Use of two reference noise sources for measurement of effective noise temperature of conventional receiver system leads to serious errors 04 p0484 A66-14096

Medium-capacity satellite receiving system for multiplex FM telephony 08 p1183 A66-18947

Receiving equipment for Early Bird satellite at Fucino, Italy 09 p1354 A66-20559

Radio telescope techniques applied to astronomy, noting data processing and antenna receiving systems including masers, parametric amplifiers, etc 10 p1602 A66-21064

Noise factor of linear receiving systems in quantum and classical regions, noting role of dual push-pull amplifier and frequency converter 13 p2020 A66-25226

Optimal detection of signals by spatially distributed receiving system against random noise background, using space-time signal selection method 20 p3517 A66-37744

Cardioid whip-loop receiving antenna system using only passive circuitry to bring normal and abnormal components of VLF sky waves into phase with each other 22 p3872 A66-39732

Polarization characteristic variations of HF signal received over short-range ionospheric path, noting phase measurement of elliptically polarized wave components, using receiving dipoles 22 p3864 A66-40065

Ultraminiature ferrite device design parameters for application in microwave receiver systems 22 p3880 A66-40738

RECEPTION

S RADAR RECEPTION

S RADIO RECEPTION

S SIGNAL RECEPTION

S TELEVISION RECEPTION

RECEPTOR

SA THERMORECEPTOR

Analog method for simulating visual receptor network as model for inhibitory interaction in retina 06 p0819 A66-16849

RECIPROCAL THEOREM

Dynamic reciprocal theorem for sinusoidal oscillation of elastic medium treated as extension of static reciprocal theorem of Betti and Rayleigh, using continuum mechanics [ASME PAPER 65-WA/MD-21] 05 p0779 A66-15524

Reciprocity relations in compressible plasma and application to antennas 06 p0827 A66-16040

Excitation, internal reflection and limiting polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369

Circuit theory reciprocity theorem for dynamic linear systems with gyroscopic coupling for steady state response 12 p1912 A66-23611

Reciprocal optimal control problem and several variations, using inequalities based on convexity assumptions 16 p2671 A66-31232

Generalized reciprocity theorem for antenna systems containing anisotropic media and antenna systems radiating directly through arbitrary apertures 21 p3711 A66-38835

Elastodynamic reciprocity theorem for impulsive disturbances in linear viscoelastic medium 21 p3772 A66-39347

Shell dynamical integral and integro-differential BVPs for linear deformable shells, examining reciprocity theorem and Kirchhoff-Lowe hypothesis 23 p4136 A66-40997

Reciprocal theorems of best approximations of complex variable, considering domain restricted by finite number of smooth curves forming nonzero angles at junction points 23 p4084 A66-41353

Turbine rotor subject to thermal stresses due to friction of accidental contact with stator 23 p4075 A66-41995

Power level of varactor diodes, noting problems of standing wave ratio measurement and application of reciprocity and mixing principle 24 p4185 A66-42893

RECIPROCATING ENGINE

Hypergolic fueled reciprocating space power unit for electric power generation [AIAA PAPER 64-755] 13 p2008 A66-26656

Reciprocating engine for space power, noting power capacity as function of piston displacement 23 p4022 A66-41762

RECIRCULATIVE FLUID FLOW

Animal and human test of manned spacecraft life support system consisting of closed system with recirculating air loop, examining potassium superoxide-potassium hydroxide chemistry 02 p0183 A66-11492

Base heating of launch vehicles examined by studying heat transfer processes in two-dimensional recirculation zone behind blunt trailing edge in Mach 3 wind tunnel [AIAA PAPER 65-825] 04 p0454 A66-13690

Tests of obstacle-induced flow recirculation using flow visualization technique and making power measurements 04 p0455 A66-14135

Short duration simulation of rocket exhaust products, flow duration through nozzle and effect on recirculation flow fields 17 p2904 A66-33475

Model study of thrust loss due to recirculation of gases from jets of V/STOL aircraft to engine intakes 18 p3162 A66-33683

Recirculation of liquid through cell and external heat exchanger to solve problem of repeated flashing in europium chelate lasers 21 p3747 A66-39108

RECOGNITION

S CHARACTER RECOGNITION

S MACHINE RECOGNITION

S PATTERN RECOGNITION

S TARGET RECOGNITION

RECOIL ATOM

Effects of recoil in semiconductor with thermal-neutron-absorption cross section, measuring changes in luminescence and conductive properties of Cds 13 p2166 A66-25792

Range of atoms recoiling from photonuclear reactions in solids measured by foil-sandwich irradiations followed by radiochemical detection methods 19 p3402 A66-36002

RECOIL PROTON

High energy jet showers examined to obtain four momentum transfers and transverse momentum of recoil protons 11 p1763 A66-22706

RECOMBINATION

SA ATOMIC RECOMBINATION

SA ELECTRON-ION RECOMBINATION

SA ELECTRON RECOMBINATION

SA HYDROGEN RECOMBINATION

SA ION RECOMBINATION

SA OXYGEN RECOMBINATION

SA RADIATIVE RECOMBINATION

Kinetic studies of hydroxyl radicals in shock waves, considering recombination via particular reaction in lean hydrogen-oxygen mixtures 04 p0596 A66-13646

Relaxation to steady state, electron collision ionization, recombination and collision cross section uncertainties in conducting nonequilibrium plasma stream [AIAA PAPER 66-193] 10 p1562 A66-21439

Stationary and kinetic determination of parameters of capturing recombination centers in Cds single crystal 13 p2166 A66-25686

Generation recombination noise in Ge single crystals under fast neutron irradiation, using reversible technique to vary noise parameters 16 p2778 A66-31072

Distribution of recombination centers over energy levels of Cds-CdSe solid solutions 16 p2787 A66-31737

Gamma radiation and fast neutron effects on dark resistance, photoconductivity, majority carrier mobility, recombination kinetics, etc, in Cds single crystal 16 p2787 A66-31765

RECOMBINATION COEFFICIENT

Plasma decay by measuring phase variation and signal amplitude with interferometer, determining distribution function and recombination coefficient 01 p0115 A66-11056

Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 02 p0286 A66-11357

Stationary and kinetic methods determining parameters of sensitizing

recombination r-center in high resistivity
monopolar
photoconductors 02 p0273 A66-11718
Capture and recombination levels in CdS
single crystals examined from
photoconductivity
analysis 02 p0277 A66-12087
Photo-emf of germanium in presence of
surface recombination rate
gradient 02 p0277 A66-12089
Time dependency effect on effective
recombination coefficient in lower
ionosphere 02 p0223 A66-12115
Recombination coefficient and electron
production rate in lower D region during
solar flare 04 p0574 A66-13444
Extremal concentrations in laminar flow of
incompressible viscous liquid along tube of
constant cross section, noting recombination
reactions 04 p0597 A66-13695
Rate of electron-ion recombination by
collision of two electrons in ion field
obtained by Thomson formula, noting
recombination rate of three-body
collision 04 p0550 A66-13710
Pressure volume recombination coefficient
in oxygen, using capacitor to determine
average ion density 04 p0549 A66-14286
Pressure dependence of initial
recombination of ions in
oxygen 04 p0549 A66-14287
Ambipolar diffusion and electron-ion
recombination coefficients dependence on
electron temperature in afterglow of neon
plasmas 04 p0554 A66-14294
Recombination in space charge region near
semiconductor surface 04 p0569 A66-14359
Silicon surface damage, discussing low
energy gamma irradiation effect on bulk
lifetime and recombination
velocity 05 p0729 A66-14565
Surface recombination on interface
between germanium/electrolyte
boundary 05 p0738 A66-15462
Recombination rate of electrons in plasma
containing ions of molecule with both
repulsive and bound neutral
states 05 p0729 A66-15863
Distribution of high plasma density along
semiconductor rod, noting surface
recombination rate and assuming existence
of high level injection at one end of
rod 06 p0923 A66-16176
Hot electron recombination peculiarities,
ignoring electron temperature concept, for
moderate fields and lattice
temperatures 07 p1104 A66-18220
Recombination effects in nozzle flows of
hydrogen/ fluorine rocket
engines 08 p1279 A66-19152
Recombination of nonequilibrium charge
carriers in p-type indium antimonide, using
steady state photomagnetolectric
effect 08 p1272 A66-19246
Ambipolar diffusion parameter calculation
by Quinn and Nisbet found erroneous for
night F layer 08 p1219 A66-19420
Two-fluid approximation of one-dimensional
steady state flow of inviscid plasma with
thermal gradients, considering ionization and
recombination processes 08 p1265 A66-19466
Dielectronic recombination for low density
plasma, estimating coefficient and ionization
balance for iron and calcium ions in
corona 10 p1602 A66-21088
Lower ionosphere ionization for quiet and
disturbed Sun calculated for comparison of
experimental and theoretical values for
electron concentration and effective
recombination 11 p1696 A66-22417
Nonequilibrium effects in recombination
dissociation kinetics, using iterative
perturbation procedure 11 p1738 A66-22884
Ion-molecule reaction rates and
recombination coefficients from mass
spectrometric ionospheric
data 11 p1702 A66-23492
Effect of magnetic field on field effect at
germanium surface, determining rate of
surface recombination 13 p2166 A66-25697
Transients in thin based semiconductor
diodes to determine recombination rate on
nonrectifying contact 13 p2041 A66-25942
Current dependence of recombination
radiation intensity in gallium antimonide,
determining radiation spectral distribution
at low temperature 14 p2358 A66-27089
Solution of continuity equation for

electrons leads to high loss rate in prenoon
maximum of electron density in F-2
layer 14 p2283 A66-27397
Solid state reduction of lanthanide ions in
laser hosts, effect of presence of
recombination hole-centers in photo-reduced
samples and elimination during
electrochemical process 14 p2362 A66-27464
Time dependency effect on effective
recombination coefficient in lower
ionosphere 14 p2286 A66-28074
Recombination in space charge region near
semiconductor surface 14 p2368 A66-28257
Recombination rate of electron-hole pairs
in anthracene determined and compared
with theoretical value based on hypothesis
of Coulomb capture in
dielectric 14 p2369 A66-28272
Two parallel carrier capture mechanisms at
single recombination center in cadmium
sulfide 15 p2563 A66-28738
Oxygen photochemical equilibrium above
150 km, assuming dominant role of radiative
recombination above 120
km 15 p2486 A66-29089
Recombination rate, ionization in
nonequilibrium electric
conductivity
prediction for dense
plasma 15 p2554 A66-29752
Electron-ion recombination coefficients for
atmospheric ions determined in laboratory
and compared with ionospheric
analysis 15 p2548 A66-29947
Ion composition and effective
recombination coefficient variation of
ionosphere in study of X and UV radiation
ionization of E layer 15 p2495 A66-30059
Microwave cavity measurement of
recombination coefficient of decaying plasma
obtained by gamma ray induced ionization of
xenon 16 p2756 A66-30098
Temperature dependence of lifetime of
electrons and holes in GaAs, noting trapping
effect of recombination centers and capture
levels 16 p2787 A66-31771
Intergalactic matter temperature
parameters such as heating by cosmic ray
ionization, dissipation of hydrodynamic
turbulence, inelastic electron collision with
H, He and He-ions 17 p2996 A66-31912
Gas pressure dependence of attachment
and recombination coefficients for
thermalized electrons in air and
oxygen 18 p3143 A66-34035
Photoconductivity of semiconductor under
strong illumination, considering
monomolecular recombination by Shockley-
Read centers 19 p3447 A66-36456
Temperature dependence of dissociative
recombination coefficients in argon
according to hypotheses of Bates and
Palgarno 19 p3404 A66-36758
Pinch effect in InSb degenerate plasma,
discussing electric conductivity and
recombination emission
spectra 20 p3615 A66-37371
Surface recombination on interface
between germanium/electrolyte
boundary 20 p3622 A66-38135
Measurement apparatus for studying
kinetics of catalytic recombination of gas
atoms at solid surfaces of refractory metals,
semiconductors and
dielectrics 21 p3735 A66-38522
Effective minority carrier lifetime and
recombination rate determined from voltage
growth curve of p-n
junction 21 p3798 A66-38912
Recombination rate of diatomic gases
determined from Mach number of
supersonic nozzle outlet
flow 21 p3694 A66-39090
Electron-ion recombination process due to
electron collision in plasma with capture
electrons transferred to ground
level 22 p3954 A66-39767
Nonequilibrium dissociation losses in
hydrogen-fluorine propellant system,
indicating rate control of recombination
steps
[AICE PREPRINT 28A] 22 p3969 A66-39882
E layer properties noting role of pressure,
temperature, composition and recombination
coefficient when varying with height and
time 22 p3907 A66-39960
Coupling phenomena in recombination
processes of complex ionosphere composed
of positive ions under vertical field of

ionization drift applied to wind shear theory
of sporadic E layers 22 p3907 A66-39962
Nighttime F layer recombination and
diffusion coefficients estimated from
incoherent scatter measurements of electron
densities and electron and ion
temperatures 22 p3910 A66-39983
Oxide film surface effect on
electrophysical characteristics of Ge surface,
noting potential changes and recombination
rate 22 p3965 A66-40313
Riometric data on ionospheric absorption
applied to determination of dissociative
recombination coefficient, noting
atmospheric ionization by fragment gamma-
radiation 22 p3973 A66-40468
Current dependence of recombination
radiation intensity in gallium antimonide,
determining radiation spectral distribution
at low temperature 22 p3967 A66-40845
Plasmod-like RF helium plasma, noting
molecular ion formation and destruction
leading to evaluation of lower limit for
molecular collisional-radiative recombination
coefficient 22 p3957 A66-40908
Approximate steady state solutions of
continuity equation containing effects of
diffusion, drift and recombination for
carrier diffusion region of forward-biased p-
n junction over wide range of
injection 24 p4249 A66-42225
Effective recombination coefficient in
lower ionosphere, deriving expression for
dependence of dissociative recombination on
temperature and solar
distance 24 p4201 A66-42758

SA SURVEILLANCE

Smear resolution losses in ground target
photographs for maneuverable target-
tracking reconnaissance cameras, noting
MOL simulation 17 p2925 A66-32351

RECONNAISSANCE AIRCRAFT

SA BREGUET 1150 AIRCRAFT

Boundary layer control for improvement of
lift at lower angles of attack by carrier-
based supersonic aircraft

[AIAA PAPER 65-751] 03 p0321 A66-13055
Kestrel P-1127 V/STOL

strike/reconnaissance aircraft evaluation
trials with reference to background, aircraft
description, organization, pilot training and
major tasks 07 p0985 A66-17268

RECONNAISSANCE SPACECRAFT

Lunar orbiter objectives, mission and
spacecraft configuration, detailing inertial
reference unit 04 p0543 A66-13581

RECORDING INSTRUMENT

SA CABLE FORCE RECORDER

SA DATA RECORDER

SA ELECTRONIC RECORDING

INSTRUMENT

SA FLIGHT LOAD RECORDER

SA FLIGHT RECORDER

SA MAGNETIC TAPE RECORDER

SA PHOTOGRAPHIC RECORDING

INSTRUMENT

SA PLOTTING INSTRUMENT

SA PULSE RECORDER

SA TAPE RECORDER

SA VERY LOW FREQUENCY EMISSION
RECORDER

SA WHISTLER RECORDER

Magnetization curve recording system for
hysteretic

superconductors 03 p0371 A66-13253

Direct current voltage measuring and
recording system for laboratory
use 07 p1036 A66-18486

Piston-type flowmeter for automatic
recording fuel
consumption 09 p1380 A66-20310

Design of system analyzing operating
conditions of jet engine up to overhaul,
recording regime of engine revolutions,
exhaust gas temperatures, accelerations,
etc 13 p2076 A66-25078

Recording assembly for measurement of
flexural and torsional moduli and internal
friction at various frequencies and
temperatures of small samples, using
constant amplitude undamped
oscillations 13 p2077 A66-25324

24-channel recorder for stress-strain states
due to thermal effects of operating epoxy-
resin machine

components 13 p2080 A66-25914

Sequential Noise Output Recording
Equipment /SNORE/, aircraft engine noise
test facility, for jet noise and compressor
noise and acoustic absorption materials test
facility
[ASME PAPER 66-GT/N-41]
14 p2269 A66-26986
Gravimeter error in recording of Earth
tides, examining leveling and calibration
problems
14 p2298 A66-28400
Receiving and predetection recording
system with frequency translation and
wideband FM for Atlantic Missile
Range
16 p2648 A66-30536
Logic and operation principle of model of
recording device for high speed readout of
digital and alphabetic information from
digital computer
17 p2928 A66-33494
Auxiliary autonomous piggyback detector
and recorder system for spacecraft failure
detection following
touchdown
19 p3315 A66-35676
Infrasound frequency spectrum
transformation using magnetic signal
recording and reproduction
device
21 p3713 A66-39322
Minimum effective heights of ionospheric
layers in continuous recording for study of
ionization and
disturbance
22 p3920 A66-40773
RECOVERABLE SPACE VEHICLE
Recoverable reusable space shuttle for
manned space station orbiting
Earth
02 p0296 A66-12072
Multistage parachute recovery systems
used for aerial delivery systems, escape
from aircraft and recovery of spacecraft
[AIAA PAPER 66-25]
06 p0960 A66-17107
Paraglider wing analysis based on
assumption that flexibility allows it to take
shape that aerodynamic pressure and
internal stresses dictate
[ASME PAPER 64-WA/AV-4]
10 p1483 A66-21472
Recovery of interplanetary vehicles by low
thrust braking outside
atmosphere
14 p2391 A66-27472
Hybrid type two-or three-stage aerospace
vehicle design to place payload in orbit,
discussing recoverable stages, drives and air
breathing engines
16 p2635 A66-31682
Recoverable space boosters, discussing
technological and economic aspects of
reuse
19 p3469 A66-36082
Air breathing engine designs for winged
recoverable boosters
20 p3628 A66-37429
Aerodynamic deceleration from high Mach
number for ALARR project, noting rocket
stage collision and deceleration
systems
22 p3987 A66-40609
Recovery system requirements for high
performance reentry vehicles at various
entry angles and impact ranges, considering
inflatable flares and rigid dive
brakes
22 p3987 A66-40611
Recoverable and reusable radio controlled
sounding rocket equipped with deployable
flexible wings attached to paraglider
beams
24 p4284 A66-43071
Reentry and recovery of space vehicles in
reliable shock free landings, using modified
helicopter rotor for hypersonic flow and
thermal problems
24 p4284 A66-43073
RECOVERY
SA BOOSTER RECOVERY
SA PRESSURE RECOVERY
SA SPACECRAFT RECOVERY
SA SPINNING RECOVERY
SA WATER RECOVERY
LW-2 Escape System for high V/STOL
aircraft and outstanding recovery
capabilities
06 p0806 A66-16819
Reliability of system, with recovery,
consisting of n plus m elements, m elements
being in redundant
system
08 p1200 A66-19670
Recovery of electric strength of gap after
arcing related to Paschen law and measured
from atmospheric pressure to vacuum by
device with copper
12 p1842 A66-24665
Reliability of system with recovery
consisting of n plus m elements, m elements
being in redundant
system
20 p3538 A66-37262
Cosmic ray storms, difference in Forbush
decrease recovery in nucleon and meson
component
20 p3632 A66-38072

RECOVERY DEVICE

First-stage decelerator and stabilization
balloon system for payload recovery for
Mach 4 and 10 flight
04 p0585 A66-13531
Rotor recovery system for spacecraft
landing
08 p1303 A66-18820
Piecewise linear circuit model for charge-
storage or step recovery diode using
conventional capacitance and
resistance
09 p1350 A66-19920
Saturn S-IVB stage adaptation for complete
stage recovery by incorporating modification
kit including all recovery system
elements
17 p3016 A66-32372
Saturn S-IVB stage adaptation for complete
stage recovery by incorporating modification
kit including all recovery system
elements
22 p3986 A66-39776
Super- and hypersonic first-stage
decelerators for stabilization and initial
deceleration for final recovery device,
noting Ballute and reefed ribbon canopy
types, testing, fabrication,
etc
22 p3850 A66-40606
Dynamic characteristics of rotary wing
decelerator and recovery system obtained,
using frequency oscillation technique
[AIAA PAPER 66-733]
22 p3893 A66-40624
Launch and recovery system for large
instrumented free flight models in high
speed wind tunnel, using miniaturized
telemetry and recording equipment
[AIAA PAPER 66-776]
22 p3896 A66-40656
RECOVERY LAUNCH VEHICLE
L/D ratio for gliding recovery of first
stage of launch vehicle, using stage
separation conditions as
parameters
16 p2807 A66-30348
RECOVERY PARACHUTE
Stress calculation for recovery parachute
fabric during inflation and steady state
periods
09 p1330 A66-20743
RECOVERY TEMPERATURE
Isochronal and isothermal stage II recovery
in high energy electron irradiated n-type
InSb semiconductor, based on Hall
coefficient and
electroconductivity
21 p3800 A66-38994
RECOVERY ZONE
Recovery locations and techniques for
atmospheric reentry vehicles in normal
flight and impact
14 p2395 A66-28454
RECRYSTALLIZATION
Recrystallization of bismuth films by
controlled melting and
resolidification
05 p0732 A66-14668
Cold deformability of alpha-titanium alloys
during strip rolling, showing temperature
increase of incipient recrystallization of
titanium-aluminum alloys
05 p0699 A66-14699
Yttrium effect on recrystallization and
grain growth of tantalum
07 p1052 A66-18350
Recrystallization of molybdenum,
examining effect of vanadium, titanium,
hafnium and zirconium
11 p1718 A66-23321
Recrystallization diagram of high purity
rhenium after cold-rolling of single crystal
specimens
12 p1897 A66-24901
Hot wire-drawn beryllium recrystallization
analyzed by hardness measurement and
micrography, noting dependence on initial
deformation
13 p2107 A66-25358
High energy Alnico alloys, discussing
crystal growth, anisotropy, recrystallization,
etc
14 p2311 A66-26883
Variation of LN 29546 test for
determination of susceptibility of aluminum
alloy sheet to coarse grain
formation
14 p2313 A66-27013
Molybdenum recrystallization as affected
by La and Y additions under various types
of heat treatment
15 p2520 A66-28670
Recrystallization in titanium alloy strips
subjected to various levels of hot
rolling
15 p2522 A66-29185
Recrystallization of Ge and Si thin films
and structural changes due to electron
bombardment and thermal
annealing
17 p2988 A66-33456
High temperature properties and
recrystallization of heat-resistant alloy A-286
experimentally studied, noting faster
occurrence of overaging with increased cold
working
19 p3376 A66-35357
Recrystallization of evaporated CdS layers
in environment containing various elements,
obtaining oxygen enhanced crystal
growth
24 p4253 A66-42356

RECTANGULAR BEAM

Rationalized method for beam deflection
under concentrated
loading
02 p0299 A66-11796
Eigenvalues of free vibration equation of
simply supported beam with finite number
of discrete masses, using differential
equation
04 p0588 A66-13823
Vibrational characteristics, natural
frequencies and associated composite loss
factor of finite-length laminated beam with
alternate elastic and viscoelastic layers
[ASME PAPER 65-WA/APM-1]
05 p0776 A66-15425
Effect of initial strains on flange
reinforced cantilever beam, using triangular
elements with linearly varying
strains
06 p0961 A66-16004
Bubnov-Galerkin method extended to
solution of any system of equations not
associated with variational
principles
08 p1306 A66-18605
Large displacement bending of rods for
constant deformation cross section,
negligible shearing forces and exponential
stress-strain relation
08 p1314 A66-19580
Vibrational characteristics, natural
frequencies and associated composite loss
factor of finite-length laminated beam with
alternate elastic and viscoelastic layers
[ASME PAPER 65-WA/APM-1]
10 p1616 A66-21483
Motion equation for plastic deformation of
simply supported beam under impulsive
loading
13 p2198 A66-26113
Calculation of natural twisting and bending
vibrations of beam whose characteristics
vary along length
14 p2400 A66-27683
Exact solution of thermoelastic problems
in two dimensions, using doubly infinite
Fourier series
20 p3673 A66-38276
RECTANGULAR GUIDE
Energy considerations for transverse
electric modes in ferrite loaded rectangular
waveguides and associated thermodynamic
paradox
01 p0037 A66-10510
Admittance of rectangular waveguide
radiating into compressible
plasma
01 p0038 A66-10517
Thermodynamic paradox consisting of
boundary value problem with mathematical
inconsistency observed in rectangular
waveguides loaded with magnetized
ferrite
01 p0121 A66-10540
Solution of ferrite boundary value problem
in rectangular waveguide and resolution of
Lewin paradox
01 p0028 A66-10560
Rectangular waveguide with diaphragm
method for ferrimagnetic resonance
measurements in ferrites
01 p0041 A66-10573
Electric field configuration in oversized
rectangular waveguide excited by pyramidal
transition and terminated by movable short
circuit
01 p0046 A66-11078
Small lightweight 10-gc horizontally
polarized omnidirectional rectangular wave
guide slot antenna
02 p0196 A66-11369
Transmission modes in grooved guides,
calculating cut-off frequency and
attenuation
03 p0346 A66-13326
Phase angles of reflection and transmission
coefficients for microwave energy of
rectangular waveguide whose
electromagnetic field interacts with ferrite
spheroid
04 p0496 A66-13909
Electromagnetic wave propagation in
multimode Earth waveguides of variable
height
05 p0632 A66-14839
Stimulated Raman and Brillouin scattering
for Stokes radiation parallel to laser beam
in rectangular waveguide
05 p0694 A66-14901
Wave diffraction in waveguide at various
metallic ribbon-type capacitive
inhomogeneities
06 p0838 A66-15885
High speed microwave ferrite amplitude
and phase modulators in standard
rectangular waveguide
systems
06 p0841 A66-15959
Rectangular waveguide filter with trapped
mode resonators, describing operation,
energy handling characteristics and
application
06 p0845 A66-16086
Electromagnetic wave propagation in
semiconductor filled rectangular waveguide
in presence of transverse magnetic
field
06 p0846 A66-16092
Propagation in rectangular and circular
cylindrical waveguide containing

inhomogeneous dielectric varying linearly and quadratically 06 p0848 A66-16108

Groove guide, discussing development and performance of H sub 11 /low loss/ transducer 07 p1008 A66-17516

Dispersion equations of ring delay circuit formed by bending diaphragmed rectangular waveguide in H plane 08 p1190 A66-18910

Electromagnetic field of metallic rectangular waveguide with anisotropic medium in interior 08 p1193 A66-19188

So-called thermodynamic paradox associated with magnetized ferrite-loaded rectangular waveguide 09 p1347 A66-20608

Reflection factors and wave amplitudes of diffraction spectra for incidence of H-p, 0 waves onto inductive obstacles in rectangular waveguides 09 p1358 A66-20808

Lumped-circuit LF general three-resonator filter in rectangular wave guide using inductive susceptances as coupling elements 10 p1514 A66-21911

Minor lobe suppression in rectangular horn antenna through utilization of high impedance choke flange 11 p1663 A66-22556

Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 11 p1666 A66-22720

Perturbation method approximation of eigenvalue and eigenfunction of fundamental wave propagating in H-plane bend of rectangular waveguide 12 p1815 A66-23958

Exact equation for phase constant obtained for rectangular waveguides partially filled with ferrite, using ABCD matrix, eliminating writing of field equations and matching boundary conditions 12 p1839 A66-24617

Fresnel and Fraunhofer patterns of overmoded feeds and reflector antennas 12 p1841 A66-24632

Equivalent resonator method for calculating irregular waveguides 14 p2251 A66-27235

Optimum shape of multimode rectangular waveguide transition by comparing smoothed with stepwise transition 14 p2251 A66-27239

Ferrite controlled polarization of slot radiator by rectangular waveguide excited by H10 wave 14 p2252 A66-27252

Absorption of high power microwaves, using rectangular waveguide with long axial slot in side wall and water-filled dielectric tube adjacent to slot 14 p2253 A66-27530

Experimental verification of theoretical behavior of ferrite structural discontinuity between rectangular waveguide filled with homogeneous dielectric and waveguide filled with transverse magnetized ferrite 14 p2253 A66-27585

Numerical analysis of infinite phased array of open rectangular waveguides, noting use of Fredholm integral equation, effects of wall thickness and reflection coefficient 14 p2255 A66-27909

Radiation impedance of phased array of rectangular waveguides, noting coupling coefficient amplitude, phase difference, etc 14 p2256 A66-27910

Asymptotic behavior of coupling coefficients of infinite array of thin walled rectangular waveguide 14 p2257 A66-27927

Cut-off wavelength of transverse electrostatic wave mode in ridged rectangular waveguide of arbitrary aspect ratio 14 p2257 A66-27951

Design and operation of ferrite rectangular waveguide modulator in 5 to 7 gc/s range 14 p2258 A66-27963

Wavelength in rectangular waveguide comprising cylindrical rod 14 p2259 A66-27966

Numerical analysis of infinite phased array of thick-walled rectangular waveguides 15 p2456 A66-28584

Relation between phase shift and mechanical changes in waveguide due to evacuation or pressurization 16 p2667 A66-31646

Slot couplings of rectangular single-mode waveguides analyzed by equivalent circuit and concentrated parameter methods 17 p2879 A66-31856

Perturbation theorems for waveguide junctions expressing changes in impedance or admittance matrix elements 18 p3077 A66-34057

Angular propagation constants for electromagnetic modes which may exist in

continuously curved waveguide bends of rectangular cross section for microwave application 18 p3072 A66-34569

Wave diffraction in rectangular waveguides passing through double ribbon barriers 19 p3311 A66-35299

Numerical results of slot couplings of rectangular single mode waveguides as function of length, width, position and wavelength 19 p3311 A66-35300

Perturbation method solution of rectangular waveguide boundary value problem filled with transversely magnetized semiconductor or plasma 19 p3317 A66-35716

Attenuation, guide wavelength and characteristic impedance of rectangular waveguides with indium antimonide side wall derived for propagating modes 20 p3524 A66-37113

Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 20 p3532 A66-37867

Double-strip H-guide structure, examining field components, characteristic equation and attenuation coefficient for each mode 20 p3533 A66-38145

Resonant cavity transducer for converting TE mode of rectangular waveguide into circular waveguide mode, noting coupling coefficient of cavity 22 p3918 A66-40183

Variation of phase constant and damping constant of SHF wave propagating in waveguide incorporating coaxial plasma-filled dielectric tube 22 p3970 A66-40935

Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 23 p4045 A66-41458

Rectangular terminal block in rectangular waveguide and dispersion equation for surface wave propagating along waveguide 23 p4046 A66-41516

Narrow slot antennas covered with dielectric slabs of arbitrary thickness, examining design flexibility in application as radiating elements of 23 p4046 A66-41586

Geometry and magnetic parameters effect on magnetically tunable filters consisting of rectangular waveguide and containing thin magnetized ferrite slab against one wall 24 p4186 A66-43173

Latching phase modulator in standard rectangular waveguide, using square loop magnetic properties of toroidal ferrite materials to obtain digital increments of reciprocal phase shift 24 p4186 A66-43174

RECTANGULAR PANEL

Small amplitude vibrations of rectangular panel relative to static buckled configuration 02 p0301 A66-12164

Aeroelastic instability of flat rectangular panels leading, trailing and free lateral edges, noting gap between theoretical and wind tunnel stability test 20 p3491 A66-36952

Natural frequencies of all-clamped rectangular sandwich panel vibrations, using Lagrange multipliers 24 p4286 A66-42160

RECTANGULAR PLANFORM

Deformation of shallow orthotropic shells of rectangular planform 15 p2613 A66-29438

RECTANGULAR PLATE

Transfer functions of cantilever beam and clamped-edge square plate determined by cross-correlation methods 01 p0148 A66-10136

Comparison of two tuned-damping concepts applied to pinned rectangular plate, fluid flow past piston and viscoelastic layer in shear 01 p0150 A66-10154

Bending of elastic rectangular plates uniformly transverse loaded along axes of symmetry 01 p0154 A66-10468

Stability equilibrium criteria for orthotropic rectangular plates discussing Liapunov and other 01 p0154 A66-10476

Critical loads for anisotropic plates of various configurations and boundary conditions, detailing stability of rectangular plate and orientation of axes 01 p0154 A66-10477

Bearing reactions and stresses of bridge analyzed by calculating bending of rectangular plate with two supported and two free parallel sides 01 p0155 A66-10711

Nonlinear buckling of rectangular plates

emphasizing calculations of thrust magnitude for boundary value problem, Von Karman equations, etc 03 p0435 A66-12612

Lambda method for numerical solution of rectangular plate problem under wide range of loadings and boundary conditions 03 p0440 A66-13270

Aerodynamic characteristics of flat rectangular plate placed normal to flow of highly rarefied gas 04 p0456 A66-14141

Thermal stress concentration factors for rectangular flat plates penetrated by holes [AIAA PAPER 66-120] 06 p0962 A66-16262

Series solution for deflection of rectangular plate subjected to concentrated load at arbitrary location, using Green function 08 p1310 A66-19161

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 09 p1347 A66-20787

Iterative procedure to obtain numerical solutions of von Karman equations for rectangular plates with finite deflections 10 p1615 A66-21477

Transformation of sandwich plate equations and deformation of rectangular simply supported sandwich plate 10 p1618 A66-22177

Cylindrical bending theory for rectangular three-layer sandwich plate supported at opposite ends under variable load 11 p1783 A66-23019

Semilinear rectangular plate with two opposite edges clamped 12 p1962 A66-23997

Aerodynamic characteristics of rectangular plates in hypersonic flow of rarefied gas differing in aspect ratio, thickness and angles of attack, determining maximum lift-drag ratio 12 p1798 A66-24442

Elastic rectangular plate moment influence field calculated, using photoelastic method 13 p1786 A66-26299

Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress 13 p2205 A66-26452

Stability of rectangular transversely isotropic plate hinged at three sides under uniform pressure applied to two opposite hinged sides 13 p2205 A66-26453

Buckling of unstable perfectly elastic isotropic rectangular plate 14 p2396 A66-27312

Fundamental frequency of four-point-supported square elastic plate 14 p2398 A66-27436

Problem of rectangular plate clamped all round transformed into generalized plane stress problem for rectangle 14 p2409 A66-28396

Stress of isotropic rectangular plate with elastic collar soldered into it under tensile load 15 p2607 A66-28770

Equivalent mass matrix for rectangular plate elements in bending, noting coordinate system 15 p2610 A66-29306

Rigid revolution paraboloid pressure on plates and membranes with contour consisting of straight line segments 16 p2822 A66-31509

Mean-square response of thin elastic plate to random pressure acting normal to plate surface 17 p3021 A66-32010

Natural frequency of thin rectangular plate for first six modes under clamped and free-edge conditions 17 p3032 A66-33526

Geometric diffraction theory and radar cross section estimation from rectangular flat plate scattering measurements 18 p3065 A66-33537

Free vibrations and stability of rectangular orthotropic plates reinforced by network of ribs 18 p3252 A66-33705

Successive approximation method for solving fundamental equations of nonlinear flexural vibration for rectangular elastic plate, noting effect of temperature and large amplitude 20 p3672 A66-38236

Thermal stresses in flat rectangular isotropic plate of constant thickness under arbitrary and no temperature variation in terms of Fourier series and integrals 21 p3832 A66-39443

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 22 p3862 A66-39846

Approximate solution of forced oscillation PDEs of rectangular orthotropic plate on

- elastic base with two characteristics 23 p4139 A66-41557
- Ritz method for solving elastic stability of rectangular cantilever plate in flows moving in direction perpendicular and parallel to clamped edge of plate 23 p4139 A66-41787
- Instability of rectangular solid in plane strain subjected axially to constant pressure and laterally to constant hydrostatic pressure 24 p4286 A66-42150
- Stress intensity factors for single-edge cracks in rectangular sheets with end rotations, reducing stress distribution to Riemann-Hilbert problem 24 p4286 A66-42161
- RECTANGULAR WING**
- Circulation distribution over rectangular wings, based on Chushkin algorithm and lifting surface equation calculated by digital computer 13 p2068 A66-26540
- Downwash angles behind rectangular wings of small aspect ratio calculated at subsonic velocities according to nonlinear theory 23 p4010 A66-41781
- RECTIFICATION**
- Boundary properties of Cauchy integrals and harmonically conjugate functions in regions having rectifiable boundary 07 p1059 A66-18097
- Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 12 p1830 A66-23734
- Crystallographic polarity dependent rectification in ZnS single crystals 18 p3153 A66-33610
- Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 22 p3875 A66-40077
- RECTIFIER**
- SA AVALANCHE RECTIFIER
- SA GERMANIUM RECTIFIER
- SA SILICON CONTROL RECTIFIER /SCR/
- Transient voltage across series-connected silicon rectifier cells immediately after commutation 01 p0035 A66-10206
- Theory for switching power rectifiers from forward to reverse state derived and confirmed by measurements 05 p0646 A66-14662
- Precision synchronous spectrum analyzer using phase-sensitive rectifier 06 p0849 A66-16375
- Possible structure of titanium dioxide based rectifier 06 p0924 A66-16547
- Current creep in selenium rectifier and effect on local conductivity channels in p-n junction of rectifier 07 p1099 A66-17930
- Annealing and diffusion processes effect on lifetime of minority carriers in p-silicon used in production of rectifiers 08 p1272 A66-19245
- Coaxial, rectangular and bandpass waveguides containing ferrite and dielectric plates in E plane, obtaining transcendental equations, determining electromagnetic wave propagation 08 p1194 A66-19312
- Time dependence of forward overload current passing through silicon rectifier, considering thermostability loss, current-time characteristics and p-n junction temperatures 08 p1195 A66-19314
- Potential jump at p-n junction used to indicate position of junction in silicon rectifier 09 p1353 A66-20365
- Weimer triode with contact rectifier for use as component of microminiature radio circuits, noting effect of contact rectification on current-voltage characteristics and amplifying power of such triodes 13 p2031 A66-25228
- Precision synchronous spectrum analyzer using phase-sensitive rectifier 13 p2042 A66-25963
- Diodes, transistors, rectifiers and inverters application to control and instrumentation systems, providing phase changing, frequency stabilization, source voltage, etc 14 p2249 A66-27118
- Relation between output correlation functions of full-wave and half-wave linear rectifier with random inputs 16 p2664 A66-31335
- Low-loss series or shunt rectifier-modulator circuits as part of class of low-loss modulator circuits 18 p3090 A66-34093
- Device having symmetrical voltage-current characteristics acting as rectifier of pulse or even harmonic distorted waveforms, using Zener diodes 19 p3315 A66-35561
- Prebreakdown region of selenium rectifiers, using pulse method with exponential pulse leading edge 24 p4254 A66-42426
- RECURSION FORMULA**
- Recurrence formula for Riemann function for certain operator in n-dimensional analog of hyperbolic differential equation 01 p0093 A66-10382
- Machine dependence of degree-of-difficulty relation for recursive functions, considering Turing machine as programmed computer 04 p0489 A66-13366
- Recursive procedure based on orthonormalization for discrete sample least mean square error estimation of non-Markovian random process 05 p0706 A66-14614
- Fine recurrence and recurrence on point in theory of Hunt processes extended to Markov chains, demonstrating equivalence for nonpolar point 05 p0708 A66-15095
- Bayes risk function of sequential games, discussing recurrence formula, decision rule and approximate computational method in pattern recognition 05 p0639 A66-15838
- Globally convergent iteration function for solution of polynomial equations according to certain algorithms 09 p1395 A66-20624
- General recursion formula for dynamic response of pressure measuring systems considered as series connection of tubes and volumes 10 p1535 A66-21376
- Recursive estimation of radar or radio astronomy target parameters, considering functional dependence of covariance function of received signals 10 p1505 A66-21841
- Recursive generation of expansion coefficients of time-dependent f and g series in two-body problem, using algebraic recurrence formulas 11 p1769 A66-22529
- Best linear unbiased /BLU/ estimator for large class of error correlation models 12 p1904 A66-24197
- Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian white noise 13 p2053 A66-26086
- Parametrically analytic solution of infinite differential equation 15 p2527 A66-29047
- Recursion method study of two thyristor circuits described by first-order recursion relations, considering stability and transient features 18 p3091 A66-34398
- Series expansion of inversion of n-dimensional Laplace transforms in terms of ultraspherical polynomials having coefficient computed recursively 19 p3392 A66-36784
- Restricted three-body problem integrated by Steffensen recurrence formulas using power series 20 p3602 A66-37540
- Abstract machine design with recursive function programming language, showing simulator construction in Fortran 20 p3523 A66-38018
- Parameters of dynamic systems described by PDEs determined by replacing PDE with integral equation and eliminating via recursion process terms resulting from initial and boundary conditions 23 p4084 A66-41396
- Optimum detection of Markov signals against noise background in case of discrete time 24 p4188 A66-42474

- Cyclic product codes operating in variable redundancy modes used in communications systems, noting protection against errors 19 p3296 A66-35336
- Video data compression by redundancy techniques, using a posteriori curve fitting

techniques to adaptively change effective resolution as function of picture detail 20 p3557 A66-37203
Theoretical methods for reliable machine design, comparing redundant residue number system code with linear codes and majority voting techniques 23 p4042 A66-41603

REDUNDANT STRUCTURE

Fatigue life and reliability calculations for fail-safe redundant structure 01 p0146 A66-10119
Design, fabrication and test of sandwich construction box beam made of D-43 columbium and Haynes 25 superalloy for use as hot redundant structure for hypersonic vehicles 16 p2816 A66-30894
Redundant structure of material with statistical yield point, determining probability that structure can sustain applied load even after some members have yielded 20 p3571 A66-37943

REDUNDANT SYSTEM

Maintainability and reliability cost effectiveness program /MARCEP/ for improving reliability by adding redundancy in cost-effective manner to nonredundant system 01 p0168 A66-10063
Automated techniques for providing reliability assurance in launch operations of Saturn IB space vehicle system 01 p0052 A66-10112
Triple redundancy with majority logic voting in application for increased safety and reliability of aircraft stability augmentation and/or automatic flight control 01 p0103 A66-10665
Redundancy techniques for flight control systems applied to tactical military aircraft, noting monitorless channel output selection, failures, etc 01 p0103 A66-10666
Hydrologic redundant systems for overall flight control systems 01 p0015 A66-10667
Algorithm for allocating redundancy among subsystems to achieve maximum system reliability without exceeding multiple constraints on redundancy 02 p0236 A66-11856
Majority logic passive redundancy in high and low reliable systems at various levels 02 p0204 A66-11936
Aid to air navigation problem discussing reliability and accuracy, hybrid system, redundancy and credibility, display, operational environment and navigation technique 02 p0256 A66-11966
Automatic in-flight testing capability of redundant systems [AIAA PAPER 65-732] 03 p0353 A66-13051
Redundancy emphasizing equipment reliability, effectiveness, evaluation of techniques and time dependent failure rate 03 p0345 A66-13275
Learning matrices based on redundancy principle as nonadaptive self-correcting adjustment switches and error detectors in electronic systems 04 p0489 A66-13510
Failure probability of redundant system considering dynamic and static failures of switches and control circuit 04 p0503 A66-13770
High-performance hydraulic power system for supersonic transport aircraft, using redundancy of three completely separate and functional systems 04 p0459 A66-13780
Man-powerplant reliability interface, emphasizing manned vs automatic sensing and control [SAE PAPER 650810] 05 p0627 A66-15013
Electrohydraulic servovalve presenting essential characteristics of redundancy by majority choice in analog servosystem 05 p0612 A66-15413
Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 06 p0839 A66-15950
Reliability function for restorable system with arbitrary time distribution laws for failure-free system operation, failure detection time and restoration 07 p1013 A66-17386
Mean time of failureless operation of duplicated devices with automatic control and switching 07 p1013 A66-17388
Reliability of system, with recovery, consisting of n plus m elements, m elements being in redundant

system 08 p1200 A66-19670
General redundant systems for microelectronics 09 p1361 A66-20494
Redundant microelectronic system and reliability 11 p1661 A66-22272
Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 12 p1831 A66-23792
Redundancy as method for systems reliability, either by using two identical channels operating simultaneously or by holding one channel in reserve 12 p1832 A66-24073
Redundancy method based on circuit failure asymmetries for reliability improvement in digital circuits 12 p1842 A66-24668
Reliability improvement through redundancy at various system levels in analog systems 12 p1844 A66-24733
Standard redundancy techniques for determining reliability of series elements and interchangeable stand-by components in digital circuits 12 p1888 A66-24821
Yield and reliability of integrated electronic devices and electronic digital systems, using redundant components by triplicating voting 12 p1846 A66-24914
Failure mode effect, block redundancy, functional redundancy and cooperative multichannel design for system reliability in Mariner spacecraft 13 p2191 A66-25284
Redundant system reliability in aircraft design, noting amplifier and filter arrangements, diode and quadruplex circuits, etc 14 p2247 A66-27015
Effective mean time to failure for two-element redundant system with generalized repair times 14 p2302 A66-28189
Probability of survival of system consisting of one active and m redundant elements 15 p2454 A66-28546
Quasi-redundant system reliability, solving differential equations for repair environment via computer 16 p2714 A66-30665
Hughes OH-6A helicopter fail-safe structural composition noting design, fatigue testing, application of redundant design features, etc 17 p2845 A66-32736
Reliability requirements for spacecraft guidance and control systems, emphasizing redundancy in existing systems 20 p3596 A66-37177
Redundant electrical systems for Titan II and Gemini Titan II launch vehicles 20 p3499 A66-37193
Reliability of system with recovery consisting of n plus m elements, m elements being in redundant system 20 p3538 A66-37262
Potential functions of molecules and intramolecular forces with redundant coordinates 21 p3775 A66-38801
Ultra-reliable six redundant sensor attitude reference system for Manned Orbiting Laboratory with limited sparing capability 21 p3767 A66-38892
Maintainability impact on redundant system design of phased array radar, presenting Monte Carlo technique for assessing availability of array portion 24 p4178 A66-42091

REENTRY

S ATMOSPHERIC ENTRY
S HYPERBOLIC REENTRY
S HYPERSONIC REENTRY
S LIFTING REENTRY
S MANNED REENTRY
S SPACECRAFT REENTRY

REENTRY BODY

Vacuum phase and reentry phase dynamics of spinning reentry bodies [AIAA PAPER 64-470] 03 p0431 A66-12743
Relation between angle of attack envelopes and correlation parameter for spinning bodies entering atmosphere at large inclinations 03 p0432 A66-12811
Aerodynamic characteristics of arbitrary slender reentry bodies predicted by conformal mapping 10 p1481 A66-21942
Nonequilibrium inviscid flow about arbitrarily shaped body with detached shock waves, using method with time derivative and bypassing boundary conditions

[AIAA PAPER 65-24] 14 p2218 A66-27404
Technological aspects of reentry of space vehicle fragments, considering survival factors as melting point of material, shielding structure, smoothness, etc 19 p3468 A66-35635
Recovery system requirements for high performance reentry vehicles at various entry angles and impact ranges, considering inflatable flares and rigid dive brakes 22 p3987 A66-40611

REENTRY COMMUNICATION

Microwave transmission from reentry vehicle surrounded by plasma sheath with inhomogeneities 04 p0479 A66-13624
Modulation degradation of SHF telemetry signals by vehicle reentry plasma conditions 05 p0630 A66-14591
Spacecraft transponder with reentrant mode TWT amplifier 12 p1836 A66-24158
HF technique for surveillance and tracking of reentry capsule, in departure from planned reentry corridors 12 p1819 A66-24608
Electromagnetic radiation from slotted-cylinder antenna on reentry vehicle surrounded by plasma sheath 13 p2030 A66-25210
Radar characteristics of reentry plasma and communication problems associated with reentry plasmas 14 p2343 A66-27508
Plane wave propagation across thin stratified plasma sheaths, noting polarization and reflection [AIAA PAPER 66-481] 16 p2655 A66-31492
Electric dipole radiation through finite conical plasma sheath about reentry vehicle, calculating radiation pattern 19 p3304 A66-36403

REENTRY CONDITION

Char generation and determination of thermal conductivity function under simulated entry heating conditions [AIAA PAPER 65-640] 01 p0162 A66-10597
Exact transient temperature distribution in spherical region subjected to axisymmetric reentry heat flux compared with one-dimensional theory [ASME PAPER 65-WA/HT-53] 05 p0791 A66-15658
Ablation measurement using sensor with radioactive dispersions being carried away with char [AIAA PAPER 65-363] 07 p1034 A66-17812
Metallographic technique for encapsulating char layers of plastics tested under reentry conditions to preserve them for microscopic examination 10 p1545 A66-21223
Radiation energy transfer rates characteristic of environments for advanced entry missions, examining laboratory simulation techniques, particularly plasma arc generators 11 p1687 A66-22866
Ablation effects on transient thermoelasticity in semifinite elastic solid 14 p2402 A66-27969
Reentry heat flux condition transformation into specified convective coefficients and temperatures, accounting for variation of flux with wall temperature 24 p4261 A66-42795
Reentry and recovery of space vehicles in reliable shock free landings, using modified helicopter rotor for hypersonic flow and thermal problems 24 p4284 A66-43073

REENTRY EFFECT

Thermochemical interaction between ablation material and environment during manned reentry, using mainly graphite and composite materials [AIAA PAPER 65-642] 01 p0160 A66-10226
Nonlinear interaction between plane RF wave and one-dimensional inhomogeneous multicomponent plasma slab 04 p0487 A66-14370
Spectral radiometer to measure reentry power emitted by reentry event 07 p1030 A66-17296
High resolution equilibrium radiation spectra for shock layer of blunt bodies at reentry velocities and radiative recombination of N and O ions [AIAA PAPER 66-104] 07 p0984 A66-18458
Convective and radiative heat transfer to reentry vehicles at superorbital velocities [AIAA PAPER 66-106] 07 p1155 A66-18459
Electromagnetic scattering model of turbulent plasma wake behind reentry vehicle 10 p1502 A66-21634

- Thermal protection system for Apollo command module 14 p2393 A66-28004
- Physiological reactions of astronauts to acceleration of Voskhod spacecraft characterized by greater emotional stress than during centrifuge 17 p2861 A66-32936
- Infiltrated tungsten materials in subsonic air and nitrogen plasma arcs with changes evaluated metallurgically 19 p3377 A66-35610
- REENTRY GUIDANCE**
- Reentry guidance for manned Mars mission return considering capture and acceleration control, skip range and terminal range controls 01 p0101 A66-10041
- Gemini spacecraft reentry guidance scheme with onboard computations of reference trajectory and guidance coefficients [AIAA PAPER 66-48] 03 p0390 A66-12758
- Reentry guidance by threshold network storage of precomputed optimum commands, using analogy of surface approximation problem in N plus one-dimensional space [AIAA PAPER 66-52] 08 p1249 A66-18989
- Exponential reentry guidance for vehicle prior to ground-based guidance or manual control 08 p1253 A66-19542
- Real-time command and control of Gemini and other entry vehicles by variational techniques 08 p1254 A66-19544
- Manual guidance system for atmospheric entry of lifting reentry vehicles 10 p1554 A66-21930
- Gemini reentry guidance and control system consisting of inertial guidance and attitude control systems 19 p3470 A66-36679
- Skin temperature rate reentry guidance and control system using thermocouple sensors and operating in manual or automatic mode [AIAA PAPER 65-47] 24 p4235 A66-42765
- REENTRY PHYSICS**
- Theoretical and experimental work in flow field analysis has enhanced ability to predict aerodynamic heating in atmospheric entry 01 p0143 A66-10800
- Heat transfer and melting ablation about decelerating spherical bodies during planetary atmosphere entry [AIAA PAPER 65-132] 02 p0303 A66-11539
- Approximate reentry velocity and heating equations applied to any atmosphere satisfying hydrostatic equilibrium, noting motion equations for flight 08 p1303 A66-18836
- Transition layer properties in reentry plasmas, examining electromagnetic propagation in plasma surrounding hypersonic missile 09 p1406 A66-19850
- Entry flight, relation between laboratory flows, in-flight conditions and MGD effects on flow field, drag and heat transfer [AIAA PAPER 66-161] 10 p1611 A66-21682
- Characteristics of two high-power high-intensity radiation heat sources developed by Ames Research Center [AIAA PAPER 66-185] 11 p1638 A66-22214
- Arc-driven vortex type heater-accelerator for possible use in reentry flight simulation 11 p1684 A66-22832
- Monograph on atmospheric reentry, discussing reentry trajectories, atmospheric kinematics, reentry flow fields, etc 13 p2193 A66-26466
- Operation and performance characteristics of shock tube using arc discharge heating of driver gas, noting results on radiative emission from aerodynamic plasmas 13 p2059 A66-26711
- Thermal radiation from argon plasma arc of wall-stabilized type with Poiseuille flow, comparing experimental measurements with theoretical reentry predictions [AIAA PAPER 65-546] 15 p2551 A66-29274
- Integral relations method for flow field calculations of blunt body entries for determining convective heat flux to reentry body 15 p2424 A66-29305
- Viscous aerodynamic contributions to forces and moments on front face of blunt lifting reentry vehicle in producing trajectory error [AIAA PAPER 66-464] 16 p2631 A66-31471
- Nonequilibrium flow fields over spherically blunted conical entry vehicle with chemical reaction in shock layer [AIAA PAPER 66-420] 17 p2840 A66-32750
- Second-order theory used to provide nearly exact solution for entry mechanics including solution of nonoscillating and oscillating trajectories [AIAA PAPER 66-488] 17 p3016 A66-32771
- Basic shock layer radiation data obtained in shock tube and free-flight ballistic range facilities, applicable to Venus or Mars atmosphere entry [AIAA PAPER 66-421] 18 p3046 A66-33641
- Exact expression derived for minimum energy deorbit problem, calculating minimum retrovelocity required to achieve specified path angle at initial atmospheric entry 19 p3460 A66-35606
- Nose-region flow of blunt body moving in supersonic or hypersonic speeds solved by variety of numerical methods 21 p3693 A66-38700
- Reentry aerodynamics research in Japan including sounding rocket program, optimum reentry trajectory, nonequilibrium flow in nose region of blunt body, wind tunnels, etc [ICAS PAPER 66-36] 22 p3847 A66-40659
- REENTRY RANGE**
- Elliptic eigenvalue for reentrant region to determine vibration modes of membrane 03 p0387 A66-12620
- Projectile-borne and gaseous impurity effects on spectroscopic turbulence and velocity measurements at reentry simulating range 24 p4190 A66-42184
- REENTRY SHIELD**
- SA HEAT SHIELD**
- Charring ablative materials effectiveness in combined convective and radiative heating as reentry shield 03 p0444 A66-12792
- Materials for extreme temperature and g loading during suborbital, manned and superorbital reentry 07 p1051 A66-18303
- Effectiveness of charring ablators strongly influenced by stream enthalpy level and heating rate 08 p1316 A66-18812
- Chemical milling of columbium reentry vehicle skin panels using powdered metallurgy, vacuum processing, refractory alloy sheet rolling and electron beam welding [ASTME PREPRINT MR66-712] 12 p1886 A66-24417
- Ablation of reentry heat shields, discussing fiberglass reinforced phenolic resin, charring, graphite, radiation, etc 14 p2412 A66-27484
- Char-layer structural integrity limits application of charring-ablator heat-protection materials to advanced ballistic reentry [AIAA PAPER 66-424] 18 p3239 A66-33642
- Elastomeric ablative thermal shield material to meet system requirements for lifting reentry vehicles having lift-drag ratio of 0.5 to 1.5 18 p3240 A66-33801
- Protective coating problems of superrefractory alloys for use in space gliders at temperatures above 1000 degrees C 23 p4081 A66-41655
- REENTRY TRAJECTORY**
- Planetary entry trajectory control of manned vehicles for Earth and Mars atmospheres 03 p0431 A66-12741
- Maneuvered reentry of vehicle with aerodynamic lift into planet atmosphere, using motion equations and considering reentry trajectories as minor circles 03 p0432 A66-13129
- Powered reentry of vehicle into planet atmosphere with propulsion program where thrust equals drag and trajectory is minor circle 03 p0432 A66-13130
- Glider reentry descent trajectories from near Earth orbit calculated, emphasizing landing accuracy and mechanical and thermal stresses 04 p0584 A66-13525
- Controlled ballistic, steady lift and variable lift reentry of winged spacecraft 04 p0584 A66-13526
- Aerodynamic penetration and radius in drag and lift during atmospheric entry process [AIAA PAPER 66-16] 07 p0983 A66-18447
- Approximate solutions for reentry trajectory in Earth atmosphere, neglecting Earth rotation and assuming spherical Earth shape and exponential density-altitude relationship 08 p1299 A66-19831
- Reentry orbits for manned spacecraft using aerodynamic lift and drag forces for reentry 10 p1606 A66-21264
- Terminal reentry and dynamics evaluation computer program for small particles, using point-mass calculation during initial phase and determining drag coefficient [AIAA PAPER 66-380] 12 p1951 A66-24505
- Reentry flight corridor depth reduction as result of inadequate flight data at hyperbolic speeds, noting overshoot limit and inverted attitude [AIAA PAPER 65-19] 12 p1952 A66-24696
- Lifting reentry test phases and effect of pilot performance on miss distance in first manned Gemini flight, discussing spacecraft control 17 p3016 A66-32685
- Trajectory control scheme effect on performance of lifting entry vehicles [AIAA PAPER 66-407] 17 p3016 A66-32746
- Oscillatory motion of angle of attack for space vehicles entering Earth atmosphere at hypersonic speeds from satellite orbits 17 p3016 A66-32893
- Spacecraft longitudinal and lateral stability along reentry trajectory during deceleration period determined, using equations of motion 17 p2846 A66-32897
- Oscillatory trajectories in atmospheric entry of lifting vehicles at subcircular speeds and constant angles of attack with initial conditions deviating from equilibrium glide 17 p3016 A66-33065
- Problems when using RF diagnostic systems in flight test evaluation of ICBM systems, specifically when using EM systems during reentry [AIAA PAPER 66-406] 18 p3239 A66-33634
- Atmospheric reentry trajectory of space vehicle at orbital velocities and constant lift-drag ratio 18 p3244 A66-33879
- Pitch modulation maneuver for spacecraft reentry [AIAA PAPER 65-317] 19 p3468 A66-35604
- Entry Monitor System /EMS/ for maneuverable spacecraft, interpreting display relationship to entry trajectory control [AIAA PAPER 65-495] 20 p3592 A66-38160
- Modulation of L/D and bank angle to achieved heading, range and trajectory stabilization, using closed form equations 21 p3765 A66-38868
- Flexible uniform-stress truncated disk spinning about central hub for aerodynamic braking useful as reentry decelerator, noting low decelerator weight fractions for wide range of mission parameters 22 p3845 A66-40599
- Reentry filtering prediction and smoothing in application of satellite and spacecraft trajectory estimation techniques [AIAA PAPER 65-319] 23 p4132 A66-41098
- REENTRY VEHICLE**
- Equilibrium radiative transport properties of high temperature air coupled with aerodynamic flow field generated by planetary reentry vehicles 01 p0163 A66-10784
- Synthesis of optimal linear control system coupled with vehicle configuration design technique for guidance parameters and temperature accumulation along optimum entry trajectories 01 p0105 A66-10787
- Radiative vs active cooling systems as part of refurbishment requirements critical to economic feasibility of reusable launch vehicle systems 01 p0143 A66-10796
- Uncertainties in thermophysical properties of char-forming ablatives in intense convective and radiative heat transfer environments and effect on mathematical and physical models [AIAA PAPER 65-639] 03 p0445 A66-13010
- Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles 03 p0372 A66-13257
- Cooling device for reentry vehicle windows consisting of rotating disk with radial slots placed in front of window 06 p0871 A66-16222
- Parachute operation at high Mach numbers and dynamic pressures for reentry vehicle deceleration [AIAA PAPER 66-24] 07 p0989 A66-17888
- Reference-point results applied to variations in laminar heat transfer to total vehicle over range of vehicle attitudes and associated trajectories [AIAA PAPER 66-28] 07 p0980 A66-17890

High temperature insulation systems for thermal protection of reentry and hypersonic cruise vehicles
[AIAA PAPER 66-43] 07 p1154 A66-17894

Ablation effects on static and dynamic stability of reentry vehicle
[AIAA PAPER 66-51] 07 p1141 A66-17896

Hypersonic aerodynamic stability and drag of ablating and nonablating models of blunt-faced reentry shape
[AIAA PAPER 66-61] 07 p1141 A66-17898

X-20 program for maneuverable hypersonic reentry vehicle, noting boost-glide dynamic soaring
08 p1300 A66-18555

Stagnation point velocity and pressure distribution over heat-sink shielded reentry vehicle to test boundary layer heat transfer theories
08 p1161 A66-18811

Asymmetrical ablation cause of persistent roll resonance in nominally symmetrical reentry vehicles
[AIAA PAPER 66-49] 08 p1303 A66-18950

Rheoelectric analogy using apparent mass to obtain static and dynamic stability derivatives for lifting-body reentry vehicles
[AIAA PAPER 66-58] 08 p1303 A66-18991

Manual guidance and control simulation for reentry vehicle flight and landing
08 p1203 A66-19533

Meteorological environment considerations in terminal flight region relating to all-weather land recovery operations of lifting reentry vehicles
[AIAA PAPER 66-360] 12 p1907 A66-24492

Influence coefficients for computation of atmospheric components of reentry vehicle circular error probable /CEP/, using Bliss adjoint method, noting effects of certain inadequacies on system performance
[AIAA PAPER 66-358] 12 p1908 A66-24517

Aerodynamic heating of vehicles entering Earth atmosphere at hypersonic speed, noting blunt body concept, radiative and convective heating, heat shield weights, etc
13 p1989 A66-25153

Hypersonic wake studies in ballistic missile research program, discussing reentry of hypervelocity vehicles, laminar flow, atmospheric turbulence, etc
14 p2218 A66-27402

Permanent magnetized ferrite antenna waveguide windows for improving EM wave transmission through plasma and reducing transmission losses during reentry
14 p2241 A66-27930

Graphite composites suitability for use on hypersonic entry vehicle components
14 p2319 A66-28014

Structure and thermal protection system of start program including load paths, heat shield, materials, etc
14 p2407 A66-28024

Structural and heat shield designs for lifting entry vehicles for orbital missions analyzed for effects of wall thickness and weight on vehicle size and total weight
14 p2393 A66-28025

Tension string structure of high strength filaments for ultralightweight planetary entry vehicle
14 p2407 A66-28028

Global coverage by banked aeroglide atmospheric entry from spherical Earth analysis of bank-speed schedule and necessary L/D
14 p2395 A66-28453

Recovery locations and techniques for atmospheric reentry vehicles in normal flight and impact
14 p2395 A66-28454

Hypersonic lift-drag ratio and landing modes in manned entry vehicle design
15 p2605 A66-28742

Component and pyrotechnic production sampling applied to reentry vehicle program, noting technique for selecting size, frequency and quantity of components for testing
15 p2507 A66-28798

Momentum deposition in wake of reentry vehicle, discussing behavior of complex materials characterized by heat of ablation
15 p2424 A66-29309

Motion equations and Pontryagin maximum principle applied to space vehicle reentry trajectory optimization through independent control of lift and drag
16 p2809 A66-30884

Double wall ablative heat shield panels for manned lifting entry vehicles, noting nylon phenolic and elastomeric silicone ablators
[AIAA PAPER 66-506] 16 p2822 A66-31496

Parametric study of subsonic characteristics of low-aspect-ratio delta

wings, noting role of airfoil thickness and free vortices above wing surface
[AIAA PAPER 66-429] 17 p2841 A66-32754

Wind tunnel test of dynamic stability characteristics of spherically blunted 10 degree cones
[AIAA PAPER 66-465] 17 p2841 A66-32764

Optimum entry vehicle design using aerobreaking for manned Earth entry at hyperbolic speeds, examining blunted conic, biconic and tetrahedral configurations
[AIAA PAPER 66-489] 18 p3239 A66-33657

Multistage space transporter with retrieval capabilities, using controlled reentry angle
18 p3247 A66-34678

Short period longitudinal aerodynamics of reentry vehicle flight control system, using sensitivity techniques
19 p3396 A66-35510

Temperature rate measurement for design of control and guidance system in reentry vehicles, using Temperature Rate Flight Control System /TRFCS/
19 p3396 A66-35511

Applicability of refractory metals to solid propellant rockets, lifting and guidance structure for glide reentry vehicles and liquid metal containment for nuclear space power systems
19 p3382 A66-36105

Oxidation-protective coating of niobium alloy for application on reentry vehicles
19 p3384 A66-36149

Hypersonic plasma generator for reentry vehicles with arc tunnel experimental data and analysis of nonequilibrium chemical reaction between cesium atoms and ionized air species
20 p3497 A66-37158

Theoretical and experimental data on Apollo command module during water impact
20 p3664 A66-38169

Testing of adhesive bonding at high temperatures for use in reentry vehicles, using IR energy on specimen preloaded in shear
[ASME PAPER 66-MD-38] 21 p3742 A66-38488

Multiple reentry capability in missile design requires new forms of hardening for offensive missiles and support systems geared to shorter reaction times
22 p3886 A66-40130

Ballistic reentry vehicle recovery via low speed water impact or air snatch after vehicle has flown unperturbed trajectory down to altitude of maximum dynamic pressure
22 p3886 A66-40597

Tests for obtaining water trajectory data and underwater flow field photographs used in determining deployment sequence of water recovery system flotation bag for reentry vehicle
22 p3987 A66-40601

Wind tunnel free-flight testing of reentry vehicle dynamics, noting capability for simultaneous two-dimensional viewing of model trajectories
[AIAA PAPER 66-774] 22 p3895 A66-40654

Emergency escape from multicrew orbital vehicles during launch, orbit, reentry and landing by lifting reentry module
[ICAS PAPER 66-35] 22 p3988 A66-40662

Book on problems of return from space including heat protection, materials, development testing, life support, design, simulation and other related activities
22 p3988 A66-40875

Digital TV spectrometer for measuring optical radiation from reentry vehicles, using IR vidicon and magnetic recording for data processing
23 p4069 A66-41665

Radiometric capability of S-10 image orthicon system evaluated for quantitative radiation measurements against reentry vehicles
23 p4070 A66-41668

Hypersonic entry vehicle measurement of Mars atmospheric density, pressure, composition, temperature and detection spectrometry of chemical species in shock layer
24 p4277 A66-42680

Ablation effects on static and dynamic stability of reentry vehicle
[AIAA PAPER 66-51] 24 p4283 A66-42770

Chemical effects on RF attenuation during reentry for blunt-nosed lifting vehicles and sphere-cone ballistic vehicles
24 p4158 A66-42782

Computer program for parametric analysis and trajectory simulation for axisymmetric planetary entry vehicles
24 p4283 A66-42792

REFERENCE SYSTEM

SA INERTIAL REFERENCE SYSTEM

SUBJECT INDEX

Accurate and permanent data obtained for true-north referencing, using photography
01 p0065 A66-10030

Reference point in thermodynamic similarity for investigating binary gas mixtures
01 p0163 A66-10627

Drift of coordinate transformation matrix of quantized attitude reference system on aerospace vehicle undergoing coning motions
01 p0142 A66-10677

Kinematic and physical relations for small motion superposed on initial motion defined in fixed reference frame
01 p0106 A66-10735

Solar boresighting of S-band antennas for long range tracking radar
04 p0479 A66-13611

Time-referencing of moment of photographing to determine satellite coordinates with aid of reference stars
04 p0524 A66-14394

Data analysis from film of framing camera with rotating mirrors, using frame edges as reference lines, calculating necessary corrections
05 p0677 A66-14863

Automatic Astro Tracker as part of long-range aircraft navigation complex heading-reference system
07 p1075 A66-17786

Reference-point results applied to variations in laminar heat transfer to total vehicle over range of vehicle attitudes and associated trajectories
[AIAA PAPER 66-28] 07 p0980 A66-17890

Model reference adaptive control systems for calculating system variables of sinusoidal or ramp function input signals
08 p1199 A66-18672

Phase shift keying with transmitted reference, obtaining probability of error for m-phase receiver system in presence of additive Gaussian noise
13 p2019 A66-25147

Compass system on VC10 provides magnetic heading reference, or alternately, inertial reference for grid navigation
13 p2125 A66-26283

Kinematics of noninertial reference systems in both metric and tetrad formulations of general theory of relativity
14 p2332 A66-27213

Operational geographic correlation /gridding/ of Nimbus meteorological data
[AIAA PAPER 66-438] 18 p3128 A66-33645

Gravity on planets explored by reference system expressing gradient magnitudes, data on equipotential and application to system with continuous rotation in space
19 p3346 A66-35627

Integrated maintenance management specification WR-30 applied to limited development program for attitude reference system
20 p3682 A66-37187

Automatic self-monitor techniques for attitude and heading reference systems
20 p3596 A66-37188

Stress tensor analysis of elastic plates in reference state, noting nonlinear plate theory and variational principle
20 p3673 A66-38273

Strapdown attitude reference system with two rotor gyros using gas bearing in space vehicle
21 p3763 A66-38847

Azimuth reference system design and stability, noting flight simulator installation
21 p3723 A66-38888

Master reference system for reducing sea alignment time of aircraft inertial navigation systems
21 p3767 A66-38890

Ultrareliable six redundant sensor attitude reference system for Manned Orbiting Laboratory with limited sparing capability
21 p3767 A66-38892

REFINING

S CLEANING

S PURIFICATION

S ZONE REFINING

REFLECTED RAY

Ground reflection effect on polarization of radiation scattered from top of Rayleigh atmosphere, using Fresnel and Lambert models
[AIAA PAPER 66-514] 16 p2699 A66-31498

REFLECTED WAVE

Probability density of angular fluctuations of phase front of wave reflected from complex target
02 p0190 A66-11407

Plane and cylindrical wave diffraction at ideally reflecting wedge
06 p0823 A66-15881

Uniqueness theorem for problems of reinforcing rib on plane sound wave reflected from thin plate
08 p1257 A66-19758

- Reflection gratings as end plates in Fabry-Perot cavity, with characteristics of low absorption output coupling and wavelength-dependent alignment of end plates 09 p1385 A66-19930
- Conditions for regular stationary reflection hydromagnetic shock on rigid wall 10 p1521 A66-21194
- Shock tube study of irregular reflection of strong shock waves in carbon dioxide, nitrogen and air 11 p1629 A66-22335
- Ionospheric-plasma density determined by phase difference of incident waves on and reflected from plasma 12 p1870 A66-24284
- Ionospheric radio wave propagation and ionization inhomogeneity drift measured, using doubly reflected signals 12 p1873 A66-24687
- Yagi-Uda antenna array discussing wave theory of semiinfinite and finite arrays, excitation by reflected wave proportional to incident wave and King-Sandler theory 14 p2255 A66-27907
- Reflected shock wave equations by unknown function expansion in series of small parameter considered excess pressure value 14 p2278 A66-28058
- Directional distribution of light reflected from roughened surfaces with measurements made of plane-polarized components of reflected light as well as of mixed radiation 20 p3598 A66-36941
- Submillimeter wavelength electronic devices, examining development of lasers and reflected wave tubes with overlapping effective wave range 20 p3580 A66-38004
- Anomalous wave transformation in plasma, analyzing existence of reflected and forward waves 20 p3611 A66-38106
- Heat transfer in wake of reflected shock wave in reacting gases, using calorimetry and shock tube technique 21 p3727 A66-39095
- Plane supersonic flow with Mach reflection represented by shock wave interaction, noting integral equation obtained from linearized shock equations 22 p3897 A66-39696
- REFLECTING TELESCOPE**
- High-speed aplanatic catadioptric telescope system with all optical elements having spherical surfaces only, noting refracting and reflecting telescopes 05 p0679 A66-15204
- Phase shifters for signals arriving from North-South arm elements of Northern Cross radio telescope reflector antenna array 12 p1836 A66-24304
- Design and construction of 106-cm Cassegrain-type reflector telescope at Pic du Midi observatory 13 p2081 A66-26233
- Reflector dishes of 210-ft diameter radio telescope at Parkes, Australia, and 150-ft diameter radio telescope at Lake Traverse, Ontario 18 p3095 A66-34321
- Monograph on radioastronomical applications in antenna design, emphasizing reflector antennas and extraterrestrial and artificial radio emission effects 22 p3882 A66-40856
- REFLECTION**
- INFRARED REFLECTION**
- IONOSPHERIC REFLECTION**
- OPTICAL REFLECTIVITY**
- SIGNAL REFLECTION**
- SPECTRAL REFLECTANCE**
- ULTRAVIOLET REFLECTION**
- WAVE REFLECTION**
- REFLECTION COEFFICIENT**
- Directional reflective coating consisting of cylindrical dielectric fibers oriented perpendicular to absorbing substrate. AIAA PAPER 65-671 01 p0160 A66-10232
- Lunite model based on astronomical and radar data of radio wave reflectance from lunar surface, showing dependence of reflection coefficient on wavelength 01 p0135 A66-10274
- Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 01 p0062 A66-10761
- Electromagnetic wave reflectivity coefficients from 1957 to 1963 statistically analyzed 01 p0032 A66-11102
- Jupiter photoelectric spectral scan in UV reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 02 p0286 A66-11359
- Relations for interaction between waveguide field and ferrite obtained from reflection and transmission coefficients, using perturbation method 02 p0196 A66-11416
- Reflection coefficient of mirrors measured on operating wavelength of laser in which they are used 02 p0239 A66-11420
- Tunable calibrated impedance for measurement of unknown terminations in millimeter range and based on reflection coefficient adjustments 03 p0371 A66-13242
- Angular distribution of diffusely reflected light flux as function of scattering indicatrix, survival probability of light quantum and conditions of medium illumination 04 p0541 A66-13415
- Reflection coefficients of plane wave field in grid-earth system, using averaged boundary conditions 04 p0482 A66-13907
- Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 04 p0496 A66-13909
- Practical stability criterion for tunnel-diode circuits based on plots of modulus of reflection coefficient vs real frequency 04 p0500 A66-14104
- Nonlinear reflection and transmission coefficients of inhomogeneous plasma slab when RF plane wave is incident upon it 04 p0488 A66-14371
- Electromagnetic scattering by refractive index distribution characterized by one-dimensional pressure 05 p0675 A66-14554
- Frequency range of more than 60 gc obtained by introducing microwave absorber into last stage of multishaft absorber, improving reflection coefficient 05 p0648 A66-15029
- Metal surface structure, semiconductors and dielectric films analyzed, using image orthicon technique for data on work function, electron reflection coefficient and electric resistance 05 p0621 A66-15578
- Approximation technique for computing transmission and reflection coefficients for plane electromagnetic waves propagating through inhomogeneous stratified dielectric slabs 06 p0826 A66-16025
- Pole-zero analysis techniques for reflection coefficient of multiple-layer dielectric having complex permittivity 06 p0843 A66-16030
- Scattering of TM surface wave by metallic strip above dielectric-clad ground plane, developing expression for Green function and formula for reflection coefficient 06 p0845 A66-16091
- Engineering method of calculating Fresnel coefficients based on use of nomograms 08 p1182 A66-18917
- Russian monograph on thermal radiation from metals, ceramics, partly transparent bodies, films, etc 08 p1256 A66-19567
- Unidirectional reflectance of imperfectly diffuse surface defined in terms of surface radiance and equivalent hemispherical radiance of source 08 p1227 A66-19704
- Electroreflectance effect on gallium arsenide surfaces at various ranges of photon energies 08 p1279 A66-19838
- Coefficient of reflection of H-11 mode shock wave emitted from aperture of circular waveguide with infinite flange 09 p1344 A66-20347
- Twofold phase modulation in meters of microwave reflection and transmission coefficients 09 p1345 A66-20446
- Statistical approach to determining reflection index estimate from surfaces with small grazing angles 09 p1348 A66-20789
- Reflection factors and wave amplitudes of diffraction spectra for incidence of H-p, 0 waves onto inductive obstacles in rectangular waveguides 09 p1358 A66-20808
- Jupiter photoelectric spectral scan in UV reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 10 p1603 A66-21099
- Radar cross section of metal bodies covered by thin plasma calculated, using computer technique, noting modification of TE and TM mode reflection coefficients 10 p1503 A66-21645
- Reflection coefficient and critical length determination for unstable convective modes in weakly homogeneous plasmas 10 p1567 A66-21819
- Propagation mode of harmonics and effects on reflection and transmission coefficient at plane grid 10 p1506 A66-22001
- Nighttime reflection coefficient of radio wave during ionospherically disturbed period is closely correlated with cosmic-ray and solar phenomena 11 p1696 A66-22379
- Wide-angle impedance matching /WAIM/ method reducing variation of reflection coefficient with scan angle and polarization by dielectric sheet located in front of array antenna face 11 p1663 A66-22547
- Synthesizing group of parallel-input filters while minimizing insertion loss and reflection coefficient 11 p1656 A66-23065
- Apparatus producing monochromatic radiation for measuring reflection and transmission coefficients composed mainly of semiconductor multiplier and quasi-optical system separating radiation of individual harmonics 11 p1708 A66-23288
- Conductivity effective-mass of holes of gallium arsenide crystals with various hole concentrations determined from frequency dependence of spectral reflectivity in IR 12 p1928 A66-23942
- Radiation field in plane-parallel semiinfinite medium illuminated by high-directivity beam bounded from above by mirror surface whose reflection is calculated for various scattering indicatrices 12 p1914 A66-24245
- Plane electromagnetic wave diffraction by narrow strip-grating, obtaining reflection coefficient via optical approximation method 13 p2021 A66-25395
- Index of refraction of thin film coatings from transmittance and reflectivity measurements with attention to titanium and silver films 13 p2168 A66-25944
- Electromagnetic fields guided by plasma walls in waveguide, determining reflection coefficients and surface impedance 13 p2148 A66-26037
- Reflection coefficients for electromagnetic waves in variable refractive index medium from approximate solution of linear differential equations 13 p2025 A66-26040
- Reflection coefficient for arbitrary lossy waveguide with large number of identical periodically positioned inhomogeneities determined by iteration process 14 p2250 A66-27145
- Excitation of longitudinal waves in semiinfinite plasma by given external field for arbitrary law of electron reflection from plasma boundary, considering diffusion reflection and showing surface charges on plasma boundary 14 p2341 A66-27154
- Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334
- Electrical and physical characteristics and distribution density of aerosols in determining microwave scattering and reflection properties in connection with radar angles 14 p2237 A66-27396
- Resonators with confocal mirrors with variable reflection coefficients calculated, using integral equations for field distributions 14 p2254 A66-27746
- Electromagnetic wave reflection and transmission coefficients for moving dielectric slab as function of velocity of medium 14 p2239 A66-27761
- Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 14 p2285 A66-27860
- Numerical analysis of infinite phased array of open rectangular waveguides, noting use of Fredholm integral equation, effects of wall thickness and reflection coefficient 14 p2255 A66-27909
- Reflectance measurements of metals described under ultrahigh vacuum conditions 15 p2499 A66-28846
- Dynamics of field and generation frequencies in giant pulse of ruby laser with passive shutter, using solution of cryptocyanine in ethanol, noting mirror reflection coefficient 15 p2518 A66-29727
- Formula derived for estimating reflection coefficient of cylindrical resistive-film attenuator for traveling wave tube 16 p2660 A66-30617
- Change in reflectance of semiconductor

induced by electric field at approximately photon energies of interband transitions 16 p2776 A66-30734

Evolution of two different homogeneous media separated by straight wall with arbitrary transmission and reflection properties, noting heat flow, vibration, diffusion coupled vibration, etc 17 p3036 A66-32842

Radar return from perfectly reflecting target in presence of second medium, obtaining first approximation for return and accounting for multiple reflections and dispersion 17 p2876 A66-33104

Propagation mode of harmonics and effects on reflection and transmission coefficient at plane grid 18 p3072 A66-34978

Reflection coefficients of plasma waveguide measured by determining wave modulation coefficients 18 p3151 A66-35069

Solution of Schrodinger equation for quantum mechanical reflection coefficient of electrons at metal semiconductor barriers 19 p3435 A66-35409

One-port log-periodic circuits, determining conditions for which phase of input reflection coefficient varies linearly with logarithm of frequency 19 p3324 A66-35717

Radiation from modulated corrugated surface excited by waveguide, noting reflection coefficient, radiation pattern, etc 19 p3302 A66-35724

Reflection spectra of polished polycrystalline samples of various rare earth chalcogenides 19 p3442 A66-35820

Reflection coefficient of electromagnetic wave polarized in plane normal to magnetostatic field and falling from vacuum perpendicularly on plasma boundary parallel to field 19 p3303 A66-36198

Matrix technique used for derivation of reflection and transmission coefficients of bounded plasma slab, noting wave propagation 19 p3305 A66-36419

Rime effect on reflection efficiency of microwave reflectors, noting surface roughness irregularity and relation between icing and meteorological topographical conditions 20 p3516 A66-37726

Reflection coefficients of plane wave field in grid-Earth system, using averaged boundary conditions 20 p3518 A66-37865

Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 20 p3532 A66-37867

One-dimensional inverse problem of scattering theory, noting differential equation reduction, determining traveling wave coefficient 20 p3519 A66-37993

Modification to theory of differential absorption experiment involving Fresnel reflection coefficient of ionospheric irregularities 20 p3555 A66-38209

Optical characteristics of hexagonal reflecting film membrane obtained, using analytical method combined with electrical simulation 20 p3503 A66-38440

Horn transitions from empty waveguides to dielectric surface waveguides using telegraphers equations, determining launching horn shape with minimum reflection coefficient 21 p3711 A66-38836

Reflectance measurement of barium titanate single crystal as function of temperature 21 p3805 A66-39583

Exact solution for transverse electromagnetic wave in plasma with diffuse boundary, noting reflection and transmission coefficients 22 p3952 A66-39719

Microwave beam incident on linearly graded plasma for electron density profile determination, using ray theory 22 p3861 A66-39723

Statistical approach to determining reflection index estimate from surfaces with small grazing angles 22 p3863 A66-39848

Reflecting mirrors in laser oscillators treated as reflecting elements and transducers for coupling power from oscillator to external space 22 p3932 A66-40184

Radar observation of Mars, noting mean reflection coefficient for signals returned by near center disk sections 22 p3985 A66-40955

Viscoelastic properties of liquids under steady flow determined experimentally in

frequency range 5-75 mc/s, using internal reflection of pulse of shear wave at surface of fused quartz bar 23 p4066 A66-41159

Excitation of longitudinal waves in semiinfinite plasma by given external field for arbitrary law of electron reflection from plasma boundary, considering diffusion reflection and showing surface charges on plasma boundary 24 p4245 A66-42974

REFLECTOMETER

Integrating sphere reflectometer for measuring absolute hemispherical spectral reflectance of surfaces [AIAA PAPER 64-255] 18 p3113 A66-34588

Optical constants in far UV, using reflectometer permitting measurement at various incidence angles 19 p3361 A66-36618

Ellipsoid mirror reflectometer using radiant flux from IR monochromator 20 p3561 A66-38297

REFLECTOR

SA FRESNEL REFLECTOR

SA MIRROR

SA PARABOLIC REFLECTOR

SA RADAR REFLECTOR

SA SOLAR REFLECTOR

SA TWO-REFLECTOR ANTENNA

Aperture antenna subdivided into reflector, horn, lenses, surface and leaky wave antennas 04 p0491 A66-13403

Coma-corrected, mono-and multifrequency diffraction reflector antennas, examining feed system, electronic scanner and aberrations 05 p0648 A66-14911

Gas laser end reflector using Pellin-Broca prism for spectral line selection 09 p1386 A66-20518

Resonant modes in ring shaped resonators formed by reflector strip bent into circle, noting eigenfunctions and eigenvalues of integral equation 15 p2457 A66-28786

Polarizing properties of laser reflector consisting of two identical rectangular prisms 16 p2721 A66-31803

Calibration of spherical reflector of Arecibo Ionospheric Observatory antenna, using analytical photogrammetric methods 18 p3075 A66-33746

Bowl-distortion and dynamic measurements of reflector profile of modified Goonhilly no. 1 antenna 18 p3085 A66-34313

Reflector construction for radar and communications antennas, discussing materials, surface configuration and relative costs 18 p3096 A66-34326

Large reflector shape measured by method using horn antenna illumination and small auxiliary reflecting device 20 p3527 A66-37448

Broadening frequency bandwidth of full-wave directive loop antennas employing reflectors and directors 20 p3531 A66-37727

Polarizing properties of laser reflector consisting of two identical rectangular prisms 21 p3747 A66-39105

REFLEX

SA CAROTID SINUS REFLEX

SA CONDITIONED RESPONSE

Repeated vertical/head-tail vibration effect on functional state of spinal reflex arc of guinea pigs 23 p4026 A66-41338

Repeated vertical vibration and noise effects on conditioned reflexes of rats 23 p4026 A66-41339

REFRACTED RAY

Focusing effects estimated for radio propagation along ricochet trajectory, considering ionospheric refraction 04 p0482 A66-13860

REFRACTING TELESCOPE

High-speed aplanatic catadioptric telescope system with all optical elements having spherical surfaces only, noting refracting and reflecting telescopes 05 p0679 A66-15204

REFRACTION

S ABERRATION

S ATMOSPHERIC REFRACTION

S RADIO WAVE REFRACTION

REFRACTIVE INDEX

Diurnal and seasonal variations in refractive index of atmosphere near Earth surface based on meteorological station data in Transbalkanian region 02 p0253 A66-11275

Refractive index obtained from equation describing electromagnetic wave propagation in ionosphere 04 p0481 A66-13826

Anisotropic electron velocity distribution for magnetosphere assumed and complex

refractive indices evaluated, using cyclotron absorption explanation of whistler cut-off 05 p0631 A66-14835

Unified refractive index and dispersion equations for IR materials in high speed computer calculations 05 p0715 A66-14922

Light beams used as plasma probes, considering scattering effect of refraction 05 p0726 A66-15248

Acoustic fluctuations from transmission through water whose refractive index varies randomly in space and time related to range, from source to receiver, acoustic frequency, and scattering medium 05 p0717 A66-15731

Optical properties of polycrystalline InSb films noting index of refraction, absorption coefficient and transmission curves 05 p0741 A66-15852

Relative error of Sommerfeld formula for index of refraction close to unity 06 p0831 A66-16368

Changes in ordinary refractive index and birefringence of gallium sulfide and gallium selenide as function of wavelength for visible and near IR at low temperatures 06 p0929 A66-16940

Slab with periodically modulated refractive index, predicting short wave radiation pattern emitted 06 p0836 A66-16983

Refractive index of plasma in vicinity of hybrid ion-electron resonance determined within three-fluid model, including collisions and pressure terms 07 p1084 A66-17206

Absorption and spontaneous and stimulated emission for homogeneous isotropic nonferromagnetic Maxwellian media at rest 07 p1081 A66-18037

Pulse propagation in anisotropic randomly inhomogeneous media 07 p1082 A66-18394

Refraction index variations in vortex tube 08 p1209 A66-19423

Power loss of optical-heterodyne system with angle tracking in signal propagation through turbulent medium 08 p1185 A66-19701

Electromagnetic wave propagation in meteorology and geophysics, noting expression for refractive modulus in troposphere, considering attenuation and backscattering 09 p1343 A66-20276

Mie scattering and absorption cross sections for spherical absorbing particles as function of complex refractive index 09 p1405 A66-20512

Interferometric measurement of large indices of refraction, noting applicability and accuracy 09 p1403 A66-20516

Laser induced gas breakdown at high pressures, noting effect of plasma density on index of refraction via optical frequency resonance measurement 10 p1542 A66-21564

Directional radiation from incoherent electroluminescent diodes, noting increase in refractive index for dielectric slab model 10 p1509 A66-21581

Optical constants of thin films deposited on nonabsorbing window obtained by Kramers-Kronig method 11 p1755 A66-22871

Refraction angle of radio waves in troposphere and stratosphere, using refractive index of air 11 p1658 A66-23220

Light beam deflection due to linear temperature gradients across electro-optic modulator crystals 11 p1737 A66-23431

Radio-polarization method of investigating stresses in bodies which are opaque to visible light but transparent to SHF radio waves 13 p2194 A66-25095

Optical ray tracing to predict focusing characteristics of laser light in refractive targets, calculating heating effects in target, noting target geometry, refractive index, thickness of skin layers, etc 13 p2090 A66-25531

High refractive index at electron cyclotron harmonics from nonrelativistic plasma immersed in external magnetic field 13 p2145 A66-25728

Index of refraction of thin film coatings from transmittance and reflectivity measurements with attention to titanium and silver films 13 p2168 A66-25944

Relative error of Sommerfeld formula for index of refraction close to unity 13 p2024 A66-25956

Reflection coefficients for electromagnetic waves in variable refractive index medium

om approximate solution of linear differential equations 13 p2025 A66-26040
Chemical composition and origin of oldavites, noting densities, refractive indices, oxide content, rubidium-strontium ratio, etc 13 p2187 A66-26234
Optical system for schlieren recording, reflection mapping, shadowgraphy and interferometry achieved for laser light, used recording of refractive index 13 p2082 A66-26307
Electro-magnetoplasma-gas-dynamics (MPPG)/ equations for warm compressible electron gas drifting at constant velocity, finding equation for refractive index of plasma waves 14 p2339 A66-26862
Light reflection from dielectric films of continuously varying refractive index 14 p2356 A66-26966
Two wide-angle camera lenses, one adapted for NASA for Tiros satellite, noting freedom from astigmatism and distortion correction by choosing refractive index 14 p2291 A66-27318
Attenuation of coherent optical waves propagating in troposphere, noting molecular scattering, bending of refractive index homogeneities due to temperature gradients in air, etc 15 p2448 A66-28578
Atmospheric refraction dependence on wavelength solved numerically 15 p2483 A66-28644
Calculation of electromagnetic field within two-dimensional plasma sheath with static magnetic field, noting effect of electron-cyclotron frequency on refractive index of medium 15 p2549 A66-28707
CAT detection by radar backscatter measurement of radio refractive index profiles 15 p2532 A66-28925
Light diffraction by random fluctuation of refractive index of plasma 15 p2552 A66-29330
Ionospheric absorption effects in D and E layers, noting refraction role and effective collision frequency 15 p2493 A66-30036
Beam trapping in cadmium sulfide noting threshold, trapping length, refractive index change and Stokes radiation 16 p2716 A66-30158
HF backscattering by plane electromagnetic wave incident on perfectly conducting sphere covered with concentric layers of different materials, noting refractive index 16 p2647 A66-30224
Atmospheric refractive index variation measured by microwave refractometer 16 p2693 A66-30337
Height distributions of atmospheric refractive index variations over Japan 16 p2653 A66-30798
Effects and parameters influencing optical path length within pumping process in ruby and doped glass laser 16 p2719 A66-31443
Wave radiation of current-carrying plane of magnetoactive low density plasma layer, assuming that magnetic field is stable and normal to layer 16 p2655 A66-31545
Boundaries of optical and magneto-optical phenomena in InSbAs sub 2, discussing reflection and absorption spectrum, optical activity, double refraction, dielectric constant, etc 16 p2788 A66-31775
Complex refractive index of Earth surface and ionospheric Faraday effect measurements 17 p2873 A66-32200
Fluctuations in mean refractive index over long path through turbulent atmosphere examined, using Michelson interferometer with He-Ne laser source 17 p2948 A66-32618
Mile computations made possible by precise data experimentally determined for wavelength dependence of refractive index of graphite 18 p3233 A66-34576
Radar beam trajectory as function of refractive index lapse rate on basis of Fermat principle, assuming isotropic atmosphere with homogeneous stratification 18 p3130 A66-34719
Dielectric fiber cylindrical surface waveguide with refractive index higher than surrounding region for energy transmission at optical frequencies 19 p3302 A66-35725
Alfvén waves in bismuth for propagation along magnetic field, noting dielectric

constant variation with frequency, effect on real part of refractive index, relaxation time analysis, etc 19 p3443 A66-36006
Design principles of waveguide systems applicable to electromagnetic wave transmission by reflection and refraction 19 p3319 A66-36033
Optical constants of silver and gold in various energy regions, measuring relative refractivities of polarized light, analyzing collective motions of conduction electrons 20 p3615 A66-37283
Total cross sections for arbitrarily oriented dielectric circular cylinders used in obtaining extinction and polarization by realistically oriented interstellar particles, noting refractive index 20 p3649 A66-37325
Self-focusing and self-trapping of intense light beams in nonlinear medium examined, using approximations of geometrical optics and accounting for diffraction effects 20 p3602 A66-37372
Determination of refractive index of polyethylene terephthalate film necessary in calculations of surface shape of film concentrators 20 p3603 A66-37738
Refractive index equation derived for oblique wave propagation in compressible general magnetoplasma with arbitrary directed magnetostatic field 21 p3793 A66-39350
Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743
Reflection of waves at discontinuity in refractive index gradient 22 p3866 A66-40453
Uniqueness theorem for particular inverse problem of plane wave perpendicularly incident on long cylinder of complex refractive index 22 p3866 A66-40455
Computer ray tracing study of image-forming in eyes as affected by pupil size, refractive indices and curvatures of cornea and lens 23 p4025 A66-41149
Wave packet propagation at whistler and hydromagnetic frequencies in magnetoionic medium, noting group refractive index 23 p4041 A66-41643
Split angle, total internal reflection and Wollaston prism-digital light deflection techniques 24 p4174 A66-42815
REFRACTOMETER
Helicon wave propagation and related magnetoplasma effects in semiconductors, using microwave version of Rayleigh refractometer 01 p0026 A66-10541
REFRACTORY ALLOY
Titanium, beryllium and refractory metals properties and application of their alloys in aircraft industry 02 p0244 A66-11743
Refractory alloy corrosion, discussing columbium and tantalum base tubing alloy resistance to refluxing potassium between 1800 and 2400 degrees F 06 p0894 A66-16071
Recrystallization of molybdenum, examining effect of vanadium, titanium, hafnium and zirconium 11 p1718 A66-23321
Chemical milling of columbium reentry vehicle skin panels using powdered metallurgy, vacuum processing, refractory alloy sheet rolling and electron beam welding [ASTME PREPRINT MR66-712] 12 p1886 A66-24417
Destruction of heat resistant alloys by repeated heating and cooling, deriving formulas which are applied to thermocyclic loads under conditions of stressed state 14 p2310 A66-26790
Extrusion of refractory metal alloys at 5000 degrees F [ASTME PAPER MF66-108] 14 p2299 A66-26949
Oxidation-protection disilicide coatings effect on ductile-to-brittle transition temperature of refractory alloys at low temperature 16 p2726 A66-31459
Structural changes effect on creep resistance of heat resistant alloys 16 p2728 A66-31801
Refractory alloy machining techniques, tool materials, cutting speeds, etc 19 p3369 A66-36133
Corrosion tests on eight refractory metals and alloys in liquid lithium and cesium vapors 19 p3383 A66-36136
Refractory niobium alloy corrosion tests in

potassium liquid at 2000 to 2200 degrees F 19 p3383 A66-36137
Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures 19 p3384 A66-36143
Thermoprotective coating for high temperature tantalum alloy 19 p3384 A66-36147
Thermoprotective coating of niobium-based and other refractory alloy metal foils 19 p3384 A66-36150
Creep analysis of high temperature niobium alloys in very high vacuum 19 p3385 A66-36155
High temperature refractory alloy fabrication for microwave antennas in hypersonic glide reentry vehicles 19 p3370 A66-36158
Protective coating problems of superrefractory alloys for use in space gliders at temperatures above 1000 degrees C 23 p4081 A66-41655
Alloying principles for refractory metals based on softening mechanism, examining increased heat resistance of rhenium softened by recrystallization 23 p4082 A66-41822
Heat resistance of refractory alloys containing nickel, cobalt, tungsten, niobium, etc, and cermet, noting application in rocket engines 24 p4228 A66-43049

REFRACTORY MATERIAL

SA CARBIDE
SA CERAMICS
SA CERMET
SA GLASS
Protective coatings for extreme temperature environment discussing types, application, performance in oxidizing atmospheres, tests and industrial problems 01 p0084 A66-10090
Fractography and optical metallography analysis of fracture mode of thorium-tungsten-rhenium alloy showing ductility 01 p0085 A66-10410
Properties of spherical powders of metal carbide and boride compounds and preparation by granulating and sintering techniques 01 p0087 A66-10742
Transition from aluminum to exotic materials /Ti, Nb/ in aerospace structures, examining materials behavior and fabrication processes [SAE PAPER 650790] 01 p0088 A66-10843
Zinc selenide as highly refractory substance in dielectric mirror layers for laser resonators and interference filters 02 p0238 A66-11252
Heat resistant ceramic coating on steel produced by gas-flame spraying of refractory oxides investigated for effective heat conductivity and integral radiative capacity 03 p0443 A66-12514
IR radiation of refractory solids with radiation properties of flame-sprayed ceramic coatings, determining normal spectral emittance, integrated normal total emittance and IR intensity curves at 1300 K 03 p0386 A66-13100
Emitter materials for nuclear thermionic converters, discussing /UZr/C, fuel life and performance parameters, material compatibility, etc 05 p0713 A66-15584
Insulators from high purity oxides used in nuclear thermionic power converters, tabulating refractory materials compatibility and noting thermal expansion, electrical conductivity, etc 05 p0714 A66-15592
Performance assurance for phenolic resin refractory fabric materials used for insulation and ablative components in rocket propulsion hardware and reentry heat shields 06 p0899 A66-16287
Insulating materials, discussing impregnated refractory ceramic foams for high energy hybrid motors 06 p0899 A66-16293
Coefficients of viscous and inertial resistance relation to porosity of refractory compounds 07 p1049 A66-17902
Relation between fabrication, microstructure and properties of solid ceramics 07 p1051 A66-18294
Oxide ceramics fabrication, with particular attention to microstructure 07 p1053 A66-18296

Refractory materials properties used in nuclear fuel element 07 p1079 A66-18302

Text on modern ceramics, principles and concepts 07 p1054 A66-18495

Liquid titanium reaction with nonmetallic refractory ceramics, Ti melting behavior and electron-probe microstructural analysis 08 p1236 A66-18759

Electronic structure of refractory compounds based on X-ray study of chromium spectra 09 p1391 A66-20871

Book on refractory metals and cemented carbides /hard metals/, discussing pressing and sintering techniques, testing methods, properties under stress, etc 12 p1893 A66-23739

Apparatus for melting boron carbide inductively on water-cooled hearth, noting application to other refractory materials 13 p2088 A66-26563

Conductivity of compressed powdered refractory compounds found to be exponential function of ratio between material/compact densities 15 p2520 A66-28749

Compression and bending strength of porous materials prepared by sintering spheroidized powder refractory compounds increased by addition of cobalt chloride 15 p2520 A66-28755

Refractory oxides from alkoxides for group IVB transition and rare-earth metals applied to powders and coating of zirconia materials by thermal decomposition 16 p2730 A66-30249

Frictional properties of silicon nitride and carbide during reciprocating sliding between hemispherical stylus and polished horizontal specimen 16 p2730 A66-30253

Continuous hot pressing apparatus design, operation, production economy and results with oxidic materials and metals 16 p2709 A66-30255

Refractory ceramics for air breathing engine for Mach 7 aircraft, noting zirconia properties 16 p2790 A66-30257

Extruded tungsten composites containing fibered or reacted additives examined, noting stress rupture life, temperature effect, creep properties, density, hardness, etc 16 p2723 A66-30639

Thermal conductivity coefficient of refractory materials at temperatures to 1600 degrees C 16 p2683 A66-31674

Text on thermodynamics of refractory compounds covering thermodynamic properties of borides, carbides, nitrides and oxides of 31 elements 16 p2728 A66-31748

Aerothermochemical performance of inorganic fiber-reinforced char forming ablative material [AIAA PAPER 66-435] 17 p3035 A66-32756

Heat shield and rocket nozzle chemical reactions based on equilibrium thermodynamics of high temperature materials at gas-solid interface 18 p3260 A66-33825

Deformation and strength properties of refractory solids at temperatures up to 2000 degrees C, using indentation hardness measurements for stress-strain measurements in strength properties 18 p3254 A66-33967

Properties of spherical powders of metal carbide and boride compounds and preparation by granulating and sintering techniques 18 p3124 A66-34979

Refractory materials in thermionic converters for spacecraft use, noting manufacturing problems and performance characteristics 19 p3371 A66-36162

Monograph on synthesis and properties of refractory semiconducting materials having large forbidden bandwidth and prepared from element of groups III and V 19 p3448 A66-36731

Coefficients of viscous and inertial resistance relation to porosity of refractory compounds 21 p3752 A66-39402

Composite thermal coating consisting of refractory facing and slightly heat-conducting decomposing lining 22 p4000 A66-40818

Porous materials prepared from carbides, borides and silicides of refractory metals by oxidation reduction method, with simultaneous sintering of resulting active particles 23 p4075 A66-41828

REFRACTORY METAL

Refractory metal carbide solubility in cobalt dependent on carbon content, crystal structure and metal-carbon bonds 01 p0085 A66-10287

Alkali-ion desorption energies measured on polycrystalline refractory metals at low surface coverage by electron work function 02 p0263 A66-11483

Refractory metals for gas turbine and ramjet aircraft engines, noting niobium and tantalum alloys 02 p0245 A66-11746

High temperature behavior and properties of refractory materials such as molybdenum, tungsten, silicides, aluminides and carbides 04 p0534 A66-13372

Individual and combined effects of tungsten, molybdenum and zirconium additions on hardness of recrystallized niobium at various temperatures 05 p0699 A66-14698

Thermal emittance of cone and cylinder cavities electrically disintegrated in tungsten and molybdenum measured with disappearing-filament pyrometer 05 p0716 A66-14985

Refractory metals for use in nuclear rocket nozzles to improve cycle life [AIAA PAPER 65-602] 05 p0702 A66-15133

Work function distribution of different refractory metals by Shelton method, noting dependence of electron emission of thermionic converter 05 p0621 A66-15577

Thermodynamic validity of two cesium adsorption theories analyzed from semiclassical approach and electronegativity approach 05 p0622 A66-15581

Uranium-containing materials, refractory metals and alloys, discussing interface interaction, thermionic properties and parameters of vacuum electron emission stability 05 p0714 A66-15589

Thermochemical deposition of refractory metals, alloys and compounds, discussing tungsten, rhenium and molybdenum impurity, grain orientation and application to thermionic devices 05 p0622 A66-15591

Dilute tungsten rhenium alloys, determining ductility parameters, fabrication, tensile properties and creep behavior 06 p0894 A66-16070

Processing, testing and application of refractory metals to various high temperature environments 06 p0895 A66-16500

Oxidation-resistant ceramic coatings for tungsten, tantalum, molybdenum and niobium 07 p1051 A66-18300

Refractory metal disks as mounts for silicon wafers in high-power semiconductors 08 p1190 A66-18871

Surface phenomena on interface between liquid metals and various refractory compounds, determining surface energy and angle of contact 08 p1238 A66-18898

Low temperature chemical vapor-plating process for obtaining pyrolytic titanium diboride filaments for ablative composites 08 p1244 A66-19140

Unilateral conductivity of thin high-density film of refractory metal oxides, discussing formation of p-i-n junctions 08 p1276 A66-19568

High temperature materials for hypersonic air-breathing engines, noting usefulness of coated refractory metals 09 p1435 A66-20670

Machinability of refractory metals, examining two molybdenum alloys, graphing relation between tool life and cutting speed 10 p1545 A66-21222

Oxidation resistance enhancement in tungsten base alloys by addition of refractory metal oxide particles 10 p1547 A66-21783

Spectral normal emittances of molybdenum, tantalum and tungsten single crystals [AIAA PAPER 65-134] 10 p1581 A66-21796

Cesium ion emission patterns obtained from rear-faced porous refractory metals, using thermal emission microscope [AIAA PAPER 66-220] 11 p1746 A66-23086

Refractory properties and resistance to thermal shock of sintered tantalum carbide impregnated with copper or silver at high temperature [ONERA TP 323] 11 p1718 A66-23201

Interrelation between relaxation center in

tungsten and molybdenum and high temperature internal friction background of spectrum 11 p1719 A66-23386

Work function for thermionic emission of TaC and ZrC refractory metal carbides in vacuum and in cesium vapor 12 p1922 A66-24220

Refractory metals and metal alloys analyzed regarding electron work function and threshold temperature for surface ionization in all-metal guard ring diode with directly heated wire [AIAA PAPER 66-223] 13 p2129 A66-25171

Cryogenic resistance spot welding of refractory metals and conventional aerospace materials [ASTME PAPER AD66-111] 14 p2299 A66-26950

X-ray diffuse scattering analysis of peculiarities of atomic structure of solid solution of Ta-Nb 15 p2520 A66-28559

Extremely high thermal shock resistance in group IVA carbides of carbide-graphite composites fabricated, using vacuum arc melting and casting techniques 15 p2524 A66-29287

Refractory metal tubing inspection using ultrasonic and pulsed-eddy-current methods in conjunction with X radiography 15 p2509 A66-29317

Silicon carbide coatings on molybdenum and tungsten by pyrolysis of methyl trichlorosilane, discussing oxidation tests and spalling due to thermal expansion mismatch 16 p2729 A66-30248

Thermal-expansion characteristics of several refractory metals to 2500 degrees C, noting optical measurement in helium 16 p2726 A66-31463

Sintering of porous products of refractory compounds 16 p2728 A66-31673

High temperature, electrically insulating refractory tubes of boron carbonitride for protection of metal thermocouples 17 p2944 A66-33144

Rhenium effect on interface energies of Cr, Mo and W, noting liquid surface tension, solid surface energy and grain-boundary grooving 18 p3121 A66-33726

Grain boundary grooving in Cr, Mo and W, noting formation mechanism, effect of carbon on activation energy for surface diffusion, etc 18 p3121 A66-33727

Cesium ion source evolved from surface ionization on porous refractory metal ionizers 18 p3138 A66-34240

High temperature combustion of tantalum and molybdenum in oxygen gas compared with experiments in carbon dioxide, water, argon and mixtures of these gases 18 p3264 A66-34426

Refractory metals and alloys - Conference, Los Angeles, December 1963 19 p3364 A66-36104

Applicability of refractory metals to solid propellant rockets, lifting and guidance structure for glide reentry vehicles and liquid metal containment for nuclear space power systems 19 p3382 A66-36105

Carbon content effect on brittle-to-ductile transition temperatures of molybdenum studied in search for high toughness propulsion system material 19 p3382 A66-36106

Shape rolling applicability to refractory metals, examining effects of lubrication, pass design and temperature on reductions that can be taken 19 p3366 A66-36109

Refractory metal forming processes including brake, roll, open and closed die forming, warm and hot forging, swaging, deep drawing, ironing, blanking and shearing 19 p3366 A66-36110

Fabrication process for turning cast Cb-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111

Refractory metal brazing alloys developed for producing brazed refractory metal sandwich panels 19 p3367 A66-36113

Exothermic brazing of refractory metals, tabulating braze filler metals that formed acceptable joints with molybdenum, tungsten and TZM alloy 19 p3367 A66-36117

Fabrication techniques for preparation of ion emitter modules requiring high-temperature leak-free bond between porous tungsten ionizer and refractory metal

plenum chamber 19 p3368 A66-36118
 Brazing and cladding research on
 refractory metals offers dependability and
 continuity of protective layers and abrasion
 resistance in extreme
 environments 19 p3368 A66-36119
 Structural defects in infiltrated tungsten
 matrices related to process
 procedures 19 p3382 A66-36122
 Extrusion spinning method for fabricating
 refractory metals such as tungsten provides
 maximum material yield compared to normal
 tube extrusion processes 19 p3369 A66-36129
 Oxygen role in oxidation/reduction
 reaction and polyoxide formation
 mechanisms associated with refractory metal
 corrosion by liquid alkali
 metals 19 p3383 A66-36135
 Ephemeral-corrosion tests of refractory
 metals in molten lithium between 2000 and
 3000 degrees F 19 p3383 A66-36138
 Oxidation resistant pack cementation
 coatings for refractory metal complex
 structures 19 p3370 A66-36140
 Chemical vapor deposition of
 thermoprotective coatings on refractory
 metal structures 19 p3370 A66-36141
 Plasma arc metal spraying techniques for
 deposition of thermo/oxidation protective
 coatings on refractory
 metals 19 p3370 A66-36144
 Oxidation-resistant coatings for high
 temperature tungsten 19 p3384 A66-36148
 Tensile properties of protectively coated
 refractory metals for structural components
 in high temperature oxidizing
 environments 19 p3385 A66-36151
 Thermally induced circumferential-
 longitudinal cracking of refractory metal
 inserts in solid propellant rocket engine
 nozzles 19 p3385 A66-36153
 Creep-rupture strength and metallurgical
 properties of refractory Mo at 4000 degrees
 F 19 p3385 A66-36156
 Nozzle cooling and infiltrant loss from
 infiltrated refractory metal composites at
 high gas propellant
 temperature 19 p3385 A66-36157
 Refractory metals use in spacecraft strain-
 measurement instrumentation
 19 p3371 A66-36159
 Refractory metal honeycomb structure
 fabrication for heat shield panels, using D-36
 columbium alloys 19 p3371 A66-36161
 Metallurgical and design characteristics of
 dispersion strengthened metals as function
 of temperature
 [ASME PAPER 66-MD-88] 21 p3750 A66-38505
 Electrochemical machining of refractory
 metals and complex
 shape 21 p3744 A66-39132
 Stress rupture properties of tungsten wire
 at high temperatures, noting effect of
 primary recrystallization on microhardness,
 ductility and grain size 21 p3751 A66-39196
 Refractory metals, noting precipitation and
 dispersion hardening, oxygen, nitrogen and
 hydrogen effect, machining, coating,
 etc 21 p3752 A66-39240
 Strength of joints made in refractory
 metals using brazing, welding or diffusion
 bonding, noting role of
 coating 22 p3925 A66-40265
 Phase and chemical compositions of
 structural components forming in iron-
 nickel-chromium alloys with aluminum and
 titanium content 22 p3936 A66-40787
 Structural materials for oxidizing
 environments at high temperature analyzed
 including nickel, cobalt and chromium
 alloys 23 p4080 A66-41125
 X-ray diffuse scattering analysis of
 peculiarities of atomic structure of solid
 solution of Ta-Nb 23 p4080 A66-41280
 Ultrasonic activation effect on sintering
 and hot extrusion processes and compaction
 products made from metallic
 powders 23 p4075 A66-41827
REFRIGERATING EQUIPMENT
 Combined Peltier-Ettingshausen device
 evaluated for cryogenic refrigeration to 70
 degrees K 02 p0272 A66-11490
 Practical Philips cycle for low temperature
 refrigeration, noting equal coefficient of
 performance to that of ideal Carnot cycle
 under isothermal
 conditions 09 p1472 A66-20879

REFRIGERATION
SA COOLING SYSTEM
SA CRYOGENICS
 Thermoelectric and thermomagnetic
 properties of semiconductors applied to
 refrigeration, discussing Peltier and
 Ettingshausen effects 21 p3798 A66-38767
REFRIGERATOR
 Low temperature techniques in satellite
 communications systems, noting maser,
 cooled parametric amplifier and trend
 toward closed-cycle
 refrigerators 13 p2042 A66-26104
REFUELING
SA AIR TO AIR REFUELING
 Moon, Martian satellites and minor
 planetoids for possible use in refueling
 space ships by generating propellants from
 natural chemical planetary
 resources 04 p0577 A66-13577
 USAF CH-3C helicopter V/STOL in flight
 refueling, discussing requirements, system
 characteristics and flight
 tests 17 p2844 A66-32724
REGENERATION
SA BIOREGENERATION
 Monolithic integrated circuits regenerative
 interaction between substrate parasitics and
 intended semiconductor circuit elements
 exposed to ionizing
 radiation 05 p0734 A66-14852
 Regenerative separation and recovery of
 carbon dioxide from manned atmospheres,
 using metallic oxides
 [AICE PREPRINT 26D] 10 p1491 A66-21191
 Regenerative separation and recovery of
 carbon dioxide from manned atmospheres,
 using metallic oxides
 [AICE PREPRINT 26D] 17 p2868 A66-32681
 Amplification processes in parametrically
 regenerated circuit with simultaneous
 complex variation of capacitance and
 attenuation 23 p4038 A66-41517
REGENERATIVE COOLING
 Design and development of high energy
 standard engine for ELDO-B carrier
 rocket 02 p0279 A66-11669
REGENERATIVE CYCLE
 Regenerative life support system for four-
 man crew on long duration tests, noting
 biological constraint
 parameters 17 p2862 A66-32138
 Carbon dioxide control for manned
 spacecraft, discussing regenerative methods
 for eliminating system weight dependence
 on mission duration 17 p2863 A66-32141
 Regenerative sorbents for removal of
 carbon dioxide with minimal drying of
 process air stream 17 p2865 A66-32186
 Two-gas regenerative life support system
 for pressure, thermal and humidity control,
 water reclamation, atmospheric circulation,
 carbon dioxide and trace contaminant
 removal
 [AIAA PAPER 65-501] 20 p3510 A66-38172
 Thermally-Regenerative Alloy Cell /TRAC/
 system using sodium amalgam reaction with
 mercury as closed cycle thermal-electric
 conversion system 23 p4023 A66-41766
 Physicochemical methods of creating life
 support systems in spacecraft
 cabins 24 p4169 A66-43143
REGENERATIVE FUEL CELL
 Commercial fuel cells, noting biochemical,
 regenerative and low temperature carbon
 monoxide fuel cell 07 p0996 A66-18476
REGENERATOR
 Superregenerator used in construction of
 trigger devices 08 p1199 A66-19768
 Neodymium-doped yttrium-aluminum garnet
 crystal laser oscillator as regenerative
 amplifier of noise 13 p2103 A66-26212
 CERCOR glass-ceramic axial flow rotary
 regenerator as inexpensive component for
 gas turbine regeneration
 [ASME PAPER 66-GT/107] 14 p2301 A66-27004
 Unidirectional regenerator problem
 analytically solved, presenting local
 effectiveness graphs 18 p3261 A66-34361
REGGE PARAMETER
 Generalized Cauchy representations and
 resonance phenomena 16 p2747 A66-30637
REGGE POLE
 Strong interactions and cosmic rays,
 discussing Regge poles, one meson
 approximation and multiperipheral model
 theory of elastic and quasi-elastic

interactions 07 p1112 A66-17535
 Elementary particle theory, interactions at
 accelerator energies, bootstrap mechanism
 for generating bound states and resonances
 and Regge pole concept applied to high
 energy scattering 15 p2545 A66-29548
 Peripheral inelastic encounters, complex
 orbital momenta and cosmic ray analyses of
 interactions, noting hydrodynamical model
 and Regge pole method 15 p2585 A66-29562
REGION
S FRESNEL REGION
S M-REGION
S POLAR REGION
S STAGNATION REGION
REGRESSION ANALYSIS
SA BIOMETRICS
SA VARIANCE
 Hybrid fuel regression rate, discussing
 oxydizer flow rate and burner pressure
 interdependence
 [AIAA PAPER 66-113] 06 p0941 A66-16407
 Experimental analysis of regression rates
 in hybrid rocket engines for both chemical
 kinetics and gas dynamics
 domains 13 p2173 A66-26369
 Hybrid rocket combustion regression rate
 and turbulent boundary layer mass
 transfer 14 p2412 A66-27449
 High resolution density data from radar
 observations of low altitude, polar orbiting
 satellites reveal longitudinal and
 geomagnetic variation, noting regression
 analysis 15 p2497 A66-30085
 Regression equation technique for
 objective wind forecasts at 300
 mb 17 p2949 A66-32793
 Qualitative analytic function-test
 maintainability prediction equations from
 regression analyses on
 hardware 20 p3569 A66-37922
REGRESSION COEFFICIENT
 Surface degradation-vaporization
 characteristics of porous polystyrene under
 intense surface heating in inert and reactive
 atmosphere, measuring regression rate
 [AIAA PAPER 65-58] 15 p2616 A66-29278
 Regression rates of metalized hybrid fuel
 systems applied to lithium hydride butyl
 rubber-fluorine-oxygen system, oxidizer
 flow, etc 15 p2569 A66-29289
 Engineering method to determine
 combined effects of entry and combustion
 heating on total char regression of ablative
 nozzle as function of distance from exit
 plane
 [ASME PAPER 66-MD-72] 21 p3806 A66-38500
 Simultaneous nonlinear estimation of
 parameter vector via iterative procedure for
 known and unknown covariance
 matrix 22 p3939 A66-40000
REGULATION
SA HEAT REGULATION
SA SPEED REGULATION
 Application of regulation factor in
 designing temperature-compensated Zener
 diode references 20 p3534 A66-38300
REGULATOR
SA FLOW REGULATOR
SA FREQUENCY REGULATOR
SA PRESSURE REGULATOR
SA VOLTAGE REGULATOR
 Optimization of linear servosystem
 comprising ideal proportional, integral and
 differential control regulator and order
 system 03 p0350 A66-13095
 Optimal fixed time constant-energy
 regulator for linear plants with
 perturbations operating within bounding
 hypersurface 03 p0350 A66-13176
 Computer program and technique for
 adaptive digital controller that learns
 switching regions for optimal control of
 decision-making regulator
 system 04 p0490 A66-13621
 Optimal feedback control and bounding
 hypersurface of allowable perturbations in
 linear plant regulator, noting multiplier
 equation 08 p1200 A66-19543
 Sensitivity design of systems with optimal
 controller structures, using game
 theory 13 p2050 A66-26061
 Letov problem and analytical construction
 of optimal controller from motion equations
 of linear servosystem 15 p2469 A66-29045
 Time-fuel optimal regulator for third-order
 model of reaction jet-controlled spacecraft

with time delay 19 p3338 A66-36743
Existence of inflection points in cost vs terminal time curve for linear minimum energy regulator 19 p3339 A66-36745
Numerical solution of BVP for optimal control parameters in trajectory analysis 23 p4051 A66-41617

REINER-RIVLIN FLUID

Shear stress, velocity profiles, MHD and cross-viscous effects on forced non-Newtonian flow of Reiner-Rivlin liquid against rotating disk 21 p3795 A66-39576
Reynolds equations for two-dimensional uniform turbulent shear flow of Reiner-Rivlin fluid suggest drag reduction 22 p3896 A66-39671

REINFORCED MATERIAL

Reliability and reproducibility of SIL-TEMP 84 fabric used as reinforced filler in ablative components and high temperature insulating material in rockets and missiles 01 p0089 A66-10089
Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement of insulative char 02 p0294 A66-11639
Structural composite materials component development program emphasizing design and fabrication [AIAA PAPER 65-760] 03 p0386 A66-13057
Kinetic studies of high temperature carbon-silica reactions in charred silica-reinforced phenolic resins [CI PAPER WSCI-65-25] 05 p0788 A66-15149
Carbon and graphite textiles use as ablative reinforcements for high temperature phenolic resin 06 p0899 A66-16285
Economic process for vapor phase formation of refractory fibers and whiskers using hydrogen, carbon dioxide, carbon monoxide and chlorine source gases [AICE PREPRINT 18A] 10 p1548 A66-21183
Static and high strain rate tensile behavior of epoxy, polyester and urethane resins reinforced with 181-S, 184-E and woven roving glass materials and nylon 13 p2114 A66-26111
Tensile strength of fiber reinforced metal containing aligned fibers at angle to tensile axis 14 p2316 A66-27785
Longitudinal stiffeners eccentricity /one-sidedness/ effect on buckling strength of axially compressed cylinders 14 p2404 A66-27989
Free vibrations and stability of rectangular orthotropic plates reinforced by network of ribs 18 p3252 A66-33705
Transcendental equation describing discrete reinforcing network effect on vibrations of reinforced cylindrical shell 18 p3252 A66-33708
Carbon/graphite material /carbitex/, physical, thermal, mechanical and chemical properties 18 p3125 A66-34618
Factors affecting strength of whisker reinforced metals, noting characteristics [ASME PAPER 66-MD-81] 21 p3750 A66-38504
Macroscopic viscoelastic properties of fiber reinforced materials analyzed on basis of composite cylinder assemblage model and correspondence principle 21 p3827 A66-38697
Mechanical properties of metallic and ceramic fibers in metallic matrices and refractory fibers in ceramic matrices 21 p3751 A66-39231
Strain-time curve of silver containing aligned tungsten wires at high temperatures, noting reduction of creep rate of matrix 22 p3935 A66-40200
Structural composite materials component development program emphasizing design and fabrication [AIAA PAPER 65-760] 23 p4083 A66-40978
Fatigue behavior of aluminum reinforced with stainless steel wires, considering effects of fiber volume fraction and interfacial bond 23 p4081 A66-41661
Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement of insulative char 24 p4283 A66-42773
Fiber geometry effect on shear stress distribution in composite materials 24 p4292 A66-42861

REINFORCED PLASTIC

Glass, quartz, mineral and ceramic fibers woven into fabric provide thermal insulation, reinforced plastic, filtration,

friction materials and electrical insulation 01 p0091 A66-10356
Lift jet installation noting low-cost lightweight RB 162 second-generation using extensively glass reinforced plastics [AIAA PAPER 65-798] 03 p0319 A66-12563
Engineering exploitation of glass fiber reinforced plastics for aircraft structures [AIAA PAPER 65-762] 03 p0386 A66-12590
Laminar boundary layer control wind tunnel results, using perforated plastic reinforced by glass fiber 04 p0453 A66-13513
Aerodynamically conventional low-wing monoplane design for high-performance light aircraft stressed to 8g limit loads, utilizing fiberglass reinforced plastic primary structure 04 p0588 A66-13633
Experimental astronomical dome of glass-fiber-reinforced plastic distinguished by lightness, stability, smooth and silent operation and ease of assembly 05 p0660 A66-15219
Predicting thermal conductivity of filled and reinforced plastics from individual component values [ASME PAPER 65-WA/HT-4] 05 p0791 A66-15655

Fabrication characteristics of ablative plastics prepreg reinforced tape for construction of large rocket nozzles 06 p0885 A66-16289
Optimization of reinforced plastics in ablative rocket nozzle and reentry body application, considering compression molding 06 p0885 A66-16290
Strength of reinforced plastics undergoing rapid heating measured by IR pyrometry 06 p0901 A66-16303
Manufacturing glass-fiber-reinforced plastic container for high pressure helium gas in European launcher rockets 06 p0889 A66-17076
Optimum reinforced composite strength of glass-reinforced plastics depends on filament geometry factors such as filament content, orientation and dimensions [AIAA PAPER 66-142] 06 p0901 A66-17081
Regularity of thermoviscoelastic deformation in polymer binders for glass-fiber-reinforced plastics 08 p1313 A66-19441
Reinforcement of plastics and metals by silicon nitride whiskers limited to temperatures below 900 degrees C [AICE PREPRINT 18D] 10 p1548 A66-21184
Suitability of beryllium reinforced plastics and various light metals for application in manned space stations 10 p1545 A66-21216
Approximate solution of ablation of reinforced plastic for heat protection 10 p1621 A66-21500
Glass fiber reinforcement for plastics, determining tensile strength of fibers, glass structure, elasticity modulus improvement via annealing, etc 11 p1720 A66-23126
Elastomechanical properties of glass fibers and resins in order to determine optimum materials for reinforced glass fiber structures [ONERA TP 322] 11 p1721 A66-23200
Instantaneous strength, rigidity and strain characteristics of reinforced plastics surface-heated on one side 12 p1899 A66-24041
Evaluation of polyimide impregnated resins for application as heat shield binder when combined with silica and carbon fibers, noting thermostability characteristics 13 p2112 A66-25309
Lift jet installation, noting low-cost lightweight RB 162 second-generation, using extensively glass reinforced plastics [AIAA PAPER 65-798] 13 p2172 A66-25563
Stress concentration in glass-fiber reinforced plastic with spatial irregularities 13 p2115 A66-26406
Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber-reinforced plastics 13 p2205 A66-26451
Reinforced plastics measured for thermal conductivity, specific heat and thermal expansion at cryogenic temperature [AIAA PAPER 65-423] 14 p2318 A66-27891
Viscoelasticity and tensile stress-strain distribution in fiber-reinforced plastics 15 p2524 A66-29340
Stability analysis of elastic axially compressed orthotropic glass-fiber-reinforced-plastic cylindrical shell with

linear heredity properties 15 p2611 A66-29341
Models for producing glass-fiber-reinforced plastic structural components 17 p2929 A66-31968
Glass reinforced plastics for helicopter primary structures 18 p3124 A66-33696
Stress concentration factor at circular and elliptic holes in glass-fiber-reinforced plastic plate subject to elongation at angle to orientation direction 18 p3251 A66-33702
Burst hoop test and new ISAS ring test methods for rapid evaluation of hoop strength of filament-wound fiberglass-reinforced plastic cylindrical specimens 19 p3472 A66-35353
Creep testing of glass fiber reinforced thin plastic plates and beams under torsion and bending 19 p3473 A66-35756
Reinforced plastic materials evaluated as potential low temperature structural insulators 20 p3676 A66-37084
Cryogenic temperature effects on mechanical properties of high strength glass-reinforced plastic resins 20 p3587 A66-37096
Detail parts production out of Flomat structural material composed of polyester resin and woven glass reinforcement for BAC 111 20 p3562 A66-37424
Equations for analysis of prestressed cylindrical shells made of fiberglass-reinforced plastics with hollow fibers longitudinally and transversely wound 22 p3990 A66-40148
Joint designs for reinforced plastic structures, emphasizing unidirectional mechanical properties 22 p3927 A66-40282
Penetration resistance of fiberglass-reinforced plastics against small-caliber projectiles noting relations between energy loss, stopping power and plate thickness 22 p3938 A66-40433
Aerodynamically conventional low wing monoplane design for high performance light aircraft stressed to 8g limit loads, utilizing fiberglass reinforced plastic primary structure [AIAA PAPER 65-771] 23 p4015 A66-40980
High temperature structural properties of glass fabric-reinforced polybenzimidazole, polyimide and phenolic laminates for aerospace application 23 p4083 A66-41389
Temperature and heat resistant properties of fiberglass-reinforced plastic nose cone in supersonic flight 23 p4132 A66-41421
Wound glass-fiber material used in reinforced plastic construction for production of solid fuel heavy missiles 23 p4074 A66-41653
Laminated reinforced plastics used in construction of jettisonable fuel tank, aircraft equipment components, radomes, missiles and satellite parts 23 p4074 A66-41654
Photoelastic stress-concentration measurements in variously-reinforced circularly shaped cut-outs under uniaxial tension, three-dimensional effects and validity of neglecting bending stiffness 23 p4141 A66-41949

REINFORCED PLATE

Effect of rivet-attached stringer on stress concentrations in thin elastic sheet with circular cut-out, expressing results as correction factor 12 p1962 A66-23993
Stress distribution in plate with infinite number of equally spaced square reinforced holes situated along axis of plate 15 p2612 A66-29429
Free vibrations of two flat plates fixed at right angle with cross-sectional distortion 18 p3251 A66-33678
Two-dimensional elastic equilibrium problems in reinforced plates with holes and bending theory problems in reinforced thin plates 23 p4137 A66-41003
Reinforced semiinfinite under concentrated loads, noting flange stress magnitude and distribution 24 p4285 A66-42144
Slenderness ratio and compressive buckling stress in plates with stiffeners oriented parallel to direction of applied loads 24 p4289 A66-42286
Stress concentration near circular cut in unbounded plane plate and reinforced by thin walled infinitely long cylindrical shell under tension applied at infinity 24 p4290 A66-42445

REINFORCED SHELL

Cyclic edge loading effect on circular reinforced cylindrical shells 04 p0589 A66-14147
[Stiffened cylinder buckling behavior under compressive load, noting analysis methods AIAA PAPER 65-79] 05 p0781 A66-15787
[Strain energy method used to examine stability and supercritical strains of rib-reinforced cylindrical shells under axial compression] 08 p1305 A66-18595
[Structural optimization of axially compressed cylinders stiffened externally with rings and/or stringers, noting effect of wall thickness on structural weight] 08 p1306 A66-18806
[Equilibrium equations in displacements for circular cylindrical shells reinforced by longitudinal and transverse ribs under arbitrary surface and edge loads] 08 p1312 A66-19434
Buckling loads of reinforced cylindrical shells, discussing size and placement of stiffening members 10 p1614 A66-21391
Frequency spectrum of natural oscillations of cylindrical shell reinforced by longitudinal ribs 11 p1779 A66-22226
Initial deflection effect on stability of rib-reinforced cylindrical shells under axial compression 12 p1967 A66-24109
Boundary conditions in bending theory of reinforced shells, noting decreased stress concentration obtained by reinforcement ring 13 p2204 A66-26431
Torsion of reinforced cylindrical shell with long rectangular cutout 16 p2818 A66-31057
[Equilibrium equations for closed circular cylindrical rib-reinforced shells under arbitrary loading] 16 p2819 A66-31138
Laminated thin shell theory applied to calculation of elastic coefficients of fiber reinforced shells 16 p2822 A66-31499
[AIAA PAPER 66-526] Stressed state in shells near curvilinear orifices reinforced with thin elastic rings 16 p2822 A66-31623
Axisymmetric deformation of cylindrical shell consisting of many layers of glass fabric connected by polymer mass 16 p2823 A66-31626
Prestressing effect on strength of glass fiber reinforced metal shells 17 p2939 A66-32048
Reinforced cylindrical shell stability under axial compressive force, using linear and quasi-linear formulation 22 p3990 A66-40146
Shell stability theory of current interest, noting shell with elastic filler and internal pressure 23 p4135 A66-40994

REINFORCEMENT

SA METAL REINFORCEMENT

Acceleration effect on food reinforced DRL and FR schedules 03 p0325 A66-13175

REINFORCEMENT RING

Stress-strain state of spherical shell with circular reinforcing rings on hole rims 08 p1304 A66-18592
Uniqueness theorem for problems of reinforcing rib on plane sound wave reflected from thin plate 08 p1257 A66-19758
Elastic general instability collapse pressure of ring-reinforced circular cylindrical shell subjected to uniform external pressure 10 p1613 A66-21318
Elastic behavior of ring reinforced oval cylinder subjected to uniform hydrostatic pressure 10 p1617 A66-21787
Bending of cylindrical shell clamped at one end and reinforced by elastic ring at free end, with vertical forces uniformly distributed acting over ring 12 p1964 A66-24044
Stress-strain state near ring reinforced hole in spherical shell under internal load 13 p2201 A66-26407
Boundary conditions in bending theory of reinforced shells, noting decreased stress concentration obtained by reinforcement ring 13 p2204 A66-26431
Elimination of stress concentrations at holes in plates, noting selection of compensating reinforcement ring 13 p2204 A66-26434
Stress distribution in anisotropic plate with equally spaced elliptic holes reinforced by rigid rings 15 p2612 A66-29430
Stiffener eccentricity effect on cylindrical shell buckling under torsion, noting rings

and stringers

Plane contact problem for ring reinforcing junction of cylindrical and spherical shell, determining forces and displacement in ring 20 p3669 A66-37667

REINFORCING FIBER

Unidirectional solidified eutectic alloys as reinforced composites 05 p0700 A66-14811
Strength of fiber reinforced metals, examining fracture mode 05 p0700 A66-14813
Elastic modulus and ultimate tensile strength of fibers and fiber composites 05 p0705 A66-14814
Stress-strain state of axisymmetrically heated orthotropic glass-fiber reinforced spherical base with circular hole 08 p1306 A66-18603
Model approximation method for induced elastic and thermal characteristics of materials reinforced by circular cylindrical fibers 11 p1720 A66-22231
Reinforcement with whiskers of high temperature metals such as nickel, cobalt and nickel-chrome alloys 12 p1896 A66-24467
Role of discontinuous fibers/whiskers/ in forming composites and how reinforcing parameters and processing vary from those used in continuous fibers systems, noting differences between boron and fiberglass whisker characteristics 13 p2113 A66-25310
High temperature structural properties of polybenzimidazole, polyimide and phenolic laminates under different loading conditions 13 p2113 A66-25311
Tensile strength of fiber reinforced metal containing aligned fibers at angle to tensile axis 14 p2316 A66-27785
Resin fiberglass sandwich materials for reinforcement of plastic laminated space structures 14 p2402 A66-27876
Rupture strength increase in tungsten and molybdenum chopped wires silicide coated by pack diffusion and incorporated in mullite matrix by vacuum hot pressing [ACS PAPER 7-C-65F] 16 p2723 A66-30949
Prestressing effect on strength of glass fiber reinforced metal shells 17 p2939 A66-32048
Aerothermochemical performance of inorganic fiber-reinforced char forming ablative material [AIAA PAPER 66-435] 17 p3035 A66-32756
Thermorheological equation of state derived for fiber-reinforced polymers indicating dependence of elongation or contraction on linear expansion coefficients 18 p3125 A66-33711
Ceramic fiber reinforcement of steel, aluminum, nickel and titanium alloys 21 p3752 A66-39242
Whisker reinforcement of metals and effects on linear elastic stress-strain relations 21 p3752 A66-39367
Approximation of elastic constants of unidirectional fiber reinforced composite material from constituent material properties, including longitudinal modulus, transverse modulus and Poisson ratio 22 p3993 A66-40342
Fiber composites construction from infiltrated powder 23 p4080 A66-41068

REISSNER EQUATION

Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-26] 04 p0593 A66-14226
Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses in isotropic sandwich shells of revolution [AIAA PAPER 66-528] 16 p2814 A66-30611
Dynamic characteristics of built-up plates analyzed with modified Reissner principle, obtaining natural frequencies and mode shapes 17 p3022 A66-32011
Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-26] 18 p3248 A66-33581
Mathematical demonstration that deflection of sandwich plate can be obtained from Reissner theory of plates if deflection function is known 24 p4286 A66-42159

RELATION

S STRESS-STRAIN-TIME RELATION

RELATIVISTIC EFFECT

Effect of relativistic interaction terms, mass velocity, Darwin and spin-orbit coupling upon electronic levels of covalent-bond compound semiconductors BN, SiC, AlP and GaAs 04 p0561 A66-13725
Doppler effect discussing relativistic form, transmission in dispersive media, broadening of spectral lines, black body radiation, rocket and satellite tracking, navigation and application 04 p0546 A66-14383
Quantum statistical electromagnetic wave propagation and relativistic damping effects in uniformly magnetized electron-positron gas 08 p1187 A66-19809
Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24889
Total and differential scattering cross section for slow electron calculation, using nonrelativistic quantum mechanics, shown to be erroneous 16 p2751 A66-30172
Relativistic vs nonrelativistic scattering of slow electrons by neutral heavy atoms 18 p3137 A66-33668
Motion equation for relativistic rocket in instantaneous rest frame 18 p3237 A66-35031
Nonlinear equations of traveling wave tube solved approximately, taking account of relativistic effects 20 p3533 A66-38000
Ideal relativistic degenerate gas in white dwarf star interiors, discussing state equations, thermodynamic relations, electron-ion gas mixtures, etc 21 p3775 A66-38823
Relativistic expansion effect on observable properties and age of radio sources 21 p3813 A66-39209
Radio wave propagation in simple plasma in presence of solar gravitational field, noting coronal and relativistic effects 21 p3771 A66-39270
Time contraction physically explained for objects moving with velocities significant with respect to velocity of light 21 p3817 A66-39600
Relativistic effect of atomic clocks, noting error and magnitude increase with experiment duration 22 p3948 A66-40476
Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 23 p4090 A66-41096

RELATIVISTIC PARTICLE

SA HAMILTON-JACOBI EQUATION

Plasma diagnostics by relativistic electron beam consisting of separate electron clusters emitting ultrashort electromagnetic waves 03 p0396 A66-12291
Plasma clouds, relativistic cosmic ray and subcosmic ray particle emission associated with solar flares 03 p0421 A66-12845
Relativistic electron precipitation into mesosphere at subauroral latitudes and observations of solar proton and absorption event 05 p0747 A66-14785
Amplitude and phase of anharmonic oscillator, using relativistic Schroedinger equation in magnetic field 05 p0695 A66-14906
Synchrotron radiation from primary cosmic ray, describing near field produced by relativistic single charge moving in circle in medium of constant refractive index 05 p0749 A66-15053
Dynamics and radiation of expanding cloud containing relativistic particles and magnetic field, approximating extended radio source 05 p0762 A66-15277
Galaxy M82, analyzing continuous optical magnetobremssstrahlung and relativistic electrons 05 p0752 A66-15380
Relativistic perturbed oscillator, solving problem via canonical transformation 07 p1080 A66-17498
Compton process argument for quasar relative nearness to our Galaxy and contrast between Compton and synchrotron radiation scattering effects 12 p1950 A66-24389
Pion emission in backward hemisphere in laboratory system of cosmic ray jets 13 p2088 A66-26576
Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2336 A66-28275
Oscillations of plasma composed of ions at rest, and relativistic velocity electrons

moving along external magnetic field analyzed in linear approximation 16 p2756 A66-30097

Fragmentation probabilities, charge spectrum and interaction mean free paths of relativistic heavy nuclei in primary cosmic radiation investigated in stack of nuclear emulsions 16 p2795 A66-31010

Interstellar plasma wave damping by relativistic suprathermal particles, noting magnetosonic and Alfvén waves 17 p2996 A66-31915

Metagalactic existence of type of hypothetical particles representing stable closed Einstein microcosms 18 p3233 A66-34547

Cerenkov counter using sulfur hexafluoride gas as radiator developed for study of isotopic composition of helium nuclei in primary cosmic radiation 18 p3193 A66-34853

Energy losses of relativistic muons in electromagnetic interactions, noting influence of atomic electrons on bremsstrahlung 18 p3222 A66-35208

Synchrotron radiation of relativistic electrons in magnetic field of dipole 19 p3455 A66-35255

Astron facility experiments on injection of very intense pulses of relativistic electrons into cylindrical azimuthally symmetric magnetic trap 19 p3423 A66-36551

Electron injection and E-layer buildup in Astron device theoretically studied by one-dimensional model, using Green functions for self-electric and self-magnetic fields 19 p3423 A66-36552

Plasma with relativistic electrons in magnetic mirror trap, discussing stability and fast pulsed heating of ions 19 p3423 A66-36553

Synchrotron theory to calculate energy content of radio sources as function of relativistic electrons and magnetic flux 20 p3645 A66-36961

Nonrelativistic equations of bulk motion of relativistic /cosmic ray/ gas derived by taking moments of collisionless Boltzmann equation 20 p3649 A66-37327

Pitch angle diffusion perturbing relativistic electrons in Van Allen zones and violating adiabatic invariants of electron motion, using Fokker-Planck equation 20 p3641 A66-38328

Synchrotron radiation measurements near magnetic equator, noting radio spectrum radiation due to injection of relativistic electrons into trapped orbits of geomagnetic field 20 p3644 A66-38347

Relativistic electron production by cosmic radiation in lower ionosphere 20 p3645 A66-38437

Relativistic electron layer formation by injecting electrons into cylindrical region of Astron, using difference methods in integrating Vlasov-Maxwell equations 21 p3793 A66-39470

Relativistic-electron diffusion wave in outer radiation belt recorded by device mounted on Cosmos XLI satellite in high geomagnetic latitudes 22 p3974 A66-40756

Galactic radio sources noting disk model brightness distribution, relativistic particle energies, continuous particle acceleration and ratio between proton and electrical component of cosmic radiation 22 p3985 A66-40952

Drift approximation of motion equations for relativistic charged particle in electromagnetic field, adiabatic trap, HF magnetic field, etc 24 p4241 A66-42332

Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936

RELATIVISTIC PLASMA

Linear oscillations in relativistic Maxwellian plasma, detailing dispersion relations in collisionless cold electron-beam system 01 p0110 A66-10326

Initial pulse propagation in relativistic MHD with finite conductivity 02 p0265 A66-11397

Stellar magnetic field attributed to role of field in producing hydrostatic equilibrium when general-relativistic effects are included in equations of MHD 02 p0290 A66-11705

Magnetic bremsstrahlung of relativistic

electrons in plasma during generation of type IV radio emission 03 p0422 A66-12913

Kinetic equation with relativistic interaction correlation for homogeneous plasma 03 p0405 A66-13139

Relativistic mechanism of electromagnetic wave scattering at velocity fluctuations and emission from plasma in external field 09 p1344 A66-20353

Relativistic effects on plasma stability 10 p1567 A66-21818

Dielectric tensor in relativistic Vlasov plasma in electron cyclotron harmonic resonance region 13 p2155 A66-26676

Relativistic plasma wave dispersion in cyclotron harmonic resonance regions 13 p2155 A66-26677

Magnetic bremsstrahlung of relativistic electrons in plasma during generation of type IV radio emission 14 p2376 A66-27262

Unified field theory applied to relaxation of ion velocity distribution in plasma 15 p2552 A66-29396

Plasma bremsstrahlung power derived for relativistic, nonrelativistic and electron beams 17 p2965 A66-32256

Transverse and longitudinal oscillations in low density relativistic plasma in constant magnetic field 18 p3147 A66-34725

Relativistic gas expansion into intergalactic space noting energy content, modes of expansion and radio source distribution 18 p3236 A66-34761

Linearized equations describing transverse waves in relativistic plasma embedded in magnetic field and in presence of nonrelativistic plasma 18 p3148 A66-34907

Exact solution of nonlinear relativistic equations of motion for electron in right circularly polarized wave propagating in whistler mode parallel to external magnetic field 19 p3303 A66-35998

Asymptotic time behavior of longitudinal waves in one-dimensional plasma of relativistic electrons and stationary ions studied, using collisionless Boltzmann equation 21 p3775 A66-39189

RELATIVISTIC VELOCITY

Conditions satisfied by transformation equations connecting inertial and relativistic accelerated systems are deduced for rectilinear motion 03 p0392 A66-12609

Temperature of gas moving in frame of reference with respect to rest frame 04 p0597 A66-13814

Electromagnetically driven ionizing shock waves propagating in hydrogen at speeds to relativistic conditions 04 p0511 A66-14010

Radiation fields of moving electric dipole falling off faster than $1/r$, having two nonspinning point charges, variable point and moving at relativistic velocities 06 p0832 A66-16453

Euclidean nature of relativistic rotating disk in conclusions of Eddington and Lorentz 08 p1255 A66-18857

Optical diffraction velocimeter, using backscattered laser light to measure relative velocity between light source and surface 11 p1706 A66-22958

Relativistic rocket mechanics, considering coordinate transformation, velocity and dependence of mass on inertial reference system 11 p1775 A66-23118

Lorentz-invariant Markov process in relativistic phase space 12 p1914 A66-24406

Interstellar vehicle propelled by terrestrial laser beam 19 p3449 A66-35488

Suggestion that quasar red shifts result from inflow of matter at relativistic velocity in gravitational field of highly condensed white dwarf 24 p4274 A66-42419

RELATIVITY THEORY

SA FIELD THEORY

SA SCHWARZSCHILD METRIC

Expanding universe theory based on equations of general theory of relativity 02 p0285 A66-11300

Vector tetrad in mathematical formulation of general theory of relativity and cosmological red shift 02 p0287 A66-11470

Two general integrals of Einstein equations serviceable for obtaining certain physical quantities which are independent of choice of coordinate system 02 p0291 A66-12183

Photon tracks near very massive star, deriving motion equations with independent time coordinate for spherically symmetric

four-dimensional manifold 02 p0291 A66-12183

Aberration, Thomas precession and form of relativistic collision invariants of Lobachevsky or hyperbolic space simplified relativistic kinematics 03 p0392 A66-12609

Relativistic theory for plane shock wave in ionized hydrogen 03 p0358 A66-13141

Relativistic thermohydrodynamics considering asymmetric momentum-energy tensor symmetrized by conservative tensor 03 p0393 A66-13241

Friedman theory of relativistic cosmology for universe and galaxies, noting infinite and finite universe solutions for theory 04 p0578 A66-13941

Motion of finite mass particles in external gravitational field determined by comparison of relativity and Minkowsky theories considering gravitational radiation 04 p0545 A66-14179

Relativistic theories of gravitation International Conference, London, July 1965 Volume 1 05 p0756 A66-14522

Post-Newtonian hydrodynamics and stability of gaseous masses for radial and nonradial oscillations 05 p0715 A66-14523

Deflection of light rays by gravitational lenses 05 p0757 A66-14526

Relativistic theories of gravitation International Conference, London, July 1965 Volume 2 05 p0757 A66-14527

New theory of gravitation by Hoyle and Narlikar, noting transformation of equations to Einstein equations 05 p0757 A66-14528

Equation of motion in relativistic gravitation theory 05 p0715 A66-14529

Quantum theory of gravitation with respect to classical theories and Einstein theory 05 p0757 A66-14530

Conservation laws in general relativity and definitions of gravitational momentum and energy 05 p0715 A66-14531

Exact solutions to Einstein field equations 05 p0715 A66-14532

Gravitational effects not consistent with relativity theory, showing statistical correlation between solar activity and variations in Earth rotational velocity 05 p0757 A66-14533

Second postulate of special theory of relativity proved by existence of short period Cepheids 05 p0759 A66-14888

Bianchi identity role in obtaining motion equations without infinite self-action terms in general relativity 05 p0715 A66-14893

Lorentz-invariant theories of gravitation analyzed, using astronomical tests for comparing results predicted by theories with general relativity formulas 05 p0716 A66-15088

Gravitational field interactions with Dirac fields and electromagnetic fields studied in framework of special relativity to find possible C-, P- and T-violating effects 05 p0717 A66-15349

Energy function and conservation of inertial mass and three-momentum from relativity principle and conservation of energy in particle collisions 05 p0719 A66-15530

Oscillating isotropic universe without singularity with infinite density of matter 05 p0769 A66-15844

Motion of charged finite mass in gravitational field 06 p0908 A66-16162

Gravitational compass in analysis of gravitational field in general relativity 06 p0909 A66-16329

Self-similarity of solutions to motion equations for relativistic gas possessing point symmetry and nonexistence of isentropic flow 06 p0954 A66-16538

Derivability of cosmological equations from first law of thermodynamics and hydrodynamics equations, without using general relativity 07 p1132 A66-17207

Combined influence of negative and positive spatially uniform pressure upon form of cosmical pulsations of isotropic world model 07 p1133 A66-17518

Quasi-stellar radio sources and probing of universe, discussing universe model, general relativity and Robertson solution 07 p1136 A66-17814

General relativity for study of emission of gravitational waves from isolated axisymmetric sources vibrating smoothly for finite period 08 p1254 A66-18621

- text on wavefronts and wave propagation
classical electromagnetic theory, general
activity, MHD and nonlinear
electrodynamics 08 p1180 A66-18680
book on space, time and relativity for
mathematicians noting geometry,
ematics, dynamics and Einstein
theory 08 p1255 A66-18893
relativistic hydrodynamics of relaxation,
discussing limiting cases depending on
chemical reaction and annihilation rates and
growth 08 p1206 A66-18974
extension of Ward relations to gravity, in
analogy to electrodynamics, using
opta formulation of Einstein
theory 08 p1255 A66-19078
Einstein equations for vortical and
inertial gravitational fields applied with
relativistic approximation to Newtonian
gravitational field
equations 08 p1256 A66-19272
text on electromagnetic force principles
including Maxwell equations, electrostatics,
electromagnetic waves, electron theory,
activity, etc 08 p1256 A66-19465
first-order relativity test using phase
range of two coherent
laser beams 09 p1385 A66-19935
radar reflection experiment to verify
general relativity theory 09 p1403 A66-20686
test of general relativity based on
influence of solar gravity on echo times of
radio waves reflected from
planets 09 p1403 A66-20687
satellite experiments testing precessional
formula of general relativity, obtaining
orbital orbital condition 10 p1604 A66-21193
relativistic transformation laws of
thermodynamic variables, including
temperature and heat
transfer 10 p1619 A66-21198
space charge theory of one-dimensional,
monoenergetic, unipolar and bipolar currents
traversing on otherwise evacuated space
between infinite plane parallel
electrodes 10 p1557 A66-21572
Carnahan proposed first order ether drift
experiment using two lasers shown to be of
second order nature, noting role of phase
shifts 10 p1543 A66-21656
General theory of relativity, application to
isolated system relative to slow moving not-
to-dense structure and empirical proofs of
theory 10 p1556 A66-22055
Observable properties of normal relativistic
world models and steady state world model
defined by parameters depending on
cosmological constant and present mean
density of universe 12 p1946 A66-23652
Gravitation theory and new principle of
equivalence of inertial and gravitational
energies 12 p1913 A66-23770
Particle theory in which additive particle
labels are defined in geometric terms of
classical gauge theories of Yang-Mills
type 12 p1916 A66-23823
Stochastic processes in microscale
relativistic fluid mechanics, discussing Dirac
fluid, Klein-Gordon equation, diffusion,
quantum potential, spin fluids,
etc 12 p1914 A66-24093
Mössbauer effect, frequency measurement
and red shift in relativistic gravitational
field 12 p1914 A66-24404
Newtonian and relativistic analysis of
orbits of electromagnetically neutral test
particles in magnetic
universe 12 p1914 A66-24567
Relativistic electrodynamics of moving
medium, discussing Maxwell-Minkowski
equations, Born equations, field vector
transformations, etc 12 p1915 A66-24650
General relativistic dynamics for
determining place of Mach principle in
relativity theory, obtaining expression for
energy-momentum density of gravitational
field 12 p1916 A66-25019
Equation system for shock waves in
relativistic thermodynamic fluid with
finite conductivity, giving expression for
pulse-energy tensor in fluid
parameters 13 p2140 A66-25416
Relativistic aerodynamics, discussing
wavefront motion, Thomson and Bernoulli
theorems, photon gases, etc, using statistical
space-time mechanics 13 p1991 A66-26291
Gravitational theory developed by
generalizing Newtonian and special
relativistic concepts 13 p2129 A66-26332
Relativistic hydrothermodynamics in
covariant form for simple viscous fluid,
omitting infinite heat conduction velocity
and instantaneous diffusion flux theory from
treatment of Eckart 13 p2210 A66-26333
Book on time and space, weight and inertia
in terms of relativity theory, including
accelerations and rotations, dynamical tensor
of matter, ideal clock, rigid body,
etc 14 p2330 A66-26808
Model of oscillating cosmos which
rejuvenates during
contraction 14 p2378 A66-27021
Philosophical problems of Einstein theory
of gravitation and relativistic cosmology -
All-Union Conference, Kiev, Ukrainian SSR,
May 1964 14 p2331 A66-27208
Composition, state and evolution of
gravitational theory, noting Newtonian,
Einstein and unified field
stages 14 p2331 A66-27209
Matter and gravitation role in unified
gravitational field theory, including Einstein
general theory of
relativity 14 p2332 A66-27210
Basic premises of tetrad formulation of
general relativity theory and relationship to
generalized Lorentz
transforms 14 p2332 A66-27212
Kinematics of noninertial reference
systems in both metric and tetrad
formulations of general theory of
relativity 14 p2332 A66-27213
Quantum gravitation theory, discussing
difficulties of covariance of general
relativity and nonlinearity of Einstein
equation 14 p2332 A66-27215
Existence of nonobservable things in
relativistic cosmology 14 p2332 A66-27216
Gravitational field as form of matter,
noting Mach inertia
principle 14 p2333 A66-27218
Infinity of universe is axiomatic character
and does not depend on any mathematical
or physical principle 14 p2379 A66-27226
Cosmological theory testing with
gravitational lens effect 14 p2383 A66-27710
Boltzmann equation for gas acted upon by
relativistic forces in fibered state
space 14 p2335 A66-27938
Special relativity theory in recent
experimental verification 14 p2335 A66-27946
Gravitational radiation and possible
experimental detection 14 p2335 A66-27947
Relativistic astrophysics covering evolution
of moderate to supermassive stars, radiation
and gravitational field and stellar
collapse 14 p2385 A66-27948
Sound wave propagation in relativistic
MHD 14 p2345 A66-28046
Ideal conducting fluid in electromagnetic
and gravitational fields treated by
relativistic mechanics, using variational
principles 14 p2277 A66-28049
Lorentz-equivalence generalization in
substratum theory 15 p2593 A66-28652
Five-dimensional relativistic
scheme 15 p2537 A66-28679
Superpotentials in relativity theory, noting
use of Freud identities and finite coordinate
transformations 15 p2542 A66-29654
Motion of charged nongravitating test
particle in Einstein gravitational
theory 15 p2542 A66-29655
Red-shift law derived, using new relativity
theory of Fantappie based on Lorentz group,
noting relativistic cosmology and Newtonian
cosmology of Milne 15 p2599 A66-29656
Fantappie relativity theory using
elementary projective geometry and based
on group theory, obtaining cosmology
leading to double time scale and origin of
universe from point 15 p2599 A66-29658
Self-similarity of solutions to motion
equations for relativistic gas possessing
point symmetry and nonexistence of
isotropic flow 15 p2603 A66-29978
Radiation coordinates for gravitational
radiation in general
relativity 16 p2746 A66-30528
Lorentz invariant space-time gravitational
field theory, Maxwellian gravitokinetic field
of potential and kinetic components and
precession of orbit of Mercury analyzed by
Einstein restricted theory of
relativity 16 p2802 A66-31011
Theory of relativity, discussing Einstein
theory of gravitation, evolution of stars,
equations of motion, etc 16 p2748 A66-31267
Revision of fundamental laws of Newtonian
mechanics, noting condition when relativity
principle is not obeyed 16 p2748 A66-31400
Einstein field equations for perfect fluid,
coupled to frozen-in magnetic field, in high-
density limit of gravitational
collapse 17 p2997 A66-31973
General relativistic dyadic formalism
applied to metrics of rigid bodies moving in
Einstein space of uniform space-time
curvature 17 p2958 A66-32294
Relativistic precession measurement using
satellite as precise orbiting gyroscope
[AIAA PAPER 65-36] 17 p3001 A66-32450
General theory of relativity, emphasizing
works discussed at London and Tbilisi
conferences on gravitation
theory 17 p2960 A66-33504
Mass-energy relationship in gravitation,
correlating Newton and Einstein concepts
via acceptance of positive and negative
masses and energies 18 p3136 A66-34633
Potential energy in gravitational field,
considering relativistic concept of negative
mass, two-body motion and gravity effects
on atomic nucleus 18 p3136 A66-34722
Light deflection by solar
activity 19 p3455 A66-35249
Elliptic Kruskal-Schwarzschild space,
discussing identification of points which
limit Kruskal space into Minkowski
space 19 p3389 A66-35942
Komar covariant formulation of
conservation laws of general relativity
obtained directly from variation of scalar
curvature density 19 p3401 A66-36168
Relativity theory for solid-media model
design, deriving equations of state and
closed system of differential equations
based on variational
principle 19 p3401 A66-36832
Gravitational waves in presence of
electromagnetic field, deriving Einstein-
Maxwell equations 20 p3550 A66-37308
Structure of general relativity theory space
examined, using analytic continuation of
geodesic equations 20 p3602 A66-37375
Relativity theory application to space
probes, discussing experimental verification,
relevance to cosmological problems and
utilization to particles with large energy and
momentum 20 p3650 A66-37389
General relativistic field equations of
compressible fluid sphere with variable
polytropic index 20 p3545 A66-37465
Shock waves, boundary surfaces and thin
shells in general
relativity 20 p3602 A66-37634
Precession of satellite orbits in verifying
general relativity 20 p3602 A66-37636
Congruent relativistic gravitational fields,
red shift and geodesic coordinate
transformations 20 p3603 A66-38011
Singularities in Newtonian cosmology and
in Friedman universes and behavior of
relativistic world model with spherically
symmetric distribution of
matter 20 p3658 A66-38291
Methodological bases and demonstration of
interrelationship of space and time in
special theory of
relativity 21 p3769 A66-38586
Energy transport by electromagnetic
waves, using successive
approximations 21 p3770 A66-38946
Singularities in universe, discussing
properties of space-time continuum, matter
and Einstein equations for strong
fields 21 p3771 A66-39265
Singularities in closed universes, discussing
closed solutions to Einstein equations and
inevitability of singularity, based on
Hawking theorem 21 p3771 A66-39266
Time-mass dependent events during motion
of material particle, using Hamilton-Jacobi
equation of relativistic mechanics in
Minkowski continuum 21 p3772 A66-39276
Rylov concept of relative gravitational field
applied to calculation of energy of Synge
plane gravitational waves with respect to
separate reference points 21 p3772 A66-39294
General relativity theory, examining
Schwarzschild surface which allows matter
and light to pass through in one direction
only 21 p3774 A66-39532
Forms of red shift magnitude relation for

- Friedmann type relativistic model universes 23 p4125 A66-41046
- Augmented special relativity theory to account for Einstein effects, with extension to general scalar field theory and notes on corpuscular light and galactic-centered reference frame 23 p4090 A66-41273
- Radiation in relativistically moving anisotropic plasma medium, noting Lorentz type transformation of plasma electron volume density 23 p4105 A66-41638
- Singularities of cosmological solutions of gravitational equations for space filled with matter 24 p4274 A66-42521
- Weak and strict solution existence theorem for initial-boundary value problem for nonlinear hyperbolic equation in relativistic quantum mechanics 24 p4237 A66-42829
- Einstein gravitation theory relation to general and special relativity, space time, unified four-dimensional continuum metric and chronogeometric theories 24 p4238 A66-43015
- Small charge asymmetry and entropy of hot universe, finding rational solution for almost-charge symmetrical case 24 p4280 A66-43057

- Nuclear magnetic resonance of transition metals, noting Knight shift in platinum and palladium and contributions to nuclear spin relaxation rates 04 p0564 A66-14031
- Components of relaxation tensors associated with thermal and spontaneous phonon scattering in semiconductors 04 p0564 A66-14254
- Anelasticity and relaxation time in metals and nonmetals, particularly as manifested by internal friction peak as function of frequency or temperature in study of crystalline material 05 p0772 A66-14548
- Master equation for intramolecular relaxation processes, with application to internal vibrational relaxation and isomerization reactions 06 p0911 A66-16170
- Linearized wave equation of supersonic flow with single relaxation process, using model gas mixture 06 p0874 A66-17003
- Direct measurement of energy relaxation time between hot electrons and lattice in n-type indium antimonide in hydrogen temperature range 06 p0929 A66-17036
- Capacitance-voltage curves in MOS devices indicating difference in relaxation time of surface states 06 p0940 A66-17163
- Relativistic hydrodynamics of relaxation, discussing limiting cases depending on chemical reaction and annihilation rates and pair growth 08 p1206 A66-18974
- One-dimensional CJ detonation existence as self-sustaining phenomenon 08 p1208 A66-19203
- Nuclear spin relaxation in superconducting gallium measured by nuclear quadrupole resonance in zero magnetic field, using pulsed nuclear induction spectrometer 09 p1420 A66-20047
- Solid state laser output exhibiting regular and irregular spikes analyzed through relaxation oscillations and classical physics 09 p1387 A66-20568
- Numerical computation verifying Forte contention in connection with relaxation phenomena associated with thermoelastic dissipation in solids 10 p1555 A66-21197
- Kinetic equation for density matrix of discrete system undergoing relaxation in presence of instantaneous collisions 10 p1622 A66-21988
- Kinetics and gas dynamics equations derived to determine state of gas behind strong shock waves, accounting for all excited states of neutral atoms 11 p1688 A66-22586
- Time duration and length of compressed region and heated gas behind shock wave front determined by thermal probe 11 p1682 A66-22593
- Q-factor of active substance of three-level quantum amplifiers with two relaxation times determined with aid of density matrix 11 p1712 A66-22728
- Statistical aspects of plasma oscillation, examining plasma evolution in terms of Landau theory, particularly after instability onset 12 p1918 A66-23554
- Mechanisms which can introduce frequency-dependent effects, gauging importance in semiconductor microwave devices including crystal valves, diodes, etc 12 p1831 A66-23790
- Spatially independent laser rate equation generalized for multimode effects, noting steady state oscillation threshold singularities, spiking parameters, etc 12 p1891 A66-24560
- Dielectric relaxation in thermally grown silicon dioxide films 12 p1932 A66-24828
- Pulsed induced emission in hydrogen beam laser for case of two relaxation times,

- determining polarization only by number active particles in resonator 12 p1891 A66-24828
- Relaxing gas in cylindrical heat conductivity cell showing homogeneous gas phase maintained in thermal equilibrium in surface effects and exhibiting characteristics of monatomic gas 12 p1980 A66-24900
- Carbon dioxide relaxation processes shock waves, measuring density variation vibrational energy, relaxation time, shock density profile, etc 13 p2061 A66-25100
- Vibrational relaxation times of deuterium in argon and krypton determined at high temperatures by shock heating gas mixture in shock tube 13 p2136 A66-26600
- Anisotropy spectrum in nonmagnetostrictive permalloy films 14 p2353 A66-26900
- Polarization vector in strong electromagnetic field, using two-band semiconductor, calculated from density matrix equation, relaxation times and recombination time 14 p2360 A66-27180
- Pulsed nuclear resonance experiment on neodymium doped calcium fluoride, determining relaxation time 14 p2336 A66-27600
- Frequency sweep method of measuring relaxation times and determining Q value in high Q superconducting cavities 14 p2258 A66-27900
- Shear relaxation time of monatomic fluid for liquid and dense gas phases calculated using LF viscosity data and estimates of H₂ elastic moduli 14 p2277 A66-27970
- Electron gas electroconductivity relaxation time and energy loss in n-type InSb at cryogenic temperatures 15 p2558 A66-28610
- Relaxation time for recombination radiation from semiconductor source determined by measuring current/emission phase shift 15 p2588 A66-29700
- Diatomic gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean energy 16 p2627 A66-30100
- Spin-rotation interaction and relaxation time of fluorine nuclei in benzotrifluoride, calculated, using time-dependent perturbation theory 16 p2645 A66-30110
- Change in conductivity at surface of semiconductor due to changes in relaxation time and charge carrier densities 16 p2786 A66-31680
- Solar flare effects and relaxation time of ionosphere 17 p2993 A66-32530
- Multiple fracturing caused by putting intense radiation into solid in time short compared with elastic relaxation time 17 p2979 A66-32630
- Frequency dividers for sequence of pulses, using relaxation generators with rectangular timing voltage 17 p2887 A66-32704
- Relaxation processes behind shock wave in free stream partially dissociated and vibrationally excited by monitoring time history of radiative emission in shock tube [AIAA PAPER 66-519] 17 p2911 A66-32775
- Dissociational rate constants and vibrational relaxation times modifications considering coupling of vibrational and dissociational nonequilibrium of expanding gas in nozzle [AIAA PAPER 66-520] 18 p3047 A66-33661
- Elastic relaxation effect due to diffusion of interstitial hydrogen in tantalum and niobium 18 p3123 A66-34050
- High magnetic field limit of shock wave in steady state model plasma moving along x axis studied transverse to magnetic field 18 p3148 A66-34900
- Nuclear polarization by hot carrier flow in homogeneous semiconductor, taking into account effect of strong electric field on spin lattice relaxation time 19 p3437 A66-35470
- Classical/quantum views of nonequilibrium gas flow equations with arbitrary number of relaxation times 19 p3340 A66-35730
- Electron scattering by impurities in dipole form in semiconductors with anisotropic effective mass of current carriers, deriving formula for tensor of relaxation time 19 p3442 A66-35810
- Alfven waves in bismuth for propagation along magnetic field, noting dielectric constant variation with frequency, effect on

part of refractive index, relaxation time
analysis, etc 19 p3443 A66-36006
population inversion in adiabatic expansion
molecular gas mixture with three
vibrational levels 19 p3402 A66-36068
sound propagation characteristics in
tropic gas, considering acoustic absorption
relaxation effects 19 p3341 A66-36288
pole scattering of electrons in
ermanium and silicon whose conduction-
structure is described by many-valley
model, using distribution function and
computing relaxation-time 19 p3446 A66-36393
solid laser radiation operating in Q-
switched resonator regime noting effect of
rate of switching, finiteness of
relaxation time, transmission coefficient
factor, etc 20 p3576 A66-37142
upper oscillation frequency limit for Gunn
oscillator imposed by finite energy-
relaxation time of heated
carriers 20 p3527 A66-37449
phenomenological theory of longitudinal
all effect in cubic crystals, assuming
isotropic dispersion law and tensorial
relaxation time 20 p3618 A66-37560
transients and stability of idealized two-
level laser system, obtaining rate equation
solution, noting characterization by
relaxation times 23 p4076 A66-41034
pulsed induced emission in hydrogen beam
source for case of two relaxation times,
terminating polarization only by number of
active particles in 23 p4076 A66-41091
Q-factor of active substance of three-level
quantum amplifiers with two relaxation
times determined with aid of density
matrix 23 p4078 A66-41466
semiconductor conductivity in strong SHF
electric fields, measuring dielectric constant
and Fourier component 23 p4068 A66-41620
generalized strain and transition concepts
for elastic-plastic deformation creep and
relaxation 23 p4144 A66-41973
basic relaxation times characterizing
electromagnetic-plasma
interactions 24 p4243 A66-42622
decay of small temperature perturbations
by thermal radiation in atmosphere, noting
ray and line absorption, relaxation time
constants and numerical
computations 24 p4203 A66-42986
polarization vector in strong
electromagnetic field, using two-band
semiconductor, calculated from density
matrix equation, relaxation times and
combination time 24 p4259 A66-43087
RAY
RADIO RELAY
Microelectronics and results achieved in
relays, switches, variable capacitors and
potentiometers 02 p0205 A66-11943
Characteristic functions of rectifier contact
multipoles extended to multipoles containing
closing contacts of internal and external
relays 05 p0658 A66-15330
Algorithm synthesizing sequential circuit
from transition matrix, making critical races
occurrence impossible during simultaneous
relays starting 07 p1013 A66-17384
Listening and two-way communication tests
to study satellite as active relay for
communications between aircraft in-flight
and ground terminal, using Syncom
II 08 p1185 A66-19538
Periodic mode of operation of relay
automatic system with variable delay
element 11 p1681 A66-23333
Contact bouncing in protective gas relays
measured in circuit with inductive and real
load 13 p2031 A66-25484
Relay selection and
application 13 p2043 A66-26311
Effect of relay response time on dynamic
properties of automatic system incorporating
near group and relay element with pure
delay 14 p2264 A66-27358
Phase space techniques for optimization of
relay control systems with plants having
multivalued nonlinearities 14 p2265 A66-27482
Coordination of integral and relay
components in algorithms for adjusting
control coefficients in model-reference self-
adaptive control systems described by
differential equations 14 p2266 A66-27526
Response of vibrating body with two

degrees of freedom when colliding with stiff
body, useful for communication relays and
terminal analysis 14 p2407 A66-28040
National Relay Conference, Oklahoma State
University, April 1966 15 p2459 A66-28988
Military relay reliability, design factors,
manufacturing control,
etc 15 p2460 A66-28990
Magnetic characteristics of miniature reed
relays, noting greater sensitivity over other
types of sealed relays 15 p2460 A66-28991
Relay design by statistical
methods 15 p2460 A66-28995
General mathematical model of DC relay
performance which includes effects of
leakage path permeance and magnetic
properties of core 15 p2461 A66-28996
Characteristic functions of rectifier contact
multipoles extended to multipoles containing
closing contacts of internal and external
relays 15 p2475 A66-29975
Synthesis of relay automatic control
systems with optimum dynamic
properties 15 p2476 A66-29994
Performance of human operators in three-
state relay control system with velocity
augmented displays 16 p2644 A66-31270
Dynamic characteristics of relay servo
systems 17 p2902 A66-32578
CRT oscilloscope tracer device for relay
units and relay parameter influence on
operational
characteristics 19 p3358 A66-35835
Component reliability and failure rates in
aerospace electric power systems with
relays 20 p3525 A66-37180
Periodic mode of operation of relay
automatic system with variable delay
element 22 p3884 A66-40413
Phase plane method in study of transfer
functions of higher order relay
servosystems 23 p4050 A66-41613
RELAY I SATELLITE
Relay I satellite mapping of energy
spectrum and spatial distribution of protons
in inner radiation belt 08 p1283 A66-19396
RELAY II SATELLITE
Joint experiment of U.S. Naval Observatory
and Japan Radio Research Laboratories for
synchronizing standard time pulses, using
Relay II satellite 12 p1818 A66-24473
RELAY SATELLITE
Spurious commands and error probability
in project RELAY command systems,
describing spacecraft
equipment 03 p0333 A66-12567
Multiple access satellite-borne reflex
repeater for continuous line of sight digital
data links and voice transmission for air
traffic control 05 p0630 A66-14589
Mission requirements and system reliability
of Relay communications
satellite 07 p1001 A66-17440
Lunar communication satellites, discussing
satellite relay, librational, random, and
synchronous satellite design, lunar orbits,
etc
[AIAA PAPER 66-315] 12 p1823 A66-24781
RELEASE DEVICE
Space release mechanism using subliming
material 20 p3664 A66-38252
RELIABILITY
SA AIRCRAFT RELIABILITY

Reliability and maintainability - Annual
Conference, Los Angeles, July 1965, Volume
4, Practical techniques and
application 01 p0074 A66-10048
Operational readiness, decision-making
technique for management taking into
account reliability, maintainability and
safety 01 p0167 A66-10051
Reliability technique for evaluation of
complex systems 01 p0167 A66-10053
Contribution of reliability to logistics
planning operation of Minuteman missile
weapon system 01 p0052 A66-10054
System reliability prediction limited when
it does not take into account out-of-
tolerance operation due to component
variation with environmental changes,
electric stresses and

aging 01 p0167 A66-10055
Critical analysis of reliability prediction
techniques including spurious ones to which
term numerology could be
applied 01 p0168 A66-10056
Criteria for evaluating military system
reliability with criticism of various
definitions 01 p0168 A66-10057
Air Force specification MIL-R-26667 for
reliability testing of electronic equipment,
commenting on
MIL-STD-781 01 p0168 A66-10058
AFSC 375 series of systems management
manuals with emphasis on specification
programs 01 p0168 A66-10060
Maintainability and reliability cost
effectiveness program /MARCEP/ for
improving reliability by adding redundancy
in cost-effective manner to nonredundant
system 01 p0168 A66-10063
Reliability and maintainability
interrelationship in system availability of
some aerospace programs 01 p0076 A66-10066
Reliability prediction and production
control of electrical connection by
combination of stress survival matrix test
and special strength control
chart 01 p0076 A66-10067
System safety engineering plan /SSEP/ for
achieving total safety
program 01 p0076 A66-10068
Reliability estimation procedure combines
task ratings with empirically based data in
derivation of regression
equation 01 p0018 A66-10076
Human factors in design criteria for
maintainability and
reliability 01 p0018 A66-10077
Bayesian statistics in combining analytically
derived design reliability data with available
test data for reliability
estimates 01 p0169 A66-10078
Positive materiel reliability program as
management indicator tool for supplier
product control in procurement of reliable
hardware 01 p0169 A66-10097
Manufacturing reliability control through
practical management considering
indocrination, problem solving and
measurement, noting welding
performance 01 p0076 A66-10098
Quality assurance, audit and management
effectiveness measurement in product
reliability assurance 01 p0169 A66-10099
Product assurance in terms of cost and
enhancement in reliability and
quality 01 p0170 A66-10101
Digital computer automated X-ray
diffraction method to determine residual
stress to improve processing
reliability 01 p0033 A66-10102
Objectives, effectiveness and results of
reliability program at Kennedy Space Center
/KSC/ referring to Saturn
launches 01 p0141 A66-10106
Major phases in total testing program to
validate booster in man-rated launch
vehicle 01 p0141 A66-10107
Reliability and maintainability concepts
applied to solid propellant subsystems of
mobile ballistic missiles 01 p0129 A66-10108
Relationships of hazard rate distributions
to reliability growth and confidence
computations 01 p0077 A66-10109
Reliability techniques applied to designing,
building and ensuring missile system
survival in nonoperating
state 01 p0141 A66-10110
Automated techniques for providing
reliability assurance in launch operations of
Saturn IB space vehicle
system 01 p0052 A66-10112
Statistical engineering aspects of probe
testing for achieving mature designs earlier
in product life cycle 01 p0077 A66-10115
System design for maximum reliability
when gross weight of system is assigned or
minimum weight when system reliability is
designated 01 p0078 A66-10795
Reliability control in parallel gap welding
used to join integrated circuit flat packs to
printed circuit assemblies 02 p0234 A66-11324
Reliability of photogrammetric equipment
discussing formulation of criteria, contractor
requirements and testing 02 p0227 A66-11377
Algorithm for allocating redundancy among
subsystems to achieve maximum system
reliability without exceeding multiple

constraints on redundancy 02 p0236 A66-11856
 Bayesian approach in reliability evaluation, noting point estimation and confidence interval 03 p0335 A66-12902
 Probability analysis of finite automata with unreliable binary elements and regular structural design 03 p0350 A66-13038
 Aircraft Unserviceability Analysis 03 p0322 A66-13107
 Redundancy emphasizing equipment reliability, effectiveness, evaluation of techniques and time dependent failure rate 03 p0345 A66-13275
 Probable reliability of measurement accuracies and decision limits for system checkout 03 p0347 A66-13336
 Amount of maintenance float determined from relation between maintainability and reliability used to estimate effects of product changes [AIAA PAPER 65-734] 04 p0525 A66-13634
 NASA reliability program provisions for space system contractors, detailing program management, reliability engineering, testing and evaluation 05 p0687 A66-14960
 Predictions of future trends of reliability engineering, with particular reference to impact of microelectronics 06 p0839 A66-15952
 Comparative evaluation of gamma, lognormal and Weibull probability distributions for reliability engineering application 06 p0902 A66-16333
 Reliability of probabilistic communication network 06 p0830 A66-16338
 Reliability and accuracy testing of electronic equipment 07 p1005 A66-17357
 Mean time of failureless operation of duplicated devices with automatic control and switching 07 p1013 A66-17388
 Maximally reliable exponential prediction equations for data rate limited tracking servomechanisms 08 p1183 A66-18931
 Accessibility as factor in reducing production cost and maintenance time and increasing reliability in electronic equipment 08 p1197 A66-19526
 Reliability, stability and time-to-failure probability characteristics of system operating at random intervals 08 p1201 A66-19671
 Engineering systems reliability analysis using momenta number flow method of coincidence operating under steady state conditions 09 p1384 A66-20910
 Optimum system reliability for arbitrary structure, using algorithm of steepest descent applied to problems of convex programming with linear constraints 09 p1358 A66-20911
 Algorithm for optimal parameter choice in reliability control of complex systems, based on dynamic programming 11 p1675 A66-22623
 Reliability of missile fire distribution facility, noting transistorization effect on economy 11 p1668 A66-22955
 Standards, quality and reliability of Soviet production 12 p1884 A66-23741
 Russian text on mathematical methods in reliability theory 12 p1903 A66-24068
 Reliability technique viewed as broad discipline encompassing entire field of traditional design, production and maintenance 12 p1832 A66-24071
 System reliability in terms of availability and reliability function in dynamic theory category which treats behavior of system in time domain 12 p1832 A66-24072
 Redundancy as method for systems reliability, either by using two identical channels operating simultaneously or by holding one channel in reserve 12 p1832 A66-24073
 Inherent reliability of equipment estimated during design stage, using component failure data 12 p1833 A66-24075
 Statistical analysis of allowable errors in network synthesis, using moment method, worst case method and Monte Carlo method 12 p1833 A66-24076
 Forced reliability testing in electronic computers, switching circuits and digital communications systems by introducing noise or lowering input signal level 12 p1833 A66-24077
 Equipment and methods for simulating natural or induced environments for

reliability testing 12 p1833 A66-24079
 Gumbel theory of extreme values as statistical technique in reliability problems, with emphasis on double exponential distribution 12 p1833 A66-24084
 Parts, materials and packaging reliability and electric contacts - IEEE International Convention, New York, March 1966 12 p1842 A66-24663
 Reliability of short-haul microwave radio relay systems operating in common carrier bands 13 p2029 A66-25149
 Space digital computer reliability laboratory testing by failure data collection from prototype equipment 13 p2027 A66-25507
 Reliability feasibility evaluation of Voyager spacecraft, determining launches necessary, chances of success and program cost 13 p2192 A66-25509
 Reliability in optimal control problems in terms of probability of faultless operation 13 p2047 A66-25626
 Reliability demonstration, discussing tests on antipersonnel radar system, selective identification set, quick reaction capability radar, etc 13 p2086 A66-25663
 Reliability assessment techniques for microelectronics, considering integrated circuits, testing procedures, etc 13 p2043 A66-26226
 Fuel cell reliability maximized and weight minimized for space mission power requirement [AIAA PAPER 64-746] 13 p2007 A66-26647
 Engine reliability data for four Rolls-Royce civil aircraft engines 13 p2174 A66-26694
 Solid propellant rocket engine omnixaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700
 Power conditioning and ion thruster module size and number effect in terms of reliability [AIAA PAPER 65-68] 14 p2375 A66-27883
 Mathematical models of system reliability, redundancy and design optimization 14 p2227 A66-28425
 American Society for Quality Control - Conference, Los Angeles, May 1965 15 p2505 A66-28788
 Part failure detection methods, noting interrelationship between part sampling and reliability, destructive and nondestructive component testing, etc 15 p2507 A66-28800
 Process of troubleshooting analyzed, noting symptom recognition, defect recording and classification remedial action, cause determination, corrective action and follow-up 15 p2507 A66-28801
 Reliability growth measurement via exponential smoothing, noting prediction of successive elements from given time series 15 p2508 A66-28805
 Exceedance theory application to reliability and quality control problems, noting tolerance limit and life test problem solutions 15 p2508 A66-28809
 Jet engine reliability at various stages /planning, production, in-service, etc/ noting its economic aspects and global methods analyzed 16 p2790 A66-30316
 Contribution of reliability to logistics planning operation of Minuteman missile weapon system 16 p2881 A66-30661
 Reliability data analysis for systems, discussing confidence intervals, limits and parameters independent of mathematical models employed 16 p2714 A66-30666
 Reliability of stand-by system with automatic reserve cut-in, considering probability method 17 p2888 A66-32709
 Reliability, maintainability, and spacecraft safety in hypothetical manned Mars mission 17 p2930 A66-33174
 Deterministic structural design criteria for vehicle systems based on relation between management decisions and achieved reliability level [AIAA PAPER 66-504] 18 p3250 A66-33659
 Probability analysis of finite automata with unreliable binary elements and regular structural design 18 p3092 A66-35001
 Streak test excellent acceptance technique for assurance of reproducibility of service life for ablative thrust chamber of Mira

150A variable thrust rocket engine [AIAA PAPER 65-608] 19 p3449 A66-3566
 Aircraft structures strength and longevity obtained by applying standards and criteria to design and manufacture including static fatigue and fail-safe tests 20 p3666 A66-3700
 Automated mission analysis by Markov chain techniques, examining effectiveness factors of reliability and maintainability 20 p3682 A66-3717
 Improved radar system reliability, using method of determining potential failure cases of tolerance combination 20 p3513 A66-3718
 System and cost effectiveness technique applied to procurement of military operational systems, noting need for new standards for reliability input data 20 p3682 A66-3718
 Reliability, stability and time-to-failure probability characteristics of system operating at random intervals 20 p3538 A66-3726
 Operational reliability of finite automata systems in terms of entropy in individual components 20 p3538 A66-3748
 Quantification of relative contributions of various functions to performance of mission combined with availability and dependability for system effectiveness 20 p3684 A66-3788
 Product performance model for predicting system effectiveness satisfying restrictions on time, money and input data 20 p3566 A66-3788
 System effectiveness and achievement levels, discussing difficulties in application to mission requirements 20 p3566 A66-3788
 Mathematical model used by Army Missile Command for establishing priorities for reliability and logistics improvement 20 p3684 A66-3788
 Human factor relation to system effectiveness and human performance relation to operational reliability and maintainability 20 p3509 A66-3789
 Reliability consideration effect on solar powered electric-propulsion system design 20 p3568 A66-3790
 Systems analysis for space programs, emphasizing systematic quantitative studies of reliability and maintainability 20 p3684 A66-3791
 Reliability-maintainability cost tradeoff via dynamic and linear programming, discussing states, alternatives within states, transition rates and expected costs 20 p3568 A66-3791
 Management in applying reliability and maintainability for improved cost effectiveness by first-tier supplier 20 p3685 A66-37913
 Program management at subsystem subcontractor level for product reliability and maintainability in developing AN/APQ-110 terrain following radar for F-111A 20 p3685 A66-37914
 Failure mode and effect analysis /FMEA/ application to each stage of system design and development oriented reliability program 20 p3568 A66-37915
 Graphical method for trading off systems reliability against systems maintainability in designing system simple to maintain and repair 20 p3569 A66-37925
 System safety definition and measurement, examining probability of control of hazards for system and cost effectiveness analyses 20 p3570 A66-37930
 Industry government reliability program for high density wooden round missile which is noncheckable and associated checkable and repairable launcher-guidance set 20 p3570 A66-37933
 Reliability program, determining assurance and stabilization trend by analysis of lots applied to testing high reliability parts for Saturn V inertial guidance system 20 p3570 A66-37934
 Reliability testing programs applied to aircraft electronics equipment and description of development of MIL-STD-781A, exploring relation between reliability prediction and measurement techniques 20 p3570 A66-37936
 Weapon system reliability prediction and relations of spare consumption and of maintenance 20 p3571 A66-37937
 Reliability specifications in system design and evaluation 20 p3571 A66-37938

Creep design reliability criteria for creep-rupture and critical creep-strain modes of structural element failure, both singularly and combined or
20 p3571 A66-37941

Maximum entropy in estimating damage distribution of single degree of freedom system subjected to random loading, noting reliability
20 p3571 A66-37942

Redundant structure of material with statistical yield point, determining probability that structure can sustain applied load even after some members have yielded
20 p3571 A66-37943

Bayesian methods applied to structural design selection with known reliability without confidence
20 p3572 A66-37944

Electronic data processing used to analyze AFM 66-1 maintenance data on USAF T-38 supersonic jet trainer for reliability monitoring
20 p3572 A66-37945

Information center concept for accurate acquisition and processing of parts, materials and components reliability and maintainability information for task performance
20 p3572 A66-37947

Saturn S-II stage project uses ground testing of flight vehicle to achieve high statistical confidence in high reliability
20 p3572 A66-37951

System effectiveness through reliability prediction, reviewing fundamentals of prediction techniques including time-to-failure, variables data and physics of failure
20 p3572 A66-37952

Training seminar for reliability surveyors organized by NASA, particularly for Apollo program, noting content, participation, methodology, etc
20 p3686 A66-37957

Training problems of reliability engineers for aerospace industry
20 p3686 A66-37958

Mechanical reliability research and development for space systems, noting effect of random dynamic loading, fatigue damage, etc
20 p3573 A66-37959

Reliability and maintainability research program of USAF concerning measurement, control, failures etc, of equipment under various stresses and environmental conditions
20 p3573 A66-37960

Reliability analysis problem involving set of 30 identical parts which had intervals to failure recorded in order to make inferences about population from which parts are random sample, noting Weibull population
20 p3592 A66-37965

Methods for finding lower confidence bounds on reliability of item, noting reliabilities for items whose lifetimes follow Weibull distribution
20 p3574 A66-37966

Bayesian statistics applied to reliability and maintainability transactions
20 p3574 A66-37967

Zero defects program, discussing principles, operation and results [ASME PAPER 66-MD-26]
21 p3837 A66-38482

Reliability handbook covering system effectiveness, fatigue life patterns, reliability testing, malfunction and failure analysis, etc
21 p3744 A66-39215

Reliability predictions for repairable systems composed of units with constant failure and repair rates
21 p3713 A66-39341

Sensitivity function in variability analysis, noting relation concerning sensitivity sums and application to electric network
21 p3745 A66-39342

Guaranteed estimations of system reliability for systems with incomplete element reliability data
22 p3922 A66-39903

Solid state mechanics and reliability theory
23 p4135 A66-40992

IEEE Region Six Conference, Tucson, April 1966, Volume 2
23 p4049 A66-41600

Electronic reliability - IEEE Conference, New York, May 1966
24 p4178 A66-42087

Reliability criteria of systems with recovery, noting mean time to failure of system and mean time of system operation between failures
24 p4217 A66-42473

Reliability analysis and measurement program used by space contractor to indicate failure rates for various components and systems
24 p4217 A66-42648

Reliability estimate methods for equipment using data independent of time to failure

factor contrasted with one-or two-sided assigned specification
24 p4218 A66-42713

Reliability audit in military and space electronics
24 p4218 A66-42714

Reliability prediction for electronic systems based on constant failure rate and MTBF /mean time between failures/
24 p4185 A66-42866

RELIEF MAP

Stereometograph for photographing relief and contours in compilation of topographical charts from vertical aerial photographs
04 p0519 A66-13663

Gas laser used to determine residual wedge angle in optical flats and direct display of relief maps
19 p3373 A66-35390

REMOTE CONTROL

Limited distance of transmission of ultrasonics in air has limited application to remote control systems, proximity indicators, automatic counting and burglar and fire protection
03 p0368 A66-12407

Synchronous remote controlled photography used in photoinstrumentation is dependent on time, event, position and repetition relationships between subject and camera
05 p0677 A66-14864

Electromyography signals to control external power based upon pattern recognition
05 p0628 A66-15700

[ASME PAPER 65-WA/HUF-3]
09 p1345 A66-20544

Remote-control signaling system for Eldo satellite
12 p1876 A66-23672

Telesensors, teleoperators and telecontrols for remote operations
14 p2253 A66-27547

Fixed and mobile versions of antenna portion of Iris telemetry and remote control systems
14 p2270 A66-27548

Electronic equipment for Iris telemetry and remote control stations for satellites
14 p2270 A66-27548

Order-sequence generator for Iris remote control system and telemetry of satellites
14 p2253 A66-27549

Functioning period of remote control systems in sporadic data transmission determined using mathematical methods of queueing theory
16 p2669 A66-30766

Text on radio remote control and telemetry and missile application, including modulation and multiplex techniques
17 p2876 A66-33189

MHD theory applied to electromagnetic remote control of industrial processes and electromagnetic field effects on condensed media
18 p3142 A66-33700

Ground stations used in telemetry, tracking and remote control of French satellites
18 p3071 A66-34466

Receiver design and results of dual VLF transmissions for obtaining timing information
19 p3357 A66-35693

Remote maneuvering unit, discussing principle, functions, feasibility, composition and application
19 p3469 A66-35959

RENAL FUNCTION

Gravity effect on hemodynamic factors and sodium and water excretion in two dogs subjected to change from supine to erect position and water immersion
03 p0324 A66-12352

Water balance test for investigation of kidney functions of astronauts of Voskhod I spacecraft
06 p0814 A66-17176

Effect of unilateral renal vasodilatation on sodium excretion by infusing acetylcholine into renal artery of dogs
14 p2227 A66-26793

Human renal response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure
18 p3057 A66-33770

Combination of renal vasodilation and angiotensin infusion effect large changes in renal hemodynamics, excretion and reabsorption of sodium in anesthetized hypotensive dogs
20 p3507 A66-37607

PAH transport mechanism in dogs with hydrazine-depressed para-aminohippurate treated with acetate, 6,8-epidithioacetate and 6,8-epidithioacetamide
22 p3854 A66-39795

S SATELLITE RENDEZVOUS

RENDEZVOUS GUIDANCE SYSTEM

Gemini spacecraft rendezvous radar device noting angle measurements, astronaut display, command link and design problems
01 p0105 A66-10869

Gemini V failures and successes, evaluating spacecraft and rendezvous guidance and navigation systems performances and prolonged exposure to space environment
02 p0296 A66-12011

Gemini rendezvous radar using interferometric angle measuring system, digital range data readout, analog range display and target vehicle command link
09 p1346 A66-20583

Minimizing functionals on normed linear spaces, discussing steepest descent and rendezvous problems in control theory
13 p2116 A66-25343

Gemini noncoherent pulse radar system using interferometer methods for angle information, noting failures of diode capacitor combination and methods of reliability improvement
13 p2035 A66-25508

Analytical solution to linearized problem of power-off terminal rendezvous when target satellite is moving in elliptical orbit of arbitrary eccentricity
16 p2805 A66-31486

[AIAA PAPER 66-533]
17 p3016 A66-32687

Gemini VI rendezvous procedure and results, showing success dependence on presentation to flight crew of sufficient information developed on board
17 p3016 A66-32687

Errors in Gemini rendezvous radar interferometer due to antenna ellipticity and coupling of adjacent antennas
17 p2876 A66-33437

Iterative computational procedures applicable to optimal control problems including treatment of minimum-error regulator, minimum-error rendezvous and minimum-fuel terminal control
20 p3536 A66-36855

Control-engineering and flight-mechanics problem of rendezvous guidance, considering target body without guidance and second body in gravitational field without atmosphere
20 p3595 A66-36874

Stationkeeping problems and guidance technique for control of stationkeeping maneuver between orbiting vehicles
21 p3765 A66-38865

Variable point guidance technique modifications verified by simulation containing representation of typical booster and upper stage configuration
21 p3765 A66-38867

RENDEZVOUS SPACECRAFT

Full-scale prototype docking mechanism design and evaluation tests in rendezvous simulator
10 p1612 A66-21932

Manned Mars stopover mission employing two vehicles, analyzing rendezvous, transfer trajectories, flyby trips, etc
18 p3227 A66-33790

RENDEZVOUS TRAJECTORY

SA EARTH-MARS RENDEZVOUS TRAJECTORY
Measurement schedules effect on work load of astronaut performing navigation function, stressing tradeoff between number of measurements and accuracy level
01 p0102 A66-10044

Spacecraft-comet rendezvous trajectory analyzed in terms of comet properties and spacecraft capabilities to determine feasibility of interception mission
03 p0424 A66-12739

[AIAA PAPER 63-413]
Optimum rendezvous trajectories in same circular orbit with continuous thrust
03 p0432 A66-12803

Linear theory of optimum variable thrust rendezvous trajectories with power limit propulsion system
04 p0575 A66-13457

Measurement schedules effect on work load of astronaut performing navigation function, stressing tradeoff between number of measurements and accuracy level
10 p1554 A66-21953

Rendezvous maneuver with effect of velocity changes on orbital transfer of near-Earth satellite
20 p3663 A66-37532

REPAIR

SA SELF-REPAIRING SYSTEM
Energy storage and pulse power tools for space assembly, maintenance and repair operations
19 p3364 A66-35968

Reliability of system having standby spare noting repair capability and failure times, with results presented in graphs 21 p3745 A66-39343

REPEATER

Wideband FM transmitters and RF-to-RF repeaters for space application in S-and X-band frequency ranges 01 p0032 A66-11129
Channel capacity of communications satellite repeater, deriving link capacities of radio teletype and voice channels 04 p0478 A66-13597
Multiple access satellite-borne reflex repeater for continuous line of sight digital data links and voice transmission for air traffic control 05 p0630 A66-14589
Long chain of highly multiplexed broadband PCM regenerative repeaters, considering SNR after demodulation, error rate and jitter reducers /suppressors/ 12 p1818 A66-24595

REPRODUCTIVE SYSTEM

Stability, reproducibility and sensitivity of combined systems of automatic control with variable structure determined by presence of sliding mode region 19 p3329 A66-36025

RESEARCH

S HIGH TEMPERATURE RESEARCH

S OPERATIONS RESEARCH

RESEARCH AIRCRAFT

S NORD 1500 AIRCRAFT

RESEARCH FACILITY

General report of West German Research Institute for Aeronautics and Astronautics for 1964 02 p0216 A66-12073
Cosmic ray research and facilities at Hobart, Tasmania, Australia 07 p1123 A66-17992
Research activities at Chacaltaya Cosmic Physics Laboratory in Bolivia 15 p2476 A66-29514
Space research activities and facilities in Greece 15 p2600 A66-29908
Tskhra-Tskaro installation for study of high-energy cosmic particle interaction with matter 18 p3218 A66-35182

Independent research management 19 p3480 A66-35534
Pumpdown characteristics and incident flux rates of ultrahigh vacuum research facility 22 p3890 A66-40224
MHD facility of CNR at Aerodynamics Institute of Naples 23 p4017 A66-41037
Supersonic combustion simulation facility and duplicable static parameters for hydrogen fuel [AIAA PAPER 66-743] 23 p4052 A66-41327

RESEARCH PROJECT

Research and Development Effectiveness /RDE/ computerized planning program, utilizing analytical techniques in management of research and development resources 08 p1322 A66-19461
Research development effectiveness evaluation, with computer determining resource allocation 13 p2058 A66-26033
Combining R and D and follow-on production in single contract 14 p2417 A66-28434
Capability management in selling research and development to defense/space market 14 p2417 A66-28435
Advanced control and guidance research at NASA 18 p3131 A66-33866
French aerospace industry, production of aircraft, engines and missiles, research programs, expenditures, etc 18 p3267 A66-33915
Engineering and scientific tasks reporting in quantified data to management 18 p3268 A66-34065

RESEARCH REACTOR

S BOILING WATER REACTOR

RESIDUAL GAS

Residual gases in oil-diffusion-pump ultrahigh vacuum determined as function of various trapping conditions 04 p0528 A66-14464
Residual gas effect on work function vs critical temperature for surface ionization of cesium on porous tungsten [AIAA PAPER 64-693] 10 p1594 A66-21778
Residual gas influence on orientation of vapor deposited NaCl crystals 13 p2159 A66-25068
Spectral analyses of residual gases using mass spectrometer, noting vacuum

equipment and effects of backing and cold-trapping 19 p3361 A66-36615
Residual gases total and partial pressures measured, using pressure gauges incorporating hot or cold cathodes, noting omegatron 19 p3361 A66-36616
Model estimate of oxygen concentration captured from residual gases by epitaxial germanium and silicon films prepared by vacuum deposition 21 p3795 A66-38521
Q-switch pulsed ruby laser irradiation-induced chemical dissociation and ionization in residual gases 23 p4079 A66-42076

RESIDUAL STRESS

Digital computer automated X-ray diffraction method to determine residual stress to improve processing reliability 01 p0033 A66-10102
Chemical surface hardening effects on brittle fracture characteristics of machine component steels under dynamic impact, covering mathematical relations for strength improvement 03 p3383 A66-13157
Residual stress distributions in thermoviscoelastic materials due to surface cooling [ASME PAPER 65-APMW-9] 04 p0592 A66-14215

Generalization of Koiter theorem applied to study of adaptability of nonuniformly heated elastoplastic bodies to variable loads 04 p0594 A66-14427
Residual stress in epitaxial silicon film on sapphire measured by cantilever beam technique 05 p0733 A66-14673
Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/APM-9] 05 p0776 A66-15431

Compressive residual stress effects on surface layers of through-hardened bearing steels produced by prenitriding before hardening [ASME PAPER 65-WA/CF-7] 05 p0690 A66-15625

Plastic deformation in body under uniform pressure, establishing necessary condition for existence of uniform stressed state in inhomogeneous body 07 p1142 A66-17261
Residual stresses arising during local stress relieving operations 08 p1228 A66-18630
Effect of residual stresses /tensional or pressure/ on fatigue limit of welded parts and structures 08 p1310 A66-19170
Residual stress-strain state of WC-Co alloys by changing sample size during process 09 p1389 A66-20806
Residual stress distributions in thermoviscoelastic materials due to surface cooling [ASME PAPER 65-APMW-9] 10 p1615 A66-21482

X-ray stress analysis of externally-loaded polycrystal lattice strains and residual lattice strains due to internal macro-and microstresses 12 p1957 A66-23629
Cyclic residual plastic deformation method for determining metal fatigue which is independent of stress mode 13 p2195 A66-25442
Notched and unnotched bending fatigue strength of machined work hardened AISI type 305 stainless steel affected by cold worked surface layer with high compressive residual stresses 15 p2521 A66-29073
Elastic deformation of biaxially loaded columns of thin-wall open cross section with initial imperfections 17 p3032 A66-33435
Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/AMP-9] 18 p3248 A66-33584

Pyrolytic graphite production by thermal decomposition of hydrocarbon gas on heated surface, noting annealing, alloying and residual stresses [ASME PAPER 66-MD-54] 21 p3753 A66-38493

Nondestructive testing for material evaluation, noting color radiography, ultrasonic imaging, transmission, attenuation, heat transfer and residual stress measurement 21 p3830 A66-39192
Surface alterations in manufacturing,

discussing effects of electrochemical grinding and electrical discharge grinding in comparison with abrasive grinding and fac milling 21 p3744 A66-3919
Notched fatigue strength improvement, shot-peening through mechanism of compressive residual stress 21 p3831 A66-3919
Residual stresses and strains for case with/ without secondary plastic deformations during unloading under nonuniform heating 22 p3990 A66-4014
Residual stress control in welded structure, noting stress reduction by preheat, prestressing by fusion welding and spotweld impact treatment 22 p3924 A66-4026
Residual stress determination in elastocylindrical orthotropic materials, using stress-strain relations and Sachs equations 22 p3994 A66-4043
Residual stress, crack propagation and fatigue fracture mechanisms in Al alloy sheets with fatigue cracks, for use in win panels [ICAS PAPER 66-34] 23 p4137 A66-4100
Structure effect on superconducting properties of eutectic alloys solidified under variety of growth conditions, discussing interphase boundary, current density and residual strain 24 p4250 A66-4229
Simple device which applies uniform pressure to exterior of cylindrical specimen while curing strain gauge installations 24 p4213 A66-4286

RESIDUE
Method of weighted residuals /MWR/ Galerkin method and variational method compared for approximate solution of differential equations 24 p4232 A66-4283

RESIN

SA EPOXY RESIN
SA LUCITE
SA PHENOL RESIN
SA PLASTIC
SA POLYESTER RESIN
SA SYNTHETIC RESIN
Effect of measuring current and preheating on strains in resin measured with electric resistance strain gauges 03 p0433 A66-12316
Static and high strain rate tensile behavior of epoxy, polyester and urethane resins reinforced with 181-S, 184-E and woven roving glass materials and nylon 13 p2114 A66-26111
Adhesives and sealants in electronics, discussing resin elastomers, epoxies, polyurethanes, polysulfides, outgassing, damping, radiation effects, etc 14 p2318 A66-27103
Honeycomb structure, examining assembly, skin delamination at spars or terminal fitting, glasscloth radome and inspection techniques 20 p3671 A66-37827

RESIN BONDING

Polyimide resins for extreme environments, discussing chemical structure, application, electrical, thermal and mechanical properties, radiation resistance, etc 06 p0899 A66-16292
High temperature resin binders, discussing thermosetting polymer properties, functions, temperature resistivity and application 06 p0900 A66-16294
Evaluation of polyimide impregnated resins for application as heat shield binder when combined with silica and carbon fibers, noting thermostability characteristics 13 p2112 A66-25309
High temperature structural properties of polybenzimidazole, polyimide and phenolic laminates under different loading conditions 13 p2113 A66-25311
Cryogenic temperature effects on mechanical properties of high strength glass-reinforced plastic resins 20 p3587 A66-37095

RESISTANCE

SA CONTACT RESISTANCE
SA CORROSION RESISTANCE
SA CREEP RESISTANCE
SA ELECTRIC RESISTANCE
SA FLOW RESISTANCE
SA FRACTURE RESISTANCE
SA HEAT RESISTANCE
SA MAGNETORESISTANCE
SA OXIDATION RESISTANCE
SA RADIATION RESISTANCE
Solubility curve of tantalum in nickel determining cause of resistance anomalies

served in nickel-tantalum
 items 17 p2940 A66-32968

RESISTANCE COEFFICIENT
 Coefficients of viscous and inertial
 resistance relation to porosity of refractory
 compounds 07 p1049 A66-17902
 Loss in pressure of perforated bottoms as
 function of resistance parameter of single
 orifices 07 p1021 A66-18058
 Resistance temperature dependence, Hall
 constant, thermal emf and Hall mobility of
 silicon with phosphorus 08 p1278 A66-19772
 Tunnel junction RF modes driven by AC
 Josephson current 09 p1417 A66-20030
 Longitudinal and transverse resistance-
 coefficients of thin film supporting
 materials, noting deformation 13 p2107 A66-25460
 Current limitation by space charge in
 polycrystalline barium titanate, noting volt-
 ampere characteristics and hysteresis
 effects 13 p2164 A66-25472
 Resistance anomaly in n-type InSb at very
 low temperatures, noting experimental
 results 16 p2768 A66-30140
 Thickness of gold, silver and copper thin
 films determined, using measurements of
 resistance and Hall voltage 16 p2780 A66-31096
 Effect of storage in air at high
 temperatures on resistance, temperature
 coefficient of resistance of metal alloy film
 resistors, noting effect of silicon oxide
 protective overcoating 16 p2783 A66-31426
 Orifice increases resistance coefficient
 when edge of wedge is facing incident flow
 and decreases it when wedge is turned
 around 16 p2689 A66-31518
 Aerodynamic resistance of cylindrical rotor
 determined, using method based on formulas
 for resistance factors of cylindrical surfaces
 and rotor encasement 21 p3739 A66-39328
 Coefficients of viscous and inertial
 resistance relation to porosity of refractory
 compounds 21 p3752 A66-39402

RESISTANCE DEVICE
 A NEGATIVE RESISTANCE DEVICE
 A PIEZORESISTIVE DEVICE
 Four test methods for determining
 temperature sensitivity of bonded resistance
 strain gauges at high
 temperatures 01 p0070 A66-10886
 High temperature characteristics of
 commercial conventional resistance wire
 strain gauges tested in experimental stress
 analysis 02 p0226 A66-11303
 Thermal expansion coefficient of materials
 determined by tensometric method based on
 measurement of temperature dependence of
 resistance of strain gauge sensing
 elements 02 p0231 A66-11998
 Mathematical evaluation of RF energy
 effects on electroexplosive devices, taking
 into account limited maximum response of
 circuits 03 p0334 A66-12570
 Resistor stabilized VHF power transistor
 discussing power output, reliability, bias
 stability and application 05 p0642 A66-14566
 Resistance across opposite vertices of n-
 dimensional cube with each edge at one
 ohm resistance expressed by equivalent
 circuit 06 p0851 A66-16458
 Foil strain gauges in controlling machine
 process as function of stress, load and
 fluid pressure 07 p1034 A66-17847
 Variable impedance device using
 alvanomagnetic effects in
 semiconductors 09 p1351 A66-19932
 Band pass filter network with constant
 input resistance over entire frequency
 range 10 p1517 A66-21655
 Metal film resistor preparation via vacuum
 evaporation, discussing structure of device,
 with emphasis on substrate materials,
 surfaces and properties 13 p2041 A66-25880
 Resistance strain gauge measuring
 propagating dynamic strains, noting
 dependence of waveform, effect of gauge
 length, time and amplitude errors,
 etc 13 p2198 A66-26225
 Very low DC voltage measurement using
 hopper principle, based on resistance effect
 and employing magnetically controlled
 resistances 16 p2701 A66-30274
 MOS structure as resistor in monolithic
 integrated circuits, noting volt-ampere
 characteristics, temperature coefficient,

etc 17 p2887 A66-32697
 Stability and lifetime of electrochemical
 controlled resistances depend on reading
 electrode material, configuration and choice
 of electrochemical system 17 p2878 A66-33493
 Variable stress measurement using wire
 type resistance strain gauges in measuring
 bridge circuit 18 p3112 A66-34232
 Miniature pressure transducer depending
 on change of resistance across element of
 conductive rubber 21 p3736 A66-38797
 Resistance meters for heavily doped silicon
 and germanium 23 p4068 A66-41571

RESISTANCE HEATING
 Resistance-grown pyrolytic graphite in
 crystallographic, thermal and electrical
 measurements 08 p1244 A66-19223
 Vacuum-evaporation method of fabricating
 thin film circuits, using resistance-heating
 process or electron beam 12 p1847 A66-24954
 Argon arc and resistance diffusion
 /vacuum/ welding of Ti and Ti alloys and
 protective metallic coating deposition on
 welded parts 13 p2110 A66-26027
 Overheating of platinum resistance
 thermometers resulting from measuring
 current for various temperatures and wire
 diameters 16 p2709 A66-31615
 Method for compensating resistance of
 strain gauges for thermal
 expansion 22 p3918 A66-40155
 Adhesive strength cured by integrated
 resistance heaters compared with autoclave
 and/or press bonding 22 p3926 A66-40280
 Thermococonductivity of small thermoelectric
 samples measured, using disk-shaped
 resistance heater 24 p4248 A66-42110

RESISTANCE THERMOMETER
 SA BOLOMETER
 Transient resistance and time delay of
 protective glass coatings on film resistance
 thermometer 06 p0882 A66-16845
 HF resonance type resistance
 thermometer 07 p1031 A66-17411
 Platinum resistance thermometers with
 interchangeable characteristics for liquid
 hydrogen measurements, discussing
 standardization and
 calibration 08 p1226 A66-19598
 Thermal balance and electric resistance of
 vacuum-heated wire for thermoconductivity
 measurements 09 p1390 A66-20830
 Concise numerical technique for reduction
 of data from thin platinum film heat
 transfer resistance
 thermometer 12 p1876 A66-23608
 Maximum absolute error of temperature
 measurements by means of standard
 platinum resistance
 thermometer 16 p2709 A66-31610
 Overheating of platinum resistance
 thermometers resulting from measuring
 current for various temperatures and wire
 diameters 16 p2709 A66-31615
 Thermocouples and resistance
 thermometers installation techniques for
 surface temperature
 measurement 18 p3109 A66-33548
 Surface temperature measurements
 techniques noting thermistors, sensors,
 paints, pellets, etc 18 p3114 A66-34898
 Clear fused quartz thermal parameter
 measurements 21 p3736 A66-38727
 Network for compensating electrical output
 of thin film resistance thermometers for
 deviations due to large heat-transfer
 rates 24 p4207 A66-42176
 Low temperature system for thermal
 conductivity measurements using Ge and Pt
 resistance thermometers and He exchange
 gas switch 24 p4215 A66-43207

RESISTOJET ENGINE
 Resistojet design and fabrication, using
 hydrogen propellant and having 3-kw power
 input [AIAA PAPER 66-224] 10 p1592 A66-21451
 Solar cell powered resistojets in
 conjunction with momentum flywheels for
 attitude control and orbit maintenance of
 OAO [AIAA PAPER 66-225] 10 p1593 A66-21452

RESISTOR
 SA ATTENUATOR
 Nonreactive high-voltage pulse resistors,
 applying transmission line principles and
 noting Chaperon winding 03 p0341 A66-12575

Environmental conditions and circuit
 design effect on various types of resistors,
 examining quality of manufacture and
 economics of reliability 06 p0839 A66-15947
 Electronic component testing by methods
 of Advisory Group on Reliability of
 Electronic Equipment 06 p0839 A66-15949
 Resistor values in semiconductors
 calculated from diffusion parameters and
 vice versa 06 p0857 A66-16928
 Cadmium sulfide based film photoresistors
 insensitive to moisture and long exposure to
 air 09 p1429 A66-20820
 Electronic analog computer nonlinear
 function generation by using silicon carbide
 varistors 11 p1660 A66-23254
 Design and integrated circuit fabrication of
 negative impedance converter, using two
 transistors and two
 resistors 13 p2036 A66-25523
 Transistor-resistor potential element
 design 14 p2251 A66-27206
 Synthesis for driving point and transfer
 functions using standard components /RLC/
 and single negative resistor or replacing it
 with tunnel diode 15 p2475 A66-29861
 Evolution and present status of electronic
 circuit components including manufacturing
 and component
 applications 15 p2468 A66-29890
 Flow characteristics of pneumatic resistors
 determined by three-point
 method 16 p2636 A66-30633
 Compatible thin film resistor-capacitor
 process using nichrome and alumina-silica
 glass for silicon integrated
 circuits 16 p2667 A66-31595
 Technique for formation of thin tantalum
 film resistors on silicon integrated
 circuits 17 p2887 A66-32699
 Pressure vs flow plots of orifice, tube,
 porous-metal and variable resistors used in
 fluid amplifier and logic circuit
 design 17 p2849 A66-33524
 Indirectly heated PTC resistor for
 measurements of low pressures and high air
 velocities, noting basic circuit and
 application to heat
 exchangers 19 p3362 A66-36824
 Varistor properties and
 applications 20 p3533 A66-37986

RESOLUTION
 SA RADAR RESOLUTION
 SA SPECTRAL RESOLUTION
 Interferometric method of measuring
 angular sizes of discrete sources of radio
 emission to obtain high
 resolution 04 p0576 A66-13463
 Search for terrestrial life at kilometer
 resolution, using Tiros and Nimbus
 meteorological satellite 10 p1605 A66-21209
 Photographs 10 p1605 A66-21209
 Resolving power and microphotometric
 granularity of IR films measured with
 resolvometer, noting dependence on
 frequency of incident
 light 10 p1534 A66-21332
 Unequally spaced array antennas, noting
 broadband characteristics, high resolution,
 radiation patterns, etc 11 p1664 A66-22637
 Resolution and noise in Fourier transform
 spectrometer, considering mechanical
 limitations and diffraction
 effects 11 p1705 A66-22869
 Image dissector for lunar observation in
 conjunction with Earth-based telescope,
 noting efficiency of resolution contrast
 sensitivity 12 p1883 A66-24678
 Graph that indicates image motion effect
 on photographic image
 resolution 13 p2078 A66-25607
 Analog simulation of peak smearing in
 spectrometers in terms of convolution
 transforms 13 p2084 A66-26751
 Mock interferometer theory with
 calculation of luminosity and resolving
 power 14 p2294 A66-27496
 Resolving power of radio telescopes and
 radio interferometers as affected by
 condition of propagation of radio waves in
 Earth atmosphere and cosmic
 medium 14 p2239 A66-27735
 Holography of pure phase objects,
 considering incoherent
 viewing 16 p2700 A66-30206
 Multiple beam interferometer theory,
 noting discrepancy between intensity

distribution and Airy formula determination of theoretical resolving power 16 p2706 A66-30936

Time resolution of laser-induced electron emission from cesium diode at high laser power 16 p2719 A66-31135

High sensitivity optical resolution of amine diastereoisomers by gas liquid chromatography 17 p2869 A66-31873

Smear resolution losses in ground target photographs for maneuverable target-tracking reconnaissance cameras, noting MOL simulation 17 p2925 A66-32351

Effect of angular resolving power on measurement of total atomic scattering cross sections 18 p3114 A66-34707

Resolution of multiple target ambiguities in twin-channel frequency-modulated continuous wave radar system using fixed antenna 20 p3596 A66-37218

Amplifying elements ensuring required dynamic properties of resolving amplifier without calculating entire amplifier circuitry 21 p3712 A66-39252

Rake system equipment for tropospheric scatter, noting delay-resolution capabilities and circuit stability 22 p3865 A66-40067

RESONANCE

SA CAVITY RESONANCE

SA CYCLOTRON RESONANCE

SA DOUBLE RESONANCE

SA FERROMAGNETIC RESONANCE

SA MAGNETIC RESONANCE

SA MAGNETOSONIC RESONANCE

SA MECHANICAL RESONANCE

SA MESON-BARYON RESONANCE

SA MICROWAVE RESONANCE

SA OPTICAL RESONANCE

SA PLASMA RESONANCE

SA RLC CIRCUIT

SA SPIN RESONANCE

Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 02 p0286 A66-11358

Stationary resonance regimes of nonlinear systems and stability 03 p0348 A66-12625

Resonance requirements at pair of primary leads for linear nonautonomous quadrupole biased in permanent sinusoidal mode 03 p0342 A66-12691

Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 10 p1602 A66-21092

Asymptotic methods of nonlinear mechanics, involving averaging for differential equations, applied to motion equations of satellites and resonance in electric circuits 15 p2541 A66-29162

Angular distribution of outgoing gamma radiation associated with giant dipole resonance in Si super 28 nucleus 16 p2750 A66-30147

Generalized Cauchy representations and resonance phenomena 16 p2747 A66-30637

Profile of ionized calcium resonance lines radiated from arc plasma jet observed by Fabry-Perot etalon 17 p2970 A66-32714

Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency 17 p2959 A66-32802

Resonance at two secondary terminals of quadrupole network 17 p2903 A66-33422

Giant-resonance characteristics of silicon isotopes calculated, using Balashov magic nucleus model 21 p3798 A66-38913

RESONANCE CHARGE EXCHANGE

Cesium diode parameters and operating characteristics in arc mode not requiring specific ion generating mechanism for interpretation 05 p0615 A66-15538

RESONANCE EFFECT

Resonance effect on surface wave propagation in plasma with varying density, noting absorption and spatial plasma dispersion 03 p0396 A66-12287

Particle spin orientation by resonance radiation in space 05 p0748 A66-14876

Resonance effects for satellites with nominally constant ground track 06 p0952 A66-15906

Oscillating disk induced flow, discussing mathematical formulation of flow field produced by finite-amplitude rotational oscillations 06 p0872 A66-16354

Internal resonance in semiconductors known as spin-magnetophonon 06 p0928 A66-16780

Maximum gain condition of resonance

amplifier for given passband, determining amplification coefficient 07 p1005 A66-17351

Induced radiation at high photon densities, noting applicability of perturbation theory to multiphoton resonance radiation of lasers 09 p1386 A66-20344

Linear theory of resonance excitation of oscillations in plasma by fast-charged particle beam 10 p1571 A66-22015

Nonlinear theory of dipole resonance of cylindrical plasma blob to examine coherent acceleration of plasma 10 p1571 A66-22016

Ferrites for resonance-directional insulators and circulators, noting properties at microwave frequencies and applicability 11 p1664 A66-22659

Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 12 p1922 A66-24219

Nonlinear interaction of electromagnetic waves in plasma, noting propagation of total and diffused wave 13 p2141 A66-25458

Transfer functions of resonant amplifier, frequency multiplier and regenerative frequency divider for small perturbations of input-voltage phase derived, using symbolic shortened equations 14 p2252 A66-27241

Ultrasonic-electromagnetic wave interaction in metals including resonance effects from waves arising in external magnetic field, determining Fermi levels 15 p2559 A66-28621

Nonlinear losses in ferrite phase inverter in relation to natural ferromagnetic resonance 15 p2560 A66-28677

Shipboard tracking radar natural frequencies and mode shapes, noting resonance conditions and sensing, numerical analysis of mathematical model, etc 16 p2678 A66-30461

Resonance phenomena in oscillator acted upon by sinusoidal external force with slowly varying frequency and amplitude 16 p2747 A66-30740

Formant frequency parameter of speech spectrum pattern by cancel method 16 p2653 A66-30800

Nonresonant coupling of, RF power to plasma during ion cyclotron resonance heating in Model C 17 p2962 A66-31822

Steady state resonance absorption of electromagnetic wave and cyclotron heating of low-density plasma 17 p2965 A66-32321

LF electromagnetic field behavior in cold magnetoactive plasma near resonance layer, noting condition for energy absorption increase 18 p3151 A66-35064

Internal resonance in semiconductors known as spin-magnetophonon 19 p3434 A66-35377

Effect of Sun perturbations on motion near Earth-Moon equilateral libration points [AIAA PAPER 65-683] 19 p3461 A66-35890

Nonlinear effects for immersion of positive plasma column in longitudinal magnetic field near critical strength, noting occurrence of resonance in received signal 19 p3407 A66-36078

Linear theory of resonance excitation of oscillations in plasma by fast-charged particle beam 19 p3407 A66-36101

Nonlinear theory of dipole resonance of cylindrical plasma blob to examine coherent acceleration of plasma 19 p3408 A66-36102

Satellite motion under influence of longitude-dependent terms of geopotential in reference frame rotating with satellite mean motion, noting tesseral harmonics effect and dynamical and librational resonances 19 p3470 A66-36388

Quantum mechanical calculations for Lennard-Jones potential show dependence of barrier penetration and resonance effects on phase shifts 19 p3404 A66-36798

Interaction between weakly ionized plasma cylinder and electromagnetic fields, plotting dependences between resonance current vs frequency for different gases 20 p3612 A66-38446

Particle acceleration by plane wave along magnetic field increased by self-induced resonance, analyzing radiation effect on particle acceleration 21 p3782 A66-39017

Coronal emission-line intensities in extreme UV, calculating fluxes for resonance lines of coronal ions from rocket measurement data 21 p3816 A66-39553

Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 22 p3957 A66-40505

Surface Rayleigh waves and resonance effects in elastic bodies, noting motion wedge or load on surface 24 p4291 A66-42805

Resonance of antineutrino-electron interaction cross section, calculating electron density and velocity distribution by Ritz method 24 p4270 A66-42905

RESONANCE PROBE

Tonks-Dattner resonances of plasma column irradiated by RF electric field due to plasma acoustic wave propagation 01 p0025 A66-10905

Resonance absorption measurements cesium vapor 02 p0262 A66-11402

Resonance probe noting HF voltage excite plasma oscillation for electron density 03 p0403 A66-12903

Rocketborne resonance probe experiment for measurement of electron temperature density and collision frequency 05 p0669 A66-14905

Tonks-Dattner resonances, describing frequency modulated technique to study microwave energy irradiated plasma column 06 p0920 A66-16906

Messiaen theory for resonance effect plasma electron density probe 09 p1406 A66-19809

Simultaneous comparison of RF standing wave impedance probe, plasma frequency probe and resonance rectification probe techniques in determining ionospheric electron density 10 p1529 A66-21105

Relationship between AC probe resonance and resonant scattering used to calculate probe response from Vlasov equation employing model of plasma probe 11 p1707 A66-22907

Alfven wave generation in spherically system, determining velocity of MHD wave in longitudinal magnetic field by creating standing wave resonance 12 p1924 A66-24512

RF impedance of absorptive surface plasma probe for case of collapsed ion sheath 13 p2136 A66-26223

Resonance probe with variable HF voltage superimposed on DC voltage applied to conventional Langmuir plasma probe 14 p2289 A66-26825

Noncollisional damping effects limiting amplitude of resonance peaks experimentally verified, using mercury plasma discharges 14 p2346 A66-28274

Quantitative comparison of experimental studies of resonant probe, obtaining resonant frequencies and antiferquencies 14 p2347 A66-28303

Resonance probe for plasma density measurements consisting of vacuum cylinder, noting eigenfrequency 15 p2497 A66-28715

Resonance machine design for producing torsion and bending, ensuring equality of dynamic amplification factors 21 p3827 A66-38611

Increment of constant HF electron flux in resonance probe determined for case of large constant potential, noting role of plasma 22 p3920 A66-40777

Convex programming procedure yielding algorithm for tuning out system from possible resonance zone 23 p4090 A66-41400

RESONANCE SCATTERING

SA NEUTRON SCATTERING

Resonance linewidth deduced from unloaded Q measure of YIG single-crystal ball in waveguide 01 p0122 A66-10558

Asymmetric line near g equals 2.00 of paramagnetic resonance spectrum of Mg powder as polycrystalline spectrum of ferric ions in cubic field 01 p0123 A66-10600

Anderson model to obtain transition metal impurities effect on superconductors due to resonance scattering 03 p0407 A66-12303

Resistivity and Hall coefficient vs temperature in heavily doped n-type GaS and related semiconductors 04 p0561 A66-13705

Resonance radiation emitted by alkali cloud for ionospheric temperature measurement, considering multiple scattering and radiative transfer inside cloud 05 p0672 A66-15042

Low temperature thermal conductivity of

mev electron-irradiated and annealed single-crystal silicon 05 p0741 A66-15868
Long wavelength limit in scattering from homogeneous dielectric cylinder at oblique incidence 06 p0830 A66-16277
Green function method in theory of dispersion and absorption of electromagnetic radiation in semiconductors, considering resonance line shapes 09 p1411 A66-19961
Resonance carrier scattering and spin-magnetophonon interaction effect on semiconductor magnetic susceptibility 09 p1427 A66-20200
Modal expansions for resonance scattering phenomena 10 p1498 A66-21595
Relationship between AC probe resonance and resonant scattering used to calculate probe response from Vlasov equation, employing model of plasma 11 p1707 A66-22974
Tables of functions encountered in resonance radiation transfer theory 13 p2189 A66-26574
Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 14 p2341 A66-27151
Energy dependence of elastic resonance scattering of low energy electrons from He, Ne, Ar and nitrogen gases at angles ranging from 8 to 110 degrees 14 p2337 A66-27797
Dilatational wave resonance scattering of waterborne sound waves on hollow cylinder excited to oscillation by incident sound 14 p2401 A66-27863
Elementary particle theory, interactions at accelerator energies, bootstrap mechanism for generating bound states and resonances and Regge pole concept applied to high energy scattering 15 p2545 A66-29548
Energy spacing of geometrical resonance structure in very thick indium films, noting interference between electron-like states which propagate with different velocities 16 p2769 A66-30159
Earth albedo estimation, backscattered interplanetary radiation and resonance scattering of dayglow 20 p3553 A66-38194
Quasi-oscillations of cold sharply bounded plasmas, noting surface charge role in scattering and AC probe resonances 20 p3611 A66-38361
Resonance scattering of electromagnetic waves on arbitrary rarefied plasma region with near-zero intrinsic wave number relative to small perturbation 22 p3869 A66-40758
Diffusion emission of solar prominences in hydrogen alpha Balmer line, noting luminescence due to resonance scattering of solar emission 23 p4126 A66-41073
Resonance absorption of gamma-quanta by tin in germanium 23 p4110 A66-41133
Plane homogeneous wave scattering by cylindrical plasma column with glass wall placed in vacuum, noting axial drift velocity and resonance peaks 23 p4101 A66-41366
Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 24 p4244 A66-42971
RESONANCE TESTING
Technique for extracting natural modes and frequencies from resonance tests 06 p0967 A66-16929
Interference and location of close natural frequencies in resonance testing 07 p1146 A66-18276
Resonance-type fatigue testing machine for variable stress ranges and frequencies from 100 to 400 cps 07 p1147 A66-18387
Equivalent circuit representation of lossless 2N-port symmetrical lattice in multimode waveguide 12 p1832 A66-23907
Computation method of damped resonance frequencies for system of equal masses, spring constants and viscous damping coefficients 13 p2194 A66-25140
Subharmonic vibrations during resonant testing of thin walled beams for coupled torsional and bending vibrations 18 p3256 A66-34559
Automatic resonance testing technique for

exciting normal modes of vibration of complex aircraft structures 21 p3823 A66-38566
Single point excitation techniques for resonance testing of structural inertia, stiffness and damping 21 p3824 A66-38567
Characteristic phase-lag method for analyzing forced response of damped systems used in optimal multipoint excitation 21 p3824 A66-38568
RESONANT CAVITY
SA CAVITY RESONANCE
Microwave permeability and permittivity measurement, knowing resonant frequency of unperturbed cavity and distribution of electric and magnetic field 01 p0025 A66-10527
Pulse transmission through cavity, observing if instability or bistable response is present, in connection with behavior of ferromagnetic thin films of permalloy 01 p0120 A66-10529
Control systems to avoid detuning effects caused by plasma in resonant cavity experiments on plasma acceleration and confinement in HF electromagnetic fields 01 p0040 A66-10546
Helicon effect in semiconductors, using indium antimonide in resonant cavities 02 p0276 A66-12004
Design, operation and performance capability of hydrogen maser 03 p0377 A66-12476
Vibration modes of gaseous medium in parabolical cavity investigated for development of liquid rocket motor 03 p0356 A66-12823
Microwave permeability and permittivity obtained by measuring RF shift in cylindrical resonant cavity 04 p0558 A66-13419
Coaxial helical resonator for VHF filters with sharp selectivity 05 p0644 A66-14578
Coupled cavity slow-wave circuits, discussing equivalent circuit construction with similar current flow characteristics for behavior analysis 06 p0846 A66-16096
Reaction cavity method of measuring low-resistance semiconductors in which entire end wall of cylinder is replaced by sample being measured 06 p0881 A66-16642
Current oscillations in nonuniformly illuminated cadmium sulfide, examining effects of variation in parameters 06 p0925 A66-16664
Solution to problem of cylindrical cavity containing ferrite specimen in form of hollow cylinder 07 p1009 A66-17926
Solution to problem of cylindrical cavity containing ferrite and dielectric specimens in hollow cylindrical form 07 p1009 A66-17927
Measurement of components of permeability and permittivity tensors of magnetized ferrites by cavity method 07 p1009 A66-17928
Decay time of regular spiking in ruby laser in nearly concentric cavity and photomixing of light output 08 p1235 A66-19812
Effect of load mismatch on laser output, determining nonlinear dependence of equivalent negative conductance as function of oscillation amplitude in laser resonator cavity 09 p1386 A66-20435
Microwave cavity techniques to measure electron precursors in shock tube [AIAA PAPER 66-175] 10 p1560 A66-21427
Coaxial helical resonator for VHF filters with sharp selectivity 11 p1666 A66-22688
Three-cavity extended-interaction klystron with cavities consisting of resonated sections of bar structure tested in pulsed operation, noting relation between cavity length and efficiency 16 p2663 A66-31020
Reflection type microwave modulator with semiconductor filled resonant cavity 17 p2896 A66-33301
Quartz resonators with DT-cut rectangular piezoelements 18 p3075 A66-33633
Barium titanate rods as nonlinear element of S-band resonant cavity microwave parametric amplifier, noting variation of permittivity of rods with percentage of barium titanate 22 p3872 A66-39736
Resonant cavity transducer for converting TE mode of rectangular waveguide into circular waveguide mode, noting coupling coefficient of cavity 22 p3918 A66-40183

Anisotropic acoustic attenuation measured from surface excitation in novel resonant cavity configuration, discussing validity in quartz and effective viscosity in silicon 22 p3866 A66-40407
Perturbation of ruby laser by vibrating one of mirrors constituting resonant cavity 24 p4225 A66-42999
Dipole moment of perchlorofluoride by measuring absolute absorption maximum and linewidth parameters in resonant cavity 24 p4170 A66-43038
RESONANT FREQUENCY
Resonant frequency equation for line segment with reactive loads at both ends, using Chebyshev principle 02 p0199 A66-11754
Spurious signals in wideband S-to X-band varactor tripler suggesting they were caused by pumped-up LF resonances in input circuit 03 p0339 A66-12451
Spatial distribution of HF electric field in resonant discharge determined, using electron beam probing technique 03 p0404 A66-12985
Equilibrium electron density of RF discharge excited with frequency higher than electron-neutral collision frequency and controlled by resonance from plasma dispersion 03 p0405 A66-12986
Resonance modes in rods for analyzing coupled oscillations in sandwich plates including differential equations for oscillations 03 p0442 A66-13303
Vibration measuring apparatus for resonance frequencies of turbines and other machine parts 04 p0519 A66-13758
Dielectric and metallic rod equivalent circuit, examining resonant frequency change upon placement in waveguide, using perturbation techniques 05 p0649 A66-15120
Modulation of laser light with composite Fabry-Perot resonator, using more than three multiple reflecting plates 05 p0698 A66-15836
Tuning multicircuit resonant systems to given frequency passband by graphical resonance curves 07 p1005 A66-17401
Cut-off frequencies of waveguides with arbitrary cross sections measured and expressed as guide wavelengths at resonant frequencies in cavity 07 p1008 A66-17515
Effect of sample geometry on frequency of helicon waves in lead telluride at low temperature 07 p1101 A66-18201
Resonant effects theory observed by sounding equipment on ionospheric satellite Alouette 08 p1212 A66-18620
Two-frequency volume resonator with independent tuning within wide frequency band 08 p1191 A66-18918
Feedback used in increasing passband and gain of tuned amplifier, achieving compensation for input reactance when deviating from resonant frequency 09 p1353 A66-20439
Doubling frequency in ferrites in presence of constant magnetic field not equal to resonance field at frequency being doubled 09 p1348 A66-20791
Laser configuration generating single frequency radiation in single spatial mode with high output achieved by suppressing all resonances but one 10 p1541 A66-21250
Resonant frequencies for fundamental modes in circular cylindrical and rectangular paralleloiped dielectric resonators calculated for various physical dimensions and dielectric constants 10 p1513 A66-21905
Internal or external pressure effect on natural frequencies of conical shell, noting role of inertia forces, using linear shell theory 11 p1780 A66-22330
Exponential resonators in filters and matching networks, determining reactance or susceptance frequency behavior by plotting curves with analog computer 11 p1661 A66-22382
Contribution of electron-electron correlations to longitudinal dielectric constant for case of one-component plasma, noting resonance effect and formula for plasma oscillation damping 11 p1744 A66-22446
Breakdown regime of diffusion-controlled HF resonance gas discharge analyzed kinetically, solving Boltzmann equation for electron distribution

function 11 p1740 A66-23081
 Resonance properties of germanium analyzed by passing DC and AC through samples of various specific resistance with tungsten needle contacts 11 p1759 A66-23419
 Landau damping of transverse oscillations in collisionless plasma at ion cyclotron resonance and collisional damping in zero-temperature plasma 13 p2142 A66-25706
 Free oscillation amplitude increase from resonance traversal occurring when perturbation frequency passes through resonant value in weakly nonlinear system 13 p2146 A66-25740
 Coupled parametric and self-excited vibration of plate with supersonic flow past one side, assuming periodically varying forces act in plane of plate, noting degeneration of parametric resonance main region 14 p2398 A66-27456
 Dielectric constant of gold-plated rectangular parallelepiped solid at hyperfrequencies determined via resonant frequency method 14 p2366 A66-27944
 Equivalent circuit for centipede coupled-cavity waveguide represents both passbands and is accurate within few percent 14 p2258 A66-27954
 Quantitative comparison of experimental studies of resonant probe, obtaining resonant frequencies and antiresonances 14 p2347 A66-28306
 Shear wave velocity computed from torsional resonant frequency 14 p2410 A66-28482
 Resonance probe for plasma density measurements consisting of vacuum cylinder, noting eigenfrequency 15 p2497 A66-28711
 Logarithmic decrements of quartz crystal driven in torsional vibration mode at resonant frequency determined as function of temperature in liquid helium 15 p2537 A66-28869
 LF resonances in mixed state of pure niobium, noting line shape and damping decrease 16 p2770 A66-30186
 Excitation of longitudinal electron plasma oscillations by nonlinear resonance of two TEM waves with frequencies differing by plasma frequency 16 p2757 A66-30195
 Vibration of entire multifrequency system reduced to single frequency resonance when frequency passes through zero, illustrated with solar system 17 p2959 A66-32934
 Resonant frequency change of oscillatory circuit due to nonlinear capacitance of semiconductor diode used as amplitude detector 17 p2898 A66-33523
 Aerial mount and satellite orbit effect on steerable antenna control system, noting frequency and tracking data 18 p3071 A66-34279
 Cavity natural resonant frequencies in cylindrically stratified magnetoplasma examined by exact harmonic series solution 18 p3072 A66-34566
 Resonant frequency of helicon waves in indium, deriving high field Hall coefficient 19 p3445 A66-36331
 Two-photon laser excitation conditions deteriorated by presence of resonator tuned on transition frequency between operating levels of matter 20 p3576 A66-37143
 Frequency doubling in resonance laser, obtaining second harmonic field for laser radiation by giant pulses 20 p3576 A66-37144
 Necessary conditions for subharmonic and superharmonic synchronization in weakly nonlinear systems that permit energy exchange between response at excitation frequency and close to resonance frequency 21 p3772 A66-39355
 Microwave cavity resonant frequency sampler for direct oscilloscope-photographic recording of electron density, recombination and diffusion time in decaying plasma 21 p3740 A66-39389
 Doubling frequency in ferrites in presence of constant magnetic field not equal to resonance field at frequency being doubled 22 p3874 A66-39850
 Landau damping of longitudinal electron plasma waves in finite-diameter uniform-density cylindrical plasma, assuming Maxwellian velocity distribution 22 p3955 A66-40104
 Linearized potential theory for forced

vibration of continuous self-exciting plate on hinged support in supersonic flow, investigating parametric resonance frequencies relation to coupling of eigenfunctions 22 p3995 A66-40508
 Resonant frequencies of VHF Lecher line coupled to mercury arc plasma via split cylinder coupler measured as function of electron density 23 p4100 A66-41155
 Resonant frequencies and associated mode shapes of transverse vibrations of truncated conical shells over wide range of geometrical and modal parameters 23 p4139 A66-41691
 Cyclically moving loads causing resonance in elastic rods, strings and torsional members having fixed ends 23 p4141 A66-41922
 Spin-orbit coupling in solar system, examining resonant spin rates for one-and two-body planet/satellite systems with eccentric orbits 24 p4272 A66-42203
RESONANT VIBRATION
SA Q-FACTOR
 Interaction of parametric lateral vibration and forced longitudinal vibration considering natural vibration, especially longitudinal and lateral resonance of sandwich plates 01 p0157 A66-10928
 Diffraction losses of open resonator oscillations with plane mirrors as function of absorption band of mirror 02 p0241 A66-11772
 Oscillations in triaxial mirror ellipsoid and quantum conditions, determining natural oscillation frequency and position of acoustic surfaces 03 p0393 A66-13186
 Structural damping by means of integrally damped sheet laminates for controlling resonant response 04 p0525 A66-13639
 Resonant characteristics of hydraulic systems, particularly water or oil-supply lines, using impedance approach [ASME PAPER 65-FE-6] 06 p0885 A66-16214
 Parametric resonance excitation of plasma oscillation 08 p1262 A66-19013
 Resonant excitation by external forces, propagation and reflection of ion acoustic standing waves between electrodes in mercury vapor discharge 10 p1568 A66-21831
 Resonant oscillation of nonlinear system with several rapidly rotating phases, using Volosov averaging method 10 p1619 A66-22180
 Resonance frequencies during longitudinal and radial oscillations of hollow cylindrical piezoelectric elements 13 p2194 A66-25086
 Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 13 p2194 A66-25088
 Resonance oscillations and rotations in pendulum with vibrating suspension point analyzed, using averaging method to determine stability conditions for steady state operation 14 p2290 A66-27164
 Structural resonant amplitude reduction for increased fatigue life and component malfunction reduction, noting application of internal damping, and use of viscoelastic materials 16 p2715 A66-31201
 Yield and flow stress reduction in high strength metals during ultrasonic vibration 16 p2821 A66-31462
 Magnetoacoustic natural oscillations in solid MHD resonators 17 p2971 A66-32787
 Amplitude dependence of energy dissipation due to internal friction in metals and alloys of various lattice types under near-resonance loading 17 p2940 A66-33228
 Vibration analysis of CSIRO 210-ft radio telescope, discussing natural frequencies, structure resonance effects, error detection, etc 18 p3083 A66-34297
 Periodic solutions of nonlinear mechanical oscillator under harmonic excitation and plot of resonance curves 18 p3259 A66-34941
 Resonance frequencies during longitudinal and radial oscillations of hollow cylindrical piezoelectric elements 21 p3822 A66-38511
 Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for

self-excitation 21 p3822 A66-38511
 Damping measurement for resonant bar oscillation 21 p3828 A66-38711
RESONATOR
SA CAVITY RESONATOR
SA ELECTRON TUBE
SA MAGNETRON
SA MASER RESONATOR
SA MULTIMODE RESONATOR
SA OPTICAL RESONATOR
 Field distribution in confocal resonator with arbitrarily located iris 02 p0196 A66-11414
 Synchronization of reflex klystron load with resonator with nonlinear capacitance from p-n junction of semiconductor diode third harmonic of external signal 03 p0342 A66-12612
 Continuously tunable microwave delay equalizer consisting of 3-db direction coupler and two equal resonators 03 p0344 A66-13012
 Complex output resistance and conductivity of electromagnetic cylindrical resonators transmitting across gaps, using variational method, noting role of incident and reflected waves 04 p0496 A66-13904
 Band stop filters, discussing insertion loss vs frequency characteristics for large area, small dissipation and arbitrary number of resonators 06 p0845 A66-16004
 Mode losses of single iteration in confocal beam waveguide resonator and transmissive systems with circular lenses separated by twice focal length 06 p0848 A66-16100
 Open-ended cylindrical resonators for plasma study, determining charged-particle concentration 06 p0915 A66-16144
 Spherical functions to calculate natural frequencies of resonators 06 p0849 A66-16377
 Effect of degree of coupling between resonator system and load on generation zones and regenerative amplification of pulsed magnetron, noting characteristics 09 p1353 A66-20433
 Characteristics of quasi-optical conduction, millimeter wave resonator with gas, showing resonance absorption 09 p1381 A66-20499
 Lumped-circuit LF general three-resonator filter in rectangular wave guide using inductive susceptances as coupling elements 10 p1514 A66-21911
 Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 10 p1570 A66-21999
 Exponential resonators in filters and matching networks, determining reactance or susceptance frequency behavior by plotting curves with analog computer 11 p1661 A66-22382
 Fox and Li pattern verification in microwave open resonator 11 p1704 A66-22390
 Self-oscillations of dielectric rods between two metallic plates 11 p1669 A66-23104
 History and development of atomic frequency standard, discussing newest atomic oscillators 12 p1880 A66-24122
 Expansion of E type symmetrical oscillations in axisymmetrical delay systems used in calculation of cylindrical resonators 13 p2031 A66-25227
 Spherical functions to calculate natural frequencies of resonators 13 p2042 A66-25958
 Ghost modes in open microwave resonator waveguides containing dielectric slabs of rectangular geometry with anisotropic dielectric constant 14 p2246 A66-26790
 Equivalent resonator method for calculating irregular waveguides 14 p2251 A66-27233
 Transcendental equation derived for approximate calculation of waveguide resonators containing dielectric 14 p2251 A66-27240
 Behavior of resonator quantum devices using oscillating circuit with quasi-linear negative conductance 14 p2260 A66-28161
 Semiconductor properties measurements using resonator with slit 15 p2560 A66-28633
 Resonant modes in ring shaped resonator formed by reflector strip bent into circle noting eigenfunctions and eigenvalues of integral equation 15 p2457 A66-28780
 High Q open resonator using two-conical optics and capable of traveling wave resonances at millimeter and submillimeter

- velengths 15 p2461 A66-29011
 ishal method, logical means of tuning
 ultiple-resonant-circuit filters and for
 justing coupling coefficients between
 adjacent resonators 15 p2463 A66-29036
 Tunnel diode coupling to Q resonator of
 brid type, ensuring wide tuning range and
 oscillation frequency insensitive to
 temperature change, supply voltage
 variations, etc 15 p2466 A66-29676
 Open-ended cylindrical resonators for
 plasma study, determining charged-particle
 concentration 15 p2557 A66-29878
 K-band Fabry-Perot resonator using plane
 and concave mirrors, determining
 overvoltage factors in interferometer, noting
 diffraction losses 16 p2707 A66-31207
 Resonator and waveguide designs using
 multilayer dielectric 16 p2666 A66-31557
 Parametric amplification by monochromatic
 pumping of electromagnetic oscillations of
 substance contained in
 resonator 17 p2885 A66-32244
 Quantum mechanical distribution of modes
 in open resonator by wave functions of
 continuous spectrum 17 p2885 A66-32245
 Magnetoacoustic natural oscillations in
 solid MHD resonators 17 p2971 A66-32787
 Coupling of resonators in electromechanical
 filter, noting application of energy trapping
 piezoelectric
 resonators 18 p3078 A66-34090
 Radiation energy emitted by magnetic
 pole passing along axis of cylindrical
 waveguide resonator and waveguide of
 periodic structure 18 p3088 A66-34969
 Microwave general four-resonator filter,
 with data on filter couplings tabulated for
 various center
 frequencies 19 p3317 A66-35720
 Solid laser radiation operating in Q-
 switched resonator regime noting effect of
 finite rate of switching, finiteness of
 relaxation time, transmission coefficient
 factor, etc 20 p3576 A66-37142
 Complex output resistance and
 conductivity of electromagnetic cylindrical
 resonators transmitting across gaps, using
 variational method, noting role of incident
 and reflected waves 20 p3532 A66-37863
 Natural frequency equations for TEM mode
 oscillations of coaxial resonator with moving
 dielectric material 21 p3713 A66-39321
 Mechanical-type filters used in electronic
 circuits including quartz filters, piezoelectric
 materials, metallic resonators, ceramic
 inverters, torsion resonators and
 miniaturized filters 21 p3717 A66-39628
 Attenuation of single- and double-section
 bridge filters containing one two-winding
 magnetostrictive resonator and one two-
 winding coil 22 p3875 A66-40070
 YIG resonators, oscillators and filters in
 microwave design 22 p3880 A66-40737
 Resonators use for higher sound
 attenuation in waveguide with sound
 absorbing cladding 23 p4090 A66-41416
 Millimeter wave resonant interferometer
 capable of measuring spatial distribution of
 electrons in low density transient plasma
 column subject to
 perturbation 24 p4209 A66-42191
 Integral equation of flat-roof resonator
 solved by iteration method, deriving mode
 patterns, phase shifts and power
 losses 24 p4174 A66-42807
RESPIRATION
 SA ARTIFICIAL RESPIRATION
 SA HIGH ALTITUDE BREATHING
 SA LIQUID BREATHING
 SA OXYGEN METABOLISM
 SA PRESSURE BREATHING
 SA RESUSCITATION
 Clinical findings of effect on man during
 6-day exposure to oxygen-helium
 atmosphere at 258 mm Hg total
 pressure 18 p3058 A66-33779
RESPIRATORY DISEASE
 Effect of delayed feedback in respiratory
 disease analyzed for behavioral cybernetic
 theory, using computer-controlled
 relay 02 p0186 A66-11648
 Effects and causes of sinus barotrauma
 pressure differential between sinuses and
 outside atmosphere/ noting prevention,
 treatment and
 aftereffects 10 p1488 A66-22108
 Mortality and histopathology of germ-free
 rats and mice exposed to pure oxygen,
 noting effect of chronic respiratory
 condition 24 p4162 A66-42315
RESPIRATORY IMPEDANCE
 Dynamic behavior of aircrew breathing
 equipment considering cyclic flow response
 tests, stability problems, measurement
 techniques and human respiratory
 impedance 03 p0329 A66-13350
 Whole-body plethysmographic method for
 determination of total inertia of air
 breathed by humans, using rectangular
 coordinates 13 p2011 A66-26323
RESPIRATORY PHYSIOLOGY
 Aerospace Breathing Chart used in
 analytical evaluation of breathable
 atmospheres and emergency oxygen systems
 [AIAA PAPER 65-723] 03 p0328 A66-12544
 Increased blood circulation for
 compensating anoxia by changes in cardiac
 output, blood distribution and red blood cell
 volume 10 p1489 A66-22113
 Physiology of breathing at reduced
 pressure and design of aircraft oxygen
 system, noting cabin and mask
 design 10 p1489 A66-22116
 Physiological differences between air and
 low pressure oxygen atmospheres, discussing
 role of nitrogen in
 respiration 14 p2228 A66-27474
 Hypoxemia induced in man by sustained
 forward acceleration while breathing pure
 oxygen in five pounds per square inch
 absolute environment 15 p2430 A66-28659
 Adaptation rearrangements in organisms of
 mice during and after exposure to high
 concentrations of carbon
 dioxide 15 p2438 A66-29479
 Shape changes in human chest wall during
 static respiration at end of spontaneous
 expiration, maximum expiration and
 maximum inspiration 15 p2441 A66-29649
 Hypoxic hypoxia attenuation mechanism by
 carbon dioxide enrichment of air
 intake 16 p2638 A66-30273
 Chronic exposure of rats to gaseous
 environments of varied composition and
 pressure, noting exposure capsules, gas flow
 system, respiratory gas analyzer,
 etc 16 p2643 A66-30650
 Pulmonary effects of two-week exposure of
 four men to helium-oxygen atmosphere at
 total pressure of 380 mm
 Hg 16 p2639 A66-31121
 Suitability of oxygen-helium atmosphere
 for manned space missions proven by 56-day
 human exposure at 258 mm Hg total
 pressure 18 p3057 A66-33768
 Major and minor constituents of oxygen-
 helium atmosphere to which humans were
 exposed for 56 days 18 p3057 A66-33769
 Respiratory effects of 56-day human
 exposure to oxygen-helium
 atmosphere 18 p3058 A66-33774
 Respiratory activity and hematological
 factors of avian blood cells, discussing
 oxygen consumption, thermal effects, tissue
 and erythrocyte
 metabolism 23 p4024 A66-41043
RESPIRATORY RATE
 Respiration and anoxia, noting anoxic
 anoxia, reduced oxygen carrying capacity of
 blood and inadequate flow of oxygenated
 blood to tissues 10 p1488 A66-22112
 Cardiac and respiratory changes in
 spacemen under light physical strain during
 Voskhod I orbital flight 13 p2010 A66-25891
 High respiration rate of *Chlorella*
 maintained by blue-green
 light 19 p3287 A66-36435
 Vibration effect on external respiration of
 rats, noting independence of oxidation
 metabolism from respiratory
 changes 23 p4027 A66-41343
RESPIRATORY SYSTEM
 SA CARDIORESPIRATORY SYSTEM
 Explosive decompression effects on
 respiratory system, considering pressurized
 suits operating at high
 altitudes 06 p0816 A66-16063
 Age dependence of resistance of chickens
 to 100 percent oxygen at one atm /OAP/,
 noting delayed mortality in adult
 birds 07 p0997 A66-17458
 Aerosol deposition in lungs of spacemen
 under weightless
 conditions 12 p1806 A66-23920
 Molecular nitrogen photofixation relation
 to electron-donor respiratory system,
 activity of hydrogenase and dehydrogenases
 and photosynthesis 13 p2010 A66-25893
 Conditioned reflex role in information of
 subthreshold stimuli of respiratory system
 in dogs subjected to electric shock and
 carbon dioxide increase 14 p2228 A66-27185
 Physiological, psychological and biochemical
 effects on humans after 8-hr inhalation of
 low carbon monoxide
 concentration 15 p2435 A66-29448
 Resistance to hypoxia by individuals at
 height of 1650 m trained for high altitude
 climbing, noting
 equipment 15 p2435 A66-29449
 Prolonged hypokinesia effect on human
 resistance to transverse g-forces, detailing
 respiratory and circulatory systems, motor
 response and visual
 acuity 15 p2437 A66-29473
 Rotations effect on functional state of
 human cardiovascular and respiratory
 systems at various angles of inclination of
 torso 15 p2437 A66-29476
 System measuring various respiratory
 parameters using hybrid computer for
 monitoring and
 instrumentation 16 p2643 A66-31125
 Resuscitative device combining
 nonbreathing valve and squeeze bag,
 noting advantages 17 p2864 A66-32173
RESPONSE
 S CONDITIONED RESPONSE
 S DYNAMIC RESPONSE
 S FREQUENCY RESPONSE
 S HEMODYNAMIC RESPONSE
 S MODAL RESPONSE
 S PHYSIOLOGICAL RESPONSE
 S TIME RESPONSE
 S TRANSIENT RESPONSE
REST
 S BED REST
 S SLEEP
RESUSCITATION
 Resuscitative device combining
 nonbreathing valve and squeeze bag,
 noting advantages 17 p2864 A66-32173
RETINA
 Receptive field organization of rat retinal
 ganglion cells, examining maintained impulse
 activity with stationary spots of
 light 16 p2640 A66-31184
 Choriorretinal lesion produced by pulsed
 ruby laser beam and complex changes in
 retinal excitability in cats 16 p2641 A66-31761
 Dendritic arborization of retinal ganglion
 cells of rat stained in vivo with methylene
 blue, relating it to receptive field
 organization of these
 cells 17 p2849 A66-31995
 Frog retina layered model, stereoscopic
 system and decision/control system in
 connection with robot data reduction in
 Voyager missions 24 p4168 A66-43081
RETINAL ADAPTATION
 Visual factors in aviation, examining night
 vision and dark adaptation, scanning
 technique to locate object, glare and dazzle
 from artificial source 10 p1490 A66-22132
 Retinal adjustment to light at different
 levels of hypoxia 17 p2859 A66-32231
 Schoen hypothesis concerning image arrival
 time at cortex, depth values, retinal input,
 stereopsis, etc 17 p2862 A66-33089
 Observed regularities of contrast
 characteristics of human visual system in
 photopic luminance region examined by
 psychophysics of response/stimulus peak-to-
 peak measurements of spatial sine wave
 patterns 21 p3700 A66-39129
 Eye patch and flashblindness
 protection 22 p3857 A66-39794
 Thresholds, b-wave latencies, stimulus
 intensity/b wave amplitude relationships and
 diffuse adaptation effects upon
 electroretinogram stimulation by light
 subtending 20 degree visual
 field 22 p3856 A66-40965
RETINAL IMAGE
 Illusion theory to explain difference
 between true motion of figure and apparent
 motion, emphasizing geometric effect in
 changes in retinal images 20 p3504 A66-36945
RETRIEVAL
 S DATA RETRIEVAL
 S INFORMATION RETRIEVAL
RETROROCKET
 Northrop Cloverleaf steerable parachute

combined with horizontal thrust rocket engine in descent system for manned Mars landing vehicles
[AIAA PAPER 65-385] 16 p2810 A66-30904
Exact expression derived for minimum energy deorbit problem, calculating minimum retrovelocity required to achieve specified path angle at initial atmospheric entry
19 p3460 A66-35606
Skirt Jet peripheral retrorocket for lightweight terminal impact attenuation system using multiple nozzle rocket motors assembled to form annulus around outer periphery of vehicle
22 p3986 A66-40598

REUSABLE SPACECRAFT

Radiative vs active cooling systems as part of refurbishment requirements critical to economic feasibility of reusable launch vehicle systems
01 p0143 A66-10796
Design of reusable space launch vehicle systems considering propulsion, structural weights, heat protection and cost
[SAE PAPER 650801] 01 p0144 A66-10816
Economic feasibility of all-rocket approach to reusable launch system, comparing various classes of launch vehicles, noting need for payload recovery
[SAE PAPER 650802] 01 p0144 A66-10817
Two-dimensional ascending trajectories used to determine performance and structural parameters of reusable high altitude research rocket
04 p0584 A66-13524
Launch vehicle development, discussing requirements to support program, economic and operational development and reusability
[SAE PAPER 660452] 17 p3017 A66-33161
Reusable first stages using liquid propellant compared with nonreusable stages using solid and liquid combinations, for minimum cost of loaded-and-ready-for-launch stage cost per unit of stage payload mass
19 p3470 A66-36623

REVERSE TIME

SA PONTYAGIN PRINCIPLE

Reversal of diode with delay between last direct pulse and first reversed pulse
13 p2031 A66-25230

REVERSED FLOW

Transient voltage across series-connected silicon rectifier cells immediately after commutation
01 p0035 A66-10206
Reverse-flow film cooling of small rocket engine chamber
12 p1937 A66-24718
Reverse current across collector-base junction in transistor
12 p1844 A66-24822
Reverse flow and deformation optimization theories applied to subsonic aeroelasticity of lifting surface in harmonic oscillation, using numerical integration and computer programs
24 p4157 A66-42343

REYNOLDS EQUATION

SA LINEAR EQUATION

SA NAVIER-STOKES EQUATION

Reynolds equation for compressible and incompressible lubrication for load coefficients and attitude angles of axial groove cylindrical bearings
[ASME PAPER 65-LUB-16] 04 p0528 A66-14248

Reynolds analogy computation of heat transfer coefficient of turbulent electroconducting liquids in transverse magnetic field
16 p2765 A66-31401
Squeeze-film method for generating high damping coefficients with limited space based on Reynolds equation and simplified Navier-Stokes equation
17 p2930 A66-32946
Rotor-tilting pad gas lubricated journal bearing system performance determined by solving dynamic equations together with time-transient Reynolds equation
[ASME PAPER 66-LUBS-3] 17 p2931 A66-33177

Eigenvalues and eigenvectors obtained by numerical solution of special Hill equation in lubrication theory
[ASME PAPER 66-LUBS-13] 17 p2932 A66-33185

Performance of hydrodynamic, hydrostatic or hybrid bearings determined by numerical solution of Reynolds lubrication equation for incompressible fluid films
[ASME PAPER 66-LUBS-4] 17 p2932 A66-33186

Stress velocities and numbers and use in hydrodynamic distorted and undistorted models
22 p3897 A66-39674

REYNOLDS NUMBER

SA CRITICAL REYNOLDS NUMBER

SA FROUDE NUMBER

Orifice constant discharge coefficient when Reynolds number drops below 10,000 achieved in series or parallel flow
01 p0059 A66-10958

Hypersonic wake transition map noting far wake, near wake and interpolation phenomena
03 p0356 A66-12814

Incompressible laminar boundary layer for plate with slot suction at high Reynolds number
04 p0509 A66-13654

Limiting relative laws of friction and heat transfer applicable to nonisothermal gas flow with finite Reynolds numbers
04 p0598 A66-14440

Dynamic equations and Reynolds number approximations for moderately weak turbulence
05 p0662 A66-14718

Integral approximations for skin friction and heat transfer in MHD channel flow
[ASME PAPER 65-HT-15] 05 p0783 A66-14739

Gas-cooled electronic equipment, discussing experimental heat transfer and pressure drop data, packaging and thermal effectiveness parameters
[ASME PAPER 65-WA/HT-44] 05 p0650 A66-15665

Heat and mass transfer from vertical plates boundary layer in convection at low Reynolds number by interferometry
[ASME PAPER 65-WA/HT-39] 05 p0664 A66-15669

Motion of solid body with cavity filled with viscous incompressible fluid at small Reynolds number, reducing hydrodynamic problem to solution of stationary linear boundary value problems
06 p0873 A66-16707

Ellipsoid of revolution of large aspect ratio with axis of revolution perpendicular to uniform flow at infinity analyzed for small Reynolds number
06 p0873 A66-16995

Secondary flow in fully-developed turbulent flow in straight channels, noting Reynolds number effect, directional characteristics of local wall shear stress, etc
06 p0873 A66-16997

Pressure gradient effect on stability of laminar boundary layer when skin friction at wall vanishes, noting Reynolds number of flow
06 p0874 A66-16999

Flow field in rectangular cavities at low Reynolds number
07 p1020 A66-17941

Inner and outer expansions method applied to source flow model involving viscous effects in hypersonic axisymmetric free jets at large Reynolds numbers
07 p0982 A66-18122

Friction stresses in turbulent lubrication film and dependence on Reynolds number and pressure distribution studied, using mixing-length hypothesis
[ASLE PREPRINT 65AM 3A1] 07 p1039 A66-18289

Restatement of physical definition of Reynolds number, making it valid for all types of flow
08 p1206 A66-18855

Damping of small amplitude vibrations of fine wire as probe of onset and development of critical flow phenomena in He 2 at moderate Reynolds numbers
09 p1365 A66-20016

One-dimensional adiabatic compressible gas flow in cylindrical tube taking into account Reynolds number variations along tube and compressibility effect on friction factor
09 p1368 A66-20827

Separation point position determined for laminar layer on cylindrical surface at various Reynolds numbers
09 p1368 A66-20835

Taylor relation between velocity partial time and space derivatives in high Reynolds number turbulent shear flow
10 p1522 A66-21467

Integral equation formulation of Oseen flow past obstacles and approximate solution of integral equations for low Reynolds numbers
10 p1525 A66-21848

Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds
12 p1798 A66-24439

Compressor cascade flow with blades of different thickness ratio for variable Mach and Reynolds numbers, measuring turbulence level influence on loss coefficients, secondary flow parameters, etc
12 p1799 A66-24501

Laminar hypersonic flow past sphere based on constant-density approximation, solving Navier-Stokes equations and comparing with values of shock Reynolds number
12 p1800 A66-24900

Orr-Sommerfeld equation regarding stability of parallel flows solved for large Reynolds number, using inner and outer expansion theory
12 p1866 A66-24900

Heat-transfer coefficients calculated for forced convection from heated flat plate at zero incidence to stream of viscous fluid noting role of Reynolds number
12 p1981 A66-24900

Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow to normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc
13 p2128 A66-26270

Secondary flow in entrance section of straight rectangular duct, measuring primary and secondary velocities, turbulence, axial component, Reynolds stress gradient, etc
13 p2070 A66-26710

Mach number, Reynolds number and boundary layer trip devices effect on base pressure
14 p2219 A66-27440

Strouhal number relation to cavitation erosion effect of circular cylinder models placed in closed circuit channel, in critical and supercritical Reynolds number range
14 p2275 A66-27630

Laminar jets in nitrogen from DC plasma torch analyzed, using schlieren and spectroscopic techniques, noting jet formation dependency on Reynolds number
14 p2344 A66-27840

Perturbation spectra and decrements of plane parallel flows at small Reynolds numbers with even and odd velocity profiles
14 p2278 A66-28050

Longitudinal pressure gradient effect on evolution of finite three-dimensional perturbation in transition boundary layer of upper surface of wing section near critical Reynolds number
15 p2423 A66-28520

Transverse magnetic field applied to high Reynolds number flow of liquid mercury in pipes and ducts inhibits convective mechanism of heat transfer
[AIAA PAPER 65-539] 15 p2616 A66-29270

Boussinesq approximation for hydrodynamic stability of natural thermal convection of fluid between two parallel vertical planes and calculation of critical Reynolds number
15 p2617 A66-29390

Low Reynolds number flow past sphere for cases involving density and temperature variations, noting compressibility, transport properties and viscous dissipation
15 p2425 A66-29740

Velocity profile in incompressible turbulent boundary layer determined by two methods, noting coincidence of velocity distributions in external portion of layer with velocity defect law
16 p2684 A66-30320

Large- and small-scale atmospheric eddy velocities and scale lengths estimated, noting eddy Reynolds number ascertained from dispersion of chemical contaminants
16 p2696 A66-30920

Stagnation region of solid body of revolution in low density hypersonic flow with low Reynolds number
16 p2629 A66-31030

Stagnation region for body of revolution in analyzing temperature, velocity and atom hypersonic flow with low Reynolds number concentration under aerodynamic heating
16 p2686 A66-31030

Navier-Stokes equations for rotational motion of incompressible viscous fluid at small Reynolds numbers between rotational surfaces
16 p2688 A66-31290

Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two-dimensional flow
16 p2688 A66-31290

Effect of single or periodic disturbances on intermittency in pipe flow at various Reynolds numbers, noting relation of disturbance input frequency to output frequency of turbulent slugs
16 p2688 A66-31390

- turbulent flow field in straight circular pipes of sodium carboxymethylcellulose solutions, measuring pressure drop velocity profile over wide range of Reynolds numbers 17 p2906 A66-32037
- Laminar, transitional and turbulent flow fields in laminar plasma jets, noting variation of noise level and mixing length with Reynolds number at 400 17 p2968 A66-32460
- Discontinuous one-dimensional dissipative flow of perfect liquid and gas conductor in magnetic field, emphasizing case where magnetohydraulic jump may occur 17 p2973 A66-33070
- Boundary layer of steady incompressible flow crossed, fields MHD flow at large Reynolds number 18 p3147 A66-34663
- Instability of free laminar boundary layer between parallel streams analyzed for incompressible fluid, noting values of Reynolds number 18 p3102 A66-34921
- Energy method applied to stability of flows governed by nonlinear Boussinesq equations, establishing universal stability region in Reynolds-Rayleigh number 19 p3478 A66-36199
- Aerodynamics of propulsion plants, discussing cascade flow parameters, sub and supersonic flows, rocket gas cooling, acceleration of electrically conducting gases, etc 19 p3343 A66-36749
- Transfer process effect on stability of flame front, deriving revised approximate solution for large finite Reynolds numbers 19 p3479 A66-36829
- Motion of hollow body filled with viscous fluid at large Reynolds numbers, determining Zhukovskii potentials and examining small oscillations 19 p3343 A66-36830
- Skin friction drag of power law fluids in turbulent flow over flat plate shown as function of non-Newtonian Reynolds number and shear rate exponent 20 p3545 A66-37507
- Heat transfer coefficients over range of Reynolds numbers for solid-vapor mixture of parahydrogen discharge below triple point pressure 20 p3679 A66-37511
- Static characteristics of symmetrical wall reattachment jet amplifier over range of Reynolds number 20 p3501 A66-37646
- Distortion of laminar circular Couette flow measured by end effects, noting two-dimensional tangential motion near axial plane of symmetry 20 p3547 A66-37980
- Frequency of wake shedding from circular cylinder in water flow with values above critical Reynolds number, noting eddy generation and drag coefficient dependence on cavitation number 20 p3548 A66-38012
- Distance/time records, drag coefficients and Reynolds numbers of single freely-falling drops of pentane, heptane and benzene burning in cold atmosphere 20 p3626 A66-38044
- Extension of upper limit of Reynolds number for constant discharge coefficient of quadrant-edge orifice meter, noting performance in turbulent flow 21 p3724 A66-38819
- Heat transfer between copper sphere and air flow at normal and reduced pressure for various Reynolds numbers 21 p3835 A66-38904
- Magnetic field effect on stability of fluid in motion of plane parallel flows, determining critical flow velocity and critical Reynolds number 21 p3777 A66-38944
- Mass transfer and hydrodynamics of gas jet injection into liquid surface, deriving empirical equations for hollow truncated point formed around injection 21 p3836 A66-38958
- Model of laminar hypersonic base flow region of slender bodies, introducing base height and Reynolds number variation of base pressure ratio 22 p3843 A66-40345
- Surface catalytic and Reynolds number effects on nonequilibrium hypersonic stagnation flow of air or diatomic gas on highly cooled blunt body 22 p3847 A66-40919
- Existence theorem for stationary flow in magnetic field of incompressible viscous fluid electrically conductive around solid electrically conducting obstacle 22 p4100 A66-41173
- Flow coefficient of elliptical cylindrical pipe, analyzing boundary layer at exit for various Reynolds numbers, noting velocity profile 23 p4014 A66-42057
- Finite difference method solution of Navier-Stokes equations and applicability to cylindrical-channel viscous flow at small Reynolds numbers 23 p4062 A66-42061
- Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408
- Laminar boundary layer characteristics on continuous moving surface, noting high critical Reynolds number, disturbance amplitude function and energy criterion for stability 24 p4194 A66-42412
- Instability of laminar Ekman boundary layer, obtaining critical values of Reynolds numbers, perturbation growth rates and equilibrium finite amplitude solutions 24 p4197 A66-42980
- Stability of two-dimensional boundary layer flow in rotating tank with small inflow analyzed, using perturbation theory 24 p4197 A66-42981
- REYNOLDS NUMBER EFFECT**
- Measured aerodynamic characteristics of cone-cylinder-cone model using magnetic balance system, discussing techniques, errors and data 03 p0315 A66-12773
- Base flow and near wake problem at very low Reynolds numbers, using general solution of Stokes equation of motion for two-dimensional and axisymmetric flows 04 p0456 A66-14469
- Base flow and near wake problem at very low Reynolds numbers, discussing influence of inertia terms by using Oseen approximation 04 p0456 A66-14470
- Density and Reynolds number effects on turbine meter performance in gas flow measurement [ASME PAPER 64-WA/FM-1] 06 p0879 A66-16219
- Shock tunnel heat transfer measurement and hypersonic viscous flow over pointed cones, particularly viscous-layer regime at low Reynolds numbers [AIAA PAPER 66-34] 08 p1163 A66-18957
- Heat transfer through turbulent incompressible boundary layer in presence of moderate pressure gradient 09 p1366 A66-20174
- Theoretical determination of buffeting limits of wings, using boundary layer theory, obtaining Reynolds number effect on location of buffeting limits 10 p1479 A66-21377
- Friction factors and mean electrical conductivity for argon arc plasma flow, examining laminar-turbulent flow modes [AIAA PAPER 66-189] 10 p1561 A66-21436
- Hydraulic resistance coefficient dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field 11 p1743 A66-22337
- Thick laminar boundary layer influence at supersonic speeds and low Reynolds numbers 11 p1634 A66-22933
- Viscous hypersonic blunt body problem examined, using Newtonian thin-shock-layer theory, slip effect, Navier-Stokes shock structure, etc 13 p1990 A66-25157
- Boundary layer transition on downstream surface of sharply pointed cones when angle of incidence is slight and boundary layer is attached throughout 23 p4007 A66-41172
- Liquid film cooling by dual slot injection, determining film coolant injection rate and effects of two different mainstream Reynolds numbers 24 p4295 A66-42787
- Propagation of weak shock wave in heterogeneous conducting medium in presence of magnetic field 24 p4238 A66-42874
- RHENIUM**
- Rhenium electrodeposition on molybdenum in study of adhesion as affected by heating, chromium codeposition and cracks 01 p0088 A66-10989
- Corrosion of rhenium in various acids and hydroxides is electrochemical in nature and determined by kinetics of anodic and cathodic processes 10 p1546 A66-21748
- Recrystallization diagram of high purity rhenium after cold-rolling of single crystal specimens 12 p1897 A66-24901
- Sublimation of rhenium and Langmuir method vapor pressure measurements using vacuum microbalance 17 p2938 A66-31882
- Work function of polycrystalline rhenium surface in cesium atmosphere 17 p2983 A66-33103
- Rhenium effect on interface energies of Cr, Mo and W, noting liquid surface tension, solid surface energy and grain-boundary grooving 18 p3121 A66-33726
- RHENIUM ALLOY**
- Extrusion, reextrusion and drawing of tungsten and tungsten-rhenium alloy tubing 05 p0688 A66-15067
- Room-temperature tensile behavior of tungsten and tungsten-rhenium single crystals 06 p0894 A66-18068
- Thermal and electrical conductivities of molybdenum-rhenium alloys in superconducting and normal states 10 p1573 A66-21178
- Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 10 p1546 A66-21239
- Thermocouple emf pressure dependence measured for Chromel/Alumel and platinum/platinum-10 percent rhenium and platinum/platinum-13 percent rhenium 13 p2076 A66-25073
- Ductility enhancement of tungsten by rhenium addition due to modification of grain boundary precipitate morphology 16 p2722 A66-30222
- Kinetics of alloy formation in sintered tungsten-rhenium powder compacts 16 p2725 A66-31455
- Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 19 p3381 A66-35862
- Alloying principles for refractory metals based on softening mechanism, examining increased heat resistance of rhenium softened by recrystallization 23 p4082 A66-41822
- Transition temperature of superconduction of technetium-rhenium alloys measured by trapped flux remaining in sample after removal of external magnetic field 24 p1254 A66-42428
- RHENIUM COMPOUND**
- Multiband model for monoclinic and orthorhombic rhenium dioxide exhibiting Pauli paramagnetism and metallic type conductivity 01 p0127 A66-11084
- Thermionic emission properties of rhenium tape coated with lanthanum hexaboride, examining usefulness as low temperature emitter 06 p0883 A66-17029
- RHEOELECTRICAL SIMULATION**
- Wind tunnel contraction study of inviscid incompressible flow using rheoelectrical analogy, discussing experimental techniques, contour velocity distribution, optimum smoke injector and adverse pressure gradient estimation 03 p0352 A66-12719
- Rheographic regional method for evaluation of cerebral and ocular circulation in cardiac and cerebrovascular disease 04 p0463 A66-14002
- Rheoelectric analogy using apparent mass to obtain static and dynamic stability derivatives for lifting-body reentry vehicles [AIAA PAPER 66-58] 08 p1303 A66-18991
- Rheoelectric integrator simulation method for charge carrier lifetime determination in transistor 21 p3713 A66-39320
- RHEOLOGY**
- Generalized rheological models with varying relaxation time 01 p0159 A66-11179
- Rheology of liquids discussing viscometers, models for prediction and industrial and biological application 03 p0355 A66-12601
- Quantitative estimation of effect on hydrodynamic resistance of adding surface-active additives to turbulent fluid flow 07 p1023 A66-18158
- Solvent purity effects on non-Newtonian power law viscosity 09 p1368 A66-20947
- Elastic-viscosity, cross-viscosity and suction variation effects on rheological behavior of fluid moving steadily past porous circular cylinder and between two coaxial right circular cylinders 12 p1865 A66-24808
- Mechanical properties of lunar dust, consolidated lunar conglomerates and lunar

- rocks described by macrorheological constants 16 p2805 A66-31483
- Thermorheological equation of state derived for fiber-reinforced polymers indicating dependence of elongation or contraction on linear expansion coefficients 18 p3125 A66-33711
- Structural-model analysis of photoviscoelasticity and photoviscoelastic materials as rheological problem of mechanical and optical creep, relaxation and related phenomena 18 p3257 A66-34562
- Mechanical construction materials behavior, discussing application of creep and plasticity laws 20 p3666 A66-36951
- Calibration test for photorheological method of stress analysis in plastically flowing body under plastic work or creep deformation 20 p3671 A66-38101
- Poynting effect theoretically analyzed, postulating tensor expression for final Green measure in general coordinates for cylindrical coordinates 22 p3988 A66-39672
- Rheology theories of material deformation and flow including classical theories of elasticity and hydrodynamics covered by nonlinear viscoelasticity theory 22 p3898 A66-40019
- Incompressible viscoelastic flow studied by simple Maxwell model within rheological reference point 23 p4054 A66-41171
- Constitutive and balance equations derived in tensorial form for incompressible fluid with nonlinear viscous characteristics 23 p4055 A66-41382
- RHODIUM**
- Photovoltage profiles of rhodium to p-silicon contact at high and low level injection and various temperatures 02 p0275 A66-11873
- Reference tables for 0 to 1880 degrees C established for platinum-rhodium thermocouples 03 p0371 A66-13251
- Equilibrium diagram and existence corroboration of Ti-Rh alloy 20 p3586 A66-38093
- RHODIUM ALLOY**
- Plasma temperature measurement from 3000 to 4000 C using platinum thermocouple with heating-curve time analyzer 18 p3111 A66-34031
- RHOMBIC ANTENNA**
- S RADIO ANTENNA**
- RHYTHM**
- S BIOLOGICAL RHYTHM**
- S CIRCADIAN RHYTHM**
- RIB**
- Effect of stiffening ribs on stressed-strained state of shallow symmetrically loaded conical shells, noting reduction of boundary value problem to integration of differential equations 22 p3991 A66-40150
- RIBBON PARACHUTE**
- Parachutes and other devices for slowing body falling through air including Rogallo wing, ballute, ribbon parachute and vortex-ring parachute 24 p4160 A66-43197
- RIBONUCLEIC ACID /RNA/**
- SA DEOXYRIBONUCLEIC ACID /DNA/**
- SA NUCLEOTIDE**
- Interaction of messenger RNA and ribosomes studied, using F-2 bacteriophage RNA as model messenger in cell-free Escherichia 02 p0182 A66-11807
- Molecules and memory, discussing role of RNA as switching element in memory processes 06 p0812 A66-16463
- Characteristics, fine structure and mode of functioning of bacterial cell and artificial synthesis possibility 11 p1644 A66-22713
- Behavior of synthetic polyribonucleotides in cell-free amino-acid-incorporating systems from E coli, noting release of polypeptide chains into supernatant fraction 12 p1805 A66-23538
- Biochemical mutation, DNA, RNA and microorganisms infecting wing tanks of jet aircraft 13 p2011 A66-26546
- RNA requirements in formation of primordial organism, noting peptide synthesis 17 p2850 A66-32084
- Molecular biology noting hemoglobin and enzyme cytochrome evolution, amino acid code, ribonucleic acid, etc 17 p2853 A66-32101
- Ribonucleoside triphosphatase in rabbit reticulocytes, discussing distribution in extracts, behavior in purification of amino acid and properties 17 p2859 A66-32553
- Physical properties of DNA-dependent RNA polymerase from Escherichia coli 20 p3505 A66-37054
- Ribonuclease effect on polymerase activity in Azotobacter vinelandii used to verify theory that RNA polymerase is inhibited by RNA produced in reaction 20 p3510 A66-37790
- Molecular and ultrastructural correlates of function in neuron, neuronal nets and brain studied, using genetic and immunological concepts 24 p4165 A66-43102
- RICHARDSON NUMBER**
- Richardson critical number and asymptotic equation applied to stably stratified ground atmospheric layer 07 p1062 A66-17924
- Richardson critical number and asymptotic equation applied to stably stratified ground atmospheric layer 12 p1905 A66-23885
- Wind shear, gravity waves and Richardson number in relation to clear air turbulence /CAT/ 15 p2425 A66-28912
- Saha-Langmuir formula applied to description of temperature dependence of positive ion current in surface ionization of silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs 22 p3968 A66-40942
- RIEMANN INTEGRAL**
- Recurrence formula for Riemann function for certain operator in n-dimensional analog of hyperbolic differential equation 01 p0093 A66-10382
- Numerical integration based on definition of Riemann integral, describing application to nonlinear integral equations of isotropic scattering of radiation in plane parallel atmosphere 19 p3388 A66-35830
- Numerical approximation of Riemann integration for plane gas flow at supersonic speeds 19 p3276 A66-36475
- Convolution type integral equation solution via reduction to Riemann problem in class of generalized functions 20 p3591 A66-37755
- Differential inequality theorems applied to hyperbolic differential equation, discussing Riemann functions and sufficient conditions for characteristic and Cauchy problems for quasi-linear Bianchi equation 21 p3757 A66-39232
- RIEMANN PROBLEM**
- Simple wave interaction in polytropic rarefied gases flowing from parallel wall channel 01 p0006 A66-10473
- Riemann-Hilbert boundary value problem for elliptic systems of linear partial differential equations of first order 16 p2733 A66-30651
- RIEMANN SPACE**
- Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 01 p0106 A66-10656
- Fundamental concepts of tensor calculus essential for technological application 08 p1245 A66-18859
- Cosmological effects in anisotropic inhomogeneous cosmological models including Riemannian geometry, light propagation, gravitational field, etc 11 p1772 A66-22778
- Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 12 p1914 A66-24008
- Riemannian signal mapping theory used to clarify stochastic structure of modulation and demodulation in information system 15 p2453 A66-29888
- RIEMANN SURFACE**
- Riemann representation method in viscoelasticity extended to functional partial differential equations of hyperbolic type 21 p3829 A66-38941
- Sturrock criteria for differentiating between absolute and convective instability and between amplification and nontransmittance of oscillations 21 p3770 A66-39028
- RIEMANN WAVE**
- Shallow water theory of formation and decay of hydraulic shock waves in nonsteady homentropic gas flow 23 p4055 A66-41541
- Fourier analysis of Riemann-Hilbert problem of diffraction of normally incident plane electromagnetic wave by plane metallic grid above dielectric sheet and semiinfinite plasma 24 p4175 A66-429
- RIESZ THEOREM**
- Stability theorems concerning unconditionality of bases, considering Riesz theorem and Banach and Gilbert spaces 01 p0093 A66-104
- Powers of integral operator generated Cauchy problem for second-order hyperbolic equation solved by Riesz method analytical continuation 21 p3756 A66-387
- RIFT PROJECT**
- S REACTOR IN-FLIGHT TEST /RIFT/ PROJECT**
- RIGID BODY**
- General theory for construction constitutive equations describing pure mechanical properties of continuous media with tensor and group theoretic concepts 01 p0106 A66-107
- Rotation of rigid body force affected, using matrix equations, noting coordinate system and differential equation 02 p0290 A66-119
- Statics and kinematics of rigid bodies structural mechanics, establishing isostatic support conditions 03 p0436 A66-127
- Rigid body mechanics noting elastoplast and ductile formation, deformation, deformation appearance, etc 03 p0439 A66-131
- Approximate integration of equations for longitudinal perturbational motion of rigid body 05 p0717 A66-153
- Book on motion theory of several couple rigid bodies about fixed point, particular gyroscope and gyrostat in Cardan suspension 06 p0910 A66-1706
- Three-dimensional motion of rigid system turning about fixed axis and simultaneously oscillating along same axis 07 p1079 A66-1730
- Equations of motion for rigid body with fixed point derived by expression of angular velocity 07 p1080 A66-1784
- Minimum rigidity of ribs ensuring cylindrical shell stability under external load determined, using matrix method 08 p1308 A66-1888
- Forcing function acting upon rigid body rotating about fixed point replaced by motion of axis of rotation and another forcing function 08 p1310 A66-1915
- Finite plane strains in solid body problem postulating arbitrary deformation law and arbitrary hydrostatic stresses dependence of volume change, solved by nonlinear equation 13 p2205 A66-2645
- Lift, drag and inertial forces due to uniform unsteady flow with constant acceleration past fixed circular cylinder determining vorticity flux 13 p1993 A66-2670
- Book on time and space, weight and inertia in terms of relativity theory, including accelerations and rotations, dynamical tensor of matter, ideal clock, rigid body, etc 14 p2330 A66-26803
- Saturn launch vehicle flight control system model based on rigid-body control law 15 p2605 A66-2874
- Liapunov stability of motion of heavy rigid body with fixed point moving along spherical surface 15 p2537 A66-2896
- Integrability of motion equations for rigid body motion about fixed point in Newtonian force field 15 p2542 A66-2933
- Surface protrusions and holes, Maxwell kinetic gas theory and surface interaction of current of free molecules and rigid body 16 p2686 A66-3104
- Rigid revolution paraboloid pressure on plates and membranes with contour consisting of straight line segments 16 p2822 A66-3150
- Frequency equations from plane cross sections law and exact linearized theory solved for oscillating rigid band in supersonic flow 16 p2823 A66-3163
- General relativistic dyadic formalism applied to metrics of rigid bodies moving in Einstein space of uniform space-time curvature 17 p2958 A66-3229
- Miele solidification principle for uniform spinning rotor mounted on rigid body applied to case where modulus of angular velocity of rotor is allowed to vary 17 p2909 A66-3247
- Upper and lower bounds on partition functions for finite systems of rigid disks and spheres for high density

- torque on rigid body in circular orbit in
gravitational central field derived, using
body-centered coordinate system aligned
with gravity gradient 18 p3139 A66-34503
- Phase-plane analysis of motion of self-
excited asymmetric rigid body, examining
periodic solutions of Euler
equations 18 p3237 A66-35030
- Motion equations of rigid body, discussing
transformation from Lagrange equation to
Euler equation 19 p3400 A66-35831
- Dynamical formalism for arbitrary number
of interconnected rigid bodies analyzed with
reference to passive attitude stabilization of
satellites 20 p3859 A66-36886
- Matrix equations of rigid-body motion for
general vibration isolation system, analyzing
conditions for decoupling translational and
rotational motions 21 p3770 A66-38650
- Theorem concerning use of instantaneous
axis of rotation for simplification of small
oscillation equation of angular
momentum 22 p3992 A66-40300
- Partition function for tunnel model of
rigid disks evaluated in asymptotic limit of
reduced volume, including close-packed
blue of closed systems 22 p3949 A66-40913
- Falling of sphere along axis of vertical
tube filled with viscous liquid, examining
effect of cylindrical walls by linearized
Navier-Stokes equations, using successive
approximations 23 p4055 A66-41446
- Rotation of rigid bodies in Newtonian
central gravitational field, with applications
to navigation and satellite
motion 23 p4096 A66-41941
- Gust design procedures based on power
spectral techniques, considering atmospheric
turbulence with aircraft as rigid body with
single degree of freedom
[ICAS PAPER 66-11] 23 p4017 A66-42073
- Inertial motion equations of rigid body
bounded by multiply connected surface in
ideal infinite fluid 24 p4237 A66-42846
- Rolling motion of rigid body of revolution
along fixed surface of
revolution 24 p4238 A66-42847
- Uniqueness of solution to motion of heavy
rigid body about fixed point in Newtonian
force field 24 p4238 A66-42849
- RIGID MOUNTING**
Multistrip transformation of aerial
photographs using rigid special masking
frames in accordance with contour
line 02 p0231 A66-11971
- Root rigidity and damping capacity of
vibrating turbine and compressor blade
mountings 03 p0372 A66-12398
- Bearing flexibility effect on vibration
frequency of rotating assembly resting on
two bearings and assembly with overhanging
mass 18 p3116 A66-34006
- RIGID ROTOR**
Design considerations in Lockheed rigid
rotor application to compound helicopter,
noting wind tunnel and flight test with XH-
4A helicopter
[AIAA PAPER 65-757] 03 p0318 A66-12552
- Whirl instability and pneumatic hammer
on rigid rotor in pressurized gas journal
bearings
[ASME PAPER 65-LUB-12] 04 p0527 A66-14245
- Rigid rotor structural design and
testing 13 p2196 A66-25763
- Stability of unsymmetrical rigid rotor
supported in axially unsymmetrical bearings,
noting three methods of
solution 18 p3116 A66-33672
- Sudden approximation applied to rotational
transition probabilities and inelastic total
cross sections for scattering of homonuclear
diatomic molecules by
atoms 21 p3774 A66-38526
- V-STOL aircraft using stowable rigid rotor
and fixed wing 24 p4159 A66-42346
- RIGID STRUCTURE**
Strains and internal force in bending of
two coupled orthotropic plate strips of
different rigidity under effect of uniformly
distributed loads 01 p0152 A66-10406
- Model analysis of radial oscillations of
shaft with pounding of ball
bearings 02 p0299 A66-11845
- Deformation of circular membrane
containing central rigid disk under
axisymmetrically distributed
load 04 p0590 A66-14150
- Conditions for regular stationary reflection
of hydromagnetic shock on rigid
wall 10 p1521 A66-21194
- Elastic wave diffraction on rigid edge
analyzed by employing acoustic
analogy 13 p1991 A66-25637
- Resin fiberglass sandwich materials for
reinforcement of plastic laminated space
structures 14 p2402 A66-27876
- Stress and deflection determination in
trusses with pin or rigid joints, using digital
computer 18 p3255 A66-34275
- Approximation method for checking
stability of compression members in rigid-
joint space truss or stability against out-
of-plane buckling of compression members in
rigid-joint plane truss 19 p3475 A66-36489
- Clamped circular plates of rigid plastic
material under uniformly distributed blast
loading, noting parameters of permanent
central deflection 20 p3673 A66-38277
- Rain effect on satellite communications
Earth terminal rigid radomes, determining
transmission loss and water film
thickness 24 p4192 A66-43195
- RIGID WING**
STOL flying possibilities and limitations,
considering aircraft generating high lift by
using fixed wing and airfoil
features 23 p4016 A66-41774
- RIGIDITY**
SA MAGNETIC RIGIDITY
SA POISSON RATIO
SA STRUCTURAL RIGIDITY
Integral rigidity spectrum of primary
cosmic rays, considering solar active
days 18 p3186 A66-34807
- RING**
SA CIRCLE
SA LOOP
SA REINFORCEMENT RING
SA VORTEX RING
Optical thickness, phase variation and
albedo of rings A and B of
Saturn 05 p0758 A66-14804
- Free vibration of complete and incomplete
rings, considering ring centerline
extensibility and rotary
inertia 17 p3022 A66-32016
- Hamilton principle, motion equations,
natural boundary conditions and constitutive
relations for finite deformation of one-
dimensional curved elastica and radial
motion and stability of circular
ring 22 p3990 A66-40138
- Reissner-Uflyand-Mindlin PDEs for circular
ring flexural vibrations under transverse
shear and rotary inertia 22 p3992 A66-40297
- Slip ring-strain gauge connections for
transmitting supply current to rotating
transducers and transmitting back signal
voltage, noting noise
reduction 23 p4017 A66-41146
- Orthogonality condition for eigenvalue
problem of out-of-plane twist-bending
vibrations of elastic ring for various sets of
boundary conditions 23 p4139 A66-41693
- Structural dynamics of axisymmetric
deformation of semiinfinite plastic
cylindrical shell under concentrated ring
impact 23 p4147 A66-41999
- RING CURRENT**
Gas-filled closed ring-current surface with
continuum of equilibrium figures in external
magnetic field in case of surface
tension 03 p0354 A66-12388
- Decimal scaler including pulse shaper
accepting sharp pulses and any form
signals 03 p0344 A66-13096
- Magnetic field interaction with ring
current in plasma gun for multiple
acceleration and reflection of
plasmoids 04 p0558 A66-14490
- Complex susceptibility measured, using
voltage induced in loop around
ferromagnetic core situated at short-circuit
end of coaxial line 05 p0716 A66-15028
- Aurora production via magnetic field
induction during geomagnetic storms by ring
current growth in Van Allen belt
region 07 p1029 A66-18088
- Ring current growth tendency prior to
sudden magnetospheric
compression 08 p1219 A66-19406
- Persistent currents and flux quantization
in superconducting rings interrupted by
Josephson junction 09 p1417 A66-20031
- Critical Stormer pass points for quadrupole
field and double-ring-current field with
parallel or antiparallel dipole
moments 09 p1404 A66-20085
- Idealized problems concerning motion of
cylindrical plasma sheets in magnetic field,
noting application in
geophysics 10 p1527 A66-21128
- Gas-filled closed ring-current surface with
continuum of equilibrium figures in external
magnetic field in case of surface
tension 13 p2062 A66-25393
- Tornado dehydration and burning effects
in terms of conventional hot wind
mechanism, corona discharge mechanism and
new ring-current
mechanism 13 p2122 A66-26126
- Emerson and impulse ring waves,
examining rigorous solution of classic
Cauchy-Poisson problem with finite
energy 15 p2480 A66-29647
- Radial displacement of particles excited by
solar-wind-induced current at boundary of
and ring current within
magnetosphere 19 p3451 A66-35251
- Auroral oval, auroral substorm and
relations with internal magnetospheric
structure during growth and decay of ring
current and neutral sheet
current 20 p3549 A66-37296
- Ring current-induced variations in
geomagnetically trapped particle
fluxes 20 p3633 A66-38192
- MHD and velocity space instabilities of
plasma in ring vortex confined by cold gas
blanket in toroidal magnetic
field 22 p3954 A66-39931
- Growth and decay of ring current and
polar electrojet, using magnetic storm
examples 22 p3974 A66-40563
- Magnetic field of ring current on Earth
surface according to observations during
IGY 22 p3914 A66-40768
- Asymmetric ring current belt consisting of
symmetric ring current and superimposed
partial ring current system as explanation
for low latitude disturbance daily
variation 24 p4199 A66-42588
- RING DISCHARGE**
Ring laser sensor parameters and
characteristics, noting application to
measurement of angular rate, mass flow,
navigation and guidance 19 p3356 A66-35533
- Coupling between oppositely directed
traveling waves in He-Ne ring laser in form
of mutual backscattering of energy from
each beam into direction of
other 20 p3579 A66-37778
- RING STRUCTURE**
Deformation of double ring used in
compression tests to study stress-strain
state of brittle and ceramic
materials 08 p1313 A66-19438
- Ring on three-dimensional elastic
foundation containing all six degrees of
elastic restraint 10 p1618 A66-21956
- Ring formation and expansion in cold
drawn polymeric material related to
oriented deformation of supermolecular
structural elements 12 p1899 A66-24348
- Stresses in concentric and eccentric
compound rings 13 p2207 A66-26499
- Hollow metallic O rings used for sealing as
thin shells under axisymmetric
loading 17 p3020 A66-32002
- Dynamic elastic response of inner and
outer edges of ring to distributed impact
loads 18 p3247 A66-33570
- Mixed bending problem of eccentric ring
solved by coordinate system with origin at
center of outer boundary of
cut 21 p3831 A66-39290
- Energy method application to buckling of
axially compressed cylindrical shells with
ring-stiffened edges, noting upper and lower
bounds and critical rigidity
ratio 23 p4140 A66-41912
- RING WING**
Ring wings to develop beneficial
aerodynamic interference effects at
supersonic speeds 13 p1995 A66-25590
- RIOMETER**
Correlation between solar bursts observed
in Colorado and riometer records in Brazil,
using Yagi antenna 05 p0747 A66-14799
- Auroral absorption measured, using

riometers compared with energetic particle fluxes simultaneously detected by passing satellite, showing absorption and particle flux correlation 09 p1374 A66-20881
 Riometer absorption caused by solar protons and alpha particles in monoenergetic intensities and in spectral distributions 15 p2574 A66-28818
 Proton flux measured by satellite at high latitude compared to ionospheric absorption measured with riometers, noting absorption variation with latitude across polar caps 15 p2576 A66-29228
 Riometer recordings at high geomagnetic latitude of intense and sporadic absorption events correlated with occurrence of auroral and geomagnetic disturbances 18 p3108 A66-34531

RIOMETRY

Shift of anomalous absorption region from riometric observation 02 p0225 A66-12138
 Shift of anomalous absorption region from riometric observation 14 p2287 A66-28094
 Polar-based riometric observations of solar cosmic ray events during IQSY 15 p2592 A66-30034
 Riometric data on ionospheric absorption applied to determination of dissociative recombination coefficient, noting atmospheric ionization by fragment gamma-radiation 22 p3973 A66-40468

RITZ AVERAGING METHOD

Large amplitude-free oscillations of beam and plates by means of Ritz-Galerkin technique 02 p0297 A66-11554
 Source function of inhomogeneous optically dense plasma layer determined, using Ritz method 08 p1265 A66-19309
 Modified Ritz method for finding eigenvalues of certain nonlinear ordinary differential equations 12 p1914 A66-24003
 Convergence rate of method of least squares and some approximate Galerkin type methods in eigenvalue problems 15 p2526 A66-28696
 Hermite interpolation combined with Ritz method for numerical approximation of solution of two-point boundary value problems 16 p2732 A66-30243
 Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field 16 p2687 A66-31297
 Nonconservative elastic stability problems treated by Galerkin and Ritz methods 20 p3669 A66-37541
 Ritz method for solving elastic stability of rectangular cantilever plate in flows moving in direction perpendicular and parallel to clamped edge of plate 23 p4139 A66-41787

RIVET

Effect of rivet-attached stringer on stress concentrations in thin elastic sheet with circular cut-out, expressing results as correction factor 12 p1962 A66-23993

RIVETED JOINT

Fatigue strength of riveted joints as affected by material properties, rivet placement and fabrication method 10 p1615 A66-21395
 Subsonic business aircraft manufacturing processes and techniques relation to production time and costs [SAE PAPER 660206] 13 p2087 A66-26395

RL NETWORK

Transistorized LR oscillator design using piecewise linear approximation in oscillation theory 09 p1357 A66-20784
 Seven-stage RL feedback amplifier with 500-mc low-pass bandwidth and 52 db gain, employing frequency compensation technique 11 p1671 A66-23244
 Transistorized LR oscillator design using piecewise linear approximation in oscillation theory 22 p3874 A66-39843

RLC CIRCUIT

SA LC CIRCUIT
 Frequency analysis of wideband RL and RLC phase shifters, using Chebyshev polynomials 04 p0501 A66-14406
 Equivalent capacitance, inductance, radiation resistance and Q-factor of umbrella top-loaded electrically short antennas 06 p0825 A66-16018
 Bridge phase modulator with RLC circuit, noting parasitic amplitude modulation elimination 06 p0858 A66-16991

Correlation analysis technique for stochastic processes in RLC circuits with random parameters in case of stochastic input functions 15 p2469 A66-29055

RLC NETWORK

Parallel combinations of nonlinear resistive reactive elements for unilateralization and widebanding of parametric admittance frequency converter 05 p0651 A66-14572
 Minimum total reactances of elements needed to realize two-element driving-point function for RLC network synthesis 05 p0656 A66-14627
 Practical technique for performing transformations between time and frequency domains applied to synthesis of four-terminal RLC networks 05 p0657 A66-14995
 State variable selection for equilibrium equations of nonlinear RLC network from potential function 09 p1360 A66-19913
 Bridged-T three-terminal filter network modified to admit two same-frequency same-phase input signals of different amplitudes 09 p1361 A66-20609
 Steady state alternating current analysis of RLC networks by computing eigenvalues and eigenvectors of corresponding matrix of coefficients 12 p1856 A66-24652
 Outer and inner bounds on driving-point impedance functions of LLFP networks with various resistance and reactance configurations 13 p2055 A66-26095
 Canonical form for two-terminal nonlinear RLC network first-order ordinary differential equations 15 p2472 A66-29371
 Digital computer method for formulating state space equations for active RLC networks 17 p2900 A66-32055
 T-domain network synthesis problem, considering realizability of given state model as an RLC one-port network 17 p2900 A66-32056
 Time-variable lattice network extended by choice of lattice arms to include transformless RLC nonreciprocal network 20 p3540 A66-38289

ROBIN BALLOON

Small-scale wind variations in stratosphere and mesosphere studied by high resolution Robin falling-sphere soundings 16 p2740 A66-30510

ROCK

SA LIMESTONE
 SA METAMORPHISM
 SA MINERAL
 SA PETROLOGY
 SA QUARTZ
 Bearing strength of lunar surface, optical properties suggest rock particles which maintain high porosity by interparticle adhesion 06 p0955 A66-16788
 Normal emittance, reflectance and transmittance spectra of roughened rock and mineral surfaces from 8 to 25 micron wavelengths 13 p2017 A66-25873
 Rare-earth element abundance patterns in Hawaiian basalts determined by neutron activation analysis 21 p3735 A66-39492
 Photographic evidence from Luna IX indicating Moon may have surface made up largely of fine rock particles 22 p3982 A66-40522

ROCKET

 SA VERONIQUE ROCKET
 Janes compendium of world aircraft,

missiles and rockets 04 p0458 A66-143-
 Aerodynamic characteristics of NAL research rocket of Japan, noting results from transonic and supersonic wind tunnel tests 14 p2220 A66-276-

ROCKET AIRCRAFT

Flight performance of small diameter folding fin aircraft rocket using particle trajectory shows large dispersion magnitudes 18 p3240 A66-338-

ROCKET BOOSTER

Computer-directed malfunction checkout rockets, boosters and modern military aircraft 04 p0526 A66-140-
 Present state and future developments trends for large solid-fuel rocket boosters 06 p0960 A66-168-
 Man-rated booster design provides alternate manual propulsion and guidance control enabling astronaut participation in mission success [AIAA PAPER 65-251] 10 p1612 A66-219-
 Booster rocket survey of U.S. and Western Europe 10 p1612 A66-219-
 Centaur project with assessment of reliability of explosive one-shot devices 14 p2394 A66-284-
 Reliability procedures in converting tactical system to advanced booster in space program, noting time and costs savings 17 p3015 A66-3198-
 Air augmented propulsion in liquid hydrogen-LOX rocket booster engines 17 p2990 A66-3237-
 French booster projects for orbiting stationary communication satellites, noting SEREB/solid propellant/ and LRBA/liquid propellant/ 19 p3469 A66-3604-
 Air breathing engine designs for winged-recoverable boosters 20 p3628 A66-3742-
 Steering philosophy for rocket booster using position and/or velocity profiles until desired injection speed is attained [AIAA PAPER 64-639] 20 p3597 A66-3815-

ROCKET CHAMBER

Optical metrological and alignment methods for fast and accurate rocket thrust chamber alignment [SAE PAPER 650758] 01 p0078 A66-1083-
 Combustion and heat transfer in rocket combustion chamber burning liquid oxygen and gaseous hydrogen 02 p0279 A66-1166-
 Oscillations in liquid fuel rocket combustion chambers covering LF and HF theory, stability requirements and optimum performance criteria 04 p0594 A66-1446-
 Mass flow rate of gas evolution from burning solid rocket propellant during transient depressurization of combustion chamber [AIAA PAPER 65-104] 08 p1282 A66-19163-
 Thermally induced vibration of thin nonshallow spherical shells, investigating missile and space vehicle structures [AIAA PAPER 65-409] 12 p1957 A66-23586-
 Reverse-flow film cooling of small rocket engine chamber 12 p1937 A66-24718-
 X-ray image intensifier in conjunction with motion picture film sequencing of thrust chamber image during hot firing to obtain failure analysis data 13 p2079 A66-25819-
 Relation between pressure-type fuel supply system and pressure variation in combustion chamber of rocket engine 14 p2373 A66-27382-
 Response of Langmuir probes in rocket exhaust jets, noting sensitivity to chamber temperature and pressure and alkali metal concentration 14 p2294 A66-27421-
 Swedish hypergolic propellant for rocket motors consisting of fuming nitric acid as oxidizer and condensation product of liquid aromatic amines and aldehydes as solid fuel 14 p2374 A66-27566-
 Igniter performance in solid propellant rocket motors, examining mass discharge rate effect on chamber pressure transients [AIAA PAPER 66-680] 18 p3161 A66-34227-
 Pressure record of HF combustion oscillations observed in solid propellant rocket motor developed under special small rocket/SSR/ program 23 p4121 A66-41430-

ROCKET COMBUSTOR

Dynamic differential equation relating perturbations in feeding system with transient states in combustion chamber of liquid fuel rocket engine 17 p2989 A66-31838-
 Streak test excellent acceptance technique for assurance of reproducibility of service

- for ablative thrust chamber of Mira variable thrust rocket engine [AA PAPER 65-608] 19 p3449 A66-35607
- acoustic absorption liners for suppressing combustion instability in rocket engine combustion chambers [AA PAPER 65-585] 19 p3449 A66-35608
- inverse velocity component effect on linear behavior of short nozzle, with application to T burner 21 p3807 A66-38702
- aporization and atomization theoretically related to be controlling parts of combustion process in determining rocket combustion instability [ASME PREPRINT 28D] 22 p3971 A66-39879
- ignition velocity, rocket motor working conditions and combustion instabilities for solid rockets, using solid fuel and liquid gaseous oxidizer 24 p4261 A66-42695
- pressure, temperature, gas velocity, thrust specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method 24 p4261 A66-42743
- ROCKET COMPUTER PROGRAM
- governing equations, attitude and ignition time of third and fourth stage of USAF Athena, noting solution derivation using Euler series constraints, accuracy, 16 p2743 A66-30908
- optimal trajectory problem solution using flight guidance computers for control of rockets and aircraft under influence of random disturbances 17 p2956 A66-33239
- stability analysis in cylindrical coordinates of axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AA PAPER 66-542] 20 p3680 A66-38034
- ROCKET ENGINE
- HYDROX ENGINE
- LIQUID PROPELLANT ROCKET ENGINE
- NUCLEAR ENGINE FOR ROCKET VEHICLE /NERVA/
- SOLID PROPELLANT ROCKET ENGINE
- air-augmented rocket engine used as propulsion system for carrier vehicle 02 p0278 A66-11666
- three kerosene-HTP propellant rocket engines for satellite launching, noting combustion chambers 02 p0279 A66-11675
- disengaging gear lubrication through heat dissipation as factor in Ryder rating of rocket lubricant [ASME PREPRINT 65-LC-16] 02 p0237 A66-12253
- liquid hydrogen flow system startup of full scale simulated nuclear rocket engine 03 p0391 A66-12350
- optimization technique for combined effect of all variables acting simultaneously on mission of large launch vehicles 03 p0416 A66-12768
- gymnast rocket engine testing facility utilizing unique compressed air system 04 p0506 A66-13407
- spectral analysis methods for determining rocket engine dynamic specifications [ASME PREPRINT 1.5-1-65] 05 p0683 A66-15501
- quasi-linear partial differential equations transients in liquid rocket engine propellant feed system solved, determining transient pressure ratio [ASME PAPER 65-FE-23] 06 p0942 A66-16217
- autoradiography of components of assembled nuclear reactor as final phase evaluating performance of experimental liquid rocket engine 06 p0907 A66-16430
- subscale cold-flow rocket motor model used to determine effect of purely geometric variables on acoustic performance leading to axial mode combustion instability [AA PAPER 66-110] 06 p0944 A66-17080
- comparison of 14 basic methods for cooling rocket engines 07 p1110 A66-17617
- recombination effects in nozzle flows of hydrogen/ fluorine rocket engines 08 p1279 A66-19152
- properties, application and preparation of various propellants for rocket engines 08 p1280 A66-19754
- contamination control in missile systems, considering rocket engine cleanliness as quality control parameter 09 p1432 A66-19954
- chemical reaction kinetics and gas dynamics combined to analyze processes occurring in combustion chambers and nozzles of jet and rocket engines 10 p1620 A66-21367
- Optimization of high energy turbopump unit engine for Eldo-B carrier rocket, employing system specific impulse 10 p1591 A66-21396
- Hybrid rocket engine performance noting stable fuel burning, burning rate, thrust modulation, ignition delay and use of tricomponent fuels 10 p1594 A66-21715
- Ballistic performance change in spinning rocket motors attributed to internal gas dynamics and combustion effects, noting grain geometry influence 10 p1590 A66-21945
- Three kerosene-HTP propellant rocket engines for satellite launching, noting combustion chambers 11 p1760 A66-22435
- Experimental analysis of regression rates in hybrid rocket engines for both chemical kinetics and gas dynamics domains 13 p2173 A66-26369
- Small disturbances and effect on processes of fast combustion of inflammable compressible mixture 14 p2374 A66-27690
- Structural component reliability analysis for rocket engine propellant tanks, noting variance testing of hemisphere strength for statistical tolerance limits 15 p2507 A66-28795
- Oscillatory behavior in rocket engines, analyzing interaction between shock wave and burning solid propellant surface and stressing gas dynamics 15 p2572 A66-29298
- Ignition mechanisms of solid composite propellants containing ammonium perchlorate as oxidizer 15 p2569 A66-29308
- Disengaging gear lubrication through heat dissipation as factor in Ryder rating of rocket lubricant [ASME PREPRINT 65-LC-16] 16 p2713 A66-30574
- Tests on rocket thrust vector control using hot injectant gas from same fuel and oxidizer as main engine, tabulating data 16 p2810 A66-30902
- Advantages of higher combustion velocities shown by comparative analysis of radially and axially burning solid artillery rocket propellants 16 p2790 A66-31195
- Time shared general-purpose digital computer with hybrid linkage to analog consoles used for determination of static and dynamic performance characteristics of rocket engines, jet engines, V/STOL aircraft, etc 16 p2658 A66-31249
- Particle velocity in gas particle two-phase nozzle expansion using gas laser and Fabry-Perot interferometer for rocket engine propulsion [AIAA PAPER 66-522] 16 p2708 A66-31500
- Exhaust mixing process in Rolls-Royce bypass jet engines, noting stream mixing in common duct with corrugated metal interface on inlet side 17 p2990 A66-32079
- Air augmented propulsion in liquid hydrogen-LOX rocket booster 17 p2990 A66-32376
- Gas-film-cooled nozzle extension application to large rocket engines, discussing operational parameters, advantages, etc [SAE PAPER 660455] 17 p2991 A66-33163
- Feasibility of rocket motor using detonation wave rotating in annular combustion chamber wherein propellant is injected continuously and expelled through annular nozzle 18 p3162 A66-33807
- Automatic starter for nuclear reactor rocket engine with automatic power control system 18 p3133 A66-33875
- High energy missions for Saturn such as solar system probes, cometary intercepts, flights to Earth-Moon libration points, etc [SAE PAPER 660448] 18 p3246 A66-33894
- Exhaust nozzle performance noting testing techniques, cruise engine installations, data accuracy, etc [AIAA PAPER 66-641] 18 p3048 A66-34221
- Performance calculations for propellants in terms of composition and enthalpy and principles of rocket engines 19 p3449 A66-36287
- Valve technology for spacecraft and rocket engine applications, discussing zero-gravity vent valve, zero leakage valve, insensitive valve seat and solenoid actuator [ASME PAPER 66-MD-61] 21 p3742 A66-38494
- Calibration process for RZ-2 rocket engine, noting changes in orifices, engine performance, influence coefficients, etc 21 p3807 A66-38640
- Insulation surface regression mechanism in rocket motors, examining ablation corrosion and erosion effects 22 p3970 A66-39872
- Prediction of rocket engine flight performance with less than 2 percent error in specific impulse data measured at sea level 23 p4120 A66-41111
- Rocket motor burning tests, discussing correlation of mechanical properties of polyurethane solid propellants to combustion characteristics 23 p4120 A66-41439
- Compressible fuel mixture deflagration perturbation stability in induction regime characteristic of heat-stressed combustion chambers of rocket engines 23 p4122 A66-41790
- Heat resistance of refractory alloys containing nickel, cobalt, tungsten, niobium, etc, and cermet, noting application in rocket engines 24 p4228 A66-43049
- ROCKET ENGINE ADVANCEMENT PROGRAM
- Saturn launch vehicle, discussing methods of increasing payload capacity, engine improvements, propellant substitution, etc [SAE PAPER 660453] 18 p3246 A66-33896
- ROCKET ENGINE CONTROL
- Controlled interruption of combustion in solid propellant engine as applied to rockets and missiles 09 p1435 A66-20576
- Parameter adjustment model reference adaptive control of nuclear rocket engine, noting design parameters, system performance, propellant savings estimates and dynamic stability 19 p3398 A66-36699
- ROCKET ENGINE DESIGN
- Optimum design problems of meteorological rocket Meteor 01 p0144 A66-11068
- Analytical solution to determine rocket design for maximum payload energy 02 p0294 A66-11634
- German participation in aerospace technology noting space transporter design and development 02 p0177 A66-11667
- Design and development of high energy standard engine for ELDO-B carrier rocket 02 p0279 A66-11669
- French Diamant satellite launching rocket noting design, performance, stages, propellants, instrumentation, etc 02 p0295 A66-11672
- Flight tests and observations with S-IV stage of Saturn I carrier rocket, discussing design, reliability, developmental problems and difficulties 05 p0770 A66-14674
- Pump-fed fluid rocket engines with chamber pressures over 100 atm 06 p0941 A66-15913
- Development of 23KS20000 motor for Black Brant IIB vehicle with emphasis on internal ballistics 06 p0942 A66-16702
- Design considerations, materials and problems of De Laval nozzle as applied to liquid and solid propellant rocket engines 07 p1040 A66-18306
- Nerva nuclear core rocket engine using graphite reactor operating at 1000 mw and providing 50,000 lb of thrust at greater than 700 sec specific impulse 08 p1254 A66-18574
- Design and development of Diamant launch vehicle, discussing prelaunch testing 10 p1610 A66-21254
- Equations governing thrust, weight of fuel and launch velocity of sounding rockets, noting problems in booster effect, drag coefficient, trajectory, etc 13 p2189 A66-25132
- British space research for 1965-66 including rocket development, satellite tracking, solar radiation, ionospheric sounding, etc 15 p2599 A66-29898
- Rotating speed effect on design of dynamic seals for rocket engine turbopumps, presenting aspects of design of hydrostatic seal [ASME PAPER 66-FE-18] 17 p2932 A66-33271
- Environment influence on design and development of Black Knight rocket engine 18 p3163 A66-34211
- Microrocket technology utilizing solid, liquid and gaseous propellants for spacecraft control, including performance measurement techniques

[AIAA PAPER 65-620] 20 p3629 A66-38149
Low-thrust rockets for spacecraft attitude control, noting subliming solid rockets 21 p3807 A66-38800
HR-4 research engine development and hybrid engine in terms of construction and variable thrust, noting polymerized amino acid compound fuel 23 p4121 A66-41170
Book on rocket construction 1963-65 and winged space vehicles including manned orbital space station, design, structural schemes, reentry, etc 23 p4128 A66-41277
Japanese Aeronautical Research Institute Solid Rocket and Special Small Rocket projects, examining propellant design for performance requirements 23 p4132 A66-41418
Japanese special small rocket design characterized by extreme slenderness and use of aluminum as principle structural material 23 p4132 A66-41419
Structural design of Japanese SSR, emphasizing motor and nozzle characteristics 23 p4133 A66-41425
Environment influence on design and development of Black Knight rocket engine 24 p4261 A66-42573

ROCKET EXHAUST
Noise problem associated with rocket boosters, possible minimization by radical change of design 02 p0293 A66-11511
Radar interference and attenuation in rocket exhausts, noting effect of altitude and tests at microwave bands 02 p0278 A66-11514
Rocket exhaust plasma disturbance on radio transmission between vehicle and ground station noting multipath, forward and backscatter 04 p0479 A66-13625
Base heating in Saturn S-IV stage from exhaust reversal, comparing flight and scale model data [AIAA PAPER 66-45] 05 p0770 A66-15037
Base heating scaling criteria for four-engine rocket cluster operating at high altitude [AIAA PAPER 65-826] 05 p0771 A66-15851
Radiation from carbon particle clouds produced by research rocket motors [AIAA PAPER 66-133] 06 p0970 A66-16413
Evaluating air pollution hazard to personnel from exhaust gases of Titan II test firings 06 p0819 A66-16493
Laboratory simulation, in continuum and rarefied flow regimes, of perturbations of ionosphere by satellite and rocket exhaust 06 p0869 A66-16908
Thermal and pressure effects of rocket exhaust impinging on flat plate surface at high vacuum [AIAA PAPER 66-46] 07 p1154 A66-17895
Model derived describing oxide particle distribution obtained from internal burning cylindrically-perforated aluminized solid propellant grains [AIAA PAPER 65-10] 08 p1282 A66-19137
Microwave attenuation characteristics of rocket exhaust, examining effects of propellant composition, motor configuration and missile trajectory [AIAA PAPER 65-181] 12 p1820 A66-24689
RF transmission through plasmas created by rocket exhaust of Saturn vehicle [AIAA PAPER 65-185] 12 p1820 A66-24690
Response of Langmuir probes in rocket exhaust jets, noting sensitivity to chamber temperature and pressure and alkali metal concentration 14 p2294 A66-27421
Electromagnetic wave interaction with rocket exhaust plasmas and degradation of guidance, telemetry and tracking systems 14 p2237 A66-27509
Hypothesis that Luna IX rocket exhaust during soft landing caused formation of shallow crater visible in Ranger VII lunar probe photographs 15 p2593 A66-28681
Nonequilibrium ionization of suspension of solid particles expanding supersonically in nozzle, particularly lowering of ionization due to injection in flow of high work function 15 p2615 A66-28762
Mass spectrometric investigations of interaction of atmospheric ions with molecules of rocket gas release 15 p2495 A66-30061
Effect of air mixture application on optimum ascent trajectories and ratio of payload to takeoff weight of carrier rocket

configurations 16 p2790 A66-30345
Atmospheric wind measurement technique utilizing acoustic noise of rocket exhaust [AIAA PAPER 66-440] 16 p2741 A66-30601
Short duration simulation of rocket exhaust products, flow duration through nozzle and effect on recirculation flow fields 17 p2904 A66-33475
Propellant rocket exhaust plume effect on error calculation for radiation balance IR tracker 18 p3240 A66-33798
Composition in far field of rocket jet mixing with air 18 p3260 A66-33808
Cylindrical plasma beam simulation of rocket exhaust turbulence and scattering effects on microwave propagation 18 p3069 A66-34253
Multiple rocket engine exhaust plumes calculated by method of characteristics and finite difference and compared with schlieren data [AIAA PAPER 66-651] 18 p3264 A66-34448
Microthrust engines used in subscale investigations of adjacent spacecraft surface heating by control rocket plume impingement and nozzle wall heating [AIAA PAPER 65-584] 19 p3449 A66-35597
Electron levels in afterburning region of rocket exhaust plume with aluminum or alkali content 19 p3477 A66-35633
Tungsten erosion by Co, N, Hg, alumina, H, water vapor, carbon dioxide, etc, in rocket exhaust of aluminized propellant 19 p3385 A66-36152
Heating from Saturn solid propellant S-II and S-IVB ullage motor exhausts and S-IB, S-IVB and Centaur retro motor exhaust theoretically and experimentally analyzed [AIAA PAPER 66-653] 19 p3479 A66-36600
Microwave attenuation magnitude associated with exhaust plasma of nonaluminized and aluminized composite propellant 21 p3807 A66-38687
Thermal control surface contamination due to rocket exhaust plumes and effects on solar absorptance and IR emittance of protective coatings 22 p3891 A66-40231
Wind tunnel test program for simulation of gas-particle rocket exhaust plume, separated flow around nozzle and base recirculation [AIAA PAPER 66-767] 22 p3895 A66-40648
Laminar shock layer structure in which streamlines retain appropriate momentum, calculating exhaust plume structure for rocket nozzle 23 p4012 A66-41921
Density and temperature measurement in base region flow field of clustered rocket model, using electron beam technique 24 p4210 A66-42200
Signal transmission disturbances caused by presence of rocket exhaust plasmas in propagation medium between ground station and rocket powered vehicle 24 p4172 A66-42617
Analytical method for studying pattern of flow from nozzle into vacuum used to calculate plume shape for rocket exhausting into hypersonic stream 24 p4158 A66-42790

ROCKET FIRING

Data acquisition of acoustic, vibration and heat flux during static rocket testing, using balloon rigging arrangement 08 p1202 A66-18927
Heat transfer processes during ignition of solid propellant rockets, considering radiative and convective components [AIAA PAPER 66-66] 08 p1279 A66-18992
Real time system for measuring and analyzing meteorological data for computing launch angles for unguided rocket flights [AIAA PAPER 66-336] 12 p1953 A66-24481
Atmospheric diffusion study to determine toxic hazard exclusion distances for rocket launching personnel under operating conditions [AIAA PAPER 66-376] 12 p1907 A66-24502
Seismograph used for measuring natural seismic activity and similar man-made disturbances like large rocket firings, showing propagation of disturbance by ground and not by atmosphere 16 p2677 A66-30448
Missile and rocket launching with static instability, deriving approximate solution for equations of longitudinal accelerated motion 19 p3470 A66-36083
Electronic devices for ignition of firing mechanisms designed for carrier rocket

stage separation 21 p3822 A66-396
Simulation of rocket engine start transients via shock tube combustor drivers, discussing diaphragm rupture effect on combustion, acceleration and buoy pressure [AIAA PAPER 66-761] 22 p3972 A66-406

ROCKET FLIGHT
Iteration technique used to study minimum climb time of rockets 07 p1141 A66-182
Dragon rocket probe, launch history and flight modifications 10 p1611 A66-213
Thrust stand simulation for determining space vehicle rocket motor attach-point motion 10 p1520 A66-219
Pontryagin maximum principle applied Mayer variation problem in dynamics point of variable mass 11 p1732 A66-223
/rocket/ 11 p1732 A66-223
Multistage rocket acceleration by explosion separation of individual stages, solving optimization problems connected with problem 11 p1777 A66-224
Book on flight dynamics, covering optimum control, multistage rocket trajectory optimization, VTOL aircraft dynamic autopilot design, etc 11 p1732 A66-233
Maximum ballistic rocket trajectory range in view of Earth rotational and curvature effects 11 p1734 A66-233
Idealized rockets with constant rate mass-change and thrust 13 p2184 A66-2577
Sounding rocket trajectory determination by double integration of longitudinal acceleration 16 p2652 A66-3056
Titan III building blocks, discussing vehicle features, launch facilities, mission area maneuver capability, payload mass ratio, etc [SAE PAPER 660447] 18 p3245 A66-3389
Motion equation for relativistic rocket 18 instantaneous rest frame 18 p3237 A66-3501
Aeroelastic characteristics of Japanese special small rocket, examining body divergence speed and flutter speed of tail fins under flight conditions 23 p4138 A66-4142
Flight performances of special small rockets with no cross wind conditions, noting drag coefficient 23 p4133 A66-4144
Cross wind effect on special small rocket during powered flight, calculating flight path angle at burnout for launching angle determination 23 p4133 A66-4144
Flight path dispersion of special small rocket/SSR/ due to thrust misalignment stabilizing effects of spin during powered flight by canting control vane in nozzle 23 p4133 A66-4144
Decrease in electron density of ionospheric F region following passage of powered rocket 24 p4201 A66-42601

ROCKET INSTRUMENTATION
Polish Meteor 1 meteorological rocket equipment, examining gas pressure operated time-delay system used for ejecting dipole container 01 p0071 A66-1106
Double-focusing miniaturized beta-spectrometer for measuring low energy electrons within small band spread associated with auroral phenomena 03 p0369 A66-1265
Electronic timer for rocket, controlling duration of burning time 08 p1188 A66-1861
Techniques for rocket solar UV and fo UV spectroscopy 13 p2081 A66-2601
Soviet monograph on atmospheric exploration using rockets and satellites covering meteorological and geophysical instrumentation, measurement parameters etc 13 p2083 A66-2650
1680 mc/s telemetry system for meteorological rockets 16 p2651 A66-3055
Rocket borne ionospheric direct sounding instruments to measure ion and electron density, electron temperature, thermal electron energy distribution and space electric potential versus rocket potential 16 p2705 A66-3081
Man-machine system in control and guidance of Saturn V launch vehicle emphasizing participation during atmospheric phase of flight profile 18 p3242 A66-3384
Instrument unit analysis for Saturn IB program, noting environmental, guidance and flight control, electrical systems and countdown procedure 19 p3354 A66-3546

Antenna system for VLF radiowave experiments in D region mounted on Mark rocket 19 p3321 A66-36621

Ant II control system modification for Ant III missions involving incorporation of acceleration loop, division of autopilot, 21 p3819 A66-38852

Rocketborne instruments for observing cosmic X-rays including scintillation and proportional and GM counters 23 p4067 A66-41287

IR spectrometers, radiometers, horizon sensors, rotating-prism planet-seekers and detector cooling using solid cryogenics, for use in high altitude rockets and Earth satellites 24 p4211 A66-42679

ROCKET LAUNCHING DEVICE

Launching facilities for space rockets including buildings, assembly and test program and platforms for Saturn V Moon shot 01 p0054 A66-10873

Electric ground system for launching Fish Meteor 1 meteorological rocket 01 p0055 A66-11065

Performance operation and cost of rockets

Threat-breathing launch system, noting preliminary designs 02 p0295 A66-11676

Design of small rocket launch equipment that remains near ground 06 p0960 A66-16498

Small rocket launcher design, discussing dispersion and velocity 11 p1682 A66-22434

Worldwide upper-atmosphere sounding rocket launching facilities in meteorological research 11 p1687 A66-22965

Large bore gun launched rockets, design and performance 14 p2270 A66-27814

Collection of information and announcements pertaining to rocket and satellite launchings including objectives, statistics, data exchange, 15 p2600 A66-29902

Australian space program noting rocket landings, Beacon satellites, station development, etc 15 p2600 A66-29909

Analytic solutions for predicting motion of high-thrust rockets applied in guidance and real-time targeting [AIAA PAPER 66-452] 18 p3226 A66-33648

ROCKET LINER

Cumulative damage and fatigue applicability to solid propellant-liner bonds failure, noting useful life and stress-time relationship [AIAA PAPER 65-191] 12 p1937 A66-24705

ROCKET MEASUREMENT

Rocket experiment using proportional counter to measure soft solar X-rays in 10 to 60 angstrom region 03 p0421 A66-12865

Rocket launching through aurora of high luminosity spectrograph and liquid ammonia study behavior under solar radiation 03 p0426 A66-12870

Rocket measurements discussing electron and proton flux, energy spectra and angular distribution in high altitudes 05 p0676 A66-14776

Rocket measurements of energetic particles discussing electron fluxes, energy spectra, angular distribution and data 05 p0745 A66-14777

Rocket measurement of energetic particles discussing proton flux, energy spectra, pitch angle distribution and data 05 p0746 A66-14778

Midlatitude ionospheric currents detected by rocketborne rubidium vapor magnetometers in Nike-Apache rockets 05 p0667 A66-14791

Rocket measurements to investigate vertical current distribution of electrojet over India to correlate magnetic profiles with simultaneous electron density measurements 05 p0668 A66-14794

Electron distribution in quiet D region derived from rocket measurements of wavefield generated by LF ground transmitter 05 p0670 A66-14949

Solar X-ray photographs, describing Aerobee rocket mounted telescope using grazing incidence optics 05 p0763 A66-15289

Solar X-ray radiation, describing rocketborne instruments using photographic emulsion for X-ray emission intensity measurements 05 p0682 A66-15366

Estimation of ozone concentration at altitudes of 44 to 102 km from nighttime geophysical rocket measurements of atmospheric brightness 08 p1221 A66-19796

Rocket grenade measurement of temperature, pressure, density and wind velocity in upper atmosphere 10 p1533 A66-21832

Flux and energy spectrum of low energy cosmic ray protons, noting rocket measurement results and analogy to solar flare spectrum 11 p1764 A66-23059

Rocketborne measurements of electron precipitation and relative brightness of ionized molecular nitrogen ion and atomic oxygen auroral emissions 11 p1764 A66-23139

Estimated 10-mb geostrophic winds compared with winds measured by rocketsondes 11 p1731 A66-23385

Stellar spectroscopy in UV region using f/2 Schmidt camera onboard Aerobee rockets 14 p2385 A66-28114

L-3 rocket observation of proton and electron fluxes at high altitudes, using solid state detectors 15 p2574 A66-28910

Rocket and balloon-borne exposure study of terrestrial microorganism survival in space 15 p2441 A66-29965

Atomic ions of meteoric origin indicated as source of midlatitude E region in IQSY rocket measurement 15 p2492 A66-30033

Geophysical rocket determination of aerosol scattering coefficient variation from brightness values at 70-450 km heights 15 p2495 A66-30057

Rocket measurement of diurnal variation of ozone profiles above maximum concentration level 15 p2495 A66-30058

Aerobee rocket measurement in sampling of micrometeoroid debris during peak of Leonid meteor shower 15 p2605 A66-30068

Rocket and balloon measurements of fast neutron intensity at high altitude from detectors flown in 1964 and 1965 18 p3188 A66-34823

German-French high-altitude rocket measurement of inner radiation belt and artificial ion clouds at altitude of 2000 km 19 p3348 A66-36286

Estimation of ozone concentration at altitudes of 44 to 102 km from nighttime geophysical rocket measurements of atmospheric brightness 21 p3733 A66-38792

Satellite and rocket measurement of upper atmosphere characteristics, deriving standard atmosphere CIRA 1965 21 p3735 A66-39615

Quenching of metastable states by atmospheric particles on basis of rocket measurements of dayglow, noting quenching coefficients of oxygen 22 p3916 A66-40872

Rocketborne RF electron density probe for ionospheric profile determination 23 p4064 A66-41683

Ionospheric electron density measured by rocket carrying new gyro-plasma impedance probe 24 p4199 A66-42465

Rocket observation of upper atmospheric wind around ionospheric E layer by sodium release method, noting cloud drift 24 p4199 A66-42466

Rocket photometric measurements of weak airglow emission at 6300 angstrom oxygen line 24 p4199 A66-42467

Solar physics and satellite/rocket observation goals, noting unresolved solar atmosphere problems 24 p4276 A66-42658

Meteorological measurement systems in relation to aerospace problems, using flight history of rocket vehicle and root mean square accuracy 24 p4214 A66-43043

ROCKET MOTOR CASE

Closed loop hydraulic servo system simulating flight stresses on motor case of solid propellant rocket motor in static firing test stand for calibrating stand 03 p0353 A66-13218

Fabrication of 260-inch diameter rocket cases by automatic gas tungsten arc welding techniques, using 18 percent nickel maraging steel 10 p1540 A66-21767

Cast-double-base propellant mechanical behavior and failure during slow cooling and rapid pressurization of case-bonded rocket motors [AIAA PAPER 65-161] 12 p1934 A66-24704

Bonding strength of polyurethane and polybutadiene composite propellants in cast-in-case rocket motors depends on propellant cohesive strength 12 p1934 A66-24706

Stresses and strains in anisotropic multilayered thick walled circular cylinder

subjected to radial pressure [AIAA PAPER 65-174] 14 p2402 A66-27869

External and internal loads and environment effects on space vehicle, especially motor case, noting stresses, structural design, fatigue behavior, safety, etc 19 p3474 A66-36313

Radiographic examination of large filament-wound solid propellant motor cases 21 p3744 A66-39152

Nonmetallic solid-propellant rocket motor component manufacture and assembly, noting process control 22 p3927 A66-40284

Skirt Jet peripheral retrorocket for lightweight terminal impact attenuation system using multiple nozzle rocket motors assembled to form annulus around outer periphery of vehicle 22 p3986 A66-40598

ROCKET NOSE CONE

Requirements, materials, fabrication and testing of exit nose fairing for A3 Polaris missile, noting use of laminated wood as optimum material 06 p0885 A66-16300

Nonslender bodies of revolution with minimum pressure drag, noting derivation of minimizing curves for Newtonian flow 11 p1631 A66-22514

Minimum pressure drag for nonslender hypersonic body calculated, using normalized coordinates 11 p1631 A66-22515

ROCKET NOZZLE

SA JET NOZZLE

Boundary layer effect on thrust of small rocket engines with high expansion ratio nozzles 01 p0130 A66-10791

Cermet ablatives for thermal shields in fabrication of nozzles and nose cones [SAE PAPER 650767] 01 p0078 A66-10838

Fracture strength of two rocket-nozzle-grade graphites under ten biaxial stress states at room temperature 03 p0435 A66-12637

Jet tab system influence on pressure distribution within rocket nozzle for missile control 03 p0431 A66-12749

Throat area variation in expansion-deflection nozzle to obtain thrust modulation, noting increased coefficient of thrust 04 p0574 A66-14390

Refractory metals for use in nuclear rocket nozzles to improve cycle life [AIAA PAPER 65-602] 05 p0702 A66-15133

Fabrication characteristics of ablative plastics prepreg reinforced tape for construction of large rocket nozzles 06 p0885 A66-16289

Tungsten rocket nozzle manufacturing by forging, impregnation and deformation techniques 06 p0888 A66-17075

Convective heat transfer coefficients at rocket nozzle throat handling nonaluminized propellant gas 07 p1151 A66-17583

Backside wall temperatures of ablative rocket nozzle exposed to hyperthermal environment treated for backside with heat transfer 07 p1151 A66-17584

Char formation in solid rocket nozzle exit cones made from reinforced plastic predicted from corrosion standpoint 07 p1151 A66-17585

Reversal temperature profile across small rocket exit measured by sodium line reversal technique 09 p1382 A66-20506

Solid propellant second stage of Diamant launch vehicle with steerable nozzles 10 p1611 A66-21259

Estimation of starting pressure ratio of axisymmetric ejector-diffuser systems for rocket altitude simulation 10 p1481 A66-21933

Nozzle weight determination for preliminary design of solid propellant rocket motors 10 p1595 A66-21950

Optimum rocket nozzles with maximum thrust for given nozzle length treated by one-dimensional procedure 11 p1630 A66-22508

Optimum maximum-thrust rocket nozzles subjected to isoperimetric constraints 11 p1630 A66-22509

Limited nozzle throat area variation for combustion termination in rocket motor [AIAA PAPER 65-194] 12 p1937 A66-24707

Composite materials, noting fibrous composites using whiskers, fabrication including spray-up, filament winding, etc, mechanical properties, application for rocket nozzles, heat shields, etc 14 p2318 A66-27228

Suppression of random transverse thrust

components in combustion phase of rockets by varying nozzle profile in region of throat 14 p2220 A66-27488

Fabrication of ablative liners for solid propellant rocket motor nozzles [AIAA PAPER 65-167] 14 p2375 A66-27872

Gas-particle flow, particle velocity distributions and lag loss reduction for rocket nozzles 14 p2375 A66-27893

Variation problem solution in hypersonic gas dynamics, noting intake portion construction for body with minimum resistance for limited length and flat end 15 p2477 A66-28956

Vortex structure of internal flow upstream of nozzles of various models of solid propellant rockets 17 p2838 A66-32330

Test program for data on plug nozzle behavior especially for solid propellant rockets, noting similarity with de Laval type nozzles 17 p2990 A66-32373

Heat shield and rocket nozzle chemical reactions based on equilibrium thermodynamics of high temperature materials at gas-solid interface 18 p3260 A66-33825

Condensed phase particle growth in rocket nozzle by particle collision and coalescence [AIAA PAPER 66-639] 18 p3164 A66-34438

Natural vibration frequencies of rocket nozzles, accounting for anisotropic elastic behavior, internal gas dynamic pressure, boundary conditions, etc 18 p3258 A66-34601

Coupled radiative and convective heat fluxes in high temperature hydrogen propellant rocket nozzles with shape and temperature variations [AIAA PAPER 65-557] 19 p3449 A66-35612

Forging methods for reliably producing unalloyed molybdenum forgings with high impact strength for rocket nozzle application 19 p3366 A66-36107

Electron beam welding suitable for joining tungsten sheet for fabrication of solid rocket nozzles and nozzle accessories 19 p3369 A66-36128

Fabrication process parameters for producing solid-rocket nozzles by shear and conventional spinning of tungsten plate 0.250-inch thick and thicker 19 p3369 A66-36130

Optimization analysis for axisymmetric rocket motor nozzle design based on assumptions for gas particle flow [AIAA PAPER 66-538] 19 p3277 A66-36598

Engineering method to determine combined effects of entry and combustion heating on total char regression of ablative nozzle as function of distance from exit plane [ASME PAPER 66-MD-72] 21 p3806 A66-38500

Transverse velocity component effect on nonlinear behavior of short nozzle, with application to T burner 21 p3807 A66-38702

Viscous drag on flat plate in supersonic flow injected with gas in boundary layer, examining exit cone of rocket nozzle 22 p3970 A66-39875

Two-phase cold-flow modeling analysis for rocket nozzle, noting deviations from one-dimensional flow for static pressures on nozzle shape [AICE PREPRINT 44F] 22 p3971 A66-39881

Particle growth in rocket nozzle, particle size distribution, effect of channeling, determining increase of mass-median diameter of distribution 22 p3971 A66-40364

Optimization of supersonic portion of three-dimensional flow geometry in rocket motor nozzle for maximum thrust [AIAA PAPER 65-568] 23 p4007 A66-41108

Nozzle for special small rocket motor, noting weight, construction material and performance 23 p4121 A66-41422

Structural design of Japanese SSR, emphasizing motor and nozzle characteristics 23 p4133 A66-41425

Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions 23 p4009 A66-41731

Throat erosion rates of carbon chokes in rocket motor nozzle predicted, using mathematical approach combined with experimental result [AIAA PAPER 65-351] 24 p4261 A66-42772

ROCKET PHOTOGRAPHY

Photographic observations of rocket nightglow 10 p1528 A66-21141

Rocketborne photometer data analysis of night sky airglow and spectrum in 6300 angstrom region 15 p2482 A66-28494

Statistical petrographic analysis of meteorite and carbonaceous chondrite evolution on Moon and Mars from rocket photographs 23 p4132 A66-42075

ROCKET PROJECT

French satellite-carrying Diamant rocket describing design, developmental testing and operating characteristics 05 p0770 A66-15201

ROCKET SLED

Vertical-track free-fall rocket sled system, discussing design principles, operation and performance 18 p3093 A66-33796

ROCKET SOUNDING

SA SOUNDING ROCKET

Extreme UV solar spectrum analysis between Lyman alpha lines of H-I and C-VI, using rocket spectrography 02 p0286 A66-11356

Electron density and collision frequency observation during auroral absorption event, discussing rocket experiment techniques and results of analysis 03 p0363 A66-12645

Rocket-mounted spectrometer with solid state detectors for measuring internal energy spectra of auroral electrons and protons in 40-104 kev range 03 p0369 A66-12650

Electrostatic spectrometers discussing deflection type, retarding-potential type and magnetic analyzers, advantages, uses, flux measurement techniques via energy selectors, etc 03 p0369 A66-12652

Charged particles in auroral zone, measuring energy and pitch angle distribution of electrons and protons with rocket mounted solid state detectors 03 p0417 A66-12653

Rocket and satellite methods for studying ionosphere 03 p0370 A66-12862

Ionospheric electron density measured by rocketborne RF spectrometer, dispersive Doppler measurements and variable-frequency impedance probe 03 p0366 A66-12878

Diffuse day skylight intensity rocket measurements, discussing exponential variation of intensity with height in upper atmosphere 05 p0668 A66-14916

Rocketborne resonance probe experiments for measurement of electron temperature, density and collision frequency 05 p0669 A66-14944

IR spectral reflectance of terrestrial atmosphere including ground cover effect, noting data from airborne equipment and instrumented rocket 05 p0669 A66-14947

Ionosphere and plasma in near space, discussing Soviet rocket observations on ionospheric structure, expansion and space ionization 05 p0749 A66-15231

Data obtained by satellite and rocket probes on cosmic ray composition, particularly on fluxes on nuclei of elements contained in rays 06 p0946 A66-16569

Primary cosmic radiation, discussing variations of time and space of intensity, energy spectrum and chemical composition 06 p0947 A66-16573

Pressure, density, temperature and wind measurements in mesosphere resulted from rocket soundings to determine structure 07 p1027 A66-17361

Ionospheric research from space vehicles, comparing experimental data with theoretical models of D, E and F regions 07 p1029 A66-18089

Cosmic radio-noise intensities below 5 mc measured by rocket probe 08 p1287 A66-18775

Mesospheric sounding rocket launchings and aims pursued 08 p1247 A66-19197

Relation of sporadic E layer to ionospheric F region 08 p1221 A66-19792

Acoustic detection of micrometeoroids from rockets, discussing experimental setup, calibration methods and analysis of results 09 p1381 A66-20367

Aerospace studies in Argentina during 1964 using rockets and balloons and including winds, E layer, satellite tracking, etc 09 p1458 A66-20706

Sounding rocket experiments at Thun Equatorial Rocket Launching Station India 09 p1458 A66-20706

Dayglow at 6300 and 3914 angstroms from rocket soundings and roles of recombination and UV dissociation 09 p1374 A66-20706

Variation and behavior of ionospheric electron concentration at altitudes of 100-300 km as measured by rocket probes 09 p1378 A66-21141

Soft electron fluxes in upper atmosphere measured, using open type secondary electron multiplier ejected in container from rocket 09 p1443 A66-21141

Extreme UV solar spectrum analysis between Lyman alpha lines of H-I and C-VI using rocket spectrography 10 p1597 A66-21141

Solar X-ray spectrum studies, main oxygen and iron lines, using Aerobee rocket 10 p1598 A66-21141

Inaccuracy in rocketsonde data on HF midwinter easterlies in stratosphere over Cape Kennedy 10 p1531 A66-21141

X-ray photographs of Sun using Fresnel zone plate camera mounted on Skylark rocket, noting Lyman C-VI emission line in solar spectrum 10 p1607 A66-21141

Ionosphere formation theory, reviewed solar radiation, absorption, ionization cross section rate, electron removal in F and upper E layer, etc 10 p1533 A66-21141

Atmospheric aerosol size distribution from scattered light measurements by rocketborne equipment 11 p1697 A66-22506

Experiments for space dust collection describing rocketborne micrometeorite collection during Venus Fly Trap and Nike-Cajun flights 11 p1771 A66-22606

Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation, etc 12 p1949 A66-24066

Diurnal and seasonal altitude variation of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration 12 p1869 A66-24266

Rocket observation of atmospheric density at high latitudes in Arctic and Antarctic locations [AIAA PAPER 66-345] 12 p1872 A66-24488

Heat transfer equations for rocketborne stratospheric temperature sensor in form of spherical bead thermistor and experimental analysis of physical, thermodynamic and electrical characteristics of rocketsonde [AIAA PAPER 66-385] 12 p1882 A66-24500

USAF meteorological rocket network showing dependence on requirements expressed by design and test personnel [AIAA PAPER 66-397] 12 p1908 A66-24511

Canadian Black Brant research rocket program for upper atmospheric sounding 13 p2184 A66-25700

Aerobee rocket measurements of cosmic X-ray sources emanating from Cygnus A, M-8 and galactic supernova remnant Cassiopeia A 13 p2174 A66-25833

Meteorological rocket wind observations noting diurnal oscillations and tidal characteristics 13 p2122 A66-26113

Soviet monograph on atmospheric exploration using rockets and satellites covering meteorological and geophysical instrumentation, measurement parameters, etc 13 p2083 A66-26500

Rocket measuring techniques for E layer charge particles and magnetic field discontinuities 14 p2282 A66-26855

Bore-sighted scanning star tracker for precise attitude sensing and control of sounding rocket 14 p2329 A66-28455

Outgoing Earth and atmospheric radiation observed in IR spectrum at various altitudes by geophysical balloons and rockets 15 p2483 A66-28733

Space research in Federal Republic of Germany during 1965 15 p2599 A66-29900

Pakistan space program including rocket soundings, satellite tracking, meteorological research, etc 15 p2601 A66-29900

Canadian space program including nonmilitary activities, upper atmospheric research, rocket sounding, aurora studies, satellite use, etc 15 p2601 A66-29900

- rocketborne spectrograph measurement of reflectivity of Venus and Jupiter, noting ionospheric Rayleigh scattering 15 p2603 A66-29963
- rocket observation of upper atmospheric winds, noting wind shear, velocity, pressure, and vector rotation, etc 15 p2492 A66-30027
- meteorological rocket measurement of wind patterns noting velocities, turbulences, atmospheric diffusion coefficients, 15 p2492 A66-30028
- zone number densities in 30 to 75 km altitude determined at night by rocket measurements of lunar UV radiation absorption in various bands 15 p2492 A66-30030
- like-Cajun rocket investigation of auroral D and E region parameters and effect on electrojet 15 p2493 A66-30035
- upper ionospheric electron density measurement by signals propagated between two parts of high altitude rocket 15 p2493 A66-30037
- ionospheric measurement of admittances of three orthogonal short poles, noting impedance variation with respect to frequency attitude and range 15 p2493 A66-30038
- gazing sphere measurements of ionospheric density, noting temperature and density profiles, pressure distribution, 15 p2494 A66-30041
- early morning ionospheric characteristics measured by geophysical rocket, noting electron concentration, solar UV emission density changes, electron temperature, absorption profile, etc 15 p2494 A66-30052
- rocket smoke-trail wind measurement technique 15 p2534 A66-30072
- AFRL grazing incidence grating monochromator used with thin window flow trigger detector on Aerobee rocket for solar spectrum recordings between 30 and 130 angstroms 15 p2605 A66-30079
- solar X-ray images obtained, using grazing incidence optics from Aerobee rocket at line of solar minimum 15 p2605 A66-30080
- neutral particle densities of nitrogen, molecular and atomic oxygen and argon in upper atmosphere, noting density profile regularities, diffusive separation altitude, etc 15 p2497 A66-30086
- proton data from rocket flight into breakup phase of IBC-I aurora, noting proton movement in atmosphere 16 p2794 A66-30701
- magnetometer for determining position of landing rocket 16 p2707 A66-30997
- diurnal oscillation in zonal and meridional winds determined, using harmonic analysis of data obtained from meteorological rocket soundings 16 p2699 A66-31641
- rocketborne filter heliograms in Mg II line 2802.7 angstroms including tabulated data 17 p2997 A66-31925
- UV emissions in 1000-1350 angstrom range measured from rocket launched into aurora from Fort Churchill 17 p2917 A66-32523
- cosmic X-ray sources observed through rocket-mounted detectors, noting differences in spectra 17 p2994 A66-32970
- high latitude density regime in upper atmosphere inferred from Arctic and antarctic observations 17 p2922 A66-33343
- three rocket tests described for measurement of ionospheric electron density 18 p3105 A66-33983
- galactic X-ray energy spectrum noting equipment used, shape of spectra in terms of thermal radiation intensity, etc 18 p3177 A66-34757
- rocket-borne neutron detector measurements of neutron albedo and intensities at various geomagnetic latitudes 18 p3199 A66-34887
- aerobee rocket measurement of nitric oxide in upper atmosphere, noting fluorescence in airglow layer, emission rate factors and NO densities 19 p3349 A66-36351
- upper atmospheric nitric oxide determined from Aerobee measurement of UV dayglow spectra 20 p3550 A66-37299
- aerobee rocket instrumentation and rocket landing techniques for investigating far UV auroral emission 20 p3552 A66-37594
- rocket instrumentation for galactic X-ray observation, noting scintillation counter, proportional counter and GM counter 20 p3636 A66-38237
- Relation of sporadic E layer to ionospheric F region 21 p3733 A66-38788
- coronal emission-line intensities in extreme UV, calculating fluxes for resonance lines of coronal ions from rocket measurement data 21 p3816 A66-39553
- ozone measurements with rocketborne ozonesondes, showing graphs of distribution as function of altitude and temperature profile 22 p3903 A66-39683
- gerdier-condenser rocketborne probe used to measure ion densities in D region of atmosphere 22 p3905 A66-39947
- electron density profile measurements in auroral zone D layer during quiet ionospheric conditions, using partial reflection method 22 p3906 A66-39951
- electron density measurements in D layer obtained, using LF radio wave propagating into ionosphere and rocketborne receivers 22 p3906 A66-39955
- electron density profiles in D layer measured through Doppler shift on VLF signal propagating from ground up and received by rocket 22 p3907 A66-39957
- number densities of ions and electrons in D region measured, using Arcas rocket 22 p3907 A66-39958
- topside ionosphere, emphasizing experiments with incoherent scatter radars and topside sounder satellites 22 p3908 A66-39970
- graphical determination of atmospheric pressure from rocketsonde temperature measurements 22 p3943 A66-40056
- angular distribution of Earth outgoing thermal radiation in IR region measured by geophysical rocket 22 p3913 A66-40470
- ion temperature measurements around 1000 km altitude, using ion energy analyzer and mass spectrometer mounted on rocket 22 p3913 A66-40551
- number densities and composition of upper atmosphere determined by rocketborne mass spectrometers, estimating temperature variation with altitude 22 p3913 A66-40553
- celestial X-ray sources at low galactic longitude located by rocket observation 23 p4123 A66-41148
- height-luminosity distribution of auroral hydrogen beta emission measured with rocket mounted photometer 23 p4065 A66-41690
- elemental abundances of low energy cosmic rays in July 1964 observed by sounding rocket, noting components 24 p4264 A66-42715
- interplanetary space and celestial observations from ground stations, satellites and space rockets 24 p4280 A66-43133
- ROCKET STEERING MOTOR**
- free-air thrust vector control using secondary injection of air into nozzle flow to reduce weight, cost and complexity applied to rocket engine steering 18 p3247 A66-34953
- ROCKET TEST STATION**
- high altitude simulating rocket test stands including equipment and performance capabilities of several U.S. and European stands 01 p0054 A66-10880
- testing installations for third stage of ELDO rocket noting test stands, control center and fuel depot 02 p0214 A66-11247
- hot water rockets covering principle, design, advantages, testing techniques and performance capabilities 05 p0659 A66-14677
- vacuum simulation facility near Munich for testing third stage of ELDO rocket 10 p1519 A66-21374
- steam generating technique for vacuum ejector system of high-altitude-simulating rocket test facility in West Germany 10 p1519 A66-21403
- radiological prediction and monitoring of tests at Nuclear Rocket Development Station 12 p1911 A66-23671
- liquid hydrogen flow system performance during startup transient of nuclear rocket measured in full-scale simulated engine system, approximating in-flight exhaust conditions 12 p1911 A66-23699
- rocket equipment simulation on rocket engine test facilities, describing fuel tank design for experiment with suitable flow characteristics and parameters 12 p1829 A66-24317
- static rocket propulsion testing for various propellants and test instrumentations [AIAA PAPER 65-476] 12 p1858 A66-24688
- ROCKET THRUST**
- three electronic/digital computer techniques for compensating errors in transient-thrust measurements of captive rocket engine 04 p0507 A66-13613
- rocket propellant chemistry covering synthesis, properties and capabilities of organic and inorganic rocket fuels 05 p0743 A66-14675
- influence on stability of masses which are in relative motion with respect to projectile determined, noting engine thrust effect on attitude control system performance 10 p1611 A66-21386
- suppression of random transverse thrust components in combustion phase of rockets by varying nozzle profile in region of throat 14 p2220 A66-27488
- spatial trajectories of rocket under constant thrust in planetary field 15 p2605 A66-28504
- tests on rocket thrust vector control using hot injectant gas from same fuel and oxidizer as main engine, tabulating data 16 p2810 A66-30902
- optimum stage initial acceleration and velocity distribution between stages for maximum payload ratio in single and multistage vehicles 19 p3470 A66-36620
- flight path dispersion of special small rocket /SSR/ due to thrust misalignment, stabilizing effects of spin during powered flight by canting control vane in nozzle 23 p4133 A66-41443
- ROCKET VEHICLE**
- SA MULTISTAGE ROCKET VEHICLE**
- terminal prediction guidance for rocket vehicles in terms of strapped-down and gimbaled platform concepts 01 p0101 A66-10042
- metallurgical, insulation, welding and shaping problems encountered in development of Meteor-1 rocket prototype 01 p0079 A66-11069
- design limitations on supporting systems in scientific rockets and satellites 03 p0432 A66-12861
- global maximum for particle idealization of rocket propelled vehicle moving in calculus of variations, noting Lagrange equation 04 p0538 A66-13462
- orbiting telecommunications satellite network, noting application and necessary launch vehicles 09 p1464 A66-20562
- meteorological measurement accuracies for use in design and operation of aerospace vehicles [AIAA PAPER 66-349] 12 p1953 A66-24480
- ROCKETRY**
- rocket technology and air and space travel research - Annual Meeting, Berlin, West Germany, September 1964 04 p0581 A66-13494
- manufacturing methods in space flight technology - German Symposium, Munich, November, 1964 06 p0887 A66-17068
- relativistic rocket mechanics, considering coordinate transformation, velocity and dependence of mass on inertial reference system 11 p1775 A66-23118
- book on advances in space science and technology including solid propellant rocket motor cases, solar system exploration vehicles, undulation in selenology, etc 19 p3464 A66-36311
- ROD**
- dynamic stability of elastic and rigid rod under longitudinal impact 03 p0441 A66-13295
- equilibrium stability of rod beyond elastic limit 04 p0590 A66-14161
- longitudinal impact between cylindrical rods, considering local deformations and wave propagation in rods, showing solution through dimensionless equation of Sears theory 12 p1968 A66-24242
- frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 13 p2194 A66-25088
- buckling of rod with initial deflection as sinusoidal half-wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep 13 p2206 A66-26457

Aging behavior of rods produced by extrusion of manganese-containing aluminum alloy subjected to solution heat treatment, noting microstructure and mechanical properties 13 p2111 A66-26585

Endfire effect in dielectric foam rods and mode control by varying dielectric constant of rod 14 p2256 A66-27921

Stress wave propagation in inhomogeneous rod applied to measurement of dynamic overpressure on moving vehicle subjected to sudden intense blast loading 14 p2409 A66-28398

Fatigue testing metal rods in rotating beam machines without machining as-produced specimen 14 p2318 A66-28481

Derivation of basic equations describing stresses, moment stresses and displacement of rods without torsion 15 p2608 A66-28773

Critical stress, stability loss and load carrying capacity of axially compressed thin walled aluminum alloy rods 16 p2819 A66-31142

Heat transfer and stress wave evolution prior to ablation and thermal equilibrium in exposure of solid and liquid materials to laser sources 17 p2979 A66-32638

Magnetostatic spin wave propagation at microwave frequencies in magnetized rod 17 p2980 A66-32648

Pressure distribution, surface roughness, dry friction and elastic coupling effects on wave propagation and reflection in elastic rod, using modified-Laplace transformations 18 p3259 A66-34940

Temperature distribution and propagation of periodic temperature fluctuations in damped semiinfinite rod 18 p3267 A66-35061

Crack propagation, damage and fatigue fracture in plane rods with transverse cut under single step and multistep axial load 20 p3666 A66-37307

Dynamic instability of longitudinal and transverse oscillations of rod, emphasizing fluctuation having property of white noise with unit spectral density 20 p3670 A66-37680

One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-38386

Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 21 p3822 A66-38513

Free longitudinal oscillations of finite viscoelastic rod, neglecting relaxation 23 p4139 A66-41555

RODENT

S MOUSE

S RAT

ROLL CONTROL

SA MISSILE ROLL CONTROL

Aileron traverse effect on amount of coupling from roll to yaw during abrupt aileron roll of conventional aircraft 01 p0011 A66-10175

Asymmetrical ablation cause of persistent roll resonance in nominally symmetrical reentry vehicles [AIAA PAPER 66-49] 08 p1303 A66-18950

Automatic stabilization systems reduce accidents due to disorientation, emphasizing sensor-servo system for roll axis control [SAE PAPER 660201] 13 p1996 A66-26390

Aileron traverse effect on amount of coupling from roll to yaw during abrupt aileron roll of conventional aircraft 16 p2633 A66-31115

Newtonian formulas for determining pitch and roll and normal force derivatives for various types of conical and spherical bodies 17 p2838 A66-32333

Secondary injection control of single rocket nozzle roll 17 p3017 A66-33078

Adaptive roll autopilot in air-to-air interceptor missile, noting application of dither principle, simulation results and noise rejection qualities 19 p3398 A66-36691

V-gyro pair as dual-rate sensor, examining gimbal equations for gyros 21 p3736 A66-38712

ROLL FORMING

Shape rolling applicability to refractory metals, examining effects of lubrication, pass design and temperature on reductions that can be taken 19 p3366 A66-36109

Fabrication process for turning cast Cb-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111

ROLLER BEARING

Measuring microscope in roller bearing metrology, discussing dimensional optical measurement of precision parts 01 p0065 A66-10103

Materials for use as rolling-contact bearing lubricants in liquid hydrogen environment [ASLE PREPRINT 65-LC-9] 02 p0238 A66-12255

Component hardness differences of SAE 52100 steel effect on bearing fatigue, using five-ball fatigue tester and rolling element bearings 03 p0372 A66-12349

Optimizing fatigue life of flexibly mounted rolling bearings, discussing shaft and housing structure 03 p0373 A66-12929

Ausforming effect on rolling contact fatigue life of M-50 bearing steel [ASME PAPER 65-LUB-9] 04 p0536 A66-14243

Modes of contact fatigue failure classified after appearance and factors promoting initiation and propagation, noting fatigue life of roller bearings subjected to cyclic contact stress [ASME PAPER 65-WA/CF-2] 05 p0690 A66-15621

Roller-bearing design noting reliability requirements via Palmgren-Lundberg formula 06 p0886 A66-16481

Book on design and utilization of antifriction bearings 13 p2087 A66-26281

Monte Carlo simulation studies for fatigue data analysis of rolling-contact bearings, using Weibull equation [ASLE PAPER 66AM 1B2] 16 p2710 A66-30401

High-speed rotor operation in bearing clearances, discussing induction of nonlinear vibration, harmonic generation and computer simulation results [ASME PAPER 66-MD-1] 21 p3741 A66-38474

Rolling-element bearing material technology, examining fatigue effect of material properties and processing variables 21 p3750 A66-38624

Refined method of selecting roller contact bearing, considering parametrical resonance 23 p4072 A66-41058

Lubrication review, 1964 24 p4217 A66-42579

Mechanical system for monitored deposition of sequential thin films on any one of five substrates from any of five independent sources and through any of five masks 24 p4218 A66-43216

ROLLING

Relationship between friability of powders and rolling speed in powder rolling, using suspension-system hoppers and smooth rollers 08 p1231 A66-18901

Stresses and rate of movement of metal during rolling of flat products 14 p2303 A66-28199

Pressure distribution of metal on rolls during rolling process 14 p2303 A66-28200

Hot rolling behavior of ingots of titanium alloy with additions of Al, V, Mo and Zr 14 p2304 A66-28201

Static stability of rolling motion of aircraft for given aileron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493

ROLLING CONTACT

Ausforming effect on rolling contact fatigue life of M-50 bearing steel [ASME PAPER 65-LUB-9] 04 p0536 A66-14243

Lubricant effect on fatigue life of stationary ball on flat contact subjected to oscillatory normal load [ASME PAPER 65-WA/CF-3] 05 p0690 A66-15622

Microstructural alterations developing with cycling stressing in rolling contact exemplified by bearing steel parts [ASME PAPER 65-WA/CF-4] 05 p0779 A66-15623

Correlation equation estimating pitting fatigue life of bearings from minimal rolling contact rig data [ASME PAPER 65-WA/CF-5] 05 p0690 A66-15624

Lubricant film thickness in elastohydrodynamic range measured as

function of speed in rolling configuration for mineral oils and esters 07 p1040 A66-182

Rolling friction studies of intermetallic and zirconium oxide for control surface bearing for space reentry vehicle [ASLE PAPER 66AM 5D4] 16 p2712 A66-304

Jump conditions at point of contact for corresponding cases of sliding and rolling contact in plane motion 21 p3769 A66-384

Rolling motion of rigid body of revolution along fixed surface of revolution 24 p4238 A66-428

ROLLING MOMENT

Transonic wind tunnel investigation optimum roll effectiveness of large swept-wing transport aircraft with conventional and spoiler ailerons [AIAA PAPER 65-789] 03 p0352 A66-125

Vacuum phase and reentry phase dynamics of spinning reentry bodies [AIAA PAPER 64-470] 03 p0431 A66-127

Rolling moments of five symmetric, untwisted airfoils of various planform tested in high-speed wind tunnel as functions of angle of attack and angle of yaw 07 p0980 A66-1748

Approximate analytical solution for pitching and rolling motion near resonance of sounding rocket, using nonlinear differential equation [AIAA PAPER 66-463] 16 p2811 A66-3147

Dither and sinusoidal incidence variation effect on control wing hinge moments of transonic-supersonic rolling maneuvering guided missile [AIAA PAPER 66-755] 22 p3846 A66-4063

ROOM TEMPERATURE

Room temperature performance of GaAs laser diodes, using SCRs to achieve high pulse repetition rate 22 p3932 A66-4017

ROOT

Microelectronic composite lumped-distributed transmission systems, two-port networks, voltage transfer function, root locus construction, pole and zero locations, etc 12 p1856 A66-2465

Lacunary interpolatory polynomials and Mth derivatives prescribed in roots of unity, examining Dini-Lipschitz condition for convergence 18 p3127 A66-3463

Comparison of characteristic roots arising from Fluegge and Donnell theories, when certain amount of axial prestress is imposed on circular cylinder 19 p3474 A66-3634

Multiloop flight control system root sensitivity to open loop parameter variation describing method of analysis 19 p3335 A66-3669

Horowitz root-locus compensation method extended to analysis and design of high-gain linear control systems with variable coefficients 19 p3338 A66-36741

Fourth-order multipoint iterative methods for solving equations which cost one function and two derivative evaluations per iteration, for use in root finding 19 p3392 A66-36786

Multiloop flight control system root sensitivity to open-loop parameter variation describing method of analysis 22 p3884 A66-4036

ROOT-MEAN-SQUARE ERROR

Graphic-analytical method for calculating optimum adjustment of disturbance-compensating system incorporating dynamic elements 06 p0863 A66-16532

Algorithm for mathematical expectation and dispersion of two-dimensional random sequences, obtaining linear estimation of norm of meteorological elements minimizing rms error 06 p0905 A66-1655

Receiver for processing lane identification signals for Dectra navigation system and relation to tracking accuracy and probability of error 07 p1074 A66-1777

Analog message transmission by optimum angle modulation system and rate distortion function deriving mean square error 09 p1360 A66-1992

Random error of drift measurements using airborne Doppler radar from observed drift output during short flight over fixed course calculating rms values 13 p2125 A66-2644

Mean velocity, rms velocity fluctuations and Reynolds shear stress for air flow at high Reynolds number in rectangular

anel partially roughened, measuring
pulence intensity 13 p2070 A66-26703
algorithm for mathematical expectation
dispersion of two-dimensional random
quences, obtaining linear estimation of
m of meteorological elements minimizing
error 14 p2327 A66-28222
oise stability for wideband analog
ethods of information transmission based
analysis of probability distribution
sity, using normal rms error and
malous error
ability 15 p2451 A66-29119
nstruction method for rms-optimal
ital smoothing devices, noting case of
atic systems 16 p2670 A66-30768
raphic-analytical method for calculating
ilum adjustment of disturbance
mpensating system incorporating dynamic
ments 16 p2670 A66-30839
nformation content of photoelectric star
ages determined by background radiation,
tical aberrations and photon noise,
iving equations for rms
or 16 p2654 A66-31441
edundancy removal processes,
ssification and nomenclature compared by
etting compression ratio vs rms error and
essing ZVA process 18 p3070 A66-34261
linear least-squares filtering problem in
ometrical
erpretation 19 p3318 A66-35731
ean-square comparison of zero-order hold,
ponential hold and polygonal hold vs
ear nonrealizable interpolation procedure
various sampling
nemes 19 p3336 A66-36702
ptimum transformation of linear system
th minimal rms error from given point to
et delta-environment of another given
nt 20 p3537 A66-36890
oise effect on synthesis of discrete
ystems with and without feedback channel
r transmitting continuous messages, using
nary signal and criterion of minimum rms
ror 20 p3538 A66-37745
ean-square error of step-wise
nterpolation for various sampling schemes
Markov process or band-limited white
oise 22 p3941 A66-40695
eteorological measurement systems in
ation to aerospace problems, using flight
story of rocket vehicle and root mean
are accuracy 24 p4214 A66-43043
ROTARY DRIVE
Overrunning clutches in gas turbines,
esign, performance characteristics and
application to A-4D Skyhawk aircraft, UH-2
hicopter and Curtiss-Wright X-19 VTOL
ive systems
[ASME PAPER 66-GT-92] 14 p2300 A66-26996
Projected rotary-percussive drilling system
or obtaining lunar surface samples within
pecified payload and size requirements,
onsidering drive systems 18 p3094 A66-34139
Radiation pressure on vanes of rotary
uator of spacecraft radiation orientation
ystem 19 p3467 A66-35293
Fluid-damped rotary oscillators, discussing
ngular deflection effect, suspension torsion,
electric modulator, mechanical boundary
yer forces and static
characteristics 19 p3360 A66-36306
ROTARY STABILITY
Bistable vibration of rotors in bearing
earance
[ASME PAPER 65-WA/MD-1]
05 p0689 A66-15520
Component balancing alone can provide
etter balanced high-speed rotor than
mmon practice of balancing complete
sembly of balanced
omponents 06 p0886 A66-16433
Permanent rotational stability of solid body
th fixed point acted upon by potential
orce field at four points 16 p2749 A66-31522
Stability of permanent rotations of solid
body with fixed point in potential force
ield 16 p2749 A66-31523
Stability of unsymmetrical rigid rotor
upported in axially unsymmetrical bearings,
oting three methods of
lution 18 p3116 A66-33672
Intake flow maldistribution excitation of
otor blade vibration in V/STOL predicted
y blade velocity triangles
ethod 18 p3050 A66-33680
DME-A satellite attitude control, discussing

performance of spin control
system 21 p3821 A66-38879
ROTARY WING
Unsteady aerodynamic characteristics of
model helicopter rotor operating in vortex
ring state, considering thrust and torque
fluctuation 16 p2634 A66-31322
Reentry and recovery of space vehicles in
reliable shock free landings, using modified
helicopter rotor for hypersonic flow and
thermal problems 24 p4284 A66-43073
ROTARY WING AIRCRAFT
SA HELICOPTER
High performance rotary wing VTOL
aircraft, noting results from High
Performance Helicopter Program and
Exploratory Development Compound
Program
[SAE PAPER 660314] 14 p2223 A66-27293
Helicopter pilot performance evaluation
method based on ability to precisely control
rotor rotational velocity 17 p2864 A66-32163
Low-altitude control of U.S. Army rotary
wing aircraft 17 p2950 A66-32722
ROTATING BODY
Rotation of rigid body force affected, using
matrix equations, noting coordinate system
and differential equation 02 p0290 A66-11989
First integral existence for motion of solid
body about fixed point 03 p0392 A66-12530
Forced convective heat transfer from
isothermal and nonisothermal uniformly
spinning bodies of revolution obtained by
similar flow analysis
[ASME PAPER 64-WA/HT-15]
04 p0595 A66-13387
Nonlinear eigenvalue problem for
equilibrium state of rotating rod solved by
perturbation procedures and Leray-Schauder
degree theory 04 p0589 A66-13948
Shrello approximation used to derive
formulas for moment characteristics of
axisymmetric bodies rotating in hypersonic
free molecular flow 04 p0456 A66-14155
Quasi-stationary corotating structure in
interplanetary magnetic field observed with
Imp I satellite during three solar rotations,
noting data on solar wind 05 p0746 A66-14783
Equations of motion of gyrostat having
fixed point and gyrostat rotating about
fixed point in Newtonian force
field 08 p1227 A66-19761
Measurement of magnetic field produced
by rotating singly and multiply-connected
superconductors, formulating macroscopic
electrodynamics of rotating body at low
angular velocities 09 p1418 A66-20041
Book on dynamic and static balancing of
rotating machine parts and devices,
particularly gyroscopes, noting effect on
bearings, vibration causes,
etc 09 p1383 A66-20915
l g rotating linear acceleration vector
producing compensatory nystagmus, noting
effects when rotation axis was vertical and
horizontal 11 p1643 A66-22579
Numerical solution to first geodetic
problem of ellipsoid of rotation, using
iterative application of Runge-Kutta method
to differential equations of geodetic
line 11 p1698 A66-22767
Electromagnetic propagation in rotating
systems, classic analysis of mode-splitting
phenomena caused by rotation of cavity
resonator 11 p1658 A66-23266
Joint motion of two solids and motion of
rotating body relative to other due to
external forces 12 p1914 A66-24359
Rotating target experiments on nitrogen
gas molecule interaction with engineering
surfaces and velocity distribution of
scattered beam 16 p2753 A66-30394
Gravitationally induced uniform rotation of
body having stationary point and supporting
rotating masses 16 p2748 A66-31521
Permanent rotational stability of solid body
with fixed point acted upon by potential
force field at four points 16 p2749 A66-31522
Stability of permanent rotations of solid
body with fixed point in potential force
field 16 p2749 A66-31523
Dynamical attitude equations for rotational
motion of set of n rigid bodies
interconnected by dissipative elastic joints
and subjected to arbitrary forces and
torques 17 p3001 A66-32345
Longitudinal acceleration and angular
velocity of rotation effect on flexural

vibration of elongated body of revolution in
supersonic flow applied to critical flutter
calculation 17 p3027 A66-32603
Rotational motion analysis, considering two
distinct laws governing behavior of spinning
body and obtaining total motion by
superposition of vectorial movements due to
laws 18 p3134 A66-33588
Angular measuring system for radio
telescopes, noting application of Raksyn
variable capacitor block as nonwearing
rotating pinion 18 p3113 A66-34274
Rotating prism design for continuous image
compensation cameras, application to UV
and IR regions of
spectrum 19 p3354 A66-35384
Mercury rotational period as consequence
of solar torques and equatorial asymmetry,
based on radar data and model developing
superharmonic resonance 20 p3650 A66-37337
Fluid dynamic fields around slender
rotating bodies, discussing simple theories
for evaluating aerodynamic
coefficients 20 p3492 A66-37431
Figure that results from disintegration of
package of plates during fall through
atmosphere, deriving equations for
rotational motion of
plates 20 p3493 A66-38118
Friction moment of rotating ellipsoids in
infinite medium, calculating turbulent
boundary layer for rotating
sphere 21 p3731 A66-39500
Lateral vibration of rotating bar with
circular cross section under simultaneous
axial force and torque, noting eigenvalue
equations and damping
effects 21 p3833 A66-39598
Bending effect of spectral lines in plasma
created by rotating HF dipole in quasi-
steady magnetic field 22 p3953 A66-39761
Rotating masses effect on inertial frames,
analyzing stress energy tensor and
Schwarzschild geometry 22 p3979 A66-40113
Reissner-Uflyand-Mindlin PDEs for circular
ring flexural vibrations under transverse
shear and rotary inertia 22 p3992 A66-40297
Rotary plate airborne bacteria
sampler 22 p3858 A66-40505
Motion of solid body with rotating
flywheels rotating at constant velocities
relative to inertial space and
body 22 p3948 A66-40682
Analysis of perfect frictionless suspension
of rotating body with two degrees of
freedom mounted on rotating shaft of spin
axis deflection
[AIAA PAPER 65-435] 23 p4066 A66-41100
Rotation of rigid bodies in Newtonian
central gravitational field, with applications
to navigation and satellite
motion 23 p4096 A66-41941
Rotating body in vacuum, examining
motion dependency on body configuration
and kinetic energy distribution, noting
effect of change in energy on
motion 24 p4281 A66-42337
ROTATING CONE
Heat transfer data obtained in combined
convection regime for rotating isothermal
cone, noting influence of cone vertex
angle 01 p0164 A66-10902
Mass transfer by sublimation from surface
of stationary or rotating naphthalene cone
in axisymmetric
airstream 04 p0595 A66-13388
Nonsimilar boundary layer flow and heat
transfer of cone rotating in forced flow
[ASME PAPER 65-WA/HT-31]
05 p0608 A66-15674
Steady flow of incompressible viscous fluid
through space between rotating coaxial
cones with porous walls, calculating effect
of injection and suction on radial
flow 06 p0870 A66-16182
Frictional drag and convective heat
transfer of rotating cones of arbitrary
vertex angles in mixed and turbulent
flow 17 p3038 A66-33469
Frictional resistance of finite disks and
cones rotating in power law non-Newtonian
fluids 21 p3730 A66-39456
ROTATING CYLINDER
Hydromagnetic rotational instability of
electrically conducting non-Newtonian fluid
between two rotating
cylinders 01 p0114 A66-10712
Couette flow, unpressurized axial flow in

annular gap between two cylinders and flow between two rotating cylinders, taking into account energy dissipation and dependence of viscosity on temperature 04 p0512 A66-14423

Viscosity and density variations due to imposed radial temperature gradient effects on Couette flow stability between rotating cylinders 08 p1211 A66-19681

Analogy between eigenvalues for fluid convection and flow stability extended to rotating cylinders with corresponding temperature distribution for given angular velocities 08 p1212 A66-19821

Hollow-cylinder experiments with superconducting transition taking place while cylinders are 09 p1418 A66-20040

Rotating mercury cylinder, reversibly obeying London equation when cooled through superconducting transition, at given angular velocity 09 p1419 A66-20042

Angular velocity effect on radial hydromagnetic oscillations of rotating plasma cylinder 10 p1566 A66-21732

Composite motion stability for partially filled cylinder rotating at constant velocity and resting on elastic supports 11 p1779 A66-22233

Overstability in elastico-viscous flow between rotating cylinders 11 p1693 A66-23010

Ginzburg-Pitaevskii two-fluid formulation of superfluidity problem describing behavior of helium 2 in rotating annular cylinder, considering constant angular velocity and angular momentum 13 p1218 A66-26272

Cylinder rotation in boundary layer of air stream 14 p2273 A66-26785

Behavior of rotating solid and hollow cylinders of ideal elastoplastic material subjected to rotation and action of quasi-steady-state temperature field, considering adaptability when physicomachanical characteristics are constant 14 p2301 A66-27175

Temperature effect on motion stability of fluid between rotating cylinders 14 p2415 A66-28323

Boundary value problem of Stokes equations proving branching for flow between two rotating concentric cylinders and nonexistence of singular flow 18 p3101 A66-34659

Interface propagation in mixed laminar-turbulent flow between counter-rotating concentric cylinders, noting spiral turbulence as dominant feature of Couette flow transition 20 p3547 A66-37979

Gravitational stability of uniformly rotating cylindrical plasma with finite radius investigated in terms of normal modes 20 p3610 A66-38069

Bifurcation of nonlinear operator equations to determine steady state axisymmetric homogeneous fluid flows between rotating cylinders 22 p3928 A66-40689

Taylor stability of time-dependent flow between two concentric circular cylinders, noting solution of differential equations for perturbations by Galerkin method 22 p3902 A66-40706

Steady liquid flow between rotating coaxial cylinders with arbitrary dependence of viscosity on temperature 22 p3902 A66-40814

Incompressible fluid motion inside cylinder rotating at constant angular velocity with generatrix forming curve 23 p4055 A66-41560

Taylor vortices growth and instability using mathematical model 23 p4062 A66-42045

Experimental verification of stability criteria for incompressible inviscid flow with helical streamlines, using rotating cylinders 23 p4062 A66-42046

ROTATING DISK

Hydromagnetic flow against rotating disk noting magnetic field effect on torque, boundary layer thickness and velocity profile, applying motion equation 03 p0399 A66-12689

Finite elastoplastic strains in thin rotating annular disk with radially varying temperature 03 p0375 A66-13293

Heat transfer from shrouded rotating disk to single radial inflow determined, using gas turbine model test facility [ASME PAPER 64-WA/HT-49] 04 p0595 A66-13389

Peripheral friction stresses and friction resistance moments in flow around rotating disk in closed housing 04 p0508 A66-13440

Axisymmetric transverse vibrations of spinning membrane disk centrally-clamped between collars with Coulomb friction at disk-collar interface 04 p0589 A66-14028

Cooling effect of secondary fluid injection on heat transfer between shrouded rotating disk and radially inward main flow stream [ASME PAPER 65-WA/HT-20] 05 p0789 A66-15644

Numerical technique to determine vibration characteristics of disk-like structures in turbine engine [ASME PAPER 65-WA/GTP-8] 05 p0639 A66-15723

Vibration in aircraft jet engine rotating compressor disks of small and large blades [ASME PAPER 65-WA/GTP-11] 05 p0780 A66-15726

Radial pressure distribution on enclosed rotating disk with or without blades and with radial outward or inward throughflow [ASME PAPER 65-WA/FE-10] 05 p0691 A66-15729

Cooling device for reentry vehicle windows consisting of rotating disk with radial slots placed in front of window 06 p0871 A66-16222

Coupled flow problem, comparing flow induced by steady rotation of permeable and impermeable disks 06 p0871 A66-16353

Oscillating disk induced flow, discussing mathematical formulation of flow field produced by finite-amplitude rotational oscillations 06 p0872 A66-16354

Radar systems with rotating optical disks, describing optical correlation techniques 06 p0834 A66-16729

Wall jet on rotating disk totally immersed in fluid, with derivation of laminar flow velocity profiles 07 p0981 A66-18047

Pressure distribution, surface temperature and deformation profile in conjunctive region of lubricated cylindrical disks rolling or sliding on their peripheral surfaces [ASLE PREPRINT 65AM 4A3] 07 p1039 A66-18290

Euclidean nature of relativistic rotating disk in conclusions of Eddington and Lorentz 08 p1255 A66-18857

Fluid resistance of rough disk rotating in closed vessel, noting dependence on flow Reynolds number of plate moment coefficient, axial clearance, etc 08 p1210 A66-19554

Friction of rotating disk in revolving housing, noting parameters of dimensionless momentum coefficient, separation of fluid flow into core and secondary flow 09 p1384 A66-20486

Local and average heat-transfer coefficients for encased rotating disk cooled by radial flow 09 p1471 A66-20829

Boundary value solutions applied to class of rotating disk flows, including examining convergence of successive approximation scheme 10 p1525 A66-21849

Cooling effect of secondary fluid injection on heat transfer between shrouded rotating disk and radially inward main flow stream [ASME PAPER 65-WA/HT-20] 11 p1785 A66-22194

Finite deformations of rotating disk of variable thickness, consisting of elastoplastic strain-hardening material, determined from stress-strain diagram 12 p1964 A66-24051

Axisymmetric convection between two rotating disks, noting secondary flow and viscous effects of Ekman layers 12 p1980 A66-24941

Atomization of fluids by using nozzles and rotating disks, comparative analysis between these methods and applications 13 p2059 A66-25076

RKD-2 high speed raster camera with two rotating disks 14 p2295 A66-27653

Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow 14 p2375 A66-27692

Heat and mass transfer in radial flow between two fixed or co-rotating parallel disks, obtaining series expansion of Navier-Stokes equation 15 p2615 A66-28619

Flow produced by impulsively started rotating disk 15 p2480 A66-29691

Mechanical shutter with time resolution 0.1 msec designed for spectroscopic observation of decaying plasmas 16 p2701 A66-30101

Radial pressure distribution on enclosed rotating disk with or without blades and with radial outward or inward throughflow [ASME PAPER 65-WA/FE-10] 16 p2710 A66-30101

Motion of viscous incompressible fluid interspace between rotating and parallel fixed permeable plane through which supplementary fluid is injected, solved by Navier-Stokes equations 16 p2687 A66-31101

Rotating disk induced viscous conduction fluid motion in axial magnetic field 16 p2764 A66-31101

Resistance to cavitation flow erosion or cracking in metal alloys studied, using rotating disk in water [ASME PAPER 66-FE-11] 17 p2915 A66-33101

Effect on critical speed of thin rotating disk produced by rigid circular inclusion welded at center 19 p3363 A66-35101

Book on strength of turbine disks, analyzing material properties, design and operating conditions effects 21 p3743 A66-39101

Second-order fluid flow over finite rotating disk enclosed within coaxial cylindrical casing 21 p3729 A66-39101

Frictional resistance of finite disks and cones rotating in power law non-Newtonian fluids 21 p3730 A66-39101

Shear stress, velocity profiles, MHD and cross-viscous effects on forced non-Newtonian flow of Reiner-Rivlin liquid against rotating disk 21 p3795 A66-39101

Stress distribution in elastically nonhomogeneous rotating thin circular disk of varying thickness of anisotropic material 21 p3745 A66-39101

Natural frequency variations caused by thermal membrane stresses applied to circular disks for fundamental frequency increases, noting temperature distribution 22 p3989 A66-39101

Flexible uniform-stress truncated disk spinning about central hub for aerodynamic braking useful as reentry decelerator, noting low decelerator weight fractions for wide range of mission parameters 22 p3845 A66-40501

Motorized vertical rotating table used in inspection of small numbers of large turbine engine casings for avoidance of expensive receiver gauges 23 p4072 A66-41201

Heat transfer from enclosed rotating disk, analyzing effects of radial outflow and inflow on temperature profile and Nusselt numbers on rotor and stator 24 p4294 A66-42701

ROTATING ENVIRONMENT

Artificial gravity through slow rotation solve weightlessness problem in long manned space flights, considering cardiovascular deconditioning and biological problems of rotating environments 06 p0817 A66-16201

Comparative effects of prolonged rotation at 10 rpm on postural equilibrium, vestibular normal and vestibular defects in human subjects 06 p0813 A66-16801

Solar system origins and planet evolution as subcondensations in differentially rotating medium, discussing orbit and spin angular momentum 12 p1946 A66-23601

Effectiveness of antimotion sickness drug compared by using recommended and larger than recommended doses as tested in slow rotation room 12 p1807 A66-25001

Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planetary rotational speed 14 p2381 A66-27501

Fast rise programmed centrifuge, noting acceleration testing capabilities, power speed control, etc 16 p2679 A66-30401

Wave propagation in rarified plasma under action of Coriolis force, Hall current and self-gravitation, noting LF coupling rotational effects, etc 17 p2973 A66-33001

Adaptation to prolonged exposures revolving space station simulator 22 p3853 A66-39701

Retrograde rotation of cloud formations Venus with angular velocity corresponding to one rotation in four days analyzed

- high resolution
photography 23 p4128 A66-41181
- Spin-orbit coupling in solar system,
examining resonant spin rates for one-and
two-body planet/ satellite systems with
eccentric orbits 24 p4272 A66-42203
- Numerical calculation of periods of natural
oscillations and corresponding eigenfunctions
planetary atmospheres as function of
planets rotational speed 24 p4273 A66-42320
- Stability of two-dimensional boundary layer
flow in rotating tank with small inflow
analyzed, using perturbation
theory 24 p4197 A66-42981
- ## ROTATING FLUID
- Liapunov work on equilibrium
configuration of inhomogeneous rotating
fluid 01 p0056 A66-10305
- Series of equilibrium configurations for
homogeneous rotating fluid in monograph of
Liapunov 01 p0056 A66-10306
- Liapunov monograph on equations for
surfaces of equilibrium configurations of
rotating fluid deriving from
ellipsoids 01 p0056 A66-10307
- Equilibrium configurations theory that
rotating homogeneous fluid containing
particles attracted to each other according
to Newton laws and under constant pressure
will form ellipsoid 01 p0056 A66-10308
- Unsteady motion of rotating fluid in cavity
neglecting viscous 01 p0058 A66-10485
- Viscosity effect on transition between
axisymmetric and nonaxisymmetric flow
regimes of vertical rotating annulus of
liquid 02 p0223 A66-11826
- Drag of sphere moving along axis of
rotating viscous fluid 02 p0219 A66-11957
- Vortex effect in rotating flow of
compressed gas injected into vortex tube,
noting role of turbulent heat
transfer 03 p0354 A66-12390
- Rotating polytrope structure analyzed,
using approximation technique of integrating
outwards from center and inward from
surface 04 p0578 A66-14018
- Rotating fluid sphere, discussing power law
for dependence of Rayleigh number on
Taylor number 04 p0599 A66-14471
- Steady secondary flow in stratified fluid in
rotating frame, noting secondary vorticity
[ASME PAPER 65-WA/FE-14] 05 p0664 A66-15613
- Shape and gravitational field of Earth
calculated by using N homogeneous
incompressible fluid shells to represent
distribution of terrestrial
mass 07 p1028 A66-17422
- MHD model of cyclone, considering motion
of type of rotating ideal compressible
conducting fluid 08 p1213 A66-19023
- Interaction between vortices and solid
surface manifested as pulling away of freely
suspended disk in rotating liquid helium 2
from suspension head, performing additional
rotational motion, determining vortex slip
coefficient 12 p1865 A66-24879
- Steady finite-amplitude motions existing
for range of Taylor number, with values of
Rayleigh number smaller than critical value
required for overstability 12 p1866 A66-24948
- Vortex effect in rotating flow of
compressed gas injected into vortex tube,
noting role of turbulent heat
transfer 13 p2062 A66-25396
- Rotational excitation of oxygen by slow
electrons, calculating electron energies,
quadrupole moments and energy loss
rates 13 p2135 A66-26270
- Secondary motion generation in vortex
field, noting vortex core deformation by
oscillation, radial perturbation effect on
vorticity distribution, etc 13 p2070 A66-26715
- Diffusion of viscous vortex ring in rotating
fluid, noting effect of inertial
waves 15 p2480 A66-29690
- Navier-Stokes equations for rotational
motion of incompressible viscous fluid at
small Reynolds numbers between rotational
surfaces 16 p2688 A66-31298
- Turbulent swirling jets issuing from round
orifice studied experimentally and
theoretically, based on continuity equations
and Reynolds equations of
motion 17 p2913 A66-33067
- Stable equilibrium position of axis of
rotation of cylinder in rotating chamber
filled with one or two
liquids 17 p2928 A66-33498
- Rotating Couette flow of miscible binary
liquid mixture between two coaxial
cylinders 18 p3102 A66-34924
- Viscosity effect on small periodic
oscillatory disturbance of rigidly rotating
incompressible fluid 20 p3545 A66-37474
- Hydrodynamic equations for liquid with
intrinsic rotation applicable to suspensions
and liquid/ vapor systems 21 p3728 A66-39312
- Coupling between spin-stabilized rocket
motion and propellant sloshing tested in
zero gravity environment
[AICE PREPRINT 17C] 22 p3897 A66-39887
- Interaction between vortices and solid
surface manifested as pulling away of freely
suspended disk in rotating liquid helium 2
from suspension head, performing additional
rotational motion, determining vortex slip
coefficient 23 p4053 A66-41086
- Hydrodynamic phenomena in rotating fluid
systems, characterizing flow of fluid whose
viscosities, thermal conductivity and specific
heats are constant 23 p4058 A66-41940
- Nonlinear methods to describe stability
motion of solids with liquid-filled
cavities 23 p4059 A66-41982
- Three-dimensional oscillatory vortex
instability in uniform inviscid rotating
fluid 23 p4061 A66-42043
- Boundary layer problems in rotating flows,
noting similarity solutions and including
general momentum-integral
solution 23 p4061 A66-42044
- ## ROTATING MACHINE
- Effect of engagement angle and tooth
distribution on spur gear alignment,
establishing relation between rotation
diagrams and engagement angle
error 01 p0077 A66-10284
- Rotating arm apparatus at National
Aerospace Laboratory in Japan for pressure-
distribution and heat-transfer flow
measurement 01 p0053 A66-10636
- Fatigue testing machine for loads in
rotating beam 03 p0440 A66-13167
- Gas bearing analysis and design, presenting
specifications of European and American
turbomachinery 10 p1539 A66-21170
- Contactless machine with variable current
and dual power supply operating with
variable rotation rate, determining optimum
limits of rotation speed
variation 16 p2636 A66-30780
- Rotating speed effect on design of dynamic
seals for rocket engine turbopumps,
presenting aspects of design of hydrostatic
seal [ASME PAPER 66-FE-18] 17 p2932 A66-33271
- Stress measurements on high-speed
rotating machine, using strain gauge
bridge 20 p3668 A66-37503
- Velocity and angle dependence of rain
erosion for various materials, using rotating
arm apparatus with high circumferential
speeds 20 p3588 A66-37810
- ## ROTATING MATTER
- MHD equations for inhomogeneous rotation
of medium about Z-axis in presence of
gravitational force 04 p0516 A66-13857
- ## ROTATING MIRROR
- Rotating mirror arrangement with tungsten
light source for minority carrier lifetime
measurements on
semiconductors 03 p0369 A66-12611
- Light output from helium-neon gas maser
photographed with and without intracavity
modulation at locking frequency, using high
speed rotating mirror 07 p1040 A66-17205
- Fabry-Perot interferometer with mirrors in
form of backed metal grid, noting changes
in diffraction, reflection and
transmission 11 p1704 A66-22348
- Traveling wave beats created by ring laser
on rotating platform, noting frequency
division rotating rate and capture band
parameters 13 p2089 A66-25102
- Specular reflection theory and scanning
using thin mirror with oblique
rays 14 p2295 A66-27656
- Laser oscillation with totally reflecting
roof prism as cavity, noting output vs
mirror alignment for two rotation
axes 15 p2517 A66-29414
- Traveling wave beats created by ring laser
on rotating platform, noting frequency
division rotating rate and capture band
parameters 16 p2717 A66-30281
- ## ROTATING PLASMA
- ### SA THETA PINCH
- Cylindrical plasma rotational velocity
formulas derived by calculating Boltzmann
collision integral in stationary momentum
equation 04 p0556 A66-14339
- Image plane structure of inner and outer
separatrix of asymmetric magnetic toroidal
field 06 p0918 A66-16871
- Stability of rotating plasma pinch with HF
radial oscillations and situated in
longitudinal magnetic
field 08 p1263 A66-19175
- Motion of charged particles in rotating and
fixed magnetic fields, using drift
approximation equations to determine field
parameters 12 p1921 A66-24209
- Gravitational instability of magnetoplasma
in radial electric field, noting resistive drift
modes, stabilization criterion effect of
Coriolis force, Landau damping,
etc 17 p2966 A66-32425
- Puffatron-type rotating plasma as source
for two-stage magnetic mirror compression
experiment, finding that purity of plasma is
limited by electrode
effects 17 p2967 A66-32430
- Formation process of rotating plasma in
homopolar-type short coaxial-electrode
system in hydrogen, nitrogen or argon
discharge 17 p2972 A66-32973
- Stabilization of hydrodynamic drift
oscillations in rotating nonuniform
cylindrical plasma 18 p3152 A66-35078
- Doppler shift measurements to investigate
plasma rotation in theta
pinch 19 p3414 A66-36512
- Rotating plasma experiments, discussing
creation by discharge, boundary momentum
balance and voltage 19 p3415 A66-36514
- Rotation and subsequent instability of
plasma based on two-fluid equations,
including finite radius of gyration effects
for ions in pressure
tensor 19 p3419 A66-36538
- Motion of charged particles in rotating and
fixed magnetic fields, using drift
approximation equations to determine field
parameters 22 p3956 A66-40573
- ## ROTATING SHAFT
- Vibrational and stability behavior of
unbalanced shaft running in cylindrical
journal bearing, noting oil film elastic
effects 01 p0151 A66-10285
- Three-dimensional laminar boundary layer
flow on rotating helical
blade 02 p0176 A66-11952
- Approximation method for momentary
peak shaft loads, computing starting and
stalling torques of power transmission
system 02 p0238 A66-12266
- Oil seals such as lip seal discussing
structure, performance factors and materials
used 04 p0525 A66-13781
- Microirregularity lubrication to improve
reliability of liquid lubricated rotary shaft
face seal [ASME PAPER 65-LUB-11] 04 p0527 A66-14244
- Self-excited torsional vibrations of power
transmission drives under boundary
lubrication, developing rotating
shaft/bearing relations 05 p0772 A66-14643
- Shaft deflection at any point determined
by geometric method for shaft diameter
selection 05 p0887 A66-14994
- Component balancing alone can provide
better balanced high-speed rotor than
common practice of balancing complete
assembly of balanced
components 06 p0886 A66-16433
- Beam on elastic supports, determining
fundamental frequency of free oscillation
for one weak nonlinear boundary
condition 07 p1142 A66-17260
- Flexible unbalanced rotating shaft,
discussing vibration of system with axial
symmetry in asymmetric
bearings 07 p1037 A66-17733
- Transient motion of rotary shaft with
flexural deformability varying with
infection plane 08 p1231 A66-19235
- Adiabatic laminar flow in concentric sleeve
seal where rotating shaft changes fluid
temperature and viscosity
[ASLE PREPRINT 65AM 4C3] 08 p1232 A66-19382

Aircraft engine rotating shaft coupling design, noting splined shafts, correct lubrication, flexible members and test results 09 p1383 A66-19863

Rotation effect on statically rotating string-mass system determined by Eulerian formulation and prediction of critical speeds 10 p1556 A66-21495

Microirregularity lubrication to improve reliability of liquid lubricated rotary shaft face seal [ASME PAPER 65-LUB-11] 12 p1888 A66-24550

Oil cushion resilience in hydrodynamic bearings, examining effect on dynamic behavior of unsymmetrical shaft with one disk 12 p1889 A66-24999

Shaft-power turbine design, including rotor vibration problems, computer high speed testing, application as auxiliary power supply in turbojets, etc [ASME PAPER 66-GT-87] 14 p2225 A66-26992

Deformation and state of stress of contiguous cylindrical rotationally symmetrical hubs and shafts of various lengths 14 p2409 A66-28459

Motion equations for radial oscillation of shaft with ball bearing chatter 14 p2305 A66-28478

Wear and grease lubrication effects in matched aircraft spline specimens subjected to oscillatory motion 16 p2713 A66-30572

Transverse cut-out effect on fatigue strength of rotating shaft under constant bending load, noting fatigue stress concentration factor 16 p2815 A66-30679

Shaft-rotor system with bearing configuration such that load-deflection relation at rotor is nonlinear and radially symmetric, noting harmonic whirl and free undamped vibrations 17 p2930 A66-32892

Sag and vibration of flexible rotating shaft with axial asymmetry 18 p3116 A66-33968

Bearing flexibility effect on vibration frequency of rotating assembly resting on two bearings and assembly with overhanging mass 18 p3116 A66-34006

Approximate method for solution of dynamic stability problem of shafts subjected to pulsating moment and constant axial force 21 p3743 A66-38621

Gas turbine compressor rotor and power shaft fabrication using electron beam welding 22 p3924 A66-40258

Analysis of perfect frictionless suspension of rotating body with two degrees of freedom mounted on rotating shaft of spin axis deflection [AIAA PAPER 65-435] 23 p4066 A66-41100

Turbine rotor subject to thermal stresses due to friction of accidental contact with stator 23 p4075 A66-41995

ROTATING SPHERE

Velocity and pressure fields caused by slow rotation of sphere in slightly viscoelastic fluid contained in infinite cylinder 01 p0057 A66-10428

Laminar boundary layer on impulsively started rotating sphere, discussing viscous incompressible axially symmetric flow in terms of nonsteady partially linearized Navier-Stokes equations 04 p0513 A66-14477

Post-Newtonian hydrodynamics and stability of gaseous masses for radial and nonradial oscillations 05 p0715 A66-14523

Boundary layer flow of rotating sphere by series expansion from pole, discussing eruption at equator 07 p1021 A66-18046

Aerodynamic drag torque on rotating sphere in transition regime, noting dependence of gas inertia on Reynolds number 11 p1635 A66-22935

Reconnection of magnetic lines of force to form closed loops during transient phase of rotation of spheres and cylinders from rest 12 p1868 A66-23857

Electromagnetic induction in conducting sphere rotating in transverse field, extending results for steady state to unsteady rotation, determining magnetic moment 12 p1871 A66-24298

Gravitational field effect on electromagnetic field, using rotating hollow sphere in electric and magnetic field with electric charge at center 12 p1916 A66-24995

Dynamic influence of orography on atmospheric motion examined, using fluid mechanics analogy with periodicity as

boundary condition 16 p2699 A66-31637

Stress distribution in rotating composite sphere 18 p3249 A66-33598

Steady isothermal motion of viscous gas between outer fixed sphere and eccentrically located rotating inner sphere 19 p3371 A66-36481

Aerodynamic gaseous drag torque on electromagnetically suspended isolated sphere rotating at high Mach numbers in rarefied transition regime from continuum to free molecule flow 20 p3492 A66-37473

ROTATING STALL

Rotating stall and blade row interference in axial compressor 03 p0313 A66-12395

Visualizing rotating stall in axial compressor simulated by rotary-cascade machine using water 03 p0313 A66-12396

Static thrust experiments on single degree-of-freedom torsional vibration of helicopter rotor blades due to stall, and amplitude dependence on blade mean pitch angle and reduced vibrational frequency 16 p2634 A66-31321

ROTATING VEHICLE

Rotating artificial gravity system for manned orbital vehicles and stations requiring no expenditure of propulsive mass to attain full vehicle rotation 02 p0294 A66-11632

Vacuum phase and reentry phase dynamics of spinning reentry bodies [AIAA PAPER 64-470] 03 p0431 A66-12743

Nonlinear dynamics of free rotating flexibly connected double-mass space station 03 p0431 A66-12744

Controlled direct current applied to flux valve to stimulate rotation of aircraft in compass swing 07 p1033 A66-17723

Fluid-sphere nutation sensor for determining stability of rotating satellite 08 p1224 A66-19490

Rotating satellite stability assuming inertia axis is oriented toward Sun, noting dependency on jets of cold gas and nozzle calibration 09 p1401 A66-20659

Controlled direct current applied to flux valve to stimulate rotation of aircraft in compass swing 13 p2079 A66-25866

Psychological and physiological reaction to Coriolis effect under artificial gravitational field simulated in rotating space station 15 p2443 A66-28682

ROTATION

SA EARTH ROTATION

SA MOLECULAR ROTATION

SA SATELLITE ROTATION

SA SOLAR ROTATION

SA SOLID ROTATION

SA STELLAR ROTATION

SA TORQUE

Error analysis in dynamic measurement rotation rate when converting mechanical to electrical quantities 11 p1708 A66-23236

Nonuniform rotation of local magnetization vectors in thin nickel-iron films, measuring contribution of time-dependent variations in torque during magnetic field reversal 12 p1934 A66-25031

ROTATIONAL FLOW

Law of plane cross section applicability to hypersonic motion of deformable bodies in inhomogeneous nonstationary media with time dependent parameters 01 p0006 A66-10460

Asymmetric hypersonic blunt body problem of determining two-dimensional steady rotational flow field between profile and detached shock 07 p0982 A66-18132

Rotation vector increase derived for secondary incompressible fluid flow in curved channels 07 p1023 A66-18134

Variational problems in gas dynamics, examining vortex and vortex free motion, minimum drag conditions, etc 07 p0983 A66-18144

Plane rotational motions of perfect fluid in presence of elliptical and circular cylinders and flat plates 07 p1026 A66-18340

Rotational derivative coefficients of angular wing of arbitrary aspect ratio situated in ideal incompressible media 08 p1162 A66-18875

Nonisentropic simple waves in two-dimensional steady flow of ideal gas 08 p1210 A66-19585

Thermal transpiration analysis with various gases, testing relation between translation

component of thermoconductivity coefficient and maximum transpiration effect for particular gas, obtaining rotational collision numbers 11 p1787 A66-23214

Rotational flow properties in ideal inviscid shear layer about arbitrarily shaped blunt-nosed body in hypersonic flow 13 p1993 A66-26721

Stream function coordinates for flow in shock layer around axisymmetric blunt-nosed body in hypersonic stream 14 p2221 A66-28145

Momentum-integration method for laminar boundary layer interactions in rotating flow 17 p2907 A66-32271

Iteration scheme based on Newton approximation method applied to two-dimensional and rotationally symmetric flows past obstacles 17 p2913 A66-33066

Vibrational and rotational nonequilibrium flow effects in hypersonic conical nozzle expansion of nitrogen flows and airflows 17 p2842 A66-33478

Rotating vortex flow and transition phenomena in conical diffuser [AIAA PAPER 66-426] 18 p3046 A66-33643

Rotational axisymmetric mean flow and damping of acoustic waves in solid propellant rocket 21 p3807 A66-38720

Shear flow generated in rotational flow, noting honeycomb structure satisfactory in rotational flow about thin airfoils 21 p3724 A66-38735

Bell-shape diffuser for rotationally symmetrical flow 21 p3694 A66-38815

Steady three-dimensional rotational vortex flow of incompressible fluid, considering viscosity effects 23 p4058 A66-41929

ROTOR

SA COMPRESSOR ROTOR

SA HELICOPTER ROTOR

SA LIFTING ROTOR

SA RIGID ROTOR

SA WING

Stability of symmetrical elastic rotor in journal bearings with flexible damped supports [ASME PAPER 65-APMW-8] 04 p0526 A66-14214

Measurements of dynamic behavior of rotors supported by externally pressurized gas bearings subjected to impact [ASLE PREPRINT 65AM 3A4] 07 p1039 A66-18287

Stability of symmetrical elastic rotor in journal bearings with flexible damped supports [ASME PAPER 65-APMW-8] 10 p1539 A66-21488

Oscillation amplitude of rotor with hydraulic dampers on elastic supports 14 p2374 A66-27689

Amplitude ratio of two forced vibrations for asymmetric shaft rotor excited by periodic external force 16 p2714 A66-30811

Balancing of flexible rotors having arbitrary mass and stiffness distribution 16 p2714 A66-30858

Miele solidification principle for uniformly spinning rotor mounted on rigid body applied to case where modulus of angular velocity of rotor is allowed to vary 17 p2909 A66-32478

ROTOR AERODYNAMICS

Self-excited rotor whirl resulting from static pressure and rotor eccentricity, noting remedies [ASME PAPER 64-WA/GTP-4] 02 p0279 A66-11762

Tests of obstacle-induced flow recirculation using flow visualization technique and making power measurements 04 p0455 A66-14135

Disturbed helicopter motions and family of stability derivatives in longitudinal and lateral modes 05 p0609 A66-14998

Predicting wake-induced nonuniform flow field in plane of rotor disk [AIAA PAPER 66-17] 08 p1162 A66-18951

Design recommendations to offset greater momenta and sensitivity to gust winds of jointless helicopter rotor 10 p1483 A66-21388

Helicopter airfoils, discussing design improvement by proper choice of camber and leading edge 17 p2840 A66-32725

Loss of power effects on helicopter at high speeds, noting combination of blade analysis with motion equations, application of

- computer simulation, etc 17 p2845 A66-32735
- Gyro drifts in Cardan suspension with mobile base, determining angle of rotation 17 p2926 A66-32798
- Dynamics of noise and loading actions on helicopters, V/STOL aircraft and ground effect machines 18 p3050 A66-33679
- Measurement method for aerodynamic damping of helicopter rotors in forward flight 18 p3047 A66-33684
- Helicopter rotor performance limitations theoretically analyzed 18 p3051 A66-33685
- Experimental boundary layer study on hovering rotors using evaporative chemical films, pressure probes and hot wire anemometers 22 p3843 A66-40249
- Steady and dynamic loads on tandem rotor, controls and airframe flight tested with Army helicopter, using automatic data processing [AIAA PAPER 66-735] 23 p4008 A66-41324
- Wake motion through moving blade row, demonstrating chopping phenomenon via hot-wire anemometer traces taken downstream of rotor 24 p4157 A66-42583
- ROTOR AXIS**
- Spin axis orientation of spherical free gyroscope determined by using phosphorescent coating on rotor 10 p1536 A66-21861
- ROTOR BLADE**
- Velocity changes and concomitant losses in rotating transonic blade cascade 01 p0005 A66-10213
- Tip turbine lift-fan system with single rotor for thrust augmentation of gas generator for advanced V/STOL aircraft [AIAA PAPER 65-708] 05 p0611 A66-15163
- Pseudoshocks in pipe flow in supersonic compressors represented as diffusion process, noting application in cascade and rotor configuration 10 p1479 A66-21363
- Young theory of rotor blade motion stability in powered light 11 p1638 A66-23261
- Young theory for rotor blade dynamic stability 11 p1638 A66-23262
- Stability of wing mounted pro-rotor pylon systems in fully converted aircraft configuration, showing in-plane force generated by blade flapping as destabilizing factor 16 p2633 A66-30599

- Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 17 p2938 A66-33516
- Dynamic photoelasticity measurements of stress concentration, using ruby laser monochromatic light 18 p3256 A66-34557
- Lunar figure and orbit parameters measured by optical location method 19 p3455 A66-35285
- Pumping energy distribution of ruby laser, discussing existence of trapped modes and effect of partially filled water jacket surrounding ruby rods 19 p3373 A66-35389
- Laser illuminated electro-optical imaging noting energy variation parameters, equipment used and results obtained in TV reception 19 p3355 A66-35531
- Laser application survey 19 p3374 A66-35798
- Resonant birefringence in potassium vapor under influence of electric field of ruby laser emission 19 p3375 A66-36066
- Operation of Q-switching device based on Faraday effect and used with ruby laser for application to plasma diagnostics 19 p3375 A66-36079
- Measurements on physical and laser properties of vapor-grown ruby single crystals prepared by epitaxial growth 19 p3375 A66-36081
- High temperature high-density plasma from single solid particle of lithium hydride suspended in vacuum, using ruby laser irradiation 19 p3432 A66-36596
- Multiphoton ionization of krypton and argon by ruby laser radiation may occur by absorption 19 p3403 A66-36721
- Pulsed ruby lasers, considering pumping and threshold, output, quantum mechanics and variation on basic device 20 p3575 A66-36968
- Q-switched ruby laser output increased by use of saturable dye solution in laser cavity 20 p3576 A66-37290
- Q-factor modulation of ruby-laser resonator by phthalocyanine series 20 p3576 A66-37358
- Stimulated emission from samarium-doped calcium fluoride crystal excited by ruby laser 20 p3577 A66-37362
- Threshold determination of pulsed ruby laser by single pulse technique 20 p3578 A66-37548
- Eigenvalues and eigenfunctions of spin Hamiltonian and matrix elements of spin operator of ruby 20 p3578 A66-37584
- Implosion of fast nonpreionized theta pinch studied, using first and second harmonic of ruby laser light 20 p3609 A66-37638
- Ruby laser radiation effect on fluorescence and laser action in dysprosium doped calcium fluoride crystals 20 p3579 A66-37656
- High power nonspiking operation of ruby laser for continuous output on microscopic and macroscopic scale 20 p3581 A66-38242
- Confocal resonator theory instead of diffraction as explanation of 90 degree rotation between near and far fields of ruby lasers 20 p3581 A66-38243
- One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-38386
- Unfocused ruby laser radiation field-biphenyl compound interaction, resulting luminescence and apparent multiphoton absorption 21 p3745 A66-38528
- Photographic radar system employing Q-switched ruby laser, Mullard type 6929 image tube and conventional camera 21 p3736 A66-38796
- Coupling of adjacent axial modes in external Raman resonator observed as first Stokes frequency with benzene as Raman medium and Q-switched ruby laser as pump source 21 p3747 A66-39109
- Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 21 p3749 A66-39545

Experimental excited state band locations and intensities in absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39569

Theoretical excited state absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39570

Ruby laser pumping threshold energy, divergence angle and output power as affected by resonator length 22 p3930 A66-39769

XUV C, Ti, Mn, Fe, Ni, Cu, Zn and Ar line spectra and continuum radiation spectra in plasmas produced by focused ruby laser beam 22 p3954 A66-39812

Spectral and time-dependent characteristics of stimulated radiation from ruby pulse laser, using Fabry-Perot etalon in fine-structure observation 22 p3931 A66-39823

CW ruby laser of 10-mm length in ellipsoidal pumping system under water cooling, noting various modes 22 p3931 A66-40100

Optical properties of cryptocyanine noting transient decay of fluorescence, using ruby laser and transmission of methanol solution 22 p3932 A66-40103

Ruby laser-induced effect of pulsed pressure on KDP crystal surface and thermal bulk effect on excitation of ultrasonic oscillation in crystal 22 p3932 A66-40318

Ruby laser pumping system and low cost mercury flash tube with high repetition rates used for micromachining process 22 p3933 A66-40336

Quantitative photographic determinations of laser beam power density distributions and Q-switched ruby oscillator-amplifier system divergence characteristics 23 p4075 A66-41032

Internal self-damage in 25 mw ruby laser oscillator rod 23 p4076 A66-41160

Crystal defects and performance in ruby laser, measuring coherence function of light and output energy and crystal homogeneity 23 p4077 A66-41291

Spontaneous emission in inversely populated medium examined for uniform ruby rod laser with uniform pumping distribution 23 p4078 A66-41450

Ruby laser giant pulse off-axial modes detected with high resolution spherical Fabry-Perot interferometer 23 p4079 A66-41627

Bipolar Ni-Cd cells for ruby lasers and power sources to yield high energy pulses for firing pyrotechnic devices 23 p4022 A66-41760

Q-switch pulsed ruby laser irradiation-induced chemical dissociation and ionization in residual gases 23 p4079 A66-42076

Spectral distribution of ruby luminescence yield, noting absorption coefficient and excitation band 24 p4249 A66-42123

Coherence in radiation peaks of ruby laser studied through interference field 24 p4218 A66-42124

Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 24 p4219 A66-42128

Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 24 p4219 A66-42129

Stimulated emission of polymethine dyes upon pumping with Q-switched laser, noting wavelength parameters and oscillation 24 p4219 A66-42247

Saturable dyes noting mode selection properties and absorption spectra in bleached state 24 p4220 A66-42253

Q-switching laser system to obtain simultaneous giant pulses from five ruby laser oscillators 24 p4220 A66-42302

Frequency temperature dependence of longitudinal and transverse hypersonic wave absorption coefficients in quartz and artificial ruby crystal 24 p4255 A66-42514

Giant pulse generation range in transverse direction after Q-switching in ruby laser, examining resonator properties 24 p4220 A66-42516

Mode selection, relaxation oscillations, mode interaction and thermal effects in

room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546

Pulsed ruby laser photoelectric receiver experiments determining satellite orbits, supplementing Baker-Nunn camera network 24 p4172 A66-42547

Single transverse and longitudinal modes observed in output of passive Q-switched ruby laser when two spherical mirrors are used for resonator 24 p4223 A66-42563

Mode coupling in ruby laser with reactance placed within cavity resonator with modulation frequency close to separation of axial modes, examining electric field envelope 24 p4223 A66-42565

Perturbation of ruby laser by vibrating one of mirrors constituting resonant cavity 24 p4225 A66-42999

RULE

S INSTRUMENT FLIGHT RULE /IFR/ S REGULATION

RUNGE-KUTTA INTEGRATION

SA MILNE-THOMSON METHOD

Absorption coefficient for lines with combined Doppler and Lorentz broadening calculated, using Runge-Kutta method, continued fraction expansion and Hermite-Gauss quadrature 03 p0393 A66-13267

Fifth-order Runge-Kutta formulas including extensions of Radau, Lobatto, Newton-Cotes and Legendre-Gauss quadratures 05 p0707 A66-14892

Runge-Kutta fourth order formula used to obtain approximate solution to differential equations 09 p1395 A66-20618

Runge-Kutta type process of fourth, fifth and sixth orders of accuracy for numerical integration of transformed differential equations 12 p1904 A66-24188

High order Runge-Kutta formulas for systems of first and second order differential equations with small truncation error 17 p2945 A66-31877

Optimum Runge-Kutta methods of orders 2, 3 and 4 for first-order differential equation with constrained minimum truncation error bounds 19 p3392 A66-36781

Runge-Kutta fourth-order method for solution of N simultaneous first-order differential equations economically evaluated 19 p3392 A66-36782

Pressure, temperature, gas velocity, thrust and specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method 24 p4261 A66-42743

Three families of classical fifth-order Runge-Kutta formulas including Newton-Cotes, Legendre-Gauss and Lobatto and Radau types 24 p4233 A66-43206

RUNWAY

SA LANDING AID

Landing gear with one to eight wheels, weight, wheel well volume and allowable traffic on heavy airplanes, noting flexible pavement design and tire pressure [SAE PAPER 650799] 01 p0053 A66-10815

Arresting transport type aircraft, preventing overshooting runways, noting field tests 02 p0179 A66-12222

Runway design by assessing capacity, delay of operations, costs, etc, using mathematical models 03 p0352 A66-12706

Combination kneading-compaction, dynamic consolidation and shear testing machine, which is also simulator of abrasion effects for evaluation of airfield pavement 09 p1382 A66-20700

Airport lighting equipment required to reduce prescribed weather minima, including light for approach, high intensity, runway, flashing, etc 11 p1683 A66-22683

Assisted takeoff and landing for commercial aircraft using short runways [SAE PAPER 660337] 14 p2269 A66-27296

Douglas DC-8 super sixty series effect on airport requirements including noise level, runway problems and traffic [SAE PAPER 660281] 15 p2427 A66-29825

Circular runway flight operations and increased directional stability [SAE PAPER 660283] 15 p2476 A66-29827

Aircraft taxi loads, discussing runway transfer function, random profiles, analog mathematical model, analog taxi simulation program and peak count [AIAA PAPER 66-469] 18 p3050 A66-33652

RUNWAY ALIGNMENT

Method for initial azimuth alignment inertial heading reference proven accuracy of 0.1 percent 07 p1078 A66-170

RUNWAY CONDITION

Water, ice and slush effects on track characteristics of runway pavement, noting aquaplaning and aircraft braking criteria 02 p0216 A66-1250

Tire traction on wet runways, possible improvement via jets mounted ahead of tires and pavement grooving [AIAA PAPER 65-749] 03 p0319 A66-1250

Dynamic response of supersonic transport to runway unevenness during takeoff landing 09 p1330 A66-2040

Snow runway construction, discussing physical characteristics of snow, mechanical properties related to supporting capacity, temperature effect, etc 17 p2904 A66-3200

Military STOL and conventional aircraft behavior on rudimentary airstrips 18 p3051 A66-3360

RUNWAY LIGHT

High altitude visual flight environment, discussing sky brightness, instrument runway lighting, visual fields, eye protection, etc 10 p1494 A66-2210

Fog chamber tests and runway lighting requirements, considering landing, cockpit vision and photometry [AIAA PAPER 65-333] 12 p1857 A66-2380

Illumination systems used as visual aids to pilots when approaching airport 12 p1857 A66-2400

Airport lighting facilities for aiding aircraft takeoffs and landings in conditions of poor visibility 12 p1859 A66-2440

Landing run and taxiing problems in very low visibility 17 p2952 A66-3320

RUPTURE

S BURST

S FAILURE

S FATIGUE

S STRESS RUPTURE

RUTHENIUM

Critical magnetic field curves of superconducting Ru isotopes and dependence of superconducting transition temperature on isotopic mass 07 p1109 A66-1840

RUTILE

L-band traveling-wave maser for radio astronomy research at 21 cm using chromium-doped rutile 06 p0891 A66-1660

Zero magnetic field millimeter maser using trivalent iron ion in host crystalline structure of rutile /titanium dioxide/ active material 15 p2514 A66-2900

Maser material iron doped rutile examining theoretical and experimental disagreement in spin Hamiltonian description of paramagnetic behavior 15 p2514 A66-2900

Electron spin resonance saturation causing sharp decrease of DC resistance for reduced rutile crystals 15 p2567 A66-2940

High temperature oxidation of two ductile Cr-Ru alloys with composition near body-centered cubic solubility limit analyzed by four different techniques 16 p2721 A66-3020

Paramagnetic resonance spectra shift due to temperature change in cross-relaxation of rutile maser 16 p2718 A66-3080

Paramagnetic iron and chromium impurities effect on absorption spectrum and microhardness of rutile single crystals 16 p2786 A66-3170

Phase relations in cobalt niobate-cobalt tantalate system noting structural characteristics, solubility, phase transition, etc 17 p2940 A66-3300

Longitudinal acoustic wave generation by electrostrictive mixing of two light beams single crystals of strontium titanate, rutile and z-cut quartz 19 p3400 A66-3600

Quantum paramagnetic traveling wave amplifier using rutile with admixture of chromium and combined with magnetron superconducting coil 20 p3580 A66-3790

L-band traveling wave maser using chromium doped rutile, discussing inverse susceptibility as figure of merit 20 p3580 A66-3820

Displacement vector at antiphase boundaries in rutile determined by contrast experiments in electron microscope 24 p4252 A66-4230

SAFETY FACTOR
System safety engineering plan /SSEP/ for
achieving total safety
program 01 p0076 A66-10068
Weapon subsystem safety estimation by

fault-tree method alone or in combination
with Karnaugh maps 01 p0168 A66-10069
Design for structural reliability discussing
safety factors, probable variations in applied
loads, temperatures, materials, geometry and
strength 05 p0775 A66-15074
Launch operations and safety analysis of
first test flight of SNAP-10A in SNAPSHOT
satellite 12 p1953 A66-23678
Safety requirements for handling and
testing unstable materials, particularly
hydrazinium diperchlorate /HP sub 2/ solid
propellant oxidizer 12 p1812 A66-24469
Laser safety standards, discussing nature
of photobiological mechanisms responsible
for tissue damage upon exposure to laser
radiation 14 p2309 A66-27775
Space vehicle hazard due to focusing of
meteor streams by Earth in antiradiant
direction 19 p3455 A66-35294
Ground testing of large nuclear rockets,
discussing decontamination requirements to
maintain safety level with longer running
times and higher reactor
levels 19 p3398 A66-36177
Allotment of probability shares /APS/
statistical approach for guiding safety
measures to improve
aviation 20 p3494 A66-36998
National and international trends in ATC
from standpoint of pilot and operator
safety 20 p3595 A66-37004
Thermodynamic calculation of explosive
properties of peracetic acid, using data from
detonation wave to establish safe limits for
use of acid 21 p3834 A66-38535
Safety and survival in manned space
flights, discussing space suits, escape, life
preservation after soft landing,
etc 24 p4169 A66-43145
SAFETY HAZARD
Ground and flight procedures of minimum
cost satellite launcher noting control, range
safety, reliability and
orbits 04 p0586 A66-13947
Passenger injuries due to decompression,
impact and explosion from dynamite in rear
lavatory of Boeing 707 at high
altitude 09 p1336 A66-20522
Aeromedical factors of Titan II ICBM
support, discussing human factors in missile
crew and propellant
transfer 11 p1648 A66-22582
British Air Registration Board approach to
safety of advanced complex aircraft and
assessment of aircraft
reliability 13 p2088 A66-26690
Protection and hazard to eyes of
uninformed operators and bystanders from
laser light 14 p2309 A66-27668
Missile range safety problem and
control 14 p2394 A66-28440
Allotment of probability shares method
applied to improving safety in design by
diagnosing failure and probability of
accident 20 p3494 A66-36999
System safety definition and measurement,
examining probability of control of hazards
for system and cost effectiveness
analyses 20 p3570 A66-37930
Complex load action on elastic-plastic
structures in light of limit analysis,
discussing safety
criterion 21 p3826 A66-38591
Cryogenic fuels evaluated for operational
safety in space environment simulation
laboratory /SESL/ 22 p3891 A66-40235
SAHA EQUATION
Saha equation for composition of two-
temperature plasma derived from
thermodynamic approach, used for single
temperature plasma 02 p0265 A66-11399
Reflected shock waves in helium and argon
plasmas noting electron density, Saha
equations and Newtonian
technique 05 p0720 A66-14505
Discrepancy between observed ion
production rate in cesium thermionic
converter and Saha-Langmuir equation
prediction suggests locality of ion
formation 05 p0612 A66-14984
Saha equation correction based on
consideration of ionization energy reduction
from particle interaction in thermal
plasma 21 p3793 A66-39371
Saha-Langmuir formula applied to
description of temperature dependence of
positive ion current in surface ionization of

silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs 22 p3968 A66-40942

SAIL

S SOLAR SAIL

SAILPLANE

Drag reduction for sailplanes, investigating adoption of laminar foil section 01 p0008 A66-11097

French Air Regulation 2054 applicable to sailplanes, considering effect on design speed and gust loads 07 p0989 A66-17822

Installation of small turbojet engines on sailplanes for towing elimination in starting procedure 07 p1110 A66-18056

Sailplane equipped with auxiliary starting engine, characteristics and application in studying Alpine current 09 p1329 A66-20478

Radar detection of sailplanes and other small aircraft aided by aluminum reflecting surfaces 09 p1345 A66-20479

SAINT ELMO FIRE

S CORONA DISCHARGE

SAINT VENANT PRINCIPLE

Saint Venant principle applied to plane strain and generalized plane stress solutions of equations of linear theory of elastic equilibrium 10 p1618 A66-21875

Pointwise estimate for stress in uniform isentropic cylinder with zero body forces applied to Saint Venant principle 10 p1618 A66-21876

Upper estimate of potential elastic energy of cylinder, using concept of permissible surface forces and boundary conditions 11 p1783 A66-22894

Minimum strain energy characterizations of Saint Venant solution to relaxed Saint Venant problem 12 p1956 A66-23561

Saint Venant principle applied to dynamics of bars regarding boundary conditions and reliability problems 16 p2822 A66-31508

Stress analysis and load induction of small plastic deformations in machine structural elements 18 p3252 A66-33706

Quantitative examination of Saint Venant principle in context of elastostatic boundary problems, i.e., axisymmetric pure torsion of bodies of revolution 19 p3473 A66-35485

SALT

SA CARBONATE

SA NITRATE

SA PHOSPHATE

SA SODIUM CHLORIDE

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 04 p0542 A66-14306

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 14 p2327 A66-28219

SALT BATH

Creep tests on titanium alloy specimens with gauge length salt-coated, noting cracking, time dependency of susceptibility degree, etc 19 p3379 A66-35656

Separation of gaseous, liquid and solid reaction products generated by hot salt corrosion of titanium, noting gas diffusion effect on cracking 19 p3379 A66-35659

SAMARIUM

Vapor pressures of solid samarium and liquid gadolinium at high temperatures using Knudsen effusion method, noting sublimation heats for samarium 14 p2314 A66-27462

SAMARIUM COMPOUND

Emission current density and effective work function of samarium, europium and gadolinium hexaborides 02 p0270 A66-11426

Crystalline structure of simplest lanthanum and samarium silicates 05 p0702 A66-15337

Hall effect, thermal emf and electrical conductivity of SmS in temperature range 300 to 1000 degrees K 09 p1412 A66-19988

Lanthanothermal reduction of samarium oxide and vapor pressure dependence on temperature 14 p2314 A66-27341

Chemical and physical properties of samarium dicarbide, prepared by heating samarium sesquioxide with graphite, using X-ray analysis, hydrolytic studies, etc, noting structure 14 p2362 A66-27465

SAMPLED DATA

Pulsed-torqued gyroscopes with nonlinear characteristics and quantized sampled-data signals, determining theoretical performance 08 p1224 A66-19489

Complex convolution integral applied to Laplace transform expressions in sampled data theory 19 p3339 A66-36747

Mean-square error of step-wise interpolation for various sampling schemes on Markov process or band-limited white noise 22 p3941 A66-40695

SAMPLED DATA SYSTEM

Adaptive flight control system, using sampled data to identify aircraft parameter, for high performance 01 p0009 A66-10005

Stability analysis of multiloop multirate sampled systems using identities expressing Laplace transforms of sampled signals in terms of shifted transforms of same signals sampled with smaller periods 01 p0100 A66-10018

Generalizing Tsytkin stability criterion for class of time-varying nonlinear sampled data feedback systems 03 p0348 A66-12668

Sampled-data control systems analyzed by signal flow graphs 04 p0504 A66-13779

Stability regions of optimized modulated sample-data system determined from parametric fluctuation analysis 04 p0504 A66-13975

Sampled-data control system introduction, discussing representation of real continuous time functions by impulse trains via transform methods 04 p0506 A66-14184

Resampled data systems and error between output of second sampler and input signal to first sampler [ISA PREPRINT 1.12-3-65] 05 p0635 A66-15504

Equilibrium solution stability of discrete systems represented by origin in state space studied by Liapunov functions and quadratic moments [ASME PAPER 65-WA/AUT-17] 05 p0710 A66-15619

Transfer function identification of linear time-varying system with input and output signals available in sampled data form [ASME PAPER 65-WA/AUT-16] 05 p0659 A66-15620

Upper bound on dynamic/transient and steady state/quantization error in digital control systems, using direct method of Liapunov 06 p0865 A66-16741

Linear system impulse response approximation, determining time-scaling factor via orthonormal Laguerre functions 06 p0866 A66-16748

Sampled data control systems using z-transform method when sampling device is followed by data hold 06 p0866 A66-16749

Least squares technique for identification of linear time-invariant plant in sampled data system corrupted by additive noise 06 p0866 A66-16750

Reserve control approach used to solve optimal time control problem for single input sampled data systems, discussing geometric interpretation 06 p0866 A66-16962

Stability domains distinguished for nonlinear discrete systems with respect to values of variables and initial conditions 07 p1080 A66-17450

Channel sample-and-hold PCM telemeter, system modules, multiplexer gate groups, analog-to-digital converter, etc 08 p1184 A66-19518

Mikhailov criterion for stability and oscillation of linear sampled data systems 11 p1674 A66-22362

New block diagram compiler for sampled data system simulation 12 p1826 A66-23827

Properties helping design of linear sampled data systems containing periodically time-varying components like parametric amplifiers 12 p1848 A66-24139

Discrete white noise used to generate discrete colored noise by means of difference equation 12 p1850 A66-24266

Discrete and self-adaptive systems - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1851 A66-24323

Efficiency criteria in synthesis of optimum sampled data systems 12 p1852 A66-24324

Stability and quality evaluation of

nonlinear sampled data control system using Popov criteria for continuous nonlinear systems 12 p1852 A66-24324

Applicability and limitations of analytical methods in study of nonlinear sampled data automatic control systems 12 p1852 A66-24324

Optimum design strategies for discrete control systems with minimal time control 12 p1852 A66-24324

Statistical characteristics of output nonlinear sampled data control system evaluated by two methods 12 p1855 A66-24616

New algorithm for quadratic programming problems with application to control determining input requiring minimum time from initial state to target state 13 p2046 A66-25313

Digital computer simulation of sampled data communication system using Block Diagram Compiler, B /BLODIB/ 13 p2028 A66-25913

Sensitivity of sampled data systems with finite sampling duration derived as function of pulse width 13 p2054 A66-26013

Graphical determination of phase trajectories and oscillation limits nonlinear sampled system 13 p2056 A66-26713

Transfer function of pulse amplitude modulated sampled data control system with element generating arbitrarily shaped pulses and first order element series connected with constant parameter elements 14 p2266 A66-27514

State-space analysis of discretely controlled systems with finite delays 14 p2266 A66-27514

Time correlated burst retransmission PACM telemetry system, memory requirements, data time delay and bandwidth utilization efficiency 14 p2244 A66-28414

Dynamic programming for optimum design of sampled data control systems 15 p2474 A66-29615

Graph analysis by connectivity considerations, based on generating characteristic functions, noting application to sampled data systems, discrete Markov processes, computer programs, etc 15 p2453 A66-29715

Centralized Flexible Automatic Computer Telemetry System /FACTS/ for spacecraft providing capability of revising sampling structure 16 p2651 A66-30516

Errors in state vector arising from impulse representation of finite pulse width sampled data system 16 p2672 A66-31316

Automatic control systems with carrier frequency information transmission channel deriving transfer functions 16 p2672 A66-31516

Maximum increase in system error due to computer round-off errors for closed loop linear sampled data system 17 p2900 A66-32017

Optimal processes in sampled data control system 18 p3089 A66-33718

Combined use of time-domain waveform detection probability and false alarm probability for selection of optimum sampling period and quantization interval for detection of impulse waveforms 19 p3299 A66-35619

Sensitivity theory of nonlinear sampled data control system, establishing conditions for stability of equilibrium positions 19 p3327 A66-36019

Sampled data nonlinear system design for three axes acceleration measurement, noting effect of limit cycle trajectory and parameter choice on system velocity output error 19 p3361 A66-36719

Control algorithms for microminiaturized sampled data digital control systems 19 p3311 A66-36819

Time-domain and frequency domain statistics for random step-wise sampled data systems 20 p3535 A66-36820

Shipborne vibratory stress device for measurements on propeller blade and shaft by periodic data sampling 20 p3668 A66-37520

Dynamical system stability examined using direct method of Liapunov, noting application to periodic solutions 21 p3718 A66-39121

Synthesis of control device for class of nonlinear sampled data system, obtaining

processes with minimum control
 21 p3719 A66-39286
 time domain analysis and synthesis of
 time-varying linear sampled data automatic
 control system with separable impulsive
 responses 21 p3719 A66-39429
 sampling theorem for Fourier transform
 construction of band-limited signals,
 applications to stationary stochastic
 processes and analysis of round-off,
 truncation and random
 errors 22 p3884 A66-40168
SAMPLING
AIR SAMPLING
RANDOM SAMPLE
 sampling techniques for extraction of
 periodic signals from background of random
 noise 03 p0333 A66-12470
 sampling representations of band limited
 deterministic signals obtained, using
 nonharmonic Fourier
 series 06 p0861 A66-16194
 classification of unknown observations into
 one of two categories when decision
 boundary is determined from independent
 samples in each category 06 p0833 A66-16660
 improving SNR by display-sampling
 method, noting effect of increased sampling
 points 11 p1655 A66-22694
 Error propagation at above information
 limits postulated by Shannon sampling
 theorem and Gabor expansion
 theorem 11 p1657 A66-23105
 General family of two-stage chain sampling
 inspection plans 15 p2506 A66-28789
 Time jitter due to inherent noise when
 sampling intervals in Fourier transform
 spectroscopy by interferometer, examining
 effects and elimination
 methods 15 p2499 A66-28849
 Mean of stationary random process
 estimated from average of equally weighted
 samples taken periodically in closed
 interval 16 p2732 A66-30595
 Sampling techniques for conversion of
 broadband signal into multiple narrow
 bandwidth and reconversion back to original
 signal 19 p3302 A66-35705
 Exact sample size probability distributions
 for biased square law sequential detector
 with signal absent 24 p4173 A66-42637
 Importance sampling based on estimating
 gradient of variance for adaptive Monte
 Carlo method 24 p4233 A66-43204
SAMPLING DEVICE
 jittered sampling obtaining error bounds
 for sample independent and correlated jitter
 and bandpass sampling 06 p0865 A66-16742
 Motion of particles of dispersed phase at
 rest to sampling probe analyzed for
 application to two-phase medium
 flow 07 p1031 A66-17417
 Cascade vault sampler for bacterial
 aerosols 08 p1177 A66-19087
 Recording assembly for measurement of
 flexural and torsional moduli and internal
 friction at various frequencies and
 temperatures of small samples, using
 constant amplitude undamped
 oscillations 13 p2077 A66-25324
 Single sample chamber determining
 magnetothermodynamic characteristics
 including magnetic moment, heat capacity in
 magnetic fields, entropy change, free
 energy, etc 13 p2083 A66-26558
 Processing of planetary soil samples for
 detection of extraterrestrial
 life 18 p3062 A66-34370
 Dependent sampling effect on performance
 of nonparametric coincidence or median
 detector, considering constant signal
 detection in stationary additive
 noise 19 p3324 A66-35513
 Rotary plate airborne bacteria
 sampler 22 p3858 A66-40505
SAN MARCO SATELLITE
 San Marco project, joint effort of NASA
 and Italian Space Commission to launch
 satellite for atmospheric and ionospheric
 measurements 01 p0143 A66-10809
 Aerospace research in Italy including San
 Marco project, ionospheric measurements,
 cooperation with NASA, rocket experiments,
 etc 09 p1458 A66-20717
 National Research Council and San Marco
 project in Italian space
 program 24 p4297 A66-42698

SANDWICH CONSTRUCTION

SA MULTILAYER STRUCTURE

Stress response and fatigue life of
 acoustically excited brazed steel honeycomb
 panels for variations in
 thickness 01 p0147 A66-10133
 Analog computer application to prediction
 of nonlinear response of panel structure to
 random forcing function 01 p0148 A66-10134
 Natural frequencies of sheet-stringer
 panels which do not deflect laterally but
 rotate when subjected to arbitrary external
 loads 01 p0148 A66-10137
 Damping parameters for extensional and
 flexural vibrations of sandwich plates and
 for axisymmetric vibrations of sandwich
 cylindrical shells 01 p0149 A66-10149
 Modification of Ritz equations for natural
 frequencies of homogeneous isotropic plates
 to apply to natural frequencies of laminated
 panels 01 p0149 A66-10150
 Optimization of viscoelastic damping
 materials for use in specific composite
 systems of metal skins and damping
 viscoelastic layers 01 p0150 A66-10151
 Fatigue tests of optimized structural
 configurations consisting of sandwich panels
 containing core layers 01 p0150 A66-10152
 Interaction of parametric lateral vibration
 and forced longitudinal vibration considering
 natural vibration, especially longitudinal and
 lateral resonance of sandwich
 plates 01 p0157 A66-10928
 Honeycomb design, structures,
 developments and advantages, discussing
 materials and sandwich construction
 [ASME PAPER 65-AV-17] 02 p0236 A66-11795
 Structural analysis and experimental
 verification of sandwich panels with thin
 plastic-film facings and foam-plastic cores
 under compression and bending
 loads 03 p0437 A66-12769
 Resonance modes in rods for analyzing
 coupled oscillations in sandwich plates
 including differential equations for
 oscillations 03 p0442 A66-13303
 Roll reduction diffusion bonding for
 sandwich structures based on solid state
 diffusion process
 [SAE PAPER 650778] 05 p0687 A66-15006
 Yield point load of conical sandwich shell
 simply supported and loaded at vertex for
 material obeying Tresca yield condition
 [ASME PAPER 65-WA/APM-30]
 05 p0779 A66-15451
 Steady state response of damped
 cylindrical sandwich shell under radially
 symmetric time harmonic pressure
 [ASME PAPER 65-WA/UNT-1]
 05 p0779 A66-15601
 Stress and strain analysis of sandwich
 plates, formulating and solving problem of
 bending for transversally isotropic layers
 and light core 06 p0964 A66-16477
 General instability and face wrinkling of
 sandwich plates with ideally orthotropic
 cores, deriving equations and boundary
 conditions
 [AIAA PAPER 66-138] 06 p0968 A66-17088
 Synthetic spherulites in plastic foam and
 synthetic tube segments in honeycomb form
 as fillers in sandwich
 construction 10 p1614 A66-21390
 Combined loads minimum weight analysis
 of stiffened truss-core sandwich flat plate
 and cylinder 10 p1618 A66-21940
 Transformation of sandwich plate equations
 and deformation of rectangular simply
 supported sandwich plate 10 p1618 A66-22177
 Cylindrical bending theory for rectangular
 three-layer sandwich plate supported at
 opposite ends under variable
 load 11 p1783 A66-23019
 Sandwich cores consisting of tubes
 arranged in honeycomb configuration with
 tube axes normal to sandwich
 surface 12 p1959 A66-23782
 Quantitative information regarding validity
 of certain approximations applicable to
 sandwich plate analysis 12 p1960 A66-23972
 Yield point load of conical sandwich shell
 simply supported and loaded at vertex for
 material obeying Tresca yield condition
 [ASME PAPER 65-WA/APM-30]
 12 p1961 A66-23978
 Effect of external or internal static
 pressure on natural frequencies of
 unstiffened, cross-stiffened and sandwich

cylindrical shells 13 p2194 A66-25142
 Sandwich panel composed of plastic
 turbulent cells in parts of Hansa
 aircraft 13 p1994 A66-25500
 Nonlinear bending theory of three-layered
 simply supported plates 14 p2396 A66-27379
 Influence of plasticity correction factor in
 minimum weight analysis, using Ramberg-
 Osgood relations to define stress-strain
 curve 14 p2398 A66-27424
 Resin fiberglass sandwich materials for
 reinforcement of plastic laminated space
 structures 14 p2402 A66-27876
 Design, fabrication and test of sandwich
 construction box beam made of D-43
 columbium and Haynes 25 superalloy for use
 as hot redundant structure for hypersonic
 vehicles 16 p2816 A66-30894
 Photovoltage of aluminum-aluminum oxide-
 aluminum thin film sandwich with aluminum
 oxide layer of 60 angstroms measured as
 function of wavelength and incident light
 intensity 16 p2778 A66-31076
 Stresses and deflections in inhomogeneous
 sandwich shells calculated via computer
 programs 18 p3255 A66-34286
 Creep buckling of long curved sandwich
 panel 18 p3259 A66-35014
 Refractory metal brazing alloys developed
 for producing brazed refractory metal
 sandwich panels 19 p3367 A66-36113
 Book on strength, stiffness and stability of
 sandwich structural elements for structural
 designer, emphasizing practical
 applicability 20 p3666 A66-37010
 Composite structures of glass-fiber
 reinforced resin and other materials for
 launch shell structures
 [AIAA PAPER 65-286] 20 p3672 A66-38165
 Steady state response of damped
 cylindrical sandwich shell under radially
 symmetric time harmonic pressure
 [ASME PAPER 65-WA/UNT-1]
 21 p3832 A66-39530
 Barrier height determination in thin film
 sandwich tunnel diodes, using value of
 internal electric field and electric tunnel
 method 22 p3959 A66-39720
 Polyaromatic adhesives for temperature
 resistant sandwich construction in lap-shear
 strength and preliminary sandwich
 evaluations 22 p3926 A66-40279
 Inelastic buckling of rib-cored orthotropic
 sandwich cylinders under external
 hydrostatic pressure evaluated by
 deformation theory of
 plasticity 24 p4285 A66-42147
 Natural frequencies of all-clamped
 rectangular sandwich panel vibrations, using
 Lagrange multipliers 24 p4286 A66-42160
 Nonuniform thickness of dielectric films
 effect on capacitance and tunnel currents of
 elements with metal-insulator-metal
 structure 24 p4254 A66-42387
 Optimum sandwiches with rigid urethane
 foam core, noting lateral instability and
 wrinkling instability 24 p4291 A66-42793
SANDWICH PLATE
 Sandwich panel bending under thermal and
 mechanical loads, solving differential
 equations for temperature distribution,
 transverse load and uniform edge
 compression with boundary
 conditions 16 p2812 A66-30218
 Reissner variational formulation of
 temperature distribution boundary value
 problem of axisymmetric thermal stresses in
 isotropic sandwich shells of revolution
 [AIAA PAPER 66-528] 16 p2814 A66-30611
 Mechanical behavior of three-layer panels
 with middle layer consisting of tumbler-
 shaped cavities or rods attached to outer
 layers 16 p2817 A66-31047
 Optimum parameters of three-layer plates
 and shallow shells filled with reinforced and
 nonreinforced foam plastic under
 compression 16 p2817 A66-31048
 Mechanical behavior of three-layer plates
 with honeycomb filler under longitudinal
 compression 16 p2817 A66-31049
 Design equations for three-layer plate with
 rigid filler 16 p2817 A66-31051
 Book on bending theories of sandwich
 plates including use of Fourier series,
 stress-strain state, trigonometry, deflection
 theory, etc 16 p2818 A66-31100
 Monograph on nonlinear bending theory of
 three layer plates, covering mathematical

theory of elasticity stress-strain diagrams, Galerkin method, maximum deflection criteria, etc 16 p2819 A66-31136

Linearized theoretical motion equations for orthotropic cylindrical sandwich shells under initial stress, considering free vibrations 16 p2822 A66-31490

Sandwich shell theory, including effects of transverse shear and extension and quadratic terms essential to buckling problems 17 p3021 A66-32003

Linearized theory of free-vibratory motion of cylindrical sandwich shells under state of initial stress 17 p3025 A66-32455

Basic theory derived for nonsymmetric elastic three-layer sandwich shells of variable rigidity 17 p3026 A66-32600

Finite creep equations derived for circular sandwich plate under lateral pressure, considering bending moments and tensile forces 19 p3472 A66-35392

Bending of thin rectangular sandwich plate of three layers with small flexure 21 p3829 A66-38812

Axisymmetrical deformation of multilayer circular sandwich cylindrical shells, deriving governing differential equations by variational theorem 21 p3831 A66-39272

Minimum-weight design of sandwich shells subjected to fixed and moving loads, determining variable thickness of two thin face sheets 23 p4144 A66-41967

Mathematical demonstration that deflection of sandwich plate can be obtained from Reissner theory of plates if deflection function is known 24 p4286 A66-42159

Linear elastic small deflection theory of natural frequencies of vibration of rectangular sandwich honeycomb plate with mass attachment 24 p4292 A66-43046

SANITATION

SA HYGIENE

SA POTABLE WATER

International sanitary regulations and air traffic, noting uniform code for quarantine practices 11 p1647 A66-22479

Microbial accumulation on sterile steel, glass and Lucite strips in industrial clean rooms 13 p2013 A66-25286

SAPPHIRE

Dielectric relaxation effects, dissipation factor peak and capacitance and conductivity dispersions in pure and doped sapphire single crystals 03 p0409 A66-12638

Deposition of single-crystal silicon films on sapphire substrates by pyrolytic decomposition, noting properties 16 p2782 A66-31419

Properties and performance capabilities of solid state delay lines composed of materials such as quartz, sapphire and YIG having low loss acoustic propagation 19 p3319 A66-36032

Heteroepitaxial deposition of films of germanium in single-crystal form on sapphire by vapor growth techniques 21 p3802 A66-39163

Precision polishing technique for optical and microwave acoustical surfaces with overall flatness of one-eighth wavelength of light and parallel to 6 inches 23 p4067 A66-41248

Design aspects of satellite motion simulators in U.S. and Germany 04 p0507 A66-13550

Civilian and Military Uses of Aerospace-Conference, New York, January 1965 08 p1299 A66-18547

Satellite and launch vehicles since Sputnik I 13 p2189 A66-25129

Environment-simulation testing effectiveness for unmanned space systems 13 p2057 A66-25282

Proton I and II space stations to study cosmic ray particles of high and ultrahigh energies 17 p3004 A66-32957

SATELLITE ATTITUDE CONTROL

Flexible satellite attitude control, analyzing satellite as thin circular plate with application to radio telescopes, noting vibration modes and nonlinear gyroscopic coupling terms 01 p0142 A66-10674

Attitude stabilization of radio telescope satellite by passive gravity gradient control 01 p0142 A66-10685

Flux-gate magnetometer device for determining attitude of satellite or rocket probe, considering magnet perturbation due to solar wind and solar storms 01 p0069 A66-10786

Spin-stabilization system for attitude and orbit control of synchronous Syncom and Early Bird satellites 01 p0145 A66-11133

Motion equation for satellite with passive and semipassive attitude control using geomagnetic field, considering elliptical and circular orbits and involving differential equations 02 p0295 A66-11670

Spinning satellite attitude control using interaction between Earth magnetic field and onboard current carrying coils [AIAA PAPER 64-235] 03 p0430 A66-12735

Satellite orbit position control using solar pressure for linear propulsion and Earth gravitational and magnetic field for attitude control [AIAA PAPER 64-661] 03 p0424 A66-12738

Communications satellite technology

problems discussing synchronization of orbit attitude stabilization, lifetime and power supply 04 p0475 A66-13459

Attitude stability of spinning satellite in elliptical orbit using Floquet theory [ASME PAPER 65-APMW-27] 04 p0586 A66-14221

Bubble level for sensing local vertical attitude stabilized 08 p1223 A66-18811

Scanning celestial attitude determination system /SCADS/ for three-axis satellite attitude information for Earth and spin stabilized satellites and probes 08 p1252 A66-19501

Attitude control system, using magnet interaction with geomagnetic field to check spin rate and spin axis orientation of spin stabilized Explorer A 08 p1304 A66-19511

Simulation of satellite magnetic stabilization system in airbearing facility using coils-only magnetic torquing for attitude orientation 08 p1203 A66-19511

Solar cell powered resistojets in conjunction with momentum flywheels for attitude control and orbit maintenance of OAO [AIAA PAPER 66-225] 10 p1593 A66-21455

Attitude detectors, characteristics and performance 12 p1879 A66-23741

Ion thrusters in micropound range for satellite stationkeeping, with description of microthruster design [AIAA PAPER 66-212] 12 p1936 A66-24521

Bounds for decay times of pendulum damper vibrating in plane containing spin axis of space vehicle [AIAA PAPER 64-658] 12 p1954 A66-24691

Spacecraft magnetic testing, discussing geomagnetic effects on orbiting satellites magnetic dipole moment, etc 13 p2058 A66-25841

Electrostatic ion sources, assessing thrust output and lifetime for various space missions and satellite attitude control 16 p2791 A66-31191

Small scale MHD fluid flywheel attitude control systems applied to deep space probes, suitable for overcoming cyclical additions of angular rate to satellite of 10 revolutions per day 16 p2811 A66-31253

Uniqueness of equilibrium attitudes for Earth-pointing satellites 16 p2806 A66-31541

Orbiting satellite attitude orientation and equilibrium positions derived from motion equations 17 p3015 A66-32017

Auxiliary propulsion for satellite attitude control 17 p2990 A66-32374

Eddy current damping effect on satellite attitude stability 17 p3016 A66-32481

Attitude stability of spinning satellite in elliptical orbit, using Floquet theory [ASME PAPER 65-APMW-27] 18 p3239 A66-33590

Attitude control system for OGO, discussing design principles, space environment effects, reliability, etc 18 p3242 A66-33853

Passive and semipassive magnetic attitude stabilization for satellites in circular and elliptic orbits 18 p3243 A66-33858

Satellite spin rate and spin axis orientation control by magnetic torquing system 18 p3243 A66-33859

Tiros satellite attitude control, using spin stabilization by geomagnetic torques 18 p3243 A66-33860

Damping technique effect on performance of gravity-gradient satellite stabilization, noting means of creating restoring torques 18 p3243 A66-33861

Gravity gradient stabilization of near-Earth satellite with extensible boom and libration damping with combined lossy spring and magnetic hysteresis rods 18 p3244 A66-33862

Fuel and energy minimization in three-dimensional attitude control by reaction gas jet or reaction wheel in orbiting satellite 18 p3244 A66-33863

IR horizon sensor for determining orbiting satellite attitude with respect to Earth 18 p3110 A66-33873

Minimum-energy control law derived for attitude acquisition of satellite about single axis, using reaction-wheel control system [AIAA PAPER 65-434] 19 p3468 A66-35601

Twin-gyro system for satellite stabilization

minating disruptive cross-coupling effects
 changing gyro speed without
 distributing satellite
 attitude 19 p3468 A66-35628
 ferromagnetic fluid developing body force
 under magnetic field influence, noting
 changes in internal pressure, velocity, etc.,
 applied to attitude control devices,
 accelerometers, etc 19 p3445 A66-36178
 Magnetic torquing of spinning satellites,
 deriving equations for motion of
 symmetrical rigid body about center of mass
 homogeneous magnetic
 field 19 p3471 A66-36692
 synthesis of constant or time-varying
 near feedback control laws for application
 multiple input systems with frequency
 symmetry 20 p3645 A66-36864
 semipassive two-gyroscope damper for
 counteracting high angular rates of Earth-
 orbiting satellites 20 p3659 A66-36868
 Passive stabilization of space vehicles with
 symmetric mass distribution, using coupled
 system with optimum
 damping 20 p3659 A66-36869
 Dynamical formalism for arbitrary number
 interconnected rigid bodies analyzed with
 reference to passive attitude stabilization of
 satellites 20 p3659 A66-36866
 Low thrust divergent flow cesium-on-
 iongen contact ionization electrostatic
 thruster for satellite attitude control and
 stationkeeping missions 20 p3628 A66-37051
 [AIAA PAPER 66-569]
 Advantages of plasma propulsion include
 zero energy consumption when stopped and
 functioning by pulses, thus facilitating
 telecommands 20 p3628 A66-37396
 U.S. Lunar Orbiter
 program 20 p3663 A66-38063
 Attitude stability of satellite composed of
 two elastically connected rigid bodies with
 energy dissipation treated by Routhian array
 method 21 p3818 A66-38694
 Guidance and control - AIAA/JACC
 conference, Seattle, August
 1966 21 p3761 A66-38838
 Effect of man walking inside or outside of
 satellite on attitude 21 p3818 A66-38843
 Attitude control system and actuator
 relations in flexible spinning toroidal
 manned space station 21 p3819 A66-38845
 Magnetic attitude control of rigid spinning
 satellite in circular Earth orbit by producing
 control torques 21 p3763 A66-38846
 Pseudorange sawtooth-pulse reset controller
 design for satellite attitude control
 system 21 p3819 A66-38855
 Gravity gradient satellite stabilization and
 performance analyzed, using computer
 simulation of motion equations, including
 tidal current dampers, solar effect, orbital
 eccentricity, etc 21 p3819 A66-38857
 Stabilization system of gravity gradient
 test satellite and effect on damping time
 and steady state accuracy, noting attitude
 data and solar effect 21 p3819 A66-38858
 Gravity gradient stabilization system and
 sensor subsystem for attitude determination
 and flight test data on gravity gradient
 components of applications technology
 satellite /ATS/ 21 p3820 A66-38859
 Attitude errors of inertially coupled
 gravity gradient satellite with solar radiation
 pressure as dominant disturbance, noting
 test problems in stabilized package
 accommodating damper
 motion 21 p3820 A66-38861
 Stabilization and control system of Tiros-
 wheel satellite, using current-carrying coil
 interaction with geomagnetic
 field 21 p3821 A66-38878
 DME-A satellite attitude control, discussing
 performance of spin control
 system 21 p3821 A66-38879
 Normal modes of libration and response to
 perturbing torques of satellite with attitude
 stabilized in all libration angles by wire
 arrangement 24 p4283 A66-42769
TELLITE ATTITUDE DISTURBANCE
 Nonlinear resonance effect on attitude
 variations of undamped rigid gravity
 gradient stabilized satellite in circular Earth
 orbit 01 p0143 A66-10811
 Changes in dynamics of aerospace vehicle,
 flight in low altitude turbulence and
 satellite spin decay 02 p0178 A66-11990

SATELLITE-BORNE RADAR

Gemini rendezvous radar using
 interferometric angle measuring system,
 digital range data readout, analog range
 display and target vehicle command
 link 09 p1346 A66-20583
SATELLITE COMMUNICATION
 Satellite communication, noting satellite
 and ground terminal design performance
 criteria 01 p0030 A66-10804
 Long-distance free space microwave
 circuits noting repeater stations on
 satellites, satellite orbit, type of traffic
 handled, equipment, ground stations,
 etc 01 p0030 A66-10861
 Experiments with Echo II satellite to
 determine its capability as passive
 communications device and study shape and
 surface as function of
 time 01 p0032 A66-11126
 Advanced satellite antennas and their
 physico-electrical
 characteristics 01 p0046 A66-11128
 85-ft paraboloid antenna with new type of
 Cassegrainian feed system for satellite
 communication ground station at Nova
 Scotia 02 p0189 A66-11362
 Development, organization and legal bases
 of satellite communication system developed
 by U.S., noting details on
 COMSAT 02 p0306 A66-11888
 Feasibility of converting nuclear energy
 into directed beams capable of vaporizing
 offensive missiles, thus protecting our
 satellite systems 02 p0290 A66-12068
 Radio signals from artificial earth satellites
 and survey of propagation, operation and
 reception 03 p0335 A66-12896
 Communication experiments with Echo II
 during first year in orbit, discussing
 reflected signals 04 p0478 A66-13594
 Communications system of Explorer XX
 ionospheric satellite 04 p0481 A66-13801
 Semiconductor devices for communications
 satellite signal output 04 p0495 A66-13804
 Noise from terrestrial lightning discharges
 as source of interference to satellite radio
 reception 05 p0633 A66-14955
 Tracking equipment in 4 gc for space
 communication via satellite, noting
 error 05 p0634 A66-15364
 Worldwide meteorological satellite system,
 operation, structure and
 functions 06 p0957 A66-15911
 VHF aircraft-satellite relay /VASR/ as
 means of improving long-range
 communications, with flight test
 results 06 p0825 A66-15988
 Digital range measurement used in design
 of instantaneous communications handover
 system for medium altitude multisatellite
 system 06 p0831 A66-16340
 Signal power sharing, signal suppression,
 cross-product magnitude and output
 distortion in satellite communication system
 due to hard limiting 06 p0835 A66-16862
 Electronically-steerable antenna for ground
 terminal of satellite communications
 system 06 p0855 A66-16863
 Satellite telecommunication principles and
 equipment 06 p0835 A66-16935
 Characteristic distortion of Doppler curves
 and radio signals of artificial satellite from
 behind horizon 07 p1000 A66-17209
 Syncom synchronous communications
 satellite design and development, discussing
 orbit control and
 reliability 08 p1301 A66-18564
 Automatic picture transmission of Nimbus
 I meteorological satellite, considering
 frequency choice, vehicle position, antenna,
 image reception, etc 08 p1180 A66-18612
 Navigation and communication systems
 using satellites and ground stations
 economically, by digital
 techniques 09 p1400 A66-20425
 Radar transmission systems, observation
 techniques, ionospheric and tropospheric
 effects and meteoric radio reflection applied
 to satellite
 communications 09 p1345 A66-20541
 Telecommunication of satellite and rocket
 data, noting channel errors, coding systems,
 secrecy, etc 09 p1346 A66-20549
 Antenna impedance behavior in plasma
 related to radio astronomy, emphasizing
 electrically small antennas used in space
 vehicles 10 p1507 A66-21118

Satellite Telemetry Automatic Reduction
 System /STARS/ capable of processing data
 at capacity of 200 million data points per
 day
 [ISA PAPER 7.2-2-65] 10 p1507 A66-21904
 Microwave communications, discussing
 radio relay techniques, carrier telephony,
 satellite microwave communications,
 television, laser light wave communication,
 etc 11 p1655 A66-22696
 Exact equations derived which can provide
 all permissible satellite-link assignments for
 communication satellite scheduling
 program 12 p1816 A66-24150
 Joint experiment of U.S. Naval Observatory
 and Japan Radio Research Laboratories for
 synchronizing standard time pulses, using
 Relay II satellite 12 p1818 A66-24473
 Field intensity and polarization
 characteristics of turnstile antenna with
 arbitrary phase and amplitude relationship
 between two exciting
 elements 12 p1838 A66-24610
 Role of artificial Earth satellites in air
 traffic control
 [AIAA PAPER 66-259] 12 p1910 A66-24734
 Future impact of communications satellites
 on society 12 p1981 A66-24735
 Effective radiated power receiving
 sensitivity, bandwidth and nonlinear
 performance of Early Bird satellite
 [AIAA PAPER 66-263] 12 p1820 A66-24737
 Performance of Early Bird communications
 satellite and associated ground stations
 [AIAA PAPER 66-264] 12 p1820 A66-24738
 Global Commercial Communication Satellite
 using cylindrical spin stabilized satellite
 [AIAA PAPER 66-266] 12 p1954 A66-24739
 USN contributions to space
 communications, noting Syncom program,
 communications by Moon relay, design of
 antenna aboard Kingsport vessel, etc
 [AIAA PAPER 66-270] 12 p1820 A66-24743
 Satellite Educational and Informational
 Television, noting management, market and
 development problems in terms of profit,
 demand and growth potential
 [AIAA PAPER 66-274] 12 p1981 A66-24747
 Errors by mutual interference in
 frequency-time coding in satellite
 communications systems, deriving
 expressions relating commissive and
 omissive error rates, simultaneous users per
 unit bandwidth, etc 12 p1821 A66-24752
 Satellite communications central control
 support system consisting of Earth stations
 and satellite relays accommodating different
 RF power, orbits and antenna orientations
 [AIAA PAPER 66-287] 12 p1859 A66-24758
 Satellite ground terminal design
 considerations using adaptive digital
 communications techniques, noting analog to
 digital conversion
 [AIAA PAPER 66-290] 12 p1822 A66-24760
 Selection of optimum ranging signal for
 jam resistant satellite communications
 system 12 p1822 A66-24762
 [AIAA PAPER 66-292]
 Fading and multipath propagation
 mechanism for communication links
 involving satellites and aircraft with antenna
 beams, assuming fading models and
 estimating margin required for FSK
 teletype transmission
 [AIAA PAPER 66-294] 12 p1822 A66-24763
 Future pattern of communications satellite
 systems, reviewing world requirements for
 telephony, telex, TV and radio
 [AIAA PAPER 66-319] 12 p1824 A66-24790
 Effective radiated power /ERP/ satellite
 for educational TV distribution, discussing
 design feasibility, cost comparison, spectrum
 utilization and system model
 [AIAA PAPER 66-320] 12 p1982 A66-24791
 Ground-based steerable paraboloid
 spherical reflector and multiplate type
 antennas, noting cost per unit area for unit
 wind speed of 30 mph and frequency of
 1400 mc, performance, restrictions, etc
 [AIAA PAPER 66-324] 12 p1844 A66-24794
 Role of International Telecommunication
 Union in satellite communication
 development, noting history, organization,
 operation
 [AIAA PAPER 66-443] 12 p1983 A66-24800
 Computational aids /charts and

nomographs/ applicable to gross design of satellite communication systems 13 p2020 A66-25150

Lincoln Experimental Terminal /LET/ signal processing system, design, operation and application 13 p2022 A66-25516

Antenna requirements for satellite communications system ground stations, discussing antenna and mount designs 13 p2038 A66-25575

Low temperature techniques in satellite communications systems, noting maser, cooled parametric amplifier and trend toward closed-cycle refrigerators 13 p2042 A66-26104

Cross correlation of satellite signals through slab containing small anisotropic irregularities 14 p2237 A66-27398

Calibration of communication satellite Earth station antenna system, using radio stars 14 p2238 A66-27532

Space telecommunications for mass media, detailing use of point-to-point, distribution and broadcasting satellites 14 p2239 A66-27678

Man-machine systems involved in on-line man/ computer interaction, manned space systems, satellite communication and display systems 14 p2230 A66-27820

Development of satellite communication systems, discussing tentative launching schedule through 1969 14 p2243 A66-28361

Satellite communications systems for use by pilots passing over empty stretches of land or sea 14 p2243 A66-28363

Proposed one-satellite synchronous satellite system for over-ocean surveillance of aircraft 14 p2239 A66-28364

Passive satellite communications system for conventional and specialized networks, discussing new materials and satellite configurations 14 p2244 A66-28402

Satellite-emitted short radio wave field intensity and ionospheric parameters 15 p2447 A66-28493

Transportable satellite communications ground station design [AIAA PAPER 66-289] 15 p2477 A66-29865

International coordination of satellite communications by nongovernmental agencies [AIAA PAPER 66-333] 15 p2621 A66-29866

Properties of Mars atmosphere analyzed by ejected capsule from spacecraft, noting communications system 16 p2650 A66-30556

Unclassified information concerning military communication satellite system 16 p2655 A66-31650

Varactor diode parametric amplifiers compared for various applications in satellite communication ground stations including FM reception, tracking and radio noise reception 17 p2890 A66-32908

Modulation technique for simultaneous utilization by large number of Earth stations with satellite repeater with transfer characteristics of wide-band hard-limiting amplifier 17 p2876 A66-33102

Earth satellite advantages as world communications medium, discussing bandwidth capabilities, path attenuation, flux density at receiver terminal, etc 18 p3066 A66-33551

Syncom communications satellite reaction control system for spin axis precession and orbit correction, noting design and operation 18 p3242 A66-33854

Low-cost ground station design for satellite communications, with emphasis on Cassegrain reflector antenna and drive system 18 p3093 A66-33868

Tropospheric scatter application for beyond horizon communication between Earth and satellite or aircraft 18 p3067 A66-33899

Autotracking accuracy of large antenna systems for satellite communication application 18 p3071 A66-34301

High-gain surface wave antenna arrays for satellite communication, comparing volumetric array and parabolic dish antenna 18 p3085 A66-34318

Primary feed for center-fed paraboloidal aerial system for satellite-communication Earth station 18 p3086 A66-34323

Role of artificial Earth satellites in air traffic control [AIAA PAPER 66-259] 20 p3659 A66-36931

PCM telemetry system for satellites based

on projected requirements and subsystems currently available, noting satellite ESRO II as example of digital telemetry application 20 p3519 A66-38062

Communication and data transmission techniques via unmanned interplanetary satellites, examining video and telemetry systems 21 p3703 A66-38750

Space communications systems with increasing traffic-handling capacity, noting antenna and repeater design 22 p3865 A66-40126

French FR-1 satellite equipment for amplifying, filtering and transposing VLF signals from ground station 22 p3866 A66-40157

Traveling wave maser as preamplifier in ground station for satellite communication 22 p3867 A66-40658

Traveling wave tubes and klystrons, discussing microwave power generation efficiency, application for satellite communications, etc 22 p3878 A66-40701

Satellite communications - WESCON, Los Angeles, August 1966 22 p3867 A66-40709

Manual scheduling technique for allocating military satellite and ground resources to comply with input communications requirements and resources 22 p3868 A66-40711

capabilities 22 p3868 A66-40711

Military air-transportable satellite communications terminal design, noting parabolic antenna and amplifier 22 p3896 A66-40712

Doppler frequency shift for radio waves radiating coherently from satellite in ionosphere, considering electron concentration and angles of refraction 22 p3869 A66-40779

Rain effect on satellite communications Earth terminal rigid radomes, determining transmission loss and water film thickness 24 p4192 A66-43195

SATELLITE CONFIGURATION

Effect of satellite size on electron lifetime in artificial belt, causing charged particles in radiation belts to decay at surface 10 p1596 A66-21052

Requirements, simulation and design approach of auxiliary controllable satellites which can be operated from manned orbiting space stations 19 p3469 A66-35970

Coverage and overlap of communications satellites in circular equatorial orbits for multiple-access 22 p3870 A66-40964

SATELLITE CONTROL

Spin-stabilization system for attitude and orbit control of synchronous Syncom and Early Bird satellites 01 p0145 A66-11133

European Space Technology Center including upper-atmosphere scientific experiments, instrumentation, satellite control, data analysis, etc 03 p0352 A66-12481

Optimum stabilization of tumbling satellite, using Hamilton-Jacobi method 04 p0585 A66-13676

Magnetic torquing system controlling satellite spin rate and spin axis orientation 05 p0769 A66-14521

Satellite control and stabilization 05 p0770 A66-15192

Fluid-sphere nutation sensor for determining stability of rotating satellite 08 p1224 A66-19490

Remote-control signaling system for Eldo satellite 09 p1345 A66-20544

Passive magnetic stabilization of satellites, noting use limitations, satellite geometry, spin effects, etc 09 p1464 A66-20553

Rotating satellite stability assuming inertia axis is oriented toward Sun, noting dependency on jets of cold gas and nozzle calibration 09 p1401 A66-20659

D-1 satellite thermal control while in orbit featuring heating resistance and controllable power supply, noting simulated test program 10 p1612 A66-21960

Electrothermal propulsion system using heated gaseous nitrogen to provide Vela satellite with orbital velocity correction capability and weight savings [AIAA PAPER 66-213] 11 p1759 A66-22217

Power conditioning system for ion engine used in Sert-I flight test [AIAA PAPER 64-681] 12 p1937 A66-24691

Early bird hydrogen peroxide control system maneuvers to place satellite into

final stationary position [AIAA PAPER 66-262] 12 p1954 A66-24738

Parameters of satellite communication system control and scheduling function, emphasizing distinction between scheduling model and scheduling algorithm [AIAA PAPER 66-288] 12 p1822 A66-24759

Orbit position control based on solar pressure on plane sail structure and hollow thin-skinned lenticular shape of passive communications satellites [AIAA PAPER 66-313] 12 p1956 A66-24779

Development and performance of cesium ion engines for satellite control, noting lifetime, fuel consumption reliability, thrust vector control, etc [AIAA PAPER 66-234] 13 p2172 A66-25173

Electronic equipment for Iris telemetry and remote control stations for satellites 14 p2270 A66-27548

Control system and loading of magnetically driven flywheels for three-dimensional satellite orientation 18 p3243 A66-33857

Asymptotically stable rotational motions of satellites obtained by adding guidance moments to gravitational moments 18 p3244 A66-33864

Mobile control of FR-1 and D-1 satellites and application to integration, tests and checkout at launching 18 p3094 A66-33981

ramp 18 p3094 A66-33981

Automatic control equipment for FR-1 and D-1 satellites 18 p3246 A66-33985

Synthesis of specific optimum control law for optimum stabilization problem of tumbling satellite via Hamilton-Jacobi theory, comparing results with optimum solution 18 p3246 A66-34255

Position and flight-path control techniques for satellites and space probes 18 p3246 A66-34677

Ion engine satellite control system noting design and laboratory tests [AIAA PAPER 65-417] 19 p3450 A66-35616

Data processing of PFM telemetry whereby resolution of frequency measurements is dependent upon SNR, for application to satellite parameters 19 p3301 A66-35699

Preliminary design, mission specifications and outgoing data specifications for advanced control center for vehicles in orbital flight 20 p3651 A66-37394

AOSO stabilization and control system for solar experiments, noting closed loop stability and gain 21 p3819 A66-38854

Optimum stabilization of axisymmetric satellite by system of n reactive jets 22 p3986 A66-40464

SATELLITE DESIGN

Joint Anglo-American UK-3 satellite structure and dynamics 01 p0142 A66-10363

Fundamental design features that have made synchronous communications satellites practical 01 p0030 A66-10806

Design limitations on supporting systems in scientific rockets and satellites 03 p0432 A66-12861

Experimental apparatus and procedure for thorough testing of satellite heat balance 05 p0659 A66-14682

Magnetic design of OGO and Pioneer solar probe including data on instrumentation, mechanical equipment, permanent magnets, test methods, etc 06 p0958 A66-15919

Early Bird satellite technology including design parameters, structure, power supply, control system and test program 06 p0958 A66-15921

Design, manufacture and testing procedures for satellites in UK-3 program 06 p0959 A66-16307

Mission requirements and system reliability of Relay communications satellite 07 p1001 A66-17440

Thermal vacuum simulation in satellite design of UK-3 07 p1018 A66-18052

Operational experience with Telstar communications satellite, emphasizing long life satellite design 08 p1301 A66-18563

Orbiting Solar Observatory /OSO/ design and development 08 p1301 A66-18566

Orbiting Geophysical Observatory /OGO/ program to study Earth and Earth-Sun relationship 08 p1301 A66-18567

Space radiation environment and guidelines for designing satellite electronic equipment for reliable operation in

mechanical design of spacecraft including equipment layout in spin-stabilized satellite stress analysis 08 p1302 A66-18738
 Redundancy design tradeoffs with respect weight, power, reliability and testing 09 p1463 A66-19970
 European Launcher Development Organization /ELDO/ program for Europa I free-stage rocket and satellite design and testing 09 p1464 A66-20467
 ECLES/ELDO space vehicle booster program, noting design of three-stage rocket, including control and guidance system, telemetry, etc 09 p1464 A66-20655
 D-1, D-2 and D-3 Diamant satellites developed by CNES 10 p1610 A66-21252
 Heat design and manufacture of heat shields, satellite frame and telemetry antennas for ELDO space booster 12 p1885 A66-23914
 Nuclear power systems for future communications satellites, noting reactor, isotope, power system and thermoelectric power conversion equipment [AIAA PAPER 66-305] 12 p1804 A66-24772
 Design and principles of operation of Relay, Telstar, Syncom, Early Bird and project ATC communications satellites 13 p2193 A66-25858
 SNAP-9A, significant development factors and launch approval 13 p2126 A66-26626
 Design, objectives and equipment of French FR-1 satellite 14 p2390 A66-26800
 French D-1 satellite, design, attitude stabilization, solar power supply, telemetry, etc 14 p2390 A66-26804
 Thermal design of satellite with metal-covered skin using space/solar radiator 14 p2271 A66-28341
 Tiros IX satellite design and performance, noting wheel configuration, TV camera, control systems, etc 15 p2606 A66-28968
 Book on communications satellites design, testing, operation and power systems for Echo, Telstar, Relay, Syncom, ground stations, etc 16 p2809 A66-30877
 Thermal vacuum simulation in satellite design of UK-3 16 p2682 A66-31198
 Design, instrumentation, performance capabilities and program of D-1 satellites 16 p2812 A66-31684
 Satellite properties for geodetic application, noting inclination angle, orbit inclination, eccentricity, etc 16 p2700 A66-31794
 Temperature control of unmanned satellites for lunar or interplanetary missions 17 p3018 A66-33257
 Thermal design concept applied to metal skin of artificial satellite, based on uniform-in-temperature/lumped-heat-mass method 19 p3467 A66-35352
 French A1 satellite design and development, examining telecommunications equipment and monitoring diamant launcher performance 19 p3470 A66-36270
 Satellite thermal control by phase-change materials with heat-transfer equation solved by finite difference method and electrical analogs compared with other insulators 23 p4147 A66-41105
 Pegasus meteorite-detecting satellite design and performance and data on meteorites 24 p4283 A66-42741
SATELLITE DRAG
 Atmospheric density and heating as function of altitude determined from satellite drag measurements [AIAA PAPER 65-507] 01 p0134 A66-10192
 Satellite drag coefficient reevaluated in consideration of recent data on gas-surface interaction and atmospheric composition 05 p0760 A66-14941
 First-order perigee to perigee changes in unequatorial orbital elements due to spherical, rotational, exponential, time-variant atmospheric drag 06 p0955 A66-16909
 Equations of motion for Earth satellite indicate greater significance for atmospheric resistance than gravitational effect 07 p1139 A66-18190
 Drag coefficient of spherical satellites at various heights, based on gas-surface interactions and atmospheric composition 14 p2382 A66-27617
 Atmospheric drag effect on satellite trajectories in eccentric orbits, assuming spherical atmosphere with exponentially distributed density 14 p2384 A66-27882
 Exospheric temperature, scale heights and mean molecular weight up to 3500 km derived from satellite accelerations in 1964 15 p2484 A66-28819
 Shape and location of diurnal bulge in upper atmosphere, analyzing density and temperature distribution at high latitude from satellite drag data 15 p2490 A66-29821
 Disturbances about solid body in flowing low density plasma applied to satellite-ionosphere interactions and Langmuir probe data analysis 16 p2759 A66-30373
 Induction drag of long cylindrical satellites and Alfvén waves emitted from them determining potential and current distribution and effect on energy loss [AIAA PAPER 66-478] 16 p2799 A66-30523
 Atmospheric density and scale height from satellite 1964-30A decay 19 p3463 A66-35922
 Average radiation fluxes on satellites in lower radiation belt 20 p3644 A66-38351
 Method of averages and small parameter method applied to integration of motion equation for Earth satellites in presence of aerodynamic effects 24 p4279 A66-42838
SATELLITE GROUND SUPPORT NETWORK
 Satellite systems and ground site networks for global surveillance communication nets and synthesis 04 p0475 A66-13460
 Operations of CNES station network including work program, controlling development and data collection and verification received from satellites 14 p2270 A66-27551
 Vertically-fed steerable parabolic reflector system for communications satellite Earth station 18 p3081 A66-34271
SATELLITE GROUND TRACK
 Resonance effects for satellites with nominally constant ground track 06 p0952 A66-15906
SATELLITE GUIDANCE
 Satellite guidance system using star-field locating sensor with gyration masses controlled by centrifugal and gravitational force interaction 02 p0256 A66-11984
 Satellite functions in air traffic control systems noting position determination, aircraft surveillance, etc 02 p0258 A66-12042
 Maximum principle applied to guidance and tracking of space systems 05 p0713 A66-15193
 Guidance equations for positioning spin stabilized communications satellite in circular orbit, noting velocity adjustments, using Monte Carlo simulation 21 p3764 A66-38864
 Satellite functions in air traffic control systems noting position determination, aircraft surveillance, etc 22 p3945 A66-40326
SATELLITE INSTRUMENTATION
 Semiquantitative evaluation of instrument requirements of solar probe as function of perihelion 01 p0142 A66-10790
 Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 04 p0575 A66-13361
 UV spectrum sensor system developed for satellite use 04 p0518 A66-13551
 Experiments in measurement of solar, cosmic and geomagnetically trapped /Van Allen/ radiation to be undertaken by ESRO II satellite 06 p0879 A66-16507
 Electric field meter /E-meter/ measurement of field strength at given point on spacecraft surface [AIAA PAPER 66-74] 08 p1227 A66-19726
 Radiation measurement equipment on Cosmos 41 satellite including scintillation counter, gas discharge counter, etc 08 p1228 A66-19798
 Vela satellite system electronic detection instrumentation and block diagrams 09 p1379 A66-19910
 Spherical electrostatic analyzers on Cosmos XII, Cosmos XV and Elektron II satellites 09 p1445 A66-21029
 Vertical electron density profiles determined at 725 and 1525 kc, using Elektron II satellite /1964 6B/ 10 p1600 A66-21050
 Antenna array and radiometer selection for orbiting LF radio astronomical observatory 10 p1507 A66-21122

D-1A satellite by Diamant for evaluating long-term performance of instrumentation, solar cell studies and geodetic experiments 10 p1612 A66-21959
 Launch vehicle, spacecraft, command and data station and data utilization for meteorological satellite systems, satellite stabilization and orbit types 11 p1777 A66-22306
 Commercial communications satellite for random, phased and synchronous medium altitude, noting design, specifications and operation 11 p1777 A66-22454
 Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 12 p1946 A66-23639
 Modular set of analog microcircuits constructed of discrete transistors and tantalum thin film resistors for satellite experiments 12 p1830 A66-23681
 Directional neutron detector utilizing plastic scintillator filaments for space research 12 p1876 A66-23683
 Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684
 Spark chamber with vidicon readout for balloon-and satellite-borne high energy gamma ray astronomy analysis, noting Cerenkov counter 12 p1877 A66-23685
 Flat design and manufacture of heat shields, satellite frame and telemetry antennas for ELDO space booster 12 p1885 A66-23914
 Lincoln experimental satellite program in antenna pointing, solid state repeaters, RF power generation and magnetic torquing of spin axis [AIAA PAPER 66-271] 12 p1821 A66-24744
 TWT delivering CW power in L, S, C and X-band designed for space environment, considering size, weight, voltage, etc, and comparing klystrons, amplifiers, circuit design, etc [AIAA PAPER 66-308] 12 p1844 A66-24775
 Design and principles of operation of Relay, Telstar, Syncom, Early Bird and project ATC communications satellites 13 p2193 A66-25858
 Meteorological data from weather satellites equipped with TV and IR sensors, noting Automatic Picture Taking /APT/ recorder 14 p2289 A66-26806
 Astronomical UV spectrophotometer for second U.S. Orbiting Solar Observatory 14 p2293 A66-27328
 Dielectric-tape TV camera for panoramic scanning application in meteorological satellite, discussing subject logic and control system design 14 p2262 A66-28418
 S-1C stage instrumentation systems and ground support equipment checkout methods used at Kennedy Spaceflight Center 14 p2271 A66-28420
 Tradeoff for high reliability program, discussing development of satellite equipment for Celestscope project 15 p2507 A66-28796
 Differential electron spectra in radiation belt in ten energy intervals obtained by satellite spectrometer, noting soft and hard components 16 p2794 A66-30703
 Design, instrumentation, performance capabilities and program of D-1 satellites 16 p2812 A66-31684
 Communication satellite design noting use for educational and commercial purposes, instrumentation applied, etc 17 p2872 A66-31935
 Phased array antenna system for multidirectional transmission and reception of focused beams with high gain 17 p2872 A66-31936
 Single-axis Sun-tracking system for satellite orientation, noting operation modes and system performance 18 p3243 A66-33855
 Plasma fluxes inside magnetosphere detected by spherical electrostatic analyzers mounted on Elektron II satellite 18 p3196 A66-34871
 Auxiliary autonomous piggyback detector and recorder system for spacecraft failure detection following touchdown 19 p3315 A66-35676

Multiple-access systems and characteristics in communications satellite applications, specifically frequency-division multiplex and spread-spectrum modes 20 p3511 A66-36897

Satellite instrumentation, discussing data handling systems, cosmic ray detection, signal and information processing, etc 20 p3556 A66-36963

Final estimate of interplanetary magnetic field at 1 AU provided by Pioneer V uniaxial induction-coil magnetometer 20 p3649 A66-37336

Monograph on TV transmissions from space covering application to space missions, geodetical studies and existing and planned facilities 20 p3561 A66-38031

Radiation measurement equipment on Cosmos XLI satellite including scintillation counter, gas discharge counter, etc 21 p3736 A66-38794

IR spectrometers, radiometers, horizon sensors, rotating-prism planet-seekers and detector cooling using solid cryogenics, for use in high altitude rockets and Earth satellites 24 p4211 A66-42679

SATELLITE INTERCEPTOR

Comet mission study using space probes boosted by Atlas Agena and Atlas Centaur launch vehicles for interception from 1967 to 1975 04 p0577 A66-13579

Dynamic programming applied to satellite intercept and rendezvous problems 09 p1362 A66-20651

SATELLITE LAUNCHING

CNES D-1 satellite using Diamant launcher for study of launch systems and space environment 01 p0142 A66-10360

French Diamant satellite launching rocket noting design, performance, stages, propellants, instrumentation, etc 02 p0295 A66-11672

Three kerosene-HTP propellant rocket engines for satellite launching, noting combustion chambers 02 p0279 A66-11675

Turbo-rocket application to air breathing satellite launcher program describing engine design, performance and weight characteristics 04 p0572 A66-13539

Ground and flight procedures of minimum cost satellite launcher noting control, range safety, reliability and orbits 04 p0586 A66-13947

French satellite-carrying Diamant rocket describing design, developmental testing and operating characteristics 05 p0770 A66-15201

Instrumentation for testing first stage lox-kerosene rocket engines of ELDO satellite launcher, noting pressure transducer and computer data system [ISA PREPRINT 1.12-5-65] 05 p0684 A66-15514

Orbiting telecommunications satellite network, noting application and necessary launch vehicles 09 p1464 A66-20562

Performance of Diamant launch vehicle including orbital considerations for planned projects 10 p1610 A66-21255

Three kerosene-HTP propellant rocket engines for satellite launching, noting combustion chambers 11 p1760 A66-22435

Launching of artificial comets into orbit to evaluate theories of cometary structure 12 p1945 A66-23569

Diamant satellite launcher, development, launching and future 12 p1953 A66-23743

French space program, flight tests of Diamant class rockets and A-1 satellite 12 p1981 A66-23804

FR-1 French satellite, functions, structure and performance 13 p2192 A66-25493

SNAP-9A, significant development factors and launch approval 13 p2126 A66-26626

Orbital satellite launching systems, problem of increasing percentage orbital payload at minimum cost and advantages of air breathing engines 14 p2391 A66-27010

Probability of detection of smooth satellite-launched aluminum spheres, noting orbital parameters, microwave radar efficiency, etc 14 p2391 A66-27039

Collection of information and announcements pertaining to rocket and satellite launchings including objectives, stations, data exchange, etc 15 p2600 A66-29902

Canadian space program including nonmilitary activities, upper atmosphere research, rocket sounding, aurora studies,

satellite use, etc 15 p2601 A66-29937

First two launchings of French Diamant satellite 17 p3016 A66-32378

AIMP-D spacecraft mission analysis, determining launch conditions and trajectory shaping for attaining lunar orbit, noting errors, flight path angle, etc [AIAA PAPER 66-535] 18 p3226 A66-33665

Satellite orbiting via radio command guidance, discussing results with communications and weather satellites, guidance system used, control methods, etc 18 p3131 A66-33848

Launch of Alouette II satellite noting experiments on board 20 p3663 A66-37625

Space release mechanism using subliming material 20 p3664 A66-38252

Canadian ISIS program for launching of satellites containing enough instrumentation to measure all ionospheric parameters simultaneously 24 p4283 A66-42696

SATELLITE LIFETIME

Effect of Earth oblateness on lifetime of satellite in time-varying atmospheric density [AIAA PAPER 66-63] 07 p1139 A66-18451

Satellite lifetimes in low near-circular orbits predicted from rate of change of orbital period 11 p1776 A66-23497

Satellite lifetime noting orbit evolution, methods of lifetime calculation for short- and long-range missions, etc 18 p3236 A66-34900

Equations describing motion of satellite in Paetzold-Zschoerner model of Earth atmosphere 20 p3654 A66-37848

SATELLITE MANEUVER

Plane change split techniques for circularly orbiting satellite by aerodynamic propulsive and impulsive maneuvers 14 p2384 A66-27894

SATELLITE MEASUREMENT

Intensity and energy spectra of low energy primary cosmic ray protons determined aboard Imp-I satellite 01 p0132 A66-10601

Evaluation of satellite radar altimetry for geophysical and oceanographic measurement 01 p0137 A66-10801

Rocket and satellite methods for studying ionosphere 03 p0370 A66-12862

Geodetic determinations from photoelectric observations of occultation of stars by satellites 03 p0428 A66-13030

Electrostatic probe, discussing Explorer XXII measurements of electron concentration and temperature at 1000 km altitude 05 p0746 A66-14782

Sunlight attenuation reaching Ariel II satellite after passing through Earth atmosphere along almost horizontal path 05 p0672 A66-15023

Terrestrial radiation belts, satellite data, geographical coordinate location and cosmic radiation measurement 05 p0749 A66-15230

Low energy charged particle measurements, describing satellite mounted spherical electrostatic analyzer 05 p0751 A66-15373

Method of zones for calculation of temperature distribution in components of complicated artificial satellites [ASME PAPER 65-WA/HT-47] 05 p0792 A66-15662

Neutron albedo measurements on polar orbiting satellites 07 p1120 A66-17981

Malkevich atmospheric transfer function calculation for Northern Hemisphere in order to correct satellite radiation measurements 09 p1435 A66-19887

Vertical temperature and humidity distributions of atmosphere determined from satellite measurements of carbon dioxide and water-vapor absorption bands 09 p1376 A66-20999

Radiophysical investigations of outer ionosphere with aid of Cosmos II and Elektron I satellites and certain geophysical rockets 09 p1377 A66-21002

Physical experimental data collected by Cosmos II satellite dealing with ionospheric structure 09 p1377 A66-21004

Electron and ion concentration measurements in ionosphere at altitudes of up to 200 km, using rockets and satellites from 1960-64 09 p1377 A66-21005

Composition of outer ionosphere measured, using RF mass spectrometers mounted on board Elektron I and II satellites 09 p1378 A66-21008

Electron pitch distribution anomaly as observed by Cosmos V satellite, noting

possible causes of phenomenon 09 p1378 A66-21008

Electron energy spectrum measurements by Cosmos V satellite, noting concentration and intensity at various geographical areas 09 p1378 A66-21008

Spatial distribution of protons and electrons captured by terrestrial magnetic field, as measured by Cosmos satellites 09 p1443 A66-21010

Cosmos XLI satellite measurements of outer radiation belt 09 p1446 A66-21010

Geomagnetic field measurements by Cosmos satellites at 49 degrees latitude including typical magnetograms of magnetic field intensity 10 p1526 A66-21010

Solar X-ray and UV radiation measurements by monitoring satellites including instrumentation 10 p1598 A66-21010

UK-2 satellite measurement of ionospheric noise bands and propagation of waves in mode, including orientation determination methods 10 p1604 A66-21110

Imaging and altimeter-type radar employed in orbiting spacecraft for high resolution mapping, scattering cross section studies, climatology, etc 10 p1532 A66-21520

Meteorological research capability of manned Earth orbiting spacecraft with refined electromagnetic sensing instrumentation 10 p1553 A66-21520

Cosmos XLI satellite measurements of low energy proton distribution and intensity 11 p1762 A66-22400

Three parameter pulse height analyzer and coincidence system for satellite-borne scintillation telescope study of cosmic radiation 12 p1878 A66-23690

Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation, etc 12 p1949 A66-24060

Ionospheric processes and measurement of variations in ion temperature and concentration using satellites, noting connection with magnetosphere 12 p1871 A66-24400

Electron distribution from 400 to 1200 km measured, using Ariel I satellite, noting latitudinal and longitudinal anomalies associated with geomagnetic field [AIAA PAPER 66-395] 12 p1872 A66-24510

Solar protons from class 2 solar flare of February 1965 measured from satellite 1964-45A 13 p2175 A66-26351

Soviet monograph on atmospheric exploration using rockets and satellites, covering meteorological and geophysical instrumentation, measurement parameters, etc 13 p2083 A66-26502

Cloud top heights and areal coverage obtained from satellite IR measurements, noting error estimation and effect of cloud size on accuracy 15 p2485 A66-28938

Proton flux measured by satellite at high latitude compared to ionospheric absorption measured with riometers, noting absorption variation with latitude across polar caps 15 p2576 A66-29228

Drag coefficients and absolute atmospheric densities at high altitudes calculated, using spin and orbital decays of Explorer VI satellite conjugated with models of surface particle interaction 15 p2489 A66-29818

Latitudinal and seasonal variations in atmospheric densities during low solar activity obtained by inflatable air density satellites 15 p2490 A66-29819

Total electron content from S-66 satellite received at nine stations, using differential Faraday technique 15 p2491 A66-30017

Radiation data measured by Tiros IV satellite for determination of global distribution of atmospheric water vapor 15 p2533 A66-30029

Airglow lines measured through photometers onOGO-II satellite, noting nadir and zenith airglow 15 p2494 A66-30044

UV solar radiation absorption in upper atmosphere determined from measurement of photoelectron currents emitted by planar metallic orthogonal photocathodes onboard Cosmos II satellite 15 p2592 A66-30051

High resolution density data from radar observations of low altitude, polar orbiting satellites reveal longitudinal and

magnetic variation, noting regression analysis 15 p2497 A66-30085

Flux plots and differential energy distributions for low energy protons in nine energy intervals from 0.17 to 3.4 mev measured with satellite-mounted proton spectrometer 16 p2794 A66-30702

Total electron content of ionosphere in middle latitudes, noting results of satellite Doppler measurements, effect of solar radio flux, etc 16 p2694 A66-30706

Measurements of geomagnetic field at various distances using IMP-I satellite, finding magnetically neutral sheet in tail and observation of five magnetic storms 16 p2695 A66-30715

Latitude-time distribution of electron concentration, noting satellite measurements of ionospheric inhomogeneities and interference in Doppler shifts of coherent radio waves emitted by Electron I satellite 16 p2696 A66-30920

Ionospheric electron content determined from satellite measurements, noting seasonal diurnal variation of content and utilization of Faraday fading for measurements 17 p2920 A66-33069

Liouette satellite observation of ionospheric cyclotron resonance, obtaining plasma frequency at particular height 17 p2920 A66-33085

Correction of magnetic measurements made by Mariner II, noting use of second-order approximation for interplanetary magnetic field 18 p3106 A66-34333

Interplanetary magnetic-field measurements taken by Interplanetary Monitoring Platform IMP-I/ 18 p3231 A66-34336

Comparison of interplanetary magnetic field measurements obtained by Pioneer VI probe and IMP-III 18 p3233 A66-34540

Numerical solution of integral form of radiative transfer equation from measurements in finite set of spectral intervals for deducing atmospheric temperature profiles, using satellites 18 p3129 A66-34554

Difficulties and instabilities accompanying version of radiance data to infer temperature structure related to interdependence existing among nominally dependent measurements 18 p3130 A66-34555

Atmospheric temperature profile determination by satellite-borne IR spectrometer, noting instrument design 18 p3113 A66-34556

Terrestrial radiation belt during solar minimum, noting results from measurement with Elektron satellite 18 p3175 A66-34745

High energy electron acceleration detected in shock transition region of terrestrial magnetosphere, using Au-Si surface barrier lead state detector and IMP-I satellite mounted GM counter 18 p3177 A66-34753

Low-energy protons and electrons of outer radiation belt measured by equipment aboard Cosmos XLI 18 p3196 A66-34872

Local electron concentration determination by dispersion method and satellite proved unreliable because of horizontal ionization gradient and ionospheric instability 19 p3344 A66-35259

Sputnik III data application to plotting of total magnetic field intensity chart above S.S.R., using spherical harmonic analysis 19 p3345 A66-35290

Monthly variations in Southern Hemisphere at budget calculated from Tiros satellite radiation measurements 19 p3347 A66-35642

Chemical composition of ionized components of outer ionosphere above main ionization maximum region measured by satellites 19 p3350 A66-36357

Total electron component of ionosphere column between satellite and Earth calculated, using differential Doppler effect 19 p3361 A66-36654

Relativity theory application to space probes, discussing experimental verification, relevance to cosmological problems and utilization to particles with large energy and momentum 20 p3650 A66-37389

Upper atmospheric density determination on basis of changes in orbital elements of artificial Earth satellites 20 p3553 A66-37850

Correlation of magnetic fields and energetic electrons on IMP I satellite, noting depression in geomagnetic tail region, electron fluxes and diamagnetic effect 20 p3633 A66-38201

Integral spectrum for low-energy electrons measured with detailed definition of temperature and number density by IMP II 20 p3633 A66-38204

Magnetospheric boundary phenomena, noting dependence of charged particle observations on character of associated magnetic fields 20 p3641 A66-38329

Magnetospheric models, discussing role of fast magnetospheric merging in connection with charged particle acceleration and magnetospheric configuration 20 p3641 A66-38330

Auroral absorption analysis during geomagnetic storm, noting satellite measurement of energetic particles 20 p3642 A66-38335

Magnetosphere tail sheet pinch model, discussing motion of particles for cases of surface crossing 20 p3642 A66-38336

Spatial distribution of trapped particles measured by Explorer XV satellite, noting decay time constants and energies 20 p3643 A66-38340

Transient behavior of energetic electrons in artificial radiation belts analyzed via satellite observations 20 p3643 A66-38341

Energetic electrons from shock heating of exosphere, discussing formation of artificial radiation belt via MHD shock wave heated and density gradient accelerated electrons 20 p3644 A66-38346

Satellite and rocket measurement of upper atmosphere characteristics, deriving standard atmosphere CIRA 1965 21 p3735 A66-39615

Angular, spectral and geographical distributions of outgoing fluxes of thermal radiation and Earth albedo measured, using Cosmos satellite 22 p3913 A66-40471

Relativistic effect of atomic clocks, noting error and magnitude increase with experiment duration 22 p3948 A66-40476

Relativistic-electron diffusion wave in outer radiation belt recorded by device mounted on Cosmos XLI satellite in high geomagnetic latitudes 22 p3974 A66-40756

Satellite application in geodetic surveys and navigation, noting measurement and tracking techniques 22 p3915 A66-40786

Van Allen belt study using equatorially orbiting satellite, examining trapped particle origin and energies 23 p4123 A66-41038

Inconclusiveness of satellite measurements of micrometeoroid fluxes using piezoelectric microphone detectors in supporting hypothesis of cloud of dust surrounding Earth 23 p4128 A66-41213

Penetrating radiation measurement on Moon surface obtained by Luna IX spacecraft 23 p4128 A66-41410

Steady state solar neutrons and solar neutron bursts measured by neutron detectors on Vela satellites 24 p4263 A66-42599

Temporal variations of electron energy flux in outer radiation zone measured during geomagnetic activity with instrumentation on board Explorer XII satellite 24 p4263 A66-42601

Satellite possibilities for measuring cosmic radiation in 1000 bev energy range and comparison of indirect and direct measurements 24 p4267 A66-42909

SATELLITE NAVIGATION SYSTEM

Evolution of navigation systems in Mercury and Apollo manned space vehicles and role astronaut plays in design of system 02 p0293 A66-11319

Orbital perturbations in satellites used for navigation position-fixing 02 p0258 A66-12039

Worldwide navigation system using existing ground and airborne equipment and limited number of navigation satellites 02 p0259 A66-12054

U.S. papers on air navigation control via artificial satellites, discussing merits and deficiencies 02 p0260 A66-12060

Satellite navigation systems for marine and aircraft industry global, all-weather position determination and communications noting range measurement, range rate, NASA techniques, etc 02 p0260 A66-12237

Satellite-based Doppler navigation system 03 p0333 A66-12461

Shipboard inertial navigation system recalibration, using periodic position information from communications satellite 05 p0712 A66-14604

Satellites for navigation aids for ships and transoceanic aircraft 05 p0713 A66-15273

Navigation satellite in aircraft traffic control 07 p1074 A66-17778

Synchronous navigational satellites for ships and planes, noting distance and direction measurement by satellite interferometers 07 p1075 A66-17785

Satellite navigation aid for marine craft, objectives of ATS and ATS-A, -B and -C spacecraft 10 p1611 A66-21896

Relative geodetic location by measurement of differential Doppler shift of radio signal 12 p1819 A66-24611

Navigation satellite in aircraft traffic control 13 p2125 A66-25870

Worldwide sea-air navigation system using synchronous satellites, noting limitations and economic factors 17 p2955 A66-33221

Air traffic control and navigation system for North Atlantic and worldwide all-weather navigation 17 p2956 A66-33224

Transit satellite navigation system comprising three or four satellites in polar orbits, four ground stations, computational center, two data feeding stations and automatic aircraft and submarine equipment 18 p3246 A66-34004

Navigation satellite system providing precise position information of aircraft, noting flight tests 19 p3396 A66-35516

Design of digital computer program of Monte Carlo variety for analyses of self-contained orbital navigation systems for satellites, including error source categories 20 p3595 A66-36871

Worldwide long-range navigation satellite /Navsat/, noting use with inexpensive black box, clear-air turbulence mapping and position definition in relation to high ground 20 p3598 A66-38259

Guidance, navigation and two phases of targeting of Saturn V lunar landing mission, analyzing launch, boost to orbit and iterative guidance 21 p3768 A66-38898

Book on spacecraft navigation systems covering sensors operation and construction, with emphasis on astronomical, inertial and complex navigation systems 21 p3768 A66-39289

SATELLITE NETWORK

Navigation communication system using satellites to provide information automatically to ships and aircraft 07 p1077 A66-17800

Worldwide satellite communications systems dependence on solution of political, sociological, economic and legal problems 09 p1342 A66-20250

Two-channel satellite-borne radiometric system to furnish temperature information for SST flight planning, discussing conceptual design, operating mode and data handling procedures [AIAA PAPER 66-372] 12 p1872 A66-24500

Lincoln Experimental Terminal /LET/ system, ground antenna, RF and signal processing equipment for communications via several satellites [AIAA PAPER 66-272] 12 p1821 A66-24745

Adaptive utilization of communication satellite systems optimizing dynamic traffic handling of combined ground and satellite communications complex, noting network configurations [AIAA PAPER 66-295] 12 p1822 A66-24764

Multiple-access worldwide satellite communication system for aircraft terminals with limited antenna gain and transmitter power [AIAA PAPER 66-297] 12 p1823 A66-24765

Social and legal questions posed by development of large-scale information grids [AIAA PAPER 66-318] 12 p1982 A66-24789

Long-range projections of demand for intercontinental communication satellite systems and use as basis for business decisions [AIAA PAPER 66-322] 12 p1982 A66-24792

Data processing centers integration through ground and satellite

telecommunications networks for global information network
[AIAA PAPER 66-331] 12 p1824 A66-24798

SATELLITE OBSERVATION

Data on planets obtained by optical and radio techniques with emphasis on space vehicle observation 01 p0133 A66-10176

Space studies of Cosmos and Elektron satellites including space radiation hazards, particle observation, ionosphere chemical composition, onboard equipment, etc 01 p0136 A66-10415

Refinement of theory for determining figure and size of Earth from observations of artificial satellites 01 p0062 A66-10692

Russian Cosmos satellite series classification and description according to orbital inclination 02 p0296 A66-11889

Ionosphere electron content near auroral zone obtained from differential Faraday observations of multifrequency beacon satellite Explorer XXII, noting corpuscular radiation role 02 p0223 A66-12017

Cloud height, ground-and sea-surface temperatures, ice forms, terrain features and soil moisture information from Nimbus I satellite equipped with TV cameras and IR radiometer 03 p0360 A66-12365

Assumption of spatial system parallel to mean geocentric system in compensation of triangulation grid 03 p0424 A66-12459

Intermediate observation for satellite compensation of spatial triangulation 03 p0424 A66-12460

Calculation in spatial triangulation by synchronous observation on basis of partially known orbital elements 03 p0424 A66-12462

Specification of satellite observations performed at Polish observation stations 03 p0430 A66-12464

CNES and ESRO station network duties including satellite signal transmission recording, follow vehicle trajectory, telecommand onboard operations, etc 03 p0333 A66-12477

Atmospheric density calculations from observing Sputnik III satellite, examining solar activity effect 03 p0361 A66-12624

Ionosphere and high latitude particles - COSPAR Symposium, Alpbach, Tirol, Austria, March 1964 03 p0361 A66-12639

Satellite probe measurements of irregularities of electron density distribution above F-2 layer in polar region 03 p0363 A66-12642

Satellite observation of solar protons from flares in September 1963, measuring impact zone effect, differential spectrum, latitude distribution of proton energies, proton fluxes, cosmic noise absorption, etc 03 p0417 A66-12649

Electrostatic spectrometers discussing deflection type, retarding-potential type and magnetic analyzers, advantages, uses, flux measurement techniques via energy selectors, etc 03 p0369 A66-12652

Auroral absorption height obtained from statistical satellite data on average precipitation rate of electrons in auroral zone as function of energy 03 p0364 A66-12663

Interplanetary magnetic effects of solar flares recorded by Explorer XVIII and Pioneer V 03 p0419 A66-12681

Position of satellite traveling along perpendicular bisector of line joining two fixed points determined by simultaneous observations with accuracy of one inch 03 p0366 A66-13196

Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 04 p0575 A66-13361

Viewing geometry in interpretation of reflected solar radiation data from Tiros IV 04 p0515 A66-13673

Difference in Doppler shifts of radio waves emitted at various frequencies by satellite Elektron I radio station, plotting electron concentration dependence on altitude 04 p0515 A66-13837

Ogo-A first results on mass spectrometry measurements of thermal positive ion composition at high altitudes 05 p0746 A66-14781

Quasi-stationary corotating structure in interplanetary magnetic field observed with

Imp I satellite during three solar rotations, noting data on solar wind 05 p0746 A66-14783

Composition and energy spectra of primary cosmic radiation in low energy regions from observations of Mariner II and Explorer VII 05 p0752 A66-15384

Research potential of manned Earth orbiting spacecraft in meteorology 06 p0957 A66-15905

Data obtained by satellite and rocket probes on cosmic ray composition, particularly on fluxes on nuclei of elements contained in rays 06 p0946 A66-16569

Least squares recursive differential-correction estimation in nonlinear problems, examining equations and stochastic interpretation 06 p0903 A66-16735

Nuclear emulsions exposed for several days in recoverable satellite scanned for ending tracks of cosmic ray particles, obtaining energy spectra for various nuclei 07 p1111 A66-17464

Analysis of data obtained from satellites concerning artificial radiation belt formed by July 9, 1962 high-altitude nuclear explosion 07 p1131 A66-18083

Explorer satellite XII, XIV and XV measurements, noting directional intensity energy flux, spatial distribution and spectra of low energy trapped protons and electrons 07 p1131 A66-18085

Plasma and magnetic field data from Explorer X, emphasizing correlation with multiple crossings of geomagnetic cavity boundary on dark hemisphere of Earth 07 p1029 A66-18087

Cloud altitude determination from single satellite photograph, using Sun altitude 07 p1063 A66-18481

Zero-gravity effect on opossum fetus observed by TV system in proposed satellite 08 p1176 A66-18726

Inhomogeneities of ionospheric electron concentration in Pacific Ocean region obtained with aid of signals from Explorer VII satellite 08 p1213 A66-19025

Scintillation observations of satellite signals noting latitude, diurnal, seasonal and sunspot cycle variations 08 p1183 A66-19208

Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 08 p1217 A66-19302

Transition region magnetic field and polar magnetic disturbances, comparing Explorer XII data with ground measurements from Arctic observatories 08 p1218 A66-19399

Digital simulation of Vela satellite system for detection of nuclear detonations in space 09 p1349 A66-19971

Utilitarian space applications, discussing communications, weather, geodetic and navigation satellites and high speed aircraft 09 p1453 A66-20169

Terrestrial radiation belt measurement with Cosmos satellite, noting launch and orbit data, instrumentation and results 09 p1441 A66-20231

Primary cosmic radiation and terrestrial radiation belt measurement by Cosmos XVII satellite, noting instrumentation, equipment operation and results 09 p1441 A66-20232

Comparison of interplanetary magnetic field measurements made by Imp-I satellite and those obtained with solar magnetograph at Mount Wilson 09 p1455 A66-20402

Accuracy in geodetic measurement, discussing contribution of satellite observations 09 p1374 A66-20629

Upper atmosphere and outer space research carried out by U.S.S.R. in 1964, including cosmonaut responses and launching tables 09 p1458 A66-20691

Aerospace research in Poland using satellite observations for geodesy, geophysics and atmospheric dynamics 09 p1459 A66-20721

Optical observations of artificial satellites used for geodetic and geophysical purposes in Rumanian Peoples Republic 09 p1458 A66-20722

Tiros satellite data indicates upper-level structure of formative cyclone of moderate intensity is grossly similar to storm at maturity 09 p1399 A66-20727

Auroral absorption measured, using riometers compared with energetic particle fluxes simultaneously detected by passing satellite, showing absorption and particle

flux correlation 09 p1374 A66-20888

Atmospheric density distribution at altitude from 200 to 300 km, based on Soviet satellite observations during minimum solar activity 09 p1375 A66-20999

Earth magnetic field measurements with three-component ferromagnetic magnetometer on Elektron II and Elektron III satellites 09 p1378 A66-21029

Cosmos and Sputnik observation of outer radiation belts at low heights 09 p1446 A66-21031

Interplanetary dust measurements by satellites indicate meteoric fluxes and dust clouds hazardous to manned spaceflight 10 p1600 A66-21041

Astronomical observations from space vehicles - International Astronomical Union Symposium, Liege, Belgium, August 1964 10 p1596 A66-21078

Solar X-ray data obtained from British Ariel satellite and rocket observations 10 p1598 A66-21084

Visible and IR radiation observations made above atmosphere 10 p1603 A66-21107

Venus IR limb darkening observations by Mariner II 10 p1603 A66-21110

Rocket and satellite observations of LF radio waves from extragalactic sources 10 p1603 A66-21114

Alouette I satellite observations of solar radio bursts and other noise enhancements 10 p1604 A66-21116

Ionospheric focusing of extraterrestrial radio waves received by satellite antenna 10 p1496 A66-21120

Galactic radio noise between 1.5 and 10 mc observed by Alouette I satellite 10 p1604 A66-21121

Mariner IV observations of Mars surface, showing no detectable magnetic field or radiation belts, suggest iron on surface oxidized from photodissociation of water vapor 10 p1606 A66-21211

Nimbus I IR scanning radiometry for nocturnal imagery of clouds and other data, IR spectral returns and relation to image gray scale 10 p1531 A66-21519

Analysis of AVCS and HRIR pictures from Nimbus I satellite 11 p1729 A66-22326

Ice and snow fields in polar regions as observed by high resolution camera on Nimbus satellite 11 p1729 A66-22327

Reception of LF signals by radio astronomy satellites, utilizing mathematical techniques for ray tracing in spherical ionosphere 11 p1651 A66-22367

Curves of difference in Doppler shift in observations of transmitter of Elektron I satellite, noting fluctuations in electron concentration 11 p1762 A66-22409

Observation of noctilucent and nacreous clouds from satellites 11 p1730 A66-22944

Physical pattern of high altitude fission cloud and motion of gamma and beta fission fragments captured by geomagnetic field and observed by Cosmos satellite 11 p1764 A66-23043

Geomagnetic field confinement by solar wind to form magnetosphere and magnetic tail 11 p1699 A66-23127

Suggested procedures for operationally integrating meteorological satellite /neph mosaic/ and conventional data for extratropical regions 11 p1731 A66-23383

Diagnostic-cycle routine, collection of computer-programmed techniques for interpretation of meteorological satellite videograph observations 11 p1731 A66-23486

Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 12 p1946 A66-23639

Monograph on methods and equipment used by Soviet satellites and space probes to study Earth radiation belts 12 p1938 A66-23802

Satellite observation of radiation belt and absorption of cosmic noise in polar aurora during magnetic storms of February 1964 12 p1943 A66-24267

Compensated coordinates of artificial Earth satellites from synchronous observations at two given points on Earth surface 12 p1824 A66-24875

Observation satellite optics, discussing focal length, resolution, viewing angle, Earth

 Thermospheric wind velocities computed from satellite orbital data 09 p1376 A66-20992
 Satellite experiments testing precessional formula of general relativity, obtaining optimal orbital condition 10 p1604 A66-21193
 Launch vehicle, spacecraft, command and data station and data utilization for meteorological satellite systems, satellite stabilization and orbit types 11 p1777 A66-22306
 Relationship between stellar coordinates and measured plate coordinates in satellite charting diagrams 11 p1771 A66-22653
 Motion of near-Earth satellite under sole influence of ellipsoidal polar-flattened Earth 11 p1774 A66-23001
 Even zonal harmonics in terrestrial gravitational potential, noting agreement between coefficients obtained from satellite measurements 11 p1702 A66-23493
 Data on satellite orbits used for Earth figure, upper atmosphere density, solar radiation, etc. 12 p1868 A66-23637
 Satellite orbit plane change by external burning aerocruise [AIAA PAPER 65-21] 12 p1954 A66-24695
 Effects of varying orbital parameters, including number of satellites, orbit altitude, positioning, tracking accuracy, cost effectiveness, etc., on establishment and maintenance of communications satellite system [AIAA PAPER 66-286] 12 p1955 A66-24757
 Items affecting information transmitted from payload landed on remote planet to Earth via communications satellite including orbit, transmission policy and orbit injection error effect on communication capability [AIAA PAPER 66-314] 12 p1823 A66-24780
 Periodic solutions for spunk motion in gravitational field of two other bodies of finite mass 13 p2186 A66-25882
 Coordinate transformation of Schwarzschild metric for gravitational field of oblate Earth and equatorial satellite orbits into symmetric metric 13 p2187 A66-26137
 Forecasts of periods of brilliant visibility for satellites Echo I and II in 1966, especially for latitude of Belgium 13 p2026 A66-26321
 Soviet monograph on celestial mechanics of satellites and space probes covering trajectory problems, two-and three-body systems, space flight duration between two points, etc. 13 p2188 A66-26465
 Inclusion of third zonal harmonic in accurate reference orbit of artificial satellite 14 p2378 A66-27112
 Mean element determination for Vinti satellite theory 14 p2381 A66-27441
 Air density at heights near satellite perigee by analyzing changes in satellite orbit 14 p2382 A66-27616
 Electronic whistlers for calculation of proton density at satellite heights, based on symmetry existing in expressions containing two time and frequency variables 14 p2376 A66-27623
 Orbital eccentricity of balloon satellites Echo I, Echo II and Explorer XIX, discussing influence of solar radiation pressure 14 p2383 A66-27824
 Linear differential equations for slowly rotating symmetrical satellite in circular orbit 14 p2392 A66-27879
 Influence of parallax of near cosmic bodies on equatorial coordinates 14 p2388 A66-28339
 Polynomial approximation method for determining satellite orbits from large-time-interval trajectory measurements 15 p2592 A66-28488
 Book on satellite orbital flight trajectory theory and celestial mechanics 15 p2595 A66-29128
 Asymptotic methods of nonlinear mechanics, involving averaging for differential equations, applied to motion equations of satellites and resonance in electric circuits 15 p2541 A66-29162
 PROP computer program written in FORTRAN for ATLAS computer for refinement of satellite orbital parameters 15 p2603 A66-30000
 Semianalytical solution of motion of satellite in lunar orbit, considering

perturbations due to lunar and Earth gravity and solar attraction 15 p2604 A66-30016
 Poincare-von Ziepel procedure in celestial mechanics applied to satellite motion about oblate Earth 16 p2796 A66-30263
 Topocentric distance of geodetic satellite GEOS-A measured by laser telemetry from station 16 p2652 A66-30586
 Even zonal harmonic coefficients of Earth gravitational potential evaluated by analyzing precessions of satellite orbital planes 16 p2694 A66-30618
 Lunar-solar perturbation effect on satellites with eccentric orbits, noting lifetimes on perigee heights 16 p2802 A66-30923
 Motion equations derived for center of inertia of satellite in Earth gravitational field 16 p2805 A66-31506
 Earth satellite elliptical orbit intersection point with Earth shadow determined by exact solution of fourth-power algebraic equation with respect to tan E/2 17 p2995 A66-31848
 Satellite orbit stability discussing proof of Haseltine formal stability theorem, doubly periodic expansions, satellite motion around oblate curve, etc. 17 p2999 A66-32065
 Motion of close satellite of smaller primary in restricted three-body problem referred to conventional rotating frame in which central angle is chosen as independent variable 17 p2999 A66-32066
 Relativistic precession measurement using satellite as precise orbiting gyroscope [AIAA PAPER 65-36] 17 p3001 A66-32450
 Perturbation of near circular orbits by Earth gravitational potential 17 p3005 A66-32997
 Gravity anomalies of unsurveyed areas of Earth surface and influence on satellite orbit perturbations 17 p2921 A66-33196
 Zonal harmonics in external potential of Earth determined from secular motion of satellite orbits 17 p2921 A66-33227
 Random and systematic errors in satellite trajectory computations 18 p3227 A66-33870
 Aerial mount and satellite orbit effect on steerable antenna control system, noting frequency and tracking data rates 18 p3071 A66-34279
 Tesseral perturbations of repeating ground track synchronous satellite orbits in gravitational potential 18 p3233 A66-34595
 Upper atmospheric density determination from data of satellite orbit evolution, noting effect of solar activity 19 p3343 A66-35253
 Telemetry data for extreme orbital deviations of Soviet satellites with orbital inclination of 65 and 51 degrees 19 p3468 A66-35722
 Derivative-expansion method of first-order asymptotic expansion of takeoff of satellite from circular orbit by small thrust inclined at finite angle to radius vector [AIAA PAPER 65-688] 19 p3462 A66-35894
 Perturbation technique to study three-body problem of motion of close satellite [AIAA PAPER 65-690] 19 p3462 A66-35896
 Asymptotic representations of perturbation methods used to solve differential equations of satellite orbit mechanics 19 p3462 A66-35897
 Error equations of inertial navigation with special application to elliptical orbital determination and guidance [AIAA PAPER 65-691] 19 p3397 A66-35898
 Unpredicted period in orbital motion of Alouette I artificial Earth satellite attributed to solar gravitational attraction 19 p3463 A66-35921
 Orbit determination from only angular data spread over large time arcs 19 p3463 A66-36242
 Periodic motion of artificial satellite around Earth and Moon 19 p3464 A66-36369
 Satellite motion under influence of longitude-dependent terms of geopotential in reference frame rotating with satellite mean motion, noting tesseral harmonics effect and dynamical and librational resonances 19 p3470 A66-36388
 Asymptotic calculation of effect of small tangential thrust on satellite motion, problem solved for satellite orbit in first and second approximation 19 p3472 A66-36842
 Design of digital computer program of Monte Carlo variety for analyses of self-

contained orbital navigation systems for satellites, including error source categories 20 p3595 A66-3687
 Rendezvous maneuver with effect on velocity changes on orbital transfer of near Earth satellite 20 p3663 A66-3753
 Precession of satellite orbits in verifying general relativity 20 p3602 A66-3763
 Energy integral study of geopotential harmonic variation effects on satellite motion near critical inclination 20 p3653 A66-3776
 Critical values of satellite orbit inclinations accounting for effects of first-order perturbations and mean anomaly 20 p3654 A66-3785
 Simulation experiments to describe effects of measurement function nonlinearity and ambiguities when linear filters are applied in distant planet satellite orbit parameter estimation 21 p3766 A66-3888
 Data on unknown portions of Earth gravitational field from observations of two consecutive satellite orbits and mean orbit elements 22 p3976 A66-39692
 Vacuum conditions in space based on data obtained by Earth-orbiting satellites, noting shock front and magnetopause caused by interaction of solar wind with geomagnetic field 22 p3979 A66-40205
 Satellite orbit determination and air density and scale height analysis, using visual observation 23 p4128 A66-41359
 Dumbbell librations of satellites in elliptic orbits of small eccentricity determined via WKB approximation 24 p4272 A66-42158
 Spin-orbit coupling in solar system, examining resonant spin rates for one-and two-body planet/satellite systems with eccentric orbits 24 p4272 A66-42203
 Pulsed ruby laser photoelectric receiver experiments determining satellite orbits, supplementing Baker-Nunn camera network 24 p4172 A66-42547
 Orbital plane precession due to ellipsoidal shape of Earth, discussing effect on meteorological and geodetic satellites 24 p4279 A66-42963
SATELLITE ORIENTATION
SA IMAGE DISSECTOR TUBE
 Magnetically oriented satellite and angular motion damping by shorted-coil and hysteresis in digital computer simulation 03 p0430 A66-12666
 Molniya type communication satellite, discussing optimum orbital requirements for maximum coverage, phasing, etc. 06 p0952 A66-15907
 Orientation of satellite-borne dipole emitter and influence on ground-based recording of Faraday effect 07 p1028 A66-17455
 Orientation control of orbital astronomical observatory examined, using dynamic model consisting of three independent subsystems, each with one degree of freedom 12 p1829 A66-24318
 Direct-to-home TV broadcasting satellite system for upper UHF, describing stabilization, thermal control, antenna, power amplifier, etc. [AIAA PAPER 66-309] 12 p1955 A66-24776
 Gyroscopic stabilization of relative equilibrium of satellite 15 p2605 A66-28489
 Gravitational stabilization systems achieving passive satellite orientation, using gravitational field gradient 15 p2606 A66-29158
 Average rotational speed of upper atmosphere above 200 km evaluated from changes in orbital inclinations of 13 satellites 15 p2496 A66-30082
 Sensors for Earth satellite orientation to solve general problem of space vehicle orientation 18 p3245 A66-33888
 Space vehicle orientation with respect to rotating system of coordinates 19 p3467 A66-35279
 Dynamic effects on satellite motion of mechanical deformations in stabilizing system, deriving equations for rotational motion about center of inertia 19 p3472 A66-36831
SATELLITE PERTURBATION
SA ORBIT PERTURBATION
 Flight control system for manned orbital space station using momentum storage devices and reaction control to counteract

- avity effects and aerodynamic
turbances 01 p0104 A66-10683
- Material elasticity effects on planar
rational motion of rigid satellite under

 Time of rendezvous of two satellites, one on circular and one on elliptical orbit 19 p3470 A66-36247
 Control-engineering and flight-mechanics problem of rendezvous guidance, considering target body without guidance and second body in gravitational field without atmosphere 20 p3595 A66-36874
 Combined computer and physical simulation of manual tracking system for coupled-camera photography of one space vehicle from another when weldable viewfinder is used 20 p3597 A66-37233

SATELLITE ROTATION

Motion stability of dynamically symmetrical satellite rotating about normal to plane of elliptical orbit 02 p0295 A66-11650
 Equations for rotational motion of satellite and rods with end loads as stabilizer, considering rods elastic deformation caused by load bending 02 p0295 A66-11651
 Oscillations 02 p0295 A66-11651
 Circular orbit effect on asymptotically stable stationary rotations of axisymmetrical satellite 03 p0430 A66-12485
 Magnetic torquing system controlling satellite spin rate and spin axis orientation 05 p0769 A66-14521
 Simultaneous passage of shadows of two Jupiter satellites across planet disk, including tabulation of dates and times of phenomenon 05 p0758 A66-14731
 Satellite elongation into true Sky Hook, examining possibility of self-supporting cables extending into space from Earth and from extraterrestrial rotating bodies 10 p1607 A66-21295
 Photoelectric photometry of rotation of Echo I and II satellites, discussing duration, variation with time and direction of rotation relative to revolution 11 p1769 A66-22477
 Final spin states of planets and satellites, deriving criteria for synchronous rotation 11 p1769 A66-22528
 Viscous ring damper for removing wobble motion of spin-stabilized satellite analyzed by studying energy dissipation 16 p2820 A66-31276
 Asymptotically stable rotational motions of satellites obtained by adding guidance moments to gravitational moments 18 p3244 A66-33864
 Optimum stabilization problem for axisymmetric satellite, considering fuel consumption 19 p3467 A66-35277
 Passive wobble damping system with pendulum damper designed for manned rotating space station 20 p3664 A66-38159
 Adaptation to prolonged exposures in revolving space station simulator 22 p3853 A66-39786
 Primary factors affecting passive stability of spinning cable-connected satellite including perturbations due to gravity gradient, out and in reeling, etc 24 p4283 A66-42767

SATELLITE TELEVISION

Proposals for television satellite in Europe noting direct transmission of TV programs, design principles and power supply 01 p0030 A66-10797
 Echo II TV system to observe deployment, inflation and injection into orbit 01 p0073 A66-11124
 Color TV for exploration of space environment, noting techniques for signal transmission via satellites 08 p1180 A66-18611
 Book on space electronics including satellite for TV observation of zero g effects, water reclamation in spacecrafts, ion engines, spacecraft design, etc 08 p1222 A66-18725
 Microwave communications, discussing radio relay techniques, carrier telephony, satellite microwave communications, television, laser light wave communication, etc 11 p1655 A66-22696
 Satellite Educational and Informational Television, noting management, market and development problems in terms of profit, demand and growth potential [AIAA PAPER 66-274] 12 p1981 A66-24747
 Interference ratios in space telecasting, considering methods of control for cochannel broadcasting

[AIAA PAPER 66-283] 12 p1821 A66-24754
 Synchronous stationary satellite system for networking television and radio material to broadcast stations, noting frequency requirements and constraints [AIAA PAPER 66-284] 12 p1821 A66-24755
 Video data compression by redundancy techniques, using a posteriori curve fitting techniques to adaptively change effective resolution as function of picture detail 20 p3557 A66-37203
 Dielectric-tape camera borne by meteorological satellite to provide high-quality photographs of Earth cloud cover 20 p3557 A66-37204
 Television transmission and reception by satellite relay 20 p3521 A66-38425

SATELLITE TRACKING

Interferometric system of Diane satellite tracking stations permits high altitude tracking and measurements with larger solid angle 01 p0030 A66-10788
 Evaluation and calibration of missile and space tracking systems including test-by-test analysis, lofted rockets, self-calibrating systems, etc 01 p0053 A66-10805
 Satellite and space-probe tracking by radar, radio and optical observations from Earth 02 p0191 A66-11693
 Satellite position prediction and display /SPAD/ naval equipment that will predict, display and determine selected satellites 02 p0215 A66-11699
 Optical technique for satellite and space probe tracking noting equipment, orbit determination, checkpoints, etc 02 p0192 A66-12008
 Photographic observation of artificial Earth satellites 03 p0368 A66-12463
 Diane, European interferometric tracking station noting antenna system, calibration operations, angular measurement, etc 03 p0333 A66-12478
 Station network designed for CNES using Doppler frequency tracking, coherent systems of demodulation, polarization, etc 03 p0351 A66-12479
 Camera for precision satellite observations accurate to one inch in determining position and to less than 0.002 seconds in determining moment of measurement 03 p0370 A66-13200
 Functional characteristics of Navy Doppler tracking system and satellites used for geodesy, noting data reduction procedures and system tests 04 p0514 A66-13610
 Position of artificial Earth satellite determined, using geodetic coordinate system with origin at center of reference ellipsoid 04 p0516 A66-13959
 Optimum satellite search equipment and procedure consisting of preliminary search and data processing 04 p0482 A66-13970
 Radar for tracking satellites and space vehicle, considering transponder beacons and comparing pulsed and CW systems 04 p0487 A66-14131
 Doppler effect discussing relativistic form, transmission in dispersive media, broadening of spectral lines, black body radiation, rocket and satellite tracking, navigation and application 04 p0546 A66-14383
 Time-referencing of moment of photographing to determine satellite coordinates with aid of reference stars 04 p0524 A66-14394
 Maximum principle applied to guidance and tracking of space systems 05 p0713 A66-15193
 Sinusoidal rocking-motion camera, advantages in satellite tracking such as light grasp gain, speed error insensitivity, clock switch operation, etc 05 p0682 A66-15370
 Tropospheric scatter common volume, describing derivation for two intersecting circular cones 06 p0833 A66-16682
 Manual on basic information for institutions and nations planning new optical tracking stations for satellites 06 p0833 A66-16689
 Accurate tracking of Beacon-Explorer orbiting optical reflectors, using pulsed ruby laser beams 09 p1341 A66-19902
 Receiving equipment for Early Bird satellite at Fucino, Italy 09 p1354 A66-20559
 Ground antenna for satellite tracking and orbit calculation 09 p1355 A66-20587
 Tracking and recording of telemetry from

artificial Earth satellites and space probes, as South African contribution to space research 09 p1459 A66-20723
 Diane satellite tracking station, examining functioning of synchronous demodulator with hypothetical carrier 10 p1504 A66-21707
 Diane ground station interferometry, antenna, examining choice of polarization and use of slots for precise measurements 10 p1511 A66-21708
 Control system of microwave antenna positioning used in communication satellite tracking, noting servosystems, converter, Leonard drive, control panel, etc 12 p1817 A66-24320
 Tracking record of synchronous satellites over two-year period revealing effects of second and third order longitude components in Earth gravity potential field 12 p1875 A66-24893
 Optical techniques for satellite tracking and star identification, describing ASTRO II theodolite with photoelectric data recording 12 p1883 A66-24933
 Monograph on radio-interferometric satellite tracking and application to scientific, military and telecommunications satellites 13 p2019 A66-25128
 Antenna drive with feedback control system for radio telescope, noting design, construction and operation 13 p2038 A66-25640
 Periodic solutions for sputnik motion in gravitational field of two other bodies of finite mass 13 p2186 A66-25882
 Satellite tracking telemetry system used by Diane network of ground stations 14 p2233 A66-26803
 Ruby laser energy reflected off Explorer XXII satellite 14 p2306 A66-27054
 Error in tracking loops as satellite passes over tracking system 14 p2265 A66-27480
 Theoretical and experimental study of accuracy of Diane interferometric tracking network 14 p2238 A66-27545
 BTC-2 master clock provides basic information and reference signals for operation of various units of satellite tracking and telemetry station 14 p2295 A66-27550
 Voltage-controlled switch using p-n diodes loop-coupled to section of WR975 waveguide for use in satellite tracking radar system 14 p2258 A66-27953
 Synchronous orbit tracking and communication satellite using electronically steered antenna, tracking interferometers and low-powered solid state transmitter-receiver components 14 p2244 A66-28405
 Space research activities in Rumania 15 p2599 A66-29896
 British space research for 1965-66 including rocket development, satellite tracking, solar radiation, ionospheric sounding, etc 15 p2599 A66-29898
 Finnish space research program in 1965, outlining optical satellite tracking experiments by various observatories 15 p2600 A66-29906
 Space research in Hungary in 1965 including satellite tracking, ionospheric sounding, solar activity, etc, noting international data transmission 15 p2600 A66-29907
 Pakistan space program including rocket soundings, satellite tracking, meteorological research, etc 15 p2601 A66-29913
 Satellite range measurements using laser in conjunction with photoelectric receiver and Baker-Nunn camera 15 p2453 A66-29998
 High resolution density data from radar observations of low altitude, polar orbiting satellites reveal longitudinal and geomagnetic variation, noting regression analysis 15 p2497 A66-30085
 Satellite perturbation observation in deriving data on Earth shape, aerodynamic drag and radiation pressure 16 p2654 A66-30993
 CNES network of stations for FR-1 and D-1A, discussing checks of proper functioning, orbital corrections, telemetry, ground control, etc 18 p3094 A66-33978
 Mounting problem for land-borne and ship-borne antennas for tracking synchronous, subsynchronous and other communications satellites 18 p3070 A66-34263
 Large aperture millimeter wave antenna

- for high resolution tracking measurements and real-time data reduction 18 p3084 A66-34303
- On-line computers in steerable aerial control system for satellite tracking 18 p3073 A66-34314
- Cassegrain satellite tracking antenna with 40-ft diameter, considering reflector geometry and feed design 18 p3085 A66-34319
- High-power feed for satellite tracking radar using four-way static split system with Cassegrain antenna and four symmetrical horns, noting phase shift errors 18 p3086 A66-34324
- Ground stations used in telemetry, tracking and remote control of French satellites 18 p3071 A66-34466
- Phase comparison telemetry consisting of passive VHF receivers and CW transmitters for satellite detection 19 p3301 A66-35692
- Determination method for acquisition time, azimuth of satellite and duration of contact between tracking stations and satellites in general elliptic orbits 19 p3305 A66-36619
- Three-station range trilateration for establishing orbit of visible satellite used for calibrating ground tracking network 20 p3514 A66-37223
- Theoretical positions of instantaneous pole and velocity determinations on arc along artificial satellite apparent orbit 20 p3653 A66-37764
- Photoelectric photometer used for tracking entry of artificial satellites into shadow of Earth 20 p3518 A66-37839
- Computation of adjusted coordinates of artificial Earth satellites on basis of synchronous observations made at two known points on Earth 20 p3654 A66-37840
- Cameras for recording data related to orbit of Earth satellites, noting technique in which tracks on photograph are chopped into discrete segments of length related to satellite velocity 20 p3560 A66-37841
- Influence of errors on geocentric position of satellite calculated in accordance with INTEROBS program 20 p3654 A66-37844
- Coefficients associated with near-resonance conditions with geopotential harmonics of order 12 in data obtained by tracking satellite 1965 89A 22 p3903 A66-39685
- Tracking data for Lunar Orbiter I producing first estimate of overall gravitational field of Moon, noting spacecraft will not impact on Moon before completing photographic mission 22 p3979 A66-40302
- Tesseral harmonics of Earth gravitational field camera tracking of five satellites 23 p4066 A66-41847
- SATELLITE TRACKING AND DATA ACQUISITION NETWORK**
- S RANGE AND RANGE RATE TRACKING**
- SATELLITE TRANSMISSION**
- Wideband FM transmitters and RF-to-RF repeaters for space application in S-and X-band frequency ranges 01 p0032 A66-11129
- International TV communications using satellite relaying systems noting Telstar, Relay and Syncom satellites and frequency sharing, video bandwidth, etc 02 p0190 A66-11519
- Communications satellite transponder discussing system requirements for RF conversion and amplification 04 p0492 A66-13595
- Processing satellite data at Goddard Center noting Tiros IR data, cloud pictures and Imp measurements 06 p0837 A66-15933
- Frequency-dependent ionospheric refraction effects on Doppler shift of satellite signals 08 p1181 A66-18714
- Artificial satellites detected by influences on ionosphere through 20-mc WWV bursts 08 p1181 A66-18750
- Faraday rotation analysis of single frequency radio transmission from satellites to determine local electron density 08 p1181 A66-18752
- Limiting frequencies of above-ground trajectories for ionospheric radio propagation, estimating attenuation and coverage of satellite radiation 08 p1186 A66-19781
- Design feasibility of dipole antenna for measuring electric fields at VLF from satellite moving through ionosphere 09 p1340 A66-19848
- Shock wave frontal ionization effect on electromagnetic transmission and reception from telemetering equipment on ELDO satellite launching vehicle 09 p1406 A66-19851
- Dividing filter facilitates simultaneous transmission and reception of data between Telstar satellite and ground station at Raisting 09 p1364 A66-20590
- Satellite emission of variable frequency signal guided by ionization irregularity existing along force line of geomagnetic field 09 p1374 A66-20886
- Integrated electron content of ionosphere determined from measurements of polarization angle received from Syncom III transmissions, presenting mean diurnal variation 10 p1528 A66-21148
- Worldwide navigation system based on measurement of Doppler shift of stable signals transmitted from orbiting satellites, noting refraction, ship motion, air drag, timing, etc 10 p1554 A66-21512
- Telemetry systems for data transmission from satellites, discussing modulation techniques for noise elimination and flexibility 12 p1812 A66-23570
- Signal amplitude of Transit IVA satellite recorded at two stations, using time difference between observing similar fluctuations in fading period to determine height of ionospheric irregularities 12 p1874 A66-24843
- Oscillations of vertical component of ionospheric refraction measured, using cliff radio interferometer and signals from satellites 13 p2020 A66-25223
- Atmospheric refraction data acquisition using radiating source, receiver/transmitter and receiver/recorder satellites 14 p2285 A66-27842
- Satellite emitted radio wave propagation mechanism based on radio wave paths in horizontally inhomogeneous spherically stratified ionosphere with variable electron density 15 p2447 A66-28492
- Digital measurement of differential Doppler effect using transposition of phase relation of two HF signals into audiofrequency band 15 p2453 A66-30070
- Temporal variation in scintillation rate spectrum of satellite signals analyzed in auroral zone 16 p2691 A66-30231
- Ground-reflected wave effects and regular fading superposed on Faraday fading observed in signal strength recordings from Transit IVA and Explorer XXII 16 p2692 A66-30333
- Vista satellite and transmitter for color television transmission from satellites 17 p2875 A66-32503
- Satellite signals wave polarization by ionosphere above 18 p3106 A66-34366
- Limiting frequencies of above-ground trajectories for ionospheric radio propagation, estimating attenuation and coverage of satellite radiation 21 p3703 A66-38777
- Data processing of signal reception from Soviet satellites indicates radio signals scintillation caused by diffraction of waves from ionospheric nonuniformities 22 p3866 A66-40467
- Observed Faraday polarization variation of satellite transmission radio signals due to ionospheric irregularities, latitudinal electron density variations and antenna geometry readout error 22 p3867 A66-40556
- Diurnal variation of ionospheric irregularities, using differential Doppler method for analysis of data transmitted by Beacon satellite 24 p4200 A66-42596
- SATURATION**
- SA SUPERSATURATION**
- Amplification factor of semiconductors for direct interband transitions and saturation effect 01 p0124 A66-10766
- Room temperature capacitance voltage characteristics and built-in diffusion voltages in n Ge-n Si double saturation heterojunction 09 p1411 A66-19912
- Amplification factor of semiconductors for direct interband transitions and saturation effect 11 p1748 A66-22277
- Threshold studies of ion laser oscillations in sulfur and saturation and quenching of laser intensity 13 p2102 A66-26209
- Diffusion saturation of industrial iron, molybdenum, Kh18N9T steel and ZrS6-K alloy with powdered beryllium mixture 15 p2520 A66-28538
- Microwave spectrometer technique using nonlinear properties of resonance saturation in gases for detection of absorption lines 15 p2501 A66-29006
- Collision broadened linewidth and saturation parameters for 6328 angstrom transition of Ne in He-Ne laser 16 p2718 A66-31084
- Saturation problem for middle sections of CO solar spectral lines, using thin layer absorption concept 18 p3232 A66-34482
- Micromagnetic theory of ferromagnetics, discussing magnetization curve, saturation and hysteresis effects 19 p3439 A66-35714
- Continuous channel electron multiplier operated in pulse saturated mode, noting space charge limiting as major cause of gain saturation 19 p3359 A66-35911
- Saturation induced optical nonreciprocity in He-Ne ring laser plasma, eliminating frequency locking by using Faraday effect 24 p4221 A66-42552
- IR GaAs laser amplifier with gains as high as 2000, output powers of 150 mw and saturation occurring with current increase at low light levels 24 p4223 A66-42562
- SATURN I LAUNCH VEHICLE**
- Base thermal environment measured on flight tests of eight-engine LOX/RP-1 propelled Saturn I booster [AIAA PAPER 65-212] 14 p2391 A66-27873
- SATURN IB LAUNCH VEHICLE**
- Automated techniques for providing reliability assurance in launch operations of Saturn IB space vehicle system 01 p0052 A66-10112
- Atmospheric environment effects on Saturn IB launch vehicle design, showing density profiles for various altitudes and listing extremes of thermodynamic variables at specific altitudes [AIAA PAPER 66-347] 12 p1906 A66-24479
- Increased payload capability of Saturn IB launch vehicle by addition of zero stage to core vehicle which ignites before first stage [SAE PAPER 660451] 17 p3017 A66-33160
- Instrument unit analysis for Saturn IB/V program, noting environmental, guidance and flight control, electrical systems and countdown procedure 19 p3354 A66-35469
- Upgraded saturn IB launch vehicle, examining payload augmentation by propellant substitution, S-IB stage propellant tank extension and addition of strap-on solid propellant rocket motor [SAE PAPER 660462] 24 p4281 A66-42396
- Trajectory and performance analysis instrument unit and payload envelope for Saturn IB space vehicle program 24 p4282 A66-42694
- SATURN /PLANET/**
- Discrepancy between derived temperature for cloud tops of Jupiter and Saturn and expected value for model in simple equilibrium with solar radiation attributed to presence of ammonia 04 p0579 A66-14180
- Optical thickness, phase variation and albedo of rings A and B of Saturn 05 p0758 A66-14804
- Disappearance of Saturn rings every 15 years due to profile view, thinness and lack of self-luminosity 07 p1136 A66-17813
- Saturn ring stability examined, using model stabilized by gravitational dilution and random particle motions 11 p1769 A66-22530
- Disappearances of Saturn rings during 1966, including table of Earth and Sun passages across Saturn plane from 1840 to 2000 13 p2188 A66-26320
- Spectral study of Jupiter, Saturn and rings of Saturn, determining methane concentration in cloud layers 20 p3647 A66-37035
- Cylindrical functions for calculating free oscillations of Saturn rings and estimation of upper limit to mass of ring if motion is stable against axisymmetric perturbations 23 p4125 A66-41063
- Planetary scale atmospheric circulations of Jupiter and Saturn using fluid dynamics, noting rotation effects 23 p4129 A66-41679
- Spacecraft system concepts for mission to Saturn 24 p4282 A66-42692

SATURN V LAUNCH VEHICLE

Launching facilities for space rockets including buildings, assembly and test program and platforms for Saturn V Moon shot 01 p0054 A66-10873

Out-of-position gas metal-arc and gas tungsten-arc welding of fuel and LOX tanks of S-IC Booster for Saturn V 02 p0235 A66-11467

Saturn V diphasic data modem, describing computer system for prelaunch checkout 06 p0868 A66-15989

Hydraulic system supporting Apollo/Saturn V space vehicle tested to determine bending and flexuring in flight 14 p2226 A66-28031

Manufacture engineer role in producing space vehicles, noting S-IC stage of Saturn V launch vehicle 15 p2511 A66-29834

Man-machine system in control and guidance of Saturn V launch vehicle, emphasizing participation during atmospheric phase of flight profile 18 p3242 A66-33847

Automatic telemetry checkout station for Saturn V systems using real time signal digitizer and general purpose computer 19 p3339 A66-35677

Reliability program, determining assurance and stabilization trend by analysis of lots applied to testing high reliability parts for Saturn V inertial guidance system 20 p3357 A66-37934

Flight control system of Saturn V launch vehicle, discussing attitude/attitude rate scheme, gain required and stability achieved 21 p3820 A66-38875

Hydraulic support system for free-flight simulation with Saturn V-Apollo vehicle, discussing stability requirements, upper bounds of system design, conversion from nonlinear to linear model, etc 21 p3722 A66-38876

Guidance, navigation and two phases of targeting of Saturn V lunar landing mission, analyzing launch, boost to orbit and iterative guidance 21 p3768 A66-38898

SATURN LAUNCH VEHICLE

Objectives, effectiveness and results of reliability program at Kennedy Space Center /KSC/ referring to Saturn launches 01 p0141 A66-10106

Fluctuating pressures at surface of Saturn vehicle studied by use of 2.75 percent models in wind tunnel 01 p0005 A66-10125

Dry dock assembly for post-Saturn launch vehicle, noting economic advantages over land launch procedure 02 p0214 A66-11512

Apollo Extension Systems program for exploiting capabilities in Saturn/Apollo space vehicle system 02 p0293 A66-11617

Structural, propulsion, guidance and flight control systems of Saturn IB and V Apollo launch vehicles 02 p0294 A66-11629

Automatic testing and evaluation system for launch-vehicle digital computer and data adapter of Saturn IB/Saturn V guidance system 04 p0507 A66-13612

Dynamic excitation by ground winds of large Saturn type launch vehicle structures 05 p0770 A66-15270

Saturn Launch Vehicle Program technical equipment and engineering techniques for solving structural, propulsion, launch and control problems 06 p0959 A66-16496

Pulse-radar altimeter for Saturn launch vehicle incorporating molecular and monolithic integrated circuits 08 p1225 A66-19521

Iterative guidance law for Saturn launch vehicle for lunar landing, examining trajectory optimization 08 p1253 A66-19539

Automated ground station, with computer controlled telemetry system, for Saturn launch vehicle checkout 09 p1347 A66-20675

RF transmission through plasmas created by rocket exhaust of Saturn vehicle [AIAA PAPER 65-185] 12 p1820 A66-24690

Test program evaluating protective clothing and safety equipment for personnel working in Saturn booster at minus 100 F in oxygen-rich or deficient environment, noting problems with communications, visibility, breathing, etc 12 p1810 A66-24958

Transonic wind tunnel studies of ground-wind loads on aeroelastic models of Saturn launch vehicle, investigating structural damping, wind velocity and azimuth angle 14 p2270 A66-28021

Saturn launch vehicle flight control system model based on rigid-body control law 15 p2605 A66-28747

Flexible commutation system for routing numerous signal-carrying leads to centrally located multiplexer for Saturn 16 p2649 A66-30540

High energy missions for Saturn such as solar system probes, cometary intercepts, flights to Earth-Moon libration points, etc [SAE PAPER 660448] 18 p3246 A66-33894

Saturn launch vehicle, discussing methods of increasing payload capacity, engine improvements, propellant substitution, etc [SAE PAPER 660453] 18 p3246 A66-33896

Implementation and individual units design for DATA-CORE telemetry processing system utilized in data acquisition and processing from Saturn/Apollo 19 p3307 A66-35708

Heating from Saturn solid propellant S-II and S-IVB ullage motor exhausts and S-IB, S-IVB and Centaur retro motor exhaust theoretically and experimentally analyzed [AIAA PAPER 66-653] 19 p3479 A66-36600

Cryogenic propellant program for Saturn applications, discussing stringent purity requirements and magnitude of applications 20 p3541 A66-37080

Leak-rate transducers capable of aerospace flight detection of small gas flow rates in critical joints of Saturn engine systems 20 p3557 A66-37215

Alternate mode of operation for minimizing occurrence of delays caused by launch support equipment failures for Saturn manned missions 20 p3542 A66-37243

Atoll computer programming language for spacecraft checkout systems and automatic support operations in Saturn launch vehicle 20 p3544 A66-38257

Liquid hydrogen tank insulation constructed of honeycomb core containing polyurethane foam for S-II booster 22 p3997 A66-39892

Saturn booster recovery by means of drag balloon which converts to hot air balloon for final recovery 22 p3987 A66-40608

Saturn computer design and fault simulation on IBM 7090 22 p3871 A66-40744

Welding, thermal flux control and contamination prevention of Saturn rockets, particularly fusion welding 23 p4073 A66-41534

Launch vehicle and spacecraft cost trends including larger vehicles, post Saturn phase, performance improvement by throttling, etc [SAE PAPER 660463] 24 p4281 A66-42394

Minuteman first-stage or Titan III-C strap-on solid rocket motors provide additional thrust to intermediate vehicle comprised of S-II and S-IVB [SAE PAPER 660442] 24 p4281 A66-42395

SATURN S-IB STAGE

Cleaning procedures for Saturn S-IB tubes with specifications on cleaning equipment, solutions, etc 22 p3922 A66-40042

Up-rated Saturn IB launch vehicle, examining payload augmentation by propellant substitution, S-IB stage propellant tank extension and addition of strap-on solid propellant rocket motor [SAE PAPER 660462] 24 p4281 A66-42396

SATURN S-IC STAGE

Welding of aluminum alloy for S-IC stage of Saturn-Apollo space vehicle 16 p2713 A66-30592

Production cleaning of propellant tank of Saturn S-IC 17 p2929 A66-32205

SATURN S-II STAGE

Stabilization and control of Saturn S-II engine actuation system and application to other hydraulic positioning servos, reducing position errors 01 p0015 A66-10669

Saturn S-II stage project uses ground testing of flight vehicle to achieve high statistical confidence in high reliability 20 p3572 A66-37951

SATURN S-IV STAGE

Reliability design concepts in cryogenic fluid systems in Saturn S-IV stage propulsion system, noting hydrogen and LOX tank pressurization systems 01 p0129 A66-10079

Flight tests and observations with S-IV stage of Saturn I carrier rocket, discussing design, reliability, developmental problems

and difficulties 05 p0770 A66-14674

Base heating in Saturn S-IV stage from exhaust reversal, comparing flight and scale model data 05 p0770 A66-15037

[AIAA PAPER 66-45]

Saturn IVB vehicle constraints noting burning time, associated design problems, performance requirements, propellant management, etc 18 p3245 A66-33889

[SAE PAPER 660441]

Saturn S-IV and S-IVB liquid hydrogen tank internal insulation, using polyurethane foam reinforced with fiberglass threads 20 p3675 A66-37068

SATURN S-IVB STAGE

Saturn S-IVB stage adaptation for complete stage recovery by incorporating modification kit including all recovery system elements 17 p3016 A66-32372

Saturn S-IV and S-IVB liquid hydrogen tank internal insulation, using polyurethane foam reinforced with fiberglass threads 20 p3675 A66-37068

Contractor components/parts reliability program for Douglas S-IVB stage project 20 p3586 A66-37880

Saturn S-IVB stage adaptation for complete stage recovery by incorporating modification kit including all recovery system elements 22 p3986 A66-39776

SCALAR MAGNETIC FLUX

Amplitude and phase selection for maximization of directivity of scalar radiation point source 16 p2745 A66-30266

Megagauss magnetic field generation by explosives and related experiments - Conference, Frascati, Italy, September 1965 21 p3773 A66-39501

Chemical energy conversion to electromagnetic energy by flux compression, discussing process and obtained efficiency 21 p3698 A66-39502

SCALE

SA TIME SCALE

Decimal scaler including pulse shaper accepting sharp pulses and any form signals 03 p0344 A66-13096

SCALE EFFECT

Similarity criteria, showing that scale effect in fatigue fracture is caused by distortion of similarity 07 p1147 A66-18386

Titanium oxidation characteristics, determining activation energy of scale formation, oxygen absorption of base metal and total oxygen 09 p1389 A66-20613

Absorption

Satellite picture interpretation of cloud patterns, emphasizing scale identification and dependence on other meteorological parameters 11 p1726 A66-22308

Low energy proton damage to partially shielded solar cells, noting invalidity of simple area scaling law in predicting decrease in open circuit voltage 17 p2849 A66-33113

SCALE HEIGHT

Effective ion mass in upper ionosphere from electron-density profiles obtained from Alouette satellite, compared with theory 04 p0517 A66-14177

Improved HF prediction using ray tracing techniques to determine F-2 layer scale heights and scale height h for alpha-Chapman electron density distribution 08 p1217 A66-19218

Exospheric temperature, scale heights and mean molecular weight up to 3500 km derived from satellite accelerations in 1964 15 p2484 A66-28819

Correlation of geomagnetic index and plasma scale height in topside ionosphere observed from Alouette topside sounder and planetary geomagnetic data 18 p3169 A66-34517

Atmospheric density and scale height from satellite 1964-30A decay 19 p3463 A66-35922

Physical structure of upper atmosphere given by pressure and density scale heights and mean molecular mass due to diffusion 19 p3349 A66-36348

Alouette I topside ionograms analyzed, discussing mathematical procedures and digital computer programs in use and orbit and electron density profiles 22 p3909 A66-39973

SCALE MODEL

Preliminary mobility tests of scale model lunar roving vehicle

[SAE PAPER 660147] 07 p1017 A66-17250
Microthrust engines used in subscale investigations of adjacent spacecraft surface heating by control rocket plume impingement and nozzle wall heating [AIAA PAPER 65-584] 19 p3449 A66-35597
Thermal scale modeling of modified prototype of Mariner Mars 64 spacecraft used to predict inside temperature of spacecraft [AIAA PAPER 65-386] 19 p3468 A66-35622
Thermal-vacuum performance testing of scaled models as technique for reducing development costs of spacecraft 22 p3888 A66-40211

SCALING
Cyclotron radius, magnetospheric boundary and Debye length scaling parameters for magnetospheric cavity arising from solar wind-induced geomagnetic storm and visibility of quasi-Van Allen belts 14 p2269 A66-27124
Traveling wave tubes scaled about one order of magnitude in frequency and several orders of magnitude in power level 24 p4187 A66-43190

SCALING LAW
Aircraft damage scale constructed from photographs of accident-involved aircraft by method of equal-appearing intervals 02 p0177 A66-11831
MHD generator characteristics, temperature and pressure requirements and scaling laws it obeys, temperatures above 2000 degrees K needed for efficiency 11 p1638 A66-22241
Plasma flow processes in slp type traveling wave accelerator investigated to determine degree to which one-dimensional channel flow is used in design and scaling laws 23 p4053 A66-41917

SCANDIUM COMPOUND
Optimum conditions for preparation of complex carbide alloys containing scandium carbide 07 p1049 A66-17903
Optimum conditions for preparation of complex carbide alloys containing scandium carbide 21 p3752 A66-39403

SCANNING
SA CONICAL SCANNING
SA FREQUENCY SCANNING
SA OPTICAL BEAM SCANNING
SA PANORAMIC SCANNING
SA RADAR SCANNING
Analog computer techniques applied to find roots of complex functions, to generate complex functions by Cauchy integral theorem and to scan z 10 p1507 A66-21693
Multiple element swept-lobe interferometer for study of solar radio bursts 13 p2084 A66-26569
Optimal scanning problem variant with simple analytical solution, determining cessation moment 20 p3537 A66-37110
Electronically-scanned K-band passive phased array for spaceborne radiometry 22 p3882 A66-40752

SCANNING DEVICE
SA HORIZON SCANNER
SA IMAGE TRANSDUCER
SA INFRARED HORIZON SCANNER
SA INFRARED SCANNER
Advanced integrated landing system /AILS/ consisting of azimuth and elevation ground station, ground display site and airborne unit, emphasizing scanning-beam technique 01 p0101 A66-10034
Reggia-Spencer phase shift for X-band scanning antenna 01 p0042 A66-10581
Scan system used on Mariner IV Mars probe to search for, acquire and track planets so that pictures of surface can be taken 01 p0073 A66-11120
Free oscillation device for studying dynamic stability of models in hypersonic range of intermittent wind tunnels 02 p0210 A66-11210
Photoelectric area scanner enables observer to scan linearly chosen area of sky, using narrow slit 02 p0232 A66-12210
Coma-corrected, mono- and multifrequency diffraction reflector antennas, examining feed system, electronic scanner and aberrations 05 p0648 A66-14911
Electro-optical scanning system for multiangular strain measurements 05 p0682 A66-15302

Blake procedure effectiveness and applicability in computing beam loss of radars, extrapolating for rapid-scan systems 06 p0832 A66-16452
Sky scanner to record luminance distribution over entire sky vault 06 p0883 A66-16948
Minimum dispersion of estimate of angular coordinate of target fluctuating in unison with pulse scanning radar 07 p1001 A66-17358
High resolution solid state precision star tracking system using magneto-resistance multiplier and image dissector phototube 08 p1250 A66-19349
Angular sectors of transparency of scanning antennas with periodic waveguide 11 p1666 A66-22718
Scanning electron microscope observation of electrical leakage paths due to crystal defects in silicon diodes 11 p1668 A66-23028
Electro-optical celestial guidance system with minaturized computer and scanning sensor 12 p1909 A66-24104
Fresnel zone beam scanning antenna array, considering patterns, maximum scan ability and effect of interelement spacing 12 p1841 A66-24633
Image dissector for lunar observation in conjunction with Earth-based telescope, noting efficiency of resolution contrast sensitivity 12 p1893 A66-24678
Atomic oxygen night sky emission observations with pressure scanning Fabry-Perot interferometer 12 p1873 A66-24837
Partial dislocation detection in silicon, using scanning electron beam technique 13 p2159 A66-25069
Electron-beam-controlled CRT scanlaser 13 p2091 A66-25557
180-stage integrated thin film scan generator, noting design characteristics 14 p2247 A66-27033
Internally and externally observable mutual coupling effects and seriousness in closely spaced arrays used for electronic scanning application 15 p2456 A66-28583
Helicopter rotor blade applied as scanning radar antenna, noting performance during flight tests, feasibility, etc 17 p2875 A66-32727
Scanning microscope for studying Si p-n junctions by electron or ion bombardment 17 p2927 A66-33454
Scanning electron microscope observations of p-n junctions using small periodic bias voltages 17 p2988 A66-33457
Pseudorandom scanning of uniformly dense rectangular frame 18 p3078 A66-34080
High scanning frequency for transmitting radar information to vehicles with beam arranged to form coded pulse signal 18 p3070 A66-34257
Solid state time domain multiplexers using advanced devices 19 p3321 A66-36670
Scanning antenna operating principles, noting adjustment of directivity to receive radio waves from long distance 20 p3530 A66-37713
Frequency scanned antenna with dielectric loaded waveguide, discussing experimental results 20 p3531 A66-37729
Electron beam scanlaser based on laser cavity directly and/or transversely degenerate having Q-spoiled for all modes but one 20 p3581 A66-38244
Sideral anisotropy indicated for charged galactic cosmic radiation obtained by celestial scanning, using narrow angle muon telescope 21 p3808 A66-38466
Electronic scanning spectrometer for use as in-vacuum UV radiation monitor 22 p3918 A66-40230
Probability ratio sequential detector for use with mechanically scanned surveillance radars 23 p4045 A66-41323
Angular sectors of transparency of scanning antennas with periodic waveguide 23 p4045 A66-41456
Moving source scanning spectrometer for ballistic range radiometry noting spectral resolution, operation and performance characteristics 24 p4208 A66-42180

Scattering parameters for design of HF transistor circuits 22 p3877 A66-40334
Scattering mechanism in space charge region as possible explanation of temperature fluctuations of carrier mobility in n- and p-type indium arsenide 23 p4115 A66-41829

SCATTERING AMPLITUDE
Position, number and type of potential scattering amplitude as function of complex momentum transfer 14 p2330 A66-27018
Electromagnetic wave scattering and depolarization from rough surface, noting existence of surface current vector component pointing in direction of incident wave 14 p2235 A66-27038
Generalized Cauchy representations and resonance phenomena 16 p2747 A66-30637
N/D and determinantal methods of partial wave dispersion relations applied to Yukawa potential scattering 18 p3138 A66-34453

SCATTERING COEFFICIENT
Correlation of large and small scale roughness for plane wave scattering from rough surface 03 p0335 A66-12818
Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 11 p1666 A66-22720
Geoscience information acquisition by radar return studied by means of terrain target scattering coefficients /scatterometry/ 14 p2244 A66-28407
Geophysical rocket determination of aerosol scattering coefficient variation from brightness values at 70-450 km heights 15 p2495 A66-30057
Electromagnetic scattering by obliquely oriented cylinders, noting extinction efficiency, propagation in cylindrical waveguides and polarization reversal 20 p3603 A66-38403
Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 23 p4045 A66-41458
Multiple air scattering in mesosphere as function of zenith distance of Sun and brightness of twilight sky 23 p4087 A66-41803

SCATTERING CROSS SECTION
Polarization and exchange effects in slow electron scattering from lithium and sodium 03 p0393 A66-12325
CW-equivalent radar cross section measurements of reflectivity of body by short pulses 03 p0332 A66-12429
Electromagnetic wave reflection from rough surface 04 p0481 A66-13748
Cold neutron scattering by hydrogen in liquid argon, calculating scattering cross section and length for monatomic liquid 04 p0548 A66-13810
Molecular collision cross sections discussing vibrational excitation of carbon dioxide by collision with molecular hydrogen 04 p0548 A66-13811
Anisotropy of scattering in tellurium, correlating cyclotron frequency data and galvanomagnetic measurements 05 p0738 A66-15353
Variation of scattering cross section with

- beam intensity for ruby laser light on atomic hydrogen 05 p0698 A66-15864
- Scattering and conversion cross section for inhomogeneous plasma in presence of electron collision 07 p1084 A66-17529
- Nonlinear effects of induced scattering of oscillations of plasma particles, examining influence on dynamics of beam instabilities 07 p1086 A66-17649
- Electromagnetic wave scattering by satellite caused by ionized coating, noting effect on echo 08 p1182 A66-18754
- Cross section measurement for electromagnetic backscattering of laser beams from rough aluminum and magnesium oxide surfaces 08 p1182 A66-18930
- Effect of turbulence intermittency on scattering of electromagnetic waves by underdense plasma 08 p1263 A66-19148
- Acoustic and optical phonon drag of pure ionic n-type semiconductors having NaCl structure, calculating kinetic coefficients 08 p1273 A66-19252
- Plasma oscillation of valence electrons and exciton in alkali halides, measuring differential cross section, dispersion relation and loss peak in spectrum 09 p1430 A66-20844
- Anisotropy of scattering in tellurium, correlating cyclotron frequency data and galvanomagnetic measurements 09 p1431 A66-20894
- Scattered Lyman alpha radiation measurements near Earth and in interplanetary space by Zond I, using NO-filled photon counters with LIF windows 10 p1596 A66-21049
- Relaxation to steady state, electron collision ionization, recombination and collision cross section uncertainties in conducting nonequilibrium plasma stream [AIAA PAPER 66-193] 10 p1562 A66-21439
- Imaging and altimeter-type radar employed in orbiting spacecraft for high resolution mapping, scattering cross section studies, climatology, etc 10 p1532 A66-21521
- Integral equation method solution of scattering from cylinders with arbitrarily varying anisotropic surface impedance 10 p1497 A66-21591
- Analytical techniques for estimating backscattering cross section of metal spherical target 10 p1497 A66-21593
- Geometric diffraction theory to predict radar cross section of cones and disks 10 p1498 A66-21597
- RAT SCAT cross section facility, examining location and range geometry, equipment complement, calibration, measurement errors, etc 10 p1519 A66-21604
- Scattering of electromagnetic wave by metallic sphere loaded with circumferential slot in presence of electric field 10 p1499 A66-21611
- Scattering range which measures reflection properties of objects by inserting them into transmission line 10 p1501 A66-21624
- Variational method of computing radar scattering cross sections to bistatic scattering cross section for chaff dipoles 10 p1503 A66-21643
- Electromagnetic wave scattering from very rough surfaces, noting contribution of small and large scale roughness to scattered power 10 p1504 A66-21658
- Elongation of characteristic curve of polarization for interstellar particles due to surface molecular scattering 11 p1769 A66-22535
- Boltzmann equation behavior, at large Knudsen numbers, for free molecular interactions with infinite collision cross section 11 p1691 A66-22918
- Laser scattering by bound charged particles 11 p1713 A66-23080
- Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112
- Nonequilibrium internal distributions effect on rates of chemical gas-phase exchange reactions 11 p1650 A66-23212
- Surface roughness and tolerances in model scattering experiments, noting shape perturbation consequences, frequency characteristics wave behavior, etc 11 p1658 A66-23406
- Backscattered and surface fields for acoustically hard and soft prolate spheroids at end-on incidence computed, using tabulation of spheroidal functions 12 p1815 A66-24119
- Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering error due to unequal scattering of primary and secondary particles 12 p1918 A66-24876
- Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 12 p1918 A66-24882
- Numerical values describing molecular rainbow scattering in Airy approximation for 12-6 potential 13 p2130 A66-25379
- Atmospheric observation with advanced light radar, noting equipment characteristics, molecular scattering mechanism, etc 13 p2122 A66-26133
- Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193
- Differential scattering of ionized helium on neon and argon and ionized argon on argon measured at various relative energies and scattering angles 13 p2135 A66-26269
- Rayleigh scattering intensities in upper atmosphere 13 p2075 A66-26737
- Elastic electron scattering cross sections for titanium relative to C and Be measured, using linear electron accelerator 14 p2337 A66-27795
- Multiple scattering of energy from inhomogeneous media, comparing discrete point scatterer behavior with bulk scatterer 14 p2240 A66-27915
- Ion beam elastic scattering cross section for proton-helium systems 14 p2337 A66-27978
- Numerical solution of integral equation for diffraction by soft strip applied in wave scattering by obstacles with dimensions comparable to wavelength 14 p2325 A66-28399
- Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29545
- Microwave scattering from large amplitude oscillations in cesium plasma, noting cross section magnitude and nonlinear effects 15 p2556 A66-29810
- Scattering of light from pulsed ruby laser by plasma jet, noting cross section, electron-phonon interaction, etc 16 p2716 A66-30139
- Long-range interatomic forces from thermal energy spectra, elastic scattering cross sections for atomic beams and limiting curve of dissociation 16 p2751 A66-30161
- Total and differential scattering cross section for slow electron calculation, using nonrelativistic quantum mechanics, shown to be erroneous 16 p2751 A66-30172
- Atomic scattering from perfect crystal, considering effects of absorption potential, surface vibrational modes momentum and energy exchange etc 16 p2752 A66-30389
- Recording of light-induced light scattering using laser beam, calculating cross section of photon-photon scattering 16 p2748 A66-31175
- Monograph on intensity distribution and polarization of scattered radiation in ozone absorption bands at selected levels of terrestrial Rayleigh atmosphere 16 p2698 A66-31226
- Radiative flux divergence for lower few centimeters of atmosphere, accounting for combined effects of water vapor, particle absorption and scattering 16 p2699 A66-31640
- Electric field dependence of piezoresistance in germanium, noting correlation with intervalley scattering in energy balance 16 p2788 A66-31778
- Scattering cross section for Langmuir waves and transverse waves using nonlinear integral equations describing plasma interaction of electromagnetic waves 17 p2873 A66-32238
- Fabry-Perot etalon use for interferometry and laser control, noting low angle scattering, laser oscillation, thermal tuning sensitivity, etc 17 p2925 A66-32619
- Extrema-effect in total elastic molecular beam scattering cross sections for characterizing potential well 17 p2961 A66-32860
- Harmonic series solution for electromagnetic scattering by unidirectionally conducting helical sheath when incident field is E-polarized 18 p3065 A66-33530
- Geometric diffraction theory and radar cross section estimation from rectangular flat plate scattering measurements 18 p3065 A66-33537
- Tropospheric scatter application for beyond horizon communication between Earth and satellite or aircraft 18 p3067 A66-33899
- Effect of angular resolving power on measurement of total atomic scattering cross sections 18 p3114 A66-34707
- Primary cosmic ray energy spectrum measurements via Proton I satellite, noting inelastic interaction cross sections, chemical composition, etc 18 p3175 A66-34746
- Fluctuation scattering and absorption cross section derived for space and time dispersive plasma 18 p3149 A66-34914
- Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050
- Angular scattering of reflected radio waves from ionosphere, giving results of 300 cases 19 p3344 A66-35266
- Numerical integration based on definition of Riemann integral, describing application to nonlinear integral equations of isotropic scattering of radiation in plane parallel atmosphere 19 p3388 A66-35830
- Effect of binding on distribution in angle of charged particles having suffered scattering with lattice atoms 19 p3403 A66-36172
- Cross sections for vibrational excitation of water by collision with water and molecular hydrogen calculated, using radial scattering equations 19 p3403 A66-36330
- Surface roughness effect on radar backscattering cross section of conducting spherical target examined by applying Kirchhoff method 19 p3304 A66-36407
- TE wave scattering by dielectric cylinder of arbitrary cross section shape, including effects of surface wave excitation and mutual interaction 19 p3304 A66-36408
- Induced scattering of electromagnetic waves from magnetoactive plasma particles 19 p3418 A66-36533
- Neutral-impurity scattering experiments in silicon with highly spin-polarized electrons 19 p3448 A66-36764
- Optical phonon production, showing existence of electric field strength range at low temperature scattering in which phonon emission results in electron stoppage 20 p3577 A66-37376
- Book on tropospheric radiowave propagation, discussing diffraction theories, scattering phenomena, transhorizon propagation, etc 20 p3520 A66-38091
- Sudden approximation applied to rotational transition probabilities and inelastic total cross sections for scattering of homonuclear diatomic molecules by atoms 21 p3774 A66-38526
- Pauli paramagnetism effect on magnetic properties of high field superconductors, noting spin-orbit scattering 21 p3797 A66-38557
- Omnidirectional characteristics of scattering of acoustic waves from statistically rough surfaces, measuring scattering cross section as function of incidence and observation angles 21 p3770 A66-38649
- Scattering and transformation of electromagnetic waves during critical fluctuations in nonequilibrium plasma 21 p3789 A66-39065
- Collision integrals, effective cross sections and deflection angles for Morse potential calculated, using dimensionless relative kinetic energy of pair of atoms 21 p3775 A66-39073
- Coupled equations for open-channel components of wave function derived in total-angular-momentum representation in Feshbach approach to scattering theory for rigid rotator and atom 22 p3950 A66-39914
- Diurnal variation in electron densities and temperatures in F region above Puerto-Rico,

using backscatter measurements 22 p3910 A66-39978
 Cross section of slow neutron scattering in superconductors and polarization of scattered electrons 22 p3964 A66-40308
 Millimeter waves applications in atmospheric research, discussing radar meteorology, forward scatter or troposcatter and passive or radiometric techniques 22 p3869 A66-40731
 Scattered particle intensity inside and outside finite medium determined from Maxwell and Schroedinger equations 22 p3975 A66-40954
 Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering error due to unequal scattering of primary and secondary particles 23 p4097 A66-41083
 Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 23 p4097 A66-41089
 Absorption cross section, scattering cross section and angular scattering distribution of solid alumina particles emitted in homogeneous solid propellant rocket plume 24 p4294 A66-42778
CATTERING FUNCTION
SA MIE SCATTERING FUNCTION
 Nonlinear scattering effect of Langmuir oscillations on electrons of plasma located in strong magnetic field 01 p0115 A66-11055
 Positron scattering by atomic hydrogen for various incident energies 02 p0262 A66-11476
 Piezoresistance of doped n-type germanium, determining nature of carrier scattering mechanism in degenerate materials and modification of conduction-band edge resulting from impurity states 03 p0412 A66-13148
 Anisotropic effect of interelectronic scattering on semiconductor conductivity of ellipsoidal isoenergetic surface 09 p1411 A66-19981
 Tropospheric wave propagation, splitting and scattering, transport equation, diffusion, Fokker-Planck approximation, etc, for random continuous medium 11 p1654 A66-22634
 Dispersion and absorption of hypersonic waves analyzed by examining Brillouin scattering as function of scattering angle 13 p2133 A66-26167
 Positron-helium scattering below positronium threshold, using adiabatic method previously tested in positron hydrogen scattering, presenting phase shifts and momentum transfer cross section computations 13 p2134 A66-26262
 Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 14 p2325 A66-27536
 Stimulated Brillouin scattering in ferroelectric triglycine sulphate crystals and Rochelle salt exhibiting second-order phase transition, measuring scattering threshold as temperature function 20 p3620 A66-37770
 Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 24 p4233 A66-42322
 Anisotropic thermoelectric power in semiconductors as result of combined phonon and impurity scattering or in presence of carrier with anisotropic effective mass 24 p4252 A66-42352
CATTERING MATRIX
 Symmetric conference matrices applied to conference telephony where lossless n-port operating between resistive terminations divides incoming power 07 p1057 A66-17749
 Target scattering matrix generalized to include dependence upon radar polarization, determining matrix through two successive transmissions at orthogonal polarizations 10 p1499 A66-21603
 Scattering matrix use to determine radar reflectivity independently from polarization, target range and rotation about line of sight 10 p1499 A66-21609
 Radar polarization scattering matrix invariance properties of elliptic and circular polarized antenna 10 p1500 A66-21619
 First order error analysis, radar antenna calibration technique and polarization scattering matrix 10 p1501 A66-21627
 High RF magnetotonic propagation effects

on polarization scattering matrix 10 p1501 A66-21628
 Anechoic chamber facility for surface field measurement in scattering studies using probes 10 p1520 A66-21638
 Radar scattering matrix measurements, predicting radar cross section of body for arbitrary polarization 10 p1502 A66-21639
 Object identification system using multiple observations of scattering matrix, noting noise magnitude role in recognition 10 p1503 A66-21640
 Electromagnetic wave scattering from very rough surfaces, noting contribution of small and large scale roughness to scattered power 10 p1504 A66-21658
 Matrix analysis of scattering from conjugate-matched antenna 11 p1662 A66-22541
 Complex normalization of scattering matrices, noting application to impedance transformation 11 p1678 A66-23239
 Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 13 p2026 A66-26249
 Scattering matrix of slot waveguide calculated, using mirror image method 14 p2252 A66-27250
 Design of lossless junction, given one row in scattering matrix 14 p2268 A66-27965
 Limiting cases of screened Coulomb T matrix in complex energy plane 15 p2547 A66-29618
 Reflection and transmission matrices for computing thick layer properties 16 p2749 A66-31639
 Scattering matrix properties of symmetrical octopoles 17 p2898 A66-33519
 Lumped network theory, calculating scattering matrix of n-gate device from reference impedances of different scattering matrix 19 p3330 A66-36652
 Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 22 p3947 A66-39708
 Radar scattering equations for transmitting and receiving circularly polarized waves in terms of characteristics for linear polarization 24 p171 A66-42374
 Scattering matrix analysis of single frequency Michelson type He-Ne gas laser, including frequency and amplitude stability analysis of oscillation 24 p4223 A66-42566
 Anomalous circular polarization of hydroxyl radical 18-cm radiation from cosmic sources 24 p4272 A66-43188

SCF

S SELF-CONSISTENT FIELD /SCF/

SCHEDULING

Parameters of satellite communication system control and scheduling function, emphasising distinction between scheduling method and scheduling algorithm [AIAA PAPER 66-288] 12 p1822 A66-24759
 Aircraft utilization and schedule planning, optimum use of flight performance, ground equipment, facilities and personnel [SAE PAPER 660279] 15 p2427 A66-29824
 Possible sustentation of observing behavior in pigeons by stimuli of chain schedule or by stimuli correlated with passage of time in interval schedules 24 p1687 A66-42366

SCHLIEREN PHOTOGRAPHY

SA SHADOW PHOTOGRAPHY

Schlieren photographic technique using photoelectric scanning device with photomultiplier, rotary mirror and oscillograph 01 p0067 A66-10372
 Schlieren interferometer operating with one prism and single passage 02 p0229 A66-11566
 Structure and function of wind tunnel used in supersonic combustion processes 04 p0572 A66-13538
 Schlieren color photography with tri-color filter, identifying small density gradient 07 p1018 A66-17614
 Onset of retonation, laser technology and high repetition-high resolution schlieren stroboscopic wave phenomena 08 p1318 A66-19200
 Wave front reconstruction /holography/, hologram production, interferometry,

schlieren photography and shadowgrams applied to fluid mechanics 10 p1536 A66-21750
 Shock tube study of irregular reflection of strong shock waves in carbon dioxide, nitrogen and air 11 p1629 A66-22335
 Vibrational relaxation of hydrogen mixed with argon in shock tube studied by schlieren technique 11 p1739 A66-22886
 Optical system for schlieren recording, deflection mapping, shadowgraphy and interferometry achieved for laser light, used in recording of refractive index fields 13 p2082 A66-26307
 Schlieren photographs of turbulent hypersonic wakes behind cones and spheres at various Mach numbers and pressures, analyzing laminar wake core, wake diameter and distance to transition 13 p1992 A66-26664
 Schlieren system for flow visualization 14 p2270 A66-27817
 Laminar jets in nitrogen from DC plasma torch analyzed, using schlieren and spectroscopic techniques, noting jet form dependency on Reynolds number 14 p2344 A66-27849
 Schlieren photographs of spark ignition in turbulent gas mixture flows and analysis of ignition delay and burning velocity 15 p2616 A66-29069
 Shock transition in multihead spin structure of self-sustaining gaseous detonations in oxyacetylene mixtures, including interferometric and schlieren photographic density, temperature and pressure measurements 15 p2618 A66-29607
 Schlieren photographs from holograms, apparatus and method 16 p2707 A66-31092
 Flow visualization in compressible fluids, examining optical techniques and Toepler schlieren system 18 p3094 A66-34134
 Shadowgrams, schlieren photographs and interferograms produced from reconstructed wavefront 19 p3354 A66-35386
 Schlieren photographs of plasma discharges in parallel plate rail tube, using pulsed ruby laser as light source 23 p4104 A66-41510
 Compressible and incompressible flows made visible by optical method sensitive to density variations, shadowgraph, schlieren system, Mach-Zehnder interferometer and holographic interferometry with lasers 24 p4192 A66-43196

SCHMIDT METHOD

Asymmetric nonuniformly spaced antenna array design by orthogonal function expansion of radiation pattern, using Schmidt orthogonal method 12 p1836 A66-24301

SCHOTTKY EFFECT

Field and thermionic emission responsible for excess currents in Schottky barriers formed on doped semiconductors 19 p3434 A66-35345
 Photoresponse measurements of depletion capacitance and diffusion potential of GaP Schottky-Barrier diodes 20 p3534 A66-38390
 Deep centers in conducting n-type GaAs and production of Schottky layer 22 p3963 A66-40088

SCHROEDINGER EQUATION

Partial wave calculation of diatomic divalent molecular /HeH/ ion 04 p0547 A66-13643
 Amplitude and phase of anharmonic oscillator, using relativistic Schroedinger equation in magnetic field 05 p0695 A66-14906
 Bracketing theorem applied in partitioning technique for solving Schroedinger equation to determine upper and lower bounds to energy eigenvalues, ground and excited states 06 p0911 A66-16166
 Plasma interaction of rapid movement of object with electrically conducting surface through ionized gas, representing particle motion by Schroedinger equation 06 p0917 A66-16400
 Wave functions and Franck-Condon factors for transitions in molecular nitrogen obtained by Numerov integration of Schroedinger equation 09 p1404 A66-20411
 Numerical method of Schroedinger equation and WKB approximation compared in determination of transmission coefficients for thin insulating films 10 p1577 A66-21558
 Electron correlation theory in nonclosed-shell states, discussing orbital wave

- functions and perturbation theory 13 p2130 A66-25376
- Low energy atomic collisions, considering Schroedinger equation for proton interchange 13 p2130 A66-25380
- Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 13 p2026 A66-26249
- Resonance transformation of light in molecule, using Schroedinger wave equation 15 p2544 A66-29197
- Schroedinger equation in semiconductor with N atoms containing dislocation, vacancy or other defect, noting phase shift and local charge neutrality 16 p2775 A66-30730
- Impurity energy levels in semiconductors described by equivalent Schroedinger equation containing short-range as well as conventional terms for long-range Coulomb potential 16 p2784 A66-31446
- Normal ordering method of solving boson equations leading to closed solutions of Schroedinger and density operator equations in certain cases only 17 p2945 A66-32293
- Resonance transformation of light in molecule, using Schroedinger wave equation 17 p2961 A66-33046
- Solution of Schroedinger equation for quantum mechanical reflection coefficient of electrons at metal semiconductor barriers 19 p3435 A66-35409
- Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 22 p3947 A66-39708
- Scattered particle intensity inside and outside finite medium determined from Maxwell and Schroedinger equations 22 p3975 A66-40954
- Time dependent Schroedinger equation for Bloch electron in presence of laser field, using WKB approximation method, compared with perturbation theory 23 p4077 A66-41266
- Inadequacy of Corson variational principle as foundation of classical and quantum dynamics 24 p4237 A66-42406
- SCHULER TUNING**
- Schuler tuned inertial system as flight sensor and control of VTOL aircraft translational velocity during hover phase and landing 07 p1070 A66-17724
- SCHUMANN MODE**
- Schumann resonances of Earth ionosphere cavity and excitation by lightning flashes 04 p0474 A66-13427
- Schumann-ELF natural background samples recorded in three components at separated points resolved by analog and digital methods into constituent modes for comparison 12 p1815 A66-24115
- SCHUMANN-RUNGE BAND SYSTEM**
- Absorption coefficient of oxygen gas Schumann-Runge continuum, using microsecond flashing source 18 p3137 A66-33988
- SCHWARTZ INEQUALITY**
- Estimates of solutions to second order differential equations generalized to include inequalities with Schwarz derivative numbers 12 p1902 A66-23768
- Pointwise bounds for solutions to Cauchy problem for elliptic systems of partial differential equations, using extension of Payne and Trytten results 19 p3388 A66-35487
- SCHWARTZ METHOD**
- Transformation matrix converting phase variable form into Schwartz form for application to Liapunov function and Hurwitz criterion 19 p3392 A66-36742
- SCHWARZSCHILD METRIC**
- Gravitational interaction and gravitational waves discussing Schwarzschild metric, weak interaction, spinor field and free neutrino wave 04 p0546 A66-14315
- Kinematics of collapse and discussion of observable properties of baryons and collapsing stars 05 p0757 A66-14524
- Retarded observer time as coordinate in relativistic spherical hydrodynamic equations prevents Schwarzschild surface formation 11 p1772 A66-22779
- Coordinate transformation of Schwarzschild metric for gravitational field of oblate Earth and equatorial satellite orbits into symmetric metric 13 p2187 A66-26137
- Light propagation through Schwarzschild singular sphere, solving problem of visual image of emitting surface of gravitating sphere as seen by observer 16 p2748 A66-31171
- Elliptic Kruskal-Schwarzschild space, discussing identification of points which limit Kruskal space into Minkowski space 19 p3389 A66-35942
- Rotating masses effect on inertial frames, analyzing stress energy tensor and Schwarzschild geometry 22 p3979 A66-40113
- Electromagnetic field of concentric rotating mass shells, noting Machian effects on cosmological models with near-Schwarzschild radius 22 p3948 A66-40525
- SCIENCE / GEN /**

- SCINTILLATION**
- Scintillation hypothesis giving physical characteristics of quasars, determining energy output by star accretion 01 p0138 A66-11034
- Discrete radio source scintillation, considering irregular diffraction pattern caused by ionospheric irregularities 04 p0575 A66-13380
- Pulse heights produced when argon, nitrogen and argon-nitrogen mixtures completely stop alpha particles 09 p1405 A66-20680
- Directional intensity and decay time of scintillations from anthracene and p-terphenyl single crystals under alpha particle bombardment 11 p1750 A66-22465
- Electron irregularity size and motion in interplanetary medium determined from radio source scintillation phenomena 13 p2182 A66-25571
- Scintillating target intensity effect on performance of PPM optical tracker used as error sensor in various guidance systems 13 p2125 A66-25985
- Latitudinal variations of ionospheric irregularities studied via synchronous and 1000 km satellites, noting Early Bird data, scintillation index graphs, radio star signals, etc 15 p2496 A66-30071
- Temporal variation in scintillation rate spectrum of satellite signals analyzed in auroral zone 16 p2691 A66-30231
- Ground-reflected wave effects and regular fading superposed on Faraday fading observed in signal strength recordings from Transit IVA and Explorer XXII 16 p2692 A66-30333
- Horizontal dimensions of ionospheric irregularities determined from differences in angular diameter observed in discrete radio sources 18 p3108 A66-34533
- Scintillation analysis of hard X-radiation from high power pulse discharges 22 p3952 A66-39753
- Data processing of signal reception from Soviet satellites indicates radio signals scintillation caused by diffraction of wave from ionospheric nonuniformities 22 p3866 A66-404
- SCINTILLATION COUNTER**
- Location and radiation intensity variations in upper radiation belts determined, using scintillation counters aboard Cosmos satellites 05 p0754 A66-154
- Fast and slow neutrons detected in proportional and scintillation counters 05 p0755 A66-154
- Instrumentation used in analysis of short periodic and microvariations of cosmic ray intensity, noting supermonitor with scintillation counters, photomultipliers, etc 06 p0951 A66-165
- Vertical intensity and angular distribution of penetrating cosmic ray muons measured by scintillators, Geiger counters and neon flash tubes, underground in India 06 p0877 A66-170
- Balloon-borne scintillation counters combined with Cerenkov counter for measuring primary cosmic ray charge and energy spectra during 1963 07 p1123 A66-179
- Scintillation observations of satellite signals noting latitude, diurnal, seasonal and sunspot cycle variations 08 p1183 A66-1920
- Construction, testing and performance of apparatus consisting of six liquid scintillation counters for underground cosmic ray analysis 08 p1286 A66-1983
- Efficiency of scintillation neutron counters determined as function of neutron energies ranging from 20 to 70 mev 09 p1380 A66-2035
- Slow neutron scintillation counter using photomultiplier with nonactivated dynode with low amplification factor to measure very low intensity ion beams 09 p1380 A66-2035
- Gamma radiating debris cloud of high altitude nuclear explosions scanned by gamma scintillation detector assembled into directional uranium shield 12 p1878 A66-2369
- Scintillation counter for extensive air showers, noting time-analysis channels for determining pulse delays, monitoring unit unit calibrating amplitude channels, etc 12 p1881 A66-2418
- Operation of scintillation and Cerenkov counters used for recording cosmic radiation, noting design, amplitude properties, collection of scintillating light from phosphor, etc 12 p1882 A66-2418
- Short period variations in cosmic ray intensity, using neutron monitors, cubic telescopes, etc, analyzed with superhigh statistical precision 12 p1943 A66-2418
- Efficiency of large-size liquid scintillation detectors compared to other particle detectors 12 p1882 A66-2418
- Experimental data concerning electron photon and muon components of extensive air showers, noting scintillation counters, Geiger-Muller counters, muon detectors, etc 15 p2579 A66-29523
- Hodoscope recordings of extensive air showers with abnormally low content of penetrating particles 15 p2579 A66-29523
- Multiple muon events at sea level and association with air showers detected, using Geiger and scintillation counters 15 p2580 A66-29533
- Scintillation height measurement, noting irregularity distribution during various ionospheric conditions 16 p2691 A66-30231
- Muon interactions in scintillator stacks analyzed for average shower development noting agreement with theories 18 p3228 A66-3391
- Cosmic ray electron component intensity measurements by instrument consisting of telescope made of two scintillation counters 18 p3187 A66-3481
- Balloon-borne scintillation counter measurements of isotopic composition energy/nucleon and rigidity spectra of primary cosmic helium nuclei 18 p3193 A66-3484
- Underground scintillator stacks used to study coincidence events caused by muon extensive air showers, noting muon shower energy and grouping 18 p3204 A66-3509
- Energy flow variation of high energy nuclear active particles in EAS measured by

scintillation detectors in
 solivia 18 p3205 A66-35099
 Scintillation counter observation of EAS
 ore structure and high energy
 interactions 18 p3207 A66-35106
 Electromagnetic interactions and collisions
 of particles in cores of EAS studied, using
 M counters, plastic scintillators and Wilson
 cloud chambers 18 p3207 A66-35107
 EAS core fine structure observations using
 spark chamber compared with response of
 plastic scintillation
 counter 18 p3207 A66-35108
 Transition region of pulse spectrum from
 AS particle density recordings by
 yerenkov and scintillation
 detectors 18 p3207 A66-35110
 Cerenkov and scintillation counters
 responses to electron-photon
 AS 18 p3208 A66-35113
 Airborne scintillation counter-spark
 chamber observations of particle energy
 flow and incident zenith angle distribution
 of air showers 18 p3211 A66-35131
 Electromagnetic interactions of muons
 analyzed underground using scintillator
 stack, deducing energy of cascade shower
 from size 18 p3221 A66-35199
 Classification of underground
 electromagnetic shower events due to muon
 interactions in scintillator
 stack 18 p3221 A66-35200
 Cosmic ray intensity measured
 underground by scintillation counter, noting
 pulse height conversion into digital
 form 18 p3222 A66-35206
 Rate of stopping positive pions measured
 by observing decay pulses in scintillation
 counter, identifying events with muon and
 electron pulses 18 p3222 A66-35210
 Pulse shape discrimination technique using
 scintillation counter, distinguishing events of
 nuclear disintegration from those due to
 minimum ionizing
 particles 18 p3115 A66-35229
 Scintillation and semiconductor counter -
 symposium, Washington, D.C., March
 1966 19 p3358 A66-35906
 Possible enhancement to low-energy
 atmospheric proton flux induced by passage
 of Ikeya-Seki comet examined, using
 balloon-borne scintillation counter and pulse
 height analysis
 techniques 20 p3631 A66-37617
 Rocket instrumentation for galactic X-ray
 observation, noting scintillation counter,
 proportional counter and GM
 counter 20 p3636 A66-38237
 Cosmic ray intensity recorded with
 scintillation counter corrected without
 stabilizing efficiency of counter by
 recording changes, using pulse height
 spectrum 20 p3562 A66-38433
 Pulse amplitude measurement from
 scintillation cosmic-ray
 counter 22 p3920 A66-40771
 Distributions of extensive air showers with
 either fixed number of charged particles or
 muons, using Geiger counter and
 scintillation counter 24 p4268 A66-42914
 Installation
 Large scintillation counter design with one
 photomultiplier 24 p4214 A66-42945
SCINTILLATION SPECTROMETER
 Cosmic ray contribution to background of
 NaI scintillation spectrometers noting
 counting rate, surrounding material and
 atomic number 05 p0678 A66-14967
 Spectral energy loss rate of cosmic ray
 muons measured in plastic
 scintillator 15 p2589 A66-29587
 Spectral ballistic camera instrument
 providing relative intensity data and
 scintillation information on missiles and
 missile body 21 p3735 A66-38607
SCINTILLATOR
 Large polystyrene scintillator for cosmic
 ray detector
 measurement 01 p0071 A66-11038
 Large polystyrene scintillator for cosmic
 ray detector
 measurement 11 p1708 A66-23284
 Manufacture of scintillator in form of
 synthetic sheets differing in area and
 thickness, polymerizing styrene between
 metallic or glass sheet 13 p2077 A66-25325
 Scintillators stable at 110 degrees C from

styrene/divinyl benzene copolymers and
 additions of phosphors, establishing optimum
 thermal conditions for block polymerization
 and determining luminescence
 yield 13 p2077 A66-25326
 Photomultiplier tube socket assembly with
 high gain and clean output signals for
 viewing organic scintillator light
 pulses 16 p2702 A66-30429
 Response to EAS electron-photon cascade
 of plastic scintillator, cloud chamber and
 Geiger counter tray 18 p3208 A66-35112
SCORPIO CONSTELLATION
 Optical observations of brightest X-ray
 source in Scorpius 17 p2992 A66-31917
 X-ray emission from Scorpio X-1,
 discussing origin of extar and possible role
 in stellar evolution 18 p3166 A66-34158
 Exponential spectrum of Scorpius XR-1 to
 50 kev observed by
 balloon 23 p4124 A66-41819
SCORPIO PROJECT
 Project Scorpio USAF Cellular Combustion
 Chamber Program for cost reduction and
 injection pattern simplification in liquid
 propellant rocket engines 20 p3629 A66-38256
SCR
S SILICON CONTROL RECTIFIER
 /SCR/
SCRAMJET ENGINE
 Supersonic combustion ramjet engine
 /scramjet/ for hypersonic flight noting fuel
 injection, chemical kinetics, combustor
 cooling, mixing processes and
 measurements 05 p0745 A66-15272
 Scramjet design and combustion testing in
 hypersonic wind tunnels with arc-heating
 and MHD accelerators 06 p0805 A66-16320
 Scramjet performance at high hypersonic
 speeds noting integration with waverider
 vehicle, hydrogen fuel, drag forces effect,
 test program, etc 09 p1435 A66-20671
 Supersonic combustion for possible
 application to ramjets, considering
 propulsion aspects and combustion in
 supersonic stream 11 p1761 A66-23249
 Scramjet aircraft performance capabilities,
 noting operating parameters such as thrust
 coefficient, flight velocity, acceleration, fuel
 consumption, etc 13 p2173 A66-26032
 Model tests on free jet scramjet facility
 configurations at high Mach numbers,
 obtaining data on bypass flow pressure
 recovery and diffusion process
 [AIAA PAPER 66-745] 22 p3846 A66-40632
 Model determination of effects of injecting
 and mixing fuel in inlet diffuser of two-
 shock inlet hypersonic ramjet or scramjet
 [AIAA PAPER 66-648] 24 p4261 A66-42641
SCREEN
 Radiation field and surface waves
 generated by linearly phased electric line
 current and electric current component
 oriented in plane parallel to unidirectional
 conducting screen, solved by modal
 method 11 p1652 A66-22549
 Design, performance and application of
 multicell luminous-symbol screen with
 optically coupled photosemiconductive and
 electroluminescent films 14 p2297 A66-28112
SCREEN EFFECT
 Screen defects of various size and shape,
 effect on ultrasonic pulses for approximate
 solution of diffraction problem of elastic
 waves 01 p0077 A66-10419
 Modes existing in infinite parallel-plate
 waveguide with centrally placed
 unidirectional conducting
 screen 02 p0198 A66-11578
 Screen defects of various size and shape,
 effect on ultrasonic pulses for approximate
 solution of diffraction problem of elastic
 waves 11 p1705 A66-22604
 Inhomogeneity, transparency and
 ionospheric ion density parameters for
 screening and semitransparent sporadic E
 layers 12 p1873 A66-24686
 Screening effect of meteoritic particles, ice
 grains and ice-coated dust particles
 entrained in outgoing gases of comets,
 determining particle size and numbers from
 momentum/energy
 balance 22 p3983 A66-40697
 Screening function of interacting electron
 gas at high and metallic densities by many-
 body perturbation theory 24 p4236 A66-42294

SCREENING TECHNIQUE

Thermionic and photoelectric screening of
 electric charge on metallic spherical object
 moving in rarefied ionized
 medium 06 p0919 A66-16906
 Screening tests to predict potential ability
 of persons to be trained as aerial photo
 interpreters 18 p3061 A66-33744
 Mariner 1964 parts screening program
 including philosophy, program
 implementation, screening results and
 conclusions 24 p4178 A66-42089
 Apollo spacecraft parts screening program,
 showing dependence on reliability for
 mission success 24 p4216 A66-42090

SCREW DISLOCATION

Chemical nature and origin of solid
 particles formed in primordial solar nebula,
 examining growth mechanism based on
 screw dislocations present in preplanetary
 nebula 05 p0767 A66-15753
 Concave-convex growth spirals due to
 screw dislocation in nickel
 bromide 15 p2563 A66-28730
 Linearized theory of coupled stress
 elasticity and stress distributions around
 simple edge and screw
 dislocations 15 p2609 A66-29241
 Polycrystalline nickel aluminate lightly
 deformed at 77, 298 and 900 degrees K
 exhibit fine slip band structure with mostly
 screw dislocations 18 p3121 A66-33747
 Electron energy spectrum of silicon,
 examining effect of screw dislocations
 parallel to crystallographic
 direction 21 p3803 A66-39296

SE-210 AIRCRAFT

S SUD-AVIATION SE-210 AIRCRAFT

SEA

S OCEAN

S SUDDEN ENHANCEMENT OF
 ATMOSPHERICS /SEA/

SEA KING HELICOPTER

S SH-3 HELICOPTER

SEA LAUNCH

Dry dock assembly for post-Saturn launch
 vehicle, noting economic advantages over
 land launch procedure 02 p0214 A66-11512

SEA WATER

Amino acids dissolved in saline waters
 removed by ligand exchange
 chromatography 11 p1650 A66-23128
 Sea-water embrittlement of titanium alloy
 cantilever beam specimens as affected by
 aluminum content, aging, beta stabilizers
 and cooling 19 p3379 A66-35660

SEALANT

Polytetrafluoroethylene as material for seal
 application 04 p0526 A66-13786
 Microirregularity lubrication to improve
 reliability of liquid lubricated rotary shaft
 face seal
 [ASME PAPER 65-LUB-11] 04 p0527 A66-14244

Carbon seals for gas turbine evaluated in
 statistically designed test
 method 08 p1232 A66-19381
 Microirregularity lubrication to improve
 reliability of liquid lubricated rotary shaft
 face seal
 [ASME PAPER 65-LUB-11] 12 p1888 A66-24550

Compressible metal for turbine seal,
 discussing Nicoseal coating used in sealing
 clearance between rotor and adjacent
 stationary parts 13 p2109 A66-25777

Adhesives and sealants in electronics,
 discussing resin elastomers, epoxies,
 polyurethanes, polysulfides, outgassing,
 damping, radiation effects,
 etc 14 p2318 A66-27103

Seal performance optimization, noting
 alignment, lubrication, gasketing, balance, etc
 [ASLE PAPER 66AM 2C2] 16 p2711 A66-30407

Noncontact liquid and vapor screw-type
 shaft seals in potassium cooled and
 lubricated electric power generator for
 space environment, noting dynamic slinger
 seal and viscoseal 16 p2714 A66-30627

Shaft sealing systems on centrifugal
 compressors, noting labyrinth, restrictive
 ring shaft, liquid film and mechanical and
 special seals
 [ASME PAPER 66-MD-42] 21 p3742 A66-38490

Optimum seal and sealants for joints and
 connections in spacecraft 22 p3927 A66-40285

SEALING

SA HERMETIC SEAL
SA PUMP SEAL
SA SELF-SEALING
Shaft seals to contain liquid metals in mechanisms exposed to space environment 03 p0374 A66-13108
Oil seals such as lip seal discussing structure, performance factors and materials used 04 p0525 A66-13781
New materials in compression packings and O rings such as fibers, metals, plastics and homogeneous materials 04 p0525 A66-13782
Mechanical end face seals covering design, operation, parameters, materials used, advantages and limitations 04 p0525 A66-13784
Adiabatic laminar flow in concentric sleeve seal where rotating shaft changes fluid temperature and viscosity [ASLE PREPRINT 65AM 4C3] 08 p1232 A66-19382
Dimensional stability and structural integrity of labyrinth seals, considering various mechanical design criteria in application to aircraft gas turbines [SAE PAPER 660048] 09 p1383 A66-20150
Qualities required of materials for joint sealing, particularly elastomers, noting properties and possibilities 12 p1899 A66-23818
Increasing sturdiness of glass-to-metal seals in cesium vapors 15 p2429 A66-29707
Design and construction of 10 ft diameter bakeable UHV all metal seal, taking into account thermal stresses and effect on flanges 16 p2712 A66-30455

SEAPLANE
New STOL flying boat with deflected slipstream, boundary layer control and spray suppressor in flight test of 75 percent flying model [AIAA PAPER 65-755] 03 p0321 A66-13056
New STOL flying boat with deflected slipstream, boundary layer control and spray suppressor in flight test of 75 percent flying model [AIAA PAPER 65-755] 23 p4015 A66-40984

SEARCH RADAR
Discrete stepwise-proportional-search system, discussing optimum parameter determination 06 p0862 A66-16525
Comparing search radar performance against targets with cross section fluctuations described by Swerling cases 1 and 3 09 p1342 A66-19931
Clear air turbulence detection with laser Doppler optical radar [AIAA PAPER 66-374] 12 p1818 A66-24498
Discrete stepwise-proportional-search system, discussing optimum parameter determination 16 p2670 A66-30835
Surveillance radar optimization by separating search and tracking functions and controlling operation of radar by tracking computer 20 p3520 A66-38141
Wide angle side lobe reduction in radar antennas, considering gain, high directivity, target detection and signal interference 22 p3878 A66-40545

SEASLUG MISSILE
Guidance system for British Navy antiaircraft missile Seaslug using Cartesian control beam-riding, noting simulation testing 07 p1079 A66-18327

SEASONAL VARIATION
Seasonal variations of cosmic ray intensity in stratosphere compared with temperature variation in atmosphere 02 p0281 A66-11333
Photographic, photometric and polarimetric observation of Mars from 1954 to 1958 at Pic du Midi noting seasonal variation of surface markings, clouds, diameter, etc 02 p0286 A66-11355
Sporadic E layer characteristics over Sofia and diurnal and seasonal variations in maximum and reflection frequencies 04 p0514 A66-13447
F-layer behavior over Genoa-Monte Capellino noting diurnal and seasonal variation, solar activity, nighttime concentration, spread-F, ionospheric and geomagnetic perturbations 05 p0671 A66-14982
Seasonal variation in short-wave signal absorption at different latitudes reflected in seasonal variation of gas density and ionospheric absorption at D region and

lower E region 05 p0672 A66-15025
Periodic temperature fluctuations in mesosphere based on underground measurements of cosmic ray intensity at Yakutsk, Siberia 06 p0950 A66-16595
Annual variation of wind direction and jet stream across Greenwich meridian 07 p1063 A66-18337
Latitudinal dependence of geomagnetic disturbance magnitude along noon and midnight meridians for different seasons, noting effect on auroral zone 09 p1373 A66-20386
Numerical experiments with large-scale seasonal forcing, treating six different heating fields in general circulation model for periods of five and 100 years 10 p1530 A66-21273
Two-year study of solar seeing conditions with recording monitor near Sydney, Australia indicates average of 23 sec per hour of observation 11 p1768 A66-22365
Seasonal variation of F-region parameters at sunspot minimum, noting effects of ionospheric disturbances 11 p1695 A66-22368
Phillips frequency-dependence rule for sporadic E extended for better statistical coincidence with lower frequency data 11 p1695 A66-22372
Noncyclic variation during magnetically quiet days, examining seasonal changes in geomagnetic field value at night during IGY 11 p1696 A66-22420
Statistical-probability determination of lunar-solar daily and seasonal magnetic variations and geomagnetic effects 12 p1951 A66-24463
Density variation observed from satellites in upper atmosphere 14 p2284 A66-27619
Measuring devices and observational methodology used in determining time variant and cyclic variations in cosmic ray occurrence 15 p2573 A66-28518
Cyclic curves of F-2 layer critical frequencies based on seasonal phase variations in solar cycle 15 p2488 A66-29108
Seasonal-latitudinal variations in lower thermospheric density, temperature and composition 15 p2490 A66-29820
Winter anomaly of nondeviative ionospheric absorption of radio waves and relation to diurnal, seasonal, local and solar cycle variations 15 p2490 A66-29943
Vertical drift of charged particles effect on electron density profile as cause of seasonal variations in ionospheric absorption 15 p2490 A66-29944
Atmosphere models for seasonal and latitudinal variation in thermosphere as function of solar flux and geomagnetic index 15 p2492 A66-30031
Atmospheric density statistics from cumulative frequencies for seasons as function of altitude for design of booster vehicles 16 p2741 A66-30602
4-second summertime micropulsation band at College, Alaska 17 p2918 A66-32526
Anderson hypothesis on semiannual variation in upper atmosphere density and relation to geomagnetic latitude effects, analyzing Samos II motion 17 p2920 A66-33087
Seasonal width and current intensity of equatorial electrojet at different longitudinal zones noting diurnal variations, electrojet parameters, etc 17 p2922 A66-33352
Lunar semidiurnal tides in ionosphere over Puerto Rico determined from electron density profiles for heights between 150 and 300 km 17 p2923 A66-33362
Contribution to dependence of variation of unperturbed ionospheric F-2 critical frequencies on season and solar activity 18 p3105 A66-34097
Two-way sidereal anisotropy vs seasonal modulation of solar daily variation 18 p3178 A66-34764
Annual frequency of noctilucent clouds linked to low temperatures in mesopause region 19 p3345 A66-35396
Comparison of magnitude of collision frequency of electrons in D and E regions obtained by satellites, rockets, etc, with cross sections measured in laboratory 19 p3352 A66-36627
Absorption coefficients for monomers of water vapor and oxygen for various altitudes, noting seasonal

variation 20 p3511 A66-3711
Magnetosphere tail, annual magnetospheric configurative variation and seasonal variation in polar cap magnetic intensity 20 p3657 A66-3822
Semiannual variation in geomagnetic disturbance amplitudes consisting of one-to-one correspondence between average daily amplitude index and solar declination 21 p3732 A66-3861
Mean variation of electron density profile of ionosphere above Lindau/Harz, noting semiannual variation of F-2 layer peak height related to solar activity 22 p3908 A66-3991
Seasonal anomaly of F-2 layer critical frequency partially explained by assumed electron-ion flux flowing between magnetically conjugate points from summer to winter hemisphere 22 p3908 A66-3991
Seasonal, diurnal and latitudinal variation of electron density distributions in topside of ionosphere as revealed by Alouette satellite 22 p3909 A66-3997
Midlatitude ionospheric electron content variation with season and solar cycle 22 p3911 A66-3999
Dependence of seasonal occurrence probability of F-zero layer on level of geomagnetic activity and ionospheric activity observed above 22 p3914 A66-4076
Ashkhabad Steady pearl type oscillations in terrestrial electromagnetic field, noting role of diurnal and seasonal variations 22 p3915 A66-4078
Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-4080
Morning minimum of probability of existence of sporadic E layer and connection with time of sunrise 23 p4065 A66-4182
Daily and seasonal variation of ionospheric distance propagation related to horizontal ionospheric gradients, particularly height of layer on wave path 24 p4174 A66-4273
Emergence and diurnal and seasonal fluctuations of sporadic E layer 24 p4201 A66-4275
Seasonal and diurnal fluctuation of radio wave in ionosphere in connection with fading process of reflected signal 24 p4204 A66-4315

SEASPRITE HELICOPTER
SUH-2 HELICOPTER

SEAT
SA EJECTION SEAT
Airliner seat and galley design, investigating loading and safety, comfort, convertible seats, upholstery, quick-chang seating, etc 21 p3696 A66-3934

SECOND STAGE
Optimum design problems of meteorological rocket Meteor 01 p0144 A66-1106
Solid propellant second stage of Diamant launch vehicle with steerable nozzles 10 p1611 A66-2125
Performance characteristics and specifications of Coralie missile, second stage of ELDO rocket 17 p3015 A66-3236

SECONDARY EMISSION
Momentum spectra of muon flux measured at various angles for production process and environmental influences 01 p0132 A66-1062
Momentum spectrum of muons at large zenith angles and contribution of pion and kaon production 01 p0132 A66-1062
Calculation of neutron generation by muons for various depths in Earth 05 p0755 A66-1540
Pressure dependence of Townsend second coefficient for sparking potential in gases at constant E/p 06 p0911 A66-1628
Second sound in semiconductors, interpreting signal following amplification in CdS crystal as diffraction caused by anisotropy of amplification coefficient 06 p0930 A66-1705
Satellite charge and sheath formation resulting from photoelectric and secondary emission 08 p1302 A66-1874
Secondary illumination effect on intrinsic photovoltage and photocurrent excited in certain spectral region in cadmium sulfide crystals with gold and indium contact 08 p1272 A66-1924
High energy jet showers examined to obtain four momentum transfers and

transverse momentum of recoil
 protons 11 p1763 A66-22706
 Secondary emission effect on LF noises
 near carrier frequency of continuously
 operating high power TWT output
 signal 11 p1655 A66-22724
 Lens technique for measuring yield and
 energy spectrum of secondary electrons
 generated by fission fragments through
 metal foil 12 p1916 A66-23704
 Secondary electron emission in zinc sulfide
 and magnesium fluoride thin dielectric films
 and semiconductor layers due to electric
 field stimulation 12 p1930 A66-24459
 Secondary emission of excited cesium
 atoms during bombardment of molybdenum
 and tantalum by fast cesium
 ions 14 p2338 A66-28248
 Resonance transformation of light in
 molecule, using Schroedinger wave
 equation 15 p2544 A66-29197
 Energy distribution of secondary particles
 emitted in proton stars for very energy range
 proton interactions 15 p2583 A66-29542
 Electromagnetic cascades in Sydney 20-liter
 stack of nuclear emulsion 15 p2583 A66-29544
 Experimental data analysis of cosmic ray
 showers, secondary particle production by
 nucleon-nucleon collision at high energy,
 momentum distribution in pions and primary
 energy-inelasticity 15 p2583 A66-29547
 Electron-photon cascades caused by nuclear
 active component in atmosphere and on
 gamma rays, atmospheric absorption
 spectrum of primary nucleons and
 generation of pions 15 p2584 A66-29556
 Particle energy measurements in high
 energy jets with large stacks of nuclear
 emulsion 15 p2584 A66-29557
 Grain density, scattering and range
 measurements on 22 proton, neutron and
 alpha jets in 22-liter emulsion stack analyzed
 to identify nature of particles emitted in
 extreme backward center of mass angle
 cone 15 p2585 A66-29561
 Energy and angular distribution of meson
 created by 22 gev protons in lithium
 hydride with respect to secondary cosmic
 radiation 15 p2585 A66-29563
 Muon momentum spectrum at various
 zenith angles, noting pion
 derivation 15 p2588 A66-29577
 Energy spectra of neutrinos from
 secondary cosmic-ray decay in Earth
 atmosphere 15 p2590 A66-29646
 Electron secondary emission from
 interaction of ion, atom and molecular
 energetic beams with solids, especially when
 kinetic energy is significant 16 p2776 A66-30796
 Angular dependence of spin-lattice
 relaxation times in ruby evaluated, using
 second order perturbation wave function
 and field coupling representation 16 p2781 A66-31220
 Thin film technology in microwave power
 tubes noting ceramic mounted structures,
 secondary emitters, semiconducting and
 dispersion hardened thin films,
 etc 16 p2665 A66-31432
 Secondary electron interaction with solid
 state plasma, noting energy distribution,
 Boltzmann equation solution,
 etc 16 p2789 A66-31783
 Resonance transformation of light in
 molecule, using Schroedinger wave
 equation 17 p2961 A66-33046
 Secondary breakdown in transistors, noting
 effect of irregularities in collector base
 junction and tunneling sites 17 p2894 A66-33108
 Radiation-induced electroconductivity and
 secondary emission in alkali halide single
 crystals under positive ion
 bombardment 17 p2988 A66-33458
 Azimuthal angular distributions of
 secondary particles in cosmic jets,
 discussing shower particles from fireball
 model 18 p3215 A66-35163
 Absorption path of high-energy protons in
 atmosphere measured by ionization
 calorimeter 18 p3216 A66-35164
 Shower production by pions and protons
 with momenta 0.1 and 20 gev/c in thin
 layers of matter, determining secondary
 particle energies and multiplicities 18 p3216 A66-35166

Nucleon isobar production in
 photoemulsion giving rise to large energy
 transfer to several secondary charged
 particles 18 p3141 A66-35172
 Angular distribution of high-energy jets
 analyzed by kinematic approach, assuming
 constant transverse momentum of secondary
 pions 18 p3217 A66-35178
 Angular distribution of secondary particles
 in multiple production at high energy,
 noting multiplicity and inelasticity
 dependence on primary
 energy 18 p3218 A66-35181
 Muon charge ratio change with energy at
 large zenith angle 18 p3219 A66-35188
 Frequencies of secondary particles and
 penetrating particles, using underground
 scintillators, Geiger counters and flash
 tubes 18 p3221 A66-35202
 Anisotropy of secondary electron emission
 in ion bombarded Si single crystals, using
 electron microscope 19 p3445 A66-36340
 Secondary ions energy spectra dependent
 on incidence angle of primary ions for
 varying escape angles, using molybdenum
 targets 19 p3403 A66-36454
 Secondary electron emission in zinc sulfide
 and magnesium fluoride thin dielectric films
 and semiconductor layers due to electric
 field stimulation 20 p3620 A66-37691
 Production and equilibrium spectrum of
 galactic cosmic ray secondary electrons
 arising from secondary pion and neutron
 decay 20 p3633 A66-38200
 Secondary emission effect on LF noises
 near carrier frequency of continuously
 operating high power TWT output
 signal 23 p4037 A66-41462
 Uniform-current-density thermionic and
 secondary electron emission from dense
 plasma interaction with negatively biased
 solid surface at high temperature under
 high current arc cathode simulated
 conditions 23 p4107 A66-41908
 Phenomenological picture of production of
 secondary particles in nucleon interactions
 at energies of hundreds and thousands of
 bev 24 p4267 A66-42902
 Angular distribution of secondaries in
 elementary multiple high energy production
 event, evaluating expected frequency of
 asymmetrical showers 24 p4267 A66-42905
 Inelastic interactions at ultrahigh energies,
 discussing secondary particle jets production
 moving in same direction as colliding
 particles 24 p4268 A66-42912
SECONDARY FLOW
 Mach number effect on secondary losses of
 straight turbine-blade configuration at high
 subsonic velocities 01 p0007 A66-10924
 Liquid injection thrust vector control
 noting general requirements, injectant
 metering point, stream solidity collimators,
 secondary flow, metering configuration and
 nozzle back pressure 02 p0180 A66-11972
 Performance of supersonic bypass nozzle
 with small and large secondary flow
 evaluated theoretically and experimentally
 [ONERA TP 287] 03 p0316 A66-12897
 Steady secondary flow in stratified fluid in
 rotating frame, noting secondary vorticity
 [ASME PAPER 65-WA/FE-14] 05 p0664 A66-15613
 Secondary flow in fully-developed
 turbulent flow in straight channels, noting
 Reynolds number effect, directional
 characteristics of local wall shear stress,
 etc 06 p0873 A66-16997
 Rotation vector increase derived for
 secondary incompressible fluid flow in
 curved channels 07 p1023 A66-18134
 Schlichting two-dimensional unsteady
 boundary layer problem results extended to
 three-dimensional periodic boundary
 layers 08 p1208 A66-19341
 Flow induction by rotary jets, involving
 isentropic flow deflection followed by
 constant-area mixing 09 p1327 A66-20737
 Secondary flows in turbine cascades,
 obtaining correlations between velocity
 distributions and circulations along span by
 expanding Fourier series 11 p1632 A66-22664
 Secondary flows influence on concentration
 distribution of heavy species in vortex
 comprised primarily of lightweight gas
 [AIAA PAPER 65-582] 12 p1860 A66-23573
 Axisymmetric convection between two
 rotating disks, noting secondary flow and

viscous effects of Ekman
 layers 12 p1980 A66-24941
 Shell with positive curvature and zero
 moment state examined, determining
 sufficient condition for secondary potential
 load 13 p2203 A66-26420
 Decreasing secondary flows in spatial
 boundary layer on porous plate by boundary
 layer control /BLC/ through suction or
 blowing, using Prandtl partial differential
 equations 13 p2065 A66-26460
 Secondary flow in entrance section of
 straight rectangular duct, measuring primary
 and secondary velocities, turbulence, axial
 component, Reynolds stress gradients,
 etc 13 p2070 A66-26714
 Primary and secondary flow interaction in
 plug nozzle, obtaining solutions by iteration
 and isentropic relation 17 p2839 A66-32476
 Secondary flow for supersonic boundary
 layers with or without swept edges, noting
 effect of compressibility and heat transfer
 on reverse flow 17 p2840 A66-32485
 Rotary jet flow induction studied with
 analytical flow model, noting mutual
 deflection of primary and secondary flow
 and jet dissipation 19 p3277 A66-36488
 Incompressible viscous flow around right
 angle corner, noting effect of geometry on
 boundary layer and cross
 flow 24 p4194 A66-42410
 Secondary jets investigated on sharp nosed
 9 degree half-angle cone at Mach 6, noting
 effect on ratio of jet interaction normal
 force coefficient to jet reaction normal
 force coefficient 24 p4158 A66-42791
SECONDARY INJECTION
 Cooling effect of secondary fluid injection
 on heat transfer between shrouded rotating
 disk and radially inward main flow stream
 [ASME PAPER 65-WA/HT-20] 05 p0789 A66-15644
 Thrust-vector control and flow field
 produced by secondary gas injection into
 supersonic stream 08 p1162 A66-18831
 Cooling effect of secondary fluid injection
 on heat transfer between shrouded rotating
 disk and radially inward main flow stream
 [ASME PAPER 65-WA/HT-20] 11 p1785 A66-22194
 Secondary injection control of single
 rocket nozzle roll 17 p3017 A66-33078
 Liquid film cooling of small diameter
 throat tubes 18 p3263 A66-34385
 Free-air thrust vector control using
 secondary injection of air into nozzle flow
 to reduce weight, cost and complexity
 applied to rocket engine
 steering 18 p3247 A66-34953
 Penetration distance for secondary liquid
 injection into supersonic airstream,
 emphasizing jet flow far from injection
 orifice 20 p3548 A66-38151
 Capture effect on I-V characteristics of
 junction diodes and injection coefficients in
 forbidden transition zone 23 p4045 A66-41444
SECONDARY RADAR
 Secondary surveillance radar operational
 implications in technical
 aspects 02 p0192 A66-12013
 Secar or secondary radar for air traffic
 control, noting operating principles,
 structure, etc 09 p1346 A66-20555
 Secondary surveillance radar in aiding
 airport traffic through aircraft transponder
 interrogation 13 p2124 A66-25701
 LF navigation and secondary surveillance
 radar /SSR/ used in commercial helicopters
 of New York airways 14 p2223 A66-27299
 Air traffic control radars, discussing
 airport surveillance radar /ASR/, precision
 approach radar /PAR/ and secondary
 surveillance radar /SSR/ 16 p2666 A66-31444
 Narrow band transmitters for response
 code of secondary radar installations
 containing identity of aircraft and altitude
 for air traffic control 21 p3706 A66-39634
SECTION
S AIRFOIL SECTION
SECULAR PERTURBATION
 Earth magnetic field represented as dipole
 field to study secular variations of
 field 02 p0225 A66-12142
 Terrestrial magnetic field and secular
 variations 04 p0514 A66-13448
 Geomagnetic secular variation data
 analyzed at five observatories indicates high

- significance for amplitudes obtained for 50-year cycle by harmonic analysis 05 p0670 A66-14952
- Secular changes in stratospheric cosmic ray intensity from 1962 to 1964 05 p0754 A66-15397
- Increase with latitude of Forbush effects and secular variations in cosmic ray intensity explained by worldwide data obtained with meson detectors 05 p0754 A66-15398
- Variation in dispersion and asymmetry of F-2 layer critical frequencies, plotting particular secular variations 06 p0950 A66-16593
- Westward drift of secular variations in inclination and alteration of terrestrial magnetic moment estimated from archeomagnetic data 07 p1027 A66-17307
- Equations for variation of orbital elements in two-body problem with variable mass solved analytically for various laws of mass loss, noting periodic function of eccentric anomaly 10 p1605 A66-21205
- Analytical representation of secular variation of geomagnetic field between 1850 and 1950 11 p1696 A66-22422
- Earth magnetic field represented as dipole field to study secular variations of field 14 p2287 A66-28098
- Orbital elements for Telstar communications satellites, using angle only and/or angle range data time as input information 16 p2723 A66-30898
- Secular variations of lunar orbit due to tidal friction 17 p3005 A66-33005
- Secular variations of geomagnetic field before our era studied by method using archeological objects 19 p3345 A66-35273
- Equations describing motion of satellite in Paetzold-Zschoerner model of Earth atmosphere 20 p3654 A66-37848
- Difference assessment between secular and long period perturbations generated by similar initial conditions for celestial mechanics problems 22 p3985 A66-40959
- ### SEDAN PROJECT
- Permanent angular displacement about vertical axis and ejecta-induced impulse associated with Sedan crater formation 08 p1292 A66-19260
- ### SEDIMENT
- Horizontal slot jet mixing effect on sedimentation removal, neglecting boundary shear 13 p2071 A66-26732
- ### SEEBECK COEFFICIENT
- Electrical properties of alpha ferric oxide containing magnesium, noting temperature effect, carrier concentration, conductivity variations, etc 08 p1271 A66-19221
- Seebeck and Thomson coefficients and variable resistivity effects on thermoelectric heat pump performance 09 p1333 A66-20971
- Electronic structure and Seebeck coefficient for chromium-iron alloys from 125 to 625 degrees K, emphasizing phonon drag and electron diffusion 14 p2310 A66-26879
- Seebeck coefficient of germanium films vacuum-deposited on Vycor substrate 15 p2562 A66-28723
- Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427
- ### SEEBECK EFFECT
- #### SA PELTIER EFFECT
- #### SA THOMSON EFFECT
- Resistivity and Seebeck coefficient of liquid thallium-tellurium semiconductors 14 p2366 A66-27760
- Electroconductivity, Seebeck effect and charge carrier mobility in Li-doped NIO 14 p2386 A66-27766
- ### SEEDING
- #### SA CLOUD SEEDING
- Plasma-electromagnetic interaction control by seeding with charged particles to obtain large collision frequency 04 p0480 A66-13626
- Effect of equilibrium crystal seeds on supercooled polyethylene melt and o-xylene solution of polyethylene of same chemical nature 17 p2944 A66-33466
- Seed germination and seedling growth dependence on oxygen, noting microaerobic capabilities among vascular plants, water effect, etc 18 p3059 A66-34204
- Heat transfer rates and two-color temperature measurements for propane-oxygen flame seeded with aluminum powder [WSC1 66-2] 18 p3264 A66-34422
- Dispersal of supercooled fogs over airports by seeding with dry ice [ICAS PAPER 66-7] 23 p4086 A66-41255
- ### SEGREGATION
- Segregation by controlled solidification of small quantities of dissolved tantalum in niobium, using titanium as third component in ternary alloy 12 p1897 A66-24917
- ### SEISMIC ENERGY
- Mechanism for connection between seismic Earth and solar activity on atmosphere and lithosphere of Earth 22 p3914 A66-40767
- ### SEISMIC WAVE
- Isolation of test pads for inertial guidance systems, investigating soil dynamics for proper selection of sites 01 p0052 A66-10039
- Gravimeter monitoring S dilational mode of Earth, consisting of fused quartz operating in high vacuum incorporated into electrostatic null-seeking servo 04 p0524 A66-14453
- Velocity and density perturbation of Earth mantle in inversion of eigenperiods 05 p0673 A66-15046
- Velocity distribution of P and S waves in lunar interior, based on elastic wave propagation in rocks and P and S wave distribution in upper Earth layer 10 p1607 A66-21287
- Seismograph used for measuring natural seismic activity and similar man-made disturbances like large rocket firings, showing propagation of disturbance by ground and not by atmosphere 16 p2677 A66-30448
- Velocity reversals in Earth crust and low velocity zone of upper lithosphere 18 p3104 A66-33913
- Ground tilt isolation platform construction and performance noting design features, performance characteristics and efficiency 21 p3722 A66-38872
- Laboratory equipment protection from vibration environment, noting instrumentation and results 21 p3722 A66-38873
- ### SEISMOGRAPH
- #### SA LUNAR SEISMOGRAPH
- Seismograph used for measuring natural seismic activity and similar man-made disturbances like large rocket firings, showing propagation of disturbance by ground and not by atmosphere 16 p2677 A66-30448
- Spheroidal-type seismogram study of wave generation, propagation, dispersion and attenuation in realistic spherical Earth models, especially Gutenberg-Bullen A-prime model 20 p3550 A66-37433
- ### SEISMOLOGY
- Imaging and altimeter-type radar employed in orbiting spacecraft for high resolution mapping, scattering cross section studies, climatology, etc 10 p1532 A66-21521
- Mathematical models of Mars and Venus computed, using seismology, Earth mean density and Earth moment of inertia 16 p2797 A66-30354
- ### SELECTION
- #### S PERSONNEL SELECTION
- ### SELECTIVE FADING
- Ionospheric drift and radio wave dispersion determined from selective fading records and symmetry of cross correlation functions, using Fourier transforms 22 p3916 A66-40807
- ### SELENIDE
- #### SA CADMIUM SELENIDE
- #### SA GALLIUM SELENIDE
- #### SA LEAD SELENIDE
- #### SA ZINC SELENIDE
- Assembly for determining thermal conductivity coefficients of liquid bismuth selenide-bismuth telluride semiconductor at 970 to 1280 degrees C 06 p0882 A66-16839
- Electron and lattice heat conductivity of mercury selenide crystals 14 p2356 A66-27066
- IR absorption of arsenic monoselenide 15 p2565 A66-29198
- IR absorption of arsenic monoselenide 17 p2982 A66-33047
- Electron and lattice heat conductivity of mercury selenide crystals 22 p3966 A66-40825
- ### SELENIUM
- Diffusion of selenium in cadmium telluride, using radioactive Se as tracer 10 p1574 A66-21353
- Silicon and selenium doping effects on gallium arsenide laser characteristics 10 p1543 A66-21879
- Potential distribution in p-type selenium layer adjacent to n-type cadmium selenide in cut-off direction 11 p1757 A66-23231
- Thallium admixture effect on electrical conductivity of crystalline and liquid selenium, noting decrease and increase in conductivity, determining temperature dependency and activation energy 14 p2359 A66-27177
- Mercury selenium thin film transistors, measuring electric properties 15 p2560 A66-28634
- Pure selenium conductivity, thermal emf and Hall effect 15 p2563 A66-28737
- Quasi-localized states associated with high-energy conduction-band minima in semiconductors, particularly Se-doped GaSb, plotting pressure-dependence of photoluminescence 20 p3618 A66-37598
- Prebreakdown region of selenium rectifiers, using pulse method with exponential pulse leading edge 24 p4254 A66-42426
- ### SELENIUM COMPOUND
- Transverse Dember effect in anisotropy of electrical and photoelectrical characteristics of indium selenide 04 p0565 A66-14259
- Trivalent neodymium in selenium oxychloride, inorganic liquid laser without limitations of europium chelates and matching in threshold and output neodymium-doped crystals 21 p3747 A66-39110
- Performance characteristics of room temperature liquid laser, using trivalent ion neodymium-doped selenium oxychloride 21 p3747 A66-39111
- ### SELENOGRAPHY
- #### SA LUNAR GEOLOGY
- #### SA LUNAR MAP
- #### SA LUNAR SURFACE
- #### SA LUNAR TOPOGRAPHY
- Catalog of all craters in third lunar quadrant recognizable on photographs and having diameter greater than 3.5 km 02 p0286 A66-11465
- Communications of Lunar and Planetary Laboratory 02 p0287 A66-11493
- Lunar topographical asphericity, lunar coordinates, absolute and relative, harmonic analytical interpolation, formations, stratigraphy and optical librations 07 p1139 A66-18265
- Coefficients of expansion into spherical harmonics of Moon surface as presented by selenodetic control system of USAF 08 p1217 A66-19264
- Lunar charting for project Apollo 16 p2743 A66-30669
- Factors affecting determination of selenographic latitude and longitude by astronaut landed on Moon, defining selenocentric system and lunar prime meridian 17 p3001 A66-32344
- Lunar surface, discussing radar scattering, optical scattering, thermal and photographic data, etc 19 p3457 A66-35442
- Lunar models of figure, density distribution and gravity field from Earth telescope data 21 p3812 A66-38822
- ### SELENOLOGY
- Brown lunar theory interpretation of observed lunar motion and associated rectangular-to-polar lunar coordinate transformations 18 p3234 A66-34655
- Digital computer techniques for computation of lunar disturbing function 24 p4273 A66-42204
- ### SELF-ADAPTIVE SYSTEM
- #### SA ADAPTIVE CONTROL
- General Electric self-adaptive control effect on airframe handling quality characteristics in F-4A aircraft 01 p0098 A66-10006
- Evolution of Honeywell first generation adaptive autopilot inner loop and application to F-94, F-101, X-15 and X-20 vehicles 01 p0099 A66-10008
- Self-organizing adaptive systems for spacecraft attitude control in which reward-punishment reinforcement process is used to obtain on-line synthesis of plant actuation signals 01 p0140 A66-10019
- Spectrum analyzer in constructing two-

dimensional self-adjusting system
demonstrated by frequency characteristics
of connected channels and integral
evaluation 04 p0502 A66-13702
Relay correlator for determining frequency
characteristics in searchless self-adjusting
systems under steady
noise 07 p1012 A66-17379
Structure of frequency filters in self-
adaptive circuit 07 p1005 A66-17404
Self-adaptive closed-loop automatic control
systems to produce given or maximum
damping coefficient of free
oscillations 08 p1201 A66-19675
Rms approximation theory applied to linear
self-adaptive models 11 p1674 A66-22360
Free oscillation stability of closed-loop
self-adjusting system with several
parameters, noting two methods of
measuring relative
damping 11 p1677 A66-22760
Automation of control processes -
International Federation on Automatic
Control Congress, Basel, Switzerland,
August-September 1963 12 p1850 A66-24314
Stable self-adjusting system with single
adjustable parameter designed, using inverse
model of desired transfer function of
closed-loop system in feedback control
circuit with large amplification
factor 12 p1851 A66-24315
Discrete and self-adaptive systems -
International Federation on Automatic
Control Congress, Basel, Switzerland,
August-September 1963 12 p1851 A66-24323
Book on theoretical and practical
applications of self-adaptive control systems,
including bibliography 12 p1852 A66-24329
Auxiliary operators used in determining
quality-criterion gradient for control of
adaptive elements in continuously self-
adapting systems 12 p1852 A66-24330
Measuring time as dynamic characteristic
of performance of self-adaptive control
systems 12 p1853 A66-24333
Self-adaptive control system reflecting
internal and external conditions of
operation 12 p1853 A66-24334
Dominant operator method to determine
characteristic of self-adaptive automatic
control system 12 p1853 A66-24335
Discrete self-adaptive servosystem with
nonstationary random useful and noise
signals applied to input 13 p2056 A66-26478
Linearized motion equation of self-adaptive
systems with stabilized frequency
characteristics, considering effect of control
and noise signals in basic control
loop 14 p2265 A66-27525
Coordination of integral and relay
components in algorithms for adjusting
control coefficients in model-reference self-
adaptive control systems described by
differential equations 14 p2266 A66-27526
Spectrum analyzer in constructing two-
dimensional self-adjusting system
demonstrated by frequency characteristics
of connected channels and integral
evaluation 15 p2469 A66-28543
Hill climbing in self-optimizing control
systems, noting effect of sinusoidal
perturbation, application,
etc 16 p2671 A66-31059
Behavior of self-adaptive system under
external periodic action, using point
transformation method 17 p2901 A66-32251
Dynamics of self-adaptive systems with
stabilized frequency
characteristics 18 p3089 A66-33735
System containing reference model with
amplification factor of controller
reconstructed, making system stable or auto-
oscillatory 18 p3091 A66-34990
Functional derivative technique for
designing self-adjusting control systems
having main part implemented by solving
differential equations 19 p3328 A66-36021
only
Synthesis of control systems invariant to
parameter changes, examining sensitivity
and advantages over self-adjusting
systems 19 p3328 A66-36023
Evolution of Honeywell first generations
adaptive autopilot inner loop and application
to F-94, F-101, X-15 and X-20
vehicles 19 p3397 A66-36483
Coordinate control theory of self-adapting
systems, considering problems of sensitivity,

optimization and
invariance 20 p3535 A66-36852
General adaptive approach based upon
minimizing moments of power density
spectrum of system error in feedback
control system 20 p3536 A66-36877
Forced modes of automatic continuous
system with linear controlled plant with
variable dynamic properties and learning
model self-adjusted by search
modulation 20 p3536 A66-36878
Optimal self-adapting control system
analysis with external actions information
lacking 20 p3536 A66-36882
Parameter adaptation theory of quick-
response self-adapting systems subject to
parametric disturbance 20 p3536 A66-36884
Self-adjusting control systems with models,
reviewing basic theoretical problems of
analysis and synthesis 20 p3537 A66-36896
Self-adaptive closed-loop automatic control
systems to produce given or maximum
damping coefficient of free
oscillations 20 p3538 A66-37267
Self-adaptation by direct identification, test
signal and use of model 21 p3719 A66-39399
Design principles and block diagrams of
self-adaptive universal logic circuit with
trainable elements 22 p3883 A66-39728
General Electric self-adaptive control
effect on airframe handling quality
characteristics in F-4A
aircraft 23 p4088 A66-40982
SELF-CONSISTENT FIELD /SCF/
Self-consistent field calculations of benzene
molecule using Gaussian expansion
functions, considering 42 electrons and
finding interspersions of sigma and pi
levels 04 p0473 A66-13648
Topology of stationary plasma
configurations in transverse self-consistent
fields, comparing smooth and periodic
structures in terms of useful
power 07 p1085 A66-17645
Self-consistent-field type perturbation
theory for stationary and homogeneous
turbulence to determine energy spectrum
and response frequencies 08 p1204 A66-18531
Molecular orbital method for boron
hydrides from self-consistent field, analyzing
dipole moments, ionization potentials,
molecular charge distributions, wave
functions, etc 17 p2870 A66-32851
SELF-DIFFUSION
Lattice and grain boundary self-diffusion
coefficients of radioactive nickel 63 into
high purity nickel measured over
temperature range 650-475 degrees
C 04 p0535 A66-13746
Aluminum oxide inclusions effect on
radioactive cobalt 60 autodiffusion observed,
noting higher diffusion in samples prepared
by powder methods 13 p2110 A66-25964
Isotope-dilution method in combination
with chemical sectioning technique to
determine self-diffusion in
silicon 16 p2771 A66-30202
Self-diffusion of niobium in alloys with
molybdenum from 1600 to 2100 degrees
C 16 p2727 A66-31569
Gas flow and self-diffusion in
capillaries 17 p2909 A66-32652
Capillary gas flow and self-diffusion as
affected by pressure ranging from free
molecule to continuum 17 p2910 A66-32653
Radiotracer investigation of silicon self-
diffusion in high purity single crystal
material 18 p3153 A66-33609
Self-diffusion parameters of Nb in solid
solutions with beta-Ti and beta-Zr at high
temperatures 22 p3937 A66-40925
Grain boundary self-diffusion coefficient
variation with applied stress and production
of lattice vacancies applied to cavity growth
in high temperature fatigue of
Mg 23 p4081 A66-41714
SELF-EXCITATION
Performance of tunnel diode self-excited
oscillator in various
regimes 06 p0852 A66-16513
Analysis of uncontrolled, synchronized self-
excited oscillator 09 p1352 A66-20351
Natural frequency and self-excitation of
transistor-operated autogenerator with open-
loop feedback 09 p1354 A66-20453
Frequency characteristics of bending
vibrations of bounded rods with

electromechanical feedback, possibility of
artificially attenuating resonance vibrations
and conditions for
self-excitation 13 p2194 A66-25088
Performance of tunnel diode self-excited
oscillator in various
operating regimes 13 p2041 A66-25953
Phase-plane analysis of motion of self-
excited asymmetric rigid body, examining
periodic solutions of Euler
equations 19 p3399 A66-35486
Sensitivity analysis for relative stability of
self-excited oscillations and transient
response of nonlinear control
systems 19 p3328 A66-36019
Frequency characteristics of bending
vibrations of bounded rods with
electromechanical feedback, possibility of
artificially attenuating resonance vibrations
and conditions for
self-excitation 21 p3822 A66-38513
Linearized potential theory for forced
vibration of continuous self-exciting plate on
hinged support in supersonic flow,
investigating parametric resonance
frequencies relation to coupling of
eigenfunctions 22 p3995 A66-40508
Nonlinear damping effectiveness in
stabilizing time delayed systems compared
to linear damping 23 p4091 A66-41692
SELF-INDUCED VIBRATION
Self-similar motion of weightless fluid
under action of surface
tension 14 p2277 A66-28053
Turbine engine self-excited vibrations from
thermal deformation of engine components
during transient operating conditions, noting
vibration elimination and preventive
measures 21 p3807 A66-38622
SELF-IONIZATION
Current-voltage characteristics of
aluminum-aluminum oxide-gold
diodes 08 p1188 A66-18641
Collisional excitation of autoionizing levels
in solar corona 10 p1557 A66-21093
Absorption spectra of alkaline, alkaline-
earth and rare-gas groups 10 p1557 A66-21095
Perturbation theory approach to calculation
of autoionization rates 15 p2548 A66-29807
Spectroscopic measurements of cold plasma
charged particle concentrations, specifically
spectral broadening due to Stark effect,
forbidden-line intensities affected by
internal electric fields and autoionization
line intensities 18 p3143 A66-34032
SELF-LUBRICATING MATERIAL
Self-lubricating properties of composites of
porous nickel and nickel-chromium alloy
impregnated with barium fluoride-calcium
fluoride eutectic
[ASLE PAPER 66AM 1C2] 16 p2710 A66-30404
SELF-LUMINOUS BODY
S ELECTROLUMINESCENCE
SELF-MANEUVERING UNIT
SA SPACE SELF-MANEUVERING UNIT
/SMU/
DOD Gemini experiment D-12 astronaut
maneuvering unit /AMU/ design, detailing
propulsion, flight control, oxygen and power
supply, abort-alarm and
communications 02 p0294 A66-11643
SELF-OSCILLATION
Simplest system of auto-oscillatory
extremal control, examining control plant
output law 04 p0502 A66-13701
Auto-oscillations in relay systems
discussing parameters, stability region
boundaries and clearance 04 p0503 A66-13707
effect
Tunnel diode in superregenerative
amplifier, using phase-plane method to
investigate volt-ampere characteristics of
diode and effect on
oscillation 04 p0501 A66-14410
Automatic relay systems, describing self-
oscillation induced parameter
variation 06 p0863 A66-16530
Automatic biasing effect on mean
conductivity and constant current
component of germanium tunnel-diode
autooscillator 06 p0860 A66-17198
Periodic mode of operation of relay
automatic system with variable delay
element 11 p1681 A66-23333
Simplest system of auto-oscillatory
extremal control, examining control plant
output law 15 p2469 A66-28542

Auto-oscillations in relay systems, discussing parameters, stability region boundaries and clearance effect 15 p2469 A66-28550

Self-oscillations and stability of model reference adaptive systems with constant plant parameters and control response 15 p2476 A66-29991

LF self-vibrations of laminar diffusion flames in axial mode at frequencies corresponding to fuel system natural frequencies [WSCI 86-30] 18 p3263 A66-34414

Parameter variation effect on self-excited torsional oscillations and sustained frictional vibrations in mechanical systems, comparing results with analog computer predictions 18 p3256 A66-34558

Automatic biasing effect on mean conductivity and constant current component of germanium tunnel-diode auto-oscillator 19 p3315 A66-35556

Self-oscillations of pulse type extremum system with plant having extremal characteristics shaped by multiplication of two coordinates 19 p3325 A66-35985

Periodic mode of operation of relay automatic system with variable delay element 22 p3884 A66-40413

Input signal level for stability loss or self-oscillations in automatic control system, using analysis for nonlinear systems with forced vibrations 24 p4188 A66-42476

SELF-PROPELLED VEHICLE

Dolphin body design for integrating resistance and propulsion mechanisms 19 p3279 A66-36050

SELF-REPAIRING SYSTEM

Switching circuit theory and logical design - IEEE Annual Symposium, University of Michigan, Ann Arbor, October 1965 05 p0637 A66-14926

Self-repairing digital computer, discussing switching mechanism activated diagnostic procedure and failed circuitry replacement 05 p0637 A66-14930

Control system design capable of automatically locating malfunctioning elements and replacements from external reserve 11 p1677 A66-22762

SELF-SEALING

Self-sealing shield for protection of micrometeorite penetration in propellant tank 20 p3659 A66-37077

SEMANTICS

Legal problems concerning name, definition and classification of space objects, noting special problems space stations will entail 19 p3485 A66-36228

SEMICIRCULAR CANAL

Barany hypothesis tested to clarify mechanism of caloric nystagmus by use of zero gravity environment 17 p2857 A66-32168

Vestibular training for aerospace operations, discussing function of otolith and semicircular organs, suppression, sensory control theory, spatial disorientation and motion sickness 21 p3700 A66-38634

SEMICONDUCTOR

SA EXCITON

SA INTERMETALLICS

SA JUNCTION TRANSISTOR

SA METAL OXIDE SEMICONDUCTOR /MOS/

SA N-TYPE SEMICONDUCTOR

SA P-I-N DIODE

SA P-TYPE SEMICONDUCTOR

Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 01 p0118 A66-10259

Tetracene and anthracene organic semiconductor photoconductivity increase effect in weak magnetic field 01 p0118 A66-10264

Quasi-binary cross sections and phase diagrams for ternary semiconductor systems obtained on basis of combination energy estimates 01 p0118 A66-10288

Pressure and temperature effects on intermetallic semiconducting compounds 01 p0118 A66-10294

Radiation damage to germanium, silicon, indium and gallium antimonides and arsenides 01 p0119 A66-10373

Doppler effects of plasmas in semiconductors in microwave field, examining beat frequency relationship to

plasma velocity 01 p0120 A66-10514

Interaction of microwave signal with semiconductor material examining attenuation, phase shift and reflection of electromagnetic wave passing through plasma 01 p0038 A66-10520

Helicon wave propagation and related magnetoplasma effects in semiconductors, using microwave version of Rayleigh refractometer 01 p0026 A66-10541

Single dispersion relation valid for all collision frequencies for electromagnetic and piezoelectric semiconductor acoustic interactions 01 p0029 A66-10589

Electromagnetic field absorption by electrons of semiconductor situated in quantizing magnetic field 01 p0123 A66-10725

Inhomogeneity distribution in single crystal semiconductor considering specific resistance and carrier lifetime and using volume gradient photoelectromotive force values 01 p0124 A66-10763

Amplification factor of semiconductors for direct interband transitions and saturation effect 01 p0124 A66-10766

Operator for electron interaction with optical phonons, noting spin-lattice relaxation and additional magnetophonic oscillations of kinetic coefficients for semiconductors 01 p0124 A66-10767

Thermal expansion of complex semiconductors from 20 to 340 degrees K, calculating Gruneisen constant for diamond, silicon, germanium, tin, etc 01 p0124 A66-10769

Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 01 p0124 A66-10770

Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 01 p0091 A66-10771

Thermomagnetic current density in semiconductors and metals with temperature gradient 01 p0125 A66-10779

Exchange interaction of localized spins with conduction electrons leading to indirect spin-spin interactions in semiconductor 01 p0125 A66-10782

Electron passage from surface ion into semiconductor layer interior during charging from corona discharge, estimating thermal overshoot and tunneling through potential barrier 01 p0071 A66-11025

High temperature vacuum furnace for noncontact measurements of electrical conductivity of semiconductor materials in liquid and solid states 01 p0071 A66-11047

Thin film epitaxial single crystal silicon on insulating substrate sapphire and advantages of these microelectronic devices 01 p0048 A66-11145

Thin film silicon on sapphire diode matrix fixed memory of extremely high density and very low capacitance 01 p0049 A66-11149

Circuit application of diode matrix memory for permanent information storage in computers 01 p0049 A66-11150

Electric current oscillations in germanium semiconductors having carriers in nonthermal equilibrium state 01 p0128 A66-11197

Zero-bias capacitance of thin intrinsic semiconductor film sandwiched between identical electron-injecting contacts compared with value for noninjecting contacts 02 p0270 A66-11437

Quantum-mechanical properties derived for isolated donor atom located on surface of dielectric crystal, noting hydrogenic wave function with planar nodes 02 p0271 A66-11484

Electrical conductivity of narrow energy band semiconductors as function of electric field strength 02 p0274 A66-11732

Measuring properties of semiconductor grade materials, particularly resistivity, compensation and minority carrier lifetime 02 p0229 A66-11766

New semiconductor materials and recent developments in standard materials 02 p0274 A66-11767

Device measuring surface properties of semiconductors 02 p0230 A66-11818

Microelectronics technology noting integrated circuits, passive and active

elements, reliability, etc 02 p0209 A66-11922

Photovoltaic response in semiconductor based on Dember effect which does not overly depend on hole and electron mobility 02 p0275 A66-11972

Steady state zero-current photovoltaic effect for semiconductor subjected to strong illumination which is only weakly attenuated 02 p0275 A66-11972

Helicon effect in semiconductors, using indium antimonide in resonant cavities 02 p0276 A66-12002

Superconducting states in impurity-free semiconductors created by laser illumination 02 p0242 A66-12005

Semiconductor superconductivity dependent on presence of different electronic states in crystalline films at surface 02 p0277 A66-12272

Sticking coefficients for interaction of molecular oxygen with clean semiconductor surfaces assuming immobile adsorption process 03 p0408 A66-12400

Mechanisms of attenuation and amplification of ultrasonic waves in semiconductors 03 p0408 A66-12411

Rotating mirror arrangement with tungsten light source for minority carrier lifetime measurements on semiconductors 03 p0369 A66-12613

Uniaxial stress effect on minority carrier concentration, mobility and lifetime in germanium p-n junction 03 p0409 A66-12722

Electron distribution function in semiconductors discussing steady state illumination effects, energy and spectral characteristics and photoconductivity oscillations at low temperatures 03 p0410 A66-12933

Nonequilibrium field effect on silicon in region of high majority carrier depletion and nonequilibrium between energy bands 03 p0410 A66-12942

Damping of electron spectrum and oscillation maximum of magneto-optical effects of semiconductor 03 p0410 A66-12942

Propagation of LF helicon waves in strongly doped cadmium arsenide and indium antimonide 03 p0410 A66-12944

Acceptor level in iron doped Ga-As moves toward valence band with increasing temperature at approximately same rate band gap decreases 03 p0410 A66-13004

IR absorption spectra of aluminum and boron doped semiconducting synthetic diamonds 03 p0411 A66-13144

Phase-shift analysis of electron and hole optical scattering by high density of ionized acceptors, calculation appropriate to direct band-gap semiconductor 03 p0411 A66-13146

Free-carrier magneto-Kerr effect analysis considering amplitude ratio of two polarized components of reflected wave and phase difference between these two components 03 p0412 A66-13151

Semiconductor electrochemistry and principal theoretical and experimental problems in future 03 p0331 A66-13155

AC technique for Hall effect measurement in low mobility semiconductor 03 p0371 A66-13249

Local resistivity of semiconductor by measuring RF spreading resistance of probe on sample surface without attaching electrical contacts 03 p0371 A66-13252

Tetracene and anthracene organic semiconductor photoconductivity increase effect in weak magnetic field 03 p0413 A66-13309

Transport effects in semimetals and narrow-gap semiconductors including nonlinear, thermomagnetic and superconductive effects and tunneling 04 p0559 A66-13451

Electrical and magnetic properties of cobalt telluride /gamma phase/ to verify semiconductor character 04 p0559 A66-13475

Thermal bridge similar to Wheatstone bridge for measuring thermoconductivity of solid semiconductors 04 p0519 A66-13661

Effect of relativistic interaction terms mass velocity, Darwin and spin-orbit coupling upon electronic levels of covalent-bond compound semiconductors BN, SiC, AlP and GaAs 04 p0561 A66-13725

Electric conductivity and thermoelectric power measurements in Er-Se system indicates degenerate

- semiconductors 04 p0562 A66-13736
- Microinstabilities in transversely magnetized semiconductor plasmas, discussing two-stream and resistive type instabilities 04 p0562 A66-13745
- Parallel grooves as surface damage in semiconductors produced by ruby laser as diffraction effect 04 p0563 A66-13753
- Adsorption at semiconductor and gel surfaces discussing chemisorption theory, ionizing radiation effect and structural parameters 04 p0563 A66-13768
- Temperature dependence of electric conductivity in indium antimonide and gallium arsenide measured by noncontact method in terms of Q-factor 04 p0563 A66-13892
- Magnetic resonance applied to semiconductors, determining electron density at nucleus sites and kinetic energy temperature of hot electrons in indium antimonide 04 p0563 A66-14030
- Donor concentration in semiconductor at which hyperfine structure of spin absorption lines vanishes 04 p0564 A66-14250
- Interaction of conduction electrons with lattice vibrations in semiconductor produces additional transmission bands or disappearance of resonance absorption region 04 p0564 A66-14251
- Components of relaxation tensors associated with thermal and spontaneous phonon scattering in semiconductors 04 p0564 A66-14254
- Relationship between cyclotron resonance and interaction among current carriers in semiconductors 04 p0564 A66-14256
- Semiconductor excitation-level splitting for shallow impurity state due to spin orbital shifts 04 p0565 A66-14260
- Hole-type superconductivity in semiconductors 04 p0565 A66-14265
- Rate of intercarrier energy exchange in semiconductor by intraband collisions within Maxwellian distribution of carriers 04 p0566 A66-14314
- Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanism and hyperfine relaxation frequency 04 p0567 A66-14340
- Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 04 p0567 A66-14344
- Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 04 p0568 A66-14346
- Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 04 p0568 A66-14349

- Light emission and photovoltaic effect of GaP diodes near bandgap 07 p1004 A66-17319
- Skin effect in semiconducting cylinder analyzed for electric and magnetic cases 07 p1001 A66-17350
- Structure of microsurface layer of silicon wafers after polishing with polirit and crocus and thorium, cerium, chromium, aluminum and titanium oxide 07 p1037 A66-17413
- Quantum mechanical discussion of electron structure of crystal lattice of semiconductor as contributor to thermodynamic behavior of impurities 07 p1097 A66-17472
- Frequency dependence of hot carrier AC conductivity of covalent semiconductors, considering scattering due to acoustic and optical phonons 07 p1098 A66-17740
- Electron-phonon interaction in semiconductors, explaining electron diffusion in solid in terms of effect of electron-phonon coupling 07 p1098 A66-17824
- Piezoresistance in semiconductors, noting anisotropic effect of mechanical stresses on electrical conductivity 07 p1034 A66-17834
- Distribution function of semiconductor minority current carriers in presence of pronounced spatial inhomogeneity occurring in intensively absorbing films with intensive surface recombination 07 p1099 A66-17873
- Deviations from stoichiometry in indium telluride, finding that no impurity conduction occurs in this semiconductor 07 p1099 A66-17916
- Temperature dependence of electrical conductivity in organic semiconductors, examining compounds during transition from solid to liquid state 07 p1100 A66-17931
- Nonisothermal gaseous transport of hot injected plasma in semiconductor 07 p1103 A66-18213
- Hot electron recombination peculiarities, ignoring electron temperature concept, for moderate fields and lattice temperatures 07 p1104 A66-18220
- Transistor performance limits as function of semiconductor dielectric breakdown strength and minority carrier saturated drift velocity 07 p1011 A66-18272
- High power semiconductor devices, particularly power handling device 07 p1012 A66-18273
- Coherent increase of spin wave semiconductors by electric current, if electron drift velocity exceeds spin wave phase velocity 07 p1105 A66-18368
- Manganese X-ray emission lines in compound-oxide semiconductor 07 p1105 A66-18369
- Carrier number fluctuation in semiconductor conduction band due to generation and recombination of charge carriers 07 p1105 A66-18371
- Mechanism for indirect phototransition in semiconductors near natural absorption edge when interacting with current carriers 07 p1105 A66-18373
- Diamond-like semiconductors in glassy state, investigating structure and

characteristics of cadmium-germanium-arsenide 07 p1106 A66-18383
 Schottky barrier from silicon surfaces with controlled exposure to oxygen and water vapor, noting work function, semiconductor surface state and thickness of interface layer 07 p1107 A66-18406
 Model for spin-orbit interaction in nontransition metals and semiconductors including liquid metals and alloys 07 p1109 A66-18515
 Galvanomagnetic effects in semiconductors, including Hall effect and magnetoresistivity, noting influence of carrier scattering on lattice vibrations and impurities 08 p1267 A66-18607
 Current-voltage characteristics of aluminum-aluminum oxide-gold diodes 08 p1188 A66-18641
 Average heat of atomization in correlating physical properties of vitreous semiconductor 08 p1268 A66-18655
 Built-in electric field effect on simultaneous diffusion of oppositely charged impurities in semiconductors 08 p1268 A66-18659
 Experimental apparatus for studying temperature dependence of electrical properties of semiconductors at low temperature 08 p1221 A66-18705
 Semiconductor integrated circuits, discussing diffusion preparation techniques, components used, manufacturing, interconnecting and packaging and combining with evaporated circuitry 08 p1200 A66-18965
 Electron distribution over energy level in valence semiconductor in presence of electric field 08 p1269 A66-18977
 Group II-VI semiconductors, examining theory of bound exciton complexes, lattice vibrations, phonon-assisted edge emission and higher energy bands 08 p1271 A66-19239
 Semiconductor microinhomogeneities detected by device using fluctuations of impurity concentrations during process of crystal growth 08 p1223 A66-19287
 Microwave measurement of anisotropy in conductivity of semiconductor in strong electrical field, using comparison of absorption of two intersecting plane-polarized waves 08 p1224 A66-19288
 X-ray spectral analysis of chemical bond structure in aluminum semiconductor compounds 08 p1274 A66-19311
 Effect of conditions of fabrication of alloyed contacts between semiconductors and metals on dislocation structure of these contacts 08 p1274 A66-19315
 Band structures and pseudopotential form factors for 14 semiconductors of diamond and zincblende structures 08 p1276 A66-19369
 Photoadsorption effect on semiconductor surfaces determined as function of various parameters, noting role of external electric field 08 p1276 A66-19378
 Electromagnetic waves in optically-inactive isotropic semiconducting media bounded by vacuum 08 p1276 A66-19609
 Spatial dispersion of long-wave optical oscillations of lattice in polar semiconductor 08 p1276 A66-19610
 Recombination of hot current carriers via recombination center on germanium surface 08 p1276 A66-19611
 Line width of semiconductor laser 08 p1234 A66-19613
 Magnetoresistance measurements of germanium in strong magnetic field 08 p1277 A66-19616
 Superconductivity of thin semiconductor films 08 p1277 A66-19617
 Photoeffect sensitization in n-and p-type semiconductors by dyes having n-or p-type photoconductivity 08 p1179 A66-19640
 Microwave power generation by multiplication of direct current and microwave magnetic field, using biased intermetallic semiconductor magnetoresistive element in cavity 08 p1198 A66-19746
 Fluctuations of electron numbers in general M-level system, using difference equation 08 p1279 A66-19837
 Variable impedance device using galvanomagnetic effects in semiconductors 09 p1351 A66-19932
 Green function method in theory of dispersion and absorption of electromagnetic

radiation in semiconductors, considering resonance line shapes 09 p1411 A66-19961
 theory 09 p1411 A66-19961
 Anisotropic effect of interelectronic scattering on semiconductor conductivity of ellipsoidal isoenergetic surface 09 p1411 A66-19981
 Electron microscope observation of active centers at surface of semiconductor crystals, applying to p-type Si single crystals 09 p1412 A66-19989
 Effect of quantizing magnetic field on frequency spectrum and relative noise value associated with impurity recombination and generation in semiconductor 09 p1342 A66-19992
 Balanced anisotropic photoelectromagnetic effect in germanium 09 p1413 A66-20003
 Free energy calculations and crystallographic properties of vortex line lattices in type II semiconductor for square and triangular lattices in given magnetic field 09 p1421 A66-20058
 Complete behavior of mixed state type II semiconductor in sufficiently large magnetic field 09 p1421 A66-20059
 Tunneling measurements on density of states of type II semiconductor films near upper critical fields 09 p1422 A66-20060
 Composition, properties and electrical characteristics of organic semiconductors 09 p1425 A66-20186
 Theory of spin-magnetophonon resonance in semiconductor 09 p1425 A66-20190
 Parameters of complex energy bands in semiconductors determined by free carrier Faraday rotation, Voigt effect and transport properties 09 p1426 A66-20191
 Fluorescent K-absorption and emission spectra of phosphorus in III-V semiconductor compounds 09 p1426 A66-20192
 Spin-magnetophonon interaction effect on light absorption in semiconductor 09 p1426 A66-20199
 Resonance carrier scattering and spin-magnetophonon interaction effect on semiconductor magnetic susceptibility 09 p1427 A66-20200
 Multiband quasi-classical wave functions of semiconductors in presence of constant external magnetic field 09 p1427 A66-20536
 Surface potential in high and low resistivity semiconductors determined by comparing surface and contact potentials and Fermi levels 09 p1427 A66-20537
 Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 09 p1428 A66-20596
 Efficiency of drift-type semiconductor photocell 09 p1358 A66-20816
 Cadmium sulfide based film photoresistors insensitive to moisture and long exposure to air 09 p1429 A66-20820
 Semiconductor transition to superconducting state, describing field effect action on carriers 09 p1431 A66-20900
 Accuracy in determination of light absorption coefficient of semiconductors with reflection coefficients of 0.2 to 0.5 09 p1431 A66-20943
 AC current measurement to determine contribution in semiconductors, which appears as displacement current, from space charge caused by injected and alternatively modulated carriers 09 p1432 A66-20970
 Static characteristics of insulated gate field effect transistor with gate electrodes at both sides of semiconducting channel, including space charge limited currents analysis 09 p1359 A66-20974
 Transistor fabrication method ensuring minimization of variation in properties of semiconducting film by vacuum deposition 09 p1359 A66-20976
 Transport properties of III-V and II-VI semiconducting compounds with zincblende structure under uniaxial stress, calculating galvanomagnetic coefficients, Faraday effect, plasma frequency, etc 10 p1578 A66-21665
 Diffusion length dependence on energy of exciting photons for p-silicon and n-and p-germanium, using bevel-grind technique 10 p1578 A66-21666
 Boron, Volume 2, Preparation, properties and application 10 p1579 A66-21718
 Semiconductor properties including

conductivity, resistivity, band gap, optical absorption, etc, analyzed on very pure and doped beta-rhombohedral boron 10 p1579 A66-21718
 Electric and photoconductivity of vacuum sintered and zone refined semiconductor boron 10 p1579 A66-21722
 Electron tunneling in semiconductors with degenerate band structure 10 p1581 A66-21734
 LF electromagnetic wave propagation peculiarities of semiconductor and negative differential conductivity effects 10 p1582 A66-21967
 Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 10 p1582 A66-21968
 Existence possibility of nondamped superthermal conductivity in two-band coupled semiconductors and validity of Landau criterion for superfluidity 10 p1583 A66-21968
 Epitaxial, diffusion and photolithographic processes in manufacture of semiconductor component 10 p1514 A66-22056
 Negative-conductance amplification and Gunn effect oscillations in two-valley semiconductors 10 p1583 A66-22066
 Gunn effect in terms of time-independent negative-differential bulk-conductivity medium for understanding of space charge domain dynamics 10 p1584 A66-22068
 Density of free carriers in semiconductor conduction band varying with electric field, noting growth and phase velocity of RF wave of small amplitude 10 p1584 A66-22070
 Coherent excitation of optical phonons in polar semiconductors developed, using Boltzmann equations 10 p1584 A66-22071
 Model technique calculation of electrostatic domains in two-valley /GaAs/ semiconductors 10 p1586 A66-22092
 Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 10 p1589 A66-22167
 Sonic instability in piezosemiconductors with negative differential conductivity 10 p1589 A66-22176
 Amplification factor of semiconductors for direct interband transitions and saturation effect 11 p1748 A66-22277
 Operator for electron interaction with optical phonons, noting spin-lattice relaxation and additional magnetophononic oscillations of kinetic coefficients for semiconductors 11 p1748 A66-22278
 Thermal expansion of complex semiconductors from 20 to 340 degrees K, calculating Gruneisen constant for diamond, silicon, germanium, tin, etc 11 p1749 A66-22280
 Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 11 p1749 A66-22281
 Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 11 p1720 A66-22282
 Thermomagnetic current density in semiconductors and metals with temperature gradient 11 p1749 A66-22291
 Exchange interaction of localized spins with conduction electrons leading to indirect spin-spin interactions in semiconductor 11 p1749 A66-22295
 Electron Coulomb interaction in strongly alloyed semiconductor films tends to reduce all energies to constant value without changing spectrum shape 11 p1750 A66-22344
 Electron-phonon coupling in piezoelectric semiconductors, obtaining electric field and current density vectors for application to ultrasonic amplification 11 p1750 A66-22401
 Single probe method for measuring semiconductor resistivity, using alternating current, noting tests with germanium and silicon samples 11 p1705 A66-22598
 Electrophysical characteristics and preparation of thin organic semiconductor film on radiothermally modified polyethylene 11 p1750 A66-22609
 Monolithic circuit with chip of semiconductor material having diffused active and passive elements 11 p1668 A66-23056

- Behavior of trace elements in gallium arsenide and materials and methods used for ohmic contacts to n-and p-type specimens, stressing importance of indium 11 p1757 A66-23283
- High temperature vacuum furnace for noncontact measurements of electrical conductivity of semiconductor materials in liquid and solid states 11 p1709 A66-23294
- Transition of group IV elements to metallic state confirmed as equivalent to generation of intrinsic current carriers 11 p1759 A66-23447
- Semiconductor surface physics, with emphasis on FET electrical surface phenomena 11 p1759 A66-23462
- Constant electric field effect on transverse dielectric constant of semiconductor 12 p1926 A66-23714
- Magnetoresistance of reduced and doped strontium titanate to investigate band structure 12 p1927 A66-23722
- Quantum mechanical formula for low-field Hall effect in density matrix approach, treating this effect in disordered systems 12 p1927 A66-23723
- LF waves induced by superimposed electric and magnetic fields in semiconductor plasma 12 p1927 A66-23781
- Soviet book on theory of solid state, treating Mossbauer effect and electron theory of highly doped semiconductors 12 p1928 A66-23878
- Physical properties of six III-V semiconductors /InSb, InAs, InP, GaAs, GaSb and AlSb/ 12 p1928 A66-23945
- Very low phase velocity wave propagating in one direction in semiconductors in presence of crossed DC electric and magnetic fields 12 p1928 A66-24151
- Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 12 p1929 A66-24451
- Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice 12 p1930 A66-24457
- Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 12 p1930 A66-24459
- Injected plasma spiral instability in transverse magnetic fields, demonstrating existence of rotating mode in semiconductor disk 12 p1931 A66-24803
- Thermocompression bonding applied to integrated circuits of semiconductor and thin film type, noting resistance, ultrasonic and electron beam welding 12 p1846 A66-24916
- Threshold energy for avalanche multiplication in semiconductors obtained from energy band structure and crystal momentum conservation in ionization process 13 p2157 A66-25035
- X-ray radiation effect on electrical conductivity of liquid organic semiconductors obtained on diethyl ether base with halogen derivatives of benzene, methane, etc 13 p2160 A66-25096
- Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 13 p2160 A66-25101
- Field emission of germanium alloyed with silver and irradiated with R 13 p2160 A66-25108
- New semiconductor materials produced by oriented inclusion of very highly conductive phases in semiconductor, noting InSb properties and application 13 p2161 A66-25111
- Semiconductor technology applied to design of electronic microsystems 13 p2029 A66-25118
- Resistivity and thermoelectric power of copper telluride at various temperatures, finding that it retains semiconducting properties in liquid state 13 p2162 A66-25411
- Magnetic semiconductor efficiency determined from product of majority carrier mobility and effective magnetic permeability 13 p2163 A66-25420
- Iron selenides of nickel arsenide structure analyzed, noting dependence of semiconductor characteristics on iron gap arrangements 13 p2164 A66-25471
- Irreversible form of chemisorption by semiconductor as affected by volume impurity and reaction with chemisorbate 13 p2017 A66-25696
- Semiconductor diode and transistor application to various current and voltage measurement techniques 13 p2079 A66-25894
- Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2166 A66-25920
- Homeopolar semiconductors, discussing radiation recombination parameters on impurity centers with phonon participation 13 p2167 A66-25929
- Probe measurement theory for determining thin semiconductor film electrical conductivity 13 p2168 A66-25945
- Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 13 p2168 A66-25976
- Static composite characteristics of series-connected tunnel diode chains 13 p2042 A66-26098
- Nonlinear susceptibility describing second harmonic generation of light measured in semiconductors with zinc-blende symmetry, using quantum mechanics and laser wavelength 13 p2168 A66-26149
- Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions 13 p2099 A66-26182
- Photomagnetically-generated electric field dependence upon magnetic field and semiconductor parameters for particular quantum region 13 p2169 A66-26505
- Amplitude probability density of random stationary signal potential and variation of free carriers in germanium semiconductor at near-ambient temperature 13 p2170 A66-26758
- Accuracy of test device determining conductivity of semiconductor materials increased by using error calculation and design systematology 13 p2085 A66-26761
- Resonator cavity measurement of microwave Faraday effect in low resistivity semiconductors 14 p2349 A66-26799
- Magnetic and semiconducting properties of solid solutions of LaMnO sub 3 and LaCoO sub 3 14 p2353 A66-26900
- Space and time dependence of particle density and current in semiconductor material 14 p2356 A66-27045
- Propagation distribution of impurity atoms in heavily doped semiconductors 14 p2356 A66-27068
- Band shift in strongly doped semiconductor under influence of impurity atom electrostatic field 14 p2356 A66-27069
- Heavily doped semiconductor parameters determined from spectral behavior of coefficient of reflection and transmission 14 p2357 A66-27072
- Self-compensation in electric conductivity and other properties of binary semiconductor with temperature variations 14 p2357 A66-27079
- Optical absorption in semiconductors with impurity center participation in external magnetic field 14 p2358 A66-27082
- Ultrasonic flux effect on electrons in semiconductor with charged impurity centers 14 p2358 A66-27086
- Influence of trapping on acousto-electric effect in piezoelectric semiconductors, noting ultrasound absorption and experimental results in cadmium sulfide 14 p2359 A66-27101
- Plasma-spin wave interaction in ferromagnetic semiconductors and metals with easy-plane and easy-axis magnetic anisotropy 14 p2360 A66-27188
- Polarization vector in strong electromagnet field, using two-band semiconductor, calculated from density matrix equation, relaxation times and recombination time 14 p2360 A66-27189
- Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334
- Longitudinal Hall effect for two-band conduction and tensor relaxation times in cubic crystals 14 p2363 A66-27577
- Recombination radiation in semiconductor affected by strong magnetic field 14 p2363 A66-27597
- Surface charge of semiconductor in strong electric field, considering quantization 14 p2364 A66-27644
- Temperature-dependence of electric conductivity and Hall coefficient in semiconductors 14 p2364 A66-27730
- Resistivity and Seebeck coefficient of liquid thallium-tellurium semiconductors 14 p2366 A66-27760
- Design, performance and application of multicell luminous-symbol screen with optically coupled photosemiconductive and electroluminescent films 14 p2297 A66-28112
- Reduction of measurement error in devices for testing semiconductors, employing mechanical techniques 14 p2297 A66-28132
- Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanism and hyperfine relaxation frequency 14 p2367 A66-28234
- Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 14 p2367 A66-28239
- Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 14 p2368 A66-28242
- Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 14 p2368 A66-28246
- Impurity concentration on semiconductor surface, observing photoconductivity of silicon in IR region of spectrum 14 p2368 A66-28254
- Recombination in space charge region near semiconductor surface 14 p2368 A66-28257
- Conditions for formation of barium and gold compound for semiconductor 14 p2369 A66-28264
- Accuracy in determination of light absorption coefficient of semiconductors with reflection coefficients of 0.2 to 0.5 15 p2557 A66-28531
- Surface charge sign effect on capacitor photoelectromotive force in semiconductors and photoinduced contact potential change 15 p2559 A66-28628
- High field properties of gold doped germanium at liquid nitrogen temperature 15 p2560 A66-28633
- Conduction band in cadmium arsenide semiconductor, measuring transport phenomena 15 p2560 A66-28635
- Semiconductor properties measurement using resonator with slit 15 p2560 A66-28639
- Electron-hole recombination effect on semiconductor reflectivity modulation study with ruby laser 15 p2563 A66-28757
- Power dissipation in input and output matching networks of varactor doubler for calculating true input and output powers from semiconductor bulk material, noting charge storage occurrence 15 p2466 A66-29674
- Temperature dependence of electric conductivity in indium antimonide and gallium arsenide measured by noncontact method in terms of Q-factor change 15 p2568 A66-29705
- Evolution and present status of electronic circuit components including manufacturing and component applications 15 p2468 A66-29890
- Inhomogeneous semiconductor RC-circuit for case of small sinusoidal signal in presence of bias voltages 15 p2475 A66-29927
- Surface charges on light-induced charges in contact potential difference of semiconductors 15 p2569 A66-29984
- Spin-orbit splitting and electroluminescence in semiconductors noting measurement techniques and results 16 p2767 A66-30128
- Thermal instability causes negative-resistance region in nonohmic point contact conduction in semimetals 16 p2769 A66-30155
- Quantum oscillations in damping of helicons propagating through degenerate semiconductor plasmas in presence of quantizing magnetic fields 16 p2770 A66-30185
- Valence-band bending to Fermi level and radiative recombination in zinc sulfide with

liquid electrodes 16 p2771 A66-30201
 Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 16 p2771 A66-30280
 Field emission of germanium alloyed with silver and irradiated with 16 p2771 A66-30287
 IR 16 p2771 A66-30287
 Schrodinger equation in semiconductor with N atoms containing dislocation, vacancy or other defect, noting phase shift and local charge neutrality 16 p2775 A66-30730
 Change in reflectance of semiconductor induced by electric field at approximately photon energies of interband transitions 16 p2776 A66-30734
 Modulator resulting from application of Welker effect in semiconductor and used in Q and E bands, obtaining conductivity variations 16 p2662 A66-30960
 Multiple reflection effects in Faraday rotation in thin film semiconductors 16 p2778 A66-31073
 Traveling solvent technique for p-n-p or n-p-n semiconductor structures with highly doped middle layer demonstrated on indium arsenide 16 p2779 A66-31088
 Device for measurement of photocurrent noise spectra in semiconductors at 1 cps to 5 kc 16 p2664 A66-31361
 Impurity energy levels in semiconductors described by equivalent Schrodinger equation containing short-range as well as conventional terms for long-range Coulomb potential 16 p2784 A66-31446
 Phase shift lifetime of excess carriers in semiconductors under sinusoidal injection, showing decrease as injection frequency increases 16 p2784 A66-31451
 Kinetics of semiconductor characteristics determined from impurity photoconductivity, using circuit measuring effective cross section of current carrier capture in impurity centers 16 p2709 A66-31667
 Mechanical properties of semiconductors, such as elastic modulus and internal friction determined, noting vacuum and temperature conditions 16 p2785 A66-31669
 Change in conductivity at surface of semiconductor due to changes in relaxation time and charge carrier densities 16 p2786 A66-31689
 Superconductivity of nondegenerate semiconductor thin films, dependence on current carrier concentration, impurity level positions and film thickness 16 p2787 A66-31762
 State density for highly doped semiconductor in magnetic field, obtaining results at near Fermi level energies and at bottom of conduction band 16 p2788 A66-31779
 Efficiency criterion for semiconductors, using equations for flux density of electric current and energy for isotropic semiconductor in absence of magnetic field 16 p2789 A66-31790
 Phase diagram of copper gallium telluride-gallium telluride semiconductor alloy 17 p2975 A66-31990
 Undepleted current carrier effect on characteristics of inverse p-n junction 17 p2976 A66-32069
 Space charge limited currents theory in thin semiconductor layers, showing relationship of current-voltage characteristics and effect of traps 17 p2976 A66-32261
 Magnetoresistance effect in semiconductors applied to microwave power measurement, noting multiplying action between electric and magnetic field components of wave 17 p2885 A66-32288
 Hot electrons in anisotropic semiconductor, considering case of scattering by acoustic phonons within one energy valley with nondegenerate bottom 17 p2977 A66-32318
 Quantum theory of electric conductivity of semiconductors with nonstandard band, discussing influence of spin splitting of Landau levels on oscillations of transverse magnetoresistance in n-InSb 17 p2978 A66-32508
 Dominant mode perturbation theory applied to treatment of influence of imperfect waveguide contact on measured complex permittivity of semiconductors 17 p2887 A66-32643

Electrostatic field gradient effect in semiconductors with diffused impurities investigated, using basic diffusion theory 17 p2980 A66-32645
 Schottky theory for metal semiconductors, noting correlation between work function and barrier height, electron affinity, etc 17 p2980 A66-32650
 Electrical and physicochemical properties of silver doped arsenic sulfide 17 p2981 A66-32876
 Single donor-type randomly distributed impurity and effect on electron energy spectrum of semiconductor 17 p2982 A66-32969
 Electromagnetic waves in optically-inactive isotropic semiconducting media bounded by vacuum 17 p2983 A66-33123
 Spatial dispersion of long-wave optical oscillations of lattice in polar semiconductor 17 p2983 A66-33124
 Recombination of hot current carriers via recombination center on germanium surface 17 p2983 A66-33125
 Magnetoresistance measurements of germanium in strong magnetic field 17 p2983 A66-33130
 Superconductivity of thin semiconductor films 17 p2983 A66-33131
 Photoelectric properties of Cd, Si, Ge, GaAs and Se semiconductor films with narrow forbidden zone, producing abnormally high photovoltages 17 p2984 A66-33135
 Surface characteristics of semiconductors with intrinsic conductivity, determining potential distribution electric field, carrier concentrations, etc 17 p2984 A66-33146
 Dangling bonds and dislocations in semiconductors, noting existence of core charge dependent localized state in gap caused by local decrease in atom density 17 p2985 A66-33155
 Semiconducting properties of several gallium and indium antimony tellurides systems and their metallurgical aspects 17 p2986 A66-33296
 Reflection type microwave modulator with semiconductor filled resonant cavity 17 p2896 A66-33301
 Distribution function and electron mobility in polar semiconductors for nonparabolic dispersion law 17 p2986 A66-33305
 Ferromagnetic semiconductors with exchange interaction due to conduction electrons 17 p2986 A66-33306
 Electron-hole conductivity effect on temperature variations of Hall coefficient and Nernst-Ettingshausen effect in semiconductor 17 p2986 A66-33309
 Steady state distribution functions for photoexcited carriers in semiconductors bands determined by competition between intraband intercarrier collisions and recombination processes 18 p3154 A66-33919
 Acousto-thermal effect in semiconductors in which carriers are characterized by isotropic effective mass and relaxation time, both dependent on energy 18 p3154 A66-33944
 Deviations from stoichiometry in indium telluride, finding that no impurity conduction occurs in this semiconductor 18 p3155 A66-34182
 Resistivity of semiconductors with periodic inhomogeneity, noting cases of surface perpendicular and surface parallel striations 18 p3155 A66-34229
 Free current carrier formation in molecular crystal, examining dependence of photoconductivity on magnetic field intensity 18 p3158 A66-34683
 Damped oscillations and velocity of sound waves in semiconductors and metals in presence of strong magnetic field 18 p3158 A66-34684
 Semiconductor photoconductivity dependence on external radiation frequency, examining electron-phonon interaction 18 p3158 A66-34689
 Mass transfer across gas-solid interface associated with semiconductor solids 18 p3087 A66-34737
 Method for determining temperature dependence of heat conductivity of dielectric and semiconductor materials 18 p3159 A66-35054
 Excess carriers lifetime in semiconductors

nonstatic measurement by photoconductive phase shift of spreading resistance under point contact 19 p3433 A66-35330
 Interaction of semiconductor valence electrons with free radiation field 19 p3434 A66-35369
 HF stabilization of screw instability in semiconductors 19 p3434 A66-35373
 Internal resonance in semiconductors known as spin-magnetophonon 19 p3434 A66-35377
 Transient behavior of current to applied voltage step for semiconductor structure with double injection behavior in initial and final states 19 p3435 A66-35406
 Sputtering yields of various semiconducting single crystals under argon ion bombardment 19 p3436 A66-35420
 Transient process in semiconductors when charge carrier concentration deviates from equilibrium 19 p3437 A66-35454
 Transient processes in semiconductor diode with base having impurity concentration gradient 19 p3313 A66-35459
 Semiconductor cyclotron resonance during application of constant electric field, determining carrier distribution function 19 p3437 A66-35460
 Nuclear polarization by hot carrier flow in homogeneous semiconductor, taking into account effect of strong electric field on spin lattice relaxation time 19 p3437 A66-35474
 Perturbation method solution of rectangular waveguide boundary value problem filled with transversely magnetized semiconductor or plasma 19 p3317 A66-35716
 Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 19 p3441 A66-35781
 Sonic instability in piezosemiconductor with negative differential conductivity 19 p3441 A66-35784
 Spatial charge region, excess electron concentration, capacitance and conductivity in semiconductor layer with Lorentz forces acting on carrier determined as functions of surface potential and applied electromagnetic field 19 p3442 A66-35819
 Thermometer for continuous temperature measurement of dielectrics and semiconductors in electromagnetic HF fields 19 p3358 A66-35836
 Electron scattering in ABO-type semiconductors by long-wave transverse-optical ferroelectric lattice mode evidenced by hydrostatic pressure measurements 19 p3444 A66-36176
 Synthesis, purification, physical properties and electronic parameters of HgSe and HgTe semiconductors 19 p3445 A66-36318
 Monograph on synthesis and properties of refractory semiconducting materials having large forbidden bandwidth and prepared from element of groups III and V 19 p3448 A66-36731
 Neutral-impurity scattering and scaled electron-hydrogen-atom collision problem for hydrogenic-type impurities in semiconductor studied by method using highly spin-polarized carriers 19 p3448 A66-36763
 High-speed memory units for digital computer, discussing ferrite, semiconductor and thin magnetic or ducting film memories 19 p3322 A66-36814
 Photoelastic measurement of elastic strain fields in semiconductors 20 p3668 A66-37497
 Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n- and p-type material 20 p3617 A66-37552
 Photomechanical effect in germanium, noting dependence of mechanical properties on quantity of impurity concentration 20 p3617 A66-37554
 Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555
 Electron energy spectrum for alloyed semiconductors, determining state densities via Thomas-Fermi statistical method 20 p3618 A66-37562
 Quasi-localized states associated with high-energy conduction-band minima in semiconductors, particularly Se-doped GaSb,

- cutting pressure-dependence of
 photoluminescence 20 p3618 A66-37598
 electromagnetic field absorption by
 electrons of semiconductor situated in
 antizing magnetic field 20 p3619 A66-37662
 magnetic field effect on energy
 distribution and slowing-down times of
 nonequilibrium carriers in semiconductors
 when excitation source creates electron-hole
 pairs 20 p3619 A66-37683
 density of electron states and classical
 effective mass of current carriers in
 magnetic field for semiconductor with
 wurtzite-type lattice 20 p3620 A66-37689
 secondary electron emission in zinc sulfide
 and magnesium fluoride thin dielectric films
 on semiconductor layers due to electric
 field stimulation 20 p3620 A66-37691
 anomalous photovoltaic effect in
 semiconductor Ge, Si, CdTe and GaAs thin
 films due to photodiffusion and
 microtransitions 20 p3620 A66-37701
 spatial scattering of associated
 electromagnetic waves arising during
 passage of fast charged particles through
 semiconductors, noting role of Cerenkov
 radiation 20 p3622 A66-38130
 semiconductor electrochemistry and
 principal theoretical and experimental
 problems in future 20 p3511 A66-38134
 temperature-modulated optical absorption
 in Si, GaAs, CdS and potassium tantalate
 semiconductors 20 p3623 A66-38389
 semiconductor technology advances in
 near-energy conversion, light detection and
 transmission 20 p3534 A66-38413
 stimulated emission of radiation in
 semiconductors, calculating dependence on
 temperature and impurity concentration,
 using Kane model with Gaussian band tail
 density of states and optical
 model 21 p3795 A66-38547
 Magnetization curves for two specimens of
 semiconducting strontium titanate of given
 electron density, noting magnetic hysteresis
 and heat capacity 21 p3796 A66-38553
 four-probe head sensitivity increase in
 measurement of volume and surface
 resistance of semiconductor materials by
 increasing separation of potential
 probes 21 p3709 A66-38613
 spiral instabilities in semiconducting
 germanium plasma in radial electric and
 axial magnetic fields 21 p3797 A66-38757
 Thermoelectric and thermomagnetic
 properties of semiconductors applied to
 refrigeration, discussing Peltier and
 Seebeck effects 21 p3798 A66-38767
 Miniature assembly for obtaining thin
 metal and semiconductor cell films by
 vacuum-evaporation
 techniques 21 p3737 A66-38919
 Energy spectrum of semiconductor
 compounds with chalcopyrite structure
 analyzed, using perturbation theory, noting
 changes resulting from crystalline and spin-
 orbital interactions 21 p3799 A66-38923
 Electric field effect on donors diffusion
 to intrinsic
 semiconductor 21 p3799 A66-38927
 Steady state donor-acceptor recombination
 rate and effects on diode current and
 injection electroluminescence, using
 Shockley-Read-Hall semiconductor
 phenomenological model 21 p3800 A66-38993
 Faraday and Voigt and dispersive magneto-
 optic effects in semiconductors in crossed
 field due to energy band
 transitions 21 p3800 A66-38995
 Conjugation breakdown effect on
 properties of semiconductor polymer,
 showing effect of impedance on current
 transfer and intermolecular
 interaction 21 p3702 A66-39249
 Spectral analysis of interacting
 electromagnetic, plasma and spin waves in
 antiferromagnetic semiconductors and metals
 with easy-axis and plane type
 anisotropy 21 p3804 A66-39311
 Domain formation process during passage
 of current through multivalley
 semiconductor when electron intervalley
 scattering drift length exceeds diffusion
 length 21 p3804 A66-39313
 Solid state plasma microwave oscillations
 and dispersion conditions for ion-cyclotron
 instability excitation in
 semiconductor 21 p3804 A66-39335
 LF electromagnetic wave propagation
 peculiarities of semiconductor and negative
 differential conductivity 21 p3804 A66-39546
 Volt-ampere and current carrier mobility
 characteristics of semiconductors with
 electron-phonon bonds proportional to
 applied field 21 p3805 A66-39547
 Existence possibility of nondamped
 superthermal conductivity in two-band
 coupled semiconductors and validity of
 Landau criterion for
 superfluidity 21 p3805 A66-39548
 Current density, electron mobility,
 magnetoresistance, negative resistance and
 impact-ionization-produced solid state
 magnetoplasma oscillations in InSb single
 crystal semiconductor at high electric and
 magnetic fields 21 p3805 A66-39568
 Dictionary of semiconductor physics and
 electronics, English-German,
 German-English 22 p3871 A66-39701
 Solid state plasma microwave oscillations
 and dispersion conditions for ion-cyclotron
 instability excitation in
 semiconductor 22 p3959 A66-39705
 Metallurgical junction radius of curvature
 effect on avalanche breakdown voltage in
 Ge, Si, GaAs and GaP spherical and
 cylindrical p-n junctions 22 p3959 A66-39740
 Back contact effect on distribution of
 current carrier concentration in
 semiconductors based on diode volt-ampere
 characteristic 22 p3873 A66-39825
 Generation of oscillations in circuit which
 has long diode with base containing
 impurity atoms producing deep energy
 levels in forbidden zone 22 p3961 A66-39827
 Atom ejection patterns for sputtering of
 semiconductor single
 crystals 22 p3963 A66-40090
 Polarized EM wave propagation and
 microwave Faraday rotation in solid state
 plasma in circular waveguide under strong
 magnetic field 22 p3964 A66-40170
 Distribution of capacitive photo-emf over
 surface of semiconductor determined by
 measuring value created by scanning surface
 of sample with narrow modulated-light
 beam 22 p3965 A66-40316
 Infinite plate consisting of monopolar
 semiconductor of given thickness under
 effect of electric field results in change in
 galvanomagnetic, piezoresistance and optical
 properties 22 p3965 A66-40317
 Miniature sensor for compensating static as
 well as transient temperature developed,
 using high gauge factor and high thermal
 coefficients of semiconductor strain gauges
 [AIAA PAPER 66-749] 22 p3919 A66-40636
 Monograph on semiconductor
 materials 22 p3966 A66-40789
 Propagation distribution of impurity atoms
 in heavily doped
 semiconductors 22 p3966 A66-40827
 Band shift in strongly doped semiconductor
 under influence of impurity atom
 electrostatic field 22 p3966 A66-40828
 Heavily doped semiconductor parameters
 determined from spectral behavior of
 coefficient of reflection and
 transmission 22 p3966 A66-40830
 Self-compensation in electric conductivity
 and other properties of binary
 semiconductor with temperature
 variations 22 p3967 A66-40835
 Optical absorption in semiconductors with
 impurity center participation in external
 magnetic field 22 p3967 A66-40838
 Ultrasonic flux effect on electrons in
 semiconductor with charged impurity
 centers 22 p3967 A66-40842
 Systems with toroidal magnetic field
 increasing toward periphery, considering
 method using skin effect of
 semiconductors 22 p3959 A66-40941
 Electrostatic oscillations in dielectric,
 semiconductor and plasma in presence and
 absence of external magnetic
 field 22 p3968 A66-40947
 Monograph on electronic theory of heavily
 doped semiconductors covering energy
 spectrum, perturbation theory, absorption of
 electromagnetic waves, density states,
 etc 23 p4109 A66-41119
 Barium titanate semiconductors containing
 controlled amounts of neodymium prepared,
 showing dependence of electrical properties
 on preparative conditions and amount of
 rare earth 23 p4109 A66-41128
 Surface magnetoconcentration in intrinsic
 conductivity semiconductors, noting space-
 charge region characteristics dependence on
 surrounding fields 23 p4110 A66-41131
 Solar cell as most reliable energy
 conversion device for near-Earth missions,
 noting semiconductor material and thermal
 stress 23 p4017 A66-41167
 Heterojunction formation between
 substrate and compound semiconductor
 synthesized by substitution reaction during
 alloying process 23 p4113 A66-41300
 Photoconductivity in homogeneous
 semiconductors when solution of second-
 order nonlinear differential equations with
 indivisible variables is obtained in
 elementary functions, noting light intensity
 effect 23 p4113 A66-41564
 Thin films and semiconductors for
 integrated circuits in microelectronics, for
 application to aeronautics and
 astronautics 23 p4048 A66-41657
 One-dimensional approximation analysis of
 excess carrier density distribution in
 illuminated semiconductor and radiative
 recombination effects 23 p4115 A66-41857
 Maximum figure of merit for broadband
 semiconductors, using theory of mobility
 due to acoustic mode and optical mode
 scattering 24 p4248 A66-42114
 Crystal potential and correlation for energy
 bands in valence semiconductors evaluated
 on basis of orthogonalized plane wave
 calculations starting with Hartree-Fock
 equation 24 p4249 A66-42227
 Space-charge-limited current dependence
 on time in semiconductor taking trapping
 into account 24 p4252 A66-42350
 Anisotropic thermoelectric power in
 semiconductors as result of combined
 phonon and impurity scattering or in
 presence of carrier with anisotropic
 effective mass 24 p4252 A66-42352
 Anisotropic electron distribution in pure
 semiconductors near avalanche, considering
 indium antimonide 24 p4252 A66-42355
 Semiconducting properties of cadmium
 tetraphosphide 24 p4253 A66-42361
 Layer-like field inhomogeneities in
 homogeneous semiconductors occurring
 when conductivity decreases analyzed using
 Poisson and transport equations, obtaining
 stationary solutions for differential negative
 conductivity 24 p4254 A66-42424
 Integral method derivation of
 thermoelectricity coefficient of cylindrical
 semiconductor immersed in liquid He and
 superheated by Joule
 heating 24 p4255 A66-42494
 Laue reflection method of X-ray
 diffraction, determining single crystal
 orientation 24 p4255 A66-42506
 Nonlinear dependence of current in
 electric field in thin semiconductor film in
 quantizing magnetic field 24 p4256 A66-42525
 Electromagnetic propagation in
 semiconductor with account of nonlinear
 effects such as skin effects arising from
 electron heating by field 24 p4256 A66-42526
 Static Jahn-Teller effect on impurity
 centers in semiconductors, discussing nature
 and magnitude of splitting of ground
 state 24 p4256 A66-42527
 Autoradiography used to determine
 dislocation density in germanium, silicon and
 copper single crystals, with aid of tagged
 atoms 24 p4257 A66-42535
 Photomagnetically generated electric field
 dependence upon magnetic field and
 semiconductor parameters for particular
 quantum region 24 p4257 A66-42728
 Recombination radiation in semiconductor
 affected by strong magnetic
 field 24 p4257 A66-42731
 Plasma-spin wave interaction in
 ferromagnetic semiconductors and metals
 with easy plane and easy axis magnetic
 anisotropy 24 p4259 A66-43086
 Polarization vector in strong
 electromagnetic field, using two-band
 semiconductor, calculated from density
 matrix equation, relaxation times and
 recombination time 24 p4259 A66-43087

SA PARAMETRIC DIODE

Nonstationary processes measurement method in semiconductor devices by linear electron accelerator 01 p0035 A66-10189

Pressure transducers using miniature semiconductor strain gauges, examining design, temperature effects, diaphragm strain and application 01 p0068 A66-10492

Design of wideband microwave delay line using piezoelectric semiconductor transducers with acoustic gain 01 p0038 A66-10523

Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 01 p0123 A66-10727

Electrical and electroluminescent properties of gallium arsenide diodes with high resistivity region flanked by low resistivity R and N regions 01 p0043 A66-10896

Dependence of barrier height of metal-semiconductor systems on metal work function, surface states and thickness of interfacial layer 02 p0271 A66-11438

Temperature control of graphite nuclear furnace, using thermocouples 02 p0228 A66-11517

Regenerative frequency converters used as signal limiters, determining characteristics from equivalent circuit of semiconductor diode 02 p0199 A66-11758

Microminiaturization applied to circuit integration techniques, outlining steps to fully integrated device including power supply and controls 02 p0199 A66-11860

Liquid cooling on semiconductor devices noting natural convection, nucleated boiling, forced convection and forced convection with boiling 02 p0203 A66-11922

High detectivity gallium doped germanium detector for far IR radiation 02 p0231 A66-12062

Single crystal semiconductor thermal detector with constant bias current and self-cooling, taking into account end cooling 02 p0232 A66-12063

Synchronization of reflex klystron loaded with resonator with nonlinear capacitance from p-n junction of semiconductor diode at third harmonic of external signal 03 p0342 A66-12626

Noise characteristics of semiconductor devices turned to advantage by using noise measurements for reliability analysis, noting noise types and transistor irregularities effect on noise 03 p0345 A66-13217

Technical developments in field of semiconductors measured by degree of integration of electrical devices 03 p0345 A66-13236

High gain high-impedance three-stage operational amplifier with Darlington output in I/C form design and construction to illustrate mating metal film resistor with oxide passivated semiconductor device 03 p0347 A66-13334

Semiconductor diodes discussing germanium and silicon diode structures, ultrasonic chip bonding and epitaxial material effects on structures 03 p0348 A66-13344

Optimum performance voltage sources with silicon reference elements 04 p0491 A66-13382

Thermal resistance and capacitance of semiconductor device components determined, using thermal equivalent circuit for plotting cooling curves 04 p0492 A66-13491

Current-voltage characteristics of zinc-diffused gallium arsenide diodes measured between 4.2 and 300 degrees K with varying carrier concentrations in n-type region 04 p0494 A66-13733

Design and fabrication methods of semiconductor optoelectronic devices, noting junction emitter outputs into visible spectrum 04 p0494 A66-13764

Semiconductor devices at high injection levels, discussing electric fields and potential distribution in multilayer structures 04 p0495 A66-13769

Semiconductor devices for communications satellite signal output 04 p0495 A66-13804

Semiconductor diode pulse parameters measured in various operating conditions, showing changes in leading edge steepness

and switching amplitude of circuits 04 p0495 A66-13887

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 04 p0496 A66-13908

Variable characteristics of receiver for noise signals with semiconductor regenerative parametric amplifier /SRPA/ determined for fixed SRPA instability levels 04 p0496 A66-13910

Characteristics of solid state plasma conditions necessary for existence of plasma in semiconductor or semimetal 04 p0563 A66-13943

Semiconductor devices used in switching circuits at high pulse rates, emphasizing transistor and tunnel diode circuitry 04 p0497 A66-13962

Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 04 p0499 A66-14054

Microwave rotation spectrum for GeS in frequency ranges from 10.7 to 11.4 and 32.1 to 34.1 gc at temperatures between 450 and 650 degrees C 04 p0567 A66-14336

Emitter-collector current transfer ratio of electron optical phonon scattering in metal semiconductor structures 05 p0732 A66-14670

IR detector types and component structure noting bolometer, thermistor, thermocouple and semiconductor photoelectric type 05 p0676 A66-14679

Recombination emission process in direct semiconductor devices for realization of high speed nondestructive readout from tunnel diodes without direct measurement or perturbation 05 p0647 A66-14828

Linvill lumped model in analysis of semiconductor devices in pulsed ionizing radiation environment 05 p0734 A66-14849

Pulsed IR laser simulating radiation-induced transient ionizations in semiconductor devices and circuits 05 p0693 A66-14853

Semiconductor thin film p-n junction thermocouples consisting of germanium crystal deposit in vacuum 05 p0736 A66-14971

Semiconductor crystals, discussing dispersion property changes due to pulsed ruby laser radiation 05 p0697 A66-15354

Semiconductor cathode thermionic emission by solving simultaneously Boltzmann and Poisson equations relating field intensity with electron concentration 06 p0838 A66-15892

High-power solid state transmitter with highly efficient switching mode for power amplification, using square-wave driver technique to eliminate damage of line transients 06 p0824 A66-15971

Time dependent theory of tunneling for semiconductor junction with inhomogeneous electric field 06 p0922 A66-16174

Distribution of high plasma density along semiconductor rod, noting surface recombination rate and assuming existence of high level injection at one end of rod 06 p0923 A66-16176

Bibliography on semiconductor reliability classified under applications /computers, radio, spacecraft, etc/, costs, devices, environments, networks, production, etc 06 p0848 A66-16308

Semiconductor with dependence of drift velocity on electric field and containing region of negative differential mobility 06 p0850 A66-16444

Low level garnet limiter with operating range greater than one octave, using conductivity change due to impact ionization in n-type germanium, noting volt-ampere characteristic 06 p0851 A66-16459

Various conduction mechanisms through thin insulating films and relevance to possible thin film devices 06 p0852 A66-16508

Transient process during instantaneous switching of semiconductor junction diode from forward to neutral direction 06 p0852 A66-16546

Junction semiconductor triode with medium and high injection levels 06 p0852 A66-16548

Characteristics of electrochemical cells in which concentration of ionic species in

chamber can be varied via applied electric signal as analog of junction transistor 06 p0852 A66-1663

Coherent current oscillations observed in dark conductive In-doped CdS at 77 and 30 degrees K 06 p0925 A66-1665

Gunn effect n-type GaAs diode phase locked to stable frequency by injecting CV signal into circuit along with video pulse 06 p0925 A66-1667

Resistor values in semiconductors calculated from diffusion parameters and vice versa 06 p0857 A66-1692

Second sound in semiconductors, interpreting signal following amplification CdS crystal as diffraction caused by anisotropy of amplification coefficient 06 p0930 A66-1705

Influence of defects introduced during fast neutron irradiation on electronic behavior of SiC, examining reasons for deterioration of SiC semiconductor devices 06 p0936 A66-1713

Nature of radiation effects in semiconductor devices determined from alteration of electrical characteristics 06 p0938 A66-1714

Lifetime of semiconductor devices determined from noise levels 06 p0860 A66-1719

Microstrip transmission on semiconductor dielectrics provide high quality interconnection between microwave functions 07 p1007 A66-1750

HF acoustic amplification using parameter of conductivity, electric field strength and acoustic wavelength based on Hutson and White theory 07 p1002 A66-1782

Hall constant of semiconductors noting dependence on specimen size, film and current electrode parameters 07 p1100 A66-1793

Oscillators in local cylindrical symmetric and uniform magnetic fields 07 p1104 A66-1822

Electron devices - IEEE Symposium, San Francisco, August 1965 07 p1011 A66-1826

Electron distribution disruption by electric current across n-n heterojunction resulting in heating and cooling of respective electron gases in each of semiconductors, noting electron scattering 07 p1104 A66-1836

Two-dimensional distribution of carriers in semiconductor space charge region with current flow 08 p1267 A66-1865

High resolution molybdenum evaporator mask fabrication by scribing and etching for use in semiconductor devices 08 p1189 A66-1866

Semiconductor diodes and transistors applied to temperature measurement and control, examining automation application 08 p1221 A66-1869

Silicon based unijunction transistor, discussing design, operation parameters and application 08 p1190 A66-1877

Refractory metal disks as mounts for silicon wafers in high-power semiconductors 08 p1190 A66-1887

Gunn effect oscillators including domain formation, microwave source potentialities, power transfer, efficiency, etc 08 p1193 A66-19120

Behavior of high field instabilities in n-type gallium arsenide, examining device prospects related to phenomenological model for Gunn effect 08 p1270 A66-19122

High impedance semiconductor DC amplifier for use as measuring amplifier or operational amplifier 08 p1194 A66-19275

Hall effect measured by splitting alternating voltage produced in Hall circuit into two components, one with phase coinciding with Hall emf and other with phase departing by 90 degrees 08 p1273 A66-19285

Rectifying and ohmic contacts used in manufacture of gallium phosphide diodes that emit light when current is reversed 08 p1273 A66-19291

Book on heuristic approach to theory of physics of semiconductor electronics and analysis of semiconductor devices 08 p1195 A66-19462

Space radiation vs MOS devices and circuits 08 p1196 A66-19497

Indicator design for semiconductor strain gauges, discussing basic circuitry, calibration

- stability 08 p1226 A66-19599
- Near IR detection system using phototube
- Thin type Si phosphor photocathode, noting
- Diode discriminator S/N
- 08 p1227 A66-19696

- Scanning electron microscope to examine crystal mosaic structures and lasing properties of gallium arsenide laser diodes 17 p2937 A66-33300
- Laser based on excitation of gallium phosphorus arsenide solid solution by beam of fast electrons 17 p2937 A66-33304
- Optical modulation in bulk gallium arsenide, using Gunn effect 18 p3152 A66-33606
- Gallium arsenide diode laser as pulsed IR source for experiment and design considerations for radar indication of cloud height and visibility 18 p3066 A66-33616
- Light absorption by free current carriers role in kinetic equations of semiconductor laser/radiation system 18 p3119 A66-34691
- Orientation effect in GaAs injection lasers, noting emission characteristics and structural spectra 19 p3373 A66-35404
- Gallium arsenide laser excitation by fast electrons 19 p3374 A66-35760
- Forced emission from electron-excited cadmium selenide 19 p3441 A66-35788
- Valence band spin-orbit splitting in highly degenerate semiconductors determined from splitting of peak laser diode emission in high magnetic fields 19 p3374 A66-36036
- Gallium arsenide lasers operating at room temperature investigated, based on diffusion p-n junctions, discussing emission spectrum 19 p3375 A66-36070
- Semiconductor light emission mechanisms examined including wavelength emitted, width of ray emitted and efficiency of emission 19 p3445 A66-36263
- Replacing heated tungsten filament and IR filter by GaAs electroluminescent diode without filter for IR illumination 19 p3320 A66-36266
- Indium arsenide lasers and HgTe-CdTe photodetectors with very fast time constants for IR spectral band 19 p3376 A66-36268
- Avalanche transistor generation of jitter-free nanosecond current pulses for driving GaAs laser diodes at low temperatures 20 p3528 A66-37453
- Polarization of pulsed radiation from GaAs laser diode to determine origin of natural oscillations of resonator 20 p3578 A66-37549
- Spectral characteristics of two-photon optical excitation and light emission from CdSe semiconductor laser with modulated Q-factor 20 p3578 A66-37565
- Pulse generator for driving semiconductor laser diode, noting circuit diagram and operating characteristics 20 p3578 A66-37588
- Excitation of axial oscillation modes in semiconductor lasers analyzed, based on rate equations for chemical potentials of carriers and number of photons 20 p3579 A66-37687
- Impurity concentration effect on maximum continuous wave power from gallium arsenide lasers at 77 degrees K 20 p3580 A66-37782
- Mirror damage alleviation in giant pulse semiconductor laser operation, discussing use of high melting point mirrors cooling and oblique incidence 20 p3581 A66-38245
- Gain factor variation with threshold current in reflective and antireflective films of GaAs laser with photon and current densities 20 p3581 A66-38388
- Optical coupling using gallium arsenide laser for variation of frequency of diode emission through small change in current density 21 p3746 A66-38920
- Performance of GaAs semiconductor laser with resonator, noting dependence of forbidden zone width and absorption coefficient on free carrier concentration and incident photon energy 21 p3746 A66-38955
- Characteristics of efficient semiconductor lasers in UV portion of spectrum obtained at both liquid helium and nitrogen temperatures, using pulsed electron beam excitation on ZnS crystals 21 p3747 A66-39114
- Intensity and frequency equations for interband optical transitions and multimode properties in semiconductor lasers 22 p3929 A66-39666
- Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743
- 1.60 micron stimulated and spontaneous emissions from epitaxial single crystals in quasi-binary III-V compound semiconductor diodes of injection lasers at 77 degrees K 22 p3930 A66-39750
- Spontaneous and stimulated emission from GaAs diodes with three-layer structures consisting of n-n-p, n-p or n-p-p diodes 22 p3932 A66-40102
- Room temperature performance of GaAs laser diodes, using SCRs to achieve high pulse repetition rate 22 p3932 A66-40175

Coherent radiation generation in electron-hole indium antimonide plasma, discussing emission spectrum 22 p3965 A66-40319

Electron thermalization effect on semiconductor laser behavior, noting optical transition between impurity level and band, taking into account diffusion process 22 p3933 A66-40790

Neodymium doped glass laser using saturable liquid Q-switch 23 p4075 A66-41033

GaAs semiconductor quantum generator heating during injection pulse, analyzing temperature effect on external quantum output and generator efficiency 23 p4078 A66-41621

Transverse gain and spontaneous and stimulated emission at 8466 angstroms in GaAs structures 24 p4222 A66-42561

IR GaAs laser amplifier with gains as high as 2000, output powers of 150 mw and saturation occurring with current increase at low light levels 24 p4223 A66-42562

Semiconductor laser technology, operating principles, material properties and performance, with emphasis on GaAs junction lasers 24 p4224 A66-42802

SENSATION

S TACTILE SENSATION

SENSING

SA HORIZON SENSING

SA LATITUDE SENSING

Unattended weapons systems operation from rural power systems, emphasizing sensing to determine transfer from primary commercial to alternate source and fault patterns 20 p3542 A66-37242

SENSITIVITY

SA IMPACT SENSITIVITY

SA NOTCH SENSITIVITY

SA PAIN SENSITIVITY

SA PROPELLANT SENSITIVITY

SA RADIOSENSITIVITY

SA SHOCK SENSITIVITY

Photographic sensitivity of thin semiconductor layers of CuCl and certain other compounds 05 p0737 A66-15158

Optimal control systems and numerical analysis of error effect on sensitivity 11 p1680 A66-23274

Algebraic and graphical methods for evaluating system stability and parameter sensitivity 12 p1854 A66-24382

Controllability of linear and nonlinear dynamical systems, using perturbation properties expressed as sensitivity functions 13 p2050 A66-26059

Sensitivity operator as extension of time-domain sensitivity function to time-varying change of elements in nonlinear dynamic system, deriving sensitivity equations 13 p2050 A66-26060

Sensitivity design of systems with optimal controller structures, using game theory 13 p2050 A66-26061

Control system design, analyzing sensitivity of system performance to parameter variations by obtaining time domain measure of sensitivity 13 p2050 A66-26062

Synthesis problem solution for performance criteria defined by time domain sensitivity function, noting controller structure, parametric minimization and operative adjustment of parameters 13 p2051 A66-26071

Approach to sensitivity problem of optimal control systems by introducing performance index 13 p2052 A66-26072

Stability and sensitivity requirements considered simultaneously in control system design, minimizing time domain sensitivity index and incorporating transient response characteristics 13 p2052 A66-26073

Multiparameter sensitivity matrix analysis of linear feedback multiloop systems 13 p2053 A66-26082

Sensitivity comparison of closed-loop and open-loop systems 13 p2054 A66-26092

Sensitivity of sampled data systems with finite sampling duration derived as function of pulse width 13 p2054 A66-26093

Satisfaction approach to synthesis and control of linear systems 13 p2055 A66-26097

Desensitization in FM or PM transistorized receivers 14 p2259 A66-28042

Functional analysis methods applied to optimal control system sensitivity problem 16 p2671 A66-31060

Modern control theory applied to system

design for reduction of sensitivity of system to plant-parameter variation by use of feedback 17 p2901 A66-32290

Fringing effect on sensitivity of magnetic flow meter 17 p2926 A66-32874

Sensitivity of linear and nonlinear systems to parameter variations studied by analog computer simulation 18 p3089 A66-33910

Capacitive transducer principle, describing basic circuit, performance characteristics and sensitivity factors 19 p3355 A66-35472

Short period longitudinal aerodynamics of reentry vehicle flight control system, using sensitivity techniques 19 p3396 A66-35510

Sensitivity of closed loop optimal control system to parameter variations and external perturbations 19 p3324 A66-35581

Sensitivity methods in control theory - International Symposium on Sensitivity Analysis, Dubrovnik, Yugoslavia, August-September 1964 19 p3326 A66-36009

Sensitivity analysis and Liapunov stability, discussing correctly set problem and parametric imbedding within theory of partial differential equations 19 p3326 A66-36010

Sensitivity analysis and invariant imbedding, discussing application to adaptive control theory and reduction of boundary value problems to initial value problems 19 p3326 A66-36011

Sensitivity theory of nonlinear sampled data control system, establishing conditions for stability of equilibrium positions 19 p3327 A66-36012

Sensitivity analysis of time varying systems, comparing vector output errors of feedback and open loop system with same nominal transfer characteristics 19 p3327 A66-36013

Block sensitivity coefficient analysis in application of method of transformed circuits to closed-loop control systems, noting dynamic accuracy problem 19 p3327 A66-36014

Sensitivity points method for linear systems based on structural interpretation of logarithmic sensitivity functions, introducing sensitivity dipole 19 p3327 A66-36015

Structural rules determining sensitivity functions of nonlinear nonstationary systems obtained from sensitivity structure, using analog computer 19 p3327 A66-36016

Solution of two-point boundary problems in optimal control syntheses in which sensitivity coefficients for differential equations satisfy jump conditions at discontinuity point 19 p3327 A66-36017

Sensitivity to variations in parameter of signals in networks of linear transfer functions and instantaneous function generators, noting relay characteristics 19 p3327 A66-36018

Sensitivity analysis for relative stability of self-excited oscillations and transient response of nonlinear control systems 19 p3328 A66-36019

Topological formulae for sensitivity coefficients of three-terminal-pair-network functions derived by dual procedure in terms of impedance functions 19 p3328 A66-36020

Extended sensitivity design concept for achieving compensation to plant parameter variations 19 p3328 A66-36022

Synthesis of control systems invariant to parameter changes, examining sensitivity and advantages over self-adjusting systems 19 p3328 A66-36023

Synthesis of automatic control systems for linear plants with variable parameters satisfying specified performance criteria 19 p3328 A66-36024

Stability, reproducibility and sensitivity of combined systems of automatic control with variable structure determined by presence of sliding mode region 19 p3329 A66-36025

System having insensitivity to variation of plant parameters, characteristics or particular elements shown as structural problem 19 p3329 A66-36026

Sensitivity of performance of optimal control systems to plant parameter variations 19 p3329 A66-36027

Optimal control system sensitivity to inaccuracies determined in error measurement of initial

state 19 p3329 A66-36027

Synthesis of minimum sensitive open loop control system subjected to unpredictable environmental changes, discussing perturbation effects during and before process transient 19 p3329 A66-36027

Coordinate control theory of self-adapting systems, considering problems of sensitivity optimization and invariance 20 p3535 A66-3685

Synthesis procedure which insures good control system performance by adding t performance index term involving sensitivity coefficients 20 p3535 A66-3685

Sensitivity function in variability analysis noting relation concerning sensitivity sum and application to electric network 21 p3745 A66-3934

Potential sensitivity of energy radiatio detectors, examining measurement error causes for radiation power of natural and artificial sources 24 p4172 A66-4252

SENSOR

SA GUIDANCE SENSOR

SA IMAGE VELOCITY SENSOR

SA OPTICAL SENSOR

SA SOLAR SENSOR

SA SPACECRAFT SENSOR

Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles 03 p0372 A66-1325

Multisensor airborne reconnaissance mission planning and data acquisition 16 p2704 A66-3051

Sensor threshold definitions applied to rat gyros, comparing old and new AIAA specifications, noting threshold definition relation to flight control system malfunctions 16 p2708 A66-3143

Multisensor display requirements and approaches, using as example hypothetical two-man advanced tactical aircraft 19 p3336 A66-35512

Three superconducting niobium stannide liquid level sensors tested in triple point slush or liquid hydrogen for capability of detecting liquid-vapor interface 20 p3557 A66-37076

Frequency sensing for protection of frequency aircraft electric power systems, applying storms saturating reactor concept 20 p3499 A66-37175

Electric-to-fluidic and mechanical-to-fluidic transducers and sensors in fluidic system design 22 p3852 A66-40423

Temperature loop operation and transient response performance of pneumatic temperature control consisting of sensor and valve 22 p3853 A66-40540

Pure fluid absolute pressure ratio miniaturized sensor, noting performance and environmental capabilities [AIAA PAPER 66-748] 22 p3919 A66-40634

Miniature sensor for compensating static as well as transient temperature developed, using high gauge factor and high thermal coefficients of semiconductor strain gauges [AIAA PAPER 66-749] 22 p3919 A66-40636

Ring laser rotation rate sensor noting relation to electromagnetic radiation 24 p4223 A66-42564

Explosive lens flash blindness protection system consisting of flight helmet to support goggle lens, sensing device and discriminator unit 24 p4168 A66-42853

Ground radar systems for missile defense providing faster data processing, sensor location optimization, computer control, etc 24 p4175 A66-42953

SENSORIMOTOR PERFORMANCE

S PSYCHOMOTOR PERFORMANCE

SENSORY AID

Piezoelectric acceleration sensors and fluid interaction with spherical shell container undergoing translational oscillatory motion 08 p1228 A66-19769

SENSORY DEPRIVATION

SA CONFINEMENT

Psychological and medical aspects of human confinement, isolation and sensory deprivation 11 p1642 A66-22485

Disorientation, time perception and isolation 11 p1642 A66-22487

Psychological and sociological stressors on Mars mission vehicle crews such as sensory deprivation, isolation, confinement and limited social interaction 13 p2013 A66-25280

SENSORY DISCRIMINATION

BRIGHTNESS DISCRIMINATION
 Magnitude estimation of loudness,
 comparing experimental results of observers
 Estimates to sone scale 07 p1000 A66-17732

FEEDBACK
 Visual and tactile display for compensatory
 tracking, noting conditions for minimum
 error, mean square error,
 16 p2644 A66-31271

Control feel application to aircraft
 controls, noting man-machine system
 configurations, anthropometric and physical
 factors, sensory motor requirements,
 17 p2869 A66-33446

SENSORY PERCEPTION

Time sharing and vigilance study by
 plener reanalyzed from signal detection
 theory viewpoint 01 p0020 A66-10613

Effect of amphetamine on signal
 detectability in vigilance
 01 p0020 A66-10616

Human accommodative system,
 investigating absence of odd-error signal
 mechanism under restricted monocular
 viewing conditions 06 p0819 A66-16850

Limitations and reliability of human
 operator of control systems to process
 information, noting importance of endurance
 and sensory perception 12 p1807 A66-25012

SENSORY STIMULATION

EEG and cortical and subcortical responses
 analysis of sensory stimulation in restricted
 dogs and normally reared
 littermates 11 p1644 A66-22950

Square-wave electropulse evaluated as
 more effective tactile stimulus for cross
 modality comparison of reaction times than
 more traditional stimuli 23 p4030 A66-41576

SEPARATED FLOW

Relation between flow in separated region
 and heat transfer for shallow rectangular
 cavity in subsonic turbulent
 airflow 05 p0607 A66-15463

Flow field in rectangular cavities at low
 Reynolds number 07 p1020 A66-17941

Heat transfer and stability of laminar
 hypersonic separated flow around annular
 cavity conical model 07 p0981 A66-18117

Viscous structure of separated eddy
 bounded by circular streamline and eddy in
 square cavity driven by moving boundary at
 top 08 p1166 A66-19819

Shape and propagation velocity of
 rotational separation zones in isolated array
 of blade profiles 09 p1328 A66-20762

Pressure distribution and air injection
 effects in transitional separated flow over
 piked hemisphere at supersonic
 speed 11 p1635 A66-23004

Analogy between impulsive flow over
 circular cylinders and flat plates, and
 separated flow about lifting bodies moving
 at high angles of attack in subsonic and
 supersonic range 12 p1795 A66-23575

[AIAA PAPER 65-395] Laminar separated hypersonic flow over
 piked bodies in gun tunnel for analyzing
 parameters influencing heat transfer rates
 in reattachment region 14 p2218 A66-27403

Oscillating laminar separated flow formed
 head of forward facing step oscillating
 transversely to hypersonic free stream,
 noting phase differences between separation
 point movement and that of
 step 14 p2221 A66-28110

Flow pattern and heat transfer distribution
 in regions of adverse pressure gradient and
 separated flow over two-dimensional models
 at Mach 10 airflow 15 p2424 A66-29271

Chemiluminescent technique for flow
 visualization using electrochemical system
 and water tunnel 15 p2476 A66-29688

Laminar boundary layer separation in
 hypersonic flow on body with symmetry of
 revolution 16 p2629 A66-30583

Orifice increases resistance coefficient
 when edge of wedge is facing incident flow
 and decreases it when wedge is turned
 round 16 p2689 A66-31518

Velocity spikes in near-wake of circular
 cylinders held transversely to air
 stream 16 p2690 A66-31654

Turbulent supersonic base pressure for
 Chapman-Korst flow model of separated
 flows 17 p2906 A66-32077

Turbulent gas flow in wake of flow
 separation from solid

surface 17 p2909 A66-32563

Separated unsteady flow about flat plate
 rotating impulsively from rest to uniform
 angular velocity about axis along leading
 edge, noting torsional oscillations
 [AIAA PAPER 66-427] 17 p2910 A66-32753

Laminar separation in supersonic and
 hypersonic flow analyzed in gun tunnel,
 noting concept of incipient separation and
 free interaction principle
 [AIAA PAPER 66-455] 17 p2910 A66-32761

Wind tunnel analysis of separated flow in
 region of several two-dimensional flow
 perturbations, presenting fluctuating
 pressure levels as function of Mach number
 for undisturbed flow
 [AIAA PAPER 66-456] 17 p2910 A66-32762

Separation streamline for massive blowing
 in free stream for model injected into arc
 tunnel flow
 [AIAA PAPER 66-457] 18 p3046 A66-33650

Base pressure behind ridge in separated
 supersonic flow of compressible gas
 determined for case of turbulent
 mixing 18 p3103 A66-35053

Hypersonic boundary layer separation and
 expansion at shoulder of blunt based
 body 21 p3693 A66-38683

Turbulent momentum transfer mechanism
 in separated flow region of rectangular
 cavity facing oncoming turbulent boundary
 layer 24 p4193 A66-42154

SEPARATION

SA BOUNDARY LAYER SEPARATION

SA CHARGE SEPARATION

SA DESORPTION

SA SPACING

SA STAGE SEPARATION

Selective separation of nickel titanium and
 nickel aluminum alloys and electrochemical
 behavior in various
 electrolytes 06 p0896 A66-16542

Regenerative separation and recovery of
 carbon dioxide from manned atmospheres,
 using metallic oxides
 [AICE PREPRINT 26D] 10 p1491 A66-21191

Regenerative separation and recovery of
 carbon dioxide from manned atmospheres,
 using metallic oxides
 [AICE PREPRINT 26D] 17 p2868 A66-32681

Figure that results from disintegration of
 package of plates during fall through
 atmosphere, deriving equations for
 rotational motion of
 plates 20 p3493 A66-38118

Transverse separation of rare gas-metal
 vapor mixture components in positive
 nonisothermal plasma column in plain-
 symmetric glow discharge 22 p3958 A66-40934

SEPARATOR

SA FILTER

Electromagnetic isotope separators used in
 nuclear physics for analysis of ion-matter
 interaction 08 p1257 A66-18694

Nonrotating MHD liquid-metal power
 system, noting nozzle and separator
 configuration 13 p1998 A66-25527

SEQUENCE

S MODE SEQUENCE

SEQUENTIAL ANALYSIS

Error effect in a priori information on
 sequential estimate variance of linear
 system states, noting optimal filter
 synthesis 05 p0653 A66-14601

Bayes risk function of sequential games,
 discussing recurrence formula, decision rule
 and approximate computational method in
 pattern recognition 05 p0639 A66-15838

Method for eliminating random factors in
 analysis of sequential
 systems 07 p1004 A66-18070

Optimal control by random sequences,
 dynamic programming and Wald sequential
 analysis 09 p1362 A66-20644

Operational calculus for finite rings
 employing Galois fields for periodic
 sequences via transfer function
 application 11 p1678 A66-23242

Sequential estimation technique for
 correlated stochastic
 variables 12 p1850 A66-24260

Circular kernels and circular
 transformations in analysis of infinite
 sequences 14 p2322 A66-27627

Sequential linear estimation when
 measurement function is nonlinear, not

considering system dynamics, applied to
 space trajectories 17 p2946 A66-32456

Synthesizing time optimal control for
 plants described by linear differential
 equations with constant
 coefficients 18 p3092 A66-34993

Existence and properties determined for
 most effective sequential method of seeking
 argument value at which continuous
 function of one variable assumes extremum
 value 19 p3391 A66-36659

Algorithm based on sequential optimization
 of nonlinear control
 system 19 p3334 A66-36676

Sequential estimation on states of linear
 systems disturbed by white noise,
 determining relations between covariance
 matrices 19 p3338 A66-36736

Optimum search for location of maximum
 M of unimodal function when M is initially
 uniformly distributed over some
 interval 21 p3757 A66-39135

Continuous sequential decision for
 derivation of minimum search time for
 determining one nonzero mean process in
 presence of finite number of
 hypotheses 21 p3705 A66-39148

Approximate solution to digital sequential
 least squares estimation of eigenstates of
 nonlinear processes 23 p4050 A66-41614

SEQUENTIAL CONTROL

Two analysis methods for sequential digital
 servomechanism 02 p0180 A66-11683

Pseudorandom binary sequential digital
 simulation of feedback control systems
 subjected to random input
 signals 13 p2030 A66-25211

Hydraulic system of Cessna 210 aircraft,
 noting component structure, electrical and
 hydraulic sequencing devices, etc
 [SAE PAPER 660202] 13 p2002 A66-26385

Order-sequence generator for Iris remote
 control system and telemetry of
 satellites 14 p2253 A66-27549

XV-5A V/STOL aircraft flight testing,
 noting handling qualities and sequential
 diversion capability 17 p2844 A66-32731

Two analysis methods for sequential digital
 servomechanism 18 p3053 A66-34009

Minimum feedback loop realizations of
 synchronous sequential switching
 circuits 18 p3090 A66-34072

AEI Airlog system for exploiting
 pneumatic techniques for sequential control
 and interlock protection of process plant
 and machinery 20 p3502 A66-37654

Truncated sequential life acceptance tests
 of AGREE Task Group Three type, noting
 that such tests while useful are not
 optimum 20 p3574 A66-37968

Computer simulation experiments design
 for industrial systems, considering variance
 techniques, multiple ranking procedures,
 sequential sampling and spectral
 analysis 22 p3870 A66-40132

SEQUENTIAL DETECTION

Identification of distributed parameter
 systems by partial differential equations
 [ASME PAPER 65-WA/AUT-1] 05 p0710 A66-15702

Rapid acquisition by sequential estimation
 /RASE/ technique for acquisition of
 pseudonoise 06 p0834 A66-16859

Comparison of sequential and
 nonsequential detection systems with
 uncertainty feedback, showing performance
 as function of peak-to-average power
 ratio 10 p1518 A66-21838

Adaptive realization of optimum receiver
 for synchronous recurrent
 waveform 10 p1505 A66-21843

Radar and communication systems unsolved
 problems, including theoretical foundations
 and receiver and transmitter
 design 11 p1653 A66-22631

Communications system design consisting
 of sequential encoder-decoder in conjunction
 with modulation detection
 system 18 p3067 A66-33903

Multichannel sequential detection in case
 of reception through independent multiple
 channels with noise 19 p3296 A66-35295

Communication possibility over memoryless
 channel with computational iterative
 decoding scheme that is asymptotically
 complex 21 p3704 A66-39141

Coding scheme using noiseless feedback
 link to improve communication over noisy

forward link, assuming no bandwidth constraint 21 p3704 A66-39142
 Coding scheme using noiseless feedback link to improve communication over noisy forward link, assuming band-limited signals 21 p3704 A66-39143
 Canonical theory approximation of optimum or Bayes detection procedures in critical limiting threshold mode of operation 21 p3705 A66-39146
 Probability ratio sequential detector for use with mechanically scanned surveillance radars 23 p4045 A66-41323
 Exact sample size probability distributions for biased square law sequential detector with signal absent 24 p4173 A66-42637
 Sequential interference-rejection modes subjected to parameter consistency test at each sequential step for desired interference-signal rejection 24 p4175 A66-42960

SEQUENTIAL MACHINE

Mechanization of synchronous sequential machines with minimal shift registers, using algorithm 03 p0337 A66-12572
 Processes in linear sequential machines calculated by operations and numerical values determined in appropriate finite field 03 p0338 A66-13040
 Modular synthesis of sequential machines, discussing external variable dependent single memory element devices 05 p0637 A66-14927
 Book on unified treatment of switching theory, emphasizing synthesis and analysis aspects of switching circuits 06 p0861 A66-16198
 Associative parallel processor using word and bit logic and sequential-state-transformation mode, with application to picture processing and pattern recognition 12 p1827 A66-23830
 Processes in linear sequential machines calculated by operations and numerical values determined in appropriate finite field 18 p3074 A66-35003
 Homogeneous microelectronic structures using integrated circuit technology for fabrication of logical and sequential facilities 19 p3323 A66-36821

 Evaluation of transfer function maxima, analyzing series convergence 04 p0538 A66-13482
 Behavior of Ising model of ferromagnet in nonzero magnetic field, using high temperature series expansion 04 p0563 A66-13815
 Isotropic scattering of radiation from point source in finite atmosphere bounded by totally absorbing spherical shell, deriving iterative series solution 04 p0548 A66-13828
 Multiple Stieltjes integral representation of functions in form of Markov series 04 p0539 A66-13871
 Linear methods of summation of Fourier-Laplace series 06 p0902 A66-16229

Complete solution of problem of branching of solution of nonlinear equation in multidimensional case 07 p1056 A66-17601
 Estimates of Taylor coefficients in theory of regular function of several complex variables 07 p1056 A66-17605
 Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964
 Boundary layer flow of rotating sphere by series expansion from pole, discussing eruption at equator 07 p1021 A66-18046
 Bellman functional equation derived for class of optimal control problems without using Taylor series expansion or mean value theorem of differential calculus 07 p1017 A66-18347
 General relativity for study of emission of gravitational waves from isolated axisymmetric sources vibrating smoothly for finite period 08 p1254 A66-18621
 Series solution for deflection of rectangular plate subjected to concentrated load at arbitrary location, using Green function 08 p1310 A66-19161
 Plane Poiseuille flow analyzed by method of elementary solution 09 p1365 A66-19967
 Construction method for asymptotic series of given class of functions and application to diffraction theory problems 09 p1394 A66-20459
 Deflection of thin circular plate under eccentric loading using complex variables, obtaining expressions in series form 09 p1467 A66-20581
 Weighting function and frequency response determination of linear system with N degrees of freedom, using convergent series solution 09 p1396 A66-20636
 Series expansion solutions of Dirichlet and Poincare problems for systems of elliptical PDEs 09 p1397 A66-20934
 Asymptotic expansions of double and multiple integrals occurring in diffraction theory, using stationary phase method 10 p1550 A66-21850
 Chaplygin asymptotic series solution method for differential equation systems 10 p1551 A66-21915
 Parabolic form representation by linear combinations of quaternary theta series 10 p1552 A66-21987
 Recursive generation of expansion coefficients of time-dependent f and g series in two-body problem, using algebraic recurrence formulas 11 p1769 A66-22529
 Internal flow problems in free, nearly free molecular regimes and higher transition flows, using Boltzmann equation and series expansion to solve integral equation for surface collision density 11 p1693 A66-22940
 Convergence properties of exponential series expansions used as approximation in electrical network theory for real Schwartz distribution 11 p1724 A66-23423
 Gravitational and satellite data determination of spherical-function series coefficients for expansion of Earth gravitational potential 12 p1867 A66-23516
 Asymptotic series solution to problem of laminar film condensation on nonisothermal vertical plate, considering inertia and convection effects 12 p1978 A66-23996
 Representation of arbitrary functions in region of convergence through Dirichlet series expansion 12 p1903 A66-24018
 Dirichlet series representation of arbitrary analytical functions in convex region of convergence with complex exponent 12 p1903 A66-24019
 Multiple Stieltjes integral representation of functions in form of Markov series 12 p1903 A66-24027
 Equation for laminar boundary layer on flat plate in viscous compressible gas flow under chemical relaxation, solved by approximate method in series form 12 p1863 A66-24244
 Fluctuations in diurnal variations of ionization of F-2 layer interfering with radio wave propagation determined by series expansion 12 p1869 A66-24270
 Bilinear expansions treating Euler transform of special integrand, reviewing properties of Jacobi function for application in quantum mechanics or plasma physics 12 p1905 A66-24566

Supersonic flow past blunt body by Taylor series expansion from shock wave, Newton-Busemann expansion, truncated series expansion from axis, etc, and comparison with numerical solutions 13 p1989 A66-251
 Species diffusion in frozen hypersonic boundary layer with Falkner-Skan velocity profiles, where surface is linear, given Mellin transform, constructing series an asymptotic expansion of surface concentration 13 p2060 A66-251
 Vlasov equation solution, using expansion in inverse powers of magnetic field 13 p2145 A66-257
 Models of hybrid AM-PM signal modulation by single sinusoid and having one-side frequency spectrum described by using MacLaurin series expansions, noting phase relation of sidebands to carrier 14 p2235 A66-2700
 Series expansion of harmonic function on closed unit circle with center at pole 14 p2321 A66-2720
 Exact order of best approximations of analytic functions expressible as generalized gap series in Faber polynomials 14 p2321 A66-2732
 Radiation from vertical dipole in warm plasma determined by asymptotic series expansion of integral solutions, noting surface wave propagation, transformation from acoustic to electromagnetic mode of boundary, etc 14 p2240 A66-2791
 Reflected shock wave equations for unknown function expansion in series of small parameter considered excess pressure value 14 p2278 A66-2805
 Corrections to individual terms of Stokes approximation for disturbing potential given in series expansion of spherical functions using Earth model 14 p2288 A66-2821
 Dual integral equation and dual series analysis and application to mixed boundary value problems in elasticity, hydrodynamic and electrostatics 15 p2526 A66-2895
 Multiple characteristics of square systems of linear partial differential equations with constant coefficients, obtaining formal series solutions for systems 15 p2527 A66-2906
 Series expansion solutions for shock tube laminar wall boundary layer, taking into account mutual interaction between boundary layer and free stream 15 p2479 A66-2927
 Green-Hadamard functions of Tricomi singular problems for generalized wave equation, expressing equation integrals as hypergeometric Humbert and Horn series 15 p2530 A66-2985
 Modified Sprindzuk theorem, discussing transcendental functional analysis 16 p2732 A66-30531
 Steady motion of viscous incompressible fluid between concentric spheres, injecting and ejecting fluid through inlet and outlet holes, describing boundary conditions by series expansion 16 p2687 A66-31294
 Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334
 Signal analysis with aid of Laguerre polynomials 16 p2655 A66-31688
 Perturbation function expansion in power series of eccentricities in elliptical three-body problem, describing algorithm for numerical values of Newcomb operators of arbitrary order and giving tables for Ljapunov series expansions 17 p2995 A66-31850
 Satellite orbit stability discussing proof of Haselaine formal stability theorem, doubly periodic expansions, satellite motion around oblate curve, etc 17 p2999 A66-32061
 Series solution to parabolic PDE for heat transfer from smooth wall to turbulent boundary layer 17 p3037 A66-3304
 Scalar function expansion methods reviewed for hemispheric meteorological data in antisymmetric surface spherical harmonic or Laplace series 17 p2949 A66-3333
 Discrete time signal estimation, noting minimum mean square error, minimum estimation, etc 18 p3068 A66-3390
 Infinite boundary value problem solution for third-order differential equations obtained in convergent series

Parabolic form representation by linear combinations of quaternary theta series expansion of inversion of n-dimensional Laplace transforms in terms of hyperspherical polynomials having coefficient computed recursively 19 p3392 A66-36192
Mean value theorem for curves arising in solution of ordinary differential equation by series method 20 p3590 A66-37525
Class of linear second-order differential equations with algebraic moving singular points, considering convergent series inversion and existence 20 p3591 A66-37753
Navier-Stokes equation series form of radial flow of incompressible fluid between two rotating parallel disks 20 p3548 A66-37991
Eigenfunction expansion of analytic linear ordinary differential operators of boundary value problem with normalized irregular integrating boundary conditions 20 p3592 A66-38432
Gravitational and satellite data determination of spherical-function series coefficients for expansion of Earth gravitational potential 21 p3732 A66-38660
Iterative algorithms for calculating sum of some series, considering gamma and theta functions 21 p3758 A66-39368
Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139
Radiative heat exchange between body and enclosure when temperature and emissivity are not uniform on surface, using series solution 22 p3998 A66-40142
Cylindrical shell analysis for short segments of shells of revolution with axisymmetric edge-loading and variable wall thickness, using matrix method 22 p3994 A66-40369
Expansion of function in series of Bernoulli polynomials 22 p3939 A66-40392
Series form of failure probability for systems with spares 22 p4001 A66-40516
Second term obtained in asymptotic series for second adiabatic invariant of charged particle motion in static magnetic field and found to vanish at mirror points 23 p4103 A66-41491
Singular solutions for Chaplygin equations using generalized wave functions, noting iteration method for finding wave equation corresponding to first terms of expansion series 23 p4085 A66-41561
Series truncation applied to hypersonic flow problems by treating elliptic partial differential equation as parabolic or hyperbolic 23 p4014 A66-42060
Series solution to problem of spherically isotropic elastic medium bounded by concentric spherical surfaces, noting force and stress concentration 24 p4285 A66-42141
Stress separation in photoelasticity, using series solution of Laplace equation and least squares method 24 p4292 A66-42862
ROTONIN
Radiation-protective agents /anoxia, serotonin, amino thiols/ tend to increase sulphydryl groups in mice spleen and Ehrlich ascite carcinoma 17 p2861 A66-32399
RT
SPACE ELECTRIC ROCKET TEST
/SERV/
RUM
A PROTEIN
Serum glucose and free fatty acids in man during prolonged exercise 17 p2859 A66-32366
RVICE
METEOROLOGICAL SERVICE
RVICE MODULE
A COMMAND MODULE
Integrated checkout of Apollo payloads, command module, lunar excursion module and service module 14 p2271 A66-28423
Central static inverter used to establish 250-v, 115/200-v, three-phase 400-cps AC power distribution for Apollo Spacecraft command and Service module 20 p3498 A66-37170

SERVO LOOP

Closed loop hydraulic servo system simulating flight stresses on motor case of solid propellant rocket motor in static firing test stand for calibrating stand 03 p0353 A66-13218
Series analysis of closed-loop system containing loaded hydraulic valve, with equations of motion and response of system to ramp input and Coulomb load 06 p0810 A66-16915
Secant correction and dynamic compensation for tracking pedestal servo loop in operational amplifier circuit 12 p1816 A66-24261
Phase-lock servo-loop circuit for space communication providing estimate of incoming signal through correlation process 24 p4175 A66-42826

SERVOACTUATOR

Stabilization and control of Saturn S-II engine actuation system and application to other hydraulic positioning servos, reducing position errors 01 p0015 A66-10669
Balanced power concept for weight savings in aircraft actuation system consisting of mechanically actuated flight control surface, mechanical servo, flywheel and motor 01 p0015 A66-10670
Mechanical servoactuator for all-mechanical flight control system for aerospace vehicles, noting traction transmission effect on toroidal actuator, cascading for power amplification, etc 01 p0015 A66-10671
Fluidic control subsystem, describing components such as electric/fluid and position transducer, operational amplifier, fluid bellows and operation characteristics [ASME PAPER 65-WA/AUT-10] 05 p0624 A66-15609
Electrohydraulic digital actuator design and conversion of discrete electric input signal in binary code to linear motion 14 p2227 A66-28366
Automatic feedback table leveling system, noting tilt to simulate aerodynamic drag 21 p3722 A66-38887

SERVOAMPLIFIER

North-seeking rate gyroscope design with variable gain amplifier control of housing 01 p0070 A66-10877

SERVOCONTROL

Outer loop control mechanization for automatic landing systems associated with flight control, noting series servo concept as compared to parallel servo mechanization 01 p0014 A66-10664
Parameter variation effect on performance of second order maximum effort /bang-bang/ controller, noting optimum system, stability analysis and analog computer study 02 p0207 A66-11790
Optimization of linear servosystem comprising ideal proportional, integral and differential control regulator and order system 03 p0350 A66-13095
Four-way fluid state vortex hydraulic servovalve discussing design principles, performance and application 04 p0460 A66-13785
Design of optimal servocontrol system with feedback, using variational calculus method 05 p0657 A66-15099
Obtaining deadbeat response of third order servosystems by discrete parametric control 06 p0866 A66-16965
Fluidic closed-loop digital position-speed servocontrol system without moving parts, using pulsed air 07 p0991 A66-17878
Characteristics of pulsed wave at output of linear system with pulsed rectangular wave input 07 p1016 A66-18071
Phase-advance stabilization of servocontrol systems by use of limiters controlled by error signal 08 p1199 A66-18671
Accelerated coincidence of gyro servocontrol system at discrete moments of time with values of target coordinates 08 p1254 A66-19678
Discontinuous Liapunov functions applied to stability analysis of position-controlled system with symmetrically-controlled asynchronous motor 08 p1201 A66-19685
Hydraulic servocontrol system performance improvement by eliminating turbulent flow and regulating servoactuator pressure drop 13 p1997 A66-25130
Equalization systems for stochastic

processes, discussing automatic adaptive servocontrol, feedback control and vibration simulation equipment 13 p2048 A66-25848
Adaptive servocontrol equalization system using true integrator instead of RC averager in feedback loop and memory circuit 14 p2267 A66-27664
Letov problem and analytical construction of optimal controller from motion equations of linear servosystem 15 p2469 A66-29045
Sufficient conditions for absolute stability of servosystem with backlash, taking into account plant inertia and hypothesis of absolutely inelastic collisions 17 p2901 A66-32258
Discontinuous Liapunov functions applied to stability analysis of position-controlled system with symmetrically-controlled asynchronous motor 18 p3091 A66-34671
Accelerated coincidence of gyro servocontrol system at discrete moments of time with values of target coordinates 20 p3597 A66-37270
Development of family of standard polynomials with adjustable damping, noting first- and second-degree numerators 22 p3884 A66-40514

SERVOMECHANISM

Effects of stiction and Coulomb friction on steady state response of servosystem studied, using simple friction characteristic 02 p0180 A66-11308
Two analysis methods for sequential digital servomechanism 02 p0180 A66-11683
Power transistors used for stabilization of emission current of electron bombardment ion source for mass spectrograph 04 p0498 A66-14037
Nonlinear servomechanism design by harmonic linearization of nonlinearity 07 p1013 A66-17403
Building blocks of pictorial navigation display for projection of servo-driven microfilm map onto rear projection screen 07 p1069 A66-17707
Nonlinear servomechanisms using bang-bang control mode 07 p1016 A66-17850
Feedback transfer function analyzer for error reduction in performance measurement for servocontrol systems 07 p1016 A66-17851
Maximally reliable exponential prediction equations for data rate limited tracking servomechanisms 08 p1183 A66-18931
Intermediate text on dynamic analysis and automatic control 08 p1200 A66-19464
Improvement of transient response of third order servosystems by discrete control of system parameters, noting application of switching circuit 09 p1360 A66-19859
Automatic system dynamics analysis, considering variations of random parameters, determining reliability of representative servosystems 09 p1361 A66-20302
Existence of relationship between slope of servosystem functions with limited bandwidth and bandwidth magnitude 09 p1346 A66-20575
Hamel and Cypkin methods, used to determine free oscillation of plus-or-minus servomechanism, applied to transfer function of certain type 10 p1517 A66-21283
Realignment saturation in linear servomechanism, determining structure and corrector networks leading to overall stability 10 p1517 A66-21284
Microminiature Loran-C Receiver/Indicator for analog-to-digital conversion, using integrated circuit technology 10 p1555 A66-22047
Operation of nonlinear servosystem with autocorrelator as measuring element in presence of noise 11 p1677 A66-22759
Nonlinear servomechanism analyzed, using Fokker-Planck equation, discussing tracking failure 11 p1670 A66-23224
Servo tester with automatic data acquisition and reduction /STADAR/, discussing design and operational capability in Apollo program 13 p2027 A66-25661
Optimum systems with limited process information, analyzing class of input signals and minimizing amplitude of error signals 13 p2048 A66-25888
Digital-mode FM CW laser ranging and tracking system using compound axis servomechanism 13 p2024 A66-25982
Approximating probability characteristics

of mismatch for steady mode of operation of astatic servosystem with modulation 13 p2056 A66-26480

Control theory of nonlinear servoanalysis, based on describing function technique, provides design data for type I servomechanisms, deriving equations 14 p2264 A66-27117

Statistical optimization of rate-composite inertial navigation system based on Phillips theory of servo systems 14 p2328 A66-27364

Solid propellant rocket engine omniaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700

Transfer functions and signal reproducing properties of relay servomechanisms for case of slowly varying input signal 15 p2476 A66-29993

Energy feedback adaptive control system for elimination of effects of load inertia variations in servomechanisms 16 p2670 A66-30812

Servomechanism design, noting optimum response parameters, physical characteristics as functions of inertia, external force, energy dissipation, kinetic energy for operation, etc 16 p2671 A66-31062

Dynamic characteristics of relay servo systems 17 p2902 A66-32578

Two analysis methods for sequential digital servomechanism 18 p3053 A66-34009

Design of integrating and position servomechanisms having tachometer-generator feedback, noting role of inertial moments effect 20 p3540 A66-38444

Communication network response to arbitrary transients calculated by digital computer, permitting replacement of analytic-function wave forms by lists of equal-interval sample values 22 p3883 A66-39724

Phase plane method in study of transfer functions of higher order relay servosystems 23 p4050 A66-41613

Transient discontinuous oscillation of system with two degrees of freedom and Coulomb damping 23 p4024 A66-41948

SERVOMOTOR

Optimum speed control of automatic system, noting nonlinear mechanical characteristics of slave motor and speed dependence of load moment 06 p0863 A66-16531

Altitude control for VTOL aircraft facilitates control of hovering flight, noting construction, operation principles and performance 10 p1484 A66-21379

Absolute stability of automatic control system with allowances for external load of hydraulic servomotor 11 p1674 A66-22358

Characteristics and application of AC and DC servomotor 13 p2002 A66-26314

Effect of backlash between servomotor and control element on dynamics of indirect control systems, assuming system has rigid feedback, sensitive element is inertialess and plant has positive self-regulation 14 p2269 A66-28475

Instantaneous electromagnetic torque measuring system developed by two-phase 60-cycle servomotor 18 p3110 A66-33834

Closed loop control system combined with air beating technology for measurement of multicomponent microforces 20 p3555 A66-36870

Pneumatic servomotor synthesis by root loci technique providing direct insight into effects of parameter changes on system response 21 p3697 A66-39216

Selection of size of hydraulic servomotor with rotary hydraulic motor controlled by electrohydraulic spool valve to reduce open-loop gain for given closed-loop stiffness 22 p3852 A66-40515

SERVOSTABILITY CONTROL

Stability of two-phase nondimensional flow, relating hydrodynamic response to that of servomechanism 05 p0723 A66-15098

Behavior of human operator as link in servosystem in tracking and compensation regimes, determining transfer function under steady state and perturbed conditions 12 p1851 A66-24316

Vibration generator consisting of electrodynamic shake table, control

amplifier, drive generator, auxiliary servo equipment and equalization console 13 p2058 A66-25496

Parameter variations and stability problem in coarse-fine synchro servos leading to expressions for optimum threshold detector setting 13 p2000 A66-25840

Automatic stabilization systems reduce accidents due to disorientation, emphasizing sensor-servo system for roll axis control [SAE PAPER 660201] 13 p1996 A66-26390

Blade vibration simulation in helicopter trainer by applying amplitude motion to trainer 14 p2271 A66-28030

SET PROGRAM

S SOLAR ENERGY THERMIONIC /SET/ PROGRAM

SET THEORY

Inverse problem of Khavinson and Khavin approximated for complex plane sets 02 p0250 A66-12096

Theorems for determining common point of convex sets by method of successive projection 02 p0250 A66-12097

Set theory applied to zero-memory nonlinear stochastic problems to derive Gauss function properties 05 p0707 A66-14615

One-to-one continuous representation of topological spaces 06 p0903 A66-16904

Necessary conditions for extremum in problems of control with aftereffect 10 p1518 A66-21975

Theorem proof derived for maximal chains of reflexive and symmetric binary relations, based on Wallace formulation of Hausdorff maximality principle 15 p2529 A66-29851

Minimal element determination for certain set related to interpolation of second-order linear ordinary differential equations 18 p3126 A66-33954

Fortran program for finding minimum value of monotonic function defined on ordered sets of positive integers 19 p3309 A66-36044

Necessary conditions for extremum in problems of control with aftereffect 19 p3330 A66-36185

Algebraic enumeration methods for sets of all-trees, two-trees, cotrees and two-cotrees used with Kirchhoff rules for network analysis 20 p3539 A66-38146

SEX FACTOR

Induction and suppression of hypothalamic self-stimulation behavior by microinjection of endogenous substances at self-stimulation site 20 p3506 A66-37603

SEXTANT

Navigator sighting accuracy in midcourse guidance system for manned space flight, using simulated vehicle mounted space sextant [AIAA PAPER 64-651] 03 p0390 A66-12740

AN/AVN 1 Astro Navigation Set, remote controlled automatic photoelectric sextant 07 p1073 A66-17766

Manual control sextant sighting performance for space navigation, using simulated and real celestial targets 10 p1554 A66-21894

Gemini VII star sightings analyzed, using handheld space sextant in Gemini VI, discussing effect of bias, timing, angle measurement and trajectory errors 21 p3767 A66-38893

SH-3 HELICOPTER

CHSS-2 Haul Down and Handling System for operating large /SH-3A/ helicopter from small ships 10 p1484 A66-21891

SHADOW

SA LUNAR SHADOW SA UMBRA

Earth satellite elliptical orbit intersection point with Earth shadow determined by exact solution of fourth-power algebraic equation with respect to $\tan E/2$ 17 p2995 A66-31848

Shadow and diffraction effect of spars on Cassegrain antenna system gain performance 18 p3082 A66-34283

SHADOW PHOTOGRAPHY

Wave front reconstruction /holography/, hologram production, interferometry, schlieren photography and shadowgrams applied to fluid mechanics 10 p1536 A66-21750

Shape and dimension of spark arising during focusing of laser emission 15 p2516 A66-29210

Shape and dimension of spark arising during focusing of laser emission 17 p2936 A66-3301

Spark shadow projections in air for glare pulse synchronization from two lasers, using rotating prism to modulate quality factors 18 p3144 A66-3401

Synchronized shadow photochronograph investigation of wire explosion shock wave in air 21 p3772 A66-3930

SHADOWGRAPH

Head-on interaction of plane shock wave and supersonic cone-cylinder projectile 03 p0316 A66-1281

Statistical characteristics of high speed turbulent wake boundaries [AIAA PAPER 65-808] 03 p0359 A66-1322

Flow separation, wake configuration and droplet motion in purified system shadowgraphically analyzed 10 p1524 A66-2180

Schlieren system for flow visualization 14 p2270 A66-2781

Shadowgrams, schlieren photographs and interferograms produced from reconstructed wavefront 19 p3354 A66-3538

Compressible and incompressible flow made visible by optical method sensitive to density variations, shadowgraph, schlieren system, Mach-Zehnder interferometer and holographic interferometry with lasers 24 p4192 A66-4319

SHAFT

SA ROTATING SHAFT

Transverse vibrations of viscoelastic shaft fixed at one end and supporting mass subjected to sinusoidal force at other 01 p0158 A66-1108

Model analysis of radial oscillations of shaft with pounding of ball bearings 02 p0299 A66-1184

Elastic-plastic stress and strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 05 p0689 A66-15442

Elastic torsional analysis of irregular shapes, determining direct stiffness solution, shear stress and warping function, distribution for shafts 06 p0966 A66-16614

Elastic-plastic stress-strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 12 p1885 A66-23977

Flexural vibration of uniform shafts treated by impedance techniques and traveling-wave concepts 17 p3022 A66-32015

Stability analysis of linear dynamic system in form of rigid straight shaft having several stable mathematical pendulums 17 p2958 A66-32607

SHALLOW SHELL EQUATION

General Marguerre equations derived for thin shallow shells subject to uniformly distributed thermal potential 01 p0155 A66-10716

Buckling mechanism for uniform external pressured spherical shell, evaluating transcendental functions via solution of initial value problem 03 p0435 A66-12616

Vlasov nonlinear equations for solving equilibrium problem of shallow shells 04 p0587 A66-13484

Thin walled elastic shallow shell discussing loading and heating effects, general shell equations and shear characteristics 04 p0587 A66-13561

Small lateral deformation of shallow shells of revolution of radially varying thickness 04 p0590 A66-14165

Elastic stability of clamped shallow spherical shells under concentrated load, noting buckling modes [ASME PAPER 65-APMW-28] 04 p0593 A66-14228

Critical combinations of uniform pressures and concentrated loads at apex acting on shallow spherical shells determined, deriving basic differential equation [ASME PAPER 65-WA/APM-27] 05 p0778 A66-15448

Nonlinear axisymmetric deformation of shallow spherical shells subjected to dynamic loads 05 p0781 A66-15791

Curvature effect on response of shells to steady and nonsteady temperature fields [AIAA PAPER 66-84] 06 p0968 A66-17095

Creep problem of thin shallow shells in terms of viscoelastic theory, considering orthotropic homogeneous and orthotropic anisotropic homogeneous materials 08 p1311 A66-19340

Limiting equilibrium of shallow spherical shell of circular planform, using Tresca yield condition and related flow 08 p1312 A66-19431

Stability of thin walled spherical shell with elastic filler subjected to radial external pressure and uniform loading 09 p1468 A66-20759

Thin walled shallow shell equations derived for case of nonlinear stress-strain relation 11 p1779 A66-22227

Stability analysis of freely supported thin elastic conical three-layer shell situated in potential supersonic flow 11 p1780 A66-22349

Equilibrium equations of shallow cylindrical shell of arbitrary cross section subject to arbitrary loading 11 p1783 A66-23033

Concentrated forces and bending moments effect on shallow cylindrical shell 12 p1967 A66-24113

Shallow spherical shell with hole hinge-supported and flexibly fixed 13 p2201 A66-26410

Hinged shallow spherical shell bounded by ellipse and rectangle 13 p2202 A66-26412

Stressed state of spherical shallow shells determined by satisfying boundary conditions and using infinite sets of algebraic equations 13 p2202 A66-26412

Stressed state of spherical shell weakened by curvilinear holes described by equation of shallow shells 13 p2202 A66-26413

Static boundary value problem for shallow shells with multiply connected sections 13 p2202 A66-26414

Differential equilibrium equations for shallow shells of constant curvature under effect of concentrated load, using Fourier transform 13 p2205 A66-26440

Dynamic snap-through buckling of shallow spherical caps of elastic material 14 p2406 A66-27998

Shallow spherical shell hinged at edge and subjected to aperiodic arbitrary load producing axisymmetric deformation 15 p2607 A66-28767

Stress distribution in shallow logarithmic shell of revolution 15 p2609 A66-29240

Dynamic elastic deflections of shallow circular arch under dynamic pressure loading, solving nonlinear integro-differential motion equation by Galerkin method 15 p2610 A66-29284

Energy method for analysis of lowest mode symmetrical buckling of thin shell shallow spherical caps and cylindrical arches under blast loading 15 p2610 A66-29291

Deformation of shallow orthotropic shells of rectangular planform 15 p2613 A66-29438

Optimum parameters of three-layer plates and shallow shells filled with reinforced and unreinforced foam plastic under compression 16 p2817 A66-31048

Equations of three-layer nonshallow and shallow shells 16 p2817 A66-31052

Snap-through buckling of open bimetallic shallow spherical shell under uniform temperature field 16 p2821 A66-31380

Bearing capacity of shallow spherical shell freely supported along contour and subjected to action of uniformly distributed normal pressure 16 p2823 A66-31632

Deflection and stress coefficients for shallow spherical shells of circular ring planform 17 p3021 A66-32007

Large deflections of symmetrically loaded shallow membrane shells of revolution, considering existence of boundary layer near edges and using asymptotic analysis 17 p3025 A66-32480

Variational principle applied to formulation of stability equations of shallow shells subjected to creep 17 p3026 A66-32594

Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601

Dynamic response of clamped shallow thin elastic spherical shells under time dependent loads 17 p3027 A66-32758

[AIAA PAPER 66-446] Elastic stability of clamped shallow

spherical shells under concentrated load, noting buckling modes [ASME PAPER 65-APMW-28] 18 p3248 A66-33575

Vlasov variational analysis of stress-strain state of plates and shallow shells under large deflections 18 p3252 A66-33707

Stability of spherical shell shaped like eccentric curved ring 20 p3669 A66-37670

Shallow conical shell stability under pneumatic and hydraulic internal loading 20 p3670 A66-37673

Thermal buckling modification in large deflection equations for thin shallow cylindrical shell 20 p3673 A66-38274

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell 22 p3989 A66-39905

Effect of stiffening ribs on stressed-strained state of shallow symmetrically loaded conical shells, noting reduction of boundary value problem to integration of differential equations 22 p3991 A66-40150

Fredholm integral equations obtained in study of boundary value problem occurring in thin shallow shell theory 23 p4140 A66-41835

Free and forced vibrations, static and dynamic stability and air elasticity of orthotropic shells and plates in time-alternating temperature field 23 p4142 A66-41955

Power series solutions to homogeneous shallow shell equations for point load concentrated on vertex of shell 24 p4285 A66-42145

Critical combinations of uniform pressures and concentrated loads at apex acting on shallow spherical shells determined, deriving basic differential equation [ASME PAPER 65-WA/AMP-27] 24 p4285 A66-42149

Nonaxisymmetric deflections measured on clamped shallow spherical shells loaded over small circular area concentric with apex 24 p4286 A66-42163

SHAPE

S EARTH SHAPE

S LINE SHAPE

S MODE SHAPE

S PLANFORM

SHAPED CHARGE

Orthogonal x radiographs determination of hypervelocity fragment characteristics from shaped charge for potential terminal ballistics application 11 p1685 A66-22839

SHARP LEADING EDGE

Flow field study of shock wave and boundary layer development at leading edge of sharp flat plate in rarefied hypersonic flow [AIAA PAPER 66-31] 06 p0803 A66-17082

Flow field study of shock wave and boundary layer development at leading edge of sharp flat plate in rarefied hypersonic flow [AIAA PAPER 66-31] 22 p3844 A66-40349

SHEAR CREEP

Linear creep stability of orthotropic shells, considering shear creep and lateral buckling, determining critical loads and noting errors 13 p2113 A66-25913

SHEAR DISTURBANCE

Shear instability of spatially dependent electron current flowing in plasma 01 p0110 A66-10325

Motion equations for deep spherical shells including effects of transverse shear deformations and rotatory inertia 05 p0781 A66-15740

Shear wave velocity computed from torsional resonant frequency 14 p2410 A66-28482

Kohn-Kato bounds for natural frequencies of axial shear vibrations for solid circular bar, extending calculations through conformal transformations for bar with many-lobed plane curved boundary 17 p3022 A66-32014

Kjeldaa absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991

SHEAR FATIGUE

Shear mode fatigue fracture in aluminum alloys studied, using fractography,

metallography and Laue back reflection technique 20 p3586 A66-37800

Three-dimensional stresses near border of discontinuity plane under arbitrary loading, obtaining solution for uniform shear applied to surface of crack 24 p4285 A66-42148

SHEAR FLOW

Uniform shear motion in rarefied monatomic gases in finite space, discussing distribution function of intrinsic molecular velocity 01 p0108 A66-10472

Turbulent shear flow of elastico-viscous fluid in pipe or channel [AIAA PAPER 64-36] 02 p0217 A66-11526

Linear cascade of double-circular-arc airfoils in transonic shear flow compared with subsonic flow 03 p0313 A66-12394

Shear flow influence on sound attenuation in lined duct, considering upstream and downstream propagation 03 p0356 A66-12822

Observed differences between lateral transport rates of heat and chemical species and of momentum in turbulent free shear flows accounted for by model [AIAA PAPER 65-810] 03 p0359 A66-13181

Electrokinetic transducers to measure potential fluctuations of turbulent flow of tap water in open channel 04 p0509 A66-13664

Shear center location to get bending without twisting in open section beams 04 p0588 A66-13799

Slow viscous shear flow past plate midway between two walls studied analytically, using Stokes approximation 05 p0605 A66-14702

Laminar boundary layer behavior of centrifugal impeller blades, discussing exact solution via perturbation technique [ASME PAPER 65-WA/FE-15] 05 p0608 A66-15612

Gas mean and solid mean velocity profiles of small particles suspended in turbulent air, noting effect of solid motion on laminar structure and shear stress at wall [ASME PAPER 65-WA/FE-24] 05 p0665 A66-15713

Outlet angle in axial compressor cascades, accounting for effect of shear flows, Bernoulli surface rotation and flow separation [ASME PAPER 65-WA/FE-2] 05 p0608 A66-15714

Flute oscillations of rarefied plasma situated in cylindrically symmetric magnetic field with nonzero shear 07 p1086 A66-17650

Stability of piecewise linear velocity profile of shear flow in convectively unstable layer 07 p0980 A66-17942

Resistive instability of shearing magnetic fields in incompressible plasma explored by perturbation procedure 07 p1088 A66-17947

Slow instability caused by dissipation of negative oscillation energy in mirror-type plasma-containment device 07 p1089 A66-17959

Nonsimilar solution of incompressible boundary layer over flat plate in presence of shear flow, using approximate method 08 p1204 A66-18529

Large-eddy energy equilibrium hypothesis leading to relationship between mean rate of shear strain and Reynolds shear stress involving scale of large eddies 08 p1212 A66-19817

Contribution of divergent wind components to energy exchange between baroclinic and barotropic components 09 p1399 A66-20726

Stability and dissipation in second and third-order fluid approximations of boundary value problems for unsteady simple shear flow [AICE PREPRINT 21F] 10 p1521 A66-21188

Taylor relation between velocity partial time and space derivatives in high Reynolds number turbulent shear flow 10 p1522 A66-21467

Shear stress, shear rate, inelastic thixotropic properties and speed-torque curves for time-independent non-Newtonian fluids 10 p1618 A66-21885

Kinetic energy generation and dissipation in large-scale atmospheric circulation, using six months aerological data from North American network 11 p1731 A66-23487

Asymptotic approximations in hydrodynamic stability problems including Couette, spiral and parallel shear flows 12 p1860 A66-23548

Taylor stability of liquid film on body surface and flow stabilization relative to two-dimensional perturbations 12 p1863 A66-24434

Laminar boundary layer behavior of centrifugal impeller blades, discussing exact solution via perturbation technique [ASME PAPER 65-WA/FE-15] 12 p1799 A66-24543

Clear air turbulence structure, noting measurement results obtained by Canberra aircraft and TOPCAT project, energy yield of gravitational shearing waves, etc 13 p2122 A66-26127

Bistable flow in hemispherical cavities induced by external stream, noting skewed position 14 p2274 A66-27437

Direct measurement of tangential stresses for uniform flow over rough wall, using wall balance 14 p2277 A66-27935

Theory of transversely isotropic fluids for fluid having rigid microstructure 15 p2480 A66-29692

Shear rate at which transition from Newtonian to non-Newtonian flow occurs for polystyrene, polyethylene and polydimethylsiloxane 16 p2730 A66-31022

Boundary layer development at free surface formed from uniform shear flow 16 p2691 A66-31657

Homogeneous turbulent shear flow generation in open-return wind tunnel test-section by plane parallel-rod grid 16 p2691 A66-31658

Static pressure in strong noise field near turbulent mixing shear flow 17 p2905 A66-31952

Turbulent flow field in straight circular tubes of sodium carboxymethylcellulose solutions, measuring pressure drop velocity profile over wide range of Reynolds numbers 17 p2906 A66-32037

Shear and frictional distribution in turbulent incompressible boundary layer of plane flow 17 p2907 A66-32281

Propagation of cylindrical shear waves in nonhomogeneous elastic bodies treated by method of characteristics [AIAA PAPER 66-444] 17 p3027 A66-32757

Random turbulence in wall shear layer, discussing practical application of theory 17 p2916 A66-33481

Stress effects on plane creeping Newtonian flows of incompressible second-order fluids 18 p3103 A66-34929

Asymmetric shear flow of viscous fluid past flat plate, justifying constant pressure assumption and examining flow patterns at lower surface in plate proximity 20 p3547 A66-37978

Shear flow generated in rotational flow, noting honeycomb structure satisfactory in rotational flow about thin airfoils 21 p3724 A66-38735

Periodic flows of orientable anisotropic fluids tending to be unoriented at rest considered through linear equations which predict resonance phenomenon 21 p3727 A66-39173

Reynolds equations for two-dimensional uniform turbulent shear flow of Reiner-Rivlin fluid suggest drag reduction 22 p3896 A66-39671

First and second-order theory for uniform shear flow past airfoil, obtaining expressions for pressure, lift and moment coefficients 23 p4011 A66-41879

Mass transfer into aerodynamic body flow fields, examining model shear flow in Rayleigh problem for blowing current across gas-solid interface 23 p4058 A66-41900

Approximate Navier-Stokes equations for viscous flow conditions near trailing edge of flat plate 23 p4059 A66-42001

SHEAR LAYER

SA CHAPMAN SHEAR LAYER

Orr-Sommerfeld equation of shear layer between parallel uniform streams in Hermite function series, noting wave number 02 p0219 A66-12074

Turbulence in free shear layer in mixing region of circular jet, comparing statistical characteristics of mathematical and physical models [AIAA PAPER 65-805] 03 p0357 A66-13081

Hydrodynamic instability of shear layers, using inviscid linearized stability theory of spatially growing

disturbances 04 p0513 A66-14474

IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body [AIAA PAPER 66-107] 08 p1206 A66-18955

Asymptotic steady state solution to problem of thermal separation of components across shear layer between cold jet mixture and hot ambient gas 09 p1470 A66-20178

Rotational flow properties in ideal inviscid shear layer about arbitrarily shaped blunt-nosed body in hypersonic flow 13 p1993 A66-26727

Shear relaxation time of monatomic fluids for liquid and dense gas phases calculated, using LF viscosity data and estimates of HF elastic moduli 14 p2277 A66-27977

Oscillating laminar separated flow formed ahead of forward facing step oscillating transversely to hypersonic free stream, noting phase differences between separation point movement and that of step 14 p2221 A66-28110

Aerodynamically induced resonance in rectangular cavities resulting from doubly tuned amplification of shear layer unsteadiness by shear layer edge tone and cavity enclosure 18 p3047 A66-33676

Free shear layer diffusion and vortex formation region behind bluff bodies 18 p3049 A66-34669

IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body [AIAA PAPER 66-107] 22 p3899 A66-40351

SHEAR STRAIN

Computer programming of diagonal tension analysis of flat panels in shear 01 p0152 A66-10345

Shear instability type accompanying shear deformation of structures and normal to compressive load direction [AIAA PAPER 65-770] 03 p0434 A66-12554

Lateral buckling of I-beam, examining stress and strain induced change in elasticity moduli and rigidity 06 p0964 A66-16479

Elastic torsional analysis of irregular shapes, determining direct stiffness solution, shear stress and warping function distribution for shafts 06 p0966 A66-16614

Nonlinear deformation theory of plasticity for plane strain which approximates isotropic hardening of von Mises loading surface by isotropic hardening piecewise linear loading surface 16 p2812 A66-30260

Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses in isotropic sandwich shells of revolution [AIAA PAPER 66-528] 16 p2814 A66-30611

Shear effect on deflection and torsion angles in thin walled pipes 16 p2822 A66-31624

Shear coefficient in Timoshenko beam theory 18 p3248 A66-33580

Reissner-Uflyand-Mindlin PDEs for circular ring flexural vibrations under transverse shear and rotary inertia 22 p3992 A66-40297

Fatigue testing machine shear strain measurements near cracks on Al flat plate surfaces by observing birefringence 23 p4147 A66-41997

Shear flow transition to turbulence and instability phenomena, discussing parallel and laminar flows 23 p4060 A66-42019

SHEAR STRENGTH

Effect of exit velocity profile /shear/ on jet noise analyzed, considering structure of turbulence in mixing region of jets 02 p0176 A66-11587

High strength structural bolts under static loadings of tension and shear 02 p0301 A66-12241

Transverse shear displacements for orthotropic plate of constant thickness determined by iterative method 03 p0439 A66-13153

Thin walled elastic shallow shell discussing loading and heating effects, general shell equations and shear characteristics 04 p0587 A66-13561

Generalized strength criterion for anisotropic materials with different tensile, compression and shear

strengths 08 p1307 A66-18886

Martensitic transformation in titanium alloys containing eutectoid-forming element noting elastic properties, shear modulus etc 08 p1239 A66-18900

Inhomogeneity effect of plastic deformation distribution during torsion or locking of macroshear during alternating torsion of tubular specimens 08 p1311 A66-19311

Torsional buckling of thin walled prismatic bars of arbitrary cross section, considering buckling shear resilience 08 p1311 A66-19311

Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation 08 p1314 A66-19588

Combination kneading-compaction, dynamic consolidation and shear testing machine which is also simulator of abrasion effect for evaluation of airfield pavement 09 p1382 A66-20700

Grain boundary role in high temperature fracture behavior of magnesite, noting temperature and orientation dependence of shear strength 12 p1897 A66-24922

Deflections, moments and shears of circular ring plate under transverse load comparing classical and improved theory of deformation 13 p2195 A66-25188

Optimization of minimum weight multirib or multiweb wing box structure subjected to vertical shear and unidirectional bending moment 13 p2195 A66-25597

Shear strength of idealized granular media in vacuum, in conditions simulating environmental pressure of lunar surface layer 14 p2288 A66-28188

Effect of compression of outer layers of plate by longitudinal forces on reduced shear modulus of finned filler 16 p2816 A66-31040

Mechanical behavior of three-layer panels with middle layer consisting of tumbler-shaped cavities or rods attached to outer layers 18 p2817 A66-31047

Method and equipment effects on shear stability measurements of hydraulic oils using mechanical and sonic methods 17 p2943 A66-32830

Complex shear modulus measuring apparatus for viscoelastic materials, including data obtained for butyl rubber and other elastomers 18 p3256 A66-34560

Mechanical properties of VAD23 alloy noting tensile, compression, crushing and shearing strength and notch sensitivity and comparison with D16T alloy 22 p3936 A66-40881

Magnetic transformation and effect of plastic strain on shear modulus of Fe-Cr-Ni alloys 24 p4227 A66-42310

SHEARING STRESS

SA MANGLER TRANSFORMATION

Calculation of rotationally symmetrical turbulent boundary layer flow through straight diffusers 01 p0006 A66-10214

Strength of adhesive joints showing ratio of normal and shear stress as important parameter, using crack propagation theory 01 p0152 A66-10380

Supercritical behavior of square panel of thin walled welded beam in shear 01 p0158 A66-10985

Rheology of liquids discussing viscometers, models for prediction and industrial and biological application 03 p0355 A66-12601

Stress analysis of finite length cylinders by station function technique coupled with radial single collocation [AIAA PAPER 65-179] 03 p0437 A66-12798

Flexure center and semicircular cross section for shear stress distribution 04 p0586 A66-13409

Forced torsional motion of semilinear isotropic elastic cylinder with vibrations excited by harmonically oscillating rigid disk, using integral equation 04 p0589 A66-13829

Laminar boundary-layer heat transfer and shear stress predictions from similarity solutions, emphasizing large free-stream velocity gradients and highly cooled walls [ASME PAPER 65-HT-62] 05 p0786 A66-14763

Dorodnitsyn approximate solution method applied to Crocco forms of first and second order incompressible two-dimensional boundary layer equations 05 p0665 A66-15776

- nonuniform shear modulus effect on
thermal stress analysis of hollow viscoelastic
cylinder
[AIAA PAPER 66-121] 06 p0962 A66-16260
- separation of principle stresses by using
series of constant shear stress in improved
shear-difference method 07 p1141 A66-17212
- work on stress analysis and elastic body
deformation covering stress and strain, bending
moment, shearing forces, mechanical
vibration, torsion, columns, oscillation,
etc. 07 p1142 A66-17236
- mass transfer method for measuring skin
friction from isothermal adiabatic leading-
edge flat plate in compressible laminar
flow with negligible pressure
gradient 07 p0980 A66-17943
- fatigue stress analysis, using graphical
technique for complex problem of bending
and torsional out-of-phase variable frequency
vibrations 07 p1147 A66-18342
- large dislocation loops on basal plane and
effects of prismatic dislocation loops in
annealed magnesium 07 p1052 A66-18513
- dislocation interaction with coherent
precipitates, noting onset of plastic
deformations in alloys 08 p1240 A66-19250
- interaction of dislocations with coherent
precipitates, discussing results of electron
transmission and tensile test
experiments 08 p1240 A66-19251
- statically indeterminate elastoplastic
problem under condition of complex
loading 08 p1315 A66-19589
- unsteady flow of second order fluid near
stagnation point on harmonically oscillating
flat plate 08 p1212 A66-19814
- large-eddy energy equilibrium hypothesis
leading to relationship between mean rate
of shear strain and Reynolds shear stress
involving scale of large
eddies 08 p1212 A66-19817
- heat transfer through turbulent
compressible boundary layer in presence
of moderate pressure 09 p1366 A66-20174
- shear stress, shear rate, inelastic
anisotropic properties and speed-torque
curves for time-independent non-Newtonian
fluids 10 p1618 A66-21885
- chemical etching revealing dislocations
produced by indentation on single crystals
of silicon, measuring edge dislocation
densities at various shear stresses and high
temperatures, determining activation
energy 11 p1750 A66-22492
- changes in microhardness, elastic modulus
and shear orientation at boundary between
elastic and plastic deformation in steel
under tensile stress 11 p1719 A66-23387
- stability and buckling of core-filled axially
compressed circular
cylinder 12 p1957 A66-23603
- elastic constants and thermal expansion
coefficients of bodies with inhomogeneous
cubic structure 12 p1958 A66-23666
- splitting in indirect absorption edge
spectrum dependent on direction and
magnitude of applied stress and light
polarization with respect to stress
axis 12 p1927 A66-23721
- plate loaded over ring-shaped zone,
determining bending moment, torque and
shearing force 12 p1967 A66-24111
- field equations of elasticity theory used to
solve problem of penny-shaped crack opened
by unidirectional displacement in
plane 12 p1969 A66-24531
- true static pressure and shear stress of
flat turbulent flow obtained, using two
static holes of different
diameter 12 p1867 A66-24981
- mean velocity, rms velocity fluctuations
and Reynolds shear stress for air flow at
high Reynolds number in rectangular
channel partially roughened, measuring
turbulence intensity 13 p2070 A66-26703
- spread and decay of turbulent free jets
and shear-stress analysis of turbulent mixing
zones 15 p2424 A66-29295
- stress distribution in thin circular annular
disk, rotating with variable angular velocity,
giving transient shearing stress applied on
outer edge 15 p2510 A66-29732
- velocity profile in incompressible
turbulent boundary layer determined by two
methods, noting coincidence of velocity
distributions in external portion of layer
with velocity defect law 16 p2684 A66-30326
- sandwich shell theory, including effects of
transverse shear and extension and
quadratic terms essential to buckling
problems 17 p3021 A66-32003
- stress field due to circular sliding contact
region carrying hemispherical Hertzian
normal pressure and proportional distributed
shearing traction 18 p3248 A66-33585
- surface shear traction and torsional
compliance of elastic plate pressed between
identical elastic spheres 18 p3249 A66-33586
- surface friction induced vertical motions
for nonaccelerated flow calculated from
surface pressure pattern 18 p3129 A66-33963
- fluid dynamics equations of state, motion,
continuity and energy stress-strain
relationship and shearing stress
deformations 18 p3098 A66-34120
- conservation equations for two-dimensional
axisymmetric simultaneous turbulent mixing
and supersonic combustion of hydrogen-
oxygen-nitrogen-water streams solved by
finite difference methods
[AIAA PAPER 66-617] 18 p3099 A66-34219
- directional heat meter for wall shear
stress measurements in turbulent boundary
layers 18 p3112 A66-34242
- axial shear vibrations of long hollow
cylinder subjected to time-dependent body
forces in axial direction 18 p3257 A66-34589
- two-dimensional non-Newtonian
nonisothermal viscous liquid boundary layer
flow in stagnation point proximity and flow
deviations due to pressure gradient and
shearing stress 18 p3266 A66-34637
- contamination, viscosity, shear stability,
breakdown and foaming of MIL-H-5606
hydraulic fluid and swelling effect on
synthetic rubber 18 p3125 A66-34652
- tensile properties of shear spun W in
various high temperature intervals between
900 and 6000 degrees F 19 p3383 A66-36131
- elastic-plastic antiplane problems for
bonded dissimilar media containing cracks
and cavities on interface and subjected to
longitudinal shear loads 19 p3475 A66-36430
- dislocation motion in silicon crystals
measured by Lang X-ray technique, noting
dislocation nucleation and growth with
increasing stress below macroscopic yield
stress 19 p3447 A66-36725
- combined nuclear radiation damage and
cryogenic temperature effects on tensile and
shear properties of materials in outer
space 20 p3583 A66-37096
- postbuckling behavior of clamped infinite
flat strip under action of shearing forces
analyzed based on von Karman
equations 20 p3669 A66-37531
- rotary inertia and shear deformation as
finite approach of kinetic beam and plate
problems 21 p3826 A66-38585
- matrix displacement method applied to
anisotropic plate and shell theory, including
parallelogram and triangular configurations
under bending, membrane forces and shear
strains 21 p3831 A66-39352
- stress-distribution in wedge-shaped plate
with stiffener on one of edges loaded by
axial force, reduced to difference equation
solution for shear-stress transform along
stiffened edge 21 p3832 A66-39460
- velocity profile, induced magnetic field,
shear stresses and skin friction on plates
for viscoelastic liquid flow between
nonconducting oscillating infinite flat plates
in uniform TM field 21 p3794 A66-39575
- Boltzmann-Krook equation in Knudsen
layers for Rayleigh shear flow and related
flow of rarefied gas 21 p3731 A66-39578
- elastic constants and thermal expansion
coefficients of bodies with inhomogeneous
cubic structure 22 p3988 A66-39713
- laminar boundary-layer heat transfer and
shear stress predictions from similarity
solutions, emphasizing large free-stream
velocity gradients and highly cooled walls
[ASME PAPER 65-HT-62] 22 p3997 A66-40024
- large amplitude oscillations of cylindrical
and prismatic bodies resulting from
generalized shear deformation in
longitudinal direction 22 p3990 A66-40141
- bending of isotropic thin plate in moment
theory of elasticity, noting Kirchhoff-Love
hypothesis from which relations for bending
moment torque and shear force are
obtained 22 p3991 A66-40151
- flat elliptical crack in infinite elastic
medium under shear stress at
infinity 22 p3995 A66-40457
- initial buckling under shear stress of long
clamped plate with parallel edges reinforced
by stiffener mesh, noting flexural and
torsional rigidity of
stiffeners 22 p3995 A66-40495
- viscoelastic properties of liquids under
steady flow determined experimentally in
frequency range 5-75 mc/s, using internal
reflection of pulse of shear wave at surface
of fused quartz bar 23 p4066 A66-41159
- microstructure of turbulent jet in
concurrent flow, analyzing wake parameter
and measuring profiles of pulsation velocity
components and Reynolds shear
stresses 23 p4056 A66-41726
- deformations of isotropic perfectly elastic
material associated with simple shear,
examining flow and collapse
reactions 23 p4141 A66-41944
- turbulent boundary layer at flat plate in
extremely turbulent flow, noting effect on
shearing stress and velocity
distribution 23 p4061 A66-42028
- motion equations, shear stress and skin
friction for three-dimensional flow in conical
pipes 23 p4014 A66-42062
- displacement detector to provide direct
measurement of shear forces in
aerodynamics on small surface elements in
hotshot wind tunnels 24 p4207 A66-42169
- instantaneous shear stress at liquid flow
boundary, measuring turbulence and velocity
fluctuation in close proximity of pipe
wall 24 p4194 A66-42415
- fiber geometry effect on shear stress
distribution in composite

SHELL STABILITY
 SA BUCKLING
 Torsional stability of elongated cylindrical shell 01 p0153 A66-10465
 Approximation of strains in plastic plates and shells on basis of nonassociated flow law 01 p0155 A66-10737
 Linear and nonlinear stability and critical strains of closed thin walled circular cylindrical shell under hydrostatic pressure 01 p0155 A66-10738
 Stability of cylindrical shell with elastic filler and various loadings 01 p0158 A66-11002
 Thin homogeneous shell stability loss under arbitrary loading, noting equations for stress and deflection functions 02 p0297 A66-11395
 Stability of thin walled cylindrical dural shells under creep during compression and bending 02 p0297 A66-11396
 Buckling of imperfect cylindrical shells under axial compression and external pressure 02 p0298 A66-11563
 Radial oscillations of thin spherical shell composed of isotropic incompressible elastic material 02 p0301 A66-12156
 Small amplitude vibrations of rectangular panel relative to static buckled configuration 02 p0301 A66-12164
 Resonant frequency of circular cylindrical shells under initial stress 02 p0301 A66-12165
 Rocket fuel tank testing under uniform interior pressure and stress calculation 03 p0430 A66-12498
 Buckling mechanism for uniform external pressured spherical shell, evaluating transcendental functions via solution of initial value problem 03 p0435 A66-12616
 Natural oscillations of elliptic plates and membranes calculated by approximate method 03 p0441 A66-13296
 Vlasov nonlinear equations for solving equilibrium problem of shallow shells 04 p0587 A66-13484
 Initial deformation effect on upper critical load of spherical shell under uniform distributed external pressure 04 p0590 A66-14148
 Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17]

Increasing plastic buckling resistance of thin cylindrical /Mg and Al/ shell by means of elastic core /polyurethane foam/ [ASME PAPER 65-APMW-18] 04 p0592 A66-14218
 Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity [ASME PAPER 65-APMW-35] 04 p0592 A66-14219
 Yield point load of conical sandwich shell simply supported and loaded at vertex for material obeying Tresca yield condition [ASME PAPER 65-WA/APM-30] 04 p0594 A66-14235
 Nonlinear axisymmetric deformation of shallow spherical shells subjected to dynamic loads 05 p0779 A66-15451
 Buckling of cantilever cylindrical shell with transverse end load inducing shear stresses and bending stresses in middle surfaces 05 p0781 A66-15791
 Collapse of pressurized axially stiffened thin cylinder 06 p0967 A66-16933
 Deleterious effect of heterogeneity on stability of composite cylindrical shells under axial compression [AIAA PAPER 66-140] 06 p0968 A66-17083
 HF response of shell-type structures to buffeting aerodynamic environment [AIAA PAPER 66-81] 06 p0968 A66-17086
 Drucker stability hypothesis - indicates strain rate as dominant fracture criteria for thin spherical shell under blast loading 07 p1141 A66-17211
 Approximate solution method for unsteady creep of shells within framework of theory of aging 07 p1146 A66-18254
 Inextensional buckling of thin conical shell under axial compression [AIAA PAPER 66-125] 07 p1148 A66-18461
 Minimum rigidity of ribs ensuring cylindrical shell stability under external load determined, using matrix method 08 p1308 A66-18887
 Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 08 p1308 A66-18996
 Axisymmetric and spherical symmetric elastic stresses and deformations in cylindrical and spherical shells determined by direct numerical analysis method 08 p1309 A66-19141
 Edge conditions effect on elastic stability of cylindrical shells extended to additional combinations of boundary conditions, considering cylinders under axial compression 08 p1310 A66-19144
 Axisymmetric loss of static stability of closed circular cylindrical shell subject to longitudinal compressive stresses 08 p1312 A66-19430
 Unsymmetric free oscillations of conical shell of medium length and linearly variable thickness 08 p1312 A66-19432
 Stress-strain state of conical shells of variable thickness loaded along generatrices and at peripheral points 08 p1312 A66-19433
 Equilibrium equations in displacements for circular cylindrical shells reinforced by longitudinal and transverse ribs under arbitrary surface and edge loads 08 p1312 A66-19434
 Naghdi differential equations for stresses in torispherical head of pressure vessel 08 p1314 A66-19550
 Stability of three-layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear 08 p1314 A66-19581
 Stability of Al-Mg alloy spherical shells under uniform external pressure beyond elastic limit 08 p1315 A66-19591
 Nonlinear stability of orthotropic cylindrical shell under torsional stress 08 p1315 A66-19732
 Damping effects on initial angular motion of spinning shell with overturning and yawing moment 09 p1466 A66-20260
 Thermal stresses arising at high velocities in aircraft skin consisting of two load-carrying layers separated by filler 09 p1468 A66-20758
 Stability of thin walled spherical shell with

elastic filler subjected to radial external pressure and uniform heating 09 p1468 A66-20758
 Computer code for stress and displacement of shells of revolution under axisymmetric loading 09 p1469 A66-20986
 Elastic general instability collapse pressure of ring-reinforced circular cylindrical shell subjected to uniform external pressure 10 p1613 A66-21310
 Complex forces method reduces stress strain determination of orthotropic shells to function 10 p1613 A66-21320
 Stability of thin-walled conical shells under axially symmetric loading determined from nonlinear shell theory 10 p1614 A66-21386
 Stress-strain calculations for thin walled axisymmetric shells with arbitrarily shaped midplane based on second-order theory 10 p1614 A66-21388
 Buckling loads of reinforced cylindrical shells, discussing size and placement of stiffening members 10 p1614 A66-21390
 Increasing plastic buckling resistance of thin cylindrical /Mg and Al/ shell by means of elastic core /polyurethane foam/ [ASME PAPER 65-APMW-18] 10 p1615 A66-21475
 Large deflections of spherical shells under concentrated loads, obtaining curves for axisymmetric deformations 10 p1616 A66-21495
 Elastic buckling of clamped conical shells under external pressure 10 p1617 A66-21786
 Stability limit of symmetric thin walled three-dimensionally loaded rods under arbitrarily distributed and concentrated conservative transverse and longitudinal loads 11 p1779 A66-22230
 Stability analysis of freely supported thin elastic conical three-layer shell situated in potential supersonic flow 11 p1780 A66-22349
 Free and forced vibrations, static and dynamic stability and aeroelasticity of orthotropic shells and plates in variable temperature field 11 p1781 A66-22614
 Temperature field of elements of thin-shelled surfaces of satellites for radiant heat transfer 11 p1786 A66-23045
 Dynamic stability of cylindrical shell subjected to uniform radial pressure 12 p1956 A66-23585
 Stability and buckling of core-filled axially compressed circular cylinder 12 p1957 A66-23603
 Plane vibration characteristics of pneumatic tire model in form of elastically supported cylindrical shell [SAE PAPER 650492] 12 p1800 A66-23744
 Critical impact load under which axisymmetric deformation of perfect elastic isotropic cylindrical shell becomes unstable determined, using deflection theory 12 p1959 A66-23746
 Yield point load of conical sandwich shell simply supported and loaded at vertex for material obeying Tresca yield condition [ASME PAPER 65-WA/APM-30] 12 p1961 A66-23978
 Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17] 12 p1961 A66-23980
 Natural oscillation frequency of smooth cylindrical shells representing combustion chambers, diffusers, etc, analyzing effect of static loads 12 p1964 A66-24045
 Rarefying of dense frequency spectrum of shell-shaped elements of aircraft engines by corrugating shell surface, determining natural oscillation modes and frequencies 12 p1964 A66-24046
 Approximate determination of flexural vibrations of shells of revolution with vibrations involving appearance of nodal lines along generatrix and meridional directions 12 p1964 A66-24047
 Extensive creep deformation of thin zero-moment shell of revolution under action of internal and axial load 12 p1966 A66-24059
 Integrals of equations of small axisymmetrical oscillations of thin elastic shell of revolution 12 p1966 A66-24061
 Integrals of system of equations describing natural oscillations of dome shaped shell 12 p1966 A66-24062

- Stress near small hole in center of shell of revolution subjected to action of symmetrical or inversely symmetrical load 12 p1966 A66-24063
- Initial deflection effect on stability of reinforced cylindrical shells under axial compression 12 p1967 A66-24109
- Stability analysis of shells of revolution with curvilinear generatrices under axial compression, using strain energy technique 12 p1967 A66-24110
- Collapse of spherical caps under external pressure, with data for polyvinylchloride and aluminum alloy caps 12 p1972 A66-24979
- Nonlinear theory of thin elastic shells, discussing surface geometry and deformation, equations of equilibrium and boundary conditions and stress functions 13 p2196 A66-25600
- Linear creep stability of orthotropic shells, considering shear creep and lateral buckling, determining critical loads and noting errors 13 p2113 A66-25913
- Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method 13 p2206 A66-26454
- Axisymmetric form of stability loss of cylindrical shell under effect of load suddenly applied along generatrix, considering inertia forces and obtaining differential equations 13 p2206 A66-26456
- Oscillations of cylindrical orthotropic three-layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions 13 p2206 A66-26461
- Stability of plastic shell under tension 14 p2396 A66-27380
- Edge restraint effects on spherical cap stability 14 p2412 A66-27435
- Axially symmetric oscillations of elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness 14 p2400 A66-27682
- Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 14 p2400 A66-27684
- Eigenvalues of truncated cones of revolution with degenerate poles and various rigidities and geometries 14 p2400 A66-27686
- Book on stability loss of highly convex shells at supercritical strains 14 p2401 A66-27786
- Buckling, postbuckling and imperfection sensitivity of cylinders and shells 14 p2404 A66-27987
- Flutter of circular cylindrical isotropic shells 14 p2408 A66-28187
- Stability of cylindrical nonlinearly elastic shell under axial loads applied to shell ends 15 p2607 A66-28766
- Shallow spherical shell hinged at edge and subjected to aperiodic arbitrary load producing axisymmetric deformation 15 p2607 A66-28767
- Deformation of finned conical shell under axial load 15 p2608 A66-28781
- Stability analysis of symmetrically loaded thin walled spherical shell, noting construction of asymptotic expansion, error estimation and application of elasticity theory 15 p2608 A66-28955
- Oscillatory pressures in idealized annular boundary layer apply to panel flutter of circular cylindrical shell in supersonic flow 15 p2610 A66-29282
- Stability analysis of elastic axially compressed orthotropic glass-fiber-reinforced-plastic cylindrical shell with linear heredity properties 15 p2611 A66-29341
- Deformation of shallow orthotropic shells of rectangular planform 15 p2613 A66-29438
- Stability of three-layer cylindrical shells under compression, load and combined action 16 p2817 A66-31053
- Stability of three-layer shells or plates beyond proportionality limit, obtaining critical stress 16 p2817 A66-31054
- Liquid sloshing effect on axisymmetric vibrations of liquid-filled cylindrical shell 16 p2819 A66-31139
- Self-excited vibrations of infinitely long cylindrical shell, situated in flow of supersonic ideal gas, obtaining motion equations and analyzing stability conditions 16 p2820 A66-31333
- Vibration mode of conical shells measured, showing that it varies with conical angle and circumferential wave number 16 p2821 A66-31381
- Stability of truncated conical thin shells under torsional load 16 p2821 A66-31382
- Local buckling in curved two-dimensional manifolds, detailing experimental exposition of phenomenon in stability and deformation of shallow spherical shell 17 p3021 A66-32005
- Variational principle applied to formulation of stability equations of shallow shells subjected to creep 17 p3026 A66-32594
- Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells, with exact solutions form Flugge shell equation [AIAA PAPER 66-447] 17 p3028 A66-32759
- Stiffness matrix of thin flat triangular elements of nonzero Gaussian curvature derived by reducing geometrical idealization errors [AIAA PAPER 66-530] 17 p3028 A66-32776
- Oscillations and stability of cylindrical shell in gas flow, taking into account inertia forces 17 p3029 A66-32804
- Compressibility of material in stability problems of elastoplastic plates and shells 17 p3029 A66-32809
- Transient response of thin elastic shells resting on viscoelastic foundation 17 p3030 A66-33035
- Thin circular cylindrical shell behavior in axial compression, noting buckling under stress, boundary condition detail effects, etc 17 p3031 A66-33064
- Parametric vibrations determining dynamic stability of simply supported truncated conical shells under pulsating pressure 17 p3031 A66-33075
- Stiffener eccentricity effect on cylindrical shell buckling under torsion, noting rings and stringers 17 p3031 A66-33079
- Explosive forming process for deep aluminum shells, discussing limits and failure 17 p2930 A66-33091
- Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity [ASME PAPER 65-APMW-35] 18 p3248 A66-33574
- Stress concentration in nonlinear creep of long thin cylindrical shell loaded at one edge by symmetrical radial shear and bending moment 18 p3248 A66-33578
- Constant external or internal pressurization effects on circular cylindrical shell under nearly uniform radial impulse 18 p3249 A66-33604
- Asymptotic static analysis of pressurized torus shells, predicting vibratory frequencies and buckling under external pressure [AIAA PAPER 66-445] 18 p3250 A66-33647
- Free flexural vibration of cylindrical shells stiffened by equidistant ring frames treated by finite difference calculus 18 p3250 A66-33673
- Transcendental equation describing discrete reinforcing network effect on vibrations of reinforced cylindrical shell 18 p3252 A66-33708
- Theory of beams on elastic foundation used for approximate analysis of cylindrical shells with sufficient number of axial ribs 18 p3254 A66-33827
- Snapping of shallow simply supported sinusoidal arch under sinusoid step pressure load, using motion equations and infinitesimal stability analysis 18 p3257 A66-34591
- Elastic stability of thin walled circular cylindrical shells in torsion, applying Galerkin method to Donnell equations for critical stresses 18 p3258 A66-34648
- Theoretical and experimental analysis of Korotkoff sounds at diastole which are interpreted as dynamic instability induced by application of pressure cuff 19 p3286 A66-36431
- Finite deflection and stability equations for circular cylindrical shells stiffened in longitudinal and circumferential direction 19 p3475 A66-36636
- Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure 20 p3665 A66-36911
- Spherical shell stability under external pressure for nonlinear elastic and plastic deformation 20 p3668 A66-37528
- Stability of spherical shell shaped like eccentric curved ring 20 p3669 A66-37670
- Elastic-plastic axisymmetric bending of circular cylindrical shell with constant and variable thickness 20 p3670 A66-37671
- Shallow conical shell stability under pneumatic and hydraulic internal loading 20 p3670 A66-37673
- Monograph on solving shell stability dynamic problems by geometric approximation 20 p3671 A66-37983
- Wall thickness requirement for cylindrical shell stability under critical radial compression derived by generalized power series 20 p3673 A66-38271
- Shell immersion in moving fluid under vibrations which can be damped or amplified, analyzing instability due to fluid constituting energy reservoir 21 p3825 A66-38578
- Nonsteady state zero-moment creep in shells of revolution with clamped edges under internal pressure, finding change range in stresses in time 21 p3826 A66-38612
- Flutter of infinitely long panel of finite width with upper surface exposed to inviscid flow, noting critical wavelength and flutter velocity 21 p3827 A66-38691
- Elastic stability of cylindrical shells reinforced by one or two frames and subjected to external radial pressure, noting inertia moment about skin line and frame bending stiffness optimization 21 p3828 A66-38703
- Influence coefficients for externally pressurized spherical shells 21 p3828 A66-38724
- Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 21 p3828 A66-38728
- Bend-resistant conical shells of uniform wall strength under periodic loading treated by operator method 21 p3828 A66-38811
- Stability of structurally anisotropic circular cylindrical shell under nonuniform compression 21 p3829 A66-38976
- Shell stability in Euler formulation, taking into account actual redistribution of stresses that results from initial deflection and creep, noting buckling of closed cylindrical shell under axial compression 21 p3829 A66-38978
- Computer analysis of cylindrical shell stability under uniform external pressure and critical pressure determination for various boundary conditions 21 p3829 A66-38979
- Monograph on stress analysis, stability calculations and oscillation estimates for thin walled shells 21 p3331 A66-39278
- Optimum cross section design for thin walled bar under combined torsion and bending 21 p3332 A66-39377
- Complex load effect on shell buckling, determining compliance tensor components during stability loss 22 p3989 A66-39820
- Reinforced cylindrical shell stability under axial compressive force, using linear and quasi-linear formulation 22 p3990 A66-40146
- Limiting equilibrium of compression-and tension-bent shallow shell of revolution 22 p3991 A66-40149
- Buckling, postbuckling and imperfection sensitivity of cylinders and shells 22 p3992 A66-40337
- Aeroelastic stability of infinite long cylinder with outer surface exposed to inviscid flow 22 p3992 A66-40338
- Postbuckled equilibrium configurations of axially compressed circular cylindrical shell determined from large deflection theory and principle of stationary potential energy 22 p3993 A66-40340
- Progressive plastic buckling of cylindrical shells under axial compressive load, noting nonsymmetric patterns 22 p3994 A66-40432
- Buckling of stiffened cylindrical shells under various loads and load combinations, noting optimization procedure for elastic stability [ICAS PAPER 66-13] 22 p3996 A66-40673

Shell stability theory of current interest, noting shell with elastic filler and internal pressure 23 p4135 A66-40994

Large deflection postbuckling analysis of thin walled oval cylinders under axial compression 23 p4143 A66-41961

Approximate finite deflection analysis of buckling of long slightly curved panels in axial compression 23 p4143 A66-41963

Postbuckling behavior of circular cylindrical shell locally buckled under axial compression 23 p4143 A66-41964

Classical critical stress values for buckling of thin walled circular cylindrical shells in axial compression as function of edge conditions 23 p4143 A66-41965

Minimum-weight design of sandwich shells subjected to fixed and moving loads, determining variable thickness of two thin face sheets 23 p4144 A66-41967

Inelastic buckling of rib-cored orthotropic sandwich cylinders under external hydrostatic pressure evaluated by deformation theory of plasticity 24 p4285 A66-42147

Nonaxisymmetric deflections measured on clamped shallow spherical shells loaded over small circular area concentric with apex 24 p4286 A66-42163

Stability analysis of thin two-layer shell in Gaussian coordinates with moment initially zero, including applications to stability of circular cylindrical shell 24 p4290 A66-42441

Critical loading and stability of three-layer sloped asymmetric shells beyond elastic limit for arbitrary stress-strain diagram 24 p4290 A66-42442

Large deformation analysis of equilibrium of spherical momentumless shells under hydrostatic pressure 24 p4290 A66-42444

Stability theory methods for small elastoplastic deformations generalized to include creep effects in cylindrical shells compressed at ends 24 p4292 A66-42885

SHELL THEORY

Nonlinear field equations of elastic shell in terms of reference state subjected to strain displacement 01 p0153 A66-10444

Free oscillations of elastic shells of revolution 01 p0154 A66-10469

Introductory text on plate and shell theory covering membrane theory, flat circular plates, symmetrically loaded shells of revolution and selected problems 01 p0157 A66-10976

Timoshenko-type nonlinear theory of elastic shells based on generalized Hamiltonian variational principle 01 p0157 A66-10982

Toroidal shell stresses and displacements under internal pressure in transition range found by bending and membrane theories [AIAA PAPER 65-145] 02 p0297 A66-11542

Shells and tubes subjected to internal and external pressures including analysis of transition theory for sheet-bending, considering creep rupture and relaxation 03 p0436 A66-12696

Linear elastic analysis of shells of revolution by matrix displacement method [AIAA PAPER 65-142] 03 p0437 A66-12799

Strain-displacement relations for general shell providing standard for approximate theories checking 03 p0442 A66-13305

Free vibration and transient elastic response of thin shells within scope of linear theory 04 p0586 A66-13405

Quadrature solution to one-dimensional problem for helicoidal shell with given load and desired force distributions, moments and displacements 04 p0588 A66-13564

Cyclic edge loading effect on circular reinforced cylindrical shells 04 p0589 A66-14147

Small lateral deformation of shallow shells of revolution of radially varying thickness 04 p0590 A66-14165

Linear elastic theory of thin shells, considering membrane and bending theories of open and closed cylindrical shell 05 p0775 A66-15083

Shell linear theory, discussing classical elasticity theory, bending equations, edge effect and asymptotic theory 06 p0962 A66-16350

Stiffness properties of filament wound structures derived from idealization based on structural and geometric properties

[AIAA PAPER 66-144] 06 p0962 A66-16409

Effect of geometry changes on carrying capacity of cylindrical shell directly after reaching plastic state 06 p0966 A66-16501

Vibration of thin cylindrical shell giving natural frequency and mode shape 06 p0967 A66-16931

Curvature effect on response of shells to steady and nonsteady temperature fields [AIAA PAPER 66-84] 06 p0968 A66-17095

Infinitely-long thin elastic circular cylindrical shells loaded along segment of generatrix by arbitrarily distributed loads 07 p1143 A66-17627

Deflections and stresses of shallow shell under creep conditions, reducing problem to system of two nonlinear integro-differential equations 07 p1143 A66-17628

Parametrically excited oscillations in flat shells of rectangular cross section subjected to rim loading by pulsating middle-surface forces 07 p1145 A66-18226

Lower bound estimates of shakedown pressure for flush cylinder-sphere intersection, using Melan theorem and elastic analysis 07 p1146 A66-18275

Deformation of photoelastic coatings on thin shells 08 p1307 A66-18882

Deformation components of photoelastic coatings of shells affected by errors due to rotation of direction of principal deformations 08 p1307 A66-18883

Stresses and elongation of U-shaped bellows subjected to axial load solved by elastic theories of plates and shells 08 p1314 A66-19549

Asymptotic integration of equations in theory of elasticity to develop approximate theory of momentless shells 08 p1314 A66-19587

Stress calculation for internal pressure in momentless shell of revolution 08 p1314 A66-19588

Equations for nonshallow thin shells of arbitrary shape and variable rigidity with continuous smooth curvature 08 p1315 A66-19731

Three-dimensional linear elasticity and viscoelasticity theory to obtain axisymmetric plane-strain thickness-stretch modal response of isotropic and orthotropic thick shells 09 p1468 A66-20948

Galerkin method to solve free vibration problem of thin oblate spheroidal shells 09 p1468 A66-20949

Oscillations of cylindrical shell filled with incompressible fluid of variable depth 10 p1614 A66-21328

Fluid-shell interaction of infinite cylindrical shell submerged in acoustic fluid and subjected to axially propagating step wave [ASME PAPER 65-APM-19] 10 p1615 A66-21473

Functional derived in nonlinear theory of shells of variable thickness, taking into account temperature field and potential mass forces 11 p1779 A66-22228

Approximate theory of shells of revolution of average thickness, using seminverse method and expansion into series in Legendre polynomials 11 p1779 A66-22229

Engineering theory of thin shallow plastic shells with zero Gaussian curvature 11 p1784 A66-23314

Comparison of elasticity and shell theory solutions for infinite circular cylindrical shell subjected to periodically spaced band loads [AIAA PAPER 65-139] 12 p1956 A66-23582

Dynamic response of cylindrical shell subjected to time-varying load treated by explicit and implicit method of timewise integration 12 p1956 A66-23584

Thermally induced vibration of thin nonshallow spherical shells, investigating missile and space vehicle structures [AIAA PAPER 65-409] 12 p1957 A66-23586

Dynamic asymmetry and anomalous vibration characteristics of thin walled steel shell 12 p1957 A66-23614

Creep laws in terms of generalized stress-strain rates formulated, noting secondary deformation, Tresca criterion and associated flow rule 12 p1963 A66-24037

Book on strength and dynamics of aircraft engines including deformation of shells of revolution, oscillation frequencies of various

shells, turbine rotor dynamics, etc 12 p1963 A66-24037

Russian studies of elasticity and plasticity 12 p1965 A66-24037

Basic equations of shells transformed by mathematical differentiation into equation of four-layer crossed-rod system 12 p1966 A66-24037

Extended Dirichlet problem for cross section of cylindrical shell, showing asymptotic solution is valid, approximation to Dirichlet integral applied to electrostatic problem of condenser and closed tube torsion 12 p1968 A66-24195

Axisymmetric creep of circular cylindrical shells taking into account axial forces 12 p1968 A66-24343

Nonlinear theory of thin elastic shells discussing surface geometry and deformation, equations of equilibrium and boundary conditions and stress functions 13 p2196 A66-25601

Stability of membrane solution in nonlinear plate and shell theory 13 p2196 A66-25633

Finite difference equations for two dimensional rod-lattice structures 13 p2199 A66-26377

Shells produced by rotation of second order curves about axis of symmetry evaluated for symmetric and antisymmetric loads 13 p2202 A66-26411

Shell with positive curvature and zero moment state examined, determining sufficient condition for secondary potential load 13 p2203 A66-26422

Stress concentration for cylindrical bending of plates with holes, deriving equations and evaluating errors in classical theory 13 p2203 A66-26424

Stress concentration near hole in shell 13 p2205 A66-26438

Shell resistance of metal adhesive joints noting notch strength and plastic deformation 14 p2301 A66-27255

Nonlinear bending theory of three-layered simply supported plates 14 p2396 A66-27379

Orthotropic-elasticity solutions applied to wave propagation in infinite cylindrical shell, obtaining asymptotic solutions for HF range 14 p2400 A66-27862

Seminomomentless theory of thin plastic shells slightly different from cylindrical ones 14 p2401 A66-27783

Shell structures solved numerically, using network of partial panels 14 p2404 A66-27990

Tension shell theory applied to Voyager mission, noting equations for lateral loading for entry at zero angle of attack, shear and bending of wall role, etc 14 p2407 A66-28027

Edge load solution for conical shells 14 p2408 A66-28133

Shallow spherical shell hinged at edge and subjected to aperiodic arbitrary load producing axisymmetric deformation 15 p2607 A66-28767

Collapse loading of rotationally symmetric cylindrical shell 15 p2609 A66-29253

Buckling characteristics of eccentrically stiffened cylindrical shells under hydrostatic pressure loading and vibration, buckling and flutter characteristics of stiffened flat plates [AIAA PAPER 65-370] 15 p2610 A66-29285

Cylindrical thin shells with axial stringers under axial compression 15 p2614 A66-29636

Stress distribution near rigid circular inserts attached to thin spherical shells 16 p2816 A66-30859

Book on design calculations of elements of aviation construction including elastic parameters for finned fillers, shell torsion, shell stability, etc 16 p2816 A66-31045

Bending problem of three-layer plates with fillers 16 p2817 A66-31050

Equations of three-layer nonshallow and shallow shells 16 p2817 A66-31052

Numerical analysis of stress-strain rate of siphon bellows, using differential equations 16 p2820 A66-31145

Snap-through buckling of open bimetallic shallow spherical shell under uniform temperature field 16 p2821 A66-31380

Stressed state in shells near curvilinear orifices reinforced with thin elastic rings 16 p2822 A66-31623

Stressed state of cylindrical shell made of coiled glass fibers 16 p2822 A66-31625

Axisymmetric deformation of cylindrical shell consisting of many layers of glass

- abric connected by polymer 16 p2823 A66-31626
- Vibration analysis of static plates and shells by finite element method 17 p3019 A66-31950
- Solid Mechanics - Conference, Cleveland, April 1963 17 p3019 A66-31996
- Longitudinal bending of elastic truncated conical shell subjected to edge loads 17 p3020 A66-32001
- Sandwich shell theory, including effects of transverse shear and extension and quadratic terms essential to buckling problems 17 p3021 A66-32003
- Cylindrical thin shells under pressure, axial load and torque, determining plastic yield curves 17 p3021 A66-32006
- Axially symmetric dynamic response of infinite, circular cylindrical shell to moving pressure load 17 p3021 A66-32009
- Radial loading effect on vibration frequencies of thin spherical shells 17 p3024 A66-32362
- Partitioning procedure for shell theory equations, using intercorrelation function 17 p3025 A66-32591
- Periodic solutions of axisymmetric shell theory equations for displacement of shells of revolution and bending of thin walled rods 17 p3026 A66-32593
- Basic theory derived for nonsymmetric elastic three-layer sandwich shells of variable rigidity 17 p3026 A66-32600
- Axisymmetric oscillations of spherical shell 17 p3026 A66-32602
- Dynamic response of clamped shallow thin elastic spherical shells under time dependent loads [AIAA PAPER 66-446] 17 p3027 A66-32758
- Moment theory for thin spherical elastic shells under axisymmetric loading, noting role of Poisson ratio 19 p3474 A66-35851
- Static dimensional stability of nonlinear elastic continua reduced to linear shell theory 20 p3688 A66-37527
- Inelastic shell theory based on principle of virtual work 20 p3670 A66-37817
- Shell theory, discussing relationship between stress function tensors and shell stress function 20 p3673 A66-38275
- Matrix displacement method applied to anisotropic plate and shell theory, including parallelogram and triangular configurations under bending, membrane forces and shear strains 21 p3831 A66-39352
- Equations for analysis of prestressed cylindrical shells made of fiberglass reinforced plastics with hollow fibers, longitudinally and transversely wound 22 p3990 A66-40143
- Doubly curved axisymmetric shell construction for structural analysis of shells of revolution, using direct stiffness method 22 p3993 A66-40339
- Elasticity theory and passing of three-dimensional problems to two-dimensional problems 23 p4136 A66-40995
- Shell dynamical integral and integro-differential BVPs for linear deformable shells, examining reciprocity theorem and Kirchhoff-Love hypothesis 23 p4136 A66-40997
- Elasticity problems solutions as related to stress distribution at holes in shells and plates 23 p4137 A66-41002
- Material strength determination based on elastoplastic and rigid-plastic theory of solid bodies 23 p4137 A66-41006
- Fredholm integral equations obtained in study of boundary value problem occurring in thin shallow shell theory 23 p4140 A66-41835
- Potential energy and conservativeness of normal pressure field acting on flat plates 23 p4141 A66-41926
- Applied mechanics - International Congress, Munich, August-September 1964 23 p4092 A66-41934
- Membrane theory of convex shells and approaches to construction of general moment theory of elastic shells 23 p4141 A66-41938
- Differential equations of linear theory of elastic shells derived under Kirchhoff-Love hypothesis with aid of static-geometric analog 23 p4142 A66-41956
- Concentrated forces on shells, discussing load distributions and pressure variations 23 p4142 A66-41957
- Stresses in shells under arbitrarily concentrated loads calculated numerically 23 p4142 A66-41958
- Stress distribution and displacements in neighborhood of circular hole in cylindrical shell subjected to load such as torsion or axial compression 23 p4142 A66-41959
- Stress concentration around curvilinear holes in plate, discussing plane problem of elasticity theory and shell theory 23 p4143 A66-41960
- Plate or shell theory analysis reduced from three-dimensional elasticity to two-dimensional problem, using power series or iterative method 23 p4143 A66-41962
- Steady state creep analysis of shell loads by uniform pressure for simply supported and clamped edges 23 p4145 A66-41977
- Prestressed circular membrane shell subjected to uniform radial line load, determining stresses and displacements from material properties, internal pressure and original size 24 p4288 A66-42272
- Successive approximation analysis of large deflections of elastoplastic shell under bending deformation and load carrying capacity 24 p4290 A66-42440
- Stability analysis of thin two-layer shell in Gaussian coordinates with moment initially zero, including applications to stability of circular cylindrical shell 24 p4290 A66-42441

- Propagation of shock wave of gas flow from axisymmetric nozzle 06 p0802 A66-16422
- Detection of ionized gas front passage and differentiating it from current sheet in magnetically driven shock tube 07 p1020 A66-17956
- Width of strong shock wave front and transition layers estimated, using Boltzmann kinetic equation and H-theorem 08 p1209 A66-19478
- Approximate solution to problem of estimating thickness of shock wave by statistical mechanics 08 p1209 A66-19481
- Shock wave frontal ionization effect on electromagnetic transmission and reception from telemetering equipment on ELDO satellite launching vehicle 09 p1406 A66-19851
- Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 09 p1470 A66-20146
- Reflectivity of atmospheric shock front determined, using laser range finder and wide-bandwidth dual-beam oscilloscope 09 p1367 A66-20396
- Electromagnetic phenomena inside weak MHD shock wavefront 10 p1569 A66-21916
- Shock front density distributions in Ar and He determined in shock tube, using electron beam attenuation 11 p1691 A66-22916
- Asymptotic flow at distance from three-

dimensional transonic obstacle showing increased velocity 13 p1990 A66-25431
 Model of Fermi acceleration at shock front developed and applied to Earth bow shock 13 p2184 A66-25620
 Shock and ionization fronts propagation in gas-dust medium 14 p2380 A66-27255
 Measurement of plasma density generated by underwater explosions, noting modes of electrical discharge and shock front role 15 p2549 A66-28693
 Shock transition in multihead spin structure of self-sustaining gaseous detonations in oxyacetylene mixtures, including interferometric and schlieren photographic density, temperature and pressure measurements 15 p2618 A66-29607
 Thin film heat transfer gauges to measure axial extent of curved shock fronts in argon 17 p2908 A66-32416
 Measurable range of ionizational relaxation behind shock front in argon extended to equilibrium region by mm-wave technique 17 p2912 A66-32982
 Mach detonation wave formation conditions, noting magnitude of shock pressures in metals and possibility of obtaining steady state wave patterns 18 p3266 A66-34629
 Separated shock wave distance from free flying blunt body influence by real gas oscillation excitation 19 p3341 A66-35746
 Structure of hydromagnetic shockfront wherein electrostatic turbulence continuously develops, analyzed to aim at orders of magnitude for front width, electron and ion heating and magnitude of fluctuation excitation 19 p3408 A66-36278
 Carbon dioxide flow density in wake of shock wave front 21 p3726 A66-39091
 Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 21 p3836 A66-39417
 Pitch-angle dependence of first-order Fermi acceleration of particles trapped between shock front and moving magnetic mirror 21 p3776 A66-39564
 Vacuum conditions in space based on data obtained by Earth-orbiting satellites, noting shock front and magnetopause caused by interaction of solar wind with geomagnetic field 22 p3979 A66-40205

SHOCK HEATING

SA WAVE SUPERHEATER

Spectral and total radiation studies of bodies traveling at hypersonic speed in simulated Martian and Venusian atmospheres [AIAA PAPER 65-116] 03 p0315 A66-12783
 Gas compression-conduction mechanism contribution to shock initiation of granular explosives, analyzing surface temperature of interstitial gas and grain distribution [CI PAPER WSCI-65-30] 05 p0788 A66-15141
 Spectroradiometric pyrometry of shock heated gases by IR emission and absorption measurements 09 p1382 A66-20508
 Thermal dissociation rate of nitrogen oxide in shock waves measured by IR emission 13 p2208 A66-25084
 Temperature measurement in shock heated gases via spectrum line reversal method, noting connection between electronic excitation and effective vibrational temperature 13 p2208 A66-25159
 Convective heat transfer to particles in shock-heated gas 15 p2617 A66-29300
 Electronic relaxation of shock-heated nonequilibrium argon plasma flow in microscopic-macroscopic treatment [AIAA PAPER 66-476] 16 p2765 A66-31475
 UV radiation from shock-heated nitrogen measured by ballistic flight through nitrogen-neon mixture [AIAA PAPER 66-422] 17 p3035 A66-32751
 Ignition of powder prepared from nitroglycerin and nitrocellulose by shock wave in sectioned low-high pressure chamber 18 p3260 A66-33721
 Ionization relaxation in impure shock-heated argon studied by magnetic mass spectrometer 22 p3899 A66-40380
 Shock impingement on blunt body in hypersonic flow, noting alteration of flow and local heat transfer rate near impingement point [AIAA PAPER 66-756] 22 p3846 A66-40641
 Collision-free shock heating of plasma

without standard dissipative force 23 p4131 A66-42038

SHOCK LAYER

Oscillator strength of CN violet system from shock layer by time-of-flight scanning spectrometer 03 p0393 A66-13152
 High resolution equilibrium radiation spectra for shock layer of blunt bodies at reentry velocities and radiative recombination of N and O ions [AIAA PAPER 66-104] 07 p0984 A66-18458
 Newtonian flow over fixed two-dimensional body in unsteady flow, emphasizing shock layer 08 p1164 A66-19129
 Instability of hypersonic shock layer flow over blunt bodies with surface cavities coupled to dynamic stability of body 10 p1619 A66-21156
 Equilibrium and nonequilibrium stagnation point shock layer radiation in simulated planetary atmospheres of varying composition 10 p1481 A66-21773
 Busemann correction to Newtonian pressure law and resulting two types of optimum shapes 11 p1632 A66-22521
 Shock layer approximation used in inverse hypersonic blunt body problem 12 p1795 A66-23574
 Approximate hypersonic stagnation point flow analysis of thermal conduction and radiative transport in shock layer 12 p1860 A66-23595
 Langmuir probe to measure stagnation region shock layer ionization distribution under nonequilibrium hypersonic flow conditions [AIAA PAPER 66-167] 13 p2138 A66-25168
 Stream function coordinates for flow in shock layer around axisymmetric blunt-nosed body in hypersonic stream 14 p2221 A66-28145
 Conservation equations for cylindrical blast and radiation effect on shock layer profiles of blast wave 16 p2686 A66-31114
 Viscous aerodynamic contributions to forces and moments on front face of blunt lifting reentry vehicle in producing trajectory error [AIAA PAPER 66-464] 16 p2631 A66-31471
 Shanks approximation of stationary shocks attached to point of cone 17 p2837 A66-32282
 Strip film schlieren interferometry to investigate interaction of reflected shock with incident shock boundary layer 17 p2908 A66-32415
 Relaxation and evaporation zones behind normal shock in mixture of air, water vapor and water droplets 17 p2908 A66-32445
 Nonequilibrium flow fields over spherically blunted conical entry vehicle with chemical reaction in shock layer [AIAA PAPER 66-420] 17 p2840 A66-32750
 Basic shock layer radiation data obtained in shock tube and free-flight ballistic range facilities, applicable to Venus or Mars atmosphere entry [AIAA PAPER 66-421] 18 p3046 A66-33641
 Two-dimensional radiation-coupled wedge flow analyzed, using integral relations method and Rankine-Hugoniot relations 18 p3100 A66-34599
 High energy electron acceleration detected in shock transition region of terrestrial magnetosphere, using Au-Si surface barrier solid state detector and IMP-I satellite mounted GM counter 18 p3177 A66-34753
 Composition of cosmic rays of supernova origin, noting limited mixing and enrichment of elements of outer layer with thermonuclearly synthesized core substances due to shock acceleration 18 p3177 A66-34755
 Perturbation analysis of radiative cooling in shock layers and radiative heat transfer effects on hypersonic flow over wedge and circular cone 23 p4011 A66-41882
 Laminar shock layer structure in which streamlines retain appropriate momentum, calculating exhaust plume structure for rocket nozzle 23 p4012 A66-41921
 Inviscid flow near stagnation point of blunt body in hypersonic stream, using thin shock layer theory with very small density ratio 23 p4013 A66-42013
 Inviscid hypersonic flow past flat wings at large angle of attack analyzed, using homogeneous layer concept of shock layer theory 23 p4013 A66-42014
 Vacuum UV radiation measurement from

high temperature nitrogen, detecting radiation from shock layer of ballistic model 24 p4208 A66-42182

SHOCK LOAD

Tabulated values of ratio of cone surface pressure-pressure at shock 02 p0175 A66-11577
 Stress-volume results between 20 and 14 kbar for germanium shock loaded in one dimensional strain 07 p1108 A66-18417
 Transmission electron microscopy observation of microhardness of shock hardened iron and bcc iron-based alloy structures 08 p1236 A66-18758
 Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 08 p1308 A66-18999
 Critique of paper by Carter and Kennedy regarding origin of diamonds in Canyon Diablo and Novo Urei meteorite 09 p1447 A66-19885
 Origin of diamonds in Canyon Diablo and Novo Urei meteorites 09 p1447 A66-19889
 Transient loading of rectangular and right circular cylinders by shock waves in air numerically determined by time dependent Eulerian method [AIAA PAPER 65-4] 12 p1860 A66-23581
 Explosive deformation effect on stress-corrosion and mechanical properties of 7075 aluminum alloy 14 p2317 A66-28010
 Shock wave strengthening of metals studied by hydrodynamic conservation equations, noting microstructure changes 16 p2723 A66-30318
 Shock propagation and attenuation in porous graphite and aluminum foams, noting effects of particle shape and size on materials response to shock loading 20 p3588 A66-38407
 Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 21 p3828 A66-38728
SHOCK MEASURING APPARATUS
 Shock and vibration measurement system with error correcting techniques including dynamic calibration data, noise detection etc [SAE PAPER 650820] 01 p0069 A66-10822
 Shock tube measurements of carbon dioxide dissociation in argon mixtures at 6000 to 11,000 degrees K 03 p0443 A66-12339
 HF requirements for measuring and analyzing Polaris missile shock and vibration data [AIAA PAPER 65-223] 03 p0431 A66-12761
 Gauge, using spherical Lucite shell as active element for measuring peak pressures in strong shock waves, designed for underground nuclear explosion 13 p2083 A66-26557
 Portable shock and environmental recording system 16 p2703 A66-30482
 Shock wave velocity and pressure in solids, noting design and construction of measuring device, application and operation 18 p3157 A66-34630
 Piezoelectric pressure pickup for measuring pressure of gases and fluids in wake of incident and reflected shock wave 21 p3738 A66-39098
 Mushroom-shaped barium titanate sensor for shock tube pressure recording, noting high acoustic insulation, mechanical strength and vacuum tightness 21 p3738 A66-39099
 Simultaneous measurement of many aerodynamic, electrical and electromagnetic parameters in test time interval of several hundred microseconds of MHD augmented shock tunnel 24 p4190 A66-42171
 Microwave experimental technique for continuous velocity measurement of shock and contact discontinuities bounding air plasma generated in cylindrical hypersonic shock tube 24 p4190 A66-42173
SHOCK SENSITIVITY
 Shock sensitivity and high-low detonation regimes in thin explosive films studied by highly instrumented two-dimensional analog of card-gap test [CI PAPER WSCI-65-29] 05 p0787 A66-15136
 Performance of impact machines for testing explosive sensitivity to impact [CI PAPER WSCI-65-33] 05 p0787 A66-15137
 Drop-weight impact sensitivity testing of explosives

- [AI PAPER WSCI-65-27] 05 p0788 A66-15140
Test method evaluating explosive
sensitivity, due to shock, of materials
immersed in oxygen difluoride for
application to rocket propulsion systems
- [AI PAPER WSCI-65-34] 05 p0743 A66-15150
Heavy confinement cap test characterizing
endothermic decomposition of liquid and
solid materials subjected to heat, pressure
and mechanical shock, determining
monopropellant energy releases
- [AI PAPER WSCI-65-35] 05 p0744 A66-15152
Transient response analysis in package
design, formulating damage criteria and
linear theory value 21 p3824 A66-38573
- SHOCK SIMULATOR**
Impulse-impact shock simulation system
with initial peak sawtooth
capability 16 p2680 A66-30484
- SHOCK SPECTRUM**
GAUSSIAN PROBABILITY DISTRIBUTION
Single-degree of freedom system response to
impulse excitation
[ASME PAPER 65-APMW-29] 04 p0593 A66-14229
Pyrotechnic shock testing of Titan III
airborne inertial guidance equipment noting
requirements, techniques, etc 16 p2678 A66-30467
International specification for shock pulse
shapes and magnitudes, noting duration,
tolerance, etc 16 p2712 A66-30475
Economic method of reduction of
environmentally obtained shock
data 16 p2703 A66-30483
Errors inherent in specification of shock
motions by shock spectra 16 p2813 A66-30488
Shock spectrum analyzer for space vehicle
structures, etc, noting galvanometer
selection 16 p2703 A66-30489
Gaussian probability distribution of bilinear
single-degree of freedom system response to
impulse excitation
[ASME PAPER 65-APMW-29] 18 p3249 A66-33587
Response data for uniform beam supported
on nonlinear springs and subjected to shock,
demonstrating usefulness of shock spectra
in design situations 20 p3671 A66-37976
- SHOCK TESTING MACHINE**
Thin metal diaphragms in shock tubes,
discussing bursting characteristics and
petaling behavior
[ASME PAPER 65-WA/MET-16] 05 p0661 A66-15683
High precision transient measurement of
submicrosecond response of shock-loaded
materials by instrumentation techniques and
target alignment 08 p1226 A66-19694
Digital computer analytical method for
simulation of worst shock conditions for
subassembly shock
testing 12 p1829 A66-24726
Pyrotechnic shock testing of Titan III
airborne inertial guidance equipment noting
requirements, techniques, etc 16 p2678 A66-30467
Nondestructive attachment of small
electronic components and integrated
circuits for simulated mounting in vibration
and shock testing 16 p2680 A66-30481
High velocity shock machines and ancillary
equipment including elastic cord machines,
air guns, rocket-propelled devices,
accelerometers, strain gauges, etc 16 p2682 A66-31197
Shock and vibration test characteristics
revealing equipment failures, designed to
have damage potential of field
conditions 18 p3095 A66-34206
Crystal performance and mechanical noise
reduction in pressure transducer in shock
tube flow 20 p3558 A66-37423
- SHOCK TUNNEL**
SA ELECTROMAGNETIC SHOCK TUBE
SA WAVE SUPERHEATER
Wall-pressure histories of plane shock
wave reflexion from cold end wall, noting
vibrationally relaxing gas and shock front
profile 02 p0218 A66-11949
Stagnation temperature measurement in
laminar wakes behind wedge and cone in
hypersonic shock tunnel, noting effect of
Reynolds number variation
[AIAA PAPER 65-53] 03 p0315 A66-12790
Gun-shock tunnel for hypersonic
aerodynamics experiments 03 p0353 A66-13213
Transverse-field induction flowmeter to
monitor shock tube gas
velocity 03 p0353 A66-13250
Laboratory test methods for hypersonic
flow simulation past reentry vehicle, ICBM
and meteorite 04 p0506 A66-13502
Emf induced by plasma moving across
constant transverse magnetic field used to
determine rate of flow behind shock wave
in shock tube 04 p0557 A66-14434
Heat transfer from Ar and Xe to end wall
of shock tube measured, using thin film
gauge monitored by IR
photocell 05 p0782 A66-14705
Total stopping distance calculated for
various experimental conditions for solid
piston motion between driver and test gases
in closed shock tube 05 p0660 A66-15061
Ignition of hydrogen-oxygen-argon mixtures
containing small amounts of hydrocarbons
and bromine substituted hydrocarbons in
shock tubes 06 p0822 A66-16634
Atmospheric argon effect on hypersonic
stagnation point convective heat transfer,
using arc-heated shock tube simulating
flight velocities up to 34,000 fps
[AIAA PAPER 66-29] 07 p1153 A66-17891
Determination of symmetric flow between
two smooth walls attaining Mach number
maximum value at point on symmetry
axis 07 p0982 A66-18129
Shock phenomena with mixtures of water
and nitrogen in two-phase supersonic tunnel
[AIAA PAPER 66-87] 07 p0984 A66-18453
End wall insulator ablation effect on
performance of magnetic piston shock tubes,
discussing transient heating and degassing
of adsorbed material 08 p1260 A66-18526
Supersonic wind tunnel facility of German
Research Institute for Air and Space Travel
in Porz-Wahn, West Germany 08 p1202 A66-18867
Shock tunnel heat transfer measurement
and hypersonic viscous flow over pointed
cones, particularly viscous-layer regime at
low Reynolds numbers
[AIAA PAPER 66-34] 08 p1163 A66-18957
Equilibrium air total radiation mechanism,
vacuum UV radiation and relation to
hypervelocity entry studied, using shock
tube blunt model test flow
[AIAA PAPER 66-103] 09 p1469 A66-20087
Optical spectroscopic temperature
measurements in shock tubes from relative
emission intensities in two wavelength
regions of molecular band system 09 p1382 A66-20507
Free piston argon shock tunnel using
helium as driver gas, considering interface
shock, pressure and stagnation point heat
transfer
[AIAA PAPER 66-169] 10 p1519 A66-21419
Microwave cavity techniques to measure
electron precursors in shock tube
[AIAA PAPER 66-175] 10 p1560 A66-21427
Small-diameter linear electric shock tube,
noting design characteristics, construction,
operative functions, etc 10 p1519 A66-21516
Orifice effect on detonation wave
propagation in tube, noting flame formation
and detonation regeneration 10 p1523 A66-21792
Flow velocity, static pressure and test-
section pitot pressure of expansion tube,
using unheated /room temperature/
hydrogen driver 11 p1683 A66-22827
Convective and radiative heat transfer
during atmospheric reentry examined, using
double-diaphragm shock tube operated in
expansion tube mode 11 p1684 A66-22828
Modified Expansion Tube /MET/ and high
density shock tube operated in expansion
tube mode for use in hypervelocity flow
research 11 p1684 A66-22829
Faraday MHD accelerator operated with
electrically driven high density reflected
shock tunnel 11 p1685 A66-22834
Contamination-free test duration in test
section of shock tunnel 11 p1685 A66-22835
Internal resistance shock tube driver gas
heating system to heat helium driver gas to
1000 degrees F at 15,000
psia 11 p1685 A66-22836
Glass tube containing pressurized helium
progressively imploded by coaxial explosive
charge, considering application to
hypervelocity guns 11 p1686 A66-22840
- Excitation mechanism and rate of nitrogen
ions in shock-heated atomic-molecular
nitrogen mixtures, noting vibrational
relaxation 11 p1739 A66-22885
Flow over sharp and blunt flat plates at
zero angle of attack in hypersonic shock
tunnel, measuring surface skin friction, heat
transfer, static pressure and shock layer
pitot pressure 11 p1633 A66-22929
Flat plate in hypersonic flow analysis in
shock tunnel, obtaining surface pressure,
using electron beam densitometer 11 p1634 A66-22931
Shock tube ignition delay study of aircraft
engine cooling by hydrocarbon fuels in
endothermic heat sinks
[AIAA PAPER 65-594] 12 p1934 A66-23588
Wire recovery temperature in steady state
wind tunnels determined without detailed
knowledge of convective heat transfer rate
to wire 12 p1860 A66-23612
Kinetics of CN radicals association
generated by shocking cyanogen-argon
mixtures at high temperatures in reflected
shock region of expansion
wave 12 p1811 A66-23615
Chemical relaxation effects in nozzle flow
by measuring high temperatures created by
detonation waves in shock tube, using
hydrocarbon mixtures 12 p1977 A66-23748
Chemical reactions in gas flows including
relation between dissociation and
recombination kinetics, thermal
decomposition of hydrazine, kinetics of high
temperature air, etc, analyzed, using shock
tube 13 p2016 A66-25160
Glow-discharge shock tube examination of
chemiluminescent, surface-catalytic and gas-
phase reaction rates, noting temperature
dependence of NO-O and CO-O
chemiluminescent reactions 13 p2016 A66-25368
Analytical solution to rate equations for
branching chain reactions of hydrogen-
oxygen reaction under shock tube
conditions, for application to ignition
problems 13 p2018 A66-26442
Vibrational relaxation times of deuterium
in argon and krypton determined at high
temperatures by shock heating gas mixtures
in shock tube 13 p2136 A66-26662
Operation and performance characteristics
of shock tube using arc discharge heating of
driver gas, noting results on radiative
emission from aerodynamic
plasmas 13 p2059 A66-26711
Spectroscopic analysis of helium plasma
shock waves, produced by annular discharge
type conical coil shock
tube 14 p2341 A66-27310
Shock tube study of high temperature gas
flow around circular cylinders caused by
electrical discharge 14 p2218 A66-27348
Laminar separated hypersonic flow over
spiked bodies in gun tunnel for analyzing
parameters influencing heat transfer rates
in reattachment region 14 p2218 A66-27403
Series expansion solutions for shock tube
laminar wall boundary layer, taking into
account mutual interaction between
boundary layer and free
stream 15 p2479 A66-29270
Catalytic efficiency of noncatalysts
interferes with accuracy of measurement,
noting necessity of oxygen treatment of
noncatalytic surfaces 15 p2502 A66-29310
Plasma acceleration in shock tube with
concentric electrodes based on snowplow
model, assessing error 15 p2552 A66-29421
Linear electric shock tubes including
segmented series-discharge driver,
switchless shock tube, metal-walled driver
for radiant energy conservation, etc 16 p2674 A66-30418
High-explosive driven shock tubes, as
sources of short duration high-pressure
supersonic pulses, applied in accelerating
large objects 16 p2674 A66-30423
Detection of arrival of He driver gas in
test section of shock
tunnel 17 p2903 A66-32474
Shock tube in studying high temperature
plasma, noting other experimental
devices 17 p2904 A66-33038
Quadrupole mass filter coupled to shock
tube for analysis of reaction kinetics noting
ion source, time constant, smoothness of

leak, etc 17 p2904 A66-33464
 Shock wave studies with quadrupole mass filter, examining thermal decomposition of nitrous oxide from 1800 to 3500 degrees K 17 p2871 A66-33465
 Shock tube techniques used in measurement of temperature and absolute line intensities for neutral atoms of iron, lead and tin 18 p3109 A66-33695
 Equilibrium thermodynamic and gas dynamic parameter calculation for low temperature plasma, using electromagnetic and diaphragm-type shock tubes 18 p3144 A66-34037
 Magneto-Fanno flow shock tube experiments to determine one-dimensional MGD interactions between partially ionized gas flow and external magnetic field 18 p3145 A66-34111
 Shock front and current sheet separation predicted in magnetically driven shock tube with axial magnetic field and hydrogen as test gas 18 p3149 A66-34917
 High temperature flow characteristics in free piston shock tube measured by means of pulsed light of He-Ne gas laser 19 p3339 A66-35353
 Population temperatures within argon-calcium plasma generated by reflected aerodynamic shock determined by spectral line-reversal method 19 p3409 A66-36332
 Explosive sensitivity of dust or sprays ignited behind reflected shock simulated by shock tube, measuring ignition delay dependence on shock temperature 20 p3680 A66-38039
 Plasmod in shock tube with electrical discharge, measuring pressure, velocity and conductivity with magnetic probe 20 p3611 A66-38119
 Boundary layer growth effect on tailored interface operation of shock tunnel 21 p3721 A66-38719
 Microwave interference measurement of shock velocity in shock tube, noting standing wave pattern 21 p3736 A66-38798
 Heat transfer in wake of reflected shock wave in reacting gases, using calorimetry and shock tube technique 21 p3727 A66-39095
 Thermal loss measurement at tube end during reflection of shock waves, using platinum thermometers and high speed photography 21 p3727 A66-39096
 Gas flow formation ahead of flame front in circular and rectangular shock tubes analyzed, based on high speed photographs and method of characteristics 21 p3836 A66-39097
 Correlation formulas improvement for laminar shock tube boundary layer for air and argon 21 p3727 A66-39167
 Light reflection from shock waves clarified through propagation in shock tubes, using gas laser 22 p3898 A66-40012
 High temperature high density carbon plasma production in arc chamber of shock tube 22 p3955 A66-40092
 Shock-tube study of ionization process in neon and coupling with axially symmetric magnetic field 22 p3955 A66-40094
 Temperature measurement in shock tubes and transition probabilities of argon spectrum lines from emission intensities 22 p3956 A66-40406
 Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527
 Shock tunnel external burning experiments to investigate effects of reactive fuel injection into air stream flowing around body [AIAA PAPER 66-744] 22 p3893 A66-40631
 Free flight model technique in hypervelocity shock tunnel for aerodynamic force and moment measurement by optical instrumentation [AIAA PAPER 66-771] 22 p3847 A66-40652
 Limitation of maximum stagnation temperature in gun tunnel due to inefficient heating during piston acceleration phase and heat losses to barrel walls [ICAS PAPER 66-23] 22 p3896 A66-40669
 Simple inexpensive pressure transducer for wave velocity measurement in shock tubes compared to thin film resistance gauge 22 p3921 A66-40900
 Homogeneous isotopic exchange reaction

between hydrogen and deuterium in single-pulse shock tube with excess argon 22 p3860 A66-40902
 Methane/deuterium exchange reaction rate measured in shock tube, using vibrational excitation mechanism to explain data 22 p3860 A66-40903
 Short-duration aerodynamic testing techniques and new usage of hypersonic shock tunnels [AIAA PAPER 66-762] 23 p4052 A66-41331
 Field effect transistors in shock tunnel instrumentation circuitry associated with piezoelectric transducers operating in environment of widely ranging pressures, temperatures and testing times 24 p4207 A66-42170
 Simultaneous measurement of many aerodynamic, electrical and electromagnetic parameters in test time interval of several hundred microseconds of MHD augmented shock tunnel 24 p4190 A66-42171
 Magnetically driven shock tube as tool for aerodynamic studies of high velocity high enthalpy flows 24 p4190 A66-42172
 Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179
 Windowless total radiation gauge for shock tube measurements of high temperature gas radiance 24 p4208 A66-42183
 Electron number densities measured behind shock wave in pressure driven shock tube by microwave resonant cavity technique and by electrostatic quasi-Langmuir probe 24 p4191 A66-42197
 Pressure distribution in slug of shock wave excited in electrical discharge shock tube 24 p4242 A66-42405
 Shock-on-shock test facility converted from combustion driver shock tunnel, noting model surface transient pressure results [AIAA PAPER 66-764] 24 p4192 A66-42571
 Valve arrangement for calibrating piezoelectric shock tunnel transducers used in pressure measurements 24 p4213 A66-42823
 Curvature correction for shock wave in shock tube with circular cross section 24 p4197 A66-43003

SHOCK WAVE

SA NORMAL SHOCK WAVE

SA OBLIQUE SHOCK WAVE

Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 01 p0080 A66-10263
 Coronal shock waves causing type II bursts of solar radiation, determining amplitude of plasma oscillations and radio emission intensity 01 p0131 A66-10266
 Linear approximation of plane problem of shock wave incident on rigid obstacle, taking into account wave effects and diffraction 01 p0058 A66-10461
 Supersonic flow past pointed bodies of revolution in calculation of initial ratio of shock to body curvature and initial surface pressure gradient 01 p0007 A66-10631
 Solar flare characteristics interrelation with magnitude of resultant blast wave, examining sudden commencement of geomagnetic storms 01 p0063 A66-10891
 Liquid surface instability caused by sliding detonation and shock waves of gas mixture 01 p0060 A66-11192
 Flow parameters for MHD ionizing shock waves in conducting medium 02 p0266 A66-11475
 Population inversion by thermal dissociation of molecules in shock wave 02 p0263 A66-11730
 Structure of shock wave propagating through plasma perpendicular to initial magnetic field 02 p0269 A66-11799
 Dissipation and stability analysis effect on limitation of energy accumulation 02 p0261 A66-11809
 Spherical elastoplastic waves in expansion of spherical cavities in impulsively loaded thick metal spheres 02 p0300 A66-11853
 Asymptotic representation of solutions for boundary layers near weak shock waves in conical flows 02 p0176 A66-12181
 High temperature kinetics of difluoroamino radical decomposition in excess argon

studied behind incident shock waves 03 p0413 A66-12334
 Shock waves in elasticity discussing upstream, downstream and Lagrange coordinate-related configurations, propagation conditions in isotropic medium and developing equations for arbitrary shock amplitudes 03 p0392 A66-12558
 Shock wave structure for gas with discrete velocity distribution, examining compression and reflection from plane surface, Broadwell model and increase in specific mass 03 p0354 A66-12583
 Geometric shape of axisymmetric shock waves from point source explosion nonhomogeneous medium 03 p0355 A66-12622
 Shock waves in solar wind and magnetospheric storms, deriving equations governing shock ambient and driver gas velocities 03 p0418 A66-12674
 Stability of gas expelled by piston considering velocity, temperature and time represented as explosion with shock wave 03 p0355 A66-12688
 Radiation discharge cooling of gas behind shock waves, noting xenon case 03 p0355 A66-12718
 Particle in cell method for calculation of supersonic wake flow, noting translational effects for flow initiated by shock diffraction 03 p0316 A66-12790
 Microwave technique using oscilloscope that provides displacement-time trace of initiating shock wave as it grows to detonation in explosive 03 p0369 A66-12793
 Dissociation or ionization effects of air or inviscid hypersonic flow past circular cone with attached shock wave 03 p0316 A66-12922
 Water-vapor condensation zones of moist air expansions in Laval type nozzles with thermal choking 03 p0317 A66-12940
 Temperature overshoot in monatomic gas shock wave 03 p0357 A66-12954
 Structure of steady plane shock in partially ionized gas, using three-fluid Navier-Stokes model, obtaining velocities, temperatures, electric field and potential distributions through shock 03 p0357 A66-12976
 Numerical application of generalized method for study of quasi-one-dimensional flows 03 p0358 A66-13132
 Relativistic theory for plane shock wave in ionized hydrogen 03 p0358 A66-13140
 Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 03 p0379 A66-13308
 Wind tunnel study of supersonic guide surface parachute considering shock waves, pressure distribution and mass flow 04 p0457 A66-13528
 Bifurcation of nonevolutionary shock wave propagating parallel to magnetic field 04 p0509 A66-13571
 Hypersonic airflow at alpha angle of attack about flat wing with shock wave on upstream side attached 04 p0454 A66-13572
 Kinetic studies of hydroxyl radicals in shock waves, considering recombination via particular reaction in lean hydrogen-oxygen mixtures 04 p0596 A66-13646
 High temperature analysis of mechanism and kinetics of tetrafluoroethylene decomposition and oxidation in excess argon behind shock waves, using UV absorption and mass spectrometry 04 p0571 A66-13650
 Electromagnetically driven ionizing shock waves propagating in hydrogen at speeds to relativistic conditions 04 p0511 A66-14010
 Reflection and transmission of charged particles incident on plane moving plasma shock with small thickness compared to Larmor radius of particles 04 p0552 A66-14019
 Relative density and shock front velocity for strong shock waves in hydrogen, helium and argon, using ionization-potential drop deducible from Debye-Huckel theory 04 p0556 A66-14338
 Steady state regime of channel expansion and shock wave motion for underwater spark discharges 04 p0557 A66-14424
 Excitation of collisionless shock waves in rarefied plasma, examining neutron radiation and charged particle flux at chamber walls and magnetic field structure in plasma volume 04 p0557 A66-14431
 Z-pinch discharge in rare gases and light

- phenomena as described by model of converging cylindrical shock waves impelled by magnetic piston 04 p0558 A66-14495
- Reflected shock waves in helium and argon plasmas noting electron density, Saha equations and Newtonian 05 p0720 A66-14505

- Formation of shock wave when obstacle in perfect gas is set in rectilinear translational motion 07 p1019 A66-17244
- Detached shock wave created by rectilinear uniform translation of obstacle placed in perfect gas in adiabatic flow 07 p0979 A66-17448
- Polymerization of condensed monomers in shock wave as case of polymer chain formation 07 p1000 A66-17917
- Steady state jump equations for normal ionizing shock wave propagating into nonconducting gas in electromagnetic field 07 p1087 A66-17939
- Jump discontinuities in nonlinear hyperbolic systems of equations applied to formation of magnetoacoustic shocks from simple waves 07 p1089 A66-17967
- Shock wave propagation in electrically conducting incompressible fluid imbedded in magnetic field 07 p1089 A66-17975
- Stability of fast and slow attached shocks in stationary MHD flow around dihedral 07 p1089 A66-18105
- Hypersonic perfect gas flow around slightly blunted plate, discussing analogy between asymptotic shock behavior and explosion theory 07 p0981 A66-18109
- Gas and sound velocity measurements downstream of shock wave in electromagnetic tube for subsonic and supersonic flows 07 p1023 A66-18119
- Hydromagnetic shock structure from dissipative set of equations 07 p1090 A66-18128
- Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges [AIAA PAPER 66-128] 07 p0984 A66-18462
- Shock wave structure in ionized hydrogen, using Eddington approximation to solve Rankine-Hugoniot jump equation 08 p1204 A66-18522
- Two-fluid shock wave model involving Boltzmann equation and inelastic collision theory for rarefied gas 08 p1204 A66-18524
- Sudden commencement of magnetic storms in outer space caused by oblique MHD shock wave from corpuscular stream 08 p1290 A66-19032
- Shock wave induced thermal ionospheric ionization from Tunguska explosion of 1908, with recalculation of shock magnitude 08 p1290 A66-19053
- Stagnation point viscous shock layer equations for three-component gas model in chemical nonequilibrium and binary gas model in vibrational and chemical nonequilibrium, noting heat transfer rates 08 p1164 A66-19125
- Highly underexpanded sonic jet in wind-tunnel study of stagnation temperature-pressure and shock profiles 08 p1164 A66-19134
- Lip shock strength in flow behind backward facing step 08 p1207 A66-19155
- Shock wave shapes on cold flat plate in rarefied hypersonic flow tunnel measured by optical-flow techniques 08 p1165 A66-19165
- Electromagnetic behavior of shock waves and supersonic plasma fluxes generated in shock tubes, using cylindrical and conical discharge chambers 08 p1264 A66-19191
- Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma 08 p1265 A66-19467
- Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure 08 p1265 A66-19470
- Strong collisionless shock wave excitation in deuterium plasma 08 p1266 A66-19479
- Zone behind reflected shock wave in shock tube using electron beam scattering, showing flow spectra and attenuation region of wave 08 p1210 A66-19586
- Nonequilibrium inviscid flow behind blunt body shock wave analysis, using series truncation and reducing truncation error 08 p1166 A66-19816
- Equations of inviscid flow of perfect gas over cusped concave bodies, noting dependency of shock wave slope on infinite Mach number 08 p1166 A66-19818
- Radiation discharge cooling of gas behind shock waves, noting xenon case 09 p1365 A66-19947
- Coefficient of reflection of H-11 mode shock wave emitted from aperture of circular waveguide with infinite flange 09 p1344 A66-20347
- Conditions for regular stationary reflection of hydromagnetic shock on rigid wall 10 p1521 A66-21194
- Separation of gas mixture in curved supersonic flow, noting parameters of concentration gradient profile variation 10 p1522 A66-21269
- Experiments on jets formed from imploding bubbles, indicating that Munro jets are formed when hemispherical cavities on liquid surface collapse by shock wave traveling from below 10 p1607 A66-21293
- Pseudoshocks in pipe flow in supersonic compressors represented as diffusion process, noting application in cascade and rotor configuration 10 p1479 A66-21363
- Hypersonic flow of air past circular cylinder with nonequilibrium oxygen dissociation, including dissociation of free stream 10 p1479 A66-21375
- Heat transfer measurement to side wall of shock tube behind incident shock wave in argon and xenon [AIAA PAPER 66-160] 10 p1560 A66-21428
- Neutral point between two parallel line currents in highly conductive plasma, noting topological flux change and relation to solar flares [AIAA PAPER 66-152] 10 p1565 A66-21683
- Departures from local thermal equilibrium in helium plasma produced by magnetically-driven shock wave in T-tube 10 p1566 A66-21811
- Perpendicular shock wave structure in plasma, using Boltzmann ionized gas equations 10 p1566 A66-21812
- Stagnation layer of rigid plate resulting from cool energetic plasma stream interaction 10 p1567 A66-21820
- Downstream-facing attached shock waves in MGD flow past wedge are stable if upstream flow is supersonic 10 p1481 A66-21846
- Numerical method for calculating flow, including gas reactions and nonequilibrium, behind given axisymmetric detached shock wave 10 p1481 A66-21892
- Collective processes in rarefied plasma, analyzing nonlinear undamped oscillations and shock waves 10 p1572 A66-22036
- Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063
- Shock tube study of irregular reflection of strong shock waves in carbon dioxide, nitrogen and air 11 p1629 A66-22335
- Electrical conductance of turbulent magnetically active plasma, assuming oscillation is possible, determining width of weak shock wave in collisionless plasma 11 p1744 A66-22448
- Kinetics and gas dynamics equations derived to determine state of gas behind strong shock waves, accounting for all excited states of neutral atoms 11 p1688 A66-22586
- Rarefied gas dynamics - International Symposium, Institute for Aerospace Studies, University of Toronto, July 1964, Volume 1 11 p1688 A66-22901
- Numerical convergence of iterative solution to complete Bhatnagar-Gross-Krook equation for strong shock waves 11 p1690 A66-22909
- Iterative solution to shock wave structure in highly rarefied flows through kinetic theory and full Boltzmann equation 11 p1690 A66-22910
- Molecular beam approximation for plane normal shock in free stream monatomic gas flow at large Mach numbers 11 p1690 A66-22911

- Existence of collisionless MHD bow shock wave attached to magnetosphere 11 p1699 A66-23133
- Shock compression of liquid argon at very high pressures and temperatures by reflecting shock wave from tungsten wall for testing interatomic potential 11 p1694 A66-23210
- Mach-Zehnder laser interferometer as diagnostic tool in shock tube experiments 11 p1714 A66-23352
- General solution for class of initial value problems for systems of aerodynamic equations, constructing reference solution to Cauchy problem involving shock and expansion waves 11 p1694 A66-23363
- Dissociation rate of nitrogen behind strong shock waves in nitrogen-argon mixtures determined, using time-resolved interferometric measurements of gas density 12 p1861 A66-23616
- Thermal decomposition of difluorocarbene radical diluted in argon analyzed behind incident shock waves at high temperatures 12 p1811 A66-23623
- Blast wave theory with and without entropy layer effect, determining asymptotic flow, far downstream of blunted nose, past given body 12 p1861 A66-23808
- Blast wave theory noting transformation of variables, role in hydrodynamic equations, exploding wire phenomena, MHD, cavitation, etc 12 p1861 A66-23810
- Photographic results compared with calculations for shock wave reflection velocity and wake processes in electromagnetic shock tube 12 p1921 A66-24214
- Axisymmetric shock wave formation at nozzle exit when jet pressure is less than ambient pressure 12 p1799 A66-24447
- Transition solution of physical state across plane nonrelativistic MHD shock of finite strength in compressible dissipationless perfect gas in uniform magnetic field 12 p1923 A66-24578
- Electrical precursors in immediate vicinity of ionizing shock waves in argon analyzed, using model describing electron diffusion through shock 12 p1923 A66-24579
- Evolution of plane switch-on and switch-off shocks in gas of finite electrical conductivity in presence of small normal disturbances 12 p1866 A66-24950
- Relationship between shock wave phenomena during collapse of cavitation bubbles in water and temperature and gas content of water 13 p2060 A66-25091
- Supersonic flow past blunt body by Taylor series expansion from shock wave, Newton-Busemann expansion, truncated series expansion from axis, etc, and comparison with numerical solutions 13 p1989 A66-25155
- Chemical system and reaction rates behind strong shock waves in mixtures of carbon dioxide and nitrogen used to study entry conditions into Mars atmosphere 13 p2062 A66-25276

Hugoniot equations of stage derived for several unreacted explosives and propellants from optical measurements of shock wave and particle velocities 13 p2171 A66-25377

Ground reflection shock, compression and expansion waves caused by supersonic aircraft examined, noting correlation between wave intensity, incidence and pressure jump 13 p2062 A66-25403

Equation system for shock waves in relativistic thermodynamic fluid with infinite conductivity, giving expression for pulse-energy tensor in fluid parameters 13 p2140 A66-25416

Approximate shape of detached shock wave calculated and results compared with empirical findings obtained by supersonic wind tunnel experiments 13 p1990 A66-25452

Aerodynamic resistance of transonic wing profile analyzed, using asymptotic flow at long distance downstream of shocks 13 p1990 A66-25456

Distribution, as function of azimuth, of static pressure and mass and heat transfer coefficients for case of interaction between detached shock wave on cylinder nose in hypersonic flow and turbulent boundary layer along wall 13 p1991 A66-25464

Shock wave phenomena associated with ejection of stellar material during star lifetime 13 p2181 A66-25525

Shock waves, pressure distribution and mass flow effects on supersonic guide surface parachute 13 p1994 A66-25589

Engineering aspects of MHD - Symposium, Princeton University, March 1966 13 p2000 A66-26253

Numerical solution of steady state jump equations for normal ionizing shock waves in hydrogen, assuming upstream and downstream states at chemical equilibrium 13 p2154 A66-26661

Thermalization of plasma by creating imploding shock wave driven by laser energy release 13 p2106 A66-26683

Shock waves from empty cavity collapsing with spherical symmetry on small solid sphere 13 p2071 A66-26723

Shock bounded self-similar flows over slender bodies with volumetric mass, momentum and energy addition 13 p2071 A66-26731

Shock wave from explosion of laminar charges in air, water and vacuum 14 p2298 A66-26788

High speed milling of titanium alloys, discussing cutting velocities, feed rates, tool wear, etc [ASTME PAPER MR66-151] 14 p2299 A66-26952

Electron density in shock-produced argon plasma measured by microwave reflection probe 14 p2340 A66-27025

Axisymmetric supersonic flow involving shock waves applied to flow near vertex region of pointed bodies of revolution with arbitrary geometry 14 p2218 A66-27354

Solution of boundary value problem for three-dimensional wave equation applied to supersonic gas flow past wing in presence of shock wave, obtaining velocity potential 14 p2218 A66-27387

Nonequilibrium inviscid flow about arbitrarily shaped body with detached shock waves, using method with time derivative and bypassing boundary conditions [AIAA PAPER 65-24] 14 p2218 A66-27404

Stability of two-dimensional panels in supersonic flow when shock wave is reflecting regularly from surface, using static aerodynamic approximation 14 p2398 A66-27417

Structure and development of detonation waves in gaseous media 14 p2399 A66-27557

Decomposition times of liquid nitromethane, liquid tetranitromethane and hexogen single crystals in shock waves 14 p2275 A66-27598

Book on thermodynamic functions and shock adiabats of air at high temperature and pressure 14 p2413 A66-27787

Book on shock wave relaxation processes, discussing laws governing statistical equilibrium, thermal dislocation and ionization, nonequilibrium zones behind shock wavefront, plasma shock propagation, etc 14 p2277 A66-27788

Exact solutions for unsteady two-

dimensional gas dynamics equations for self-similar flow behind shocks and expansion waves 14 p2278 A66-28143

Pioneer I observations of geomagnetic field, discussing amplitude and polarization of oblique pulses, existence of collisionless oblique magnetic shock waves, soft electron acceleration, etc 15 p2482 A66-28500

Conditions at head shock wave in viscous hypersonic flow past blunt body for study of boundary layer separation 15 p2423 A66-28960

Solar wind computations beyond one angstrom, noting shock wave formation indicating hot tenuous gas region surrounding solar system 15 p2576 A66-29229

Spherical blast waves in weak dipole magnetic field, calculating distortion by using motion equations, noting similarity to supernovae explosions 15 p2479 A66-29304

Unsteady flow during starting process in hypersonic nozzle, discussing initial pressure effect and behavior of secondary shock wave 15 p2425 A66-29684

Shock wave thicknesses and density ratios measured in helium, argon and nitrogen, using electron beam fluorescence method at various Mach numbers in wind tunnel 15 p2480 A66-29736

Rotational energy distribution through shock waves in nitrogen measured, using electron beam fluorescence 15 p2481 A66-29738

Plasma flows past bodies in magnetic field, using plasma gun, analyzing downstream wake of ordinary hydrodynamic shock wave 15 p2553 A66-29743

Behavior of projectiles in hyperballistic tunnel analyzed by photographs of their shock waves, using array of spark gaps flashes correlated with cameras 16 p2673 A66-30313

Inviscid and viscous flow in central core of supersonic free jet in wind tunnel, noting shock wave location at high Reynolds number 16 p2628 A66-30375

Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients, shock wave behavior, etc 16 p2825 A66-30383

Shock and blast, thermal radiation and nuclear radiation as basic elements of nuclear weapon environment, analyzing effect on personnel and materiel 16 p2745 A66-30440

Physical and biological blast effects from explosive fragmentation of gaseous nitrogen flight pressurized Atlas missile without propellants [AIAA PAPER 65-195] 16 p2810 A66-30897

Approximating values of analytic function in form of power series, when region of interest is outside convergence domain of series, using numerical methods, noting detached shock problem 16 p2735 A66-30944

Iterative solution to Krook-Boltzmann kinetic equation noting Navier-Stokes numerical solution, computation and analysis of distribution function within shock wave 16 p2685 A66-30945

Conservation equations for cylindrical blast and radiation effect on shock layer profiles of blast wave 16 p2686 A66-31114

Nonstationary flow past spheres and cylinders in electromagnetic shock tube, determining time required for flow to become stationary 16 p2682 A66-31295

Hypersonic flow past blunt body near stagnation point examined, noting surface layer, characterized by increased density and decreased entropy of gas 16 p2630 A66-31305

Book on radiation gas dynamics including radiative heat transfer, waves and shock waves, kinetic theory, relativistic mechanics, free-molecule flow, etc 16 p2829 A66-31314

Heat-conducting gas converging spherical shock wave analysis, emphasizing energy accumulation 16 p2689 A66-31514

Shock wave excited by pulsed current flowing between two plane parallel electrodes in rarefied air 16 p2690 A66-31621

Thermodynamic parameters of gas behind strong shock wave in helium 16 p2690 A66-31630

Shock wave structure measurement in monatomic gases, applying continuum theory and kinetic theory 16 p2690 A66-31636

Relation between shock expansion method

and Whitham rule to examine shock wave motion in nonuniform region 16 p2691 A66-31666

Shape of head wave in linearized supersonic flow past finite span wing considering waves with convex and concave leading edge 16 p2632 A66-3179

Inviscid hypersonic flow past circular cone at finite angle of attack with attached shock wave in presence of dissociation air behind shock wave 17 p2837 A66-3203

Solar corona and interplanetary plasma, noting solar wind effect on comet tails and shock wave caused by interaction of geomagnetic field and plasma 17 p3000 A66-3227

Steady state structure of MHD shock waves, taking Hall current effect into account 17 p2965 A66-3241

Physical model for ionizing switch-on shock wave and electric field situated in electromagnetic shock tube 17 p2967 A66-3243

Interferometric study of dissociation rate of nitrogen behind shock waves 17 p2908 A66-3243

Wall heat transfer behind plane detonation wave moving past flat plate into stationary hydrogen-oxygen mixture 17 p3033 A66-3246

Hypersonic self-similarity of barrel shock in source-type free jets at high pressure ratio 17 p2839 A66-32468

Relaxation processes behind shock wave in free stream partially dissociated and vibrationally excited by monitoring time history of radiative emission in shock tube [AIAA PAPER 66-519] 17 p2911 A66-32775

Shock wave speed behind convergent and divergent ducts for different pressures and taper angles 17 p2913 A66-33072

Integral relations method formulation of inverse blunt body problem and corresponding shock wave under supersonic flow of perfect gas 17 p2842 A66-33333

Nose bluntness and angle of attack effects on hypersonic flow, noting shock wave deflection decrease of minimum possible shock angle, varying specific heat ratio, convective heating, boundary layer transition, etc [AIAA PAPER 66-414] 18 p3046 A66-33639

Terminal shock-boundary layer interaction on slender cone-cylinder payloads at supersonic speeds and resulting flow separation [AIAA PAPER 66-471] 18 p3250 A66-33653

Dissociation rate of undiluted carbon monoxide behind strong shock waves produced in arc discharge shock tube [AIAA PAPER 66-518] 18 p3063 A66-33660

Feasibility of rocket motor using detonation wave rotating in annular combustion chamber wherein propellant is injected continuously and expelled through annular nozzle 18 p3162 A66-33807

Thermodynamics and one-dimensional shock waves in material with memory 18 p3254 A66-33969

Stark broadening of singly ionized argon lines in helium-argon plasma behind reflected shock wave in electromagnetic T tube with backstrap 18 p3138 A66-34233

Collision-free hydromagnetic shock observed simultaneously in interplanetary space on October 7, 1962 by Mariner II and Explorer XIV 18 p3168 A66-34340

Shock wave boundary layer interactions and shear flow regimes in hypersonic inlet flows [AIAA PAPER 66-606] 18 p3049 A66-34447

Shock formation in mixture of chemically reacting ideal gases due to piston action 18 p3100 A66-34641

Numerical solutions of Krook kinetic equation for Couette flow and plane shock wave 18 p3101 A66-34665

Ideal detonation wave and Chapman-Jouguet condition, considering plane permanent and shock waves 18 p3266 A66-34721

High magnetic field limit of shock wave in steady state model plasma moving along x axis studied transverse to magnetic field 18 p3148 A66-34905

Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas,

including presence of traveling shock wave 18 p3102 A66-34918

Shock wavefront structure in plasma, noting use of SHF diagnostics, electron concentration growth, etc 18 p3104 A66-35063

Shock wave and glow cloud of nitrogen oxide released at 110 km altitude 19 p3345 A66-35492

Light deflection technique for transient shock wave detection by phototube activation based on Snell law 19 p3357 A66-35811

Discontinuities in plasma parameters of solar wind satisfy conditions of Mhd and can be treated as shock waves and stationary contact surfaces 19 p3452 A66-35980

Preionization and shock wave ionization in cylindrical crossed-field plasma source, using microwave diagnostic methods including interferometry 19 p3408 A66-36277

Book on physics of shock waves and high temperature hydrodynamic phenomena 19 p3341 A66-36316

Nonstationary flow past various bodies in wake of plane shock wave, noting cylinders 19 p3276 A66-36461

Structure of flow past bodies with radial cross section in wind tunnel at various Mach numbers and angles of attack, noting position of shock waves 19 p3276 A66-36473

Hydromagnetic disturbances during radial implosion phase of preionized theta pinch Carididi/ 19 p3414 A66-36510

Plasma convergence, structure and heating by collisionless cylindrical shock waves, discussing wave front 19 p3424 A66-36560

Fast overlap of microwave radiation by ionization aureole of spark in laser beam 19 p3376 A66-36719

Electron temperatures and concentrations of charged particles behind strong shock wave in air measured, noting techniques, maximal values and accuracy 20 p3545 A66-37369

Book on transonic and hypersonic flow theory covering motion and shock equations, application of Newtonian theory, temperature effect, behavior of minimum drag bodies, etc 20 p3492 A66-37495

Numerical integration of Navier-Stokes equation for shock reflection, supersonic flow past thin plate and shock diffraction on thick plate 20 p3546 A66-37534

Blast waves in inviscid gaseous medium devoid of heat conduction and viscosity but with finite conductivity 20 p3609 A66-37536

Shock waves, boundary surfaces and thin shells in general 20 p3602 A66-37634

relativity 20 p3602 A66-37634

Initial stages of deformation in metals subjected to repeated liquid impact compared to loading from shock waves in liquid 20 p3586 A66-37808

Rain impact-induced erosion of high speed aircraft surfaces and shock wave disintegrating effect on raindrops prior to impact 20 p3495 A66-37809

Shock waves and stress from cavity collapse, calculating pressures causing surface damage and jet formation 20 p3547 A66-37812

Book on space electrodynamics noting application of MHD, plasma properties, waves, interaction with magnetic field, shock waves, solar atmospheric motion, etc 20 p3631 A66-37984

Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084

Shock waves in rarefied magnetoplasma and collisionless shock waves ahead of geomagnetic cavity in solar wind 20 p3611 A66-38221

Bomb debris motion following Star Fish test, noting formation of MHD shock wave, production of stationary plasma through X-ray ionization and collision in neutral air 20 p3644 A66-38345

Energetic electrons from shock heating of exosphere, discussing formation of artificial radiation belt via MHD shock wave heated and density gradient accelerated electrons 20 p3644 A66-38346

Relationship between shock wave phenomena during collapse of cavitation

bubbles in water and temperature and gas content of water 21 p3723 A66-38516

Applicability of inverse blunt-body computer program /Norair/ to supersonic and transonic flow problems 21 p3694 A66-38731

Density distribution and shock wave profile of rarefied gas slip flows past blunt bodies determined, using multibeam interferometer 21 p3724 A66-38903

HF pressure fluctuations in heat transfer of diisopropyl hexane seen as caused by shock waves produced by collapsing bubbles 21 p3835 A66-38906

Temperature and pressure of cesium plasma in wake of incident and reflected shock wave 21 p3790 A66-39075

Spectral characteristics of gases heated by shock waves, noting absorption capacity distribution as function of wavelength 21 p3726 A66-39078

Electron concentrations and effective frequencies for electron collisions with neutral particles in atmospheric gases in shock wake 21 p3726 A66-39085

Ionization and secondary effects during reflection of shock waves in argon 21 p3726 A66-39086

Gas molecule excitation in shock wake analysis based on behavior of gas flow past obstacle in shock tube 21 p3726 A66-39092

Peculiarities in Mach reflection of shock waves traveling in carbon dioxide gas and nitrogen at velocities of order of 2000 m/sec 21 p3726 A66-39094

Heat transfer in wake of reflected shock wave in reacting gases, using calorimetry and shock tube technique 21 p3727 A66-39095

Thermal loss measurement at tube end during reflection of shock waves, using platinum thermometers and high speed photography 21 p3727 A66-39096

Conicoidal MHD shock wave in axisymmetric hypersonic viscous-layer flow 21 p3727 A66-39185

Dissociation of hypersonic airflow past circular cylinder at zero angle of incidence 21 p3695 A66-39230

Stationary plane shock wave stability in arbitrary media, discussing error analysis 21 p3728 A66-39317

Errors caused by using artificial viscosity terms to represent steady state shock waves 21 p3730 A66-39469

Eulerian finite difference method for solving time-dependent equations of motion for compressible fluid flow, noting shock wave diffraction, supersonic blunt body interaction with shock wave, etc 21 p3730 A66-39472

Implosion experiment, discussing methods for detonation and shock wave propagation phase calculation 21 p3837 A66-39503

Ferroelectric transducers, discussing feasibility of using ceramic transducers as pulsed power supplies 21 p3741 A66-39504

Ferromagnetic transducer operation principles, noting dimension optimization, energy efficiency, etc 21 p3741 A66-39505

Shock waves and periodic structures of supersonic plasma flows and effect on velocity of foremost luminous front 22 p3953 A66-39759

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer 22 p3897 A66-39902

Aerodynamic breakup of liquid drops in flow behind plane shock wave analyzed via high speed photography, noting experimental setup, parameter variation, etc 22 p3899 A66-40198

Weak plane shock waves formation by impulsive motion of piston for viscous heat conducting gas 22 p3900 A66-40383

Longitudinal viscosity effect in equation for plane transonic flow for initial stages of shock formation downstream in nozzle 22 p3844 A66-40387

Detached shock wave determination for calculation of shock layer or wake, discussing theories of conic and explosive wave methods for application to Apollo space capsule 22 p3900 A66-40416

Photographic results compared with calculations for shock wave reflection

velocity and wake processes in electromagnetic shock tube 22 p3957 A66-40578

Book on MHD covering fundamental equations, boundary conditions, incompressible flow, steady flow MHD simple and shock waves, etc 22 p3957 A66-40619

Energy accumulation of spherical and cylindrical shock waves in inhomogeneous gas 22 p3901 A66-40690

Stability analysis of discontinuous solution of gas dynamics PDEs for ideal fluid 23 p4055 A66-41559

Transient anisotropic cosmic ray increase during recovery phase of Forbush decrease due to reflection from receding blast wave and co-rotating shock wave formed during explosive heating of solar corona 23 p4123 A66-41687

Body shapes providing minimum wave resistance to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves 23 p4009 A66-41717

Supersonic unsteady state three-dimensional flow around blunted bodies with detached shock wave 23 p4009 A66-41718

Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave 23 p4009 A66-41719

Vibrational energy exchange between molecules during collision behind direct shock wave front examined as function of wave velocity 23 p4010 A66-41732

Reaction of three-dimensional shock wave with turbulent boundary layer in supersonic flow around plate 23 p4010 A66-41735

Detonation initiation behind reflected shock waves in hydrogen-oxygen-argon mixtures, noting reaction wave propagation 23 p4057 A66-41889

Shock wave transport effects on hypersonic leading edge flow past sharp plate, discussing Rankine-Hugoniot relations 23 p4058 A66-41910

Numerical solution of Bhatnagar-Gross-Krook model for shock wave structure problem, noting Chapman-Enskog approximation 23 p4061 A66-42037

Nonlinear reflection of weak shock waves, deriving equations for propagation velocity and velocity vector 23 p4061 A66-42039

Piezoelectric balance for aerodynamic force measurements in hypersonic shock tunnel, discussing design, calibration and performance characteristics 24 p4190 A66-42174

Stagnation pressure, temperature and static pressure measurement in shock driven facilities, using equipment with piezoelectric crystal and fast response thermocouple 24 p4207 A66-42175

Functional interdependence of four distinctly different parameters represented by gamma in study of thermodynamical relations for shock waves 24 p4193 A66-42270

Pressure distribution in slug of shock wave excited in electrical discharge shock tube 24 p4242 A66-42405

Supersonic flow past pointed bodies of revolution at small angles of attack 24 p4157 A66-42611

Kinetics of dissociation of carbon dioxide gas molecules behind shock wave front 24 p4196 A66-42882

Flow behind shock wave in long tube analyzed by time effect and integrating equations, using Galerkin method 24 p4197 A66-42997

Curvature correction for shock wave in shock tube with circular cross section 24 p4197 A66-43003

Electric contact design factors for shock vibration environments 24 p4186 A66-43058

Book on theory and application of plasma physics including adiabatic charged particle motion, MHD characteristics, shock waves and hydromagnetic flow 24 p4246 A66-43109

Nonlinear wave propagation in MHD, noting resulting shock waves conversion rate of magnetic energy into plasma energy and production of high temperature plasma samples 24 p4246 A66-43114

SHOCK WAVE ATTENUATION

Shock wave attenuation experiment by liquid nitrogen injection 08 p1210 A66-19594

Strong plane shock produced in Al by

hypervelocity impact and late stage equivalence examined, using analytical and graphical solution of method of characteristics and realistic state equation 13 p2194 A66-25061

SHOCK WAVE GENERATOR

Reaction dwell time and cooling rate in single pulse shock tube covering laboratory techniques and geometric and flow parameters 04 p0508 A66-14013

Inverse pinch suitable for cylindrical shock wave generation having well defined and reproducible luminous fronts 04 p0555 A66-14322

Two-diaphragm shock tube design for production of shock waves comparable to those of arc driven type 05 p0660 A66-15190

Plasma generation of ionized gases in electromagnetic field and properties 05 p0729 A66-15816

Firecracker, Crackerjack and Yellowhammer exercises in UK involving sonic boom generation 09 p1330 A66-20682

Device for generation of strong shock waves in air 10 p1525 A66-22014

MHD power generation by pulsating preheated gas with shock waves, noting thermodynamic cycle composition, efficiency and parameters 13 p2001 A66-26258

Device for generation of strong shock waves in air 19 p3341 A66-36100

Simulation of rocket engine starting transients via shock tube combustion drivers, discussing diaphragm rupture effect on combustion, acceleration and burst pressure [AIAA PAPER 66-761] 22 p3972 A66-40644

SHOCK WAVE INTERACTION

Head-on interaction of plane shock wave and supersonic cone-cylinder body 03 p0316 A66-12812

Head-on interaction of plane shock wave and supersonic cone-cylinder projectile 03 p0316 A66-12813

Pohlhausen method applied to shock wave/boundary layer interaction, calculating flow characteristics of laminar separation region 04 p0455 A66-14138

Time duration of pressure pulse resulting from intersecting shock waves defined, based on one-dimensional wave interaction 05 p0666 A66-15799

Bursting shock tube diaphragms electrically, using two piezoelectric gauges 06 p0869 A66-16947

Ionization rate behind shock waves in argon, allowing for excitation and ionization by atom-atom collisions 07 p1020 A66-17938

Unsteady oscillations of boundary layer interaction with shock waves in lower transonic region 07 p1022 A66-18106

Dissipative effects in converging cylindrical symmetric shock wave, considering ion and electron heat conductivity, ion viscosity and energy exchange 07 p1025 A66-18180

Application of short-wave theory to regime of regular interaction between weak shock waves 07 p1026 A66-18195

Sequence photography of models used to study head-on interaction between slender cone in supersonic flight and moving shock wave [AIAA PAPER 66-57] 08 p1163 A66-18990

Discharge in germanium thin films at liquid helium temperatures, noting electrostatic ionization of impurities and shock-ionization region expansion 09 p1412 A66-19990

High gas temperature measurement using colliding shock waves 10 p1622 A66-21883

Inviscid unsteady flow field disturbances caused by blast-generated normal shock wave sweeping past slender wedge moving at hypersonic speed 12 p1795 A66-23577

Turbulent boundary layer separation in supersonic flow 12 p1797 A66-24112

Shock wave systems in design and operation of supersonic intakes, noting motion equation describing flow and role of multiple wedges meeting at one point 12 p1800 A66-25003

Light output of shock wave interacting with metallic powder in oxidizing atmosphere 13 p2016 A66-25058

Three-dimensional plane shock wave intersection in space, noting parameter range for which two solutions exist 13 p1991 A66-25635

Velocities of incident and reflected shock wave colliding with plasmoid as affected by initial xenon pressure in induction discharge shock tube 13 p2153 A66-26525

Shock wavefront interaction in cylindrical chamber 14 p2412 A66-27438

Oscillatory behavior in rocket engines, analyzing interaction between shock wave and burning solid propellant surface and stressing gas dynamics 15 p2572 A66-29298

Spherical blast waves in weak dipole magnetic field, calculating distortion by using motion equations, noting similarity to supernovae explosions 15 p2479 A66-29304

Laminar boundary layer separation in supersonic flow on body with symmetry of revolution 16 p2629 A66-30583

Unsteady interaction between blunt bodies and shock wave, comparing reflected shock wave velocity decrease for plane spherically blunted cylinders 16 p2685 A66-30788

Shock wave reflection from sonic line during supersonic flow around smooth profile 16 p2632 A66-31618

Hypersonic strong-interaction similarity solutions for viscous compressible flow past plate analyzed using Navier-Stokes equations 16 p2632 A66-31655

Interaction of first and second shocks of blast-bow wave in double-driver shock tube, examining stagnation point pressure prediction methods [AIAA PAPER 66-409] 17 p2840 A66-32748

Tangential fluid injection for control of shock-boundary layer interaction [AIAA PAPER 66-656] 18 p3048 A66-34439

Estimation of shock induced pressure rise on wedge or conical body for various Mach numbers, noting variation of blast-induced pressure ratio with incidence angle 19 p3275 A66-35634

Self-simulating solutions of nonstationary turbulent mixing in some aerodynamic problems, considering shock interaction with boundary layer 19 p3276 A66-36462

Interaction of moving shock wave with wire-mesh screen or gauze, noting two moving shock waves produced by interaction 20 p3547 A66-37977

Weak oblique blast impingement on slender hypersonic wedge 21 p3724 A66-38726

Oblique detonation impacts in pentolite on iron treated by methods of plane steady compressible flow, discussing regular and shock Mach reflection and expansion 21 p3727 A66-39172

RF-induced plasma shield propagation and electron diffusion 21 p3792 A66-39190

Plane supersonic flow with Mach reflection represented by shock wave interaction, noting integral equation obtained from linearized shock equations 22 p3897 A66-39696

Flow pattern of three-dimensional interaction of oblique shock with boundary layer obtained when shock generated by wedge spanning supersonic wind tunnel interacts with side wall 22 p3901 A66-40491

Elastic wave radiation possible in collision of unloading wave with shock wave 23 p4054 A66-41354

Shallow water theory of formation and decay of hydraulic shock waves in nonsteady homentropic gas flow 23 p4055 A66-41541

SHOCK WAVE LUMINESCENCE

Mach-Zehnder interferometer for electromagnetically accelerated shock waves in hydrogen 04 p0554 A66-14285

Electric shock tube flow modes at low pressure and conditions for shock wave detached from plasma flow 05 p0659 A66-14706

Computation of shock wave parameter in partially ionized hydrogen 05 p0662 A66-14875

Molecules intrinsic volume role in theory of shock broadening of spectral lines 06 p0909 A66-16629

Spectroscopic analysis of helium plasma heated by reflected shock in T-tube, discussing luminous front and preceding shock 09 p1409 A66-20854

Type I comet tail origin due to energetic electrons in shock structure, noting inertial slowing down of interplanetary field lines trapped in solar wind 16 p2801 A66-30919

Relaxation and emission during equilibrium supersonic air flow incident on normal shock wave 19 p3276 A66-36460

Brightness temperature of shock wave dependence on wave amplitude in xenon and air at high temperature 22 p3898 A66-4019

Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow fields 24 p4208 A66-4218

SHOCK WAVE PROFILE

Numerical solution to steady compressible Navier-Stokes equation, treating steady shock tube flow as asymptotic form of time dependent flow [AIAA PAPER 65-1] 02 p0217 A66-1153

Wall-pressure histories of plane shock wave reflexion from cold end wall, noting vibrationally relaxing gas and shock front profile 02 p0218 A66-1194

Thermal conductivity and interference pattern of temperature boundary layer developed in reflected air shock wave 04 p0598 A66-1432

Oscillating pressure effect on shock wave detachment and shape at blunt body surface 07 p1023 A66-1810

Accuracy of kinetic theory approximations assessed by comparison of approximate and exact solutions of Krook kinetic equation for Couette flow and shock wave structure 11 p1690 A66-2290

Shock wave structure in gas composed of rigid sphere molecules initially in thermal equilibrium between two infinite plane parallel specularly reflecting walls 11 p1691 A66-2291

Density variation in Ar shock waves during translational adjustment for Mach 5 to 10 velocity range, using electron beam techniques 11 p1691 A66-22915

Electron beam measurement of shock wave thickness used to determine limits of validity of Navier-Stokes equations 11 p1691 A66-22917

Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds 12 p1798 A66-24439

Carbon dioxide relaxation processes in shock waves, measuring density variation, vibrational energy, relaxation time, shock density profile, etc 13 p2061 A66-25161

Approximate method, using power polynomials, for calculating distance between detached shock wave and profile 15 p2425 A66-29721

Monte Carlo solutions to two molecular flow problems, heat transfer between parallel walls and shock wave profile-computer programmed in Boltzmann equation analysis 16 p2686 A66-30946

Shock-induced boundary layer separation on supersonic intake, using hodograph technique for flow structure analysis 17 p2841 A66-32896

Weak shock wave structure in viscous heat-conducting fluid, accounting for dissipation of energy during one-dimensional flow 21 p3723 A66-38587

SHOCK WAVE PROPAGATION

MgO crystals subjected to plane shock waves for number of explosive shocking geometries 02 p0249 A66-11945

Aerodynamic blast simulation in hypersonic tunnels, noting unsteady tunnel flow behind blast wave 03 p0316 A66-12794

Stagnation enthalpy plasma due to propagation of electromagnetic shock wave 03 p0406 A66-13279

Shock wave propagation phenomena including ionization relaxation, electron diffusion from shock wave front and structure of shock waves in highly rarefied gases 04 p0508 A66-13503

Explosive shock wave velocity measurement by microwave transceiver in waveguide 04 p0566 A66-14281

Gas stream behind shock wave in contracting channel, discussing flow parameters during discharge from supersonic and divergent nozzle 05 p0607 A66-15321

Propagation of shock wave of gas flow from axisymmetric nozzle 06 p0802 A66-16422

Photoionization upstream of strong shock wave determined by ion continuity and radiative transfer equations 07 p1022 A66-18107

- Instabilities of current and potential distribution in n-type GaAs and InP in electric field of several thousand /cm 07 p1104 A66-18221
- Shock wave propagation in lower half-space filled with compressible fluid 07 p1026 A66-18256
- Imploding cylindrical shock wave production through imploding detonation waves in oxygen-acetylene mixtures, using Chapman-Jouguet theory 08 p1204 A66-18523
- Precursor electron front measuring velocity, electron temperature dependence on operating parameters, etc 08 p1259 A66-18525
- Relativistic hydrodynamics of relaxation, discussing limiting cases depending on chemical reaction and annihilation rates and pair growth 08 p1206 A66-18974
- Onset of retonation, laser technology and high repetition-high resolution schlieren microscopical wave phenomena 08 p1318 A66-19200
- Growth or decay of plane, cylindrical or spherical sonic discontinuity moving in nonhomogeneous gas in isentropic equilibrium under external forces 08 p1298 A66-19230
- Finite strength spherical shock wave propagation due to explosion into nonhomogeneous nongravitating and self-gravitating systems 08 p1211 A66-19810
- Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall 09 p1469 A66-20140
- Formation and expansion of electromagnetic shock waves in communication lines, using ferroelectric crystals 09 p1344 A66-20346
- Shock wave propagation in atmosphere whose density is exponentially decreasing 09 p1367 A66-20405
- Microwave reflection measurements for precursor in electromagnetically driven shock tube, discussing axial distribution and electron density 09 p1409 A66-20855
- Initial value problem of converging shock wave propagation in quiescent gas of variable density 10 p1521 A66-21228
- Time duration and length of compressed region and heated gas behind shock wave front determined by thermal probe 11 p1682 A66-22593
- Shock wave structure in binary gas mixtures that are monatomic and chemically inert, using Mott-Smith method 11 p1691 A66-22914
- Reflection and transmission of shock waves in porous acoustic absorbers 12 p1913 A66-23822
- Effect of surface roughness on two-dimensional Mach reflection of moving plane shock waves in air 12 p1863 A66-24096
- Propagation of fast shock waves in electromagnetic shock tube, using acoustical method, noting time distribution of pressure, wave reflection, etc 13 p2059 A66-25083
- Rarefied flow transition at leading edge of flat plate examined, using Navier-Stokes equation, noting new low density jump conditions, viscous layer characteristics, effect of normal pressure gradient, etc 13 p2061 A66-25164
- Flow in vicinity of right cylindrical body, considering shocks between molecules and solid 13 p1991 A66-25469
- Precursor wave structure in electromagnetic shock tube, determining precursor velocity, electron density and current content, comparing precursor behavior with ionizing electromagnetic wave 13 p2064 A66-26259
- Similar solutions of partial differential flow equations for cylindrical blast uniform flow shock wave and determination of blast wave velocity 14 p2344 A66-27633
- Reflected shock wave equations by unknown function expansion in series of small parameter considered excess pressure value 14 p2278 A66-28058
- Radio wave emission due to shock wave propagation in magnetospheric boundary and electromagnetic scattering in plasma wave field 15 p2575 A66-29083
- Multispark camera to obtain schlieren record of blast waves originating from finite source 15 p2478 A66-29248
- Time required for detached bow shock to reach equilibrium 17 p2840 A66-32483
- Unsteady flow field, combustion processes and interaction regions during shock propagation in solid-propellant rocket combustors 17 p2991 A66-32486
- Detection and measurement techniques for collisionless MHD shock wave propagation in interplanetary space, using bistatic-radar Earth-to-spacecraft transmissions 17 p3002 A66-32522
- Exact analytic solution for propagation of spherical explosion waves in self-gravitating gas sphere 17 p3004 A66-32839
- Effect of stratified atmospheric models on sonic boom generated by aircraft in steady level flight, using propagation of weak shock waves theory as base for analysis 17 p2847 A66-33024
- Shock wave, plane loading and unloading wave propagation in prismatic rod with variable cross section and curvilinear stress-strain relation 17 p3031 A66-33329
- Finite difference method for shock wave propagation into supersonic crossflow 17 p2916 A66-33479
- Spectral study of ultrasonic shock waves emitted by cavitation on square-section bends, applications include erosion fatigue problem and cavitation detection 18 p3101 A66-34644
- Lagrange equation for symmetric, nonhomotropic, spherical, cylindrical and one-dimensional unsteady flow of perfectly conducting gas behind normal shock wave of variable strength 18 p3102 A66-34728
- Shock wave propagation in gas-dust medium, examining motion and velocities of gas and dust at distance approaching infinity 20 p3647 A66-37034
- Shock propagation and attenuation in porous graphite and aluminum foams, noting effects of particle shape and size on materials response to shock loading 20 p3588 A66-38407
- Noncollision ergodic shock wave propagating in plasma situated in magnetic field and thermal oscillation effect on thermonuclear kinetics 21 p3787 A66-39052
- Restoration rate of equilibrium dissociation disturbed by shock reflection 21 p3726 A66-39093
- Temperature associated with longitudinal thermal velocities overshoots for Mach numbers slightly higher than 1 for monatomic gases in rarefied gas flows 21 p3727 A66-39184
- Synchronized shadow photochronographic investigation of wire explosion shock waves in air 21 p3772 A66-39302
- Radiation peak formation in nonhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 21 p3728 A66-39334
- Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall 21 p3836 A66-39412
- Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697
- Radiation peak formation in nonhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 22 p3897 A66-39704
- Shock wave propagation in plasma across magnetic field, solving problem via two-component hydrodynamic equation 22 p3953 A66-39765
- Light reflection from shock waves clarified through propagation in shock tubes, using gas laser 22 p3898 A66-40012
- Elastic-plastic and stress shock wave propagation in finite-length bar with monotone decreasing cross-sectional area 22 p3995 A66-40509
- Spark discharge generated blast wave application to shock on shock simulation, free-stream sound speed determination and hypervelocity flow measurements 22 p3894 A66-40645
- [AIAA PAPER 66-763] 22 p3894 A66-40645
- Propagation of weak shock waves with Mach number less than 1.25 around obstacles placed in indefinite medium, examining turbulent wake formation and wave diffraction 22 p3901 A66-40667
- [ICAS PAPER 66-21] 22 p3901 A66-40667
- Particle-in-cell /PIC/ method for approximate solution of propagation and reflection of plane shock waves in dusty gases 23 p4054 A66-41158
- Shock wave motion in tubes of diverging or converging cross sections 23 p4149 A66-41503
- Stress wave propagation, particularly dilatational waves in high polymers, rate-of-strain effects in metals and wave propagation in nonlinear time dependent solids 24 p4287 A66-42268
- Decrease in electron density of ionospheric F region following passage of powered rocket 24 p4201 A66-42609
- Propagation of weak shock wave in heterogeneous conducting medium in presence of magnetic field 24 p4238 A66-42874
- SHOE Low-thrust jet fitted shoe for zero-gravity movement 19 p3290 A66-35957
- SHORT CIRCUIT Current pulse measurement of thin polarized ferroelectric ceramic disks connected by short circuit under stress wave 10 p1576 A66-21546
- Short circuited crossguide coupling used to stop oscillation of reflex klystrons and convert them into stable millimeter wave amplifiers 14 p2248 A66-27058
- Charged particle effect in Van Allen zone on short circuit currents of photovoltaic cells on D-1A satellite 18 p3053 A66-33980
- Short-circuit effects by metal walls and influence on plasma boundary stability 21 p3791 A66-39177
- Pulsed compression network for linear FM signals using short circuited delay line and with sweep frequency corresponding to output response peak 23 p4034 A66-41020
- SHORT RANGE MISSILE Determination of electric power system requirements for short-range missile 20 p3499 A66-37192
- SHORT SC.1 AIRCRAFT British and French VTOL landing gear design, describing unique SConc fixed-wing VTOL aircraft 08 p1187 A66-18627
- SHORT WAVE RADIATION Five-year measurements of circumglobal radiation and of short wave radiation from lateral half-spaces 02 p0220 A66-11258
- Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 04 p0568 A66-14346
- Slab with periodically modulated refractive index, predicting short wave radiation pattern emitted 06 p0836 A66-16983
- Application of short-wave theory to regime of regular interaction between weak shock waves 07 p1026 A66-18195
- Group properties of short wave equations in gas dynamics 10 p1522 A66-21315
- Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 14 p2368 A66-28242
- Short wave fadeouts and solar soft X-ray enhancements during solar flare 20 p3635 A66-38216
- Time variation in solar X-ray ionizing radiation intensity in short wave fadeout SIDs 20 p3635 A66-38217
- Millisecond radio pulses from Jupiter 22 p3980 A66-40400
- SHORT WAVE RADIO TRANSMISSION First observations at short wavelengths with 140-ft radio telescope at Green Bank, West Virginia 06 p0955 A66-16789
- Short wave radio transmission and reception, examining masking by E region, focusing and attenuation due to scattering at ionospheric and other nonuniformities 08 p1186 A66-19780
- Short-wave frequency range spacecraft communications, discussing Earth signal reception, signal trajectories from orbits above and below F-2 layer, etc 09 p1348 A66-21013
- Skip distance and horizontal range of microwave propagation, assuming spherical Earth and ionosphere 13 p2026 A66-26235
- Satellite-emitted short radio wave field intensity and ionospheric

parameters 15 p2447 A66-28493
Short wave transmission station
conduction, noting shielding to prevent
interference from TV
transmission 20 p3543 A66-37723
Short wave radio transmission and
reception, examining masking by E region,
focusing and attenuation due to scattering
at ionospheric and other
nonuniformities 21 p3703 A66-38776

SHOT NOISE

Parameters of tunnel diode mixer with RF
amplifier measured, using tunnel diode as
calibrated shot noise
generator 02 p0196 A66-11423

Microplasma and avalanche diode noise
pulse rate determined by carrier generation
within space charge layer of breakdown
region 02 p0197 A66-11431

Cathode ray tube measurements indicate
that noise in cathodoluminescence is mainly
caused by shot noise of primary
beam 02 p0206 A66-12161

P-n junctions and vacuum diodes used to
demonstrate that thermal and shot noise are
produced by nonuniform velocity
distributions in charge-carrier
plasmas 06 p0858 A66-16989

Space-charge reduction of shot noise for
space-charge-limited current in solid
dielectric diode 07 p1097 A66-17737

Higher order correlation function evaluated
for shot noise statistics 09 p1342 A66-19925

Noise suppression in solid state space
charge limited diodes calculated, using open
and short circuited output
model 09 p1359 A66-20973

Thermal noise, shot noise and 1/f noise in
field effect transistors 11 p1672 A66-23466

Transistor noise figure derived from
thermal and shot noise for HF
application 14 p2262 A66-28384

Pump modulation factor of various GaAs
and Si varactor diodes under operating
conditions, noting experimental bandwidth
gain via increased shot
noise 16 p2663 A66-31017

Schottky theory for metal semiconductors,
noting correlation between work function
and barrier height, electron affinity,
etc 17 p2980 A66-32650

Signal to noise ratio in frequency
multipliers with varactor diodes, noting
relaxation oscillation type instability and
techniques for minimizing noise effect on
signal 17 p2894 A66-32988

Noise measurement in field emission
vacuum diodes, interpreting excess and shot
noise spectrum in terms of work
function 22 p3878 A66-40696

SHOT PEENING

Shot peening for resistance to stress
corrosion cracking of high strength steel
and aluminum alloys and to improve fatigue
life of landing gears, wing spars, jet engine
components and other structural
parts 13 p2196 A66-25771

Notched fatigue strength improvement
shot-peening through mechanism of
compressive residual
stress 21 p3831 A66-39197

SHOWER

S COSMIC RAY SHOWER

SHRINKAGE

Shrinkage process in zirconium diboride
during sintering, noting variation with
length of isothermal
processing 14 p2310 A66-26789

SHROUDED PROPELLER

Ducted propeller aerodynamics in forward
flight with shroud load
determination 20 p3492 A66-37572

SHROUDED TURBINE

Heat transfer from shrouded rotating disk
to single radial inflow determined, using gas
turbine model test facility
[ASME PAPER 64-WA/HT-49]
04 p0595 A66-13389

SHUNT

Computation of values for resistances
shunting sections of tapped potentiometers
from data using two alternative digital
computer programs 02 p0200 A66-11884

Shunting of input current into collector
region of planar triode 17 p2879 A66-31865

Wide frequency bandwidth properties of
arrays of shunt slots in ridged
waveguide 24 p4187 A66-43194

SHUTTER**SA CAMERA SHUTTER**

Electromagnetic shutter for
electroretinography has opening and closing
times of 0.50 and 0.70 msec and range of
varying controlled
durations 13 p2083 A66-26552

Dynamics of field and generation
frequencies in giant pulse of ruby laser with
passive shutter, using solution of
cryptocyanine in ethanol, noting mirror
reflection coefficient 15 p2518 A66-29727

Control of spacecraft internal temperature,
using movable shutters reflecting diffusely
[AIAA PAPER 65-425] 18 p3260 A66-33826

SIC**S STRUCTURAL INFLUENCE**

COEFFICIENT /SIC/

SICKNESS**S DECOMPRESSION SICKNESS****S MOTION SICKNESS****S RADIATION SICKNESS****SID****S SUDDEN IONOSPHERIC**

DISTURBANCE /SID/

SIDEBAND**SA DOUBLE-SIDEBAND RADIO**

COMMUNICATION

SA SINGLE-SIDEBAND DEMODULATION**SA SINGLE-SIDEBAND MODULATION****SA SINGLE-SIDEBAND RECEIVER**

First-and second-order sidebands due to
strong CW signal intermodulation effect in
3.39 mu He-Ne laser 18 p3117 A66-33615

IBM 7094 programmed in FORTRAN IV
used to determine sidebands in FM with
complex periodic modulation
functions 20 p3522 A66-37212

Frequency-division multiplexing capable of
being effectively integrated with time-
division switching, examining transmission
path between sideband
filters 22 p3864 A66-40057

Negative resistance devices using multiple
number of tunnel diodes or varactors,
examining stability and sideband
frequency 22 p3875 A66-40064

SIDELobe REDUCTION

Recomputation of values of numerical
approximation of integral in gain limitations
of large antennas, considering sidelobe
level 06 p0844 A66-16044

Reduction of high residual time sidelobes
for phase-coded pulse compression radar
systems and technique for increasing ratio
of peak to residual
amplitudes 06 p0833 A66-16666

Optimum geometry of nonuniformly spaced
antenna arrays improves relation between
beamwidth and sidelobe
levels 08 p1192 A66-19098

Space-tapered array analysis, noting that
very few yield reasonably low sidelobe level
and none are optimum 11 p1662 A66-22542

Coherent memory filter for real time
spectral analysis of Doppler radar echoes is
single circuit coherent
integrator 13 p2039 A66-25782

Modification of horn antennas for low
sidelobes, emphasizing reduction of
backlobes of pyramidal horn
antenna 15 p2457 A66-28595

Transverse equalizer for reduction of time
sidelobes /residues/ in phase-coded pulse
compression systems 15 p2463 A66-29039

Wide angle side lobe reduction in radar
antennas, considering gain, high directivity,
target detection and signal
interference 22 p3878 A66-40545

Dispersive network with attenuation
equalizing network, weighting filter for
control of output side lobe level with
Gaussian shaped frequency response and
matching system 23 p4034 A66-41016

SIDESLIP

Discrete control signal effect on lateral
motion of aircraft landing in presence of
correction, considering slideslip
equation 23 p4089 A66-41355

SIEVE**S MOLECULAR SIEVE****SIGHT****S VISION****SIGHT LINE**

Spectral and vertical distribution of
atmospheric IR radiation flux divergence for
five model atmospheres, noting dependence
on sighting angle 12 p1874 A66-24868

Automatic instrumentation for celestial
sightline tracking of
spacecraft 18 p3132 A66-33873

Spectral and vertical distribution of
atmospheric IR radiation flux divergence for
five model atmospheres, noting dependence
on sighting angle 22 p3912 A66-40323

Line-of-sight velocities in gas in peculiar
extragalactic radio source NGC 4038-3
measured in orientations across
object 23 p4129 A66-41801

SIGNAL**S AUDITORY SIGNAL****S CHIRP SIGNAL****S ERROR SIGNAL****S FLARE****S MAGNETIC SIGNAL****S OPTICAL SIGNAL****S RADIO SIGNAL****S RADIO STAR SIGNAL****S RANDOM SIGNAL****S TIME SIGNAL****S VISUAL SIGNAL****SIGNAL ANALYSIS**

Large signal transient response simulation
of p-n junction diode using RC analog
network 02 p0200 A66-11884

Amplitude distribution of pulsed signal
envelope at output of narrow band
system 02 p0192 A66-12145

Evaluation of AC small signal impedance of
semiconductor surfaces in connection with
physics of MOS
structures 03 p0408 A66-12445

Spurious signals in wideband S-to X-band
varactor tripler suggesting they were caused
by pumped-up LF resonances in input
circuit 03 p0339 A66-12451

Textbook employing signal analysis theory
in treating linear systems and
communication theory including Fourier
series, Fourier and Laplace transforms,
convolution integral, etc 03 p0336 A66-13073

Synthesis of all-pass networks noting uses
in signal expansion in time domain, signal
phase-splitting, signal delay without FM,
etc 03 p0345 A66-13273

Goddard Range and Range Rate System
concept, design and performance for near-
Earth and cislunar spacecraft
tracking 04 p0479 A66-13618

Systems malfunction emphasizing
parameter choice for automatic
detection 04 p0503 A66-13705

Frequency manipulated signal spectrum for
case of modulating function with arbitrary
off-duty factor 04 p0482 A66-13912

Changing spectrum of input and output
signals related to sensitive element in
parametric circuit of adaptive
system 04 p0504 A66-13974

Papers on modern radar including basic
signal analysis, evaluation and system design
techniques 04 p0484 A66-14106

Complex signal analysis concepts indicating
versatility in system design methodology
and illustrating tradeoffs in performance
due to parameter
alteration 04 p0485 A66-14112

Signal design criteria, examining range
resolution and velocity resolution of
radars 04 p0486 A66-14116

Pseudorandom binary coded waveforms as
modulating functions for radar signals,
noting autocorrelation
function 04 p0486 A66-14119

Sampled-data control system introduction,
discussing representation of real continuous
time functions by impulse trains via
transform methods 04 p0506 A66-14184

Spectrum of phase-manipulated signal at
output of ideal amplitude
limiter 04 p0501 A66-14405

Statistical properties of output of double-
sideband receiver when nonlinear
mechanisms at input admit unwanted
double-sideband signals with Gaussian
modulation 05 p0630 A66-14593

Analysis and harmonic synthesis of
periodic signals of any form by successive
steps 05 p0657 A66-14728

Electromyography signals to control
external power based upon pattern
recognition
[ASME PAPER 65-WA/HUF-3]

Output moments of linear system
determined in terms of corresponding

moments of input and input-output relationship of average correlations and spectra, defining nonstationary processes 06 p0902 A66-16188

Sampling representations of band limited deterministic signals obtained, using nonharmonic Fourier series 06 p0861 A66-16194

Jittered sampling obtaining error bounds for sample independent and correlated jitter and bandpass sampling 06 p0865 A66-16742

Signal design for space communications and tracking, comparing performance of harmonic and pseudorandom systems 06 p0834 A66-16860

Optimal pulse shape determined for signal which gives maximum response energy in ideal limited filter system 07 p1001 A66-17354

Deriving Erlang lost-signal formula for congestion problem 08 p1184 A66-19236

Numerical method used to compute power density representation for classification of complex nonperiodic signals 08 p1185 A66-19562

Separation of harmonic components of function E/t/ by double differentiation with subsequent integration 08 p1185 A66-19602

Probability of signal acquisition by phase-locked oscillator system operating in frequency search mode, determining maximum admissible search rate without noise 09 p1345 A66-20443

Graphical analysis of recurring and periodic waveforms to determine fundamental frequency and major harmonic components 10 p1549 A66-21232

Cross correlation and autocorrelation functions of nonstationary signals based on optimal approximation of ensemble correlation function for one pair of signals 10 p1517 A66-21694

Wideband DC amplifier operating with double full-wave signal transformation 11 p1664 A66-22621

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 11 p1667 A66-22790

Statistical analysis of circuit noise effect on oscillators according to perturbation theory, discussing power spectrum, power and signal phase spectral densities, frequency stability, etc 12 p1834 A66-24127

Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counter radiation phase and amplitude to system parameters 12 p1921 A66-24210

Optimal filter in solution of linear mean square estimation problem when process statistics are undefined 12 p1848 A66-24249

Single shot transient analyzer/waveform synthesizer/generating sinusoids with real and imaginary parts 12 p1838 A66-24598

Antenna array response to pulse compression signals, showing dependence of array response on compressed pulse shape 13 p2023 A66-25665

Nonlinear signal comparators in feedback structures used for input-output invariance of single piecewise constant parameter 13 p2054 A66-26090

Parameter indeterminacy in system identification for mathematical model with adjustable parameters matched to system output by feedback 13 p2054 A66-26091

Gain optimization problem for antenna arrays responding to quasi-monochromatic periodic signal 14 p2240 A66-27929

Amplitude distribution of pulsed signal envelope at output of narrow band system 14 p2241 A66-28101

Minimizing maximum signal energy, when signals are represented as points in N-dimensional space, by choosing origin as center of smallest hypersphere enclosing all points 14 p2243 A66-28351

Systems malfunction emphasizing parameter choice for automatic detection 15 p2469 A66-28547

Signal analysis with aid of Laguerre polynomials 16 p2655 A66-31688

Synthesis of phase synchronization system providing maximum-level filtering of external fluctuation noise, using generalized integral criterion 17 p2898 A66-31853

Joint maximum likelihood estimator for signal amplitude and noise power density in

coherent PCM channel with white Gaussian noise 18 p3070 A66-34256

Separation of harmonic components of function E/t/ by double differentiation with subsequent integration 18 p3128 A66-34960

Automatic system with stored experience, examining probability density of useful signal 19 p3325 A66-35941

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 20 p3525 A66-37130

Statistical energy-and power-spectral correlation analysis of signals with nonintegrable spectra 20 p3512 A66-37149

Frequency manipulated signal spectrum for case of modulating function with arbitrary off-duty factor 20 p3518 A66-37870

Computer programming of pulse compression by active and passive generation, noting differences between sidelobe structures of generation 22 p3883 A66-39714

Sampling theorem for Fourier transform reconstruction of band-limited signals, applications to stationary stochastic processes and analysis of round-off, truncation and random errors 22 p3884 A66-40168

Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counter radiation phase and amplitude to system parameters 22 p3878 A66-40574

State-variable techniques application to communication and radar problems - WESCON, Los Angeles, August 1966 22 p3868 A66-40715

Signal and receiver-parameter optimization for additive noise channels with feedback link 22 p3868 A66-40719

Binary communications integral equations in complex variable functions and application of Fourier transform for bandlimited signals 23 p4085 A66-41537

Distortion, fill and noise effects on pattern discrimination 23 p4030 A66-41577

Signal and filter waveshape deviations for binary correlator receivers, noting degradation in performance of matched filter systems 23 p4040 A66-41592

Laser system for meteorological data using oscilloscope to display return signal, translated as concentrations of matter or aerosols 24 p4226 A66-43044

SIGNAL ANALYZER

Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 01 p0046 A66-11040

Measurement of one-and two-dimensional distribution functions of stochastic signals, examining single channel analyzers 02 p0230 A66-11811

Spectrum analyzer in constructing two-dimensional self-adjusting system demonstrated by frequency characteristics of connected channels and integral evaluation 04 p0502 A66-13702

Determination of spectral curves, using electrical frequency analyzers 04 p0520 A66-13761

Power spectral density analysis, reviewing signal wave, time, rate and system parameters [ISA PREPRINT 1.5-3-65] 05 p0683 A66-15508

Precision synchronous spectrum analyzer using phase-sensitive rectifier 06 p0849 A66-16375

Signal separation and phase measurement device using phase probability distribution function of signal-noise mixture 07 p1005 A66-17352

Feedback transfer function analyzer for error reduction in performance measurement for servocontrol systems 07 p1016 A66-17851

Phase-locked marker for rapid identification and accurate measurement of arbitrary frequency in spectrum under analysis 09 p1382 A66-20673

Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 11 p1671 A66-23286

Low-power multichannel pulse height analyzer for solar neutron detection aboard balloon or rocket 12 p1878 A66-23693

Vibrational analysis, discussing spectrum analyzers, correlation and autocorrelation

analysis and hybrid and digital computer applications 12 p1970 A66-24722

Precision synchronous spectrum analyzer using phase-sensitive rectifier 13 p2042 A66-25963

Ground-based test setup using p-n-p-n controlled switches, logic circuitry and sensitive relays to analyze telemetered pulse signals from four lines of airborne electronic system 14 p2255 A66-27807

Spectrum analyzer in constructing two-dimensional self-adjusting system demonstrated by frequency characteristics of connected channels and integral evaluation 15 p2469 A66-28543

First-and second-order sidebands due to strong CW signal intermodulation effect in 3.39 mu He-Ne laser 18 p3117 A66-33615

Analyzer of characteristic function of random phase of quasi-harmonic signal using statistics 20 p3529 A66-37520

Infrasonic frequency spectrum transformation using magnetic signal recording and reproduction device 21 p3713 A66-39322

SIGNAL DETECTION

Time sharing and vigilance study by Wiener reanalyzed from signal detection theory viewpoint 01 p0020 A66-10613

Decision interval effect on signal detectability in vigilance task involving clock 01 p0020 A66-10614

Radio search for intelligent extraterrestrial life, estimating civilization distribution, frequency of best sensitivity and aggregate signal detection 02 p0191 A66-11610

Random-phase pulsed signal detection by contrast reception techniques against background of normal correlated noise 02 p0191 A66-11757

Textbook on communication engineering emphasizing random processes, information and detection theory, statistical communication theory, applications, etc 03 p0335 A66-12992

Approximate determination of correct detection probability in optimum signal reception of unknown phase 04 p0482 A66-13913

Detection of random signal with normal distribution by formulas which can be generalized for case of nonzero regular component 04 p0483 A66-14057

Statistical decision theory, applying Neyman-Pearson test, used to detect and discriminate signal 04 p0485 A66-14113

Increasing detectability of signal in noise or in other interference, noting effect and functions of radar filter, antenna scanning, pulse to pulse IF and video spectrum 04 p0486 A66-14124

Optimum receiver structure for detecting regular and fluctuating signals with noise sources correlated and located on surface of finite sphere 05 p0635 A66-15877

Dual-mode acquisition and tracking system using random noise as carrier signal 06 p0842 A66-15977

Detectability of coherent and incoherent signals, discovering effect of quantum nature of radiation on signal detection at optical frequency 06 p0828 A66-16110

Mixed integration techniques used for signal detection having coherence time less than duration when propagating through time-varying medium 06 p0828 A66-16112

Maximum likelihood detection of band limited binary signals perturbed by Gaussian noise and intersymbol interference 06 p0829 A66-16193

Flight test evaluation of improvement in signal-detection performance of ground surveillance radar 06 p0836 A66-16980

Optimum filters for signal detection in clutter 08 p1190 A66-18716

Optimization of transmitted signal and receiving filter for data transmission system with fixed channel and detection process 08 p1183 A66-18932

Radar receiving equipment sensitivity measurement by analog method and by time selection scheme 08 p1195 A66-19350

Optimum filtering of signal of given shape from background of nonstationary random noise 08 p1201 A66-19674

Phase principle for detecting weak narrow band Gaussian signal in presence of receiver noise 08 p1187 A66-19840

Detectability of signal in noise of range gated MTI radars, with or without pulse lengthening in conjunction with Doppler filtering 09 p1342 A66-19951

Signal detection characteristics of local arrays of transducers to detect presence of plane-wave random signal in isotropic noise background 09 p1348 A66-20951

Recursive estimation of radar or radio astronomy target parameters, considering functional dependence of covariance function of received signals 10 p1505 A66-21841

Inertial and noninertial detection of sum of signal and fluctuation noise by amplitude, frequency and phase detectors 11 p1656 A66-22789

Radio receiver design for precisely given signal and nonsteady Gaussian noise 11 p1658 A66-23221

Signal detectability in elicited observing rate and decision processes in vigilance 11 p1646 A66-23373

Performance sharing when two audio visual vigilance tasks are performed concurrently 11 p1646 A66-23374

Detection of information transmitted by extraterrestrial civilizations 12 p1814 A66-23889

Search for intelligent signals from space 12 p1880 A66-23894

Dynamic range bounds of error detection circuits of tracking radars, minimizing probability of excluding Rayleigh distributed signal 12 p1817 A66-24302

Signal to noise ratio in amplitude-, angle-, and pulse-modulated systems with carrier power exceeding receiver power 12 p1820 A66-24727

Likelihood detection with multiple Markov process, by expressing statistics in distribution function terms 13 p2019 A66-25060

Single sideband signal demodulation via envelope detection yields distortionless reception for minimal carrier component and special processing circuitry 13 p2020 A66-25148

Statistical description of signal filtration 13 p2045 A66-25295

Hot-carrier diode characteristics and application to HF and microwave devices such as mixers and detectors 13 p2031 A66-25359

Nonlinear time-invariant filter for detecting signal pulse imbedded in nonstationary noise 13 p2023 A66-25658

Statistical properties of input signals and effect on structure of optimal binary system of signal reception 14 p2236 A66-27173

Human subjects making comparisons of duration of two tones in forced choice situation for signal with same or different intensities 14 p2229 A66-27309

Detection of weaker signal against background of another signal, noting optimal detecting devices for incoherent fluctuating signals 14 p2239 A66-27737

Automatic speech analyzer capable of detecting frequencies of three primary voice formants 14 p2296 A66-27884

Detectability criterion for signal received against random noise background 14 p2242 A66-28151

Performance testing, evaluation and system specification of broadband predetection recording instruments 14 p2298 A66-28430

Individual differences in performance of vigilance task 14 p2228 A66-28480

Piezoelectric plate transducer for ultrasonic wave generation and detection and analysis of responses to partly periodic and partly periodic-transient inputs 15 p2497 A66-28526

Optimum mean square linear interpolation for random sampling, discussing periodic and Poisson sampling 15 p2474 A66-29731

Frequency spectrum of FM signal for carrier modulation by any number of subcarriers 16 p2649 A66-30547

Mean of stationary random process estimated from average of equally weighted samples taken periodically in closed interval 16 p2732 A66-30595

Receiver of ionospheric diffusion probe noting radio telescope, low noise parametric amplifier, filters, signal detection, etc 16 p2662 A66-30957

Integral expression for log likelihood ratio of two Gaussian processes in signal detection 16 p2738 A66-31714

Detection of random signal with normal distribution by formulas which can be generalized for case of nonzero regular component 17 p2873 A66-32223

Zero crossing principle for detecting weak narrow band signals immersed in Gaussian noise, discussing application to incoherent detection of stationary radar target 18 p3067 A66-33836

Detection and measurement of parameters of signals in white noise 18 p3091 A66-34985

Information feedback and psychophysical variables in two-alternative temporal forced-choice auditory-signal-detection task 18 p3063 A66-35023

Two-step procedure for high energy signal detection against noise background, based on statistical probability 19 p3296 A66-35296

Singular detection of known signals in additive Gaussian noise for application to mathematical models 19 p3296 A66-35334

Dependent sampling effect on performance of nonparametric coincidence or median detector, considering constant signal detection in stationary additive noise 19 p3324 A66-35513

Combined use of time-domain waveforms, detection probability and false alarm probability for selection of optimum sample period and quantization interval for detection of impulse waveforms 19 p3299 A66-35663

Signal detection techniques for discrete-frequency, phase-coherent pulse frequency modulation telemetry system, using analog and digital circuits 19 p3302 A66-35698

Inertial and noninertial detection of sum of signal and fluctuation noise by amplitude, frequency and phase detectors 20 p3511 A66-37129

Optimum filtering of signal of given shape from background of nonstationary random noise 20 p3538 A66-37266

Amplitude and phase detection for determined signal with nonstationary noise, using generalization of Levin method 20 p3516 A66-37385

Optimal detection of signals by spatially distributed receiving system against random noise background, using space-time signal selection method 20 p3517 A66-37744

Approximate determination of correct detection probability in optimum signal reception of unknown phase 20 p3518 A66-37871

Radar detection probability in presence of unknown parameters, covering pulse-to-pulse, partial and fully coherent cases 21 p3707 A66-39639

Systematic method of obtaining complex formulations of problems involving white noise, considering deterministic narrow-band signal detection of random phase 21 p3721 A66-39642

Approximately minimax detection of vector signal on Gaussian background 22 p3939 A66-40188

Vigilance training for signal detection 22 p3858 A66-40858

Time varying adaptive filter structure for providing minimum mean square estimate of signal in nonstationary channels for communications satellites 23 p4039 A66-41590

Optimum detection of Markov signals against noise background in case of discrete time 24 p4188 A66-42474

Exact sample size probability distributions for biased square law sequential detector with signal absent 24 p4173 A66-42637

Square-law detection system for multiple FM signals with noise 24 p4175 A66-42962

Error free recovery of signals from irregularly spaced samples in terms of completeness of sets of nonharmonic exponentials 24 p4189 A66-43202

SIGNAL DETECTOR

Automatic evaluation of echo signals from circular-scan radar using learning system 04 p0543 A66-13497

Noncontact elements of transfluxor-based alpha detecting system 04 p0490 A66-13777

Variable characteristics of receiver for noise signals with semiconductor regenerative parametric amplifier /SRPA/ determined for fixed SRPA instability

levels 04 p0496 A66-13916

Energy spectrum of output noise of frequency detector approximated by Nakagami m-distribution instead of generalized Rayleigh distribution 04 p0497 A66-13920

Pulsed radar signal analysis based on steady state response to carrier and actual pulse train, taking account of pulse shape 04 p0485 A66-14111

Signal to noise ratio characteristics measured for square-law detector, extracting signals from non-Gaussian noise 06 p0831 A66-16341

Reflex klystron as subcarrier detector for microwave signals modulated by RF carrier in 100 to 500 kc range 06 p0853 A66-16651

Adaptive parametric two-input detectors analyzed and compared to nonparametric detector /polarity coincidence correlator/ under assumption of quasi-stationary inputs 06 p0864 A66-16739

Noise-rejection characteristics of signal detector based on zero counting of random process 08 p1182 A66-18909

Tunnel diode I-V characteristics, RF detector suitability, input-output characteristics, sensitivity and noise 08 p1191 A66-18943

Power law detector design technique providing output voltage proportional to input power over 32-db range of inputs 09 p1351 A66-19938

Adaptive realization of optimum receiver for synchronous recurrent waveform 10 p1505 A66-21843

Reflex klystrons as microwave FM detector and theoretical circuit predictions 11 p1670 A66-23160

Miniaturized AM-diode signal detector in form of solid state circuit for frequencies in excess of 450 kc 12 p1830 A66-23735

Detection and false alarm probabilities for number of sinusoidal pulses in Gaussian noise subjected to amplitude limiting of arbitrary hardness 12 p1820 A66-24649

Hot carrier microwave detector based on thermoelectric effect of warm carriers in bulk semiconductor and assuming Maxwell-Boltzmann distribution for heated carriers 15 p2461 A66-29014

Tunnel diode detectors superior to point-contact diodes because of broader linear characteristic, greater sensitivity and less temperature dependence 16 p2660 A66-30614

Energy amplitude detection based on relation between laws describing variation in total energy of oscillation system and variation of modulating function 17 p2888 A66-32706

Bonded backward diode fabrication and performance as microwave mixer' and low-level detector 17 p2891 A66-32913

Resonant frequency change of oscillatory circuit due to nonlinear capacitance of semiconductor diode used as amplitude detector 17 p2898 A66-33523

Variable characteristics of receiver for noise signals with semiconductor regenerative parametric amplifier /SRPA/ determined for fixed SRPA instability levels 20 p3532 A66-37868

Energy spectrum of output noise of frequency detector approximated by Nakagami m-distribution instead of generalized Rayleigh distribution 20 p3532 A66-37878

Point detector array design for optimal detection of known spatially invariant signal fields corrupted by additive, zero-mean, covariance-separable and spatially isotropic noise field 21 p3711 A66-39136

Coded and phase-modulated signals detected by receiver containing phase detector and decoder operating algebraically on quantized phase values, using polynomial representation 21 p3704 A66-39139

Miniaturized AM-diode signal detector in form of solid state circuit for frequencies in excess of 450 kc 22 p3875 A66-40078

Neyman-Pearson detector performance in detecting constant signal in additive Gaussian noise 24 p4173 A66-42623

SIGNAL DISCRIMINATOR

Sampling techniques for extraction of periodic signals from background of random noise 03 p0333 A66-12470

Algorithm for designing miniaturized

discriminators 04 p0490 A66-13969
 Performance of delay-lock discriminator, nonlinear feedback device for continuous tracking of delay difference between two correlated waveforms 06 p0842 A66-15976
 Noise rejection properties of time discrimination method of pulsed signals improved by using exponential rather than selecting function 08 p1182 A66-18916
 Separation of random number of signals with unknown parameters observed during limited interval of time against background of noise 08 p1185 A66-19673
 Near IR detection system using phototube with type S1 phosphor photocathode, noting tunnel diode discriminator S/N ratio 08 p1227 A66-19696
 Spectral method of determining bandwidth requirement for FM signals based on amount of tolerable distortion at discriminator output 10 p1504 A66-21653
 Radar and communication systems unsolved problems, including theoretical foundations and receiver and transmitter design 11 p1653 A66-22631
 Distinguishability of distributions of radio signal envelope, using statistical distance 11 p1655 A66-22716
 Phase discriminator circuit using thyristors 11 p1668 A66-23000
 Optimum multichannel system utilization for receiving regular signal against background noise 13 p2026 A66-26477
 Selectivity of synchronous detector with preliminary filter taking into account odd harmonics 14 p2252 A66-27244
 Multichannel differential amplitude discriminator using diodes and transistors 15 p2503 A66-29694
 FM error calculation via comparison of demodulated output with input 16 p2649 A66-30544
 Synthesis of control systems with minimum complexity, noting application to filter discrimination of nonstationary signals 17 p2901 A66-32568
 Noise rejection ability of phase discrimination technique 17 p2888 A66-32708
 Separation of random number of signals with unknown parameters observed during limited interval of time against background of noise 20 p3515 A66-37265
 Digital-computer controlled receiver functions and application 23 p4044 A66-41313
 Error probability in PCM/FM with phase-lock loop discriminators, noting role of input SNR 23 p4037 A66-41320
 Distinguishability of distributions of radio signal envelope, using statistical distance 23 p4037 A66-41454
 Controllable threshold circuit using interconnection simple toroids for all-magnetic logic to select signal paths 24 p4189 A66-43178

SIGNAL DISTORTION
 Pisa University research program since 1958 on AM waves which have undergone linear distortions in ionospheric propagation 01 p0022 A66-10332
 Distortion measurement by total harmonic distortion analysis and intermodulation distortion analysis 01 p0037 A66-10499
 Doppler shift and distortion of key-modulated signals in radio links with moving transmitter and receiver 02 p0191 A66-11751
 Harmonic distortion measurements on amplifier stages using vacuum tubes and transistors with antidistortion circuit 03 p0340 A66-12472
 High power microwave filters discussing dominant mode and harmonic filters, design, parameters, application and limitation 04 p0493 A66-13677
 Signal fluctuation effect on operation of electronic device, approximating empirical correlation function 04 p0504 A66-13778
 Measurement of small coefficients of nonlinear distortions from ratio between effective voltages of first harmonic and total signal 04 p0497 A66-13916
 Integrated circuit current switching logic element fabrication, using transistors and standard isolation 05 p0643 A66-14570
 Modulation degradation of SHF telemetry signals by vehicle reentry plasma conditions 05 p0630 A66-14591
 Replacement of linear correcting network

by pulse generator producing pulses of suitable form 06 p0832 A66-16509
 Signal power sharing, signal suppression, cross-product magnitude and output distortion in satellite communication system due to hard limiting 06 p0835 A66-16862
 Linear two-port network model of intrinsic transistor accounts for nonlinear effects at emitter-base function 06 p0866 A66-16961
 First-order approximation for second-harmonic distortion in sinusoidal voltage generator connected through resistor to base-emitter circuit of transistor 06 p0858 A66-16984
 Distortions of linear system reactions with change in amplitude-frequency and phase-frequency characteristics 08 p1183 A66-19102
 Analog message transmission by optimum angle modulation system and rate distortion function deriving mean square error 09 p1360 A66-19923
 Linear system induced amplitude-frequency and phase-frequency distortions 09 p1361 A66-20296
 Nonstationary processes and destabilizing factors effect on nonlinear distortion in frequency detector with detuned circuits 10 p1510 A66-21672
 Polarity and harmonics of nonlinear distortion sources in common emitter transistor amplifiers operated in normal domain 11 p1661 A66-22391
 Time resolution error of measured correlation function, based on frequency response of hot-film and hot-wire anemometer 12 p1880 A66-23847
 Replacement of linear correcting network by pulse generator producing pulses of suitable form 13 p2024 A66-25949
 Signal distortion correlation in nonlinear element 14 p2265 A66-27479
 Diode bridge variable attenuator used to overcome error signals and harmonic distortion in wide range 14 p2267 A66-27805
 Relation between transistors and distortion in line amplifiers used for repeaters or multicouplers, noting generation of harmonics and intermodulation products, distortion sources in transistors, etc 14 p2262 A66-28381
 Tropospheric induced distortion in frequency band amplitude and delay time of radio signal transmitting over wide frequency bands 15 p2452 A66-29765
 Effect of harmonic distortion on Bessel-zero technique for FM deviation measurement used in calibration of carrier deviation and FM signal generator instruments 15 p2467 A66-29857
 Transfer functions and signal reproducing properties of relay servomechanisms for case of slowly varying input signal 15 p2476 A66-29993
 Signal transmission through double FM regaining LF signal by two-stage frequency demodulation at receiving end 17 p2876 A66-33451
 Envelope distortion effects overcome in receivers by using transistor signal handling curves 18 p3074 A66-33555
 Ideal integrator compared with low pass filters 18 p3076 A66-33835
 Approximation techniques for determination of optimum uniform or nonuniform quantizer 18 p3068 A66-33904
 Linear system induced amplitude-frequency and phase-frequency distortions 18 p3091 A66-34959
 Interference in passband of FM or PM channel due to adjacent FM or PM channel in telemetry system 19 p3300 A66-35687
 Frequency modulation in quartz oscillators, deriving nonlinear distortion and frequency deviation factors and analyzing effect of destabilizing factors 20 p3516 A66-37383
 Measurement of small coefficients of nonlinear distortions from ratio between effective voltages of first harmonic and total signal 20 p3532 A66-37874
 Integral criterion based on absolute value of error, integral-square-ideal error, used as measure of distortion of communication system 20 p3539 A66-38285
 Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave 22 p3861 A66-39647

Distortion of FM signals after being processed through time-invariant channels with nonlinear phase characteristic and fluctuating amplitude 22 p3864 A66-40061
 Phase distortions in transmission systems and mirror properties of signals 22 p3865 A66-40073
 Adjustable time domain equalizer for reduction of distortion caused by paired echoes in pulse compression radar system 23 p4034 A66-41021
 Auroral disturbances resulting in multipath distortion in propagation by ionospheric reflection and description of chirp ionosonde and antenna systems 23 p4036 A66-41143
 Signal transmission disturbances caused by presence of rocket exhaust plasmas in propagation medium between ground station and rocket powered vehicle 24 p4172 A66-42617

SIGNAL ENCODING

Mathematical structure and characteristics of codes used in transmission over nonsymmetric channels 02 p0209 A66-12020
 Error control over wide frequency range through adaptive dynamic channel equalization system 06 p0825 A66-15987
 Codes with variable parameter based on use of properties of magic squares 06 p0837 A66-16510
 Optimum rate allocation for encoding sets of analog messages when allocation total is fixed by channel capacity 06 p0833 A66-16667
 Potential noise stability of nonorthogonal signals constructed on M-sequence type codes 08 p1183 A66-19103
 Complex signal coding with on-off pulses of varying width and repetition period, using equal-slope approximation of signal waveforms 08 p1186 A66-19739
 Asynchronous delta-modulation system with coded pulse generation according to certain change in amplitude 13 p2030 A66-25208
 Codes with variable parameter based on use of properties of magic squares 13 p2028 A66-25950
 Abridged Hamming and Fire code efficiency with respect to randomly distributed disturbances 14 p2245 A66-26794
 Mathematical structure and characteristics of codes used in transmission over nonsymmetric channels 14 p2266 A66-27571
 Optimal scientific satellite PFM encoding system circuit design and digital data processing 14 p2244 A66-28429
 Bit-plane encoding technique used for reducing redundancy in data gathered in space probes 18 p3073 A66-34249
 N-orthogonal phase-modulated codes generalized from first-order Reed-Muller codes and biorthogonal signals 21 p3721 A66-39641
 Radar partial coherence theory for clutter construction relationship to radar cross section, waveform coding, output signal, mutual coherence function and random noise 23 p4037 A66-41312

SIGNAL FADING

SA DIFFRACTION PATTERN

Sampling of independent orthogonally polarized antenna output to increase signal levels at least 10 decibels over one-antenna systems 04 p0481 A66-13729
 Simultaneous long distance tropospheric propagation measurements at 560 and 774 mc/s over North Sea 04 p0483 A66-14045
 Relationships between VLF phase fluctuations, radio signal fading and natural geomagnetic background observed in British Columbia 04 p0487 A66-14367
 Phase steps and amplitude fading of VLF signals at dawn and dusk, supposing two waveguide modes exist in dark part of path and one in daylight 05 p0632 A66-14838
 Atmospheric noise effect on performance of noncoherent frequency shift keying /NCSK/ under fading conditions compared with that obtained when noise is Gaussian 06 p0830 A66-16335
 Simultaneous measurement of multipath and Doppler spread in real time involving fading transmission media such as HF and troposcatter [IEEE PAPER CP 65-524] 06 p0830 A66-16336
 Error probability limitations caused by multipath and Doppler smear in Kathryn

modem 06 p0831 A66-16339
 Ionospheric E region inhomogeneity investigated by photographic recordings of reflected signal fading 08 p1214 A66-19049
 VHF fading statistics of wave propagation over horizon for scatter radiation with or without reflection components 11 p1657 A66-23106
 Vertical incidence fading amplitude experiment using array of receiving antennas, obtaining data on ground diffraction pattern of reflected radio waves, noting correlation function 12 p1824 A66-24840
 Signal amplitude of Transit IVA satellite recorded at two stations, using time difference between observing similar fluctuations in fading period to determine height of ionospheric irregularities 12 p1874 A66-24843
 Spatial selective fading as random process, discussing spatial coherence, wave number dispersion profile, time delay profile, etc, in ionospheric propagation 14 p2234 A66-26859
 Anomalous phase variations of GBR transmissions as received in New Zealand correlated with solar season and probably due to long path interference 14 p2237 A66-27401
 Fading channel simulator for performance testing of spacecraft communication and ranging equipment 14 p2271 A66-28406
 Total ionospheric electron content measurements at Delhi using Faraday fading of satellite beacon transmissions during solar minimum 15 p2495 A66-30067
 Effect of meteor activity on fading of radiowave reflected from E region 16 p2692 A66-30333
 Ground-reflected wave effects and regular fading superposed on Faraday fading observed in signal strength recordings from Transit IVA and Explorer XXII 16 p2692 A66-30333
 Short wave fadeouts and solar soft X-ray enhancements during solar flare 20 p3635 A66-38216
 Time variation in solar X-ray ionizing radiation intensity in short wave fadeout SIDs 20 p3635 A66-38217
 Fading multipath channel behavior simulator for communication system performance study 20 p3534 A66-38359
 Seasonal and diurnal fluctuation of radio wave in ionosphere in connection with fading process of reflected signal 24 p4204 A66-43155

SIGNAL FLOW GRAPH

Maximizing flow from source to sink in lossy communication net in which flow through edge is attenuated 02 p0208 A66-11905
 Sampled-data control systems analyzed by signal flow graphs 04 p0504 A66-13779
 Signal flow graph for general nonlinear time-varying network 05 p0655 A66-14621
 Design of multivariable control system using signal flow graph techniques and establishing optimality criteria 13 p2045 A66-25337
 Hybrid circuits at hyperfrequencies, considering distribution matrix and oriented graph 18 p3090 A66-34397

SIGNAL GENERATOR

Redesigning UHF triodes compatible with solid state devices 01 p0044 A66-10930
 Stable local oscillator signals from varactor diode sideband generator, calculating output voltage 01 p0044 A66-10931
 Semiconductor devices for communications satellite signal output 04 p0495 A66-13804
 Synthetic generation of phase coherent microwave signals for transient behavior of wideband networks and dispersive media 06 p0847 A66-16102
 Light activated negative resistance effect, discussing VHF signal generation via semiconductor photocurrent modulation 06 p0892 A66-16680
 LF random signal generator with output stationary voltage having Gaussian amplitude probability density function, zero mean value and constant power spectral density 09 p1356 A66-20666
 Quartz crystal oscillators and effect on precise time measurements by atomic clocks 12 p1881 A66-24129
 Noise performance of Gunn microwave

generator and noise-power measurements made on Gunn oscillator in X and J band 13 p2030 A66-25221
 Transfer function for quadrature modulation single band signal generating all-pass filter, using differential operational amplifier 14 p2253 A66-27586
 Fractional nanosecond microwave pulse generation and measurement techniques, discussing pulse trains 18 p3075 A66-33617
 Radiation pattern of ground surveillance radar antenna measured with aid of airborne signal generator 18 p3070 A66-34266
 Threshold technical possibilities of measuring phase/frequency/ fluctuations of generators by Vhf discriminators 20 p3513 A66-37150
 Spectral analysis of human EEG generators in posterior cerebral regions 20 p3506 A66-37604
 Alphanumeric generator for display of digital computer data on TV raster and storage in memory 22 p3927 A66-40290
 Signal generating image tubes for photo-optical tracking and surveillance sensors 23 p4070 A66-41669

SIGNAL MEASUREMENT

SA ELECTRONIC SIGNAL MEASUREMENT

Plasma decay by measuring phase variation and signal amplitude with interferometer, determining distribution function and recombination coefficient 01 p0115 A66-11056
 Photoelectric measurement of probability distribution of subsonic signals in form of electrical voltage 02 p0230 A66-11814
 Transmission-line model of insulated-gate field effect transistor /MOS transistor/ in pre-pinchoff mode, determining small signal response 02 p0205 A66-11980
 Ratio of two time-varying input signals obtained by transistorized analog amplifier based on principle of elapsed time computation 03 p0340 A66-12496
 Pulse shape radiated by miniature micropower telemetry transmitter 04 p0477 A66-13583
 Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 04 p0520 A66-13888
 Methods for measuring and characterizing transistor and diode large signal parameters for use in automatic circuit analysis programs, noting radiation damage 05 p0648 A66-14848
 Transistorized amplitude discriminator design, operation and test results 05 p0678 A66-15119
 Diurnal variations of strength and polarization of VHF signals from synchronous Early Bird satellite 08 p1185 A66-19537
 Formal variance of measurement error in frequency and phase of harmonic signal in narrow-band noise background 08 p1201 A66-19688
 Vela satellite system electronic detection instrumentation and block diagrams 09 p1379 A66-19910
 Radio interference control component RF characteristics and insertion loss measuring techniques 11 p1665 A66-22681
 Operation of nonlinear servosystem with autocorrelator as measuring element in presence of noise 11 p1677 A66-22759
 Differences in MHD emission occurrence times, considering ionospheric penetration propagation toward equator and error sources 11 p1701 A66-23150
 Relative impedance and transmission techniques for measuring small-signal parameters of varactor diodes at UHF and X-band 12 p1831 A66-23787
 Time resolution error of measured correlation function, based on frequency response of hot-film and hot-wire anemometer 12 p1880 A66-23847
 Measurement accuracy of antenna test range evaluated for gain, ellipticity, polarization angle, boresight axis and ground reflected energy 12 p1836 A66-24155
 Electronic trispheration, three-dimensional analog of triangulation, for long distance geodetic surveys 12 p1875 A66-24936
 Optimum nonlinear inertialess conversion of signals from several devices, taking into account unreliability in operation 13 p2045 A66-25296

Transducer-type instruments for precise mechanical measurements by conversion of physical into electrical signals 14 p2295 A66-27561
 Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 15 p2503 A66-29701
 Riemannian signal mapping theory used to clarify stochastic structure of modulator and demodulation in information system 15 p2453 A66-29888
 Digital measurement of differential Doppler effect using transposition of phase relation of two HF signals into audiofrequency band 15 p2453 A66-30071
 Functional time-delay device and integration into analog correlator for analysis of autocorrelation and cross correlation functions of measured system response signals 16 p2676 A66-30441
 Receiver noise factor, discussing CW and dispersed signal source measurement techniques 16 p2649 A66-30549
 Fractional nanosecond microwave pulse generation and measurement techniques, discussing pulse trains 18 p3075 A66-33617
 Interference levels conducted and radiated from signal wires carrying pulses or step functions 18 p3069 A66-34169
 Formal variance of measurement error in frequency and phase of harmonic signal in narrow-band noise background 18 p3091 A66-34674
 Detection and measurement of parameters of signals in white noise 18 p3091 A66-34985
 Optimum radar measurement of multiple, target coordinates with unknown signal amplitudes and phases 19 p3296 A66-35303
 VLF signal phase and amplitude from FR-1 satellite measured by phase-locked filter 22 p3866 A66-40165

SIGNAL MIXING

Reception mixer treated as active admittance characterized by admittance-modulation factors 05 p0648 A66-15030
 Balanced mixer array with two nonlinear elements, one excited in phase and other out of phase, has no intermodulation outputs, including even-order harmonics of out of phase signal 06 p0853 A66-16673
 Suppression of FM in parallel signal channels, using Mix-On-Self /MOS/ loop 06 p0834 A66-16858
 Self-mixing regime and self-modulation in parametric generator, considering nonlinear capacitance and conductivity of diode 06 p0859 A66-17184
 Parametric mixing action resulting from pumping emitter capacitance in transistors 09 p1355 A66-20601
 Semiconductor diode mixer relatively free of modulation distortion and cross modulation 11 p1669 A66-23066
 One-dimensional probability density of phase derivative of mixture of radio signal and Gaussian noise 11 p1658 A66-23222
 Parameter dependence of intermediate frequency voltage indicated during establishment of optimum conditions for optical receivers and merit of subcarrier mixing 12 p1832 A66-23960
 Hot-carrier diode characteristics and application to HF and microwave devices such as mixers and detectors 13 p2031 A66-25359
 Mixer cross products of mixer frequency charts to determine spurious responses with respect to desired output frequency 13 p2040 A66-25825
 Feedback realization of continuous-time optimal filter, with application in redundant signal mixing 15 p2474 A66-29382
 Passive frequency conversion utilizing nonlinear conductance, establishing lower bound for noise figure 17 p2881 A66-32060
 Statistical properties of envelope of signal-noise mixture with random angular modulation 19 p3296 A66-35304
 Self-mixing regime and self-modulation in parametric generator, considering nonlinear capacitance and conductivity of diode 19 p3314 A66-35542
 Equations derived for combined single sideband hybrid AM-PM signal 22 p3866 A66-40177
 Doppler frequency-measuring tracking system in which tracking filter or retuned heterodyne is used for definition of signal

with unknown frequency 23 p4038 A66-41524
 Unidirectional semiconductor-diode
 parametric amplifier and mixer, emphasizing
 power transfer and low noise
 characteristics 23 p4048 A66-41856
 Frequency up-conversion technique with
 signal mixing, noting equipment and
 results 24 p4183 A66-42630
 Power level of varactor diodes, noting
 problems of standing wave ratio
 measurement and application of reciprocity
 and mixing principle 24 p4185 A66-42893
SIGNAL NOISE
 Intermodulation effects and rule of thumb
 for spurious free dynamic range in
 wideband high sensitivity
 amplifiers 01 p0044 A66-10929
 Parallel decoding for discrete channel with
 statistically independent
 noise 02 p0189 A66-11404
 Small slope phase-frequency for minimum
 phase loops with adjustable transmission
 band, using cascading tuned individual or
 connected circuits 02 p0209 A66-12267
 False-signal probability in telemetry signals
 using group distribution and group variable-
 performance codes 04 p0504 A66-13776
 Phase modulated standard signal and
 additive noise effect on nonlinear phased
 locked oscillator 04 p0488 A66-14401
 Frequency filtration method of noise
 suppression 06 p0849 A66-16372
 Noise rejection of quasi-optimal detection
 system with averaging by
 velocity 06 p0849 A66-16374
 Thermal phase noise and VCO effects at
 ground receiver output of coherent two-way
 Doppler communication
 system 08 p1304 A66-19133
 Secondary emission effect on LF noises
 near carrier frequency of continuously
 operating high power TWT output
 signal 11 p1655 A66-22724
 Detection of fluctuating signal packets
 from noise background with unknown
 parameters 11 p1658 A66-23223
 Small slope phase-frequency for minimum
 phase loops with adjustable transmission
 band, using cascading tuned individual or
 connected circuits 12 p1848 A66-23871
 Derivation of explicit form of output signal
 from noise perturbed oscillator by
 perturbation technique 12 p1834 A66-24126
 Output signal of harmonic generator with
 noise sources in circuit, using perturbation
 analysis and assuming noise effect on signal
 in transducer is
 band-limited 12 p1835 A66-24137
 Frequency filtration method of noise
 suppression 13 p2042 A66-25960
 Noise rejection of quasi-optimal detection
 system with averaging by
 velocity 13 p2024 A66-25962
 Energy spectrum of input and output of
 linear multichannel summing system of
 delayed stochastic signals 14 p2264 A66-27243
 LF drift reduction for integrators of
 repetitive signals 15 p2475 A66-29863
 Approximation method determining follow-
 up failure conditions for nonlinear automatic
 systems in presence of control and noise
 signals 16 p2669 A66-30755
 Coefficient of mutual correlation of noises
 for two-antenna phase-type direction
 finder 17 p2879 A66-31860
 Noise rejection ability of phase
 discrimination technique 17 p2888 A66-32708
 Stationarity, using time averages, of
 laboratory electronic random noise
 generators 18 p3076 A66-33833
 Graph and derivation of performance
 characteristics of phase-shift-keyed
 communication systems where receiver
 phase reference is noisy 18 p3069 A66-34250
 Statistical properties of envelope of signal-
 noise mixture with random angular
 modulation 19 p3296 A66-35304
 Operational reliability of superconducting
 storage element of memory matrix operating
 in symmetric recording regime under noise
 signal influence 19 p3310 A66-36815
 Noise effect on synthesis of discrete
 systems with and without feedback channel
 for transmitting continuous messages, using
 binary signal and criterion of minimum rms
 error 20 p3538 A66-37745
 Statistical properties of amplitude and
 phase of output signal of electron beam

quadrupole amplifier with superposition of
 regular signal plus Gaussian noise at
 input 20 p3519 A66-37997
 Simultaneous estimate of delay time and
 drift of carrier frequency during
 nonoptimum reception against correlated
 noise background 20 p3519 A66-38002
 Stationarity conditions for FM oscillations
 with noise-modulated
 frequency 20 p3519 A66-38003
 Noise-signal receiver amplitude-limitation
 effect on noise measurement in presence of
 pulsed interference 22 p3861 A66-39655
 Pulse noise suppression systems properties
 and characteristics 22 p3875 A66-40072
 Signal and receiver-parameter optimization
 for additive noise channels with feedback
 link 22 p3868 A66-40719
 Secondary emission effect on LF noises
 near carrier frequency of continuously
 operating high power TWT output
 signal 23 p4037 A66-41462
 Digital simulation study of acquisition
 capabilities of phase-locked loop in presence
 of noise 23 p4050 A66-41616
 Gas-discharge CW lasers, particularly He-
 Ne, carbon dioxide, argon-ion and pulsed
 self-terminating lasers, discussing
 classification, power output and gain,
 Doppler width, coherence and
 noise 24 p4224 A66-42801

SIGNAL PROCESSING

Regenerative frequency converters used as
 signal limiters, determining characteristics
 from equivalent circuit of semiconductor
 diode 02 p0199 A66-11758
 Filter for exponential signals that
 facilitates obtaining required response
 without waiting for reduction of parasitic
 terms 03 p0340 A66-12471
 Decimal scaler including pulse shaper
 accepting sharp pulses and any form
 signals 03 p0344 A66-13096
 Exoionospheric communications system
 with ideal matched filter and signal
 processing at transmitter for increased
 range and secure coding
 possibilities 04 p0480 A66-13627
 Undistorted reproduction of signal, using
 filter with transfer function having multiple
 zeros 04 p0503 A66-13706
 Algorithm derived for processing packet of
 binary-quantized signals according to
 maximum likelihood for various types of
 target fluctuations 04 p0482 A66-13919
 Gemini System Interference Monitor /SIM/
 for simultaneous monitoring and remote
 control of many widely separated test points
 from central location 05 p0645 A66-14592
 Transient response of narrow-band
 networks to narrow-band signals, using
 Laplace transforms with positive
 frequencies 05 p0652 A66-14595
 Filter adapting to spectral density of
 incoming sampled signal, reconstructing
 continuous signal from
 samples 05 p0652 A66-14597
 Frequency sensor and roving notch filter
 for control system, discussing parasitic
 signals with time-varying
 frequencies 05 p0645 A66-14603
 Conditioning and isolation of Apollo
 stabilization and control system signals,
 using field effect
 transistors 05 p0646 A66-14638
 Laser light redistribution in illuminating
 optical signal processing systems noting
 apodization, spatial modes and aspheric
 elements 05 p0693 A66-14830
 Electro-optical signal processors for phased
 linear array antennas, discussing time and
 spatial delay multiplexing 05 p0648 A66-14832
 Maintenance recordings of aircraft
 parameters, discussing signal conditioning,
 economics and application
 [ISA PREPRINT 1.3-1-65] 05 p0794 A66-15499
 Instantaneous direction finding system
 composed of antenna and RF circuits, three-
 channel receiver and phase
 detectors 06 p0824 A66-15979
 Finite wide-sense stationary sequence
 followed by another sequence corresponding
 to linear filtering without delay, minimizing
 mean square error 06 p0828 A66-16116
 Recovery of continuous signal from
 samples taken at periodically varying rate,
 determining optimum mean-squared
 realizable filter and error 06 p0829 A66-16195

Component characteristic determining
 conversion probability of input signal to
 output signal allowing for random dispersion
 of transmission characteristics of individual
 components 07 p1013 A66-17385
 Large signal characterization of microwave
 transistor amplifiers 07 p1008 A66-17511
 Processing gain of receiver as function of
 target size 08 p1181 A66-18717
 Electronic correlator circuit yielding
 intercorrelation function at same rate at
 which signal is applied to device
 input 08 p1192 A66-19099
 Optimal processing time of signal in side-
 scanning radar in presence of phase
 fluctuation 08 p1183 A66-19111
 Analysis of uncontrolled, synchronized self-
 excited oscillator 09 p1352 A66-20351
 Long-baseline radio interferometer for
 radio astronomy, combining wideband signal
 and one-dimensional linear array to restrict
 spatial response in two
 dimensions 11 p1704 A66-22562
 Matched filter for frequency modulated
 continuous wave radar signal processing
 system 11 p1669 A66-23110
 System controllers for signal reproduction
 in noise conditions, noting limitations on
 regular and random components, controller
 optimality criterion, etc 11 p1681 A66-23341
 Gemini Systems Interference Monitor
 /SIM/ including signal conditioner having
 simultaneous monitoring and remote control
 from central location 11 p1687 A66-23480
 Telemetry systems for data transmission
 from satellites, discussing modulation
 techniques for noise elimination and
 flexibility 12 p1812 A66-23570
 Lincoln Experimental Terminal /LET/
 system, ground antenna, RF and signal
 processing equipment for communications
 via several satellites
 [AIAA PAPER 66-272] 12 p1821 A66-24745
 Airborne checkout system, in-flight
 maintenance and related signal processing
 problems 13 p2190 A66-25259
 Data interpretation from ballistic and space
 missiles using telemetry, analog signal
 variation, voltage conversion systems,
 etc 13 p2022 A66-25494
 Lincoln Experimental Terminal /LET/
 signal processing system, design, operation
 and application 13 p2022 A66-25516
 Phase coherent digital M-ary transmission
 with binary waves through Gaussian
 channel 13 p2022 A66-25554
 Optimum linear filtering of integrated
 signal in white noise, deriving expression
 for minimum mean square
 error 13 p2023 A66-25664
 High directional antenna with variable
 aperture and signal processing after
 frequency conversion 14 p2251 A66-27237
 Controlling gain of individual transistor
 amplifier stages to enable amplifier to
 handle input signals with wide dynamic
 ranges 14 p2262 A66-28379
 Undistorted reproduction of signal, using
 filter with transfer function having multiple
 zeros 15 p2469 A66-28549
 Time frequency coded pulse
 communication systems, noting pulse-
 position, pulse-code and delta modulation,
 signal coding, etc 16 p2647 A66-30520
 Operational test instrument for PCM bit
 synchronizers/signal conditioners, discussing
 importance of bit decision
 errors 16 p2659 A66-30541
 Data converter system for conditioning,
 recovery and display of aircraft position and
 altitude data permitting real time
 surveillance by ground
 observer 16 p2651 A66-30564
 Coherent optical systems in signal
 processing techniques, information theory
 and antenna pattern
 simulation 16 p2657 A66-31242
 Hybrid analog/digital techniques for signal
 processing, noting performance advantages
 at relatively low cost and applications to
 linear transformation, function generation,
 correlation functions, etc 16 p2658 A66-31250
 Statistical theory for optimum direction-
 finding system for space-time signal
 processing against wide-band fluctuation
 noise background 17 p2872 A66-31851
 Behavior of self-adaptive system under
 external periodic action, using point

transformation method 17 p2901 A66-32251

Multiport linear networks in which pumped variable capacitances shunt and interconnect several ports, exemplifying with varactor parametric amplifier, impedance transformer, coupler, etc 17 p2890 A66-32907

Binary synchronous communication in additive non-Gaussian noise, discussing optimal nonlinear detector for digital data transmission through non-Gaussian channels 18 p3067 A66-33901

Communications system design consisting of sequential encoder-decoder in conjunction with modulation detection system 18 p3067 A66-33903

Approximation techniques for determination of optimum uniform or nonuniform quantizer 18 p3068 A66-33904

Discrete time signal estimation, noting minimum mean square error, minimax estimation, etc 18 p3068 A66-33905

Coherent optical system for simplifying signal processing from antenna arrays by simultaneous beam forming and cross correlation 18 p3069 A66-34248

Quadratic integral equation solution for bandlimited signal design for binary communication, using memoryless correlation detection 19 p3296 A66-35339

Automatic telemetry checkout station for Saturn V systems using real time signal digitizer and general purpose computer 19 p3339 A66-35677

Integration of spacecraft tracking, telemetry and command systems using frequency multiplex subcarriers and angle modulated RF signal 19 p3300 A66-35681

Signal processor recovery time effects on photon counting accuracy, observed counts and true events in some derived curves 19 p3359 A66-35919

Feedback methods for conversion of electrical signals into frequencies, using oscillator with signal-current-controlled inductance 19 p3325 A66-35988

Satellite instrumentation, discussing data handling systems, cosmic ray detection, signal and information processing, etc 20 p3556 A66-36963

APT signal reception from Nimbus and Tiros satellites, describing APT equipment and signal conversion system 20 p3518 A66-37849

Algorithm derived for processing packet of binary-quantized signals according to maximum likelihood for various types of target fluctuations 20 p3518 A66-37877

Common-mode input voltage rejection in transistor differential amplifiers by increasing collector resistance and gain of differential stage 20 p3533 A66-38280

Measurement of physical quantity converted to form of AC signal, noting ripple-free circuit and several clamping arrangements 21 p3709 A66-38606

Elimination of rate gyro angular acceleration error and scale factor sensitivity to wheel speed by integration of output signal 21 p3767 A66-38895

Optimum filtering when signals and noises are incoming on different channels, defining filtering by rectangular matrix of filters 21 p3711 A66-39149

Selective amplification of signal voltages in analog computers with integrated circuitry 21 p3716 A66-39623

Semiconductor optoelectronic circuits for electric signal conversion into visible light 21 p3717 A66-39627

Nonsupervised sequential pattern recognition and classification, analyzing Bayes solution 21 p3720 A66-39640

Run-length encodings, determining explicit form of Huffman coding when applied to geometric distribution 21 p3758 A66-39643

Differential minority carrier storage circuit with avalanche pulse energization and fast rise/fall adjustable length pulse output 22 p3872 A66-39717

Signal processing by coherent and incoherent light systems for application in seismology, radar, speech recognition, etc 22 p3862 A66-39734

Transient response of narrow band networks to narrow band signals, using Laplace transforms with positive frequencies 22 p3864 A66-40063

Signal systems design approach to

problems of communication and radar systems, discussing channel and constraint modeling, data processor performance and signal optimization 22 p3868 A66-40720

Dispersive device for pulse compression radar, discussing effect of signal departure from desired linear characteristics 23 p4033 A66-41014

Stable transmission of given transient response in closed loop nonlinear servosystem under fixed initial condition and in presence of possible disturbances 23 p4048 A66-41393

Optimum filtration of signals in presence of arbitrary interference, using orthogonal function series 23 p4037 A66-41514

LF pulse propagation, describing measurement technique and Fourier transform of signal 23 p4039 A66-41588

Detection performance for typical cases of multiplicative radar signal processing used for nonfading and Rayleigh-fading signal amplitudes 23 p4041 A66-41702

Multiple large signal theory for TWT amplifiers with restrictive assumptions 24 p4183 A66-42635

Current transducer for measuring current pulses in kiloampere range and suitable for laser research applications 24 p4213 A66-42820

Stochastic process explaining statistical properties of radar echo patterns 24 p4175 A66-42987

Computer program for calculating average lengths of weather radar echoes and pattern bandedness from exponential function approximations to pattern autocorrelation coefficients 24 p4234 A66-42988

SIGNAL RECEPTION

SA RADAR RECEPTION

SA RADIO RECEPTION

SA TELEVISION RECEPTION

Receiver characteristics for visual range location signal due to quantum structure of field 02 p0193 A66-12272

Radio signals from artificial earth satellites and survey of propagation, operation and reception 03 p0335 A66-12896

Multiple-access communications satellite discussing modulation and reception techniques for small stations 04 p0478 A66-13596

Approximate determination of correct detection probability in optimum signal reception of unknown phase 04 p0482 A66-13913

Ideal Kotelnikov receiver discussing invariant regime and noise correlation effects 04 p0483 A66-14007

Optimum incoherent receiver discussing structure, noise rejection and equations for channels with distributed input signal components 04 p0483 A66-14008

Sufficient conditions for signal reconstruction determined according to known values of that signal at discrete succession of points 04 p0483 A66-14047

Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 04 p0499 A66-14056

Communication system using pulse code modulation with polarized light, deriving bit error probability 05 p0631 A66-14594

Optimum reception of M-ary Gaussian signals in Gaussian noise in terms of waveform with minimum error probability 05 p0634 A66-15185

Simultaneous monotonic masking of signal by bursts of wideband noise of brief duration changes and dependent upon delay of tone relative to masker onset 05 p0628 A66-15732

Advantages gained by amplitude and/or phase adaptivity in optimum reception of on-off signals subject to Rayleigh fading in presence of additive receiver noise 06 p0828 A66-16109

Signal optimization for digital communication system over channel characterized by rational transfer function and Gaussian noise having memory 06 p0829 A66-16192

Learning-type signal processing receivers for binary communication channels with intersymbol interference 06 p0830 A66-16196

ULF radiation of polar lights, detailing apparatus for receiving and recording signals 06 p0876 A66-16592

Automatic synchronization system for antenna based only on geometric considerations 06 p0835 A66-16865

Receiver for processing lane identification signals for Dectra navigation system and relation to tracking accuracy and probability of error 07 p1074 A66-17773

Degenerate parametric amplifier receiving two oppositely modulated input waves, improving noise figure 07 p1010 A66-18152

Comparison of signals received on two VHF scatter circuits of different geometry but viewing common scattering region 08 p1184 A66-19211

Ionospheric parameter measurements based on ground reception of radio signals broadcast from Elektron I satellite 09 p1377 A66-21003

Output signal and noise components determination from difference-frequency amplifier of two-channel receiver 10 p1504 A66-21671

Data transmission by continuously-radiating power source moving away from receiver and fluctuation noise of uniform frequency spectrum 11 p1854 A66-22633

Port-to-port isolation of phase detectors through use of complementary transistors in beta multiplier circuit to prevent unwanted signal reception 11 p1657 A66-23177

Principle of distributed reception of information 12 p1847 A66-23737

Ideal Kotelnikov receiver, discussing invariant regime and noise correlation effects 12 p1813 A66-23869

Optimum incoherent receiver discussing structure, noise rejection and equations for channels with distributed input signal components 12 p1813 A66-23870

Receiver characteristics for visual range location signal due to quantum structure of field 12 p1813 A66-23876

Information-bearing artificial signal from extraterrestrial civilizations is indistinguishable from natural noise 12 p1814 A66-23892

Data analysis of pre-SC field intensity increases and receivable time of WWV signal at Hiraiso, Japan, and Canadian stations for 50 geomagnetic storms 12 p1872 A66-24471

Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746

Pulse train waveforms minimizing suppression of small echoes by large overlapping echoes with identical or dissimilar Doppler shifts when processed by radar receivers which limit on received signal 14 p2235 A66-27060

Automatic gain control for reducing dynamic range of signals at output of phase radio range finder, noting effect of parasitic phase shifts 14 p2236 A66-27356

Filter with constant parameters used for optimum reception in presence of unsteady noise and signal with unknown arrival time 14 p2239 A66-27748

Optimum signal reception against non-Gaussian noise background in presence of white Gaussian noise 14 p2241 A66-28148

Radio location by coherent light with quantum structure 14 p2242 A66-28157

Ionospheric electron density distribution investigated by ground reception of satellite signals from Elektron I 15 p2482 A66-28495

LF electrostatic field characteristics of clear air turbulence, noting theory and application of field sensing antennas, turbulence generated signals, etc 15 p2532 A66-28923

Low power long-range digital communications system based on narrow bandwidth portable transmitter and fixed station receiver 15 p2450 A66-28972

Signal handling curves in receiver design including vacuum-tube capability, demodulator circuit, etc 16 p2660 A66-30579

Propagation characteristics of whistler mode radio signal over one-hop path from transmitter magnetic conjugate point to far-away receiver, noting transmission loss 16 p2652 A66-30710

Visual monitoring of multichannel displays, noting number of channels used, operator

- performance characteristics, etc 16 p2644 A66-31269
- Optimal receiver of PWM telemetering signals 17 p2873 A66-32071
- Sufficient conditions for signal reconstruction determined according to known values of that signal at discrete succession of points 17 p2873 A66-32213
- Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 17 p2885 A66-32222
- Frequency variation of ionospherically propagated radio waves by spectrum analysis of received signal 17 p2874 A66-32384
- Probability distribution of phase difference between two spaced antennas excited by random sum of rays plus specular component 17 p2874 A66-32385
- Low residue ambiguity function, using incoherently processed pulse train waveforms for application in clutter environment 18 p3070 A66-34260
- Dynamic characteristics of unsteady feedback control system during normal operation, ascertaining signal correlation and cross correlation functions 18 p3091 A66-34987
- Multichannel sequential detection in case of reception through independent multiple channels with noise 19 p3296 A66-35295
- Recognition of fading signals transmitted by channels with unknown parameters, considering optimum reception technique based on arbitrary law 20 p3515 A66-37382
- Approximate determination of correct detection probability in optimum signal reception of unknown phase 20 p3518 A66-37871
- Optimum recognition of binary signals passed through channels with random parameters, examining case where variances are equal and case of exact estimation of parameters 21 p3705 A66-39147
- Electronic test method for determining ultrasonic transducer frequency response involving actual signal transmission and reception 21 p3738 A66-39151
- Threshold signals and optimal modulation parameters of analog methods of transmitting information under conditions of ideal reception 21 p3705 A66-39253
- Polarization characteristic variations of HF signal received over short-range ionospheric path, noting phase measurement of elliptically polarized wave components, using receiving dipoles 22 p3864 A66-40065
- Principle of distributed reception of information 22 p3865 A66-40080
- Data processing of signal reception from Soviet satellites indicates radio signals scintillation caused by diffraction of waves from ionospheric nonuniformities 22 p3866 A66-40467
- Reception of signals reflected from ionosphere in vertical radar probing, examining frequency-difference combinations 22 p3869 A66-40780
- Spaced antenna reception by quadratic addition of signals providing efficient operation at various statistical characteristics of radio channel 23 p4038 A66-41518
- Phase-lock servo-loop circuit for space communication providing estimate of incoming signal through correlation process 24 p4175 A66-42826
- Electromagnetic structure of radioelectric whistlers, considering wavefront curvature in D layer, noting signal reception at two distant ground stations 24 p4176 A66-43001
- Strain gauge signal recording accuracy on stereophonic tape recorder 24 p4214 A66-43014
- IGNAL REFLECTION**
- Communication experiments with Echo II during first year in orbit, discussing reflected signals 04 p0478 A66-13594
- Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 04 p0483 A66-14048
- Electron density variation effect on Doppler shift of satellite signal reflections from ionization irregularities in ionosphere 05 p0634 A66-15265
- Time-dependent changes caused by fluctuations in tracking parameters in radio signals reflected from ionosphere or Moon and dispersed by troposphere 06 p0832 A66-16514
- Maximum accuracies of parameter estimates for complex signals reflected from several points 06 p0837 A66-17191
- Radio communication between U.S.S.R. and Great Britain via passive Earth satellite Echo II and Moon signal reflection 07 p1001 A66-17345
- Satellite ionization effects, CW-reflection and pulse radar techniques in 10 to 20 mc frequency range 08 p1181 A66-18749
- Artificial satellites detected by influences on ionosphere through 20-mc WWV bursts 08 p1181 A66-18750
- Total duration of meteoric radio reflections and space factor at wavelength of 10 m 08 p1299 A66-19795
- Correlation characteristics of signal reflection and magnetoionic components obtained in phase fluctuation measurements 11 p1696 A66-22414
- Time-dependent changes caused by fluctuations in tracking parameters in radio signals reflected from ionosphere or Moon and dispersed by troposphere 13 p2024 A66-25954
- Reflections effect on accuracy of measuring ultrasonic group delay time during amplitude and FM by sinusoidal voltage 14 p2236 A66-27249
- Dielectric guide structures /Dielectric/ used for increased gain/noise ratio in low noise antennas 15 p2456 A66-28588
- Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 17 p2873 A66-32214
- Maximum accuracies of parameter estimates for complex signals reflected from several points 19 p3297 A66-35549
- Total duration of meteoric radio reflections and space factor at wavelength of 10 m 21 p3812 A66-38791
- Statistical properties of phase and amplitude fluctuations during total reflection of waves from ionospheric layer 22 p3869 A66-40762
- SIGNAL STABILIZATION**
- Automatic pulse shaper circuits at pulse length independent of input signal amplitude 04 p0495 A66-13886
- Synthesis of circuits containing delay lines, considering storage elements for pulsed signals 04 p0499 A66-14053
- Stabilization of system containing variable-structure component characterized by linear properties and determined by amplitude and phase frequency characteristics 07 p1013 A66-17428
- Optimum realizable transmitter waveforms for high-speed data transmission, noting application to low pass filter channel 13 p2019 A66-25146
- Automatic pulse shaper circuits at pulse length independent of input signal amplitude 15 p2466 A66-29698
- Synthesis of circuits containing delay lines, considering storage elements for pulsed signals 17 p2884 A66-32219
- Describing function for analysis of feedback control systems with time-invariant nonlinear elements, simplifying derivation by taking derivative of output of nonlinear element with respect to input 19 p3336 A66-36705
- Effect of signal frequency maladjustment and automatic phase control circuit parameters on amplitude and phase shift of reflex amplifier, analyzing filtering properties 22 p3875 A66-40071
- Input signal level for stability loss or self-oscillations in automatic control system, using analysis for nonlinear systems with forced vibrations 24 p4188 A66-42476
- SIGNAL TO NOISE RATIO**
- Invalidity of overall noise bandwidth for receivers using linear or square law envelope detectors for predetection of signal to noise ratio 03 p0332 A66-12430
- Memory units in tunnel diodes noting signal to noise ratio, component tolerance, switching power, reliability, etc 04 p0489 A66-13492
- Comparison of PCM and PFM telemetry systems in terms of transmission rate, bandwidth, error rate and power 04 p0477 A66-13584
- Constant bandwidth baseband with laboratory telemeter in binary configuration for RF application 04 p0477 A66-13585
- Signal to noise ratios for band-limited signals and filtering processes, using simultaneously noise and modulated carrier, noting limiter, summation and bias noise 04 p0477 A66-13586
- Threshold performance of frequency demodulator using feedback compared to phase locked loop 04 p0492 A66-13587
- Phase coherent and nonphase coherent coded communications systems, discussing theoretical word error probability vs signal to noise ratio 04 p0478 A66-13593
- Working characteristics of transmission channel, calculating relationships between probability characteristics and output signal to noise ratio, considering band filter 04 p0496 A66-13903
- Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 04 p0484 A66-14058
- Basic radar equation, giving geometrical relationship between radar antenna and target based on antenna gain, aperture and target cross section 04 p0484 A66-14107
- Sweep indicator as radar feedback filter, noting double delay circuits 04 p0501 A66-14126
- Pre-and postdetection integration noting signal to noise ratio, finite integration time, scanning radar and high speed airborne target 04 p0487 A66-14127
- Dispersion of time modulation of leading edge of coincidence pulses in case of large SNR 04 p0488 A66-14404
- Numerical characteristics of signal-noise mixture at output of autocorrelation device for sinusoidal signal and Gaussian noise 04 p0501 A66-14407
- Optimum signal shape for transmission of discrete information, discussing signal-noise characteristics 04 p0488 A66-14414
- Optical heterodyne system, discussing angular alignment reduction by signal beam focusing to Airy pattern 05 p0695 A66-14912
- Probability of error for quadratic digital detectors contaminated by Gaussian noise 05 p0649 A66-15184
- Accurate measurement of signal to noise ratio 05 p0634 A66-15497
- Graphical comparison of Doppler-shift advantage for Chirp, Siebert and frequency hopping pulse-compression techniques 06 p0825 A66-15982
- Advantages gained by amplitude and/or phase adaptivity in optimum reception of on-off signals subject to Rayleigh fading in presence of additive receiver noise 06 p0828 A66-16109
- Signal to noise ratio characteristics measured for square-law detector, extracting signals from non-Gaussian noise 06 p0831 A66-16341
- Laser communications link security against interception, examining frequency bandwidth for minimum SNR 06 p0891 A66-16650
- Dispersive network system for pulse duration modulation 06 p0866 A66-16957
- Coherent interference rejection, discussing noise and modulator-leakage pickup rejection in laser communications experiments 07 p1001 A66-17217
- Signal separation and phase measurement device using phase probability distribution function of signal-noise mixture 07 p1005 A66-17352
- Gain in signal to noise ratio obtained with integrated circuit connected behind detector and gain determination 08 p1183 A66-19100
- Comparison of detection and resolution performance of multiplicative and additive aerial array in presence of noise 08 p1193 A66-19119
- Signal to noise ratios of AM, FM and PM systems applied to FM-FM receiver 08 p1185 A66-19563
- Arc-sine modulation method of overcoming amplitude nonlinearities in transmission systems 08 p1186 A66-19741
- Pulse code modulation coder, using delay line as coding network 08 p1186 A66-19744
- Detectability of signal in noise of range gated MTI radars, with or without pulse

lengthening in conjunction with Doppler filtering 09 p1342 A66-19951

Optical signal reception, considering use of HF subcarrier superimposed on light signal and bias-sensitive crystal detector for mixing process between subcarrier and local oscillator, deriving signal to noise ratios 09 p1346 A66-20567

Signal to noise ratio at output of frequency doubler performing nonlinear transformation by quadrature circuit 10 p1510 A66-21670

Ultimate performance of m-ary transmissions, showing signal filtering by use of energy measurement 10 p1505 A66-21837

Optimum signal to noise ratio photon detector and relation to high background radiation 10 p1505 A66-21842

Dynamic characteristics of linear plant determined under noise conditions, allowing for error in input-signal measurement 11 p1673 A66-22202

Improving SNR by display-sampling method, noting effect of increased sampling points 11 p1655 A66-22694

Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219

Dependence of statistical noise characteristics of semiconductor photoreceiver on geometrical dimensions 11 p1757 A66-23230

System controllers for signal reproduction in noise conditions, noting limitations on regular and random components, controller optimality criterion, etc 11 p1881 A66-23341

Forced reliability testing in electronic computers, switching circuits and digital communications systems by introducing noise or lowering input signal level 12 p1833 A66-24077

Nomograph for FM/FM telemetry system design 12 p1815 A66-24103

Improvement on Montgomery prediction of error probability in intermittent system operating during short intervals when SNR is above certain threshold level 12 p1816 A66-24138

Long chain of highly multiplexed broadband PCM regenerative repeaters, considering SNR after demodulation, error rate and jitter reducers /suppressors/ 12 p1818 A66-24595

Detection and false alarm probabilities for number of sinusoidal pulses in Gaussian noise subjected to amplitude limiting of arbitrary hardness 12 p1820 A66-24649

Signal to noise ratio in amplitude-, angle-, and pulse-modulated systems with carrier power exceeding receiver power 12 p1820 A66-24727

Likelihood detection with multiple Markov process, by expressing statistics in distribution function terms 13 p2019 A66-25060

Random and burst channel error affects output signal-to-noise ratio of delta modulation system 13 p2019 A66-25145

Variable premodulation gain to multichannel transmission system for which AM baseband power is proportional to cumulative channel activity, showing improvement of SNR 13 p2020 A66-25151

Sensitivity and operation of IR detector using avalanche multiplication in microplasmas in silicon junctions, noting SNR at room temperature 13 p2164 A66-25490

Signal to noise ratio maximization using Pontryagin maximum principle, solving matched filter problem and designing signal with constrained energy and amplitude requirements 13 p2048 A66-25940

Discrete self-adaptive servosystem with nonstationary random useful and noise signals applied to input 13 p2056 A66-26478

Detection of weaker signal against background of another signal, noting optimal detecting devices for incoherent fluctuating signals 14 p2239 A66-27737

Filter with constant parameters used for optimum reception in presence of unsteady noise and signal with unknown arrival time 14 p2239 A66-27748

Characteristic spectral information obtained from surface of fine particles if

spectrum is observed at high SNR or particles are compacted 14 p2335 A66-27809

Antenna array output SNR and directive gain indices optimization 15 p2455 A66-28567

Directivity diagram of N-antenna radio interferometer when interferometer is in frequency-multiplication regime, noting role of SNR 15 p2449 A66-28640

Integrator, whose transfer function has simple pole in z plane, modified to make possible greater stability with no loss increase or improved signal to noise ratio 15 p2449 A66-28642

Radiolocation theory compared with communication theory, noting trading of frequency bandwidth of radar signal for error suppression 15 p2535 A66-29860

Statistical characteristics derived for delta pulse-code modulation system, in which coded quantity represents difference between two sampled signal values 15 p2452 A66-29887

Expansion of Inter-Range Instrumentation Group FM/FM baseband, noting maintenance of system performance with added channels 16 p2649 A66-30545

Bit error rate improvement without source coding, using matched filters 16 p2659 A66-30548

Information content of photoelectric star images determined by background radiation, optical aberrations and photon noise, deriving equations for rms error 16 p2654 A66-31441

Additive noise effect on SNR of decoded data, noting quantization and error role on noise composition 17 p2873 A66-31966

Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 17 p2873 A66-32224

Optimum parameters for transformation of output signal in highly sensitive DC converter when SNR for required loading source reaches maximum 17 p2887 A66-32703

Signal to noise ratio in frequency multipliers with varactor diodes, noting relaxation oscillation type instability and techniques for minimizing noise effect on signal 17 p2894 A66-32988

Multilevel narrow-band digital FM modem noting design principles, signal to noise ratio vs error rates, etc 18 p3067 A66-33900

Analog form data transmission via FM compared to digital form via phase shift keying, noting accuracy, power and bandwidth required, output signal to noise ratios, etc 18 p3067 A66-33902

Response of phase-locked loop near threshold to input consisting of modulated carrier and white Gaussian noise, noting role of SNR 18 p3070 A66-34259

Synthesizing nonlinear converter in presence of random input signals with normal distribution 18 p3092 A66-34991

Grille spectrometer, noting greater signal to noise ratio than that of scanning Fabry-Perot spectrometer for argon observations 19 p3353 A66-35378

Extreme value statistics estimation of low error probabilities in binary communication systems 19 p3301 A66-35688

Data processing of PFM telemetry whereby resolution of frequency measurements is dependent upon SNR, for application to satellite parameters 19 p3301 A66-35696

Information theory criterion applied to nonlinear processing antenna systems yielding optimum system, considering SNR 19 p3318 A66-35885

Transistorized optimum ratio combining circuit, noting addition of two or more input signals to obtain combined signal with improved S/N ratio 19 p3330 A66-36163

Doppler tracking loops for antenna array system adaptive to changes in signal and noise levels, maintaining constant SNR in tracking loop 19 p3321 A66-36413

Coherent laser light use in atmospheric communications system, discussing effect of atmospheric turbulence and small vibrations on coherent detection efficiency and SNR 20 p3511 A66-36930

Linear system providing maximum signal to noise ratio for given parameters of correlation function of incoming quasi-harmonic signal mixed with white noise 20 p3515 A66-37379

Adaptive decoding technique for analyzing information-carrying signals in order to control signal to noise ratio during transmission time of single compound signal 20 p3522 A66-37384

Working characteristics of transmission channel, calculating relationships between probability characteristics and output signal to noise ratio, considering band filter 20 p3531 A66-37861

Coded and phase-modulated signals detected by receiver containing phase detector and decoder operating algebraically on quantized phase values, using polynomial representation 21 p3704 A66-39139

Statistical communication theory, examining problem of selecting set of M equipowered finite duration waveforms to minimize error rate for coherent channel perturbed by white Gaussian noise 21 p3704 A66-39140

Threshold signals and optimal modulation parameters of analog methods of transmitting information under conditions of ideal reception 21 p3705 A66-39253

Single-sideband FM for data transmission on vibration and acoustic measurements, noting SNR performance, transmission link, etc 21 p3706 A66-39479

Upper and lower bounds on binary error probability as function of signal to noise ratio for digital data systems operating over complex Gaussian fading channel 21 p3720 A66-39638

Aircraft in-flight vs ground testing, noting better SNR, freedom of jamming and decreased parameter requirements for vibration and transient monitoring 22 p3917 A66-39995

Adaptive antenna system circuitry for maximum signal to noise ratio of signals reaching ground station from deep space probe 22 p3881 A66-40750

Book on low noise features of radio communication /telephonic and telegraphic/ in absence of signal attenuation at receiver input 22 p3869 A66-40857

Noise performance of MOS structures, noting parametric dependence on input voltage and current source magnitude 22 p3883 A66-40962

Quantum mechanical picture of additive interrelation between signal and thermal noise, noting energy loss 23 p4035 A66-41049

Error probability in PCM/FM with phase-locked loop discriminators, noting role of input SNR 23 p4037 A66-41320

Basic performance thresholds for 23 desired and undesired modulation types, noting application to interference prediction 23 p4040 A66-41598

Detection performance for typical cases of multiplicative radar signal processing used for nonfading and Rayleigh-fading signal amplitudes 23 p4041 A66-41702

Nonlinear behavior of second-order phase locked loop in presence of noise, discussing probability distribution of phase error, statistical properties of loop behavior, etc 24 p4172 A66-42618

Square-law detection system for multiple FM signals with noise 24 p4175 A66-42962

SIGNAL TRANSMISSION

Choice of modulation for transmission of binary signals in optical range 02 p0190 A66-11408

CNES and ESRO station network duties including satellite signal transmission recording, follow vehicle trajectory, telecommand onboard operations, etc 03 p0333 A66-12477

Minimal number of controlled elements for antenna array of point transmitters with electrical scanning distributed uniformly along straight line 04 p0483 A66-14049

Phase shifting and elimination of spectral components effect on transmission channel for pulsed signal frequency limited from below 04 p0488 A66-14403

Principles of data communication reviewing digital systems, modulation methods and spectral shaping of data signals to achieve maximum noise tolerance 05 p0633 A66-14991

Communications and control systems that require faithful transmission of amplitude-modulated signals through linear filters 06 p0823 A66-15964

Propagation of electromagnetic pulses in

terrestrial waveguides under transient conditions 06 p0826 A66-16023
Signal transmission and processing - IEEE Symposium, New York, May 1965 06 p0829 A66-16187
Communication through unknown or random channel, using part of transmission energy to identify channel parameters by receiver 06 p0830 A66-16337
Degradation of correspondence between reference and modulated carriers by arbitrary offset in time-frequency space in random channel 06 p0831 A66-16342
Search via laser receivers for interstellar communications 06 p0892 A66-16669
Oscillation, modulation and transmission problems regarding long distance electric signal communication possibilities of lasers 07 p1045 A66-18359
Signal propagation on infinite lossless transmission line in quantum field terms, finding total Hamiltonian of system 07 p1046 A66-18403
Optimum /in Shannon sense/ truncated probability of signal for case of constant power and other conditions 08 p1182 A66-18915
PCM transmission system using coherent sinusoidal signals, noting orthogonality, error probability, synchronization, etc 09 p1346 A66-20547
Circuit conveying continuously variable signals between points with large steady potential differences, having commercial resistors and capacitors and no RF coil 09 p1363 A66-20665
VHF ionospheric radio signal cross correlation coefficients determined, using pulse counting techniques 10 p1505 A66-21731
Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063
Microwave transmission tests in pure air plasma using hypersonic shock tunnel, obtaining electron density and collision frequency profiles, predicting propagation path signal loss and antenna radiation pattern distortion [AIAA PAPER 66-173] 11 p1742 A66-22211
Relative impedance and transmission techniques for measuring small-signal parameters of varactor diodes at UHF and X-band 12 p1831 A66-23787
Long distance propagation of ultrashort radio waves by ionospheric scattering in subpolar region, noting graphs of signal level changes 12 p1817 A66-24290
Interference ratios in space telecasting, considering methods of control for cochannel broadcasting [AIAA PAPER 66-283] 12 p1821 A66-24754
Oscillations of vertical component of ionospheric refraction measured, using cliff radio interferometer and signals from satellites 13 p2020 A66-25223
Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076
Frequency domain design of time-limited binary signals imbedded in colored Gaussian noise 13 p2052 A66-26078
Models of hybrid AM-PM signal modulated by single sinusoid and having one-sided frequency spectrum described by using MacLaurin series expansions, noting phase relation of sidebands to carrier 14 p2235 A66-27061
Theoretical determination of distribution of duty cycle and comparison with experimental observations of signal scattering on meteor trails 14 p2388 A66-28340
Multiple scattering effects on propagation of coherent optical signals studied for laser communications application 15 p2448 A66-28580
Measurements of maser beam propagated through atmosphere, emphasizing beam broadening and signal fluctuation due to clear air turbulence 15 p2448 A66-28581
Optimal demodulation of analog-type signal transmitted through randomly fading channel, assuming additive Gaussian noise and using vector space approach 15 p2474 A66-29379
Resonance signal inversion in Rb optical pumping and relation of mixing of excited

state sublevels 15 p2517 A66-29410
Minimal number of controlled elements for antenna array of point transmitters with electrical scanning distributed uniformly along straight line 17 p2884 A66-32215
Mathematical representation of latitude-longitude point pairs for intersection of figure of Earth and plane defined by central ray of signal scattered between communications sites 18 p3068 A66-33908
Standard parallel wire susceptibility testing on signal lines at component and/or subsystem level 18 p3078 A66-34170
Gating circuit with MOS transistors for amplifier strobing in low-level signal transmission 19 p3315 A66-35559
Sampling techniques for conversion of broadband signal into multiple narrow bandwidth and reconversion back to original signal 19 p3302 A66-35705
Synchronization efficiency of PCM signals coded in NRZ, RZ and split phase formats in noisy channel 19 p3302 A66-35706
Broadband signals effect on far-zone field of linear arrays studied in terms of energy radiation pattern 19 p3320 A66-36402
Microwave diffraction over natural obstacles, stressing variation of signal level in time, space and frequency and polarization dependence and depolarization 19 p3304 A66-36411
PCM transmission system based on analog data conversion into binary signals, noting use of Shannon decoder for signal demodulation, circuit design and system properties 19 p3306 A66-36655
Optical-electronic components for signal transmission, considering light emission diodes and silicon control switches 19 p3283 A66-36813
Adaptive decoding technique for analyzing information-carrying signals in order to control signal to noise ratio during transmission time of single compound signal 20 p3522 A66-37384
HF long-distance radio signal transmission and high and low antenna sighting 20 p3521 A66-38358
Reflection and transmission of EM waves by dispersive dielectric cold plasma 20 p3611 A66-38394
Electronic test method for determining ultrasonic transducer frequency response involving actual signal transmission and reception 21 p3738 A66-39151
Electron density profiles in D layer measured through Doppler shift on VLF signal propagating from ground up and received by rocket 22 p3907 A66-39957
Error probabilities in binary transmission of signals over selectively fading diversity channels containing specular and scatter type components 22 p3864 A66-40058
Response of automatic gain control amplifier to two narrow-band input signals, examining weak signal suppression and cross-product generation 22 p3875 A66-40059
Phase distortions in transmission systems and mirror properties of signals 22 p3865 A66-40073
Slip ring-strain gauge connections for transmitting supply current to rotating transducers and transmitting back signal voltage, noting noise reduction problem 23 p4017 A66-41146
Increase in standard deviation of VLF propagation over very long paths 24 p4172 A66-42420
Signal transmission disturbances caused by presence of rocket exhaust plasmas in propagation medium between ground station and rocket powered vehicle 24 p4172 A66-42617
Measurement technique for variations in optical path of gyroelectric echoes generated by long wave transmitter and propagating in whistler mode 24 p4176 A66-42995
SIGNATURE
S RADAR SIGNATURE
SIKHOTE-ALIN METEORITE
Pressure waves recorded in India associated with Tunguska and Sikhote-Alin meteor explosions 15 p2485 A66-29064
Book on giant Tunguska and Sikhote-Alin meteorites 20 p3552 A66-37832
SIKORSKY MILITARY HELICOPTER
S CH-3 HELICOPTER

S CH-53 HELICOPTER
S SH-3 HELICOPTER
SIKORSKY S-61 HELICOPTER
SA SH-3 HELICOPTER
S-61F helicopter flight test program, noting design modifications for high speed performance 17 p2844 A66-32726
SIKORSKY S-65 HELICOPTER
S CH-53 HELICOPTER
SILANE
Interaction of organosilanes with ozone 14 p2233 A66-27866
Kinetics of monosilane pyrolysis, detailing gaseous and solid product formation, surface effects and experiments with added gases 22 p3999 A66-40410
SILICA GLASS
Reliability and reproducibility of SIL-TEMP 84 fabric used as reinforced filler in ablative components and high temperature insulating material in rockets and missiles 01 p0089 A66-10089
Fractures in neodymium-doped alkaline silicates and borosilicates produced by laser beam 04 p0532 A66-14174
High temperature crystallization processes and physicochemical properties of lithium aluminosilicate glass 12 p1900 A66-24859
Sequence of crystallization during heat treatment of ternary system of lithium aluminosilicate glasses 12 p1900 A66-24860
Crystallization of certain aluminosilicate and gallosilicate glasses of stoichiometric composition, discussing anionic network 12 p1900 A66-24861
Mechanical properties of lithium silicate glasses at different stages of crystallization and relation to microstructure 12 p1900 A66-24862
Density, microhardness, elastic constants and surface strength relation to microstructure of lithium aluminosilicate glass crystallized under various conditions of heat treatment 12 p1901 A66-24863
Silica as electric moderating agent when used to cover silicon surfaces in semiconductor, examining methods of obtaining silica film by direct oxidation 19 p3445 A66-36269
Glassy spherules found in precipitate of melted ice in Antarctica may be cosmic dust particles /microtektites/ 19 p3465 A66-36389
Pulsed-mode gain characteristics in neodymium-doped silicate glass laser experimentally related to giant-pulse laser energy output 20 p3582 A66-38396
Thermal growth and deposition of silica films by silicon tetrafluoride hydrolysis 22 p3962 A66-40048
SILICATE
SA PYROXENE
SA SODIUM SILICATE
Manufacture of propellants by aerogel carbothermal process involving reduction of silicates with methane and/or carbon [SAE PAPER 650835] 01 p0053 A66-10831
Crystalline structure of simplest lanthanum and samarium silicates 05 p0702 A66-15337
Silicate inclusions and surrounding metallic matrix of specimen of Campo del Cielo meteorite 15 p2598 A66-29633
Red and blue flashes in silicate luminescence excited by low-energy proton and lunar reddening by solar-ion excitation 16 p2802 A66-30930
Mass spectrometric analysis of Kr and Xe in silicates extracted from slab of Estherville stony iron meteorite 17 p3002 A66-32530
Adhesion force of silicates in ultrahigh vacuum as function of load force, temperature, surface roughness and crystal orientation 23 p4131 A66-41848
SILICIDE
Oxidation-resistant silicide thermoprotective coatings for tantalum and tantalum-based alloys 19 p3384 A66-36146
SILICON
Silicon and iron effects on embrittlement of cobalt-base alloy 01 p0085 A66-10357
/L-605/
Radiation damage to germanium, silicon, indium and gallium antimonides and arsenides 01 p0119 A66-10373
Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption

- lines 01 p0124 A66-10765
- Phosphorus diffusion production of p-type silicon for solar batteries 01 p0016 A66-11036
- Electric conductivity anisotropy of n-type silicon in range of warm and hot carriers 01 p0128 A66-11199
- Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 02 p0286 A66-11358
- Piezoelectric resistance of n-silicon as function of electric field 02 p0273 A66-11713
- Intensity 02 p0273 A66-11713
- Standard amplifier building blocks used in systems design, stressing manufacture by silicon integrated circuit processes 02 p0203 A66-11924
- Microelectronics technology noting integrated circuits, passive and active elements, reliability, etc 02 p0209 A66-11926
- Glass-jointed silicon mosaic for integrated devices 02 p0206 A66-12163
- Nonequilibrium field effect on silicon in region of high majority carrier depletion and nonequilibrium between energy bands 03 p0410 A66-12942
- Symmetry of ground states of P, As and Sb donors in silicon determined optically 03 p0411 A66-13144
- Electric field effect on light absorption by silicon throughout region of phonon-assisted indirect transitions 03 p0412 A66-13150
- Electrochemical oxidation of p-n junctions on silicon surface in potassium nitrate solution in ethylene glycol, noting electric current 03 p0413 A66-13203
- Optimum performance voltage sources with silicon reference elements 04 p0491 A66-13382
- Optical field effect in analyzing band structure and surface physics of silicon, noting reflectance 04 p0560 A66-13723
- Impact ionization coefficient for electrons and holes in silicon determined from distribution function of hot carriers and shown to be weakly dependent on ionization cross section 04 p0565 A66-14262
- Photoconductivity and spectral distribution of impurity radiative recombination in n-type silicon containing indium or boron 04 p0565 A66-14264
- Measurement of temperature at which silicon begins to undergo plastic deformation 04 p0565 A66-14272
- Electrical behavior of microplasmas for determination of density and energy level of capture sites induced by radiation in silicon single crystals 04 p0566 A66-14320
- Compensation effect on electron paramagnetic resonance spectrum of n-type silicon 04 p0567 A66-14342
- Radiative recombination in silicon containing structural defects in lattice 04 p0569 A66-14353
- Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface impurities 04 p0569 A66-14354
- Impurity concentration on semiconductor surface observing photoconductivity of silicon in IR region of spectrum 04 p0569 A66-14356
- Impurity concentration fluctuations in silicon crystals, discussing striation visualization technique and Czochralski method 05 p0729 A66-14512
- Monolithic silicon integrated circuit technology noting thin film, insulating and conducting layers, microelectronics, MOS systems, etc 05 p0642 A66-14559
- Roentgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 05 p0730 A66-14647
- Radiation damage of p-type silicon investigated by Hall effect, noting dislocation density and annealing behavior 05 p0735 A66-14963
- Retardation of gallium and arsenic or phosphorus diffusion in silicon 05 p0736 A66-14976
- Stain film of chemical species formed by gas phase reaction on silicon 05 p0736 A66-14978
- Isochronal annealing from 80 to 360 degrees K of defects induced by 45-mev electrons in floating zone and pulled n-type silicon 05 p0742 A66-15873
- Helicons in n-type silicon and germanium, calculating collective modes of electrons in external magnetic field from frequency and wavelength-dependent conductivity 06 p0923 A66-16275
- tensor 06 p0923 A66-16275
- Radiation damage resistance and characteristics of aluminum- and boron-doped silicon solar cells, noting annealing 06 p0809 A66-16567
- Four-lobed rpsheet stress patterns in X-ray topography of silicon bombarded by electron beam 06 p0928 A66-16761
- Diffusion distribution of phosphorus in silicon at low surface concentration 06 p0928 A66-16893
- X-ray diffraction method for measuring thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047
- Hall effect and conductivity measurements of carrier removal rate in oriented specimens of n-type Si under electron irradiation at energies from 0.3 to 2.0 mev 06 p0930 A66-17049
- Potential correction effect on ground states of P and ionic-S impurities in silicon discussed in terms of cavity model 06 p0930 A66-17051
- Radiation damage in silicon and germanium semiconductors 06 p0932 A66-17112
- Thermal conductivity of neutron-irradiated silicon crystal, based on Callaway model 06 p0933 A66-17118
- Proton irradiation effect on silicon noting fringes 06 p0933 A66-17120
- Electron paramagnetic resonance analysis of low temperature irradiation effects on silicon 06 p0934 A66-17122
- Irradiation of very pure silicon with intentionally introduced residual impurities, obtaining photoconductivity measurements 06 p0934 A66-17123
- Hall effect and resistivity measurements on high resistance n-silicon related to formation conditions at low temperature of level placed at 160 mev from conduction band 06 p0935 A66-17128
- Point defect mobility and annealing in irradiated germanium and silicon by electron or gamma ray irradiation 06 p0937 A66-17140
- Drift mobility of radiation induced defects in silicon between zero and 120 degrees C 06 p0937 A66-17141
- Nature and mobility of point defects present in silicon at high temperature and interactions between them 06 p0937 A66-17142
- Impurity concentration effect of electron irradiation damage in photovoltaic silicon cell with shallow p-n junction 06 p0938 A66-17145
- Nature of radiation effects in semiconductor devices determined from alteration of electrical characteristics 06 p0938 A66-17149
- Anisotropy of electron displacement energy in silicon specimens by measuring changes in net carrier concentration caused by steady monoenergetic electron irradiations 06 p0939 A66-17152
- Dependence of lifetime on injected level in high-energy electron-irradiated silicon with production of total displacements per primary recoil event 06 p0939 A66-17156
- Characteristic radiation spectra emitted in process of spontaneous electron transfer from shallow donors to shallow acceptors at liquid helium temperatures in silicon 07 p1095 A66-17321
- Electron capture and hole capture by impurity atoms due to radiative transitions in silicon and germanium 07 p1095 A66-17323
- Structure of microsurface layer of silicon wafers after polishing with polirit and crocus and thorium, cerium, chromium, aluminum and titanium oxide 07 p1037 A66-17413
- Measurement of negative magnetoresistance in n-type silicon 07 p1097 A66-17625
- Effect of irradiation of silicon by fast neutrons on switching time of alloy diode synthesized on silicon base 07 p1099 A66-17929
- Silicon-germanium thermoelectric power-generating devices 07 p0994 A66-18318
- High- and low-temperature surface migration of silicon on tungsten 07 p1104 A66-18364
- Volt-ampere characteristics of n-silicon in strong electric field from 77 to 300 degrees K 07 p1105 A66-18368
- Faraday effect on hot electrons in germanium and silicon 07 p1105 A66-18370
- X-ray characteristic temperature of germanium-silicon solid solution of equiatomic composition 07 p1106 A66-18370
- Hole concentration effect on elastic constant of heavily doped p-type silicon 07 p1106 A66-18380
- Lifetime degradation rate due to cobalt gamma irradiation reduced in p-silicon due to electron injection at low temperature 07 p1106 A66-18400
- Schottky barrier from silicon surfaces with controlled exposure to oxygen and water vapor, noting work function, semiconductor surface state and thickness of interfacial layer 07 p1107 A66-18400
- Diffraction contrast analysis, using transmission electron microscope, of two dimensional defects present in mechanically damaged silicon after annealing 07 p1109 A66-18513
- Anomalous diffusion of some group III and group V impurities in silicon 08 p1268 A66-18665
- Gold diffusion into silicon and formation of segregations in surface layers and crystal disturbances 08 p1268 A66-18666
- Temperature and donor concentration of width of electron spin resonance line in center of hyperfine spectrum for phosphorus- and arsenic-doped silicon 08 p1270 A66-19010
- Epitaxial silicon layer crystal growth at low temperatures by sublimation through thin alloy zones 08 p1271 A66-19220
- Anodic luminescence in electrochemical oxidation of silicon crystal 09 p1410 A66-19899
- Microscopic theory of electroacoustic effect for n-type Ge and Si semiconductors, of many energy minima, noting electron scattering 09 p1412 A66-19980
- Electron microscope observation of active centers at surface of semiconductor crystals, applying to p-type Si single crystals 09 p1412 A66-19980
- Dependence of expansion ratio on impurity concentration for silicon samples differing in impurity and dislocation content 09 p1412 A66-19990
- Impurity-photoconductivity spectra of silicon single crystals containing lithium and arsenic impurities 09 p1413 A66-19990
- Blue haze on electropolished silicon surfaces 09 p1432 A66-20977
- Photovoltaic response of variously doped germanium-silicon diodes, confirming band diagram for germanium-silicon heterodiodes dominated by lattice mismatch interface states 09 p1360 A66-20978
- Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 10 p1602 A66-21092
- Effect of orientation of silicon substrate on surface charge density and properties of silicon-silicon dioxide interface 10 p1573 A66-21346
- Structure defects in silicon crystals which cause X-ray double images studied, using X-ray diffraction topography and etching technique 10 p1574 A66-21347
- Anomalous diffusion of boron parallel and perpendicular to dislocation arrays in grain boundary contained in silicon 10 p1574 A66-21356
- Low-energy electron diffraction studies adsorption of cesium on Si /111/ 10 p1576 A66-21551
- Ionization threshold observation in Si Zener diodes and multiplication factor 10 p1509 A66-21586
- Diffusion length dependence on energy of exciting photons for p-silicon and n-and p-germanium, using bevel-grind technique 10 p1578 A66-21666
- Polarization of helicons in n-type silicon and germanium 10 p1580 A66-21733
- IR absorption spectra of oxygen-defect complexes in irradiated silicon 10 p1581 A66-21737
- Energy band structure of germanium and silicon throughout Brillouin zone by k-p Hamiltonian diagonalization 10 p1581 A66-21738
- Stored charge storage in surface states of

- Germanium and silicon 10 p1581 A66-21877
- Silicon and selenium doping effects on gallium arsenide laser characteristics 10 p1543 A66-21879
- High energy subdivided walls origin in silicon-iron suggested by reverse domain nucleation 10 p1582 A66-21887
- Bipolar excitation of photoconductivity in silicon due to structural disarrangement caused by IR radiation 10 p1583 A66-22019
- Charge-carrier concentration and mobility in thin silicon specimens 10 p1589 A66-22172
- Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption lines 11 p1748 A66-22276
- Chemical etching revealing dislocations produced by indentation on single crystals of silicon, measuring edge dislocation velocities at various shear stresses and high temperatures, determining activation energy 11 p1750 A66-22492
- Electric current heating method to obtain high purity silicon epitaxial films 11 p1757 A66-23281
- Parabolic growth deviations in thermal oxidation of silicon 11 p1758 A66-23351
- Cobalt doping effects on energy level and negative photoconductivity in n-type silicon 12 p1926 A66-23720
- Splitting in indirect absorption edge spectrum dependent on direction and magnitude of applied stress and light polarization with respect to stress axes 12 p1927 A66-23721
- Doping techniques for epitaxial growth of silicon and germanium layers 12 p1832 A66-23933
- Electric conductivity and spectral distribution of impurity photoconductivity of n- and p-silicon bombarded by fast neutrons, noting role of annealing 12 p1929 A66-24450
- Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 12 p1929 A66-24454
- Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 12 p1930 A66-24461
- Partial dislocation detection in silicon, using scanning electron beam technique 13 p2159 A66-25069
- Electron mobility in inversion layer on p-type silicon surface 13 p2163 A66-25439
- Roentgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 13 p2167 A66-25922
- Low-temperature internal friction peaks in germanium and oxygen-doped and pure silicon crystals 13 p2170 A66-26586
- Radiative recombination lifetimes in laser-excited silicon, correlating emission with photoconductivity 13 p2105 A66-26597
- Improved performance in microwave Read diode oscillator with epitaxial silicon material and coaxial cavity 14 p2248 A66-27049
- Diffusion of indium along sessile dislocation in silicon crystal 14 p2356 A66-27070
- Plastic deformation effect on carrier capture in silicon 14 p2358 A66-27090
- Dislocation-free Si crystal defects produced by fast neutron bombardment 14 p2359 A66-27092
- Jet plating of gold to make ohmic contacts on silicon 14 p2361 A66-27277
- Photoelectric yield and energy distribution for clean-cleaved cesium-covered /111/ surfaces of silicon and germanium 14 p2365 A66-27755
- Photoemission of electrons from Si and Au valence bands into thermally grown silicon dioxide conduction band 14 p2365 A66-27757
- Donor and acceptor concentration on electrical conductivity of n-type silicon 14 p2367 A66-28235
- Compensation effect on electron paramagnetic resonance spectrum of n-type silicon 14 p2367 A66-28237
- Radiative recombination in silicon containing structural defects in lattice 14 p2368 A66-28251
- Current oscillations in germanium and silicon connected to compensated semiconductor, noting
- impurities 14 p2368 A66-28252
- Impurity concentration on semiconductor surface, observing photoconductivity of silicon in IR region of spectrum 14 p2368 A66-28254
- Effective capture cross section for holes by singly negatively charged zinc atoms in p-silicon determined by double injection method 14 p2369 A66-28261
- Conductivity of n-silicon in strong magnetic field 14 p2370 A66-28332
- Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation curve 15 p2557 A66-28562
- Dielectric field cathode model of field and photofield emission from high resistivity Si and Ge at low temperatures 15 p2558 A66-28609
- Hot electron redistribution in multivalley conductors in electric fields, based on variation under pressure of valley population levels, using silicon samples 15 p2559 A66-28622
- Effect of impurity atoms or neutron irradiation on X-ray diffraction intensities of silicon and germanium crystals 15 p2559 A66-28625
- Heat treatment effect on photoelectric properties of silicon with electron-induced structural defects 15 p2560 A66-28668
- Temperature dependence of Hall emf and electrical resistance of Sendust type Fe-Si-Al alloys 15 p2560 A66-28678
- Precipitation effects in phosphorus-diffused silicon after gold diffusion, using transmission X-ray diffraction microscopy 15 p2561 A66-28700
- Epitaxial growth of silicon on basal plane of hexagonal silicon carbide substrates analyzed, using silane pyrolysis in flow system, evaluating effects of deposition variables on grown film properties 15 p2561 A66-28703
- Recombination centers in gamma irradiated silicon either float-zoned or melt-pulled and doped with phosphorus, arsenic or boron 15 p2562 A66-28721
- IR absorption spectrum of neutron bombarded silicon 15 p2565 A66-29202
- Surface states on Si crystal as affected by chemical etching and thermal oxidation studied by pulsed field effect 15 p2567 A66-29403
- Angular distribution of outgoing gamma radiation associated with giant dipole resonance in Si super 28 nucleus 16 p2750 A66-30147
- Isotope-dilution method in combination with chemical sectioning technique to determine self-diffusion in silicon 16 p2771 A66-30202
- Shubnikov-de Haas oscillations in two-dimensional electron gas in surface of p-type silicon inverted by electric field perpendicular to surface 16 p2771 A66-30204
- Absorption coefficient change due to electric field measured for indirect absorption edges of silicon and germanium, determining energies of phonons taking part in indirect optical absorption 16 p2775 A66-30728
- Silicon photovoltaic cells fabrication and operating radiation-environment requirements 16 p2636 A66-30999
- Gallium arsenide and silicon solar cells under proton irradiation, noting decrease of short circuit current and open circuit voltage 16 p2636 A66-31018
- Bulk oscillations in n-type Si compensated with either Au or Co deep level impurities 16 p2778 A66-31078
- Proton radiation induced changes in length of silicon slices 16 p2779 A66-31093
- Pulse field effect technique investigation of electrical properties of surface states on practical Si surfaces with various surface 16 p2781 A66-31356
- X-ray diffraction analysis of single crystal silicon film grown on several natural faces of BeO by thermal decomposition of silane and hydrogen reduction of silicon tetrachloride 16 p2782 A66-31420
- Oxide film thickness effect on field effect silicon, noting concentration of surface electron states 16 p2787 A66-31735
- Temperature dependence of mean ionization energy changes in germanium and silicon samples exposed to X-rays caused by changes in forbidden bandwidth 16 p2788 A66-31782
- Mossbauer effect and optical analog in five different recombination centers of silicon 16 p2789 A66-31785
- Inversion layer drift, surface charge, minority carrier recombination rates and lateral current flow effects on silicon-silicon dioxide interface, using MOS capacitance-voltage curve technique 17 p2884 A66-32197
- Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259
- Photo emf variation with radiation power of Q-switch ruby laser incident on silicon crystal with p-n junction 17 p2978 A66-32509
- Space-charge-limited electron current in silicon 17 p2980 A66-32646
- Technique for formation of thin tantalum film resistors on silicon integrated circuits 17 p2887 A66-32699
- Solar energy power converter based on illumination of battery of silicon photovoltaic cells with intense light fluxes 17 p2848 A66-32856
- IR absorption spectrum of neutron bombarded silicon 17 p2982 A66-33051
- External electron emission measurement from polished n-germanium and n-silicon surfaces 17 p2986 A66-33310
- High resistivity silicon single crystals, discussing carrier lifetime, photoconductivity and recombination levels 17 p2987 A66-33312
- Negative resistance in forward direction in silicon p-i-n diode 17 p2987 A66-33318
- Gate controlled threshold voltage of silicon p-i-n diode having negative resistance phenomenon in forward direction 17 p2987 A66-33323
- Heat treatment effect on IR reflectivities of heavily doped n-type silicon 17 p2988 A66-33327
- Recrystallization of Ge and Si thin films and structural changes due to electron bombardment and thermal annealing 17 p2988 A66-33456
- Microwave limiter device, based on impact ionization of deep levels in silicon 17 p2897 A66-33461
- Radiotracer investigation of silicon self-diffusion in high purity single crystal material 18 p3153 A66-33609
- Use of balanced filter pairs for nondispersive analysis of aluminum and silicon in aluminum-silicon mixtures 18 p3063 A66-33693
- Uniaxial stress effect on two-phonon lattice absorption bands of silicon 18 p3154 A66-33920
- Minimum silicon thickness for evaluating lifetime of minority carriers by photomagnetolectric effect 18 p3155 A66-34091
- Spin-lattice relaxation rate of donor electrons in phosphorus and boron-doped silicon with various degrees of compensation 18 p3156 A66-34471
- Sb concentration and ESR linewidth of Sb donors in compensated and uncompensated n-silicon 18 p3156 A66-34475
- Silicon, iron and nickel in solar corona determined by method of Pottasch 18 p3233 A66-34575
- Electron energy loss spectra of Ge and Si in amorphous, polycrystalline and monocrystalline form 18 p3159 A66-34710
- Impurity conduction for arsenic diffused into p-type germanium and boron into n-type silicon 19 p3433 A66-35342
- Silicon field effect device with AC/DC fields superimposed on gate terminals analyzed for determination of distribution of defect introduction rate with depth, especially near threshold energies 19 p3435 A66-35413
- Thin film transmission electron microscopy on n-type silicon irradiated with fast neutrons, noting erratic polishing process and irregular surface 19 p3436 A66-35431
- Hydrogen reduction techniques and layer quality measurement methods for epitaxial growth of silicon and germanium crystals 19 p3437 A66-35473
- Charge-carrier concentration and mobility in thin silicon specimens 19 p3441 A66-35786

Silicon IR absorption spectra at various wavelengths before and after irradiation with neutron fluxes 19 p3442 A66-35821

Carrier mobility and concentration in epitaxial silicon layers obtained by vacuum sublimation 19 p3442 A66-35866

Anisotropy of secondary electron emission in ion bombarded Si single crystals, using electron microscope 19 p3445 A66-36340

Dipole scattering of electrons in germanium and silicon whose conduction-band structure is described by many-valley model, using distribution function and computing relaxation-time ratio 19 p3446 A66-36393

Diffusion parameters of impurities from polycrystalline Si in hydrogen flux, noting formula for boundary conditions 19 p3321 A66-36457

Dislocation motion in silicon crystals measured by Lang X-ray technique, noting dislocation nucleation and growth with increasing stress below macroscopic yield stress 19 p3447 A66-36725

Neutral-impurity scattering experiments in silicon with highly spin-polarized electrons 19 p3448 A66-36764

Vacuum UV spectrum of neutral silicon, presenting wavelength measurements, relative intensities of Ge lines and Ritz standards 20 p3612 A66-36940

Effect of partial substitution of silicon, germanium and lead for tin on thermal emf and thermoelectricity of solid solutions of tin telluride 20 p3612 A66-37123

Fabrication and performance of dendritic silicon solar cells, noting utilization experience 20 p3497 A66-37165

Dislocation-induced relaxation in silicon single crystals by measuring internal friction and Young's modulus at temperatures from 77 to 300 degrees K 20 p3618 A66-37561

Electric conductivity and spectral distribution of impurity photoconductivity of n- and p-silicon bombarded by fast neutrons, noting role of annealing 20 p3619 A66-37682

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 20 p3619 A66-37686

Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 20 p3620 A66-37693

Lithium use in silicon solar cell for radiation resistance improvement, noting preservation of minority carrier lifetime 20 p3502 A66-37775

Testing of silicon solar photoelectric battery when exposed to large light fluxes, noting overheating, current saturation, efficiency decrease, etc 20 p3503 A66-38439

Model estimate of oxygen concentration captured from residual gases by epitaxial germanium and silicon films prepared by vacuum deposition 21 p3795 A66-38521

DC-photodecay method for investigating minority-carrier lifetimes in silicon crystals 21 p3736 A66-38747

Electron conduction and phosphorus doping effects on room temperature and cryogenic electron spin resonance in n-type silicon 21 p3797 A66-38752

Giant-resonance characteristics of silicon isotopes calculated, using Balashov magic nucleus model 21 p3798 A66-38913

Modulation by ultrasonic diffraction of 10.6 micron laser radiation in photoelastic CdS, GaAs and Si crystals 21 p3747 A66-39112

Preferential formation of peaks of single-crystal silicon and germanium samples exposed to short-duration electron beam 21 p3801 A66-39117

Heat treatment of silicon at high temperatures leads to donor centers affecting electric and photoelectric properties 21 p3802 A66-39157

Photomicrographs of pressure crack figures on silicon single crystals at room temperature 21 p3803 A66-39291

Electron energy spectrum of silicon, examining effect of screw dislocations parallel to crystallographic direction 21 p3803 A66-39296

Energy and wave functions of singly charged donor impurity centers in silicon and germanium 22 p3959 A66-39772

Photovoltaic response of p-n Ge-Si and Ge-

GaAs heterojunctions dominated by carrier generation in narrow or wide gap material 22 p3960 A66-39813

Fast neutron effect on electrical properties of boron-doped n-type silicon samples with resistance, noting decrease in hole concentration and mobility 22 p3961 A66-39829

Inhomogeneities in silicon crystal prisms studied by method of photoelectric conductivity 22 p3961 A66-39998

Imperfection of silicon dioxide layers caused by dust particles during thermal oxidation of silicon, measuring breakdown voltage 22 p3961 A66-39999

Carrier density, mobility and space-charge-limited current in p-type silicon 22 p3962 A66-40049

IR absorption band growth and decay in spectra of oxygen-doped Si irradiated with fast neutron 22 p3962 A66-40085

Fission spectrum neutron damage and gamma ray damage in n-type Si, comparing results of measurements by degradation of minority carrier lifetimes 22 p3962 A66-40086

Energy spectrum of levels appearing in silicon single crystals irradiated by integral fluxes of fast electrons, neutrons and gamma quanta 22 p3964 A66-40193

Silicon solar cell performance, output increase by solar concentration and cost reduction 22 p3851 A66-40245

Photoionization cross section of negatively charged In atoms in n-type silicon from comparison of intrinsic photoconductivity with impurity photoconductivity 22 p3964 A66-40309

Plastic deformation effect on carrier capture in silicon 22 p3967 A66-40846

Dislocation-free Si crystal defects produced by fast neutron bombardment 22 p3967 A66-40848

Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884

Saha-Langmuir formula applied to description of temperature dependence of positive ion current in surface ionization of silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs 22 p3968 A66-40942

Surface charge mobility measurement method applied to Si and Ge and time variation of surface conductivity 23 p4110 A66-41183

Mean energy required to create electron-hole pair in Si measured as function of temperature, using cryostat 23 p4111 A66-41264

Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation 23 p4112 A66-41283

Temperature homogenization effect on structure of industrial aluminum, determining mechanical properties dependency on Fe/Si ratio 23 p4081 A66-41403

Magnetostriction constants measured at room temperature for YIG single crystals after replacing fraction of iron ions by silicon 23 p4114 A66-41626

Epitaxial growth techniques used to obtain graded layers for drift field structured solar cells on Si web 23 p4019 A66-41747

Variation of resistivity and inversion of sign of conductivity of quenched specimens of p-type silicon 23 p4115 A66-41838

Silicon-germanium lead-telluride segmenting for improved thermoelectric efficiency, noting sequential fabrication process difficulties 24 p4248 A66-42115

W-diffusion bonding in preparing segmented silicon-germanium-lead telluride thermoelements, noting properties 24 p4248 A66-42116

Time dependence of space-charge limited current in Fe-doped p-silicon used for determining capture probability, noting retrapping significance 24 p4252 A66-42351

Surface photovoltage theory for small signals in Si and Ge, considering photocarrier trapping on surface and conductivity in space charge region 24 p4253 A66-42358

Energy levels and wave function of hole field of two acceptor ions and nearest donor for p-type Ge and Si 24 p4255 A66-42424

Matrix elements of Coulomb potential between Schechter functions and over integrals necessary in determining two-center acceptor states in p-type Ge and Si 24 p4255 A66-42424

Energy levels and wave function of hole field of two acceptor ions and nearest donor for p-type Ge and Si, noting numerical results 24 p4255 A66-42424

Electron irradiation effect on resistivity epitaxial layers of Si and on lifetime ordinary samples 24 p4258 A66-43010

Solid microminiature semiconducting materials and devices for microwave communications noting germanium at silicon role, microcircuits, plasma effect floating zone techniques, etc 24 p4186 A66-43010

Ideal curves of metal oxide semiconductor capacity and surface potential computed for silicon and oxide thickness and doping parameter 24 p4259 A66-43100

SILICON ALLOY

Thermoconductivity of alloyed solid silicon germanium solutions 05 p0731 A66-1468

Relaxation constant in p-type silicon crystals alloyed with zinc, examining carrier recombination 10 p1588 A66-2216

Thermoconductivity of alloyed solid silicon germanium solutions 13 p2167 A66-2592

Temperature variation and carrier concentration effects on density-of-state effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-2775

Relaxation constant in p-type silicon crystals alloyed with zinc, examining carrier recombination 19 p3441 A66-3577

Manufacturing of semifinished pressed products of AD31 Al-Mg-Si alloy, examining coarse-grained structure occurring after hardening and machining 22 p3928 A66-4088

SILICON CARBIDE

Extension of study showing that increase in temperature of silicon carbide increases absorption coefficient of defect, for case of heavy particle irradiation 02 p0274 A66-1172

Cubic beta-silicon carbide films grown on single crystal silicon substrates by heating in presence of graphite in argon atmosphere 02 p0275 A66-1187

Optimum conditions for improving sensitivity of spectral analysis and plotting calibration curves for determining impurities in silicon carbide 02 p0188 A66-1199

Spectral determination of impurities in silicon carbide based on evaporation in argon atmosphere from cavity cut into graphite electrode 02 p0188 A66-1199

Alloy junction formation, discussing spectral characteristics of electroluminescence from forward-biased 4H-SiC p-p alloy junctions as function of formation temperature 04 p0497 A66-1398

Boron, nitrogen and gallium in photo- and electroluminescences of silicon carbide p-n junctions, noting radiative electron transitions 04 p0567 A66-1434

Nuclear reactor radiation effect on microstructure, size of elementary cells hardness and electrical conductivity of high melting compounds 06 p0897 A66-1669

Influence of defects introduced during fast neutron irradiation on electronic behavior of SiC, examining reasons for deterioration of SiC semiconductor devices 06 p0936 A66-1713

Semiconducting properties of electron irradiated silicon carbide 06 p0936 A66-1713

SiC p-n junctions as rectifiers and radiation detectors, studying degradation in charged particles and neutron fluxes 07 p1100 A66-1814

Volt-ampere characteristics of silicon carbide crystals with negative differential resistance 07 p1105 A66-1837

Ionization energy in silicon carbide and germanium irradiated by electrons 08 p1278 A66-1962

Photoconductivity and p-n photoeffect in SiC single crystals excited by X-rays 09 p1425 A66-2018

- Growth and properties of n and p type
silicon carbide crystals grown from
pure or doped carbon-saturated silicon
melts 10 p1577 A66-21563
- Photoelectric yield data on n-and p-type
silicon carbide crystals in vacuum
10 p1578 A66-21578
- Growth and structure of evaporated silicon
layers, noting defects due to stacking
disorders 12 p1928 A66-23938
- Moving deposition zone technique for
controlling nucleation and growth of silicon
films on hexagonal silicon carbide
substrates 13 p2164 A66-25491
- Boron, nitrogen and gallium in photo-and
electroluminescences of silicon carbide p-n
junctions, noting radiative electron
transitions 14 p2367 A66-28238
- Epitaxial growth of silicon on basal plane
of hexagonal silicon carbide substrates
analyzed, using silane pyrolysis in flow
system, evaluating effects of deposition
variables on grown film 15 p2561 A66-28703
- Properties 15 p2561 A66-28703
- Microscopic structure of sintered silicon
carbide mechanism of material transport and
effect of nitrogen doping 16 p2729 A66-30245
- Hydrogen essential in deposition from
methyltrichlorosilane of silicon
carbide 16 p2729 A66-30247
- Silicon carbide coatings on molybdenum
and tungsten by pyrolysis of methyl
trichlorosilane, discussing oxidation tests
and spalling due to thermal expansion
mismatch 16 p2729 A66-30248
- Frictional properties of silicon nitride and
carbide during reciprocating sliding between
hemispherical stylus and polished horizontal
specimen 16 p2730 A66-30253
- Electrical properties of impure silicon
carbide obtained from Tashkent
carbide plant 16 p2786 A66-31672
- Electroluminescence of silicon carbide
diodes 16 p2668 A66-31781
- Peculiarities of Hall curves of n-type alpha
silicon carbide, noting concentration of
conduction electrons related to
temperature 16 p2789 A66-31789
- Ionization energy in silicon carbide and
germanium irradiated by
electrons 17 p2984 A66-33142
- Continuous silicon carbide filaments
prepared using chemical vapor-deposition
techniques, analyzing cross sections, x-ray
diffraction and tensile
strength 20 p3588 A66-37772
- SiC role in ablation chemistry, examining
experimental results on char-reinforcement
reactions 21 p3834 A66-38710
- Optical charge exchange in silicon carbide
analyzed, using electron paramagnetic
resonance 22 p3964 A66-40311
- SILICON COMPOUND**
- SA ORGANIC SILICON COMPOUND**
- SA SILANE**
- SA SILICATE**
- SA SILICIDE**
- Silicon monolithic integrated circuit or
solid circuit design, noting electrical and
economical features 02 p0209 A66-11923
- Increase in carrier mobility in Mg₂Ge₈Si₂
with neutron irradiation may be due to
decreasing effective mass, caused by
creation of internal
stresses 06 p0936 A66-17136
- Effect of fast states with discrete energy
levels and quasi-continuous spectrum on
capacitance of silicon dielectric film-metal
structure 08 p1274 A66-19308
- Resistance temperature dependence, Hall
constant, thermal emf and Hall mobility of
silicon with phosphorus
impurities 08 p1278 A66-19772
- Electrical properties, solubility and
diffusion characteristics of gold in silicon,
noting discrepancy between theoretical
calculations and experimental
measurements 09 p1432 A66-20975
- Silicon p-i-n junction diode microwave
switches of wide
bandwidth 17 p2890 A66-32905
- Dielectric constant variation in silicon
single crystals, noting frequency dependence
of dielectric loss, conductivity and
temperature effects 19 p3436 A66-35423
- High saturation core material magnetic
behavior, noting structural instability
accompanied by deteriorating magnetic
properties at high
temperatures 20 p3583 A66-37258
- Manganese-silicon p-type thermoelectric
material for intermediate temperature
application 24 p4248 A66-42113
- SILICON CONTROL RECTIFIER /SCR/**
- Analog computer simulation of silicon-
controlled rectifier applied to
cycloconverter 05 p0612 A66-14639
- Fast neutrons effects on operating
characteristics of silicon controlled
rectifiers 07 p1010 A66-18149
- Phase controlled SCR circuit for variable
DC power application 08 p1199 A66-19807
- SCR circuit design operating under
transient loads higher than steady state
rating, using transient capabilities and heat
sink 12 p1848 A66-24088
- Three-phase half-wave inverter circuit
consisting of ring of three SCRs and
converting DC into AC power supplied into
zigzag motor load 12 p1804 A66-24662
- Gating circuit concept, using carrier
frequency approach, applied to inverter,
converter and cycloconverter
circuits 13 p2043 A66-26296
- Circuit designs for silicon controlled
rectifier 13 p2043 A66-26310
- Magnetic amplifier telemetry encoder
circuit, using silicon controlled rectifiers
/SCR/, for application in satellites and
rockets 14 p2263 A66-27062
- Survey of literature on basic properties
and circuit designs of silicon-controlled p-n-
p-n rectifiers 15 p2468 A66-29916
- Dependence of amplification factors on
emitter current in p-n-p-n silicon
rectifiers 15 p2468 A66-29917
- Model L/C water-cooled DC power supply
for short arc lamps, noting SCR
selection 16 p2635 A66-30495
- Thyristor selection for control application,
discussing V-I characteristics, SCR behavior,
optical control feasibility,
etc 17 p2888 A66-32781
- Silicon microwave p-i-n diode design and
use as variable resistance 17 p2891 A66-32909
- Solid state transmitter with triggered Si
controlled rectifiers /SCRs/ for high power
efficiency in LF and ULF
bands 17 p2895 A66-33120
- Nonlinear operational amplifier with high
power switching devices, noting volt-ampere
characteristics 18 p3086 A66-34494
- Potential jump at p-n junction used to
indicate position of junction in silicon
rectifier 19 p3312 A66-35322
- Optical-electronic components for signal
transmission, considering light emission
diodes and silicon control
switches 19 p3283 A66-36813
- Room temperature performance of GaAs
laser diodes, using SCRs to achieve high
pulse repetition rate 22 p3932 A66-40175
- SILICON FILM**
- Controlled phosphorus diffusion into silicon
from phosphorus pentoxide vapor using red
phosphorus as source, noting relations of
resistivity-surface concentration to pressure
temperature 02 p0275 A66-11872
- Photovoltage profiles of rhodium to p-
silicon contact at high and low level
injection and various
temperatures 02 p0275 A66-11873
- Diffusion rate of silicon from sputtered
film of silicon into gallium arsenide as
function of ambient arsenic pressure at 900
and 1000 degrees C 05 p0732 A66-14665
- Residual stress in epitaxial silicon film on
sapphire measured by cantilever beam
technique 05 p0733 A66-14673
- Phosphorus diffusion into silicon film and
resultant defect
structures 06 p0928 A66-16762
- Structure of sulfide films deposited on
silicon and germanium single
crystals 07 p1092 A66-17223
- IR polariscopy method applied to study of
photo-and electromechanical effects of n-
type silicon films 07 p1034 A66-17875
- Optical thickness measurement of
transparent films on silicon, using
spectrophotometric interference
technique 07 p1036 A66-18404
- Dimensional control of oxide films on n-
and p-type silicon by thermal oxidation and
chemical etching in HF 08 p1230 A66-18870
- Refractory metal disks as mounts for
silicon wafers in high-power
semiconductors 08 p1190 A66-18871
- Stacking-fault defects in epitaxial silicon
layers grown on chemically polished
substrates 10 p1578 A66-21576
- Coating of titanium with aluminum and
silicon by immersion of titanium samples in
molten aluminum or in aluminum/silicon
melts 10 p1547 A66-21749
- Current dependence of resistivity and
mobility measured in silicon epitaxial layers
on control wafer 11 p1756 A66-23021
- Growth and structure of evaporated silicon
layers, noting defects due to stacking
disorders 12 p1928 A66-23938
- Asymmetric instability and charge motion
in metal-silicon oxide-silicon
structures 12 p1932 A66-24823
- Phosphorus interacting with boron and
conductivity measurements at 600 degrees C
observed on phosphorus stabilized silicon
dioxide films 12 p1932 A66-24826
- Dielectric relaxation in thermally grown
silicon dioxide films 12 p1932 A66-24828
- Maximum dielectric strength of thin
evaporated silicon oxide films, calculating
breakdown processes 12 p1933 A66-24830
- Epitaxial deposition of silicon by
sublimation process at 750 degrees C, using
ultrathin alloy zone
crystallization 12 p1846 A66-24912
- Direct current conduction of thin
evaporated silicon oxide films, noting
functional dependence on degree of
oxidation, composition, temperature and
adherence to Schottky emission
law 13 p2157 A66-25034
- Single crystal silicon on spinel, achieving
epitaxy on magnesia aluminate by Silane
pyrolysis and silicon chloride reduction in
hydrogen atmosphere 13 p2158 A66-25053
- Moving deposition zone technique for
controlling nucleation and growth of silicon
films on hexagonal silicon carbide
substrates 13 p2164 A66-25491
- Single crystal silicon epitaxy growth on
foreign substrates by chemical vapor
deposition techniques, noting epitaxial
geometry 13 p2113 A66-25648
- High-voltage photovoltaic effect in thin
silicon films, considering thermal processing,
gas adsorption and stress 13 p2166 A66-25818
- Silicon film MOS transistors with
extremely low capacitance produced by
diffusion of source and drain regions
entirely through film 15 p2459 A66-28896
- Avalanche breakdown voltages for diffused
junctions in silicon epitaxial layers 2-32
microns thick for different impurity
profiles 15 p2564 A66-28899
- Density and location of surface states at
silicon-silicon dioxide interface determined
by analyzing capacitance-voltage
characteristics of MOS
diode 15 p2567 A66-29412
- Deposition of single-crystal silicon films on
sapphire substrates by pyrolytic
decomposition, noting
properties 16 p2782 A66-31419
- Thin silicon film deposition on amorphous
fused quartz substrates by cathodic
sputtering in argon atmosphere, noting
resistivity data 16 p2782 A66-31421
- Proper current input for true resistivity
measurements of single-crystal silicon and
silicon slices 16 p2785 A66-31596
- Structure of sulfide films deposited on
silicon and germanium single
crystals 17 p2976 A66-31994
- Thin film passive devices combined with
monolithic silicon techniques to produce
circuits superior in electrical and
environmental performance to conventional
integrated circuit 17 p2882 A66-32106
- Gold distribution and precipitation in
phosphorus-diffused silicon
wafers 17 p2980 A66-32649
- Mass transfer across gas-solid interface
associated with semiconductor
solids 18 p3087 A66-34737
- Role of particle channeling in affecting
results from crystal-line detectors used for
charged particle and nuclear
scattering 19 p3359 A66-35912
- Negative resistance phenomena in metal
oxide semiconductor /MOS/ diodes made
from degenerate silicon substrate observed
in course of investigating electrical

characteristics 21 p3712 A66-39223
 Experimental molecular beam study of nucleation process in chemical-vapor growth of epitaxial silicon films 21 p3805 A66-39588
 Transmission electron microscopic and molecular beam study of nucleation and growth in chemical vapor of epitaxial silicon films on carbon-contaminated silicon substrates 21 p3806 A66-39589

SILICON JUNCTION
 Transient voltage across series-connected silicon rectifier cells immediately after commutation 01 p0035 A66-10206
 Impurity-recombination emission in diodes of n-type Si single crystals alloyed with In 02 p0206 A66-12092
 Antireflection coatings and coverglass on silicon solar cell to improve performance 02 p0180 A66-12162
 Rocket-mounted spectrometer with solid state detectors for measuring internal energy spectra of auroral electrons and protons in 40-104 kev range 03 p0369 A66-12650
 Uniaxial stress effect on germanium-silicon alloyed heterojunction 03 p0410 A66-12729
 Microwave absorption, series resistance and capacitance of silicon-mesa parametric diode calculated in terms of parent resistivity, geometry and diffusion 03 p0344 A66-13015
 Electric properties of germanium and silicon filamentary diodes in which base volume diode structure contains disintegrated region 03 p0346 A66-13319
 Hole current and electron current affected by local pressure applied on emitter surface of planar-diffused n-p-n silicon transistor 04 p0558 A66-13420
 Silicon p-n junction analysis using electron photographic developers when space charge region is present 04 p0563 A66-13881
 Alloy junction formation, discussing spectral characteristics of electroluminescence from forward-biased 4H SiC p-p alloy junctions as function of formation temperature 04 p0497 A66-13982
 Mechanical sapphire-point pressure effect on characteristics of silicon p-n junction 04 p0570 A66-14491
 Aircraft and commercial application of three-phase direct current resistance welding, using silicon diodes 05 p0685 A66-14518
 Formation of breakdown of silicon p-n junctions in pulse mode 05 p0730 A66-14649
 Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 05 p0731 A66-14655
 Silicon avalanche light sources for photographic data recording 05 p0677 A66-14831
 Light induced pulse oscillation in metal-silicon contact with p-n junction 05 p0736 A66-14970
 Average energy expended per ionized electron-hole pair in silicon and germanium as function of temperature 05 p0742 A66-15871
 Shift of optical absorption edge toward longer wavelengths under strong electric field in silicon p-n junction 06 p0923 A66-16184
 Width of depletion region of reverse-biased silicon p-n junction 06 p0923 A66-16382
 Extension into microwave region of pulse-driven oscillators produced by biasing common diffused p-n junctions into avalanche breakdown region 06 p0851 A66-16451
 Impurity redistribution effect on production of n-type inversion layers on surface of p-type bulk silicon during high temperature oxidation, noting tests on MOS capacitors 06 p0925 A66-16656
 Potential distribution in epitaxial p-n semiconductor measured via moving light spot, determining deposition depth 07 p1106 A66-18382
 Electrical properties of carrier generation-recombination centers in silicon p-n junctions, noting energy levels, effective capture cross sections for holes, etc 07 p1107 A66-18402
 Neutron and electron irradiation damage in uniform silicon avalanche junction diode and effect on avalanche pulse

rate 07 p1012 A66-18410
 Single injection measurements in n-type silicon at liquid-helium temperatures under transient conditions, using pulse measurements 07 p1107 A66-18414
 Transit time effects in space-charge-limited silicon microwave diode 08 p1188 A66-18652
 Alloying technique through doped diffused layer for production of high speed silicon tunnel diodes for logic circuits and memory functions 08 p1188 A66-18653
 Localized diffusion of phosphorus in silicon used to produce deep p-n junctions with Gaussian P distribution 08 p1268 A66-18678
 Dependence of lifetime on dislocation density in vacuum-zone purified silicon single crystals 08 p1272 A66-19242
 Phonon effect on temperature dependence of tunnel breakdown in silicon 08 p1277 A66-19615
 Silicon photovoltaic cells in economic solar energy conversion on Earth 08 p1174 A66-19665
 Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 09 p1352 A66-20360
 Characteristics of cadmium sulfide photocells and p-n junction photocells, using germanium or silicon 09 p1355 A66-20573
 Time dependence of multiplication and refinement in silicon technology needed to establish uniform multiplication for Read diode prototype 10 p1515 A66-22089
 Width variation of forbidden band of Si in electric field of p-n junction 10 p1588 A66-22160
 Anisotropic deformation effects on silicon p-n junction 10 p1588 A66-22164
 Spontaneous switching from closed to open state observed in four-layer silicon diodes serving as keying elements in automatic systems 11 p1667 A66-22743
 Double injection in long p-p-n diffused silicon junctions subjected to heat treatment, noting donor density energy level and electrical properties 11 p1756 A66-23027
 Surface state and surface recombination velocity characteristics of Si-SiO₂ sub 2 interfaces 12 p1932 A66-24827
 Gold or copper diffusion effect on breakdown and multiplication characteristics of high voltage silicon p-n junctions, noting presence and formation of microplasma 13 p2161 A66-25194
 Silicon-silicon dioxide interface charge density in MOS structure 13 p2161 A66-25197
 Sensitivity and operation of IR detector using avalanche multiplication in microplasmas in silicon junctions, noting SNR at room temperature 13 p2184 A66-25490
 Silicon diffused p-n junctions with boron acceptor for varactor diodes 13 p2040 A66-25816
 Formation of breakdown of silicon p-n junctions in pulse mode 13 p2167 A66-25924
 Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 13 p2167 A66-25930
 Radiation effects on silicon p-n junction diode solar cell and use of transparent radiation shield 14 p2225 A66-27107
 Silicon p-n junction analysis using electron photographic developers when space charge region is present 14 p2363 A66-27579
 Series resistance of silicon microwave varactors 14 p2254 A66-27731
 Electric properties of germanium and silicon filamentary diodes in which base volume diode structure contains disintegrated region 14 p2260 A66-28293
 LF noise measurements in silicon avalanche photodiodes in 10 kc-10 mc range 15 p2459 A66-28898
 Reverse recovery phenomena in silicon alloyed p-n junction 15 p2467 A66-29710
 Frequency dependence of parameters of surface varactor with metal titanium dioxide/silicon structure 15 p2468 A66-29922
 Electrical conductivity and Hall mobility of p-and n-type semiconductors at various temperatures 17 p2975 A66-31900
 Low temperature silicon variable capacitance diodes for use in low noise S-band parametric amplifier 17 p2890 A66-32903
 Phonon effect on temperature dependence

of tunnel breakdown in silicon 17 p2983 A66-33122
 Impurity concentration and electric field distribution determined in drift region of silicon p-i-n detectors from capacity as function of reverse voltage 17 p2986 A66-33303
 Scanning microscope for studying Si p-n junctions by electron or ion bombardment 17 p2927 A66-33454
 Stroboscopic electron mirror microscope observations of Si p-n junctions in pulsed regime 17 p2928 A66-33456
 Berg-Barrett skew reflections applied to observation of boron diffusion-induced imperfections in silicon wafers 18 p3076 A66-33935
 Transistor testing and secondary breakdowns, featuring application of constant collector current and power with arbitrary waveform 18 p3078 A66-34087
 Diffusion and melting techniques used to determine effect of Ni, W, Ti and Ta impurities on lifetime of minority carriers in n-base of silicon p-n junctions 19 p3433 A66-35310
 Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 19 p3312 A66-35318
 Silicon-on-sapphire batch-fabrication of computer logic and memories, describing SOS diode matrix 19 p3314 A66-35526
 Width variation of forbidden band of Si in electric field of p-n junction 19 p3440 A66-35774
 Anisotropic deformation effects on silicon p-n junction 19 p3441 A66-35778
 Effective charge carrier lifetime in silicon p-i-n junction detectors determined, using transit time for carriers produced by incident radiation 19 p3318 A66-35913
 Silica as electric moderating agent when used to cover silicon surfaces in semiconductor, examining methods of obtaining silica film by direct oxidation 19 p3445 A66-36269
 Transient radiation response and permanent radiation damage in monolithic silicon-junction-transistorized integrated circuit 20 p3526 A66-37318
 Equilibrium photocurrents in silicon switching diodes from nondestructively measured electrical parameters 20 p3526 A66-37322
 Surface space-charge region associated with p-n junction characteristics when not in equilibrium, using MOS structures theory 20 p3527 A66-37403
 Phosphate glass effect on frequency behavior of n-inversion layers on silicon MOS diodes 20 p3529 A66-37545
 Bias voltage dependence of capacitance in n-type silicon p-n junctions with voltage breakdown 20 p3621 A66-38007
 Avalanche breakdown voltage of quasi-planar /circular cylindrical/ silicon junction and relation to increased electric field intensity in curved portion 22 p3959 A66-39741
 Spontaneous switching from closed to open state observed in four-layer silicon diodes serving as keying elements in automatic systems 23 p4046 A66-41481
 Lithium ion drift and density distribution in electric field of Si p-n junction 24 p4253 A66-42359
 Surge-proof silicon power diode combining p-n and p-i-n structures 24 p4182 A66-42505
 Reverse breakdown voltage increase resulting from ion drift in silicon p-n junctions formed by sodium ion bombardment 24 p4257 A66-42621

SILICON NITRIDE
 Reinforcement of plastics and metals by silicon nitride whiskers limited to temperatures below 900 degrees C [AICE PREPRINT 18D] 10 p1548 A66-21184
 Frictional properties of silicon nitride and carbide during reciprocating sliding between hemispherical stylus and polished horizontal specimen 16 p2730 A66-30253
 Ionizing radiation effect on FET with silicon nitride as insulating layer, noting reduction of shift in gate turn-on voltage 17 p2983 A66-33105
 Silicon nitride as possible replacement for silicon dioxide in highly stable and reliable

semiconductor devices, especially insulated-gate field effect transistor
19 p3710 A66-38827

SILICON OXIDE

Surface states at silicon-silicon dioxide interface studied by observing bias voltage dependence of differential capacitance of n-type MOS diodes
01 p0128 A66-11196

Nonohmic behavior of silicon monoxide under various conditions and proposed model for current-voltage and current-temperature relations
03 p0409 A66-12727

Ionizing irradiation effects on oxide covered silicon surface properties, measuring changes in inversion layer conductance
06 p0940 A66-17164

Thermal oxidation kinetics of silicon, describing diffusion process, oxide layer boundary reactions and space charge effects in initial phase
07 p1106 A66-18401

Construction of hot forming tool made of fused silica ceramic
08 p1229 A66-18691

Built-in surface charge on thermally oxidized silicon as function of exposed crystal face orientation
09 p1411 A66-19929

Silicon dioxide glass films by decomposing tetraethoxysilane in AC-induced glow discharge in which water is chemically incorporated into oxide
09 p1432 A66-20979

Thermally grown silicon dioxide layers examined, noting ionic and structural changes induced by applied electric fields at different temperatures
11 p1756 A66-23023

Thin silicon-dioxide film properties and growth for insulating gate electrode and semiconductor of MOS field effect device
11 p1759 A66-23464

Oxidation rate and heat treatment effect on density of states of silicon surface potential in silicon-silicon dioxide system
12 p1932 A66-24825

Radiochemical and electrical determination of sodium distribution in thermal oxide on silicon
12 p1933 A66-24829

Direct current conduction of thin evaporated silicon oxide films, noting functional dependence on degree of oxidation, composition, temperature and adherence to Schottky emission
13 p2157 A66-25034

Domain wall mobility effect on multilayer magnetic thin films consisting of permalloy layers separated by silicon oxide
14 p2351 A66-26888

Photoemission of electrons from Si and Au valence bands into thermally grown silicon dioxide conduction band
14 p2365 A66-27757

High fields effect on negative field effect electron carrier mobility on MOS surfaces
16 p2771 A66-30196

Space charge polarization in glass films, discussing parameters of shift of capacitance-voltage characteristics, diffusion coefficient in metal-glass-silicon dioxide-silicon double-layer
16 p2779 A66-31089

Effect of storage in air at high temperatures on resistance, temperature coefficient of resistance of metal alloy film resistors, noting effect of silicon oxide protective overcoating
16 p2783 A66-31426

Inversion layer drift, surface charge, minority carrier recombination rates and lateral current flow effects on silicon-silicon dioxide interface, using MOS capacitance-voltage curve technique
17 p2884 A66-32197

Surface state density of MOS structure, noting difference between gas deposited and thermally grown samples
17 p2978 A66-32405

Electron spin resonance in silicon oxide grown on Si, noting spectral line interpretation of Si-SiO₂ sub 2 boundary
17 p2978 A66-32406

Electrical properties of SiO₂ films, noting independence of dielectric constant on film thickness and dependence of conductivity on applied field
17 p2978 A66-32411

Kinetics of highly endothermic carbon-silica reaction for silica-reinforced resin systems
17 p2943 A66-32453

Absorption spectra modification in silica ceramics after gamma irradiation from Co-60
19 p3388 A66-35463

EPR detection of dangling bonds at surface of silica and quartz, noting inhomogeneous expansion
19 p3445 A66-36341

Anodic oxidation process for silicon,

examining current flow in strong electric field as function of time, Curle-von Schweidler law and Tafel
19 p3448 A66-36755

Reactions between silica and graphite studied in vacuum from 1445 to 1765 degrees C by continuously measuring amount of carbon monoxide formed
21 p3753 A66-38593

Imperfection of silicon dioxide layers caused by dust particles during thermal oxidation of silicon, measuring breakdown voltage
22 p3961 A66-39999

MOS work function difference effect on surface charge density and orientation calculations for Si-silicon dioxide interfaces
22 p3962 A66-40050

Charge distribution in thermally grown silicon dioxide and silicon n-type inversion layer
22 p3962 A66-40087

Taxonomy of electric charges in Si-silicon dioxide metal insulator semiconductor /MIS/ systems under presence or absence of bias
22 p3877 A66-40178

Silicon dioxide complexes and deposition of excess oxygen at dislocations and structural defects, examining creation of microplasma breakdown of silicon p-n junctions
22 p3965 A66-40320

Heat of pyrolysis of resin in silica-phenolic ablator determined from combustion calorimetry measurements of heats of formation
23 p4150 A66-41892

Diffusion of phosphorus into silicon, using doped silicon oxide skin sources produced by anodic oxidation
24 p4255 A66-42504

Dielectric breakdown phenomena in evaporated silicon monoxide thin film, noting electron collision effect
24 p4260 A66-43106

SILICON RADIATION DETECTOR

Silicon surface damage, discussing low energy gamma irradiation effect on bulk lifetime and recombination
05 p0729 A66-14565

Low temperature thermal conductivity of 2-mev electron-irradiated and annealed single-crystal silicon
05 p0741 A66-15868

Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation
06 p0924 A66-16515

Four-channel silicon detector and scintillation counter for measuring proton spectrum of Earth radiation
08 p1223 A66-19042

Device with surface-barrier silicon detectors used to record protons, alpha particles and nuclei with Z greater than 2
08 p1223 A66-19043

Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation
09 p1431 A66-20896

Depth of lithium-doped region in silicon radiation detector determined by method based on energy loss of traversing particles
13 p2075 A66-26472

Thick lithium drifted semiconductor silicon detectors for investigation of fluctuations of energy loss by high and intermediate energy particles
16 p2755 A66-31389

Most probable energy loss in silicon for pions with energies from 365 to 50 mev, examining pion beam behavior through different absorption material thicknesses
16 p2755 A66-31390

Photodiode operation mode and steady-state response of diffused p-n junction type Si radiation detectors to X-rays
17 p2975 A66-31883

Landau-Symon theory extension, semiconductor telescopes in primary cosmic particle charge and energy spectrometry, and capabilities of Si as cosmic particle detector
18 p3114 A66-34844

Fabrication methods for lithium drifted surface barrier silicon detectors, discussing lithium diffusion, stain etching, preparation for and final etch
20 p3535 A66-38417

SILICON TETRACHLORIDE

Laser oscillations of silicon tetrachloride, silicon tetrafluoride and ethyl silicate in gaseous discharge
05 p0696 A66-14973

SILICON TRANSISTOR

Static drift in epitaxial planar silicon transistor choppers
01 p0035 A66-10208

Short-circuit current change in silicon solar

cell performance as function of cell thickness
01 p0014 A66-10397

Low power consumption, high reliability and fully integrated silicon monolithic complementary flip-flop circuit
01 p0047 A66-11139

DC and LF AC characteristics of silicon transistor over collector current range
02 p0200 A66-11878

Current gain and transconductance of silicon planar transistor for collector currents used in design of DC amplifiers
02 p0200 A66-11886

Microwave oscillations from reverse-biased planar silicon diode chip operating at X-band frequencies
03 p0338 A66-12431

Variations in resistivity of silicon slices before and after irradiation
03 p0339 A66-12435

Current and voltage negative feedback effect on distortion in common emitter transistor stage
03 p0340 A66-12466

Direct-coupled silicon transistor switching circuits with high reliability rather than with maximum gain
03 p0340 A66-12493

Miniature high performance high-reliability silicon transistor preamplifier for biological use and space research
03 p0343 A66-12989

Pulsing technique enhances gain of silicon planar transistor low-current amplifiers
03 p0343 A66-13014

Properties of silicon diodes with gold alloy bases, examining anomalies in V-I characteristics
04 p0499 A66-14055

Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics
04 p0499 A66-14060

Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations
04 p0499 A66-14061

Silicon metal oxide semiconductor transistor as individual device and in integrated arrays
05 p0641 A66-14558

Near-Earth radiation damage to silicon semiconductor devices with respect to minority-carrier diffusion length degradation and ionization dose
05 p0733 A66-14846

High-energy electron and gamma ray damage in silicon transistor gain, noting changes in recombination and bulk damage
05 p0734 A66-14850

Predicting transistor gain degradation in neutron radiation environment from variation of radiation damage constant as function of temperature and current
05 p0735 A66-14856

Neutron-induced base current component in silicon transistor which varies with integrated neutron flux and base-to-emitter voltage
05 p0735 A66-14857

Neutron radiation effects on silicon field effect transistors
05 p0739 A66-15489

Proton and electron damage to silicon semiconductor device
05 p0739 A66-15491

Silicon planar transistors, noting electron flux induced surface damage mechanism
06 p0854 A66-16684

MOS capacitance measurements, utilizing graphical relations between silicon surface parameters
06 p0940 A66-17165

Current-voltage characteristics of silicon p-n-p structures in cutoff region for controlled and uncontrolled diodes, transistors with hooks and binistors
06 p0940 A66-17187

Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits
06 p0860 A66-17196

Degradation of silicon dioxide coated silicon planar transistors after exposure to space-type ionizing radiation, using MOS structure
07 p1010 A66-18148

Silicon based unijunction transistor, discussing design, operation parameters and application
08 p1190 A66-18771

Double impulse method for lifetime measurement on pure silicon crystals, using injecting metal-semiconductor contacts
08 p1271 A66-19241

Space radiation vs MOS devices and circuits
08 p1196 A66-19497

Saturation currents of silicon multichannel field effect transistors /MUCH-FET/
09 p1350 A66-19914

Second breakdown volt-ampere

characteristics in triple diffused n-p-n Si transistor 09 p1351 A66-19936

Thin film transistors using evaporated silicon films on sapphire 09 p1351 A66-19939

Silicon triode trigger with power consumption on order of 1 milliwatt 09 p1358 A66-20818

Worst case design of diode transistor logic inverters, considering resistor end-of-life tolerance, supply voltage variations and minimum beta of switching transistor 10 p1508 A66-21298

Silicon diode microwave oscillators and amplifiers, noting application of avalanche transit time for increased efficiency of p-n junctions 10 p1515 A66-22090

Scanning electron microscope observation of electrical leakage paths due to crystal defects in silicon diodes 11 p1688 A66-23028

Localized enhanced diffusion in vacancy model to explain Emitter Dip Effect /EDE/ in n-p-n silicon transistor 11 p1671 A66-23350

Integrated circuits containing transistor, diode and resistor with unilateral and bilateral switches, noting application 12 p1834 A66-24087

Nondestructive breakdown mechanism in silicon planar transistors between collector and base with emitter open-circuited, noting negative resistance region 12 p1837 A66-24308

Planar silicon insulated-gate field-effect transistor using silicon nitride as diffusion mask, passivating layer and gate insulator 12 p1837 A66-24310

Monolithic silicon-transistorized integrated amplifier for use as stabilized gain block element in linear circuit realizations 12 p1842 A66-24656

Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824

Polysilicon insulated gate field effect transistor having active element fabricated in epitaxially deposited film on oxidized single crystal silicon substrate 12 p1845 A66-24831

MOS FETs in microelectronics, including digital arrays and logic gates 12 p1845 A66-24847

Metal oxide silicon integrated circuits subsystem size, weight, power and cost compared with double diffused counterpart 12 p1845 A66-24848

Silicon monolithic circuit development, discussing cost reduction and performance improvement in microcircuits 12 p1845 A66-24850

Current-voltage characteristics of conductivity-modulated silicon p-i-n diode as affected by high-level injection and fast-neutron bombardment 13 p2158 A66-25054

Complex longitudinal microwave magnetoconductivity and permittivity of n-type silicon at 77 degrees K, noting influence of DC magnetic field 13 p2159 A66-25066

Irradiation effects by fast neutrons and gammas on collector cut-off current and base current at low current densities analyzed on silicon planar transistors 13 p2032 A66-25486

MOS silicon transistors, operation and properties 13 p2032 A66-25492

Silicon UHF power transistor performance, showing parameters of amplifier gain, power output and impedance 13 p2036 A66-25512

P-n-p and n-p-n silicon epitaxial power transistors, noting geometry vs output for interdigitated structures 13 p2037 A66-25542

Triple diffused high-voltage silicon transistors, characteristics and application 13 p2037 A66-25544

N-p-n double diffused Si HF transistor design for monolithic microcircuit application 13 p2038 A66-25559

Microelectronics fabrication development, noting electronic effects in silicon, HF transistors in microcircuits, thin film silicon circuits, etc 14 p2252 A66-27307

HF amplifier design, using two-port theory measurement of Si epitaxial mesa transistor y-parameters, discussing power gain, sensitivity and inherent stability 14 p2261 A66-28372

VHF and UHF amplifiers, oscillators and signal sources using silicon

transistors 14 p2262 A66-28382

Silicon film MOS transistors with extremely low capacitance produced by diffusion of source and drain regions entirely through film 15 p2459 A66-28896

Injection of minority carriers at field-induced junction near silicon-silicon dioxide interface 15 p2459 A66-28897

Silicon planar transistor design noting accelerated life test, failure data, etc 15 p2466 A66-29675

Properties of silicon diodes with gold alloy bases, examining anomalies in V-I characteristics 17 p2885 A66-32221

Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 17 p2885 A66-32226

Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 17 p2885 A66-32227

Thin film transistor design and performance 17 p2885 A66-32380

Emf expressions for substrate and gate transconductances of MOS transistor 18 p3077 A66-34074

Temperature effects in n-type and p-type MOS Si transistors 18 p3077 A66-34075

Burst noise of low-level plane silicon transistors possibly caused by intermittent microplasmas creation 18 p3078 A66-34095

Current-voltage characteristics of silicon p-n-p structures in cut-off region for controlled and uncontrolled diodes, transistors with hooks and binistors 19 p3438 A66-35545

Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 19 p3315 A66-35554

Instability effect in n-channel silicon MOS transistors bombarded with ionizing radiation 20 p3526 A66-37317

Ionizing radiation effects on silicon planar bipolar transistors to determine degradation mechanisms 20 p3526 A66-37319

Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-39749

Microwave emission frequency shift during uniaxial stress on Si epitaxial planar and diffused mesa type diodes 23 p4044 A66-41299

Resistance meters for heavily doped silicon and germanium transistors 23 p4068 A66-41571

Avalanche radiation from bulk of long thin forward-biased p-n-p silicon diodes 24 p4180 A66-42258

VLF measurements of flicker noise in Si planar transistors 24 p4181 A66-42376

SILICONE

Simulated space environment effects on performance of silicone insulating materials 02 p0247 A66-11291

Physical properties of new class of lubricants, methyl alkyl silicones, illustrating exceptional lubricating ability [ASLE PREPRINT 65-LC-4] 02 p0238 A66-12261

Silicone alumina low temperature low-pressure plastic molding technique for precision forming of ceramic materials for aerospace structural application 10 p1538 A66-21130

Physical properties of new class of lubricants, methyl alkyl silicones, illustrating exceptional lubricating ability [ASLE PREPRINT 65-LC-4] 12 p1889 A66-24989

SILICONE RUBBER

High tensile and tear strength and resilience of silicone rubber [ASME PAPER 65-WA/RP-3] 05 p0706 A66-15632

Cellular room-temperature-vulcanizing silicone-rubber, describing compound properties, application and possible structural modifications 06 p0900 A66-16295

Elastomeric silicone for aerospace electric and thermal insulation, discussing properties, application and new developments 06 p0900 A66-16297

Properties of nonirradiated heat-shrinkable silicone and fluorosilicone rubbers for

insulating and encapsulating electrical and electronic apparatus, including resistance aging, fuels, ozone, etc 06 p0900 A66-16297

SILOXANE

Mechanism of conduction in pyrolysislooxanes studied for electrophysic properties of vinyl polymers 07 p1099 A66-1789

Temperature dependence of integrated absorption and band half-width in IR spectra of methyl and ethyl siloxanes 21 p3802 A66-3916

SILVER

Dislocation relaxation of silver and copper and asymmetry of Bordoni internal friction peak of metals 01 p0087 A66-1069

Dielectric losses and permittivity of vitreous semiconductor arsenic trisulfide with silver impurity 06 p0929 A66-1692

Fourier analysis, used to determine particle size, strains and faulting, applied to silver films evaporated onto glass substrate at different residual gas pressures 09 p1383 A66-2025

Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 14 p2359 A66-2718

Electromagnetic transmission through thin silver film on dielectrics 14 p2364 A66-2774

Spherical substrate converted to paraboloid mirror by selective evaporation of aluminum, using silver as nonuniform thickness layer 15 p2499 A66-2884

Oscillating tunneling characteristics from electron interference in normal metal induced by superconducting contacts between silver and lead 16 p2769 A66-3016

Gold and silver doping effect on Hall effect, electroconductivity thermal emf and conductivity of CdSb 17 p2984 A66-3314

Isotopic composition of silver in Canyon Diablo iron meteorite 18 p3228 A66-3401

Energy gaps of Ag-Sn, Fe-Sn and Sn film studied by electron tunneling method for various temperatures 18 p3156 A66-3447

Equation explaining polarization of solid electrolyte cell with silver plate anode noting role of current density 18 p3056 A66-3490

Optical constants of silver and gold in various energy regions, measuring relative refractivities of polarized light, analyzing collective motions of conduction electrons 20 p3615 A66-3728

Fatiguing at room temperature resulting in observable diffusion of silver into copper, using precipitation reaction to analyze influence of large number of vacancies 20 p3584 A66-37618

Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 24 p4257 A66-42732

Transition temperature for superconductivity in superimposed films of silver and tin in which alloying between two metals is minimized 24 p4259 A66-43068

SILVER ALLOY

Electric Ag-CdO contacts obtained by internal high temperature oxidation method 08 p1239 A66-18900

Superconducting properties and phase composition of silver-gallium alloys 09 p1411 A66-19960

Low temperature study of resistivity and thermoelectric power variations of silver-palladium alloys as function of concentration, caused by electron diffusion 09 p1425 A66-20079

Charging effect of Ag-Au alloys and other properties determined by perturbation theory 14 p2365 A66-27754

Plastic deformation effect on resistivity and Hall constant of silver-palladium alloys, noting decreasing rate of change for increasing strain 15 p2560 A66-28648

Thermoelectric power and electric resistivity measurements of n-type silver telluride at melting point and in liquid state 17 p2981 A66-32955

Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750

Strain-time curve of silver containing aligned tungsten wires at high temperatures noting reduction of creep rate of matrix 22 p3935 A66-40200

VER BROMIDE

Conductivity measurements on silver bromide and silver 09 p1426 A66-20194
Double-layer capacitance of solid silver bromide determined against platinum and gold electrodes, using electrochemical cell 12 p1933 A66-25002
Free hole lifetimes greater than 50 microseconds in silver bromide above 200 degrees K and measurement of drift mobility 14 p2365 A66-27756

VER-CADMIUM BATTERY

Rechargeable chemical batteries using nickel-cadmium and silver-cadmium electrodes and chemical reaction 01 p0014 A66-10365
Satellite solar array systems utilizing dihydrode Ni-Cd and Ag-Cd cells and HF silicon power transistors 02 p0180 A66-11281
Nickel-cadmium, silver-cadmium and silver-zinc alkaline batteries for secondary spacecraft power supplies [AIAA PAPER 64-455] 08 p1168 A66-18813
Automatic battery formation system for silver-cadmium electrochemical cells 08 p1169 A66-19505
Sealed nickel-cadmium and silver-cadmium batteries for aerospace use noting construction, electrical characteristics and life cycle tests 08 p1173 A66-19660
Performance characteristics of sintered plate nickel-cadmium, silver-cadmium and silver-zinc batteries regarding energy output, discharge voltage, charging cycle life, etc 23 p4023 A66-41769

VER CHLORIDE

Liquid metal embrittlement noting stress and intergranular corrosion, hydrogen embrittlement and behavior of silver chloride crystal 02 p0243 A66-11698
Conductivity measurements on silver bromide and silver 09 p1426 A66-20194
Possible stabilization of AgCl crystals against solar radiation effects by addition of Cu, Ni, Zn, Cs, S or Hg 18 p3157 A66-34549
Cracking of jet engine components made of titanium alloys results from silver chloride stress corrosion 19 p3473 A66-35655

VER COMPOUND

Silver salts effect on etching of germanium single crystals, noting photomicrographs of structural changes 13 p2169 A66-26584
Epitaxial growth of low pressure sputtered-silver films, noting dependence of growth on kinetic energy distribution of sputtered atoms 16 p2784 A66-31532
Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675
Reproducible ohmic contact preparation for high resistivity n-type GaAs in fabrication of Gunn oscillators 19 p3313 A66-35351

VER IODIDE

Improved operating characteristics of solid-electrolyte cell at room temperature by using silver sulfur iodide 18 p3055 A66-34901

VER OXIDE

Silver oxide films by cathodic sputtering, discussing changes in sample preparation and material characteristics due to aging and heat treatment 17 p2976 A66-32262

S OXIDE-ZINC BATTERY

S ZINC-SILVER OXIDE BATTERY

VER-ZINC BATTERY

Heat dissipation values for spacecraft silver oxide-zinc primary and nickel oxide-cadmium secondary batteries determined with calorimeter 03 p0323 A66-12772
Nickel-cadmium, silver-cadmium and silver-zinc alkaline batteries for secondary spacecraft power supplies [AIAA PAPER 64-455] 08 p1168 A66-18813
Silver-zinc battery as secondary battery noting cell life, cycling regime, design parameters and float 08 p1173 A66-19661
Equation relating voltage, current, ampere-hours consumed and temperature for silver oxide-zinc batteries, noting dual potential concept 12 p1804 A66-24667
Cycle life and energy yield of hermetically sealed secondary silver-zinc batteries for aerospace application [AIAA PAPER 64-749] 13 p2007 A66-26650
Performance characteristics of sintered

plate nickel-cadmium, silver-cadmium and silver-zinc batteries regarding energy output, discharge voltage, charging cycle life, etc 23 p4023 A66-41769

SIMILARITY HYPOTHESIS

SA LAGRANGE SIMILARITY HYPOTHESIS

Similarity, concept applied to study of work done by living creatures in various situations 01 p0017 A66-10302
Reference point in thermodynamic similarity for investigating binary gas mixtures 01 p0163 A66-10627
Similar flows about axisymmetric bodies rotating in fluid at rest 03 p0354 A66-12351
Coupled flow problem, comparing flow induced by steady rotation of permeable and impermeable disks 06 p0871 A66-16353
Similarity theory applied to thermal shock resistance of brittle ceramics 06 p0897 A66-16699
Longitudinal and transversal contours minimizing drag of slender homothetic body in hypersonic flow with Newtonian pressure distribution and constant skin-friction coefficient 06 p0802 A66-16911
Similarity solutions of boundary layer equations with algebraic decay for viscous incompressible fluid inside infinite circular cone 06 p0873 A66-16996
Similar solutions to laminar boundary layer equations affected by Prandtl number, viscosity-temperature variation, mass transfer and hypersonic parameter 07 p1023 A66-18136
Similarity criteria, showing that scale effect in fatigue fracture is caused by distortion of similarity 07 p1147 A66-18386
Similarity hypothesis applied to turbulent flow in annulus 09 p1366 A66-20177
Monin-Obukhov similarity theory for turbulent structure of thermally stratified surface layer of atmosphere 11 p1725 A66-22266
Exact solutions for unsteady two-dimensional gas dynamics equations for self-similar flow behind shocks and expansion waves 14 p2278 A66-28143
Turbulent mixing of rotationally symmetric jet in flow of equal velocity and equal density, including similarity models 15 p2423 A66-28522
Thermal similarity study of models in space environmental chambers for deducing characteristics of typical space vehicle element [AIAA PAPER 66-460] 16 p2683 A66-31469
Book on similarity theory and physical interpretation, examining boundary value problems, dimensional analysis, etc 16 p2739 A66-31751
Non-Newtonian viscoelastic fluids with similarity transformations for power law fluids, noting momentum, energy and heat transfer 20 p3545 A66-37510
Stress velocities and numbers and use in hydrodynamic distorted and undistorted models 22 p3897 A66-39674
Simultaneous one-dimensional heat conduction equations solved by means of matrix similarity transformations in direct computational procedure 22 p3940 A66-40488
Pressure gradient calculation in three-dimensional laminar boundary layer, using method of local similarity 23 p4009 A66-41724
Similar solution of laminar mixing of curved half-jet and curvature effect of boundary layer flow along curved surface 23 p4059 A66-42003
Boundary layer problems in rotating flows, noting similarity solutions and including general momentum-integral solution 23 p4061 A66-42044
Existence of similar solutions for given differential transonic equations for free stream Mach number of unity 23 p4014 A66-42049
Flame of homogeneous gas mixture in terms of similarity criteria applied to combustion process 24 p4295 A66-42883
Degree of similarity of turbulent flow characteristics in geometrically similar flows 24 p4197 A66-42949

SIMILARITY NUMBER

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of

pumps 14 p2225 A66-27698

SIMILITUDE LAW

Similarity law for longitudinal contours of optimum bodies minimizing drag in hypersonic and low subsonic free molecular flows constrained on length, base width, wetted area, etc 14 p2221 A66-28183
Similarity laws for bodies maximizing lift-to-drag ratio at hypersonic speeds, considering longitudinal and transversal contours 19 p3276 A66-36245
Similarity laws in hypersonic flow of real gas around thin blunted bodies, particularly bodies with rough lateral surface 23 p4009 A66-41720

SA VIBRATION SIMULATOR
Network design implementing solar cell array simulator, using wideband constant current source in conjunction with conventional diodes and linear resistors 08 p1169 A66-19494
Pressure surges, surge accumulators and relief valves studied on Titan I launch vehicle simulator 13 p2056 A66-25131
Fading channel simulator for performance testing of spacecraft communication and ranging equipment 14 p2271 A66-28406
Venus phase simulator experiment indicating anomaly due to observer 23 p4128 A66-41208

SIMULATOR

SA PILOT TRAINING
Tests of advanced life support and environmental control systems in manned space laboratory 02 p0186 A66-11646
Mission simulation techniques for training Gemini flight controllers 02 p0186 A66-11802
Integrated operating mode of Apollo mission simulator with mission control center for combined training of Apollo flight and ground crews [AIAA PAPER 65-266] 03 p0353 A66-12777
Closed circuit television display system performance levels required for human visual simulation in flight training [AIAA PAPER 65-264] 03 p0353 A66-12778

SIMULATOR TRAINING

SA PILOT TRAINING
Tests of advanced life support and environmental control systems in manned space laboratory 02 p0186 A66-11646
Mission simulation techniques for training Gemini flight controllers 02 p0186 A66-11802
Integrated operating mode of Apollo mission simulator with mission control center for combined training of Apollo flight and ground crews [AIAA PAPER 65-266] 03 p0353 A66-12777
Closed circuit television display system performance levels required for human visual simulation in flight training [AIAA PAPER 65-264] 03 p0353 A66-12778

Practice techniques for maintaining astronaut psychomotor skills during extended missions, with star sighting and flight control test results 05 p0626 A66-14635
Apollo spacecrew training from simulation and actual space flights
[ASME PAPER 65-WA/HUF-17]

05 p0628 A66-15695
Simulator design for inclusion of man/machine interactions and human behavioral and performance considerations in system design 08 p1203 A66-19534

Simulated lunar landing maneuver of Apollo spacecraft, determining pilot control problems and handling

qualities 16 p2743 A66-30886
Integrated mission simulation technique tests pilot reliability for seven-day manned lunar mission

[AIAA PAPER 65-275] 18 p3061 A66-33792
Integrated manned systems simulator for optimizing displays, controls and vehicle dynamics in manned

aerospacecraft 20 p3542 A66-37249

Tests of advanced life support and environmental control systems in manned space laboratory simulator 24 p4168 A66-42779

SIMULTANEOUS LINEAR EQUATION

Computational aspects of uniform polynomial approximation to function and derivative 11 p1722 A66-22983

Runge-Kutta fourth-order method for solution of N simultaneous first-order differential equations economically evaluated 19 p3392 A66-36782

SINE SERIES

Properties of sums of special trigonometric series 09 p1394 A66-20458

SINE WAVE

Observed regularities of contrast characteristics of human visual system in photopic luminance region examined by psychophysics of response/stimulus peak-to-peak measurements of spatial sine wave patterns 21 p3700 A66-39129

Finite Fourier sine transform method of obtaining closed-form solution, calculating eigenfrequencies for free vibrations of partially fixed beam carrying concentrated masses 22 p3992 A66-40296

SINGLE CRYSTAL

Germanium fiber single crystal growth, properties and application 01 p0116 A66-10207

Growth of single crystal gold films in ultrahigh vacuum on clean vacuum-cleaved salt surfaces 01 p0117 A66-10242

Optical and electrical characteristics of injection electroluminescence p-n homojunctions from zinc selenium telluride crystals 01 p0119 A66-10346

Inhomogeneity distribution in single crystal semiconductor considering specific resistance and carrier lifetime and using volume gradient photoelectromotive force values 01 p0124 A66-10763

Strain-free electro-optic effect in single crystal barium titanate as function of temperature between 10 and 120 degrees C 01 p0126 A66-10969

Tungsten single crystal structure and mechanical properties as affected by saturation of carbon, oxygen and nitrogen 01 p0089 A66-10998

Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 01 p0126 A66-11006

Temperature dependence of electric conductivity and Hall effect of single crystal cadmium tin arsenide 01 p0126 A66-11026

Single crystal silicon films on sapphire in terms of materials properties and impact on thin film semiconductor microelectronics 01 p0048 A66-11146

Fabrication of thin single crystal silicon films on sapphire and integrated circuit process technology 01 p0048 A66-11147

Electrical resistivity, Hall effect and magnetoresistance of bismuth antimony single crystal solid solutions 02 p0272 A66-11712

Electrical conductivity, Hall effect and thermoelectric power as function of temperature in CdSb single crystals strongly doped with silver 02 p0275 A66-11968

Nondestructive X-ray diffraction technique for measuring flexure in single-crystal

silicon wafers at different stages of integrated circuit

02 p0275 A66-11978
Cadmium selenide thin film transistors /TFT/ where electron mobility values exceed bulk single crystal values 02 p0276 A66-11979

Three-stage hardening in tantalum single crystals deformed in tension over limited range of orientations, temperatures and strain rates 02 p0246 A66-12194

High vacuum purification and effect on mechanical properties of niobium single crystals 02 p0246 A66-12196

Dielectric relaxation effects, dissipation factor peak and capacitance and conductivity dispersions in pure and doped sapphire single crystals 03 p0409 A66-12638

Curie temperature, static dielectric constant and electro-optic coefficient of large single crystals of barium titanate 03 p0411 A66-13007

Tungsten single crystal study by electron microdiffraction for distribution and effects of interstitial phases 03 p0385 A66-13194

X-ray single crystal diffraction technique determination of structure of pyridinium dicyanomethylide 04 p0472 A66-13364

Preparation of single crystals of double molybdates of Na and La /or other rare earth elements/ doped with Nd, Tb or Pr for laser application 04 p0529 A66-13478

Audiofrequency hysteresis loops and initial permeabilities of single-crystal yttrium iron garnet cores with annealing and silicon substitution 04 p0562 A66-13750

Crack propagation in tungsten single crystals with preexisting microcracks and prestraining at various temperatures 04 p0536 A66-14308

Electrical behavior of microplasmas for determination of density and energy level of capture sites induced by radiation in silicon single crystals 04 p0566 A66-14320

Quenching and enhancement of dark conductivity in high resistivity photosensitive single crystals of cadmium sulfide 05 p0732 A66-14663

Room-temperature tensile behavior of tungsten and tungsten-rhenium single crystals 06 p0894 A66-16068

Pure spin and spin-acoustic delay modes of single crystal YIG 06 p0847 A66-16104

Ferroelectricity - All-Soviet Conference, Rostov, U.S.S.R., September 1964 06 p0925 A66-16712

Barium titanate single crystals at infrared frequencies investigated for polarization, effective permittivity and coercive field 06 p0926 A66-16713

Reversing permittivity of barium titanate single crystals measured, using lithium chloride solution for electrodes 06 p0926 A66-16714

Permittivity of barium titanate single crystals with laminar domain structure 06 p0926 A66-16715

Polarization and domain structure of barium titanate single crystals with double hysteresis loop 06 p0926 A66-16716

Angular distribution of annihilation gamma quanta in CdS single crystals of high and low resistivity 06 p0928 A66-16921

Nature and mobility of point defects present in silicon at high temperature and interactions between them 06 p0937 A66-17142

Gamma irradiation effects on float-zoned single-crystal p-type boron-doped silicon, using lithium drifted p-l-n junctions 06 p0937 A66-17144

Electron mobility changes in GaAs single crystals due to electron irradiation interpreted in terms of ionized-scattering theory 06 p0939 A66-17151

Extrinsic and intrinsic epitaxially deposited single crystal gallium phosphide solar cells, noting conversion efficiencies 07 p0990 A66-17232

Intrinsic optical absorption in indium phosphide single crystals mechanically polished and plotted vs photon energy 07 p1095 A66-17318

UV irradiation effect on electrical conductivity of zinc oxide single crystals 07 p1097 A66-17469
Weak-field magnetoresistance and impurity activation energy in n-type aluminum

antimonide single crystal 08 p1275 A66-1936
Single crystal p-type zinc antimonide thermoelectric, thermoconductivity and electronic transport measurements 08 p1275 A66-1936

Piezoresistive properties of reduced-strontium titanate single crystal at various temperatures and electron concentrations 08 p1275 A66-1936

Spin-phonon interaction induced by ultrasonic wave in yttrium ferrite single crystals 08 p1278 A66-1962

Anodic luminescence in electrochemical oxidation of silicon crystal 09 p1410 A66-1981

Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 09 p1411 A66-1994

Effect of thermal and thermomagnetic treatment of nickel-cobalt ferrite single crystal on rotational magnetic hysteresis losses 09 p1412 A66-1996

Low temperature measurement of magnetosusceptibility of CdS single crystals with manganese impurity, considering effects of antiferromagnetic exchange 09 p1424 A66-2007

Photoconductivity and p-n photoeffect in SiC single crystals excited by X-rays 09 p1425 A66-2018

Molybdenum single crystal dislocation redistribution and subgrain boundary formation during annealing at high temperatures 09 p1391 A66-2087

Metal oxide semiconductor /MOS/ transistors constructed on single crystal cadmium sulfide, noting transconductance, gate source, gate drain capacitance etc 09 p1360 A66-2098

High-temperature plastic deformation of single crystals, noting creep and dislocation 10 p1613 A66-2124

Frequency and temperature effects on dielectric properties of calcium, strontium and barium fluorides 10 p1577 A66-2156

Elastic constants obtained from longitudinal and transverse acoustic wave propagated in single-crystal indium phosphide 10 p1578 A66-2158

Magnetoresistance of crystalline beta-rhombohedral boron and amorphous boron film as function of magnetic field, temperature, specimen purity and crystal orientation 10 p1580 A66-2172

Spectral normal emittances of molybdenum, tantalum and tungsten single crystals 10 p1581 A66-2179

[AIAA PAPER 65-134] 10 p1581 A66-2179
Electrical conductivity of single crystals of calcium and strontium oxides 10 p1581 A66-2187

Phonon series in cadmium sulfide single crystal emissions at low temperature range 10 p1583 A66-2202

Thin film problems, discussing slow moving electron emission, electron penetration as function of energy level, etc 10 p1583 A66-2205

Quadratic electro-optical effect in paraelectric phase of barium titanate single crystals as affected by temperature 10 p1587 A66-2215

Inhomogeneity distribution in single crystal semiconductor, considering specific resistance and carrier lifetime by using volume gradient photoelectromotive force values 11 p1748 A66-22274

Neutron irradiation of InSb single crystals noting conductivity type change in p-type and conductivity magnitude in n-type crystals 11 p1749 A66-22281

Directional intensity and decay time of scintillations from anthracene and p-terphenyl single crystals under alpha particle bombardment 11 p1750 A66-2246

Reverse magnetization and energy of anisotropy of single crystal ferromagnetic films 11 p1754 A66-22811

Domain structure and reverse magnetization of single crystal nickel films 11 p1754 A66-22811

Coercive force of single crystal iron films with two-axial magnetic anisotropy 11 p1754 A66-22811

Magnetoresistance effect on p-and n-type cadmium antimonide single crystals for various arrangements of electric and magnetic fields 11 p1756 A66-23011

- High-temperature deformation of magnesia single crystals with /110/ tensile axis, favoring slip on systems with oblique sectors, related to observations on /001/ crystals 12 p1898 A66-23564
- Vanadium oxide single crystal growth by same solution and fusion, noting burner construction, crystal structure and techniques 12 p1899 A66-23565
- Hall effect and galvanic magnetoresistance measurements in single crystal /mercuric manganese/ telluride solid solutions 12 p1927 A66-23729
- Electric properties of antimony-doped stannic oxide in terms of optical mode lattice scattering 12 p1928 A66-23932
- Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 12 p1930 A66-24460
- Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 12 p1930 A66-24461
- Reflection measurements of RbI film in UV to observe optical property differences between films and single crystals 12 p1931 A66-24813
- Widmanstatten structure in titanium fluoride single crystals, noting effects of annealing at high temperatures and determining plane orientation on any surface 12 p1897 A66-24918
- Sputtering yields of copper single crystals as function of normally incident argon-ion energy 13 p2158 A66-25050
- Plasma oscillations in metallic single crystal films induced by fast electrons 13 p2139 A66-25330
- Radial solution growth of GaAs single crystal layers and analysis of photoluminescence spectrum 13 p2164 A66-25488
- Moving deposition zone technique for controlling nucleation and growth of silicon films on hexagonal silicon carbide substrates 13 p2164 A66-25491
- Surface orientation effect on twin accommodation in hcp metal magnesium and relation to twin boundary movement 13 p2107 A66-25585
- Single crystal silicon epitaxial growth on foreign substrates by chemical vapor deposition techniques, noting epitaxial geometry 13 p2113 A66-25648
- Stationary and kinetic determination of parameters of capturing recombination centers in CdS single crystals 13 p2166 A66-25686
- Silver salts effect on etching of germanium single crystals, noting photomicrographs of structural changes 13 p2169 A66-26584
- Magnetic hysteresis and switching property of manganese-bismuth thin magnetic films epitaxially grown by vapor deposition technique 14 p2355 A66-26913
- UV absorption and dispersion of cadmium sulfide crystals and energy band structure 14 p2356 A66-27064
- Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 14 p2357 A66-27071
- Polarization characteristics of oxidation electrochemical oxidation-reduction processes of metallic single crystals in acid chloride solution 14 p2322 A66-27311
- Faraday effect in rare earth garnet ferrites and metallic ion g values in IR spectrum 14 p2364 A66-27703
- Influence of p and n doping on electrification of dust of Ge monocrystals grown from zone-melted material 14 p2364 A66-27717
- Minority carrier drift mobility in p-type germanium single crystal under uniaxial lattice compression 14 p2365 A66-27758
- Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation 15 p2557 A66-28562
- Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 15 p2557 A66-28563
- Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 15 p2558 A66-28565
- High amplitude LF current and optical transmission oscillations in CdS single crystals under high electric field and monochromatic illumination near fundamental absorption edge 15 p2558 A66-28613
- Preparation, X-ray measurements and photovoltaic properties of Ge-epitaxial-PbS heterojunctions 15 p2562 A66-28710
- Anisotropy and annealing behavior in extrinsic single-crystal tellurium studied by measuring electric resistivity and Hall coefficient 15 p2562 A66-28725
- Gallium arsenide laser design using p-n junction obtained by diffusion of zinc in tellurium doped n-GaAs single crystal 15 p2514 A66-29057
- Optical reflection of gallium sulfide and gallium selenide single crystal 15 p2566 A66-29206
- Polarization and damping rate of emission lines of ruby single crystal in strong excitation 15 p2515 A66-29207
- Mechanical and metallurgical properties of tungsten single crystals useful in sheet rolling fabrication of complex components 15 p2523 A66-29286
- Absorption, excitation, and emission spectra of TI-activated NaI single crystals at liquid helium temperatures 15 p2566 A66-29347
- Diffraction pattern study of titanium single-crystal surface 15 p2566 A66-29389
- Stable microwave oscillations in single crystal Ge alloy p-n junction diodes 15 p2567 A66-29402
- Ultrasonic attenuation dependence on frequency in Pb crystals at low temperatures 16 p2770 A66-30179
- Phonon series in cadmium sulfide single crystal emissions at low temperature range 16 p2776 A66-30844
- Silicon, quartz and germanium single crystal density determined via hydrostatic weighting method 16 p2777 A66-30933
- Growth of single crystals of rare-earth fluorides for laser application, using hydrogen fluoride atmosphere, noting ion exchange purification 16 p2779 A66-31082
- Germanium single crystal whisker formation by iodide method of selective epitaxial growth 16 p2781 A66-31405
- X-ray diffraction analysis of single crystal silicon film grown on several natural faces of BeO by thermal decomposition of silane and hydrogen reduction of silicon tetrachloride 16 p2782 A66-31420
- Slip in single crystal tungsten deformed in tension at temperatures from 2500 to 5000 degrees F 16 p2725 A66-31453
- Annealing of lightly deformed columbium single crystals with parallel twins or parallel and intersecting twins 16 p2726 A66-31461
- Epitaxial growth of single crystal, impurity free metal films using clean alkali halide surfaces in ultrahigh vacuum 16 p2784 A66-31534
- Proper current input for true resistivity measurements of single-crystal silicon and silicon slices 16 p2785 A66-31596
- Electric conductivity of CdS single crystals in atmosphere, dry air, oxygen, water vapor, carbon dioxide and in transverse electric field 16 p2786 A66-31730
- Dark conductivity of cadmium sulfide single crystals as affected by contacts, voltage and transverse electric field 16 p2786 A66-31731
- Paramagnetic iron and chromium ion impurities effect on absorption spectrum and microhardness of rutile single crystals 16 p2786 A66-31733
- Expanded single crystal hetero-transitions in CdS-CdSe system 16 p2787 A66-31734
- Gamma radiation and fast neutron effects on dark resistance, photoconductivity, majority carrier mobility, recombination kinetics, etc, in CdS single crystal 16 p2787 A66-31765
- Indium arsenic antimonide single crystals in p-n junction laser 16 p2721 A66-31767
- Optical absorption and reflectivity of single crystals of strontium fluoride and cadmium fluoride in far UV 17 p2974 A66-31844
- Optical reflection of gallium sulfide and gallium selenide single crystals 17 p2982 A66-33055
- Polarization and damping rate of emission lines of ruby single crystal in strong excitation 17 p2936 A66-33056
- High temperature diffusion of potassium in single crystal and polycrystalline molybdenum 17 p2940 A66-33230
- Current-voltage characteristics peculiarities of fine cadmium sulfide single crystals with nonohmic contacts 17 p2986 A66-33311
- Radiation-induced electroconductivity and secondary emission in alkali halide single crystals under positive ion bombardment 17 p2988 A66-33458
- Crystallographic polarity dependent rectification in ZnS single crystals 18 p3153 A66-33610
- Beryllium single crystal plasticity increased due to preprogrammed load 18 p3124 A66-34404
- Magnetic properties of lattice imperfections in lithium fluoride, potassium chloride and sodium chloride single crystals 18 p3157 A66-34499
- Sputtering yields of various semiconducting single crystals under argon ion bombardment 19 p3436 A66-35420
- Magnetization curve and magnetic hysteresis of ferromagnetic single crystals 19 p3439 A66-35715
- Quadratic electro-optical effect in paraelectric phase of barium titanate single crystals as affected by temperature 19 p3440 A66-35767
- Measurements on physical and laser properties of vapor-grown ruby single crystals prepared by epitaxial growth 19 p3375 A66-36081
- Absorption, excitation, and emission spectra of TI-activated NaI single crystals at liquid helium temperatures 20 p3615 A66-37352
- Adsorption of lithium on /110/, /111/ and /112/ planes of single-crystal tungsten in field-emission projector, measuring work function dependence on concentration 20 p3618 A66-37558
- Dislocation-induced relaxation in silicon single crystals by measuring internal friction and Youngs modulus at temperatures from 77 to 300 degrees K 20 p3618 A66-37561
- Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 20 p3620 A66-37692
- Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 20 p3620 A66-37693
- Whisker composite materials, discussing potential of whiskers, utilization of whisker strength, whisker growth, handling whiskers and composite properties 20 p3588 A66-38183
- Fast-neutron irradiation effects on photoconductivity spectra and induced crystal structure defects for n-and p-type gallium arsenide single crystals 20 p3624 A66-38415
- High temperature tensile deformation of polycrystalline magnesia prepared by single-crystal recrystallization and hot pressing 21 p3753 A66-38592
- Cryogenic optically excited recombination emission in single crystal InSb semiconductor and transitions involving phonon creation, acceptor impurities and band-to-band emissions 21 p3800 A66-38996
- Preferential formation of peaks of single-crystal silicon and germanium samples exposed to short-duration electron beam 21 p3801 A66-39117
- Photoconductive and luminescent behavior of undoped cadmium sulfide single crystals at room temperature under laser excitation 21 p3748 A66-39165
- Photomicrographs of pressure crack figures on silicon single crystals at room temperature 21 p3803 A66-39291
- IR absorption, reflectivity and transmission in n-type gallium arsenide single crystals at room temperature due to impurities and high carrier concentration 21 p3805 A66-39580
- Existence of twins in single crystalline films of barium titanate, obtaining electron diffraction patterns 21 p3805 A66-39581
- Reflectance measurement of barium titanate single crystal as function of temperature 21 p3805 A66-39583
- 1.60 micron stimulated and spontaneous emissions from epitaxial single crystals in quasi-binary III-V compound semiconductor

diodes of injection lasers at 77 degrees K 22 p3930 A66-39750

Gallium arsenide crystal properties for use in optical filter 22 p3959 A66-39773

Atom ejection patterns for sputtering of semiconductor single crystals 22 p3963 A66-40090

Energy spectrum of levels appearing in silicon single crystals irradiated by integral fluxes of fast electrons, neutrons and gamma quanta 22 p3964 A66-40193

Deformation of aluminum single crystals during constant load tensile test 22 p3935 A66-40201

UV absorption and dispersion of cadmium sulfide crystals and energy band structure 22 p3966 A66-40823

Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 22 p3966 A66-40829

Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation curve 23 p4112 A66-41283

Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 23 p4112 A66-41284

Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 23 p4112 A66-41286

Specific heat measurements and cryogenic thermodynamic properties of single crystal V in mixed state under 12 different magnetic fields 23 p4080 A66-41372

Magnetostriction constants measured at room temperature for YIG single crystals after replacing fraction of iron ions by silicon 23 p4114 A66-41626

Tensile testing method for tungsten and molybdenum single crystals 24 p4210 A66-42221

Autoradiography used to determine dislocation density in germanium, silicon and copper single crystals, with aid of tagged atoms 24 p4257 A66-42535

Electro-optic modulators for IR region 0.9 to 16 microns constructed by using large single crystals of high resistivity gallium arsenide 24 p4258 A66-42957

SINGLE-SIDEBAND DEMODULATION

Single sideband signal demodulation via envelope detection yields distortionless reception for minimal carrier component and special processing circuitry 13 p2020 A66-25148

SINGLE-SIDEBAND MODULATION

Circuit analysis of reduction of intermodulation distortion generated in high power coupled cavity traveling-wave tubes for single sideband frequency division multiplex transmitters 04 p0498 A66-14035

Quadrature modulation single-sideband circuit as frequency translating two-port, comparing performance with conventional modulator-with-SSB filter 07 p1015 A66-17746

Light modulation at microwave frequencies noting single-sideband suppressed-carrier modulation, traveling wave modulation, etc 07 p1003 A66-18328

Modulation theory, discussing phase-envelope relation for band limited wave in terms of Fourier series 14 p2234 A66-27032

Models of hybrid AM-PM signal modulated by single sinusoid and having one-sided frequency spectrum described by using MacLaurin series expansions, noting phase relation of sidebands to carrier 14 p2235 A66-27061

Single-sideband FM for data transmission on vibration and acoustic measurements, noting SNR performance, transmission link, etc 21 p3706 A66-39479

SINGLE-SIDEBAND RECEIVER

Doppler frequency shift and effect on single-sideband HF communication systems for supersonic transport 07 p1001 A66-17699

VHF overlay transistor for lightweight single-sideband equipment, noting design, output and efficiency 13 p2035 A66-25510

SINGLE-STAGE ROCKET

Calculation method for pinpointing design characteristics and performance parameters of sounding rockets 09 p1464 A66-20543

Relation between weight, drag and cost of single trip single-stage glider 23 p4016 A66-41789

SINGULAR INTEGRAL EQUATION

Singular integro-differential equations with small parameter and corresponding degenerate equations 02 p0251 A66-12244

Singular integral equations solved approximately by mechanical quadrature method 03 p0388 A66-12711

Strong and intensified representability of 2pi-periodic function with singular integral 05 p0708 A66-15308

Cauchy problem for hyperbolic singular convolution-type integral equation 05 p0708 A66-15320

Algebra of singular integral operators, discussing action on Hilbert space and homomorphism 06 p0901 A66-16008

Index problem for systems of singular integral equations 06 p0904 A66-17044

Dual-operator Stieltjes integral 08 p1245 A66-19630

Monograph on potential methods in the theory of elasticity, basing boundary value solution on theory of singular integral equations 09 p1466 A66-20332

Qualitative behavior and index of trajectories in neighborhood of isolated singularity of given form 09 p1363 A66-20799

Thermoelasticity equations describing harmonic vibrations of medium solved via singular integral equation 14 p2408 A66-28390

Singular integral equations for thermoelasticity equations describing harmonic oscillations of medium, applied in boundary value problems 15 p2611 A66-29419

Elliptic singular integro-differential operators on smooth compact manifold without and with boundary 21 p3756 A66-38626

Boundary value problem for equation of mixed type with two intersecting parabolic lines of degeneration, reducing it to integral equation with solution in half-plane 21 p3758 A66-39613

SINGULARITY /MATH/

Spectral functions of generalized second-order differential equations with boundary conditions at singular end 03 p0388 A66-13115

Singular perturbation for mixed Cauchy problem relative to equation with second-order partial linear hyperbolic derivatives 05 p0708 A66-15094

Asymptotic solutions of second-order ordinary differential equations in region containing irregular singularity of rank one, with application to Whittaker functions 05 p0710 A66-15475

Asymptotic solutions of second-order differential equations having irregular singularity of arbitrary rank 05 p0710 A66-15476

Removable singularities in multidimensional minimal hypersurfaces in compact space 07 p1057 A66-17837

Integral curves described by nearly homogeneous differential equation and behavior in neighborhood of singular point 07 p1057 A66-17854

Operations in vector analysis applied to velocity field of image point in phase plane, establishing stability criterion for singular points 09 p1361 A66-20436

Position of singularities of analytic continuation of potential /geophysical/ fields 09 p1373 A66-20480

Numerical solution of Fredholm integral equation with singularities and application to annular airfoil theory 09 p1396 A66-20626

Singular solutions in optimal control problems, treating singular control surface, flooding technique and allowable switching directions 09 p1362 A66-20653

Qualitative behavior and index of trajectories in neighborhood of isolated singularity of given form 09 p1363 A66-20799

Analogy between systems of differential equations in vicinity of singular point 10 p1549 A66-21234

Hypergeometric solutions of second-order linear ordinary differential equation with n-regular singular points 10 p1550 A66-21305

Integral curves of particular ordinary differential equation containing singularity 11 p1721 A66-22642

Theoretical and machine aspects of ignoring singularity in approximate

integration, relating uncertain cases diophantine approximation 11 p1722 A66-22298

Maximized elliptic equations, Dirichlet problem, distance function solution, maximum principle, removable singularity, etc 12 p1905 A66-2444

Transformations for study of nonlinear systems behavior in neighborhood of phase plane infinity 13 p2054 A66-2600

Variational problem of Lagrange with inequality, analyzing splitting of extremal dead-end, entry and exit from boundary etc 13 p2120 A66-2610

Monograph on direct methods of qualitative spectral analysis of singular differential operators 14 p2319 A66-2680

Position, number and type of potential scattering amplitude as function of complex momentum transfer 14 p2330 A66-2700

Thermokinetic transcendental equation for heat flux through three juxtaposed walls and handling of singularity difficulties [PST PAPER NT-148] 14 p2414 A66-2780

Linear integral operators applied to singular differential equations and computations of compressible fluid flows 16 p2683 A66-3020

Singularities of solutions of nonlinear hyperbolic equations of order greater than unity 17 p2946 A66-3230

Van Hove diagonal singularity condition for free electrons in periodic lattice impurity field 17 p2959 A66-3320

General maximum principle and removable singularities, discussing case of arbitrary linear set of positive linear measure for which principle does not hold 18 p3128 A66-3466

Plasma waves at singular turning points 18 p3150 A66-3490

Poincare-Liapunov systems of ordinary differential equations, qualitatively investigating plane and rough systems singular points, periodic solutions, etc 18 p3128 A66-3490

Position of singularities of analytic continuation of potential /geophysical/ fields 19 p3345 A66-3542

Singularities of temperature dependence of electric resistivity of aluminum at helium temperatures 19 p3382 A66-3607

Analogy between systems of differential equations in vicinity of singular point 19 p3389 A66-3618

Boundary value problem of wave equation with application to antenna theory of singular integral equations 20 p3531 A66-3773

Class of nonlinear second-order differential equations with algebraic moving singular points, considering convergent series inversion and existence conditions 20 p3591 A66-3775

Singularities in universe, discussing properties of space-time continuum, matter and Einstein equations for strong fields 21 p3771 A66-3926

Singularities in closed universes, discussing closed solutions to Einstein equations and inevitability of singularity, based on Hawking theorem 21 p3771 A66-3926

Elimination of singularity in power radiated by point electric dipole in unbounded magnetoplasma within certain frequency range 24 p4241 A66-4237

Singularities of cosmological solutions of gravitational equations for space filled with matter 24 p4274 A66-4252

Single second-order oblique derivative problem with elliptic operator 24 p4232 A66-4283

SINK

SA HEAT SINK

Ringleb theory on snow-cornice-like flow analyzed, including arguments on representation of real fluid flows and mode of step-sink flow [ASME PAPER 65-WA/FE-11] 05 p0664 A66-1567

SINTERED ALUMINUM POWDER

Manganese oxide effect on kinetics and mechanics of sintering of alumina powders compacts 08 p1243 A66-1877

Book on mechanical working of light alloys 14 p2302 A66-2819

Stamping behavior of clad sintered aluminum powder /SAP/ sheet, obtaining

- efficients for permissible bending, 14 p2303 A66-28193
- lawing and flanging, noting cold working possibilities 14 p2303 A66-28193
- structure and mechanical properties of sintered aluminum clad products obtained from SAP, noting microstructural 14 p2303 A66-28194
- variations in amount and composition of oxide phase during sintering of compacted aluminum powder, determining aluminum oxide in SAP products 14 p2303 A66-28195
- seizing effect at interfaces SAP-SAP and Al-Al, noting optimum thermomechanical conditions 14 p2303 A66-28196
- individual structural elements connected to nondetachable structures, using seizing phenomena, experimenting with sintered aluminum powder 14 p2303 A66-28197
- elements 14 p2303 A66-28197
- sintered aluminum powder endurance under bending stresses and cladding effect on fatigue resistance 14 p2318 A66-28198
- surface and internal structural formation mechanism of metallic contact from plastic formation of SAP type alloys under impression 15 p2520 A66-28750
- Electrical discharge machining of sintered aluminum powder with different alumina content 18 p3116 A66-34061
- Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884
- ENTERING
- Sintered Kh20N80 nichrome powder properties and preparation by simultaneous reduction of chromium and nickel oxides 01 p0087 A66-10746
- High temperature dilatometer for shrinkage measurements in sintering of powdered metal compacts 01 p0069 A66-10748
- Densification rates for tungsten powder compacts sintered in hydrogen/bromine atmospheres compared with those sintered in hydrogen alone at high temperatures 03 p0385 A66-13207
- Lunar dust layer with protons in solar wind displacing atoms in grains, thus sintering dust through diffusion into porous structure 03 p0429 A66-13338
- Porous materials by sintering powdered carbides and borides of transition metals 04 p0535 A66-13437
- Accelerated cooling of ferritic-martensitic steel and ferritic steel after sintering, combined with additional heat treatment, increases strength and corrosion resistance 06 p0896 A66-16690
- Long high-porosity sintered tubes produced from nonspherical stainless-steel powders 06 p0896 A66-16691
- Deformability of porous sintered materials in tension, examining properties of dense materials, variation in number of pores, pore shape and material loosening during loading 06 p0897 A66-16692
- Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 07 p1049 A66-17901
- Powder metallurgy development of sintered alloys of magnesium with MgO and magnesium-beryllium alloys with high oxidation resistance 10 p1544 A66-21200
- Survey and updating properties available in commercial sintered metals, relating them to engineering design requirements 11 p1716 A66-22538
- Heating unit of device for testing small samples of sintered materials for thermal fatigue 11 p1709 A66-23475
- Piezoelectric constants of polycrystalline ferroelectrics of barium titanate type, noting dependence on ceramic sintering temperature and applied constant voltage 13 p2160 A66-25099
- Shrinkage process in zirconium diboride during sintering, noting variation with length of isothermal processing 14 p2310 A66-26789
- Carbide-graphite skeleton materials prepared by sintering compressed graphite powder during thermochemical treatment with carbide-forming elements 15 p2524 A66-28751
- Structural, physical and mechanical properties of hard alloys formed by sintering powdered VK 15 tungsten carbide alloy with nonuniformly distributed carbide phase 15 p2520 A66-28753
- Compression and bending strength of porous materials prepared by sintering spheroidized powder refractory compounds increased by addition of cobalt chloride 15 p2520 A66-28755
- Microscopic structure of sintered silicon carbide mechanism of material transport and effect of nitrogen doping 16 p2729 A66-30245
- Kinetics of alloy formation in sintered tungsten-rhenium powder 16 p2725 A66-31455
- compacts 16 p2728 A66-31673
- Sintering of porous products of refractory compounds 16 p2728 A66-31673
- Pressing of two-component sintered materials 16 p2728 A66-31676
- Powder metallurgy methods for obtaining products of complex form from sintered carbides 16 p2715 A66-31679
- Grain growth from solution precipitation and grain coalescence in liquid phase sintering of W-Ni-Fe and W-Ni-Cu alloys 17 p2939 A66-32393
- Snow runway construction, discussing physical characteristics of snow, mechanical properties related to supporting capacity temperature effect, etc 17 p2904 A66-32933
- Sintered Kh20N80 nichrome powder properties and preparation by simultaneous reduction of chromium and nickel oxides 18 p3124 A66-34982
- Permeability of porous sintered tungsten depends on density of specimen and particle size of tungsten powder 19 p3382 A66-36121
- Porous materials by sintering powdered carbides and borides of transition metals 20 p3586 A66-38139
- Fatigue endurance limits for sintered alloys in various density ranges [ASME PAPER 66-MD-77] 21 p3822 A66-38502
- Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 21 p3752 A66-39401
- Ultrasonic activation effect on sintering and hot extrusion processes and compaction products made from metallic powders 23 p4075 A66-41827
- Porous materials prepared from carbides, borides and silicides of refractory metals by oxidation reduction method, with simultaneous sintering of resulting active particles 23 p4075 A66-41828
- SINUS
- S CAROTID SINUS REFLEX
- SINUSOID
- Single shot transient analyzer /waveform synthesizer/ generating sinusoids with real and imaginary parts 12 p1838 A66-24598
- SIREN
- Spectrum shaping of noise generated by broadband siren is possible by introducing air by-pass system and changing rotor shape 01 p0052 A66-10145
- Broadband siren spectrum test facility including acoustic chamber, horn network, siren, air supply, instrumentation and controls 01 p0052 A66-10146
- Programming method for determining modulation parameters required to change siren sine wave output to random Gaussian noise 01 p0053 A66-10147
- SITE
- S LANDING SITE
- S LAUNCH SITE
- SIZE
- S DROP SIZE
- S PARTICLE SIZE
- S PUPIL SIZE
- SIZE PERCEPTION
- Specification of stimulus conditions for visual space perception in terms of monocular and binocular cues 04 p0462 A66-13795
- SKELETON
- S BONE
- S RIB
- SKIMMER
- Electron beam flow visualization study of density field about skimmer entry in small free jet 21 p3727 A66-39186
- SKIN
- S STRESSED-SKIN CONSTRUCTION
- S STRUCTURAL MATERIAL
- SKIN/BIOLOGICAL
- S TACTILE DISCRIMINATION
- SKIN FRICTION
- Injection on surface friction and on parameters of turbulent boundary layer, noting semiempirical Prandtl theory 04 p0509 A66-13655
- Integral approximations for skin friction and heat transfer in MHD channel flow [ASME PAPER 65-HT-15] 05 p0783 A66-14739
- Pressure distribution and skin friction measurements confirming that effects of changing base flow conditions decay with distance upstream along airfoil surface 06 p0801 A66-15999
- Pressure gradient effect on stability of laminar boundary layer when skin friction at wall vanishes, noting Reynolds number of flow 06 p0874 A66-16999
- Mass transfer method for measuring skin friction from isothermal adiabatic leading-edge flat plate in compressible laminar airflow with negligible pressure gradient 07 p0980 A66-17943
- Coolant injection in turbulent boundary layer for protection of surfaces from effects of high temperature and high energy gas flows 08 p1320 A66-19429
- Forced convection problem for steady fully-developed laminar flow in straight channel when fluid properties are functions of temperature 09 p1366 A66-20175
- Laminar fully-developed flow of water between parallel flat plates examined, using motion equation with experimental values for viscosity, conductivity, specific heat and density 09 p1470 A66-20179
- Boundary layer effect on lift and drag characteristics of hypersonic lifting bodies 10 p1480 A66-21409
- Velocity profiles in point-to-point mapping of compressible turbulent boundary layers into constant density flows 10 p1523 A66-21769
- Prestressing of skin effect on strength and durability of riveted weld tested under static, repeated static and vibrational loads 11 p1782 A66-22855
- Mean and dynamic skin friction, separation and transition in low-speed laminar and turbulent flow measured by thin-film heated element 11 p1693 A66-23013
- Correlation for boundary layer transition on sharp slender cones with heat transfer, using wind tunnel and free flight data 12 p1799 A66-24708
- Saturated and surface film boiling from horizontal isothermal plate in longitudinal flow field analysis, based on two-phase boundary layer theory, correlating heat transfer and skin friction characteristics 12 p1980 A66-24908
- Foreign planetary atmospheric effect on hypersonic laminar stagnation region heat transfer and skin friction studied for various dissociating gases 13 p1993 A66-26729
- Laminar boundary layer in oscillatory flow along infinite flat plate with variable suction 16 p2686 A66-31107
- Skin friction methods compared for problem of turbulent compressible boundary layer on flat plate at hypersonic Mach numbers 16 p2686 A66-31118
- Flow field, pressure drop and friction factor characteristics of turbulent flow in eccentric annular ducts 16 p2690 A66-31656
- Pressure distribution, skin friction and heat transfer for sharp-and blunt-nosed slender bodies in hypersonic air flow 17 p2837 A66-32070
- Lift-to-drag ratio attainable by slender, homothetic body at hypersonic speeds, assuming Newtonian pressure distribution and constant skin-friction coefficient 17 p2838 A66-32348
- Hypersonic wind-tunnel test program giving data on turbulent boundary layer with mass addition including Mach number effect on heat transfer and skin friction reduction and massive blowing 17 p2839 A66-32477
- Elasticoviscosity and cross viscosity of second-order fluid effects on advancement over infinite flat plate 17 p2912 A66-32981
- Average pressure and skin friction on slender two-dimensional wings in hypersonic flow, taking into account displacement effects of boundary layer 18 p3048 A66-33823
- Skin friction coefficient predictions in turbulent compressible flow, using design nomograph based on Spalding-Chi method 18 p3100 A66-34603

Skin friction drag of power law fluids in turbulent flow over flat plate shown as function of non-Newtonian Reynolds number and shear rate exponent 20 p3545 A66-37507

Wall flow analysis of logarithmic velocity profile of turbulent boundary layer with zero skin friction throughout region of pressure rise 21 p3729 A66-39449

Boundary layer equation solution along vertical hot plate for constant plate temperature, noting use of Blasius technique 21 p3837 A66-39590

Compressible turbulent boundary layer on flat plate, noting correspondence between compressible and incompressible flow, numerical results on skin friction and heat transfer, etc 22 p3899 A66-40344

Cooled blades in gas turbines allowing use of higher gas temperatures and necessitating calculation of heat transfer and skin friction coefficients 22 p3999 A66-40492

Local skin friction coefficients in turbulent boundary layers determined by technique based on wall turbulence theory 23 p4054 A66-41207

Optimization of lift-drag ratio of power law half-bodies in hypersonic viscous flows, considering interrelation between body shape and skin friction 23 p4012 A66-41915

Approximate Navier-Stokes equations for viscous flow conditions near trailing edge of flat plate 23 p4059 A66-42001

Boundary layer solutions to two-dimensional stationary viscous incompressible flow past finite object under vanishing skin friction 23 p4060 A66-42009

Motion equations, shear stress and skin friction for three-dimensional flow in conical pipes 23 p4014 A66-42062

Displacement detector to provide direct measurement of shear forces in aerodynamics on small surface elements in hotshot wind tunnels 24 p4207 A66-42169

Regular solutions of laminar boundary layer equations near point of vanishing skin friction, calculating pressure gradient 24 p4194 A66-42413

Similarity solutions of boundary layer equations for blowing through porous surface, obtaining skin friction 24 p4194 A66-42541

Compliant surface effects on skin friction reduction in turbulent flow in open-circuit wind tunnel 24 p4195 A66-42796

SKIN FRICTION DRAG

Critical and limit roughnesses and techniques of visualization and transition fixing in Modane wind tunnel 02 p0216 A66-11207

Optimum slender body with variable skin friction coefficient, noting minimal drag design for hypersonic flow under Newtonian pressure distribution 11 p1631 A66-22513

Turbulent flow intensity measured in turbulent wake of small fence along flat plate covered with flabby skin, for analysis of drag reduction in aerodynamics 13 p2063 A66-25598

Transition delay and skin friction drag reduction by considering boundary layer flow over flexible aerodynamic surface [AIAA PAPER 66-430] 16 p2688 A66-31466

SKIN TEMPERATURE

Radio beacon telemetry system for measuring orbital performance of Echo II satellite, including internal pressure and skin temperature 01 p0032 A66-11125

Heat transfer rate to simulated skin, discussing power input determination from temperature rise [ASME PAPER 65-HT-33] 05 p0627 A66-14749

Skin-heating temperature required to eliminate buckling of airframe occurring during spot electrical contact welding 09 p1384 A66-20764

Heat transfer rate to simulated skin, discussing power input determination from temperature rise [ASME PAPER 65-HT-33] 16 p2643 A66-30984

Thermal design concept applied to metal skin of artificial satellite, based on uniform-skin-temperature/lumped-heat-mass method 19 p3467 A66-35352

Pyroelectric heat-transfer sensor performance compared with thin skin thermocouple heat sensors, noting discrepancy in measurement results in severe environment 24 p4207 A66-42177

Skin temperature rate reentry guidance and control system using thermocouple sensors and operating in manual or automatic mode 24 p4235 A66-42765

SKIN TEMPERATURE /BIOL/SA TEMPERATURE CONTROL

Personal thermal conditioning system emphasizing heat exchange between body and environment to provide comfort with water-cooled protective clothing 02 p0188 A66-12012

Thermal balance and heat exchange between four men exposed to helium-oxygen atmosphere at 380 mm Hg total pressure 16 p2639 A66-31122

Harness-mounted temperature sensor for prolonged monitoring of human skin temperature 16 p2643 A66-31128

Effective thermal radiation surface of humans subjected to omnidirectional radiation 16 p2645 A66-31806

Mathematical solution for expressing comfort level of man in gas-cooled space suit and space cabin, noting environmental parameters 17 p2863 A66-32142

Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164

Quantitative IR radiometric skin temperature measurements, using simple radiometer and method for measuring surface temperature of forearm and hand 20 p3507 A66-38418

SKUA ROCKET

Skua Meteorological Rocket and use for temperature and wind data 07 p1141 A66-18335

Skua Meteorological Rocket program including analysis of stratospheric winter circulation and spring reversal and temperature soundings on Outer Hebrides 07 p1063 A66-18336

SKY

S NIGHT SKY

SKY BRIGHTNESS

SA AIRGLOW

Photoelectric measurements of twilight sky brightness and polarization and correction of measured values 01 p0138 A66-11103

Radiation transport in optically thick medium where natural wings of lines are important and 1304 OI triplet in upper atmosphere 02 p0282 A66-11501

Diffuse day skylight intensity rocket measurements, discussing exponential variation of intensity with height in upper atmosphere 05 p0668 A66-14916

Photometric measurements of twilight brightness for upper atmospheric temperature determination 05 p0674 A66-15528

Interplanetary dust particles, size distribution, mass density, structure and shape 05 p0767 A66-15752

Sky brightness and cosmic radio emission in satellite Ariel II 05 p0769 A66-15842

Interpretation of some particular features in brightness distribution of twilight sky 06 p0876 A66-16554

Sky scanner to record luminance distribution over entire sky vault 06 p0883 A66-16948

Light polarization of twilight and daytime sky at various wavelengths, using telescope-polarimeter system with various color filters 08 p1217 A66-19335

Atmospheric optics noting attenuation, reflectance, flux and optical radiation 09 p1398 A66-20274

Dayglow at 6300 and 3914 angstroms from rocket soundings and roles of ion recombination and UV dissociation 09 p1374 A66-20887

High altitude visual flight environment, discussing sky brightness, instrument and runway lighting, visual fields, eye protection, etc 10 p1494 A66-22131

Tropospheric component of twilight brightness determined from observations of intensity and polarization of sky at two symmetrical points of solar vertical 12 p1867 A66-23511

Three-color photometric study of atmospheric extinction by dust particles from lunar eclipse photoelectric measurements of Mare Crisium

region 13 p2185 A66-2581

Galactic low RF background radiation spectrum and measurements of sky brightness temperature 14 p2383 A66-2770

Short-lived oscillation in light emitted in active aurora 14 p2286 A66-2798

Interpretation of some particular features in brightness distribution of twilight sky 14 p2289 A66-2822

Fast auroral waves differ from flaring aurora in which waves of luminosity appear to converge toward magnetic zenith 15 p2484 A66-2882

Spectral distribution changes occurring in diffuse skylight at zenith in visual region during total solar eclipse, using photoelectric spectrometer 15 p2484 A66-2883

Sky luminance distribution for upper and lower sky at various levels 15 p2484 A66-2883

Atmospheric optical properties and directional reflectances of ocean water and other surfaces, for unobscured low Sun 15 p2531 A66-2883

Gegenschein brightness near 5300 angstroms deduced from photoelectric measurements finding no long period variations, no correlation with airglow, solar flares, etc 16 p2800 A66-30659

Determination of radio brightness distribution across sky dependent upon conditions of radio telescope operation 17 p2999 A66-32236

Overcast sky luminances above snow covered terrain and directional luminous reflectance of backgrounds and objects under overcast skies 17 p2948 A66-32612

Anomalous brightness of post-twilight evening sky in near IR, considering zodiacal light 17 p2920 A66-32998

Spectral energy distribution and chromaticity coordinates of north sky at Delhi 18 p3105 A66-33996

Pencil-beam radio telescope operating at 178 megacycles which uses aperture synthesis to obtain precise right ascension and declination, noting profiles of sample region of sky 18 p3087 A66-34572

Linear polarization and relative intensity variations of skylight measured with aircraft-mounted telephotopolarimeter during solar eclipse 19 p3349 A66-36346

Book on atmospheric optics of twilight phenomena 19 p3394 A66-36732

Tropospheric component of twilight brightness determined from observations of intensity and polarization of sky at two symmetrical points of solar vertical 20 p3549 A66-37024

Radio astronomy measurements requiring absolute intensity calibrations, noting flux densities and measurements of very dark areas of sky 21 p3815 A66-39484

Coronal emission lines in presence of strong sky background utilizing difference between gradients of line and sky intensities 21 p3816 A66-39554

Astronaut observation in Gemini and Mercury space flights that stars cannot be seen in daytime, noting first-magnitude stars and background 22 p3982 A66-40523

Daytime sky brightness relationship to atmospheric anisotropic light scattering 22 p3917 A66-40960

Photoelectric skylight perimeter for Stokes parameter measurements in plane polarized light 23 p4066 A66-41029

Absorption and brightness temperature variations of atmosphere on basis of statistical characteristics of vertical temperature and humidity structures 23 p4087 A66-41802

Multiple air scattering in mesosphere as function of zenith distance of Sun and brightness of twilight sky 23 p4087 A66-41803

SKY RADIATION

SA PYRANOMETER

Influence of absorption of aerosol particles on extinction of solar and sky radiation 02 p0225 A66-12214

Sky survey in two IR spectral ranges, obtaining unbiased census of objects emitting in atmospheric window 04 p0575 A66-13399

Diurnal variation of zodiacal light at north celestial pole measured at 5300

agstroms 09 p1374 A66-20891
 polar and sky radiation and short wave
 bedo measured at altitudes approaching
 000 ft in high
 malayas 11 p1765 A66-23384
 mple polarization callibrator based upon
 larization of specularly reflected light,
 amining theory, design and
 rformance 19 p3354 A66-35381
 thermal energy Ar charge transfer
 actions measured in pulsed-discharge
 owing-afterglow system with mass
 etrometer detection 22 p3860 A66-39927
 K WAVE
 Loran C navigational system considering
 y waves and future of Loran D
 system 02 p0258 A66-12043
 Long-term geomagnetic influence on
 medium frequency nighttime sky wave field
 strength 09 p1341 A66-19916
 Cardiod whip-loop receiving antenna
 system using only passive circuitry to bring
 normal and abnormal components of VLF
 y waves into phase with each
 other 22 p3872 A66-39732
 DROL
 ESTER
 PHOSPHATE

 WHAWK AIRCRAFT
 A-4 AIRCRAFT
 WLARK ROCKET
 Space research activities in United
 Kingdom during 1964 and early
 65 09 p1459 A66-20725
 Skylark rocket describing stabilization
 system and flight test 10 p1610 A66-21086
 LF ionospheric measurement of
 mmitances of three orthogonal short
 poles, noting impedance variation with
 spect to frequency attitude and
 ltage 15 p2493 A66-30038
 Solar alignment system for Skylark rocket
 attitude control, describing system
 omposition, operation and
 results 18 p3243 A66-33856
 Molecular diffusion coefficient calculated
 a 130-200 km region from time variation of
 adiance distribution from glow clouds
 roduced by grenade
 etonation 21 p3734 A66-39339
 Skylark upper atmosphere research
 ounding rocket, unguided vehicle powered
 y Raven solid propellant rocket
 motor 23 p4132 A66-41169
 Rocketborne RF electron density probe for
 ionospheric profile
 etermination 23 p4064 A66-41683
 ANT PERCEPTION
 Microwave phase-measuring distance-
 etermining system /SHIRAN/ enabling
 valuation of slant ranges from airplane to
 our transponders located at ground
 control 02 p0227 A66-11378
 ED
 ROCKET SLED
 EEP
 Urinary excretion of 3-methoxy-4-
 ydroxymandelic acid during dreaming sleep
 a man 16 p2638 A66-30635
 Biochemical experiments aimed at
 explaining rapid eye movement sleep
 REMS/ 16 p2641 A66-31399
 Electrophysiological study of pituitary-
 adrenal axis activation during rapid eye
 movement /REMS/ in human urology
 atients 17 p2859 A66-32305
 Human behavioral effects during 56-day
 xposure to oxygen-helium atmosphere at
 58 mm Hg total pressure, presenting
 emperature, psychomotor and sleep
 performances 18 p3061 A66-33780
 Human dreaming sleep and correlated
 anges in urine volume and
 smolality 19 p3285 A66-36065
 EEP DEPRIVATION
 Human stress reactions to three-day march,
 eep deprivation, food and oxygen
 arvation, noting changes in central nervous
 ystem functions 04 p0467 A66-14080
 Sleep restriction effects, discussing
 lectroencephalographic measurement
 results 06 p0812 A66-16733
 Sleep deprivation in rats induced by
 njections of dextroamphetamine or forced
 eadmill activity resulted in temporary
 ncrease in daily sleep
 me 22 p3855 A66-40481

SLENDER BODY

Incompressible laminar axisymmetric near
 wake behind very slender cylinder in axial
 flow 02 p0175 A66-11527
 Drag reduction measurements on porous
 cylindrical bodies with blunt nose and tail
 sections, using area suction
 [AIAA PAPER 65-561] 02 p0175 A66-11564
 Text on aerodynamics of wings and bodies,
 emphasizing matched asymptotic expansion
 methods for boundary value problems and
 numerical techniques for loading predictions
 via computers 03 p0313 A66-12297
 Pressure distributions on cambered bodies
 of arbitrary cross section at angle of attack
 applied to transport fuselage afterbody
 design
 [AIAA PAPER 65-718] 03 p0314 A66-12543
 Head-on interaction of plane shock wave
 and supersonic cone-cylinder
 body 03 p0316 A66-12812
 Flow past slender bodies of revolution or
 low aspect ratio wings with finite span or
 cross-sectional area 04 p0454 A66-13517
 Pressure coefficient of accelerating slender
 body in terms of body geometry and Mach
 number for velocity potential, using acoustic
 theory
 [ASME PAPER 65-WA/APM-28] 05 p0607 A66-15449
 Longitudinal and transversal contours
 minimizing drag of slender homothetic body
 in hypersonic flow with Newtonian pressure
 distribution and constant skin-friction
 coefficient 06 p0802 A66-16911
 Hypersonic gas flow past axisymmetric
 slender blunt body by Chernyi approximate
 method 07 p0983 A66-18142
 Slender bodies with minimum inviscid
 pressure drag derived, using hypersonic
 small disturbance approximation to shock
 expansion method
 [AIAA PAPER 66-129] 07 p0984 A66-18463
 Simple analytical method for calculating
 stream functions in three-dimensional steady
 flow past slender bodies 08 p1166 A66-19827
 Newtonian flow model minimization of
 pressure drag of slender axisymmetric two-
 dimensional body subjected to isoperimetric
 constraints 11 p1631 A66-22511
 Drag minimization in slender bodies of
 revolution in hypersonic flow with
 Newtonian pressure
 distribution 11 p1631 A66-22512
 Optimum slender body with variable skin
 friction coefficient, noting minimal drag
 design for hypersonic flow under Newtonian
 pressure distribution 11 p1631 A66-22513
 Transversal contour of minimum pressure
 drag for body with noncircular cross
 section 11 p1631 A66-22517
 Transversal contour of minimum total drag
 of body in Newtonian
 flow 11 p1631 A66-22518
 Total drag minimization for three-
 dimensional body in Newtonian flow,
 assuming two planes of symmetry and
 constant skin-friction
 coefficient 11 p1632 A66-22520
 Slender shapes of minimum pressure drag
 in hypersonic inviscid flow characterized by
 Newton-Busemann law 11 p1632 A66-22522
 Flow field around minimal-drag slender
 body examined by Newton-Busemann theory
 and gas dynamic theory 11 p1632 A66-22524
 Optimum minimal-drag shape of slender
 axisymmetric body in free molecular
 flow 11 p1632 A66-22526
 Inviscid unsteady flow field disturbances
 caused by blast-generated normal shock
 wave sweeping past slender wedge moving
 at hypersonic speed 12 p1795 A66-23577
 Generalization of Allen-Kelley slender body
 theory to obtain estimates of two cubic
 nonlinear aerodynamic damping
 terms 12 p1795 A66-23593
 Simplified Navier-Stokes equations for
 steady hypersonic viscous flow past slender
 shapes with sharp leading
 edges 12 p1796 A66-23613
 Pressure coefficient of accelerating slender
 body in terms of body geometry and Mach
 number for velocity potential, using acoustic
 theory
 [ASME PAPER 65-WA/APM-28] 12 p1797 A66-23968
 Hypersonic viscous interaction on very
 slender body of revolution having thick

boundary layer and surface mass
 transfer 13 p1992 A66-26447
 Text on high velocity hydrodynamics
 including wing flow, compressible fluids,
 motion of slender profile,
 etc 13 p2066 A66-26529
 Lifting systems and motion of slender
 profile at arbitrary distance from liquid or
 solid boundary, using kernel degeneration
 method to reduce singular equation to
 Fredholm equation 13 p2067 A66-26531
 Nonsteady motion of slender body near
 interface between fluids of different
 densities 13 p2067 A66-26536
 Forces on hovering slender body of
 revolution submerged under waves of
 moderate wavelength, considering beam seas
 and head seas 13 p2071 A66-26724
 Shock bounded self-similar flows over
 slender bodies with volumetric mass,
 momentum and energy
 addition 13 p2071 A66-26731
 Approximation method for evaluating body
 flexibility effects on slender aircraft static
 stability, noting application to sounding
 rocket 13 p1994 A66-26734
 Mathematical and numerical determinations
 of aerodynamic forces on harmonically
 oscillating cylindrical shell under subsonic
 and supersonic speeds and comparison with
 slender body theory
 results 14 p2218 A66-27405
 Linearized unsteady supersonic potential
 flow theory formulation of boundary value
 problem of aerodynamic forces on oscillating
 cylinder and comparison with two-
 dimensional quasi-steady and slender body
 approximations 16 p2628 A66-30259
 Hypersonic source flow effect on shock
 shape and surface pressure of sharp-nosed
 slender bodies 16 p2632 A66-31592
 Pressure distribution, skin friction and
 heat transfer for sharp-and blunt-nosed
 slender bodies in hypersonic air
 flow 17 p2837 A66-32070
 Vortex sheets rolling-up along leading
 edges of delta wings, comparison with
 slender body theory and conical
 flow 17 p2837 A66-32275
 Lift-to-drag ratio attainable by slender,
 homothetic body at hypersonic speeds,
 assuming Newtonian pressure distribution
 and constant skin-friction
 coefficient 17 p2838 A66-32348
 Extremization of products of powers of
 functionals as applied to flat top wings for
 maximizing lift drag ratio in hypersonic
 flow 17 p2842 A66-33242
 Supersonic wind tunnel measurements in
 turbulent wake of axisymmetric slender
 body
 [AIAA PAPER 66-453] 18 p3046 A66-33649
 Terminal shock-boundary layer interaction
 on slender cone-cylinder payloads at
 supersonic speeds and resulting flow
 separation
 [AIAA PAPER 66-471] 18 p3250 A66-33653
 Steady aligned-field hydromagnetic flow of
 inviscid liquids past slender body
 reexamined, using boundary layer
 arguments 18 p3147 A66-34666
 Similarity laws for bodies maximizing lift-
 to-drag ratio at hypersonic speeds,
 considering longitudinal and transversal
 contours 19 p3276 A66-36245
 Fluid dynamic fields around slender
 rotating bodies, discussing simple theories
 for evaluating aerodynamic
 coefficients 20 p3492 A66-37431
 Weak oblique blast impingement on
 slender hypersonic wedge 21 p3724 A66-38726
 Longitudinal, torsional and flexural free
 vibration of elastic slender bar of variable
 cross section with nonhomogeneous
 properties 22 p3992 A66-40299
 Model of laminar hypersonic base flow
 region of slender bodies, introducing base
 height and Reynolds number variation of
 base pressure ratio 22 p3843 A66-40345
 Supersonic unsteady gas flow around
 bodies at low Strouhal numbers, noting
 angle of attack amplitude and leading edge
 shock wave 23 p4009 A66-41719
 Slender bodies with minimum inviscid
 pressure drag derived, using hypersonic
 small disturbance approximation to shock
 expansion method
 [AIAA PAPER 66-129] 23 p4011 A66-41880

Distance of transition to turbulence of wake measured behind spherical and blunted-cone models at hypersonic speeds in ballistic range 23 p4011 A66-41883

Radiated pressure field due to LF vibration of slender body of revolution expressed as distribution of sources and doublets along body axis 24 p4238 A66-43047

SLENDER CONE

Hypersonic flow field about slender cone derived from heat-pressure-wake survey 01 p0007 A66-10618

Shock tunnel heat transfer measurement and hypersonic viscous flow over pointed cones, particularly viscous-layer regime at low Reynolds numbers [AIAA PAPER 66-34] 08 p1163 A66-18957

Sequence photography of models used to study head-on interaction between slender cone in supersonic flight and moving shock wave [AIAA PAPER 66-57] 08 p1163 A66-18990

Near wake of slender cone at free stream Mach numbers of 8 and 12 08 p1164 A66-19130

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas 08 p1165 A66-19571

Correlation for boundary layer transition on sharp slender cones with heat transfer, using wind tunnel and free flight data 12 p1799 A66-24708

Hypersonic flow field about slender cone derived from heat-pressure-wake survey 13 p1990 A66-25182

Hypersonic tunnel measurements of turbulent heat transfer for thin walled slender cone 17 p3039 A66-33474

Aerodynamic stability of slender cone under ablation effect including pressure distribution measurement, ablation-flow field interaction, flow analysis during oscillation, etc [AIAA PAPER 66-410] 18 p3045 A66-33635

Diameter and location of wake neck and trailing wake shock for pointed and blunt slender hypersonic cones 23 p4012 A66-41919

SLENDER WING

Linearized supersonic theory for favorable thickness distributions and drag reduction for wings in supersonic flow [AIAA PAPER 65-716] 03 p0314 A66-12542

Slender wing research and short-range transport operation are among studies at Royal Aircraft Establishment 03 p0321 A66-12885

Angle of attack, leading edge sweep and thickness effects on hypersonic flow field of slender delta wing 08 p1164 A66-19135

Vortex flow of ideal incompressible fluid past plate or slender wing near solid wall 13 p2067 A66-26532

Integral equation for slender wing oscillating in subsonic flow near solid wall 13 p2067 A66-26538

Nonlinear theory for flow past slender wings with leading edge vortices in sudden plunging motion 17 p2837 A66-32082

Average pressure and skin friction on slender two-dimensional wings in hypersonic flow, taking into account displacement effects of boundary layer 18 p3048 A66-33823

SLIDING CONTACT

Pressure and temperature distribution across contact strip between two elastic cylinders with parallel axes in presence of frictional heating [ASME PAPER 65-LUBS-1] 06 p0961 A66-16201

Sliding contact wear under very dry high altitude or space conditions due to lack of contact film prevented by using chemical compounds like graphite or lithium carbonate 12 p1888 A66-24664

Contact resistance of sliding contact over thin film as affected by material, pressure and contact area 16 p2662 A66-30963

Stress field due to circular sliding contact region carrying hemispherical Hertzian normal pressure and proportional distributed shearing traction 18 p3248 A66-33585

Jump conditions at point of contact for corresponding cases of sliding and rolling contact in plane motion 21 p3769 A66-38476

Anisotropy in mechanical properties of lamellar solids due to abrasiveness,

examining wear and surface damage produced by laminar solid on metal during slipping and hardness 24 p4229 A66-42701

SLIDING FRICTION

Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 01 p0087 A66-10745

Sliding friction measurements of some layer lattice compounds in ultrahigh vacuum [ASLE PREPRINT 65-LC-19] 02 p0237 A66-12251

Friction induced vibration to determine existence of critical velocity of driven surface [ASME PAPER 65-LUB-5] 04 p0527 A66-14241

Frictional and viscoelastic properties of plastics and rubber show relationship to sliding speed and temperature [ASME PAPER 65-LUB-15] 04 p0528 A66-14247

High temperature and vacuum effects on sliding friction and surface film formation between dry lubricated and nonlubricated pair combinations of metals, carbon and ceramics, noting SNAP reactor data [ASLE PREPRINT 65AM 6A1] 10 p1540 A66-22040

Sliding friction and compression testing of rigid polyurethane foams 13 p2112 A66-25303

Surface roughness effect on boundary friction for various loads, speeds and lubricants [ASLE PREPRINT 65 AM 6AZ] 13 p2085 A66-25367

Sliding wear evolution and radioactive tracer measurement 14 p2305 A66-28466

Frictional properties of silicon nitride and carbide during reciprocating sliding between hemispherical stylus and polished horizontal specimen 16 p2730 A66-30253

Sliding friction measurements of some layer lattice compounds in ultrahigh vacuum [ASLE PREPRINT 65-LC-19] 16 p2713 A66-30569

Sliding characteristics of polytetrafluoroethylene /PTFE/ dry lubricant, examining effects of time, temperature and environment 16 p2713 A66-30570

Gyroscopic rotor vibrations excited by effect of lubrication layer in sliding bearings and stabilized with intervening elastodamping supports, taking into account moment of inertia of rotor 17 p3027 A66-32605

Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 18 p3117 A66-34981

Aerodynamic gaseous drag torque on electromagnetically suspended isolated sphere rotating at high Mach numbers in rarefied transition regime from continuum to free molecule flow 20 p3492 A66-37473

Water vapor effect on friction of molybdenum disulfide compact sliding against rubbed film of molybdenum disulfide on copper in nitrogen atmosphere 20 p3563 A66-37700

Friction and viscoelastic properties of polymeric solids 24 p4229 A66-42702

Vanishing of sliding in mechanical systems with dry friction 24 p4218 A66-42844

SLIP

SA SIDESLIP

Microslip between ball and track in ball-thrust bearings with ball subjected to forces and spin moment 04 p0527 A66-14238

Slip in single crystal tungsten deformed in tension at temperatures from 2500 to 5000 degrees F 16 p2725 A66-31453

SLIP BAND

Prismatic slip in polycrystalline titanium diboride subjected to high hydrostatic pressure at room temperature 01 p0086 A66-10489

MgO crystals subjected to plane shock waves for number of explosive shocking geometries 02 p0249 A66-11945

Torsional fatigue induced slip bands and crack initiation in aluminum-zinc-magnesium alloy at room temperature to 250 degrees C 07 p1048 A66-17485

Slip bands in thin plates with rectilinear cuts under tension 13 p2201 A66-28408

General constitutive relations for incremental deformation of metal crystals by multislip 14 p2401 A66-27784

Polycrystalline nickel aluminide lightly deformed at 77, 298 and 900 degrees K exhibit fine slip band structure with mostly screw dislocations 18 p3121 A66-33747

SLIP FLOW

Wind tunnel wall pressure measurements in slip flow using heated wire as pressure sensor and Wheatstone bridge to record pressure variation 01 p0056 A66-10389

Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 05 p0663 A66-15422

Slip and compressibility effect on velocity and pressure drop characteristics of rarefied gas flows in rectangular and annular ducts [ASME PAPER 65-FE-20] 06 p0871 A66-18211

Tube gas flow theory applicable to laminar flow, slip flow, transition region of flow and free molecular flow 07 p1023 A66-18132

Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 10 p1523 A66-21474

Drag measurement for grid of wires in rarefied gas slip flow and transition flow 11 p1633 A66-22922

Asymptotic solution, valid in physical space, obtained for kinetic layers in slip flow of linearized Couette problem 12 p1865 A66-24584

Interaction between vortices and solid surface manifested as pulling away of freely suspended disk in rotating liquid helium 2 from suspension head, performing additional rotational motion, determining vortex slip coefficient 12 p1865 A66-24874

Unsteady slip flow of electrically conducting viscous fluid over porous flat plate under transverse magnetic field 17 p2973 A66-32980

Tension and compression tests on single and polycrystalline niobium, examining twinning, slip and catastrophic flow 19 p3387 A66-36727

Density distribution and shock wave profile of rarefied gas slip flows past blunt bodies, determined, using multibeam interferometer 21 p3724 A66-38903

Modified Poiseuille equation for gas flow through capillaries, applicable to flow regimes extending from molecular to viscous flow 21 p3725 A66-38943

Slip flow in hydrodynamic entrance region of tube and parallel plate channel, determined by solving linearized momentum equation 21 p3730 A66-39459

Radiant heat transfer between concentric cylinders determined by extending validity of Rosseland diffusion approximation by introducing temperature jump boundary condition at gas solid surface 21 p3837 A66-39462

Interaction between vortices and solid surface manifested as pulling away of freely suspended disk in rotating liquid helium 2 from suspension head, performing additional rotational motion, determining vortex slip coefficient 23 p4053 A66-41086

Deformations of isotropic perfectly elastic material associated with simple shear, examining flow and collapse reactions 23 p4141 A66-41944

SLIPSTREAM

Wing lift in slipstream with boundary represented by vortex sheath in computer determination of span loading [AIAA PAPER 66-468] 16 p2631 A66-31472

Expansion of axisymmetrical heated gas jet in homogeneous slipstream experimentally studied and compared with equivalent problem in theory of heat conduction 19 p3342 A66-36479

SLOPE

SA GLIDE SLOPE

Analytical expressions for maximum slope of fluid temperature transient response, based on Hansen mathematical model, and for reduced time slope attained 20 p3678 A66-37119

SLOSHING

S LIQUID SLOSHING

SLOT

Flow properties of fluid through slots of micron dimension 09 p1384 A66-20752

Steady free convection in vertical slot,

- ing growth of boundary layers and
perature gradient 15 p2618 A66-29693
kissymmetric problem in elasticity theory
infinite body weakened by system of
idically distributed coaxial slots of
al radius 17 p3026 A66-32599
ave diffraction in rectangular waveguides
assing through double ribbon
arriers 19 p3311 A66-35299
numerical results of slot couplings of
angular single mode waveguides as
ction of length, width, position and
avelength 19 p3311 A66-35300
lastic deformation of unbounded
nsversely isotropic body with internal
ne-circular slot under slot surface
ad 19 p3476 A66-36839
- ANTENNA**
otted-sphere antenna immersed in
mpressible plasma 01 p0037 A66-10513
mittance of rectangular waveguide
iating into compressible
asma 01 p0038 A66-10517
small lightweight 10-gc horizontally
arized omnidirectional rectangular wave
de slot antenna 02 p0196 A66-11369
ear-isotropic circularly polarized
nidirectional antenna for space vehicles,
cussing theoretical design and
perimental tests 06 p0843 A66-16019
minimization of grating lobes in slotted
veguides as array elements by using
early nonuniform array with equal power
ision between 06 p0827 A66-16034
ements 06 p0827 A66-16034
adiation pattern of slotted-cylinder
enna in presence of inhomogeneous lossy
asma 06 p0827 A66-16045
adiation pattern of two annular slot-
upled antennas mounted on elongated
heroid 08 p1193 A66-19187
Plane ground station interferometry
enna, examining choice of polarization
d use of slots for precise
easements 10 p1511 A66-21708
mpedance of finite slot 10 p1505 A66-21912
Radiation characteristics of dielectric
ated half-wave resonant slot antenna,
examining effects of improper dielectric
aling 11 p1663 A66-22553
Plane electromagnetic wave diffraction on
ot and tape having magnetic and electric
lds parallel to edges of slot and tape
spectively 11 p1655 A66-22717
Electromagnetic radiation from slotted-
cylinder antenna on reentry vehicle
urrounded by plasma 13 p2030 A66-25210
eath 13 p2030 A66-25210
Radiation pattern excitation of elongated
mpedance spheroid by annular slot with
uniform field distribution 13 p2042 A66-26047
Ferrite controlled polarization of slot
diator by rectangular waveguide excited
H10 wave 14 p2252 A66-27252
Mutual conductivity of half-wave slot on
conducting cylinder 14 p2398 A66-27427
Internal regime of waveguide-slot antennas
with identical resonance radiator via
fference equations 14 p2254 A66-27743
Broadband slotted cone antenna exhibiting
ultioctave bandwidth properties in UHF-
HF range 14 p2256 A66-27912
Multipactor effect in X-band waveguide
ots, determining multipacting occurrence
d parallel plate role 15 p2464 A66-29043
Operating principles and critical
mensions of traveling wave slotted-
cylinder antenna with dipole
ements 15 p2467 A66-29886
Waveguide-slot antenna design, considering
interaction of radiators on principal
ave 17 p2879 A66-31855
Slot couplings of rectangular single-mode
veguides analyzed by equivalent circuit
d concentrated parameter 17 p2879 A66-31856
ethods 17 p2879 A66-31856
Slot filters for H waves in circular
aveguide 17 p2879 A66-31863
Array of circumferential slots on large
cylinder as omnidirectional
enna 18 p3074 A66-33544
Current magnitude and phase associated
th individual elements of slot Yagi-type
enna array on planar and curved
rfaces 19 p3321 A66-36406
Slot antenna research, discussing arrays
d polarization 20 p3530 A66-37710
Characteristics
- Constant impedance antennas, noting
applicability for high gain broadband
performance 20 p3530 A66-37711
Scanning antenna operating principles,
noting adjustment of directivity to receive
radio waves from long
distance 20 p3530 A66-37713
Mathematical analysis of radiation from
slotted magnetic line source on conducting
cylindrically capped wedge covered by
dielectric layer or plasma 21 p3705 A66-39349
sheath 21 p3705 A66-39349
Waveguide directional couplers using
inclined slots, considering broad-to-narrow
cross and broadwall parallel guide
configuration 22 p3878 A66-40546
Plane electromagnetic wave diffraction on
slot and tape having magnetic and electric
fields parallel to edges of slot and tape
respectively 23 p4037 A66-41455
Narrow slot antennas covered with
dielectric slabs of arbitrary thickness,
examining design flexibility in application as
radiating elements of
waveguide 23 p4046 A66-41586
Wide frequency bandwidth properties of
arrays of shunt slots in ridged
waveguide 24 p4187 A66-43194
- SLOTTED WIND TUNNEL**
Flow through straight slot cascade,
investigating application to axial
compressors for optimum slot
parameters 06 p0803 A66-16968
Transonic airfoil characteristics correlation
for zero incidence in slotted wall wind
tunnels 23 p4007 A66-40976
- SLOW NEUTRON**
Phonon spectra in aluminum single crystals
investigated by means of inelastic scattering
of slow neutrons 02 p0277 A66-12083
Detection of slow neutrons escaping from
atmosphere by counters filled with boron
fluoride onboard high altitude
balloons 05 p0754 A66-15401
Fast and slow neutrons detected by
proportional and scintillation
counters 05 p0755 A66-15408
Slow neutron scintillation counter using
photomultiplier with nonactivated dynodes,
with low amplification factor to measure
very low intensity ion
beams 09 p1380 A66-20359
Cross section of slow neutron scattering in
superconductors and polarization of
scattered electrons 22 p3964 A66-40308
- SLURRY**
S COLLOID
S EMULSION
- SLUSH**
Water, ice and slush effects on traction
characteristics of runway pavement, noting
aquaplaning and aircraft braking
criteria 02 p0216 A66-12223
Fluid hydrogen slush, discussing advantage
of reduced evaporation loss during storage
and handling, refrigeration and
density 20 p3625 A66-37074
Heat of fusion and density of solid and
slush hydrogen at pressures to about 400
atm 20 p3625 A66-37081
- SM-A**
S SAN MARCO SATELLITE
SMALL PERTURBATION FLOW
Wing-fuselage interaction effects on static
and dynamic stability at low and moderate
hypersonic Mach numbers by small-
disturbance approximation to shock-
expansion method 04 p0454 A66-13552
[AIAA PAPER 65-719]
Oscillating thin airfoil theory, using Oseen
method for classical potential solution of
flow about thin airfoil 04 p0456 A66-14476
Transonic airfoil problem solved via
differentiation of airfoil thickness ratio by
infinitesimal perturbation method
[AIAA PAPER 66-90] 06 p0802 A66-16410
Energy transfer to small disturbances in
viscous compressible heat-conductive
medium defined as quantity that is
monotone nonincreasing function of
time 06 p0874 A66-17005
Blast wave theory with and without
entropy layer effect, determining asymptotic
flow, far downstream of blunt nose, past
given body 12 p1881 A66-23808
Perturbation equations solved for viscous
flow stability over concave cylindrical
surface 14 p2276 A66-27729
- SMITH CHART**
Linville technique speeds HF amplifier
design, using Smith chart 09 p1351 A66-20165
- SMITH VARSITY AIRCRAFT**
Autoland, stalling and jet V/STOL
systems for flight testing of aircraft
[AIAA PAPER 65-783] 03 p0318 A66-12557
- SMOKE TRAIL**
Rocket smoke-trail wind measurement
technique 15 p2534 A66-30072
Open air welding of titanium, noting nozzle
design for optimum shielding, argon gas
flow rate and magnitude of electrode
extension 19 p3371 A66-36633
- SMOOTHING**
SA DATA SMOOTHING
SA POLISHING
Smoothing of stationary random noise by
discrete smoothing network, analyzing
conditions for discrete white noise,
harmonic noise, etc 14 p2264 A66-27359
Quality of digital smoothing filters with
finite transient time improved by rational
choice of delay 17 p2878 A66-33491
- SMS**
S SYNCHRONOUS METEOROLOGICAL
SATELLITE /SMS/
- SMU**
S SPACE SELF-MANEUVERING UNIT
/SMU/
- SNAP-2**
SNAP 2, 8 and 10A nuclear-electric space
power plant reactor
programs 13 p2126 A66-26619
- SNAP-8**
SNAP-8 instrumentation, emphasizing
selection and installation of aerospace type
transducers for liquid metal service
[ISA PREPRINT 1.11-4-65] 05 p0683 A66-15510
Ground test verification of SNAP-8 flight
reactor design and operation of reactor
while coupled to power conversion
system 12 p1911 A66-23679
Nuclear lunar base power plant based on
SNAP-8 components
[AIAA PAPER 64-712] 13 p2004 A66-26606
Auxiliary power generating systems for 24-
man space laboratory, evaluating power
requirements, cost, weight and deployed
area
[AIAA PAPER 64-719] 13 p2004 A66-26614
SNAP 2, 8 and 10A nuclear-electric space
power plant reactor
programs 13 p2126 A66-26619
SNAP-8 turboelectric nuclear space power
system including component tests, corrosion
program and status of systems
[AIAA PAPER 64-758] 13 p2126 A66-26621
SNAP-8 reactor oscillating bearings to
provide low friction self-lubrication at 1150
degrees F 16 p2712 A66-30414
SNAP-8 reactor and shield designs and
operating experience as heat source for
long-term power supply
[AIAA PAPER 65-473] 19 p3398 A66-35618
Closed Brayton cycle power system for
space vehicles, discussing closed loop and
major components 23 p4020 A66-41750
- SNAP-9A**
SNAP-9A, significant development factors
and launch approval 13 p2126 A66-26626
- SNAP PROGRAM**
Liquid metals as coolants or working fluids
in nuclear auxiliary power systems for
extended space missions 11 p1735 A66-23267
Control system construction and
development for SNAP-2, -8 and -10A
nuclear reactor systems 12 p1911 A66-23673
Engineering problems in SNAP reactor
component irradiation program, including
material compatibility, vacuum equipment
selection and operation and contaminants
within chamber 12 p1857 A66-23674
Design characteristics and status of SNAP
Mercury Rankine nuclear power plant
system 13 p2005 A66-26625
SNAP radioisotopic thermoelectric
generator fabrication and
application 23 p4089 A66-41609
SNAP Mercury Rankine space power
conversion program and testing of Combined
Rotating Unit-V /CRU-V/ 23 p4020 A66-41751
- SNAP-10A**
Radiation tolerant electric propulsion
system to operate on SNAPSHOT satellite,
permitting orbital test of ion engine and ion
propulsion with nuclear power supply

/SNAP-10A/ 04 p0544 A66-13630
Radiation test data on solid state equipment of tracking and command system in SNAP-10A environment 05 p0740 A66-15495
Snaptran Transient Test Machine for evaluation of aerospace nuclear accidents [ASME PAPER 65-WA/SAF-1] 05 p0714 A66-15602
SNAP-10A ground test and flight system reactors [ASME PAPER 65-WA/NE-6] 05 p0714 A66-15681
System for nuclear auxiliary power, covering spaceflight test of SNAP-10A, system testing, performance evaluation, etc 06 p0907 A66-15926
SNAP-10A nuclear-reactor heat source and thermoelectric conversion and shutdown causes 06 p0907 A66-16321
Radiation dosimeters for SNAP-10A flight test to measure reactor leakage radiations throughout SNAPSHOT Agena orbital vehicle 12 p1876 A66-23675
SNAP-10A instrumentation and control subsystems and ground test program 12 p1911 A66-23676
SNAP 10a/Agena Space System, noting interrelationship of several subsystems and integration with nuclear power unit 12 p1857 A66-23677
Launch operations and safety analysis of first test flight of SNAP-10A in SNAPSHOT satellite 12 p1953 A66-23678
SNAP 2, 8 and 10A nuclear-electric space power plant reactor programs 13 p2126 A66-26619
SNAP-10a electric space power system, operational, handling and reliability requirements 13 p2126 A66-26627
Performance of SNAP-10A instrumentation during component qualification, ground system and flight system tests, noting environmental conditions 16 p2744 A66-30439
SNAP-15
SNAP-15A radioisotope thermoelectric generator with power output of about 1 mw, design, development and potential uses 12 p1911 A66-23680
SNAP-15A design and performance, comparison with semiconductor or metal thermocouples, test results, safety, etc 15 p2429 A66-29603
SNAP-50
SNAP-50/SPUR nuclear-electric space power plant program and potential application 13 p2126 A66-26624
SNAPSHOT SATELLITE
Radiation tolerant electric propulsion system to operate on SNAPSHOT satellite, permitting orbital test of ion engine and ion propulsion with nuclear power supply /SNAP-10A/ 04 p0544 A66-13630
Radiation dosimeters for SNAP-10A flight test to measure reactor leakage radiations throughout SNAPSHOT Agena orbital vehicle 12 p1876 A66-23675
Launch operations and safety analysis of first test flight of SNAP-10A in SNAPSHOT satellite 12 p1953 A66-23678
SNELL LAW
Light deflection technique for transient shock wave detection by phototube activation based on Snell law 19 p3357 A66-35811
SNOW
Mesoscale wind structure revealed by Doppler wind soundings taken in lower 4.5 km of atmosphere at 12-minute intervals in snowstorm 04 p0541 A66-13668
Ice and snow fields in polar regions as observed by high resolution camera on Nimbus satellite 11 p1729 A66-22327
Snow runway construction, discussing physical characteristics of snow, mechanical properties related to supporting capacity temperature effect, etc 17 p2904 A66-32933
SNOWFLOW
Plasma acceleration in shock tube with concentric electrodes based on snowflow model, assessing error involved 15 p2552 A66-29421
SOAP
Dynamic behavior of soap film stretched between two coaxial rings, assuming potential energy of this surface to be proportional to surface area 21 p3772 A66-39353

SOCIAL FACTOR

Firecrack, Crackerjack and Yellowhammer exercises in UK involving sonic boom generation 09 p1330 A66-20682
Social and legal questions posed by development of large-scale information grids [AIAA PAPER 66-318] 12 p1982 A66-24789
Model for social system for extended-duration spaceship crews subject to isolation, confinement and/or stress 13 p2013 A66-25279
Sonic boom effect on people, noting ground overpressure measurement and data obtained from interviews, formal complaints, building damage, etc 17 p2868 A66-33028
Space technology, Volume 5 - Symposium on environmental engineering and society, London, April 1966 18 p3230 A66-34208

SOCIAL ISOLATION

Psychological and medical aspects of human confinement, isolation and sensory deprivation 11 p1642 A66-22485
Physiological and biochemical tests on men subjected to isolation and hypokinesia 15 p2434 A66-29443

SODIUM

SA ALKALI METAL
SA LIQUID SODIUM

Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects [ASME PAPER 65-HT-51] 05 p0785 A66-14758
Instability of metal oxide silicon field effect transistors found due to sodium-ion migration 06 p0842 A66-16010
Sodium and aluminum content in Pribram meteor measured and compared with other fallen meteorites 07 p1135 A66-17639
Plasma oscillation of conduction electrons in sodium 09 p1430 A66-20845
Born approximation of cross sections for electron and proton impact ionization of Na and Mg 11 p1737 A66-22496
Annealing of deformed sodium, noting activation energy distribution annealing kinetics, etc 12 p1897 A66-24923
Sodium excretion during extracellular volume expansion and associated changes in renal blood flow and intrarenal blood distribution during natriuresis accompanying saline loading in dogs 13 p2012 A66-26582
Gamma photon flux from solar Na 22 disintegration emitted by Sun after chromospheric eruption 13 p2176 A66-26760
Effect of unilateral renal vasodilatation on sodium excretion by infusing acetylcholine into renal artery of dogs 14 p2227 A66-26793
Stark broadening effect on solar atmospheric abundance determinations, with results for sodium abundance 14 p2383 A66-27709
Photoabsorption power due to sodium interband, using orthogonalized plane wave evaluation of matrix elements in oscillator strengths 14 p2365 A66-27753
Atmospheric motions from sodium cloud firings in 80 to 200 km height region, noting internal gravity waves, atmospheric tides and drift 15 p2489 A66-29661
Free sodium atom distribution in upper atmosphere related to diurnal and nocturnal variation 15 p2491 A66-30018
Space correlation of main emission lines for night sky emission spectra and altitude distribution of sodium luminescence 15 p2495 A66-30060
Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects [ASME PAPER 65-HT-51] 16 p2828 A66-30987
Factors determining line reversal temperature of flame with realistic temperature cross section explained by calculation of sodium D-line contours 17 p3038 A66-33324
Neutron activation analysis of sodium dopant concentrations and distributions in lead telluride thermoelectric materials during couple operation in vacuum and argon atmosphere 24 p4247 A66-42109
Reverse breakdown voltage increase resulting from ion drift in silicon p-n junctions formed by sodium ion bombardment 24 p4257 A66-42621

SODIUM CHLORIDE

Growth of single crystal gold films in

ultrahigh vacuum on clean vacuum-cleaved salt surfaces 01 p0117 A66-102
Pore formation in decomposition of solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 01 p0125 A66-107
NaCl substrate surface temperature a structure effect on orientation, structure and characteristics of vacuum-deposited PbTe film 04 p0564 A66-142
Thermal conductivity of NaCl crystals a dependence on Ag, Br, Li, K, I and Rb concentration 08 p1278 A66-196
Plastic deformation effect on heat conduction of crystal lattice of sodium potassium chlorides single crystals 10 p1587 A66-221
Pore formation in decomposition of solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 11 p1749 A66-222
Epitaxial growing of iron, nickel and cobalt single crystal films on sodium chloride crystals by spraying at 200 degrees C 11 p1753 A66-228
Optical absorption and dielectric measurements in KCl doped SrCl₂ single crystals, determining involvement impurity vacancy dipolar complexes optical conversion of F centers to centers 12 p1926 A66-237
Residual gas influence on orientation vapor deposited NaCl crystals 13 p2159 A66-250
Freezing potential for ammonia and sodium chloride solution at constant freezing rate noting stationary nature of potential under stationary conditions 13 p2121 A66-261
Electric conductivity in thin metal film deposited on single crystal sodium chloride substrates, thermally activated with negative temperature coefficient of resistance 15 p2561 A66-287
Epitaxial growth configurations of single crystal potassium bromide on sodium chloride, using gold decoration method showing effect of crystal orientation on growth rate 16 p2780 A66-312
Thermal conductivity of NaCl crystals a dependence on Ag, Br, Li, K, I and Rb concentration 17 p2984 A66-3314
Magnetic properties and structure of ferromagnetic films obtained on single crystal sodium chloride substrates heated at various temperatures during spray coating 19 p3438 A66-3544
Stress corrosion cracking of titanium alloy in long duration and high temperature test using salt coating of specimens 19 p3379 A66-3565
Stress corrosion tests on specimens of titanium alloy in contact with sodium chloride, noting crack formation and effect of argon 19 p3379 A66-3565
Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 19 p3440 A66-3576
Transmission electron microscopic analysis of initial epitaxial growth stage of evaporated Au films on NaCl cleavage surfaces 21 p3798 A66-3875
SODIUM COMPOUND
S PENTOBARBITAL SODIUM
SODIUM D-LINE
Alternating-light monochromator with Fabry-Perot interferometer for measuring sodium and oxygen lines during twilight at night 01 p0066 A66-1018
Reversal temperature profile across small rocket exit measured by sodium line reversal technique 09 p1382 A66-2050
Spectral lines in atmospheric emission during day and night airglow in review of published works 17 p2917 A66-3202
SODIUM FLUORIDE
Optical absorption, energy level structure and exchange interactions of cobalt and sodium cobalt fluoride ions 14 p2357 A66-2707
Hypothesis that system sodium fluoride yttrium trifluoride serves as model for each of binary systems of rare earth trifluoride SmF₃ to LuF₃ with sodium fluoride 14 p2315 A66-2746
SODIUM IODIDE
Cosmic ray contribution to background of NaI scintillation spectrometers noting

...nting rate, surrounding material and
...mic number 05 p0678 A66-14967
...sorption, excitation, and emission
...ctra of TI-activated NaI single crystals at
...id helium
...peratures 15 p2566 A66-29347
...sorption, excitation, and emission
...ctra of TI-activated NaI single crystals at
...id helium
...peratures 20 p3615 A66-37352
LUM SILICATE
...ostructural and jadeite mineral called
...eyle found as rare emerald-green grains
...ron meteorites Coahuila, Toluca and Hex
...er Mountains 05 p0674 A66-15197
LUM VAPOR
...lectron temperature spectroscopy for

 Planetary perturbation effect on solar surface 13 p2180 A66-25427
 Solar activity centers studied to establish relationship to effect of planetary tides on surface of Sun 13 p2181 A66-25448
 Upper atmospheric model of variations for solar minimum conditions based on satellite drag and rocket sounding 13 p2073 A66-26130
 Intensity of corona as index of solar corpuscular radiation, noting characteristics of geomagnetic and solar activity 14 p2376 A66-27260
 Correlation between amplitudes and phase angles of first two harmonics of monthly mean Sq and solar activity for period 1905-1960 14 p2376 A66-27395
 Lunar tidal variations in monthly median noon critical frequency in American zone during low solar activity 14 p2285 A66-27727
 Forbush decrease in cosmic radiation spectra as function of solar activity 14 p2377 A66-28072
 Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 14 p2241 A66-28090
 Intensity of oxygen red line in night airglow analyzed, obtaining temperature dependence of rate coefficients of ion atom interchange reaction and collisional deactivation, noting red line intensity dependence on solar activity 15 p2484 A66-28905
 Millimeter wavelength solar radiation consisting of thermal, slowly varying active and burst components and eclipse measurements of brightness distribution 15 p2594 A66-29001
 Estimation of ion formation rate at various altitudes in ionosphere and zenith angles during low and high solar activity periods 15 p2487 A66-29105
 Solar prominences, proton flares and chromospheric flares in intensity of corona and solar radio emission and sunspots, noting maxima during eleven-year solar activity cycle 15 p2576 A66-29136
 Latitudinal and seasonal variations in atmospheric densities during low solar activity obtained by inflatable air density satellites 15 p2490 A66-29819
 Space research in Hungary in 1965 including satellite tracking, ionospheric sounding, solar activity, etc., noting international data transmission 15 p2600 A66-29907
 Czechoslovakian space research including satellite observation, radio emissions, solar activity, Doppler effect measurement, radiation hazards, etc. 15 p2601 A66-29912
 Electron content for ionospheric station located 47 degrees N determined from observation of Faraday polarization rotation 15 p2496 A66-30073
 Flux of low energy heavy primary nuclei obtained by slicing emulsion method, using recoverable satellite during minimum solar activity period 15 p2592 A66-30077
 Cosmos satellite observational values of atmospheric density during low solar activity 15 p2496 A66-30083
 High resolution power spectrum of international magnetic character, showing two subsidiary peaks on both sides of 27-day period 16 p2695 A66-30719
 Tabular data on magnetic storms and on geomagnetic and solar data furnished by Swiss Federal Observatory 16 p2801 A66-30726
 Upper atmosphere physics with relation to solar activity, noting molecular distribution 16 p2697 A66-30996
 Frequency of strong ionospheric disturbances, noting effect of high and low solar activity, deviations from monthly median, use of statistical analysis, etc. 16 p2699 A66-31387
 Equatorial ionospheric drifts observed at Ibadan, Nigeria, during solar activity minimum, and relation to diurnal variation of sunspot cycle and drift velocity variations in E and F region 16 p2700 A66-31759
 Solar activity review discussing sunspots,

flares, coronal condensations, etc. 17 p2997 A66-32021
 Satellite observation on correlation between outer radiation zone electrons and solar activity cycle 17 p2993 A66-32518
 Sunspot cycle intensity prediction, noting terrestrial effects, duration, etc. 17 p3007 A66-33086
 High altitude cosmic ray measurements by Cerenkov scintillator counter system near solar minimum 17 p2994 A66-33147
 Comet gas trail connection with interplanetary plasma and solar activity, noting agreement of results with Mariner II measurements 17 p3012 A66-33397
 Comet Humason photographic analysis noting tail movement, curvature and emanation of lateral jets 17 p3012 A66-33398
 Solar nucleosynthesis of extinct isotopic iodine, noting incorporation of Nakhilite meteorite material and subsequent decay into fissionogenic xenon 18 p3225 A66-33623
 Probable value of time of rise for sunspot cycle no. 20 not occurring earlier than 1968.5 18 p3228 A66-33925
 Contribution to dependence of variation of unperturbed ionospheric F-2 critical frequencies on season and solar activity 18 p3105 A66-34097
 Local character figures of calcium bright flocculi for IGY 18 p3235 A66-34735
 Galactic cosmic ray diffusion into solar system as affected by zonal distribution of solar activity, noting 11-year modulation 18 p3180 A66-34771
 Diurnal component of solar daily variation recorded at low latitude station by east and west pointing telescopes during periods of maximum and minimum solar activity 18 p3181 A66-34777
 Solar-diurnal and semidiurnal variation in cosmic ray neutron component during last cycle of solar activity from 1957 to 1965 18 p3182 A66-34787
 Parameters of solar diurnal variation determined from neutron monitor data from 1957 to 1958 18 p3183 A66-34788
 Solar diurnal variation of nucleonic component of cosmic radiation from 1957 to 1962 18 p3183 A66-34789
 Earth heliolatitude change and effect on cosmic ray intensity from 1963 to 1964 18 p3183 A66-34791
 Cosmic ray rigidity spectra during solar rotations 18 p3184 A66-34795
 Cosmic radiation and solar activity from stratosphere measurements 18 p3184 A66-34798
 Cosmic radiation measurements at balloon altitudes during solar minimum 18 p3185 A66-34801
 Frequency distribution of sudden changes of cosmic ray intensity in connection with solar activity 18 p3185 A66-34805
 Integral rigidity spectrum of primary cosmic rays, considering solar active days 18 p3186 A66-34807
 Helium nuclei flux at top of atmosphere shows independence of solar activity 18 p3189 A66-34825
 Low energy galactic cosmic radiation studies by high altitude balloon flights carrying nuclear emulsions, including solar activity, energy and intensity spectra, etc. 18 p3189 A66-34829
 Ionospheric radio wave absorption, noting inverse correlation between solar activity with stability of reflections from sporadic E layer 19 p3344 A66-35263
 Solar activity dependence of sporadic E layer, noting cyclic variation in characteristics from 1957 to 1964 19 p3344 A66-35264
 Solar activity and irregular variations in Earth rotational rate 19 p3345 A66-35272
 Solar radio activity in 1963, discussing daily flux density, mean variations, etc. 19 p3458 A66-35467
 Magnetic classification of solar active regions based on qualitative longitudinal magnetic field maps, noting correlation to flare production 19 p3453 A66-36607
 Origin of solar activity cycles in self-excited oscillator assumed to exist in interior of Sun, based on statistical analysis 20 p3646 A66-37014
 Related flares, considering radio frequency, geomagnetic phenomena,

etc. 20 p3630 A66-3737
 Graphical and tabular presentation of solar photospheric faculae performed by independent amateur astronomers from 1930 to 1963 20 p3651 A66-3757
 Radio emission of Venus at 3 cm and solar activity 20 p3653 A66-3767
 Book on space electrodynamics noting application of MHD, plasma properties, waves, interaction with magnetic field, shock waves, solar atmospheric motion, etc. 20 p3631 A66-3797
 Solar terrestrial physics - Symposium, Japan, December 1965 20 p3634 A66-3827
 Geomagnetic storms occurrence, their types of calm periods and intermittent periods of atmospheric disturbances 20 p3658 A66-3827
 Migration in latitude and longitude of individual sunspot groups of cycle 17 21 p3810 A66-3847
 Semiannual variation in geomagnetic disturbance amplitudes consisting of one-to-one correspondence between average daily amplitude index and solar declination 21 p3732 A66-3867
 E-layer critical frequency variation conditioned by solar zenith angle, taking account of transport, gradient and time variations of height scale 21 p3732 A66-3868
 Onset of sudden commencements - function of solar activity 21 p3809 A66-3868
 Electron concentration data obtained by rocket probes in quiet ionosphere with solar and geomagnetic activity, as function of time of day, season and altitude 21 p3809 A66-3877
 Sinusoidal hydromagnetic pulsations noting morphological properties, planetary distribution and inverse dependence of amplitude, frequency and duration on solar activities 21 p3733 A66-3878
 Dependence of variations in critical F ionization on solar activity 21 p3733 A66-3878
 Relation of sporadic E layer to ionospheric F region 21 p3733 A66-3878
 Basic laws of variations in detailed coronal structure with solar activity phase 21 p3813 A66-3912
 Microparameters of solar corona as physical system, discussing Vsekhsvyatskii Bugoslavskaja and Chapman theories 21 p3813 A66-3912
 Temporary series representing evolution with time of natural fluctuating phenomena/geophysical, climatic, biologic/ and relation to sunspot cycle 21 p3733 A66-3913
 Magnitude of principal level of quiet component of solar radiation 22 p3972 A66-3986
 Magnetic field-aligned ionization detected during minimum sunspot activity, using radio telescopes of radio interferometer 22 p3908 A66-3996
 Mean variation of electron density profile of ionosphere above Lindau/Harz, noting semiannual variation of F-2 layer peak height related to solar activity 22 p3908 A66-3996
 Hydrogen, He and ionized Ca lines in chromospheric spicules, noting large-scale motion in spicule interior indicated by line width expansion and peculiarities in shape of line contours 22 p3975 A66-4095
 Soviet papers on problems of astrophysics 23 p4125 A66-4107
 Lunar modulation of geomagnetic activity, from 1884 to 1959 analyzed using magnetic character figure, noting relation to solar activity 24 p4201 A66-4259
 Steady state solar neutrons and solar neutron bursts measured by neutron detectors on Vela 24 p4263 A66-4259
 Subsidiary peaks in power spectra of C and Kp /magnetic indices/ attributed to amplitude modulation of 27-day components 24 p4201 A66-4260
 Solar activity variations, C 14 production by cosmic rays and reevaluation of C 14 dating 24 p4265 A66-4273
 F-1 layer formation as affected by solar activity, seasons and time of day 24 p4202 A66-4276
SOLAR ACTIVITY EFFECT
 Flux-gate magnetometer device for determining attitude of satellite or rocket

Silicon photovoltaic cells applied to solar batteries, examining efficiency with which luminous energy is converted into electrical energy 06 p0810 A66-17160

Extrinsic and intrinsic epitaxially deposited single crystal gallium phosphide solar cells, noting conversion efficiencies 07 p0990 A66-17232

Radiation tests on N/P silicon solar cells and other cover materials performed with one mev energy electrons for integrated fluxes, noting effects on physical, optical, electrical and thermal characteristics 07 p0990 A66-17238

Thin film coating effect on silicon solar cell performance 07 p0991 A66-17288

Auxiliary power devices using solar, chemical and nuclear sources 07 p0992 A66-18305

Electro-optical system measuring spectral response of photosensitive material or device and output under arbitrary light spectrum as in silicon solar cell 07 p0997 A66-18485

Photoelectric performance of solar cells tested by optical techniques and equipment 08 p1167 A66-18613

Spinning rocket attitude measured from geomagnetic field and solar cell data, using digital computer technique, noting instrumentation 08 p1225 A66-19492

Network design implementing solar cell array simulator, using wideband constant current source in conjunction with conventional diodes and linear resistors 08 p1169 A66-19494

Load-voltage battery charger power-optimizing regulator for maintaining continuous maximum power loading on solar cells under various environments 08 p1169 A66-19495

Spacecraft design problems with solar power supply systems, noting solar cell characteristics in space environment 08 p1173 A66-19663

Solar cell orbital performance measurement, discussing apparatus, V-I characteristics, spectral response and calibration 08 p1174 A66-19664

Silicon photovoltaic cells in economic solar energy conversion on Earth 08 p1174 A66-19665

Power of solar cell array in space predicted from comparative measurements in earth sunlight of given solar panel and monitor with known output in space 09 p1331 A66-20171

Solar cell powered resistojets in conjunction with momentum flywheels for attitude control and orbit maintenance of OAO [AIAA PAPER 66-225] 10 p1593 A66-21452

Multi-kw solar cell power system meeting requirements of orbiting space station [AIAA PAPER 64-717] 13 p2004 A66-26612

Compact lightweight space power source capable of providing more than 1500 watts of power [AIAA PAPER 64-739] 13 p2006 A66-26643

Solar cells for space travel, emphasizing fabrication into modules [AIAA PAPER 64-738] 13 p2007 A66-26644

Radiation effects on silicon p-n junction diode solar cell and use of transparent radiation shield 14 p2225 A66-27107

Syncom II electrical power system, discussing design, air mass one to air mass zero extrapolation and spatial performance [AIAA PAPER 64-456] 14 p2226 A66-27889

Silicon photovoltaic cells fabrication and operating radiation-environment requirements 16 p2636 A66-30999

Gallium arsenide and silicon solar cells under proton irradiation, noting decrease of short circuit current and open circuit voltage 16 p2636 A66-31018

Solar energy power converter based on illumination of battery of silicon photovoltaic cells with intense light fluxes 17 p2848 A66-32856

Low energy proton damage to partially shielded solar cells, noting invalidity of simple area scaling law in predicting decrease in open circuit voltage 17 p2849 A66-33113

Spacecraft power source, discussing energy conversion, processes, solar cells, radio isotopes, thermionic power converters, turbogenerators, etc 19 p3282 A66-36797

Temperature, illumination intensity and degradation factor effects on solar cell output characteristics 20 p3497 A66-37164

Fabrication and performance of dendritic silicon solar cells, noting utilization experience 20 p3497 A66-37165

Optimum field thicknesses of radiation-resistant drift-field solar cells obtained by continuity equation 20 p3500 A66-37492

Electrical and photoelectrical properties of silicon photocells with different impurities, examining load characteristics, V-I forward and reverse branches plotted for silicon cells 20 p3502 A66-37734

Lithium use in silicon solar cell for radiation resistance improvement, noting preservation of minority carrier lifetime 20 p3502 A66-37775

Geomagnetically trapped radiation damage to orbiting solar cells and transistors both before and after Operation Star Fish 20 p3503 A66-38350

Testing of silicon solar photoelectric battery when exposed to large light fluxes, noting overheating, current saturation, efficiency decrease, etc 20 p3503 A66-38439

Silicon solar cell performance, output increase by solar concentration and cost reduction 22 p3851 A66-40245

Remission factor of nonradiating ethylene polyterephthalate/ cellular structure and transparency to visible radiation 22 p3852 A66-40246

Utilization tests of nonradiating Franca cellular structures placed on spiral insulator and heated to low and medium temperatures 22 p3852 A66-40247

Charged particle radiation shielding in space of solar cell panels by use of concentrator geometry 22 p3852 A66-40512

Unmanned lunar roving vehicle power requirements, comparing radioisotope thermoelectric generator and solar cell/battery systems 23 p4017 A66-41104

Solar cell as most reliable energy conversion device for near-Earth missions, noting semiconductor material and thermal stress 23 p4017 A66-41167

Epitaxial growth techniques used to obtain graded layers for drift field structured solar cells on Si web 23 p4019 A66-41747

Solar cell arrays, thin films and radiation resistance 23 p4024 A66-41771

Performance degradation of transistors and solar cells due to terrestrial radiation effects, from studies on Tiros Operational Satellite systems 24 p4247 A66-42097

Conversion efficiency of GaAs solar cell at various light intensities 24 p4161 A66-42391

Isotope and solar thermoelectric generator, solar cell and battery electric power sources

for unmanned scientific exploration of space system 24 p4162 A66-42391

SOLAR CHROMOSPHERE

S CHROMOSPHERE

SOLAR COLLECTOR

SA CONCENTRATOR

Rotary, deployment and stabilization mechanisms for solar collectors [AIAA PAPER 64-732] 13 p2005 A66-26640

Fabrication of solar concentrator, investigating plastic film reflector shape and rigidization, using urethane foam [AIAA PAPER 64-733] 13 p2005 A66-26641

Brayton-cycle space power system describing solar collector, heat receiver/storage unit, recuperator, radiator and gas bearings [AIAA PAPER 64-726] 13 p2006 A66-26642

Solar concentrator fabrication for space power conversion systems, emphasizing stretch-formed aluminum method [AIAA PAPER 64-731] 13 p2006 A66-26643

Solar energy concentrators for attaining operating temperatures for space power system conversion devices [AIAA PAPER 64-730] 13 p2006 A66-26644

Maximum efficiency contour (MEC) solar collector designed for compact arc source used in solar simulators 16 p2681 A66-30998

Sun pumped continuous wave one-way YAG crystal laser, noting equipment set and output duration 17 p2934 A66-32636

Measuring irradiance at focal point of solar-radiation collector, using optical filament microphotometer 20 p3502 A66-37733

Two types of faceted solar concentrator using metal reflector for predicting aging due to solar radiation of common synthetic materials 20 p3502 A66-37734

Optical characteristics of hexagonal reflecting film membrane obtained, using analytical method combined with electric simulation 20 p3503 A66-38440

Optical characteristics of solar concentrators fabricated by inflation method, noting asymmetric shape of focal spot 20 p3503 A66-38441

Coordinated laboratory and flight test program, determining stability of solar concentrator reflective surfaces in orbit environment 22 p3889 A66-40248

Solar concentrator technology, discussing design requirements of space power conversion devices and manufacturing methods 23 p4021 A66-41772

SOLAR COMPASS

Solar alignment system for Skylark rock attitude control, describing system composition, operation and results 18 p3243 A66-33850

SOLAR CONVERTER

Solar-heated thermionic generator design and fabrication evaluation, considering mirror configurations 05 p0623 A66-15505

Solar-thermionic energy conversion system design using mathematical simulation relating characteristics of solar collector arc cavity absorber 05 p0623 A66-15506

Formation of photoelectric converters solar energy by penetration of high-energy phosphorus ions into p-type silicon 07 p1105 A66-18306

Solar energy conversion into electric energy by photovoltaic cells for satellite power source 08 p1267 A66-18614

Energetic conversion of solar radiation noting photovoltaic, thermoelectric, thermoelectric, thermionic and heliochemical generators 11 p1638 A66-22222

Solar dynamic space power energy conversion system using Rankine cycle organic fluid [AIAA PAPER 64-725] 13 p2005 A66-26645

Thermal energy storage using solar Brayton cycle cavity receiver with lithium fluoride heat storage [AIAA PAPER 64-727] 13 p2006 A66-26646

Solar power conversion unit consisting of thermoelectric generator, thermal storage container and waste heat radiator [AIAA PAPER 64-728] 13 p2006 A66-26647

Performance optimization, misorientation and cyclic and transient response tests of thermionic generators exposed to solar flux [AIAA PAPER 64-735] 13 p2006 A66-26648

SOLAR CORONA

S CORONA

ER COSMIC RAY

homogeneous parabolic equation for density change of solar particles in space time, determining duration of solar cosmic ray emission 02 p0284 A66-12127
contaminated solar cosmic ray data obtained when polar cap absorption events moved toward magnetic poles from auroral arcs 03 p0418 A66-12662
solar cosmic particle measurements by satellite detectors 03 p0422 A66-12871
upper limiting rigidity of solar diurnal variation of cosmic ray primaries in free space determined by neutron monitors at level and meson telescopes 03 p0423 A66-13178
data concerning energy spectra of protons, alpha particles and middleweight nuclei in solar flares indicating similarity of spectra 04 p0574 A66-13838
diffusion coefficient of solar protons in steady state electromagnetic medium of interplanetary space increases with increase of proton momentum 04 p0574 A66-13839
solar cosmic ray generation, discussing neutron energy spectrum analysis and wave propagation in interplanetary space 05 p0751 A66-15374
solar particles zones of incidence during maximum and minimum solar activity 05 p0751 A66-15376
cosmic rays from solar flare and interplanetary space properties, covering particle scattering and magnetic field induced one-dimensional particle diffusion 05 p0751 A66-15377
changes in solar cosmic ray and geomagnetic field intensities during magnetic storms accompanied by decrease in galactic cosmic ray intensity, using moving averages method 05 p0753 A66-15395
solar and galactic cosmic ray characteristics, origin and flux-time variations, examining relation between solar flares and geomagnetic terms 05 p0756 A66-15751
solar cosmic ray propagation, discussing density time dependence in terms of anisotropic diffusion of solar particles 06 p0947 A66-16571
experiments on solar particles noting abundance of solar cosmic rays, energy region, spectrum of solar protons, sudden commencement, etc 07 p1130 A66-18080
solar cosmic ray particle composition, large and energy spectra of nuclear components and isotopic composition of H and He 07 p1132 A66-18264
diffusion model study of solar cosmic ray propagation during burst of September 28, 1961 08 p1283 A66-19019
solar cosmic rays determined from dosimetric measurements in stratosphere 08 p1283 A66-19044
theoretical energy spectrum for galactic cosmic radiation based on experimental solar cosmic ray data 09 p1437 A66-20204
mechanisms for cosmic-radiation intensity variations, including cosmic-ray modulation effects, solar cosmic rays and variations of galactic origin 09 p1437 A66-20207
propagation mechanisms of solar cosmic radiation in interplanetary space other than classical diffusion 09 p1438 A66-20212
solar cosmic rays and interplanetary magnetic field, showing polar cap absorption 09 p1439 A66-20218
anisotropic diffusion of solar cosmic rays due to interplanetary magnetic field 09 p1443 A66-20890
solar cosmic ray generation, interplanetary proton diffusion and stratospheric powers 10 p1595 A66-21045
Forbush effect and solar cosmic ray annihilation of effect of compression of earth magnetosphere 12 p1941 A66-24174
calculations of effects of solar cosmic ray flares on instruments and distribution of electrons, considering index of differential spectrum of additional flux 12 p1942 A66-24180
stratospheric recordings of solar cosmic rays from chromospheric flares, calculating and comparing diffusion coefficient of cosmic rays and energy spectrum of solar protons 12 p1943 A66-24281
onset patterns of PCA analysis using corrected geomagnetic coordinates, with

results analyzed through solar cosmic radiation, Earth magnetosphere structure and D region 12 p1944 A66-24470
shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 13 p2190 A66-25261
inhomogeneous parabolic equation for density change of solar particles in space and time, determining duration of solar cosmic ray emission 14 p2377 A66-28084
high energy solar cosmic ray spectrum during solar flare of February 23, 1956 15 p2575 A66-29080
polar glow aurora, discussing optical emissions generated by solar cosmic ray protons and alpha particles, energy spectrum, atmospheric and ionospheric absorption effect, etc 15 p2492 A66-30026
polar-based riometric observations of solar cosmic ray events during IQSY 15 p2592 A66-30034
error correction of recent work on modulation of primary spectrum during solar cycle for rigidities between 4 and 12 billion volts 17 p2994 A66-32536
anisotropic cosmic radiation with flare effects flowing out of Sun and along filamentary magnetic structures imbedded in solar wind 18 p3170 A66-34537
solar and sidereal daily variations of cosmic ray intensity at depth of 60 mwe underground in London 18 p3178 A66-34763
solar cosmic ray disturbances in stratosphere measured by balloon-borne radiosondes 18 p3185 A66-34800
modulation effects in galactic and solar cosmic rays in interplanetary space 18 p3185 A66-34806
first-order cosmic ray modulation, namely production by Sun, diurnal anisotropy, 11-yr cycle and Forbush decrease 18 p3186 A66-34810
solar modulation of galactic protons and helium nuclei from 1963 to 1965 18 p3188 A66-34821
fast neutrons of solar origin detected by observing protons recoiling from elastic collisions of neutrons with hydrogen nuclei in nuclear emulsion 18 p3188 A66-34824
balloon-borne nuclear emulsion detection of solar cosmic ray heavy nuclei during solar burst 18 p3190 A66-34836
skyhook balloon flight Geiger counter cosmic ray monitor measurements of energy and charge spectra of galactic rays at solar minimum 18 p3192 A66-34847
time lag of beginning of polar cap absorption effect or cosmic ray increase after occurrence of Y-shaped phase development in solar flare 19 p3453 A66-36298
solar cosmic ray alpha particle relation to PCA and lowest latitude of enhanced ionization 20 p3635 A66-38224
polar cap absorption and upper atmosphere solar-terrestrial disturbances due to solar flare and type IV outburst 20 p3636 A66-38227
polar geomagnetic and solar terrestrial disturbances related to PCA and solar flare 20 p3636 A66-38228
solar cosmic ray multiply charged nuclei and July 18, 1961 solar event, discussing relative abundances and heavy nuclei detection 22 p3973 A66-40548
shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 24 p4283 A66-42785
origin of primary cosmic radiation, composition, energy spectrum and time variations 24 p4272 A66-43139

SOLAR CYCLE

SA SUNSPOT

geomagnetic field fluctuations corresponding to solar wind intensity changes as related to change in phase of solar activity cycle 01 p0061 A66-10279
changes in nature of 27-day variations in cosmic ray intensity 02 p0281 A66-11334
position of planets associated with 11.1-year cycle of solar activity 02 p0290 A66-11798
cosmic radiation studies in U.S.S.R during IGY noting 11-year variations, Forbush effect, solar particle propagation, etc 05 p0749 A66-15232

ionization bursts observed in chambers used for continuous registration of intensity variations in hard component of cosmic radiation, correlating variation frequency with solar cycle 06 p0950 A66-16591
ion composition model representing conditions at low temperatures, assuming that solar cycle variation ions are distributed according to diffusive equilibrium theory 06 p0876 A66-18611
primary cosmic ray variations and Forbush decrease in solar-cycle change 07 p1122 A66-17988
quantitative comparison of primary cosmic radiation rigidity spectrum during current solar cycle 07 p1124 A66-18001
hysteresis effect in long term variation in cosmic radiation, investigating whether such effect appears during short term /Forbush/ decreases 07 p1125 A66-18004
cosmic ray diurnal variation near geomagnetic poles measured over declining phase of solar cycle, using neutron monitor data 07 p1127 A66-18015
time variation of primary cosmic ray rigidity spectrum over solar cycle derived by measuring latitude effect of nucleonic components 07 p1127 A66-18016
geomagnetic activity corresponding to 11-year sunspot cycle shown to occur in double sunspot cycle /22 years/ 10 p1604 A66-21159
barometric coefficient of Leeds neutron monitor determined by method of successive differences 13 p2176 A66-26360
variations of zodiacal light and airglow, suggesting correlation with solar and lunar cycle 14 p2283 A66-27096
electrical conductivity of Earth interior from data concerning annual geomagnetic variations for all years of solar cycle 15 p2487 A66-29101
mechanism of solar activity cycle, examining relation of stability threshold of disintegration of solar magnetic belt into separate cells 15 p2576 A66-29137
winter anomaly of nondeviative ionospheric absorption of radio waves and relation to diurnal, seasonal, local and solar cycle variations 15 p2490 A66-29943
error correction of recent work on modulation of primary spectrum during solar cycle for rigidities between 4 and 12 billion volts 17 p2994 A66-32536
cosmic ray modulation by solar wind fields noting transit time, energy loss and time variations 18 p3175 A66-34743
rigidity spectra of primary cosmic rays in last solar cycle from observations of balloon-borne ion chambers and GM counters 18 p3180 A66-34775
rigidity dependence of intensity variation of nucleonic component during solar cycle 18 p3181 A66-34778
galactic cosmic ray anisotropy behavior obtained from observations of daily variation of cosmic ray intensity 18 p3182 A66-34782
first-order modulation effects of galactic cosmic radiation, considering hysteresis effect and variation of energy spectrum in 11-yr modulation 18 p3186 A66-34811
solar modulation of galactic protons and helium nuclei from 1963 to 1965 18 p3188 A66-34821
solar modulation and time variation of differential energy spectrum and flux of primary helium nuclei in 30 to 90 mev/nucleon energy range 18 p3190 A66-34832
balloon-borne nuclear emulsion detection of solar cosmic ray heavy nuclei during solar burst 18 p3190 A66-34836
ascent and descent in 80-year cycles of solar activity based on Schöve decadal numbers of auroral frequency 18 p3239 A66-35246
position of anomalous radio absorption in ionosphere during various phases of solar activity cycle 19 p3345 A66-35269
pressure gradients in F region from model atmosphere, estimating from motion equations variation of magnitude and direction of wind with local time, season and epoch of solar cycle 19 p3352 A66-36626
solar cycle effects on random variation in attenuation length of primary cosmic ray nucleon component 20 p3632 A66-38080
statistical correlation analysis of isolated geomagnetic bay occurrence and relation to

solar cycle variation 20 p3658 A66-38231
 Successive hourly variations of equivalent current systems of magnetic bay disturbance patterns and F layer minimum frequency increases 20 p3658 A66-38232
 Phase anomaly detected by chemical test D during decreasing phase of last solar cycle 21 p3732 A66-38629
 Arc shaped formations in solar corona, discussing possible existence of solar magnetic field with 22-year cycle of variations 21 p3813 A66-39123
 Structural stability of near Earth coronal corpuscular system during solar cycles, based on planetary magnetic characteristics for 1937-1958 21 p3813 A66-39126
 Terrestrial penumbra density variation with solar activity during lunar eclipses in 11-year cycle 22 p3976 A66-39857
 Diurnal variations in sporadic E layer parameters during solar cycle based on Moscow observations 22 p3915 A66-40781
 Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-40808

SOLAR ECLIPSE
 Coronal spectrum of eclipse of February 15, 1961 studied at constant height as function of heliographic latitude from circular slit spectrograph plates 02 p0286 A66-11354
 Atmospheric ozone concentration variation during total eclipse of sun affected by limb darkening and solar radiation intensity 05 p0666 A66-14545
 Response of D-region absorption of cosmic noise to passage of totality during eclipse of May 30, 1965 recorded in New Zealand 05 p0668 A66-14798
 Faraday polarization rotation of linearly polarized lunar-reflected radio waves used to measure ionospheric electron content during July 20, 1963 solar eclipse 08 p1284 A66-19412
 White-light corona of Sun photographed with rocket-mounted Lyot coronagraph equipped with external occulter, noting agreement of rocket with eclipse data 10 p1603 A66-21112
 Coronal spectra of solar eclipse of 1952 at Khartoum, noting spectral distribution of total corona, F corona and electron densities and separation of K and F coronas 11 p1768 A66-22364
 Matrix techniques for finding geomagnetic field strength in solar eclipsic coordinate system 11 p1699 A66-23052
 Brightness of oxygen bands in twilight and day airglow, relating variation to sunspot cycle, ozone dissociation and solar eclipse 11 p1702 A66-23490
 Atmospheric conditions during total eclipse of February 15, 1961 in France, particularly temperature curves 12 p1868 A66-23533
 Electron density at large distances from Sun determined by photoelectric measurements during total solar eclipse of July 20, 1963 13 p2187 A66-26134
 KC-135 jet aircraft observation of annular solar eclipse 14 p2385 A66-27905
 Annular solar eclipse of May 20, 1966 14 p2387 A66-28136
 Spectral distribution changes occurring in diffuse skylight at zenith in visual region during total solar eclipse, using photoelectric spectrometer 15 p2484 A66-28830
 Solar eclipse coronal isotopes, noting spectrum in region of maximum visual sensitivity, ellipticity figures, Ludendorff coefficient, luminosity gradients, etc 15 p2593 A66-28867
 Brightness distribution in corona during solar eclipse of May 30, 1965 16 p2796 A66-30279
 Polar magnetic field variability confirmed by study of solar corona during total eclipse of May 30, 1965 in South Pacific 16 p2794 A66-30658
 Total eclipse of Sun, November 12, 1966, classical theory of solar eclipses and procedure for automatic computation, including charts and tables with results 16 p2801 A66-30821
 Aircraft as platform for solar eclipse observation, discussing history, project APEQS, navigation problems, aircraft used, etc 16 p2705 A66-30822

Aircraft stabilization for solar eclipse observation, emphasizing use of autopilot for maximum control 16 p2743 A66-30823
 Gyro-stabilized airborne solar eclipse spectrograph, noting wavelength range, dispersion accuracy, guidance mechanism, etc 16 p2705 A66-30825
 Polarization photography of solar corona, noting apparatus used for separation of K from F component 16 p2705 A66-30827
 Ancient solar eclipses analyzed, determining secular decrease in angular velocity of Earth by computation based on ephemeris time and astronomical constants 17 p2999 A66-32067
 Solar eclipse observations by orbiting spacecraft will provide data on solar atmosphere, Earth upper atmosphere and role of multiple scattering 17 p3001 A66-32349
 Weak comets in vicinity of Sun during solar eclipse 17 p3010 A66-33382
 Laplace integral application to inversion of three solar limb-darkening curves obtained in UV 19 p3464 A66-36258
 Linear polarization and relative intensity variations of skylight measured with aircraft-mounted telephotopolarimeter during solar eclipse 19 p3349 A66-36346
 Solar prominence in color photography, using filtering system for H and D lines 20 p3648 A66-37284
 Lunar profiles determined from photographs of annular solar eclipses of 1962 and 1963 20 p3655 A66-38021
 Solrad VIII observation of May 20, 1966 solar eclipse penumbral zone in X-ray and UV bands 21 p3810 A66-38468
 Soviet observational data on solar corona and wind collected during solar eclipse of June 19, 1936 21 p3813 A66-39120
 Solar corona pictures during July 1963 eclipse, analyzing polar rays frequency distribution along Sun limb and deviation from radial direction, all linked to solar activity cycle 23 p4123 A66-41810

SOLAR EFFECT

Expected cosmic ray intensity variations on Moon from analysis of such variations on Earth 01 p0132 A66-10323
 Solar influence on libration point satellite motion for 2500 days in vicinity of Earth-Moon system [AIAA PAPER 65-88] 02 p0288 A66-11556
 Thermal maps of Murray about Venus atmosphere statistically analyzed into solar effects, latitude variations and limb darkening 04 p0579 A66-14450
 Solar particle effect on daily variation in neutron component of cosmic radiation 06 p0949 A66-16585
 Solar modulation and geomagnetic effects on cosmic rays, noting daily variation and rigidity spectrum 07 p1122 A66-17990
 Calculations of effects of solar cosmic ray flares on instruments and distribution of stations, considering index of differential spectrum of additional flux 07 p1122 A66-17990
 Pulses 12 p1942 A66-24180
 Stability of commensurate spin angular velocity for Venus, assuming solar tidal torque action and suggesting Venus rotation period is commensurate with synodic period 12 p1953 A66-24969
 Anomalous phase variations of GBR transmissions as received in New Zealand correlated with solar season and probably due to long path interference 14 p2237 A66-27401
 Dependence of electron density in E layer on Sun zenith distance, based on new ionospheric data and ionization neutralization phenomena 17 p2919 A66-32880
 Gravitational theory based on solar observations, noting connection between gravitational eigenvalues, planetary orbit spacing and connection with cylindrical wave functions 18 p3104 A66-33757
 Effect of Sun perturbations on motion near Earth-Moon equatorial libration points [AIAA PAPER 65-683] 19 p3461 A66-35890
 Mercury rotational period as consequence of solar torques and equatorial asymmetry, based on radar data and model developing superharmonic resonance 20 p3650 A66-37337
 Gravity gradient satellite stabilization and performance analyzed, using computer simulation of motion equations, including

eddy current dampers, solar effect, orbital eccentricity, etc 21 p3819 A66-38629
 Stabilization system of gravity gradient test satellite and effect on damping time and steady state accuracy, noting attitude data and solar effect 21 p3819 A66-38629

SOLAR ENERGY
 Gravitation viewed as source of universal energy produced by condensation of Sun from rarefied nebula to dense mass 01 p0135 A66-10284
 Propulsion system with solar energy for space exploration near Sun 03 p0416 A66-13381
 Correlation dependence of F-2 layer solar wave energy entering Earth's atmosphere 04 p0515 A66-13861
 Theoretical and experimental evaluation of arc-image welding technique using solar energy as high temperature source 05 p0686 A66-14661
 Emitter of thermionic converter with cesium plasma heated by solar energy determining electric power values 05 p0623 A66-15561
 Temperature, density and gravitation escape on Mars, Mercury, Jupiter and Venus atmospheres 05 p0768 A66-15761
 Solar energy powered cesium-plasma thermionic converter, noting development, output and application 09 p1333 A66-20961
 Electrical propulsion of space vehicle using solar energy, electrostatic drive, drifting field plasma accelerator, etc [ONERA TP 328] 12 p1937 A66-24961
 Solar pumping and modulation of various laser materials for deep space communication, noting TV picture transmission 15 p2513 A66-28961
 Solar neutrino detection, discussing energy generation processes in Sun 19 p3454 A66-36761
 Mediterranean cooperation for solar energy - Meeting, Marseille, May 1966 22 p3851 A66-40261
 Absorption of solar energy by polar cap noting electron concentration 24 p4204 A66-43361

SOLAR ENERGY THERMIONIC /SET/ PROGRAM
 Ionizing role of photon radiation in thermionic converter, noting experimental results and application to solar energy converters, tubular emitter converter, etc 09 p1405 A66-20991
 Weight advantages of solar-thermion systems as compared to photovoltaic systems [AIAA PAPER 64-718] 13 p2004 A66-26661
 Dynamic conversion of solar and chemical energy, discussing power conditioning, Brayton-cycle system with inert gas and spacecraft batteries 22 p3851 A66-40121

SOLAR FACULAE
 Variations of equivalent line widths of first overtone of carbon monoxide band transition from photosphere to faculae estimating temperature difference 01 p0131 A66-10271
 Appearance of active regions of Sun associated with 10 to 20 percent increase in convection velocity 05 p0761 A66-15051
 Visible faculae on solar disk and gradual disappearance toward center of disk, with assumed temperature difference between faculae and photosphere of 200 K 05 p0756 A66-15421
 Synoptic chart of chromosphere and sunspots, discussing coordinate system, faculae, solar filaments, etc 12 p1948 A66-23991
 Spectral equivalent linewidths of four solar faculae and adjacent undisturbed photosphere sections 15 p2596 A66-29161
 Astronomical photography of solar disk revealing facula at 2190 angstroms and producing limb darkening curves 18 p3236 A66-34871

SOLAR FLARE
SA SUNSPOT
 Electron concentration, length and temperature of limb chromospheric flare using steady state equation of hydrogen atom 01 p0131 A66-10271
 Fine structure of energy spectra of Forbush decrease and dependence on solar cycle 01 p0132 A66-10301
 Solar flare characteristics interrelated with magnitude of resultant blast wave

- beginning sudden commencement of
magnetic storms 01 p0063 A66-10891
ization chamber for measuring
planetary space radiation, using Geiger-
counter as secondary
ector 01 p0073 A66-11115
isting and new methods of spectral
ysis of solar flares 02 p0280 A66-11299
continuous electromagnetic radiation of
solar flares attributed to
msstrahlung of nonrelativistic electrons
synchrotron radiation 02 p0283 A66-11660
essure distribution of flare ejected as
inus gas ribbon, with solution for
agation along magnetic field in MHD
roximation 02 p0284 A66-12126
anomalous polar cap absorption during
omospheric flare of July 7,
02 p0285 A66-12247
lar flares, solar wind, particle emission
an activity regions, flare-associated
icles and nuclear reactions in flare
ions 03 p0418 A66-12665
terplanetary magnetic effects of solar
es recorded by Explorer XVIII and
neer V 03 p0419 A66-12681
tical solar flare characteristics and
ervation by
ectroheliograph 03 p0421 A66-12843
adio waves, X-ray and energetic particle
ission associated with solar
es 03 p0421 A66-12844
asma clouds, relativistic cosmic ray and
cosmic ray particle emission associated
h solar flares 03 p0421 A66-12845
oradic solar radio emission at decimeter
avelength and relation to chromospheric
eres 03 p0422 A66-12914
eory of localized explosions in
homogeneous atmosphere applied to initial
ase of development of chromospheric
e 03 p0422 A66-12916
ecombination coefficient and electron
roduction rate in lower D region during
ar flare 04 p0574 A66-13444
ata concerning energy spectra of protons,
ha particles and middleweight nuclei in
ar flares indicating similarity of
pectra 04 p0574 A66-13838
olar particles zones of incidence during
ximum and minimum solar
ivity 05 p0751 A66-15376
olar flares, discussing continuous
electromagnetic radiation, hard X-ray
ilation and microwave radio
ursts 05 p0752 A66-15378
elation between Forbush decreases and
chromospheric flares, obtaining longitudinal
istributions before and after onset, using
istics 05 p0753 A66-15394
cosmic ray diffusion, discussing existence
nd influence of radial magnetic
eld 06 p0947 A66-16574
Anomalies in cosmic radiation during
ecember 1957 accompanying geomagnetic
orms connected with solar
ares 06 p0949 A66-16588
olar flare photographic observation,
esenting development of flare and
sociated prominences on
mb 07 p1118 A66-17621
igh velocity motions in solar flares, using
gh time-resolution monochromatic
ematography 07 p1130 A66-18074
Coronal and prominence phenomena
ompanying solar flares noting shock
ave, radio burst, ionospheric fadeouts and
sorptions, coronal density and
emperature increases,
c 07 p1130 A66-18075
Current sheet formation on plasma
agnetospheric boundary at hyperbolic null
int, noting possible connection with solar
are mechanism 07 p1138 A66-18082
Lower ionospheric characteristics
etermined by VLF radio waves propagated
er long distances by multiple reflections
etween Earth and D
gion 09 p1370 A66-19973
Quantitative relation between strength of
ospheric effects of solar flares and
plitude of increase in cosmic
diation 09 p1439 A66-20223
Model of solar flares in which preflare
ate consists of mass of gas supported by
eared magnetic field 09 p1442 A66-20401
olar chromosphere observations in 1960-
63 by Istanbul University, noting flares,
filaments, observation duration,
etc 10 p1609 A66-21833
Continuous electromagnetic radiation from
solar flares, examining X-ray bursts from
synchrotron, Compton and bremsstrahlung
mechanisms 11 p1762 A66-22406
Chromospheric flares effect on hard
component of cosmic rays as function of
solar coordinates during quiet and
magnetically disturbed
days 11 p1762 A66-22412
Flux and energy spectrum of low energy
cosmic ray protons, noting rocket
measurement results and analogy to solar
flare spectrum 11 p1764 A66-23059
Anisotropy of weak cosmic ray bursts
studied by examining diurnal variations for
days with increased solar flare
activity 12 p1942 A66-24178
Effects of solar flare radiation on electron
density of F-2 layer at maximum level in
and near equatorial anomalous
zone 12 p1944 A66-24834
Study of 102 active solar centers associated
with radio emission observed at 3 cm from
July 1959 to December
1963 12 p1952 A66-24930
Space vehicle shielding with two
concentric toroidal superconducting coils
providing magnetic field for deflection of
charged particles 13 p2190 A66-25262
Sudden appearances and disappearances of
filaments and changes in thermoconductivity
of chromospheric plasma due to variation in
magnetic field strength, noting
reestablishment of thermal
equilibrium 13 p2180 A66-25413
Solar limb darkening measured at various
wavelengths by Veronique rocket, obtaining
data on continuous absorption
coefficient 13 p2180 A66-25421
Radiative cooling of stellar material and
application to solar flares 13 p2174 A66-25617
Cooling of stellar material by thermal
conduction under solar atmospheric
conditions in presence and absence of
magnetic field 13 p2174 A66-25618
Solar protons from class 2 solar flare of
February 1965 measured from satellite 1964-
45A 13 p2175 A66-26351
Sporadic solar radio emission at decimeter
wavelength and relation to chromospheric
flares 14 p2376 A66-27263
Theory of localized explosions in
inhomogeneous atmosphere applied to initial
phase of development of chromospheric
flare 14 p2376 A66-27265
Causes giving rise to or influencing change
of integral field strength of atmospheres
during solar flare in VLF region brought to
quantitative stage 14 p2237 A66-27400
Association rate between solar flares and
type II bursts 14 p2376 A66-27798
Frequency deviations in carrier frequencies
of ionospherically propagated HF radio
waves produced by fluctuations in solar
ionizing radiation 14 p2286 A66-27903
Flare initiated filament oscillations, noting
photographic measurement of oscillation
frequencies 15 p2573 A66-28646
High energy solar cosmic ray spectrum
during solar flare of February 23,
1956 15 p2575 A66-29080
Simulation of solar flare radiation effects
on white mice in spacecraft along
circumunar trajectory 15 p2445 A66-29512
Polar cap absorption observational results
from ionospheric soundings, proton flares
before 1956 and prediction for
1966-68 15 p2591 A66-30019
Cosmic ray flare effects observed by
Pioneer VI spacecraft 15 p2591 A66-30022
Solar flare analysis by examination of high
energy gamma rays, noting solar proton and
solar material interaction, energy spectrum,
generation of fast protons and alpha
particles, etc 15 p2592 A66-30076
Polarization characteristics of type IV solar
radio bursts noting position, direction and
frequency range 16 p2793 A66-30653
Flux of primary cosmic ray heavy nuclei
measured with sandwich of C.2 and G.5
emulsions at magnetic latitude 42 degrees N,
noting solar modulation as shown by
neutron monitor data 16 p2794 A66-30720
Solar class 2 flares, noting activity on
September 16, 1963, associated ionospheric
disturbances, etc 16 p2795 A66-31149
Reproduction of experimental and
calculation of theoretical H-beta emission
profile of solar flare, considering
macroscopic motions inside
flare 16 p2795 A66-31391
Photometric measurements of solar flares
and prominences for central intensities in
hydrogen alpha 16 p2804 A66-31397
Solar activity review discussing sunspots,
flares, coronal condensations,
etc 17 p2997 A66-32021
Solar corpuscular stream density
distribution and trail curvature, noting space
angle of ejection and flight
trajectory 17 p2992 A66-32336
Strong PCA events relation to phase of
solar activity from 1966 to
1968 17 p2993 A66-32342
Flare observations in H-alpha line, line and
continuous spectra of flares, and optical
characteristics of proton
flares 17 p2993 A66-32364
Solar flare effects and relaxation time of
ionosphere 17 p2993 A66-32532
Ionospheric phenomenon of sudden
frequency deviations related to explosive
phases of visible solar
flares 17 p2993 A66-32533
Solar wind proton, solar flare proton and
galactic ray effect on interstellar solids
/comet/ 17 p3013 A66-33409
Chromospheric eruption distribution in
time 18 p3228 A66-33912
Solar flare electron propagation
observations in interplanetary
space 18 p3166 A66-34239
Statistical correlation between decimeter
type III and type III/V solar radio bursts
and microwave bursts and chromospheric
flares 18 p3234 A66-34615
Solar particles generated during small
chromospheric flares 18 p3184 A66-34799
Negative hydrogen ions as cause of
continuous emission in solar
flares 19 p3453 A66-36297
Morphological relations between magnetic
fields, bright plages, filaments and flares in
solar active regions 19 p3453 A66-36608
IGY data on solar flares emitting energetic
protons in sunspot groups with delta
configuration, noting occurrence where
magnetic fields have steep
gradients 20 p3630 A66-37330
Related flares, considering radio frequency,
geomagnetic phenomena,
etc 20 p3630 A66-37331
Scintillation counter and proportional
counter spectral measurements of solar flare
X-ray emissions and analogies to hot
plasma 20 p3633 A66-38191
SID-AND terrestrial disturbance-causing
enhanced solar particle emissions associated
with intense solar flares and plasma
streams 20 p3634 A66-38212
Optical emission energy of solar flare and
plasma cloud acceleration producing
geomagnetic storm 20 p3635 A66-38215
Short wave fadeouts and solar soft X-ray
enhancements during solar
flare 20 p3635 A66-38216
Polar cap absorption and upper atmosphere
solar-terrestrial disturbances due to solar
flare and type IV
outburst 20 p3636 A66-38227
Data statistical analysis of solar radio
bursts over wide frequency range and
relation to solar flares 21 p3815 A66-39372
Long VLF path propagation measurements,
determining characteristics of lower
ionosphere, noting role of phase and
amplitude variations during solar
flares 22 p3907 A66-39959
Flare ion fluxes in space by mass-
spectrometric measurements of solar flare
rare-gas ions stopped in extraterrestrial
material 22 p3973 A66-40016
Theoretical model for high energy phase of
solar flares including radio bursts, proton
acceleration and plasma cloud
ejection 22 p3973 A66-40535
Theoretical model for quasars characterizes
them as galactic flares, based on study of
high energy phenomena associated with
solar flares 22 p3982 A66-40536
Interplanetary electrons and associated
solar flares 22 p3974 A66-40564
D-3 helium absorption line on solar disk
connected to chromospheric flare

origin 22 p3984 A66-40851
 Explosive nature of chromospheric flares, effect of magnetic fields and thermoconductivity calculated, using mathematical model 22 p3975 A66-40852
 Ionized calcium luminescence in large chromospheric flare, noting K line broadening due to nonthermal turbulent motions 23 p4126 A66-41078
 Model of plasma state prior to flare satisfying thermal equilibrium conditions by acoustic heating and radiation 23 p4127 A66-41082
 High energy gamma rays energy spectrum of solar flares, elucidating proton interaction with solar material 23 p4123 A66-41276
 3 cm hydrogen line from solar flares, estimating line-to-continuum ratio during flare 23 p4124 A66-41928
 Acceleration of plasma cloud from Sun producing geomagnetic storm, noting magnetic cloud squeezed out from sunspot region 24 p4262 A66-42459
 Solar flare and sunspot X-ray and radio burst correlation, noting sudden ionospheric disturbances 24 p4262 A66-42460
 Variation of sunspot magnetic fields attributed to expansion and compression of two different magnetic flux tubes due to interchange 24 p4263 A66-42469

SOLAR FLUX
 Characteristics of solar radio bursts in microwave region and measurements of atmospheric absorption and solar flux at 17 gc/s 07 p1028 A66-17419
 Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 08 p1285 A66-19786
 High-energy neutron emission from Sun studied by balloon-borne nuclear emulsion recording of proton track colliding with neutron 13 p2175 A66-26349
 Gamma photon flux from solar Na 22 disintegration emitted by Sun after chromospheric eruption 13 p2176 A66-26760
 Thermal emittance and reflectance of diffuse-bottomed, specular-walled groove in solar radiant-flux environment [AIAA PAPER 66-459] 16 p2811 A66-31491
 Ionospheric electron content variation with solar radio flux from Faraday rotation data at magnetic equator 20 p3633 A66-38198
 Predicted capture rate in chlorine experimenter detecting solar neutrinos, using set of nuclear parameters, showing CNO cycle and proton-proton chain contribution to solar energy generation 21 p3809 A66-38657
 Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 21 p3809 A66-38782
 Magnitude of principal level of quiet component of solar radiation 22 p3972 A66-39864
 Transmission of materials suitable for transparent covers of solar stills is nearly constant for angles of incidence less than critical value 22 p3852 A66-40511

SOLAR FURNACE
 Role of solar furnaces in production of water on Moon [ASME PAPER 65-WA/SOL-2] 05 p0661 A66-15633
 Imaging techniques to obtain temperature and emissivity measurements and phase diagrams of high melting point ceramic oxides with aid of solar furnace 21 p3738 A66-39102
 Solar energy vs electrical or nuclear power for recovery of water, oxygen and various chemicals from lunar soil [AICE PREPRINT 46B] 22 p3977 A66-39897

SOLAR GENERATOR
 Design, fabrication and testing of flat plate solar thermoelectric generator for near-Earth orbits, including comparison with photovoltaic cell 16 p2636 A66-31019
 Flat plate solar thermoelectric generator panels for near-Earth orbits, comparing design, fabrication and testing to photovoltaic cells 16 p2637 A66-31103
 Thermoelectric solar energy converters, discussing thermoelectric material properties and American radioisotope generators 17 p2848 A66-32855
 Calculation of optimum temperature of hot junction of solar thermoelectric generator and optimum concentration of solar

radiation in relation to efficiency as function of concentration of solar radiation 20 p3502 A66-37739

SOLAR GRANULATION
S PHOTOSPHERE
SOLAR GRAVITATIONAL EFFECT
 Lunar tide calculated by analysis of perturbations in inclinations of two nearly polar satellites 06 p0877 A66-16781
 Electromagnetic wave deflection where transmitted power is inherently guided by stored energy component, noting effect of Sun gravitational interaction 10 p1496 A66-21292
 Solar system origin, evidence of chemical physical nature, diamond content of meteorites, planetary density and gravitational instability 12 p1946 A66-23650
 Correlation between sunspots and solar tide, calculating solar tide amplitude in planet parameters 13 p2181 A66-25441
 Three-body problem of cislunar space flight, noting effect of solar gravitational field on spacecraft trajectory 16 p2804 A66-31332
 Unpredicted period in orbital motion of Alouette I artificial Earth satellite attributed to solar gravitational attraction 19 p3463 A66-35921
 Radio wave propagation in simple plasma in presence of solar gravitational field, noting coronal and relativistic effects 21 p3771 A66-39270
 Semidiurnal oscillation in surface pressure as result of strong resonance amplification of small oscillations due to surface heating and gravitational tidal force of Sun 22 p3942 A66-40052

SOLAR HEAT
 Numerical model of Earth atmosphere used to compute hydro-and thermodynamic evolution of global moist atmosphere, considering solar heating, evaporation, etc 16 p2697 A66-30943

SOLAR HEAT FLOW
 Velocity field and wave propagation in hydrogen convective zone of Sun 03 p0425 A66-12846
 Thermometry of solar interior via neutrino flux measurement, noting temperature dependence of number of events in detectors 24 p4270 A66-42931

SOLAR INSTRUMENT
 Nonfocusing grazing incidence monochromator which utilizes planar gratings and collimating slit systems 14 p2293 A66-27326
 Sunfollower assembly for maintaining horizon scanner in Sun vertical 21 p3740 A66-39387

SOLAR LONGITUDE
 Solar longitude according to Verrier and Newcomb 20 p3653 A66-37796

SOLAR MAGNETIC FIELD
 Drift of magnetic fields of sunspots and bipolar areas from photosphere into corona, coronal formations, corpuscular fluxes and nature of integral solar magnetic field 01 p0134 A66-10271
 Pressure distribution of flare ejected as luminous gas ribbon, with solution for propagation along magnetic field in MHD approximation 02 p0284 A66-12126
 Solar magnetic field generation and role in solar activity noting sunspot cycle, solar particle acceleration, flares, etc 03 p0421 A66-12849
 Total vector components of solar magnetic field strength determined from nomograms and computer 04 p0577 A66-13855
 Transfer equation of solar absorption line developed with split upper level in magnetic field 05 p0759 A66-14870
 Magnetohydrostatic models of long-duration sunspot of depth 1000 km 06 p0954 A66-16466
 Polar rays of solar corona, discussing distribution, magnetic field approximation, electron density and kinetic temperatures 07 p1133 A66-17418
 Sunspot cycle theory based on hydromagnetic model, with data on solar poloidal field 07 p1138 A66-18073
 Motion state of interplanetary plasma and properties of interplanetary magnetic fields, including relation to those of Sun 07 p1138 A66-18078
 Solar magnetic field may have originated during process of Sun formation from

galactic magnetic field which pervades interstellar gas from which Sun condensed 08 p1292 A66-1919
 Magnetic field level in solar corona determined from generation mechanism type II radio bursts 08 p1297 A66-1919
 Space-and time-dependent variations magnetic fields of sunspots and faculae based on daily magnetograms for several sequences of 8 to 10 days 08 p1298 A66-1919
 Graph for system of currents of solar diurnal variation during IGY winter season considering night and evening vortices individually and using coordinate system 08 p1221 A66-1919
 Solar radio emissions of various types providing diagram showing magnetic field at different heights 10 p1601 A66-2110
 Origin of solar activity cycles in solar excited oscillator assumed to exist in interior of Sun, based on statistical analysis 12 p1944 A66-2310
 Magnetic storms during IGY, assuming effect on cosmic ray intensity is associated with influence on galactic cosmic rays magnetic fields of solar and corpuscular fluxes 12 p1941 A66-2410
 Data and theories on solar and stellar magnetic fields, including techniques for analyzing extraterrestrial magnetic phenomena 12 p1953 A66-2500
 Space probe observations of solar wind solar magnetic field and interplanetary magnetic field 13 p2187 A66-2622
 Solar magnetic fields examined, noting kinematical hydromagnetic theory, useful factors opposing field concentration 13 p2189 A66-2666
 Electron stream ejection by compression sunspot magnetic fields as cause of solar flares, hydrodynamic shock waves and type IV radio bursts 15 p2574 A66-2899
 Mechanism of solar activity cycle, examining relation of stability threshold disintegration of solar magnetic belt in separate cells 15 p2576 A66-2911
 MHD wave generation in sunspot, examining depth of solar magnetic layer that affects magnetic convection 15 p2596 A66-2911
 Solar wind interaction with solar dipole magnetic field in coupled hydrodynamic and hydromagnetic equations [AIAA PAPER 66-509] 16 p2793 A66-3060
 Polar magnetic field variability confirmed by study of solar corona during total eclipses of May 30, 1965 in South Pacific 16 p2794 A66-3065
 Measuring solar radio emission polarization produced by integral solar magnetic field 16 p2795 A66-3155
 Solar magnetic field measurements noting magnetic flux, development of bipolar magnetic region, etc 17 p2996 A66-3191
 Solar magnetic field observations, discussing fine structure, twisting, field rotation, etc 17 p2998 A66-3203
 Decay time on sunspot magnetic fields calculating conductivity of solar plasma while neglecting influence of negative alpha positive hydrogen ions 17 p3000 A66-3233
 Sunspot structure organization, relation to solar magnetic field structure, Joule dissipation, etc 17 p3000 A66-3233
 Melting of solid bodies in chondrule size discussing accumulation mechanisms involving electrostatic acceleration and gas motions 18 p3225 A66-3362
 Photospheric magnetic fields of Sun discussing paths of lines of force based on pictorial records 18 p3231 A66-3434
 Magnetic field level in solar corona determined from generation mechanism of type II radio bursts 18 p3232 A66-3448
 Solar wind particle density dependence of heliographic latitude due to solar magnetic field channeling 18 p3237 A66-3504
 Neutral /zero/ points and geometry of solar magnetic fields 19 p3455 A66-3525
 Winking filaments, prominence and coronal magnetic fields 19 p3463 A66-3617
 Exact solution of MHD equation for infinite electrical conductivity and application to solar magnetic field theory 19 p3464 A66-3625
 Polar coronal ray form relationship to overall solar corona form 19 p3464 A66-3625
 Magnetic classification of solar activity

- ions based on qualitative longitudinal
magnetic field maps, noting correlation to
re production 19 p3453 A66-36607
- Morphological relations between magnetic
fields, bright plages, filaments and flares in
near active regions 19 p3453 A66-36608
- Origin of solar activity cycles in self-
excited oscillator assumed to exist in
interior of Sun, based on statistical
analysis 20 p3646 A66-37014
- Magnetic fields at various depths of solar
atmosphere measured by Crimean
Astrophysical Observatory double
magnetograph 20 p3646 A66-37029
- Unusable birefringent Fabry-Perot
interferometer used in study of solar
magnetic fields, using Zeeman
effect 20 p3558 A66-37289
- IGY data on solar flares emitting energetic
protons in sunspot groups with delta
configuration, noting occurrence where
magnetic fields have steep
gradients 20 p3630 A66-37330
- Solar magnetic field effect on solar wind,
computing solar wind properties and coronal
density distribution 20 p3630 A66-37334
- Magnetic intensity distribution, polarity
and macrostructure of solar and
interplanetary magnetic
fields 20 p3635 A66-38218
- Space- and time-dependent variations of
magnetic fields of sunspots and faculae
based on daily magnetograms for several
sequences of 8 to 10 days 21 p3812 A66-38781
- Graph for system of currents of solar
magnetic variation during IGY winter season,
considering night and evening vorticity
individually, using coordinate
system 21 p3733 A66-38793
- Arc shaped formations in solar corona,
discussing possible existence of solar
magnetic field with 22-year cycle of
variations 21 p3813 A66-39123
- Construction of model for chromospheric
magnetic field over
sunspot 22 p3985 A66-40951
- Angular velocity of solar corona
determined as function of radial distance
from Sun including effect of solar wind,
magnetic field and
viscosity 23 p4130 A66-41811
- Variation of sunspot magnetic fields
attributed to expansion and compression of
two different magnetic flux tubes due to
interchange 24 p4263 A66-42469
- Distribution of active periods of magnetic
disturbances during day and variation as
affected by contact of solar magnetic flux
with magnetosphere 24 p4204 A66-43151
- SOLAR NEBULA**
Organic matter in Orgueil meteorite and
chemical equilibrium in solar
nebula 13 p2185 A66-25837
- Organic matter in carbonaceous chondrite
s forming from chemical equilibrium in
solar nebula 13 p2185 A66-25838
- Formation of organic compounds under
conditions of thermal equilibrium, noting
aromatic compounds in solar nebula and
bases activated to plasma 22 p3860 A66-40483
- SOLAR NOISE**
Solar noise in optical communications,
background radiation dependence on
detector aperture, noise power and
application to GaAs diodes and gas
lasers 13 p2024 A66-25833
- Total electron content of ionosphere in
middle latitudes, noting results of satellite
Doppler measurements, effect of solar radio
noise flux, etc 16 p2694 A66-30706
- SOLAR OBSERVATORY**
A OSO
A OSO
Relative Wolf numbers from 1964 sunspot
observations made in
Madrid 05 p0764 A66-15325
- Classification of evolutionary phases of
sunspots by variation in umbral and
enumbal areas 05 p0765 A66-15371
- Photoelectric focus and seeing monitor for
solar telescopes, noting atmospheric
turring 09 p1382 A66-20513
- Two-year study of solar seeing conditions
with recording monitor near Sydney,
Australia indicates average of 23 sec per
hour of observation 11 p1768 A66-22365
- Radar observation of Sun, noting
continuous wave transmitter, antenna,
etc 13 p2022 A66-25537
- Collected reports on new development of
telescopic, photometric, spectrometric,
meteorological, interferometric and
detection equipment at various solar and
stellar observatories 17 p2923 A66-32020
- Parabolic radio telescope at Bordeaux solar
observatory operating at 930
mc 19 p3466 A66-36613

Conference Philadelphia, September
1964 13 p2002 A66-26604
- Power source comparison for manned
space stations including solar cell,
thermionic, Mercury-Rankine and Brayton
systems
[AIAA PAPER 64-721] 13 p2004 A66-26616
- Weight, size and volume characteristics of
Mercury Rankine solar power supply for
spacecraft
[AIAA PAPER 64-724] 13 p2005 A66-26633
- Solar thermionic power conversion,
discussing converters, flux and temperature
controls, energy storage generators, support
structures, etc
[AIAA PAPER 64-734] 13 p2006 A66-26641
- Effect of inaccurate orientation of
paraboloid of mirror-type solar power unit
on collecting efficiency under static
conditions 20 p3502 A66-37736
- Reliability consideration effect on solar-
powered electric-propulsion system
design 20 p3568 A66-37908
- Photoelectric solar power plant for water
pumps in grazing areas noting design,
construction and automatic control system
testing 20 p3503 A66-38438
- Solar hybrid systems /photovoltaic-
thermoelectric and photovoltaic-thermionic/
analyzed, determining potential for missions
close to Sun 23 p4019 A66-41746
- SOLAR PROBE**
Semiqualitative evaluation of instrument
requirements of solar probe as function of
perihelion 01 p0142 A66-10790
- Suitability of Saturn IB/Centaur and Atlas/

Centaur launched solar-electric propulsion vehicles for performing 0.1-AU solar probe mission
[AIAA PAPER 66-496] 17 p2991 A66-32773

Selection of elliptic orbit for solar probe craft without undue perihelion growth
[AIAA PAPER 64-646] 19 p3459 A66-35601

Scientific objectives and instrumentation of solar probes, emphasizing flare investigation
24 p4277 A66-42677

Repeated close Venus flybys and several close solar approaches incorporated in same mission
24 p4278 A66-42687

SOLAR PROMINENCE

S PROMINENCE

SOLAR PROPULSION

Satellite orbit position control using solar pressure for linear propulsion and Earth gravitational and magnetic field for attitude control
[AIAA PAPER 64-661] 03 p0424 A66-12738

Feasibility design study of solar powered ion propulsion system for interplanetary spacecraft
[AIAA PAPER 66-214] 12 p1936 A66-24524

Solar wind engine for generating electric power and for propulsion of space vehicles
[AIAA PAPER 66-596] 18 p3165 A66-34446

SOLAR PROTON

Satellite observation of solar protons from flares in September 1963, measuring impact zone effect, differential spectrum, latitude distribution of proton energies, proton fluxes, cosmic noise absorption,
03 p0417 A66-12649

Balloon measurements of solar protons and auroral X-rays discussing radiation detectors, flight techniques, instrumentation and results
03 p0417 A66-12654

Precipitation of solar cosmic ray particles in polar cap regions detected, using test network for reliability of VLF phase recordings on transpolar propagation-paths
03 p0417 A66-12655

Diffusion coefficient of solar protons in steady state electromagnetic medium of interplanetary space increases with increase in proton momentum
04 p0574 A66-13839

Solar cosmic ray generation, discussing proton energy spectrum analysis and wave propagation in interplanetary space
05 p0751 A66-15374

Experiments on solar particles noting abundance of solar cosmic rays, energy region, spectrum of solar protons, sudden commencement, etc
07 p1130 A66-18080

Polar cap absorption effect on polar VLF emissions used for analysis of solar proton events
09 p1374 A66-20880

Proton injection into radiation belts for large B-L space regions by cosmic ray and solar proton albedo neutron decay injection
11 p1764 A66-23130

Upper bounds on steady state and pulse outflow of neutrons from Sun determined by assuming neutron-decay protons diffuse in interplanetary magnetic field
11 p1764 A66-23131

Al-26 and Be-10 radioactivities in cores of Pacific sediments and implications regarding low-energy proton flux in interplanetary space over last 100,000 years
12 p1943 A66-24236

Stratospheric recordings of solar cosmic rays from chromospheric flares, calculating and comparing diffusion coefficient of cosmic rays and energy spectrum of solar protons
12 p1943 A66-24281

Solar protons from class 2 solar flare of February 1965 measured from satellite 1964-45A
13 p2175 A66-26351

Riometer absorption caused by solar protons and alpha particles in monoenergetic intensities and in spectral distributions
15 p2574 A66-28818

High energy solar proton propagation in interplanetary magnetic field by Fokker-Planck equation
15 p2575 A66-29081

Proton flux measured by satellite at high latitude compared to ionospheric absorption measured with riometers, noting absorption variation with latitude across polar caps
15 p2576 A66-29228

Polar cap absorption observational results from ionospheric soundings, proton flares before 1956 and prediction for 1966-68
15 p2591 A66-30019

Solar flare analysis by examination of high

energy gamma rays, noting solar proton and solar material interaction, energy spectrum, generation of fast protons and alpha particles, etc
15 p2592 A66-30076

Solar wind proton measurements by Vela II satellite electrostatic analyzers and relationship between temperature, solar wind velocity and geomagnetic disturbance index
16 p2793 A66-30184

Solar protons and neutrons shown not to play important part in production of radiation belt protons
17 p2993 A66-32529

Solar wind observations with Explorer XII and IMP, noting periodic fluctuations in solar proton flux and detection of 3 mev electrons of interplanetary origin
18 p3167 A66-34335

Solar particle propagation in magnetic fields revealing anisotropies in proton flux analyzed from Pioneer VI space probe data
18 p3170 A66-34536

Cosmic radiation, interplanetary magnetic field, solar proton propagation long-term /solar cycle/ modulation of intensity, Forbush effect and daily intensity variation
18 p3175 A66-34741

Time lag of beginning of polar cap absorption effect or cosmic ray increase after occurrence of Y-shaped phase development in solar flare
19 p3453 A66-36298

High energy gamma rays energy spectrum of solar flares, elucidating proton interaction with solar material
23 p4123 A66-41276

Initial phase of polar cap absorptions analyzed by use of corrected geomagnetic coordinates and compositions of solar cosmic radiation
24 p4262 A66-42461

Ionization level of D region at middle geomagnetic latitudes as affected by fast proton flux
24 p4265 A66-42757

SOLAR RADIATION

Relation between high pressures and elastic properties of materials present in interior of Sun during process of condensation
01 p0135 A66-10297

Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc
01 p0133 A66-10755

Book on UV radiation covering arcs, incandescent radiation sources, solar radiation, transmission, reflection, detectors and application
01 p0107 A66-10979

Solar radiation simulation - ASTM and IES International Symposium, Los Angeles, January 1965
02 p0210 A66-11212

Effectiveness of albedo and Earth radiation simulation, examining fixed chamber and fixed vehicle techniques
02 p0211 A66-11216

Establishing absolute value for total wavelength integration of solar irradiance at Earth upper atmospheric limit and spectral distribution of this radiation
02 p0279 A66-11220

Spectral match tolerance selection for solar simulator with respect to various test specimens
02 p0214 A66-11237

Radiation measurements made at Antarctic station at Mirny including solar radiation, total radiation and short and long wave reflection and radiation
02 p0220 A66-11260

Solar UV radiation measurements in stratosphere for calculating ozone production
02 p0283 A66-11573

Influence of absorption of aerosol particles on extinction of solar and sky radiation
02 p0225 A66-12214

Precipitation of solar cosmic ray particles in polar cap regions detected, using test network for reliability of VLF phase recordings on transpolar propagation-paths
03 p0417 A66-12655

Solar modulation of low-energy galactic helium spectrum as observed on IMP I satellite
03 p0418 A66-12671

Satellite orbit position control using solar pressure for linear propulsion and Earth gravitational and magnetic field for attitude control
[AIAA PAPER 64-661] 03 p0424 A66-12738

Rocket launching through aurora of high luminosity spectrograph and liquid ammonia to study behavior under solar radiation
03 p0426 A66-12870

Diffusion of solar particles by

interplanetary magnetic field
03 p0422 A66-12870

Ionization by solar photons in thermoelectronic converters
03 p0323 A66-12970

Electrochemical current generator principles based on oxyhydrogen fuel cell for space travel, stressing regeneration by using solar radiation in photochemistry
04 p0459 A66-13544

Viewing geometry in interpretation of reflected solar radiation data from Thirc IV
04 p0515 A66-13677

Space exploration discussing terrestrial effects of electromagnetic and corpuscular solar radiation
04 p0574 A66-13839

Book on lower ionosphere physics noting radio wave propagation, ionospheric currents, solar radiation and flares, ion kinetics, electron collision frequencies, etc
04 p0515 A66-13833

Solar radiation measurements made between 1957 and 1964 at different stations, defining optical transparency for each location
05 p0711 A66-14677

Impulsive emission of approximately 40-keV electrons from Sun observed from Mariner IV
05 p0746 A66-14777

Relativistic electron precipitation into mesosphere at subauroral latitudes and observations of solar proton and absorption event
05 p0747 A66-14787

Transfer equation of solar absorption line developed with split upper level in magnetic field
05 p0759 A66-14877

Mid-day dayglow intensities arising from solar ionizing radiation fluorescence
05 p0748 A66-14947

Physics of cosmic rays - All-Union Conference, Apatity, U.S.S.R., August 1964
05 p0749 A66-15377

Minimization of solar radiation pressure effects for gravity-gradient stabilized satellites, primarily attitude errors on pressure torques
[ASME PAPER 65-WA/AUT-2] 05 p0770 A66-15707

Direct and indirect converters emphasizing preconcentration of solar radiation, noting thermophotovoltaic generators of p-i-n type
06 p0807 A66-15918

Detection of solar neutrinos via Ga-Ge reaction
06 p0951 A66-16774

Comet gas production rate calculated from whiplike icy-conglomerate model, considering energy balance between solar radiation and reradiation plus evaporation by comet
06 p0956 A66-17011

Absorption effect on Rayleigh atmosphere, calculating reflected and transmitted intensities and polarizations for C wavelength pair used for Umkehr measurements
07 p1028 A66-17364

Directional radiative characteristics of conical cavities and relation to reflective characteristics of Moon
07 p1136 A66-17729

Total radiation intensity in interplanetary space before and after solar events of March 29 and April 9, 1960
07 p1120 A66-17978

Sine of angle of incidence of solar radiation graphically represented as geometrical factor of irradiation intensity
08 p1283 A66-18626

Hypersonic collisionless source flow analysis of comet dust tail model, assuming composition consists of small dust particles acted upon by solar radiation pressure
[AIAA PAPER 66-32] 08 p1289 A66-18948

Planet-wide characteristics of ionospheric perturbation as indication of solar radiation
08 p1214 A66-19047

Solar energy for power requirement aboard satellites and spacecraft, noting thermal conversion efficiency by various methods for capturing solar radiation
08 p1174 A66-19753

Solar diurnal variation data used to determine parameters of phase-amplitude modulation of periodic cosmic-ray variations
08 p1286 A66-19788

Light nucleus content of primary cosmic radiation from Soviet flight observations, noting production mechanisms
09 p1440 A66-20225

Handbook of geophysics and space environments, 1965
09 p1370 A66-20267

Solar electromagnetic radiation studied in terms of irradiance, UV and X-rays and

- 09 p1454 A66-20283
 upper atmospheric parameters that control
 time electron density distributions in F-1
 ion determined with use of N/h/
 profiles 09 p1372 A66-20369
 solar radiation effect on Langmuir
 frequency, noting ionization of cesium vapor
 low potential
 References 09 p1409 A66-20925
 laser radar as instrument to obtain
 operational meteorological
 information 10 p1540 A66-21067
 SO observations of EUV radiation applied
 identification of emission lines in spectral
 region 170-1400 angstroms 10 p1597 A66-21080
 solar X-ray and UV radiation
 measurements by monitoring satellite,
 including instrumentation 10 p1598 A66-21085
 of analytical solution for values of ratio
 gray absorption coefficients for insulating
 escaping radiation /greenhouse
 parameter/ assumed constant at all depths,
 presenting temperature distribution
 graphs 10 p1605 A66-21204
 ionosphere formation theory, reviewing
 solar radiation, absorption, ionization cross
 section rate, electron removal in F and
 E layer, etc 10 p1533 A66-21851
 twelve monthly world maps of daily means
 total solar radiation incident on
 horizontal surface 11 p1702 A66-23156
 solar radiation flux received on surface at
 any prescribed attitude calculated in terms
 total radiation 11 p1702 A66-23157
 data on satellite orbits used for Earth
 figure, upper atmosphere density, solar
 radiation, etc 12 p1868 A66-23637
 space exploration, discussing terrestrial
 aspects of electromagnetic and corpuscular
 solar radiation 12 p1938 A66-23638
 small cosmic ray bursts effect on
 magnetic activity and nature of high-
 energy solar cosmic ray propagation in
 interplanetary space 12 p1942 A66-24179
 atmospheric density models for solar
 radiation cycle variation in upper
 atmosphere
 [AIAA PAPER 66-355] 12 p1951 A66-24490
 Laboratory studies of heat balance in
 rocket-sonde thermistors for measurement of
 upper air temperature, noting dissipation
 constant and solar radiation effect
 [AIAA PAPER 66-386] 12 p1883 A66-24509
 intensity variations of 5303 and 6374
 angstrom coronal lines during last two solar
 cycles compared 12 p1952 A66-24931
 Photogrammetric analysis of structural
 deviations of 44-ft parabolic solar
 reflector 13 p1998 A66-25606
 Techniques for rocket solar UV and for
 V spectroscopy 13 p2081 A66-26013
 Interaction mechanism between internal
 gravity waves and radiative photochemical
 processes, noting solar radiation absorption,
 heat of atomic oxygen recombination,
 etc 13 p2073 A66-26129
 Violation of second and third adiabatic
 invariants, examining mirror point change of
 trapped particles under displacement of
 guiding centers along force-lines and
 particle diffusion 13 p2176 A66-26356
 Rayleigh scattering intensities in upper
 atmosphere 13 p2075 A66-26737
 Effect of aperture and atmospheric
 turbidity on readings of pyrheliometers
 considered, based on measurements
 concerning radiation intensity within solar
 aureole 14 p2282 A66-26930
 Book on solar radiation including
 astronomical and geographical factors,
 atmosphere effect, energy distribution,
 instruments, application, etc 14 p2283 A66-26946
 Falling sphere, solar XUV radiation
 absorption and pressure gauge mass
 spectrometry for density measurements of
 atmosphere, comparing results and noting
 discrepancies 14 p2284 A66-27615
 Orbital eccentricity of balloon satellites
 Echo I, Echo II and Explorer XIX,
 discussing influence of solar radiation
 pressure 14 p2383 A66-27824
 Calibration of spectral apparatus for visible
 region of spectrum with measurements of
 spectral fluxes of total and scattered
 radiation, atmospheric spectral transparency,
 etc 14 p2285 A66-27854
 Laboratory simulation of solar radiation
 under varying atmospheric
 conditions 14 p2327 A66-28135
 Energy spectrum of primary photoelectron,
 using data from atmospheric density
 distribution, fluxes of solar XUV radiations
 and absorption and ionization cross
 sections 15 p2574 A66-28906
 Millimeter wavelength solar radiation
 consisting of thermal, slowly varying active
 and burst components and eclipse
 measurements of brightness
 distribution 15 p2594 A66-29001
 Atmospheric turbidity measurements over
 India, using daily direct solar radiation
 measurements for selected spectral regions
 and entire spectrum 15 p2485 A66-29065
 Cosmos-65 spectrophotometric
 measurements of atmosphere-reflected UV
 radiation spectra 15 p2485 A66-29076
 Solar UV reflection and scattering from
 Earth atmosphere, use in determining total
 concentration and vertical distribution of
 ozone 15 p2486 A66-29090
 E layer ionization and characteristic
 number as affected by solar X radiation in
 44-60 angstrom range 15 p2487 A66-29097
 Relation between solar radiation and
 electron concentration up to F layer
 analyzed in winter and
 summer 15 p2487 A66-29106
 Planetary albedo as affected by solar
 radiation reflected from surface of red clay
 soil or white quartz sand 15 p2597 A66-29258
 Ionization process in comets does not
 depend on solar electromagnetic or
 corpuscular radiation, considering it as
 intrinsic property of cometary
 atmospheres 15 p2598 A66-29267
 British space research for 1965-66 including
 rocket development, satellite tracking, solar
 radiation, ionospheric sounding,
 etc 15 p2599 A66-29898
 UV solar radiation absorption in upper
 atmosphere determined from measurement
 of photoelectron currents emitted by planar
 metallic orthogonal photocathodes onboard
 Cosmos II satellite 15 p2592 A66-30051
 Early morning ionospheric characteristics
 measured by geophysical rocket, noting
 electron concentration, solar UV emission
 intensity changes, electron temperature,
 absorption profile, etc 15 p2494 A66-30052
 High resolution density data from radar
 observations of low altitude, polar orbiting
 satellites reveal longitudinal and
 geomagnetic variation, noting regression
 analysis 15 p2497 A66-30085
 Absorption of solar neutrinos in
 deuterium 16 p2792 A66-30144
 Solar radiation absorption by atmospheric
 water vapor, deriving formulas that include
 scattering and absorption by aerosol as
 additional parameter 16 p2691 A66-30228
 Pyrheliometers, noting performance,
 application, environmental effects and
 calibration based on black body
 radiation 16 p2703 A66-30509
 Radiometric temperature measurement of
 Mars surface microclimate, examining heat
 flow balance, taking into account solar and
 planetary radiation effects
 [AIAA PAPER 66-436] 16 p2799 A66-30522
 Solar environment and aerodynamic drag
 effect on deflection of structural booms in
 space
 [AIAA PAPER 66-502] 16 p2821 A66-31478
 Feasibility of doping techniques for
 eliminating extraterrestrial solar degradation
 of ZnO used as pigment for spacecraft
 thermal control surfaces 17 p2938 A66-31961
 Crystal spectra and broadband
 measurements of solar and galactic UV, X-
 rays, gamma rays, etc, outside Earth
 atmosphere 17 p2998 A66-32030
 Solar UV synthesis of nucleoside
 phosphates from terrestrial atmosphere,
 discussing irradiation of adenine-ribose-
 phosphoric acid solution 17 p2851 A66-32090
 Relative values and daily totals for
 calculation of global and solar
 radiation 17 p2917 A66-32269
 Source distributions of UV and X-ray
 emission in corona and chromosphere
 determined from flight of spacecraft-borne
 instruments into Earth
 shadow 17 p3001 A66-32465
 Spectral composition of direct solar
 radiation variation with height of Sun and
 relation between aerosol absorption band
 and humidity 17 p2994 A66-32857
 Solar radiation and lunar observations at
 submillimeter wavelengths using Fabry-Perot
 interferometer 17 p3005 A66-33007
 Radioactive heating effect on icy
 conglomerate cometary nucleus and splitting
 from solar heat shock 17 p3009 A66-33370
 Detection of solar neutrinos for analysis of
 solar structure, using various detector types
 and recoil electrons in neutrino-electron
 elastic scattering process 18 p3223 A66-35214
 Evaluation of predicted effect of elastic
 solar neutrino scattering on electrons of
 medium, using graph 18 p3223 A66-35215
 Various light nuclei considered as possible
 solar neutrino detectors, deriving cross
 sections and angular distributions of
 electrons 18 p3223 A66-35216
 Electron and ion concentrations as function
 of solar radiation intensity and variation of
 ionospheric conditions, noting nitrous oxide/
 oxygen ion ratio 19 p3345 A66-35287
 Detection of solar neutrinos via Ga-Ge
 reaction 19 p3452 A66-35371
 Quantitative analysis of transient luminous
 phenomena on lunar surface and relation to
 solar electromagnetic or corpuscular
 excitations 19 p3457 A66-35446
 Negative hydrogen ions as cause of
 continuous emission in solar
 flares 19 p3453 A66-36297
 Cryogenic system used to remove heat
 from space simulator solar radiation
 source 20 p3541 A66-37071
 Energy reflected from subsolar point on
 Moon determined, noting energy balance and
 radiated energy 20 p3656 A66-38052
 Upper atmospheric parameters that control
 daytime electron density distributions in F-1
 region determined with use of N/h/
 profiles 20 p3636 A66-38235
 Solar radiation control for changing
 meteorological conditions in lower
 atmospheric layer 20 p3594 A66-38373
 Behavior of postulated lunar surface
 materials due to environmental high
 vacuum, examining micrometeoroid impact
 and solar radiation effect 21 p3810 A66-38506
 Global solar radiation distribution in three
 spectral regions at Genoa measured by
 thermopiles with various
 filters 21 p3731 A66-38628
 Solar diurnal variation data used to
 determine parameters of phase-amplitude
 modulation of periodic cosmic-ray
 variations 21 p3809 A66-38784
 Attitude errors of inertially coupled
 gravity gradient satellite with solar radiation
 pressure as dominant disturbance, noting
 slot problems in stabilized package
 accommodating damper
 motion 21 p3820 A66-38861
 Total solar radiation intensity
 measurements by pyranometric and
 heliographic methods, noting relation to
 sunshine duration 21 p3733 A66-39101
 Radio source flux density relation to
 antenna temperature studied, using antenna
 integral and convolute
 integral 22 p3862 A66-39814
 Ionization and constitution of neutral
 atmosphere, including solar EUV, X-ray and
 corpuscular sources 22 p3905 A66-39944
 Environmental simulation of aerospace
 missions including solar radiation, high
 vacuum, zero g, micrometeorites,
 etc 22 p3886 A66-40131
 Interplanetary space environment effect on
 surface thermal radiative properties, noting
 results of exposure to simulated solar
 plasma, solar UV, solar wind,
 etc 22 p3889 A66-40218
 Direct solar radiation predetermination and
 extinction coefficient
 statistics 22 p3912 A66-40243
 Solargraphic measurements of solar
 radiation absorption by atmospheric dust
 and pollutants and effects on solar energy
 transmission 22 p3912 A66-40244
 Solar radiation passage through Earth
 atmosphere in triplet lines O I, considering
 molecular hydrogen absorption and
 brightness distribution of
 radiation 22 p3973 A66-40472
 Emission rim formation at filaments caused
 by chromospheric excitation by radiation
 reflected from filament 23 p4126 A66-41077

Ionized calcium luminescence in large chromospheric flare, noting K line broadening due to nonthermal turbulent motions 23 p4126 A66-41078

Excitation of H-alpha lines in solar chromosphere from internal and external sources, noting theoretical and empiric results 23 p4127 A66-41080

Time dependent behavior of temperature and density in monoconstituent atmosphere under diurnal photoheating and cooling by conduction, analyzing effect of atmosphere rotation eastward 23 p4064 A66-41678

Altitude profiles for dayglow emissions excited by molecular ion dissociative recombination, solar radiation fluorescence, oxygen photodissociation, electron collisions and chemical reactions 23 p4064 A66-41680

Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere-corona transition region 23 p4130 A66-41809

Initial phase of polar cap absorptions analyzed by use of corrected geomagnetic coordinates and compositions of solar cosmic radiation 24 p4262 A66-42461

Cometary nature and phenomena, emphasizing uncertainty of composition of icy snowbank, physical interaction of gases and dust with solar wind and solar radiation 24 p4276 A66-42662

SOLAR RADIATION OBSERVATION

Solar radiation measurements made in four stations from 1957 to 1963 show dependence of atmospheric long-wave radiation on water-vapor pressure and cloudiness 04 p0542 A66-13818

Low energy spectrum of cosmic rays corrected for solar modulation and diffusive passage through interstellar matter 04 p0574 A66-14014

X-ray photograph confirmation in 1964 of solar brightness distribution derived from ionospheric observations during solar minimum in 1954 04 p0579 A66-14179

Solar radiation attenuation in UV region provides data on production of atomic oxygen by photodissociation of oxygen and ion and electron formation by photoionization of nitrogen and oxygen 05 p0748 A66-15022

Solar thermonuclear process, radiation phenomena, structural measurements, observations and properties 05 p0767 A66-15757

Diurnal intensity time variation of cosmic ray neutrons compared with relative number of sunspots observed 07 p1127 A66-18014

Solar and sky radiation and short wave albedo measured at altitudes approaching 20,000 ft in high Himalayas 11 p1765 A66-23384

Solar radiation measurements from 50 micrometers to 1 mm at Kitt Peak National Observatory near Tucson 15 p2594 A66-29000

Neutrino flux calculation based on models of solar interior with tabulated results 19 p3454 A66-36794

Solar radio astronomy and radiation observation, describing mechanisms of radio wave emission and propagation through solar atmosphere 20 p3651 A66-37435

Equinoxes, having highest solar corpuscular radiation hitting probability, as observation periods for geomagnetic activity, aurora, etc 24 p4274 A66-42433

SOLAR RADIATION SHIELD

Astronauts with thin shielding in radiation exposure from heavy nuclei in solar particle beams 09 p1336 A66-20521

Solar radiation protection based on charged particle motion through magnetic field of solenoid [AIAA PAPER 66-512] 16 p2811 A66-31481

Possible stabilization of AgCl crystals against solar radiation effects by addition of Cu, Ni, Zn, Cs, S or Hg 18 p3157 A66-34549

SOLAR RADIO BURST

Coronal shock waves causing type II bursts of solar radiation, determining amplitude of plasma oscillations and radio emission intensity 01 p0131 A66-10266

Solar flare characteristics interrelation with magnitude of resultant blast wave, examining sudden commencement of geomagnetic storms 01 p0063 A66-10891

Sporadic solar radio emission at decimeter wavelength and relation to chromospheric flares 03 p0422 A66-12914

Harmonic structure and band splitting of type II solar radio bursts 03 p0429 A66-13179

Correlation between solar bursts observed in Colorado and riometer records in Brazil, using Yagi antenna 05 p0747 A66-14799

Solar thermonuclear process, radiation phenomena, structural measurements, observations and properties 05 p0767 A66-15757

Current knowledge and theories of solar radio bursts and flares of various types, coronal condensation effects and quiet Sun as sources of radiation 07 p1118 A66-17631

Magnetic field level in solar corona determined from generation mechanism of type II radio bursts 08 p1297 A66-19454

Solar radio emissions of various types, providing diagram showing magnetic field at different heights 10 p1601 A66-21062

Alouette I satellite observations of solar radio bursts and other noise enhancements 10 p1604 A66-21116

Solar radio bursts used to study physical properties of corona 10 p1609 A66-21853

Catalog of 174 type IV solar bursts recorded from 1956 to 1963 11 p1769 A66-22476

Solar burst radiometer for radio astronomy Explorer satellite, measuring spectral energy distribution below ionospheric cut-off level 12 p1883 A66-24679

Solar radio burst at night during recording of 18-mc galactic noise by globally located antennas 13 p2176 A66-26367

Multiple element swept-lobe interferometer for study of solar radio bursts 13 p2084 A66-26569

Sporadic solar radio emission at decimeter wavelength and relation to chromospheric flares 14 p2376 A66-27263

Association rate between solar flares and type II bursts 14 p2376 A66-27798

High resolution observation of radio emission from active regions in solar corona at 26.3 mc/s 14 p2386 A66-28124

Electron stream ejection by compression of sunspot magnetic fields as cause of solar flares, hydrodynamic shock waves and type IV radio bursts 15 p2574 A66-28901

Millimeter wavelength solar radiation consisting of thermal, slowly varying active and burst components and eclipse measurements of brightness distribution 15 p2594 A66-29001

Type I solar radio bursts possibly caused by interaction of coronal electrons and finite-amplitude MHD pulses 15 p2576 A66-29133

Polarization characteristics of type IV solar radio bursts noting position, direction and frequency range 16 p2793 A66-30653

Physical interpretation of type IV bursts, accounting for polarization characteristics, noting gyroresonance radiation due to lower energy electrons 16 p2794 A66-30654

Total electron content of ionosphere in middle latitudes, noting results of satellite Doppler measurements, effect of solar radio noise flux, etc 16 p2694 A66-30706

Radio astronomy applications, noting solar and galactical emissions, planetary radiation measurement, instrumentation, etc 17 p2998 A66-32028

Magnetic field level in solar corona determined from generation mechanism of type II radio bursts 18 p3232 A66-34483

Type V solar radio bursts, examining phenomenological features and properties 18 p3234 A66-34614

Statistical correlation between decimeter type III and type III/V solar radio bursts and microwave bursts and chromospheric flares 18 p3234 A66-34615

Degree and phase of polarization of short-lived features in solar radio emission of spectral type II 18 p3238 A66-35085

Energy distribution of trapped electrons producing solar microwave impulsive radio bursts and X-ray bursts from Sun 20 p3634 A66-38213

Data statistical analysis of solar radio bursts over wide frequency range and relation to solar flares 21 p3815 A66-39372

Theoretical model for high energy phase of solar flares including radio bursts, proton

acceleration and plasma cloud ejection 22 p3973 A66-40531

Solar radio research utilizing two dynamic spectrographs to obtain amplitude polarization of radio bursts with high time resolution, noting frequency splitting 23 p4131 A66-41861

Solar flare and sunspot X-ray and radio burst correlation, noting sudden ionospheric disturbances 24 p4262 A66-42461

Solar radio bursts, discussing metric and decametric emission classification via ground-based and satellite mounted radio spectrographs 24 p4264 A66-42651

SOLAR RADIO WAVE

Radiative transfer equation for isothermal model of solar corona, noting radiation flux and electron density variation 01 p0131 A66-10266

Chromospheric and coronal propagation of disturbing agents generating changes in intensity of solar radio emission 02 p0287 A66-11481

Spacecraft instrumentation and orientation techniques for solar electromagnetic radiation study 03 p0370 A66-12863

Textbook on observations, interpretations and associations of solar radio emission, relating them to understanding of solar physics and Sun-Earth environment 03 p0428 A66-12993

Solar boresighting of S-band antennas for long range tracking radar 04 p0479 A66-13618

Variations of flux of solar radio emissions in 3 to 450 cm range over 11-year cycle /1953 to 1963/ 05 p0748 A66-14868

Characteristics of radio sources over active regions of Sun 05 p0764 A66-15317

Constant and varying components of centimeter and decimeter solar radio emissions 05 p0766 A66-15479

27-day variation of solar radio flux at 10.7 and 20 cm 11 p1768 A66-22378

Statistical study of frequency spectrum of slowly varying component of solar radio emission related to sunspots and flocculi 12 p1950 A66-24248

Study of 102 active solar centers associated with radio emission observed at 3 cm from July 1959 to December 1963 12 p1952 A66-24930

High resolution East-West antenna array for solar studies designed to operate at 408 mc 13 p2180 A66-25428

Solar radio observation at 600 mc frequency during 1961 at French station, noting flux density and solar daily variation 13 p2188 A66-26322

Absolute calibration of solar radio flux density at 1000, 2000 and 3750 mc, using newly constructed standard horns 13 p2189 A66-26568

Measuring solar radio emission polarization produced by integral solar magnetic field 16 p2795 A66-31554

Solar active region analysis at radio frequencies, using fan or pencil beam scanning and superposition of wide beam transit curves 17 p3007 A66-33083

Solar radio activity in 1963, discussing daily flux density, mean variations, etc 19 p3458 A66-35467

Interferometric observation of flux densities of solar radio emission at 4000 mc/sec and relationship to 27-day recurrence tendency of summation of planetary 3-hour indices 20 p3634 A66-38214

SOLAR REFLECTOR

Photogrammetric analysis of structural deviations of 44-ft parabolic solar reflector 13 p1998 A66-25606

SOLAR ROTATION

Radar measurement for rotation period of planet Mercury 03 p0426 A66-12891

Tidal de-spin of Mercury and Moon noting solar torque on planets 03 p0426 A66-12892

Planetary orbits affected by rotation-induced solar quadrupole moment and effects of noncoplanarity of ecliptic and solar equator 08 p1293 A66-19267

Polar rotation of Sun, discussing meridional drift, photospheric currents, zonal currents and polar retardation 13 p2187 A66-26136

Solar rotation as solid body and as rapidly rotating core and slowly rotating atmosphere braked by solar wind 18 p3166 A66-34154

Contribution of rotating solar polytropes to

- helion advance of planet Mercury
ulated as function of observable solar
teness 18 p3233 A66-34571
- ar rotation rate determined from
itudinal motion of sunspots, noting
meters of
ervation 21 p3816 A66-39555
- SAIL**
- ar sail attitude stabilizer integration
thermionic power generation to obtain
ht, simplicity and reliability
ntages 03 p0431 A66-12762
- SENSOR**
- ontrol signal generator and output
acteristics of angular position and
city sensors used in single-axis Sun-
nted system of Vostok
ecraft 19 p3394 A66-35280
- SIMULATION**
- ar radiation simulation - ASTM and IES
ernational Symposium, Los Angeles,
ary 1965 02 p0210 A66-11212
- urface temperatures in space solar
ulator may differ from thermal design
ectations plus or minus 10 degrees

data on continuous absorption
coefficient 13 p2180 A66-25421
- IR radiation deficiency of Sun determined
by interferometric measurement of solar

spectrum 13 p2182 A66-25572
 Acoustic waves and convection effect on asymmetries of weak to medium-strong solar lines 13 p2183 A66-25614
 Macroscopic inhomogeneities in solar atmosphere, noting vertical velocity fluctuations in chromosphere, oscillation spectrum, etc 13 p2183 A66-25616
 Atmospheric absorption in IR region, noting effects of water vapor, ozone, carbon dioxide and collision-induced dipole moments 13 p2075 A66-26603
 Ground-based absolute measurements of energy in solar spectrum using relative aureole criterion of atmospheric scattering 14 p2376 A66-27261
 Profiles of intense resonance lines and variation from center of limb of solar disk 14 p2380 A66-27266
 Broadening of Fraunhofer hydrogen lines in solar spectrum, noting Stark effect 14 p2380 A66-27274
 Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 15 p2483 A66-28530
 Penetration and absorption of solar optical, UV and EUV radiation in upper atmosphere /ionosphere, exosphere and ozone layer upper boundary/ 15 p2573 A66-28683
 Atmospheric turbidity measurements over India, using daily direct solar radiation measurements for selected spectral regions and entire spectrum 15 p2485 A66-29065
 AFCRL grazing incidence grating monochromator used with thin window flow Geiger detector on Aerobee rocket for solar spectrum recordings between 30 and 130 angstroms 15 p2605 A66-30079
 Absence of temperature difference between solar equatorial and polar limb near minimum, employing photoelectric comparison of Fraunhofer line strengths 16 p2800 A66-30643
 Magnesium I lines in solar spectrum searched on basis of multiplet table of wavelengths, intensities, excitation potentials of magnesium spectrum 16 p2802 A66-30939
 Radiation and structure of solar atmosphere, bibliographic review discussing solar spectrum, photosphere, chromosphere, corona, eclipses of 1962 and 1963, etc 17 p2997 A66-32022
 Solar corona emission spectrum and narrow passband photography of solar disk, noting measurement of intensity variation and absorption coefficient 17 p2999 A66-32133
 Phosphorus I lines identified in lambda greater than 2935 region of solar spectrum with aid of tables of Fraunhofer lines 17 p2999 A66-32267
 Flare observations in H-alpha line, line and continuous spectra of flares, and optical characteristics of proton 17 p2993 A66-32364
 Spectroscopy of highly ionized atoms in problems which arose from solar spectrum study 17 p3006 A66-33074
 Solar XUV spectrum, discussing spectral lines, variations, structure of chromosphere and corona 18 p3229 A66-34137
 Saturation problem for middle sections of CO solar spectral lines, using thin layer absorption concept 18 p3232 A66-34482
 Fraunhofer spectrum of singly ionized yttrium extended in IR solar spectrum 18 p3236 A66-34892
 Astronomical photography of solar disk, revealing facula at 2190 angstroms and producing limb darkening curves 18 p3236 A66-34899
 Profile and center-to-limb variation of IR helium I triplet at 10,830 angstrom photoelectrically observed in spectrum of undisturbed solar disk 18 p3237 A66-35045
 Interior temperature of Sun determined, using high and low threshold solar neutrino detectors 18 p3238 A66-35218
 Solar neutrino detection via neutrino-chlorine reaction, discussing energy level positions and probabilities of beta transition 18 p3223 A66-35219
 Boron abundance in Sun from B I lines and solar spectra 19 p3458 A66-35490
 Magnesium 3 line profiles observed on solar disk and chromosphere used in determining empirical source function

variations and chromospheric profiles 19 p3465 A66-36611
 Equivalent widths of spectral lines in solar spectrum used to determine strontium abundance 19 p3465 A66-36612
 Fourier transform used in correction of instrument contour error when observing solar spectral line profile 20 p3647 A66-37042
 Hydrogen line profile in Paschen series of solar spectrum, taking into account Stark effect and line broadening 20 p3648 A66-37045
 Detectability of coronal IR lines due to Mg, Al and Si ions with practicable IR spectrometers and photoconductive detectors, considering atmospheric attenuation 20 p3649 A66-37333
 Intensity and center-to-limb variation of continuous solar spectrum for several models of chromosphere 20 p3650 A66-37340
 Coronal emission-line intensities in extreme UV, calculating fluxes for resonance lines of coronal ions from rocket measurement data 21 p3816 A66-39553
 Coronal emission lines in presence of strong sky background utilizing difference between gradients of line and sky intensities 21 p3816 A66-39554
 Upper limits resulting from search for solar photons in 100-kev to 2-mev range from balloon observations 22 p3973 A66-40549
 Behavior of lambda 6300 angstrom Fraunhofer absorption line in solar spectrum 22 p3984 A66-40850
 Optical depths of titanium I absorption lines in solar spectrum 22 p3984 A66-40853
 Correction method for instrumental astigmatism to determine center-to-limb variation of solar UV continuum 22 p3984 A66-40891
 Rotational temperatures of CO molecule oscillative-rotational bands in solar atmosphere, refuting assumed temperature nonuniformities 22 p3985 A66-40949
 Hydrogen, He and ionized Ca lines in chromospheric spicules, noting large-scale motion in spicule interior indicated by line width expansion and peculiarities in shape of line contours 22 p3975 A66-40950
 Diffusion emission of solar prominences in hydrogen alpha Balmer line, noting luminescence due to resonance scattering of solar emission 23 p4126 A66-41073
 Comparison of faint and bright solar prominences, analyzing hydrogen and metallic spectra of three bright and four faint prominences 23 p4126 A66-41074
 Spectrophotometry of four bright prominences with respect to kinetic temperature, Doppler half-widths and population levels 23 p4126 A66-41075
 Spectrum of large sunspot moving across solar disk for various positions with respect to central medium 23 p4127 A66-41079
 Criticism of identification of bismuth lines with lines of solar spectrum based on analysis of new tracings of solar spectrum by Kachalov 24 p4278 A66-42709
 High resolution photoelectric tracings of solar spectrum obtained at solar spectrometry station at Jungfraujoch Scientific Station 24 p4279 A66-42710
 Solar abundances of seven rare earths deduced for center of solar disk with weighting function 24 p4279 A66-42711
 Electron transitions and sharp emission lines in XUV solar spectral regions with fractionally charged quarks bound to C, N and O nuclei 24 p4280 A66-43189

SOLAR STILL

Transmission of materials suitable for transparent covers of solar stills is nearly constant for angles of incidence less than critical value 22 p3852 A66-40511

SOLAR STREAM

Correlation between sunspots and solar tide, calculating solar tide amplitude in planet parameters 13 p2181 A66-25441

SOLAR SYSTEM

SA ASTEROID

SA GALAXY

SA PLANET

Collected works of K. E. Tsiolkovskii on astronomy, natural science and technology 01 p0135 A66-10295
 Solar system formation theory that planets were formed from gigantic gaseous suns as

result of tidal action and loss of mass 01 p0135 A66-10295
 Exobiological trend and problems indicating types of organic matter on planet and origin and transfer of organisms in solar system 02 p0182 A66-11616
 Bibliography of current aspects of exobiology dealing with solar system, life detection system, origin of life and life in universe 02 p0182 A66-11616
 Scale of distances and masses in solar system, IR characteristics of Venus and interplanetary space fields and particles revealed by Mariner II 03 p0425 A66-12814
 Radar observation of individual radiant and meteoric velocities, noting two types of orbit for small meteoric bodies in solar system 04 p0577 A66-13814
 Chemical nature and origin of solar particles formed in primordial solar nebula examining growth mechanism based on screw dislocations present in preplanetary nebula 05 p0767 A66-15714
 Origin of solar system, discussing monistic and dualistic theory, interstellar gas characteristics, star formation and planetary development 05 p0767 A66-15714
 Probable interior structure of planets in solar system and Moon, based on data relative to terrestrial theory 05 p0768 A66-15714
 Gravity assisted trajectories to solar system targets analyzed by two-dimensional solar system model [AIAA PAPER 66-10] 08 p1289 A66-18961
 Chondritic meteorites shed light on role of oxidation-reduction equilibria in formation of terrestrial planets 08 p1291 A66-19071
 Nucleosynthesis of D, Li, Be and B by high-energy solar particles during early history of solar system in nuclear spallation model 08 p1291 A66-19099
 Solar system exploration, predicting future activities of U.S. space program 10 p1602 A66-21061
 Solar system origin, evidence of chemical physical nature, diamond content of meteorites, planetary density and gravitational instability 12 p1946 A66-23651
 Solar system origins and planet evolution: as subcondensations in differentially rotating medium, discussing orbit and spin angular momentum 12 p1946 A66-23651
 Extraterrestrial life in solar system discussing equipment for Mars exploration noting Gulliver program, Multivator automatic biochemical testing apparatus and TV microscope 12 p1805 A66-23799
 Stable resonant spins for planet in eccentric orbit, particularly Mercury rotation, analyzing motion equation for angular position of long axis relative to inertial line fixed in space 12 p1952 A66-24961
 Solar activity centers studied to establish relationship to effect of planetary tides on surface of Sun 13 p2181 A66-25441
 Radar observation of individual radiant and meteoric velocities, noting two types of orbit for small meteoric bodies in solar system 14 p2382 A66-27570
 Submillimeter and millimeter radar and LIDAR astronomy contribution to solar system communications, and planetary and lunar surface studies 15 p2595 A66-29002
 Solar system geometric effect in diurnal annual and semiannual cosmic ray variations 15 p2575 A66-29081
 Integrated flux distributions in neutron capture in stars 17 p2997 A66-31921
 Review of literature on planets, natural satellites, Moon and origin of solar system 17 p2998 A66-32021
 Meteor orbits classification and relationship to other groups of solar system 17 p3001 A66-32341
 Comet cosmogony of Lagrange and problems of solar system, including volcanic processes in planetary bodies, geophysical and geological arguments, etc 17 p3014 A66-33411
 High energy missions for Saturn such as solar system probes, cometary intercept flights to Earth-Moon libration points, etc [SAE PAPER 660448] 18 p3246 A66-33899
 Angular momentum distribution in planetary systems computed, based on mass

- star and period of revolution of planet-companion 18 p3236 A66-34891
- solar system origin hypothesis, assuming a condensed gravitationally out of initial cloud of gas and dust and planets formed from dust in gas which Sun failed to capture 19 p3466 A66-36624
- tidal dissipation function in solar system, examining cases having appreciable dissipation since origin of planets and satellites 20 p3655 A66-38023
- astronomical techniques on occurrence and nature of planets outside solar system 20 p3656 A66-38027
- Monte Carlo experiments on cometary origin of meteorites and asteroids in solar system and random orbits of stray bodies 21 p3812 A66-38825
- planetary composition, structure, origin and history in light of recent space research 22 p3978 A66-40020
- unmanned spacecraft trajectories, discussing flight mechanics of solar system exploration 22 p3983 A66-40700
- millimeter wave radio astronomy, discussing solar system, galaxy and extragalactic sources 22 p3983 A66-40732
- gravity assisted trajectories to solar system targets analyzed by two-dimensional solar system model [AIAA PAPER 66-10] 23 p4127 A66-41103
- radio emission from Venus, Jupiter, Pluto and other planets at 1.9 cm analyzed, using radio telescope, noting effective temperatures 23 p4131 A66-41818
- unmanned exploration of solar system - IAS Symposium, Denver, February 1965 24 p4274 A66-42653
- solar system exploration and Air Force participation in missile and space program 24 p4296 A66-42654
- origin, population, orbital characteristics, surface structure and chemical composition of asteroids /meteorite type/ in solar system 24 p4276 A66-42661
- deep space payloads, booster probes, sensors and communication systems for missions from Jupiter to Pluto 24 p4281 A66-42678
- isotope and solar thermoelectric generator, solar cell and battery electric power sources for unmanned scientific exploration of solar system 24 p4162 A66-42681
- ### SOLAR VELOCITY
- Solar motion and velocity dispersions determined together with results on distribution of peculiar motion of stars 11 p1766 A66-22255
- Corrections of sight-line velocities for Earth diurnal rotation and annual revolution in observations of Sun 12 p1949 A66-24246
- New solar motion with respect to local group and exterior galaxies 13 p2182 A66-25576
- ### SOLAR WIND
- #### A M-REGION
- Spacecraft thermal control surface damage by solar wind bombardment in hydrogen and helium plasmas, with measurements of solar spectral reflectance and thermal emittance [AIAA PAPER 65-647] 01 p0089 A66-10228
- Soviet, Swedish and Norwegian data on solar activity and barometric pressure, showing corpuscular flux effect on barometric pressure even at Earth surface 01 p0060 A66-10272
- Geomagnetic field fluctuations corresponding to solar wind intensity changes as related to change in phase of solar activity cycle 01 p0061 A66-10279
- Mariner IV data used to reevaluate Urey and Brewster theory for clearing of Martian blue haze 01 p0137 A66-10881
- 27-day recurrence tendencies of solar plasma velocity and magnetic index from Mariner II 03 p0417 A66-12346
- Solar flares, solar wind, particle emission from activity regions, flare-associated particles and nuclear reactions in flare regions 03 p0418 A66-12665
- Shock waves in solar wind and magnetic storms, deriving equations governing shock, ambient and driver gas velocities 03 p0418 A66-12672
- Recurrent geomagnetic storms and structure of solar wind consisting of fast M-region stream embedded in slower ambient wind 03 p0418 A66-12673
- Heating of corona and chromosphere for generating solar wind 03 p0421 A66-12848
- Contradictory experiments to determine whether particles responsible for auroral events are solar particles or local particles accelerated by secondary processes 03 p0421 A66-12864
- Intensity of corona as index of solar corpuscular radiation noting characteristics of geomagnetic and solar activity 03 p0422 A66-12911
- Observations of interplanetary magnetic field by Mariner and Imp spacecraft confirm predictions based on behavior of cosmic rays 03 p0429 A66-13263
- Lunar dust layer with protons in solar wind displacing atoms in grains, thus sintering dust through diffusion into porous structure 03 p0429 A66-13338
- Interplanetary plasma origin, behavior and effects on space flight studied by space probe 04 p0576 A66-13501
- Diurnal variation of cosmic radiation of intermediate energies measured at Earth attributed to particle removal due to scattering by magnetic irregularities 04 p0575 A66-14181
- Solar wind as source of primordial inert gases in stone meteorites 04 p0580 A66-14483
- Quasi-stationary corotating structure in interplanetary magnetic field observed with Imp I satellite during three solar rotations, noting data on solar wind 05 p0746 A66-14783
- Quasi-stationary corpuscular streams from Sun suggesting role of active regions in formation 05 p0748 A66-14867
- Worldwide positive-negative impulse pair observed on geomagnetic records found to be recurrent and associated with M-region disturbances 05 p0670 A66-14953
- Properties of solar and geophysical phenomena analyzed, concluding that magnetic field of corpuscular fluxes has forceless structure 05 p0753 A66-15392
- Interplanetary medium phenomena, MHD theory of solar wind and solar rotation as cause of Archimedean spiral twisting of interplanetary magnetic lines 05 p0767 A66-15749
- Magnetospheric boundary /magnetopause/ dependence on intensity of solar wind 05 p0767 A66-15750
- Survey in satellite era of energetic particle radiations, plasmas and magnetic fields in space, including solar wind, solar cosmic rays, etc 06 p0951 A66-16612
- Disturbances caused by bodies moving through plasma and solar wind-magnetosphere interaction 06 p0869 A66-16907
- Fine structure of magnetic storm discussing prestorm, initial stage and climax of fluctuations of Pc I and Pi I 07 p1027 A66-17308
- Solar wind study by observing effect on artificially produced clouds of barium and strontium compounds 07 p1029 A66-17833
- Solar corpuscular stream effect on magnetic storms and Forbush effect 07 p1121 A66-17985
- Presence of genuine sidereal daily cosmic ray intensity variation in 1961 07 p1126 A66-18011
- Periodical and quasi-periodical cosmic ray variation according to data of worldwide network of stations, using crossed telescope 07 p1127 A66-18013
- Mariner II solar wind measurements including data on Venus electromagnetic radiation, space magnetic fields and charged particles, energy spectra, solar plasma, etc 07 p1130 A66-18077
- Solar corpuscular radiation behavior, including dynamics of origin at Sun 07 p1130 A66-18079
- Energy sources of lunar luminescence noting effects of solar wind, corpuscular radiation, electromagnetic radiation and radioactivity 07 p1139 A66-18090
- Dynamical properties of solar wind and solar corona atmosphere with extended temperature bound strongly by gravity 07 p1132 A66-18263
- Interplanetary dust dynamics, discussing comet tails, electric charge carrying properties, etc 08 p1287 A66-18635
- Extraterrestrial dust as atmospheric argon source and influx of black spherules 08 p1287 A66-18770
- #### INTERPLANETARY MEDIUM PROPERTIES
- considered in scaling of observed effects of interaction of solar wind with Earth dipolar magnetic field 08 p1292 A66-19123
- Relay I satellite mapping of energy spectrum and spatial distribution of protons in inner radiation belt 08 p1283 A66-19396
- Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 08 p1285 A66-19452
- Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 08 p1285 A66-19786
- Earth daily diurnal rotation rate variation, assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 08 p1220 A66-19787
- Twenty-seven day modulation of galactic cosmic rays attributed to axisymmetric solar wind of magnetic inhomogeneities 09 p1438 A66-20211
- Solar wind enhancement of heavy element content in composition of solar corona relative to value for photosphere 09 p1456 A66-20415
- Sidereal component of diurnal variation of cosmic ray intensity 09 p1442 A66-20461
- Lunar X-ray detectability, noting generation by solar wind electron bombardment and flux intensity 09 p1459 A66-20885
- Structure of solar corpuscular flux and interaction with Earth magnetosphere 09 p1444 A66-21028
- Solar cosmic ray generation, interplanetary proton diffusion and stratospheric showers 10 p1595 A66-21045
- Exospheric model of solar wind for ionized atmosphere with velocity-dependent collision cross section 10 p1605 A66-21206
- Simulation of solar-wind magnetosphere interaction [AIAA PAPER 66-154] 10 p1559 A66-21421
- Plasma wind tunnel simulation of solar wind effect on Pioneer spacecraft [AIAA PAPER 66-153] 11 p1682 A66-22208
- Interaction of solar corpuscular stream with geomagnetic field forming Earth magnetosphere and particle penetration within magnetosphere in neutral point region 11 p1696 A66-22407
- Geomagnetic field confinement by solar wind to form magnetosphere and magnetic tail 11 p1699 A66-23127
- Imp-I observations of solar wind properties, including interaction with geomagnetic field and flow characteristics of positive ion component 11 p1775 A66-23132
- Solar wind particle diffusion into geomagnetic tail and then down field lines to polar cap 11 p1700 A66-23142
- Objections to idea of solar ejection of neutral hydrogen and responsibility for geomagnetic storm 11 p1776 A66-23496
- Comet nucleus as source situated in stationary supersonic solar plasma flux subject to laws of hydrodynamics 12 p1945 A66-23508
- Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 12 p1945 A66-23510
- Solar wind and geomagnetic storm effects on galactic cosmic ray 11-year variations and energy spectrum, from neutron monitor data 12 p1940 A66-24160
- Solar wind as radial flux of electromagnetic inhomogeneities, galactic ray modulation by solar wind and cosmic ray intensity variation with sunspot cycle 12 p1940 A66-24162
- Magnetospheric and upper atmospheric meteorological effects on cosmic ray intensity variation and solar corpuscular streams 12 p1940 A66-24163
- Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164
- Forbush, geomagnetic interaction, cosmic ray variation and solar corpuscular flux effects during magnetic storms in period of maximum solar activity 12 p1940 A66-24165
- Variations in cosmic ray neutron component intensity and solar corpuscular

flux with H-component of geomagnetic field during magnetic storm 12 p1941 A66-24166
 Plasma effect on dipole magnetic field and solar wind plasma-geomagnetic field interaction 12 p1943 A66-24391
 Structure and coherency of lunar dust layer, considering corpuscular radiation such as solar wind and meteorite bombardment 12 p1952 A66-24892
 Space probe observations of solar wind, solar magnetic field and interplanetary magnetic field 13 p2187 A66-26286
 Electron acceleration near Earth bow shock measured, using Explorer XVIII satellite, noting solar wind effect, energy spectrum in radiation belt and magnetospheric boundary, etc 13 p2175 A66-26355
 Solar wind parameters and geomagnetic activity determined from satellite plasma experiments and observations of magnetopause locations 13 p2075 A66-26368
 Cyclotron radius, magnetospheric boundary and Debye length scaling parameters for magnetospheric cavity arising from solar wind-induced geomagnetic storm and visibility of quasi-Van Allen belts 14 p2269 A66-27124
 Intensity of corona as index of solar corpuscular radiation, noting characteristics of geomagnetic and solar activity 14 p2376 A66-27260
 Geophysical laboratory simulation of solar wind-magnetosphere interaction and satellite perturbation due to motion in magnetoplasma 14 p2284 A66-27514
 Solar wind deuterium detector and charge spectrum analyzer for Sunblazer probe of corona transmission properties 14 p2295 A66-27701
 MHD equations applied to hypersonic flow of solar plasma around magnetosphere and approximation with simpler equations of gas dynamics 15 p2483 A66-28815
 MHD approximation of solar plasma fluxes observed by Mariner II as free rotating jets 15 p2574 A66-29077
 Solar wind magnetic field as medium for plasma-magnetosphere interaction 15 p2575 A66-29078
 Solar wind parameter variation, magnetosphere flux interaction and dependence of geomagnetic storm on magnetospheric conditions and geomagnetic field increase 15 p2575 A66-29079
 Solar corpuscular stream magnetic field effect on change in orientation of geomagnetic field related to change in stream geoeffectiveness 15 p2575 A66-29102
 Criticism of Ivanov assumption regarding IMP-I observation of lunar wake in solar wind by magnetic field and plasma measurements 15 p2575 A66-29104
 Solar wind computations beyond one angstrom, noting shock wave formation indicating hot tenuous gas region surrounding solar system 15 p2576 A66-29229
 Satellite observations of primary cosmic rays compared with predictions of solar wind and electric field models of long-term intensity modulation 15 p2576 A66-29233
 Two-fluid model of solar wind, assuming spherical symmetric flow without rotation, magnetic fields or viscous stress 16 p2792 A66-30183
 Solar wind proton measurements by Vela II satellite electrostatic analyzers and relationship between temperature, solar wind velocity and geomagnetic disturbance index 16 p2793 A66-30184
 Solar wind interaction with solar dipole magnetic field in coupled hydrodynamic and hydromagnetic equations [AIAA PAPER 66-509] 16 p2793 A66-30608
 Solar wind particle penetration into Earth magnetosphere [AIAA PAPER 66-510] 16 p2793 A66-30609
 MHD model of interface between solar wind and geomagnetic field on Earth tail, showing existence of unstable waves 16 p2895 A66-30717
 Type I comet tail origin due to energetic electrons in shock structure, noting inertial slowing down of interplanetary field lines trapped in solar wind 16 p2801 A66-30919
 Adiabatic deceleration effect on cosmic ray spectrum, noting particle momentum and energy change, diffusion coefficient independent of energy,

etc 16 p2795 A66-30924
 Configuration and population of Earth magnetosphere in solar wind 16 p2795 A66-31702
 Solar corona and interplanetary plasma noting solar wind effect on comet tails and shock wave caused by interaction of geomagnetic field and plasma 17 p3000 A66-32272
 Solar corpuscular stream density distribution and trail curvature, noting space angle of ejection and flight trajectory 17 p2992 A66-32336
 Cometary diameter variation determined with heliocentric distance for eight comets, noting solar wind effect 17 p3010 A66-33378
 Cometary tail phenomena interpreted, using plasma dynamics theory coupled with observed solar wind 17 p3011 A66-33390
 Activity 17 p3011 A66-33390
 Solar wind and type I comet tails, noting solar wind and plasma velocities as compared with Mariner II measurements 17 p3012 A66-33391
 Tail of Tomita-Gerber-Honda /1964 c/ comet, noting importance of spacecraft measurement of solar wind plasma direction 17 p3012 A66-33394
 Type I comet trail relation to interaction of solar wind with geomagnetic field, noting tail ray formation mechanism, interplanetary plasma measurements, etc 17 p3012 A66-33396
 Solar wind proton, solar flare proton and galactic ray effect on interstellar solids /comet/ 17 p3013 A66-33409
 Solar rotation as solid body and as rapidly rotating core and slowly rotating atmosphere braked by solar wind 18 p3166 A66-34154
 Solar wind - Conference, California Institute of Technology, Pasadena, April 1964 18 p3166 A66-34330
 Mariner II space probe measurements of solar wind including velocity, temperature, time dependence of proton velocity, temperature and density 18 p3167 A66-34331
 Mariner II solar wind velocity data relation to solar phenomena 18 p3167 A66-34332
 Radio astronomy observations applied to solar wind problem, results include radial variation of electron density, size of coronal irregularities and coronal magnetic field direction 18 p3231 A66-34337
 Solar wind in framework of Parker theory, summarizing data obtained from IMP and energetic-particle experiments 18 p3167 A66-34338
 Solar wind models analyzed, taking into account solar ejected high-velocity gas jets and southward component of interplanetary magnetic field 18 p3167 A66-34339
 Solar wind origin, examining steady state energy and momentum balance, coronal heating, viscosity effects, velocity distributions and field effects 18 p3168 A66-34343
 Radial diffusion effects on composition of solar corona and solar wind 18 p3168 A66-34344
 Fluid flow analysis of solar wind interaction with magnetosphere 18 p3168 A66-34346
 Particle analysis of solar wind interaction with magnetosphere, examining plasma particle motion and time dependency of fields they generate 18 p3168 A66-34347
 Magnetosphere topology changes due to solar wind interactions, geomagnetic storms and interactions with interplanetary magnetic field outside magnetosphere 18 p3106 A66-34349
 Explorer XVIII plasma flux measurement data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34351
 Solar wind interactions with natural and artificial comets, discussing charge, momentum and energy transfer, Coulomb collision, plasma instabilities, ion clouds, etc 18 p3169 A66-34354
 MHD and fluid dynamics interpretation of solar wind-comet interaction 18 p3169 A66-34355
 Solar wind interaction with type I comet tails in interplanetary magnetic field 18 p3231 A66-34356
 Lunar magnetosphere, Moon-solar wind

interaction, X-ray flux measurement and possible hazards to astronauts 18 p3231 A66-34356
 IMP satellite data on lunar magnetosphere MHD wake and interaction with solar wind 18 p3231 A66-34356
 Solar wind engine for generating electric power and for propulsion of space vehicle [AIAA PAPER 66-596] 18 p3165 A66-34444
 Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 18 p3169 A66-34448
 Energy spectrum change of group of electrons being convected downwind by magnetosheath and behind Earth bow shock 18 p3170 A66-34524
 Anisotropic cosmic radiation with flare effects flowing out of Sun and along filamentary magnetic structures imbedded in solar wind 18 p3170 A66-34530
 Compositional, anisotropic and nonradial flow characteristics of solar wind as observed by ARC high-resolution Pioneer V plasma probe 18 p3170 A66-34543
 Satellite and space probe measurements indicate continual confinement of geomagnetic field by solar wind forming magnetosphere and Earth magnetic tail 18 p3235 A66-34742
 Cosmic ray modulation by solar wind fields, noting transit time, energy loss and time variations 18 p3175 A66-34744
 Isotopic changes in materials caused by high energy nuclear active particles and solar wind in interplanetary space and on Earth 18 p3176 A66-34750
 Solar wind and energy modulations of cosmic rays 18 p3179 A66-34766
 Cosmic ray friction in limiting solar wind cavity 18 p3180 A66-34772
 Cosmic ray anisotropy induced by solar wind and magnetic field irregularities 18 p3181 A66-34779
 27-day modulation of solar diurnal variation of cosmic ray neutron component 18 p3183 A66-34790
 Solar wind particle density dependence of heliographic latitude due to solar magnetic field channeling 18 p3237 A66-35047
 Solar wind modulation of far daytime field of extra-long radio waves in ionospheric C layer 19 p3345 A66-35288
 Charged particle motion and penetration of magnetosphere in proximity of neutral point as result of solar wind-geomagnetic field interaction 19 p3405 A66-35281
 Photographic interpretation of shape of tail of comet Ikeya-Seki /1965 f/ and computation of velocity of particles in solar wind 19 p3459 A66-35588
 Gas tails of brighter comets that may reach 150,000,000 km in length reveal direction and velocity of solar wind 19 p3452 A66-35797
 Discontinuities in plasma parameters of solar wind satisfy conditions of Mhd and can be treated as shock waves and stationary contact surfaces 19 p3452 A66-35980
 Atmospheric models, comparing Chamberlain evaporative and solar breeze models, Opik and Singer evaporative model and Parker solar wind model 19 p3465 A66-36605
 Comet nucleus as source situated in stationary supersonic solar plasma flux subject to laws of hydrodynamics 20 p3646 A66-37021
 Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 20 p3646 A66-37023
 Solar wind flow past comet, obtaining minimum radius of comet source 20 p3647 A66-37041
 Interplanetary plasma stream velocities measured by bistatic radar transmissions from Earth to spacecraft, considering presence of uniform interplanetary magnetic field 20 p3648 A66-37214
 Solar magnetic field effect on solar wind, computing solar wind properties and coronal density distribution 20 p3630 A66-37334
 Viscous thermoconductive model of solar wind motion, using Navier-Stokes equations 20 p3631 A66-37335

- atmospheric electric current effects on
 atmospheric electromagnetic wave
 transmission and propagation, discussing
 magnetospheric effects, solar wind,
 magnetic field, etc 20 p3550 A66-37434
 magnetic field, microscopic particle
 distribution function, plasma instabilities
 wave-particle interactions of solar
 wind 20 p3632 A66-38061
 integral spectrum for low-energy electrons
 measured with detailed definition of
 temperature and number density by IMP
 20 p3633 A66-38204
 SC rise time, discussing solar wind
 homogeneity effects, magnetopause, wave
 front broadening, etc 20 p3635 A66-38220
 shock waves, in rarefied magnetoplasma
 collisionless shock waves ahead of
 magnetic cavity in solar
 wind 20 p3611 A66-38221
 sudden impulses and pc5 variations
 resulting from magnetospheric deformations
 in solar wind pressure
 20 p3657 A66-38223
 Vela satellite measurements of particles in
 solar wind and distant geomagnetosphere,
 timing measurement of energy spectra, flux
 density and directional distribution of
 positive ions in solar
 wind 20 p3639 A66-38315
 diffusion of protons in outer radiation belt
 due to violation of third adiabatic invariant
 of trapped particles 20 p3640 A66-38323
 adiabatic theory of distorted motion of
 charged particles in geomagnetic field,
 showing dependence on equatorial pitch
 angle 20 p3642 A66-38332
 fluid mechanics model representation of
 solar wind and geomagnetic field
 interaction, noting flow parameters in shock
 front and application of MHD
 equations 20 p3642 A66-38337
 energy transfer mechanism in solar
 corpuscular flux interaction with terrestrial
 magnetosphere 21 p3809 A66-38782
 Earth daily diurnal rotation rate variation,
 assuming solar corpuscular flux composition
 of plasmoids possessing quasi-force-free
 magnetic fields 21 p3733 A66-38783
 Soviet papers on solar corona and
 corpuscular radiation in interplanetary
 space 21 p3812 A66-39119
 Soviet observational data on solar corona
 and wind collected during solar eclipse of
 June 19, 1936 21 p3813 A66-39120
 solar corpuscular radiation, discussing
 themes of molecular transformations in
 comets for propene, water, acetylene,
 carbon dioxide and
 ammonia 21 p3809 A66-39125
 structural stability of near Earth coronal
 corpuscular system during solar cycles,
 based on planetary magnetic characteristics
 for 1937-1958 21 p3813 A66-39126
 MHD analysis of luminescence and
 denuding of tail of Finsler 1937 V Comet
 passing through solar corpuscular stream
 maintaining frozen-in magnetic
 field 21 p3814 A66-39277
 dynamic stability and transonic flow
 response to arbitrary perturbations of solar
 and stellar winds in steady
 state 21 p3810 A66-39556
 vacuum conditions in space based on data
 obtained by Earth-orbiting satellites, noting
 shock front and magnetopause caused by
 interaction of solar wind with geomagnetic
 field 22 p3979 A66-40205
 Antenna in interplanetary plasma, noting
 fluctuation noise in exosphere and radiation
 impedance when exposed to solar
 wind 22 p3877 A66-40466
 Solar wind disturbance detected by ground
 facility and Explorer XVIII while behind
 moon 22 p3983 A66-40562
 Polar coronal temperature inferred from
 density gradients and based on solar wind
 and latitude dependence of coronal
 composition 22 p3983 A66-40698
 Dependence of diurnal cosmic ray
 variations on angle which is proportional to
 shortest distance from Earth to axis of
 corpuscular stream 22 p3974 A66-40757
 Cusp configuration of neutral point on
 boundary of geomagnetic cavity in solar
 wind 23 p4123 A66-41508
 Small neutral hydrogen flux in total solar
 and flux and electron impact and
 photoionization
 mechanisms 23 p4123 A66-41689
 Angular velocity of solar corona
 determined as function of radial distance
 from Sun including effect of solar wind,
 magnetic field and
 viscosity 23 p4130 A66-41811
 Correlation between lunar eclipse
 brightness and interplanetary plasma flux,
 examining lunar
 luminescence 23 p4131 A66-41862
 Average properties of positive-ion
 component of solar wind observed by
 Mariner II 24 p4263 A66-42586
 Cometary nature and phenomena,
 emphasizing uncertainty of composition of
 icy snowbank, physical interaction of gases
 and dust with solar wind and solar
 radiation 24 p4276 A66-42662
 Auroral radio reflections in analysis of
 polar current eddy structure, noting effect
 of geomagnetic and solar
 activity 24 p4205 A66-43157
SOLAR X-RAY
 Computed magnitude of thermal X
 radiation flux of Sun at wavelengths shorter
 than 20 angstroms 02 p0289 A66-11659
 Radio waves, X-ray and energetic particle
 emission associated with solar
 flares 03 p0421 A66-12844
 Rocket experiment using proportional
 counter to measure soft solar X-rays in 10
 to 60 angstrom region 03 p0421 A66-12865
 Solar X-ray photographs, describing
 Aerobee rocket mounted telescope using
 grazing incidence optics 05 p0763 A66-15289
 Solar X-ray radiation, describing
 rocketborne instruments using photographic
 emulsion for X-ray emission intensity
 measurements 05 p0682 A66-15366
 Rocket and satellite study of solar X-ray
 emission by quiet Sun and solar
 corona 07 p1132 A66-18262
 Spectrometer monitoring soft solar X-ray
 radiation in 1 to 400 angstrom wavelength
 range 08 p1225 A66-19516
 VLF sudden phase anomaly data for 1963
 compared with solar X-ray emission
 measurements made by Vela
 satellites 09 p1435 A66-19972
 Quantitative relation between strength of
 ionospheric effects of solar flares and
 amplitude of increase in cosmic
 radiation 09 p1439 A66-20223
 Source energy spectrum of solar XUV
 produced photoelectrons in
 ionosphere 09 p1372 A66-20382
 Electron production, density and
 absorption in D region as effected by X-
 radiation 09 p1373 A66-20484
 Solar X-radiation intensity measurement by
 Geiger end-window photon counters onboard
 Elektron II satellite 10 p1595 A66-21044
 Solar X-ray emission due to electron
 transitions involving lowest energy
 levels 10 p1597 A66-21081
 Solar X-ray spectrum studies, mainly
 oxygen and iron lines, using Aerobee
 rocket 10 p1598 A66-21082
 Solar X-ray emission measured by
 OSO 10 p1598 A66-21083
 Solar X-ray data obtained from British
 Ariel satellite and rocket
 observations 10 p1598 A66-21084
 Thermal origin of X-ray radiation of quiet
 Sun possible, suggesting quasi-stable
 component produced in undisturbed corona
 and slowly varying component in active
 corona 10 p1598 A66-21087
 High-altitude solar X-ray burst and
 increase in ground-level flux of heavy
 nuclei 11 p1764 A66-23054
 New astronomical techniques for
 observations outside Earth atmosphere,
 noting X-ray sources and neutron
 stars 14 p2378 A66-26915
 U.S. space research in 1965 including lunar
 missions, Venus and Mars projects, manned
 space flights, meteorological satellites,
 etc 15 p2599 A66-29899
 Solar X-ray images obtained, using grazing
 incidence optics from Aerobee rocket at
 time of solar minimum 15 p2605 A66-30080
 12.8-micron IR emission lines observed by
 Low from planetary
 nebula IC 17 p3003 A66-32656
 Balloon flight near peak of solar cycle in
 search for solar and cosmic gamma
 rays 18 p3169 A66-34515
 Scintillation counter and proportional
 counter spectral measurements of solar flare
 X-ray emissions and analogies to hot
 plasma 20 p3633 A66-38191
 Energy distribution of trapped electrons
 producing solar microwave impulsive radio
 bursts and X-ray bursts from
 Sun 20 p3634 A66-38213
 Short wave fadeouts and solar soft X-ray
 enhancements during solar
 flare 20 p3635 A66-38216
 Solar flare and sunspot X-ray and radio
 burst correlation, noting sudden ionospheric
 disturbances 24 p4262 A66-42460
SOLDERED JOINT
 Packaging method for integrated circuits
 based on flow soldering components through
 printed wiring boards to be used in digital
 computer design 02 p0204 A66-11940
 Solderability test procedure for predicting
 solder joint reliability 20 p3572 A66-37948
SOLDERING
 Parallel-gap soldering technique for
 interconnecting integrated circuit flat pack
 and etched circuit board, noting test
 procedures 11 p1665 A66-22676
 Solder flow under wire insulation and
 effect on reliability, noting destructive and
 vibration test results 11 p1665 A66-22680
 Book on manufacturing of welded and
 soldered structures of aircraft including
 material selection, plasma and ultrasound
 techniques, economics,
 etc 21 p3744 A66-38951
SOLENOID
SA COIL
 External DC field of long solenoid noting
 infinite and finite solenoid
 solutions 03 p0341 A66-12607
 Inductance of superconducting solenoid
 calculated from AC resistance and discharge
 oscillograms 05 p0737 A66-15336
 Effect of temperature changes on flux-
 jumping behavior of niobium stannide
 superconducting solenoids in superfluid
 helium 15 p2560 A66-28686
 Design procedure for rotary solenoids
 having high unit density, low rotational
 inertia and inherent resistance to dynamic
 environments 15 p2460 A66-28994
 Inductance of superconducting solenoid
 calculated from AC resistance and discharge
 oscillograms 15 p2569 A66-29983
 Solar radiation protection based on charged
 particle motion through magnetic field of
 solenoid
 [AIAA PAPER 66-512] 16 p2811 A66-31481
 Valve technology for spacecraft and rocket
 engine applications, discussing zero-gravity
 vent valve, zero leakage valve, insensitive
 valve seat and solenoid actuator
 [ASME PAPER 66-MD-61] 21 p3742 A66-38494
 Performance of three-component
 superconducting solenoid, noting optimal
 alloy composition 21 p3804 A66-39318
 Internal magnetic flux in superconducting
 solenoid, discussing winding and stability
 with respect to current
 jumps 22 p3964 A66-40195
 Macroscopic particle acceleration to
 meteoritic velocities by trapping and
 accelerating superconducting solenoid in
 front of magnetic traveling
 wave 24 p4237 A66-42401
SOLID LUBRICANT
 Sliding friction measurements of some
 layer lattice compounds in ultrahigh vacuum
 [ASLE PREPRINT 65-LC-19] 02 p0237 A66-12251
 Gamma ray and neutron irradiation and
 temperature effects on wear-life of solid
 lubricants for aerospace application
 [ASLE PREPRINT 65AM 5C4] 04 p0524 A66-13398
 Chemical and thermal stability of fluoride
 solid lubricants measured and tested for
 aerospace environment
 [ASLE PREPRINT 65AM 5C5] 07 p1039 A66-18284
 Solid and dry-film lubricants, tabulating
 kinetic coefficients of friction, noting
 particle size, viscosity, costs, wear life,
 application, etc 12 p1885 A66-24099
 Four-ball wear tester to evaluate solid
 lubricant dispersions including molybdenum
 disulfide 14 p2302 A66-27774

Wear life and corrosion protection of solid film lubricants improved through substituting other lubricative pigments for graphite
[ASLE PAPER 66AM 1C3] 16 p2711 A66-30405

Heavy metal derivative solid lubricants, properties and application
[ASLE PAPER 66AM 5B3] 16 p2711 A66-30406

Liquid solid film lubrication of hydrodynamic bearings, including effects of solid particles in liquid base lubricant
[ASLE PAPER 66AM 5DE] 16 p2711 A66-30412

Sliding friction measurements of some layer lattice compounds in ultrahigh vacuum
[ASLE PREPRINT 65-LC-19] 16 p2713 A66-30569

Sliding characteristics of polytetrafluoroethylene (PTFE) dry lubricant, examining effects of time, temperature and environment 16 p2713 A66-30570

Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675

Graphite lubricant physical and chemical combinations with other materials for improved high temperature friction and wear, discussing nuclear irradiation for graphite lattice modification 17 p2929 A66-31933

Transfer of dry lubricant particles on to contact surfaces during service by using separate rubbing elements, for equipment operation in space 19 p3363 A66-35833

Water vapor effect on friction of molybdenum disulfide compact sliding against rubbed film of molybdenum disulfide on copper in nitrogen 20 p3563 A66-37700

Measuring wear life and friction coefficient of dry film and solid film lubricants and plastic materials in ultrahigh vacuum 22 p3923 A66-40216

Molybdenum bisulfide as lubricant in aircraft construction to combat fretting corrosion, facilitate assembly and dismantling of parts and reduce frequency of maintenance 23 p4074 A66-41658

Graphite, molybdenum and tungsten sulfides and calcium fluoride effective as solid lubricants in extreme environments 23 p4075 A66-41870

SOLID PHASE

Electric resistivity of solid phase of lutetium hydrogen system noting action of hydrogen atom 01 p0127 A66-11090

Deposition kinetics of solid phases on electrodes of second kind, noting conditions affecting crystal growth and lattice formation 08 p1171 A66-19648

Zinc-antimonide with high and constant thermoelectric figure of merit obtained by solid phase diffusion 13 p2163 A66-25453

Lindemann, Gruenelsen and melting laws in theory of normal properties of high pressure solids 18 p3135 A66-34237

Thermal conductivity of finely divided and granular materials through solid phase and interstitial gas or by radiation between granules 21 p3835 A66-38768

SOLID PROPELLANT

SA COMPOSITE PROPELLANT

SA DOUBLE BASE PROPELLANT

SA PROPELLANT GRAIN

Mechanical response or viscoelastic properties of material at given hydrostatic pressure 01 p0151 A66-10174

Polish solid propellant meteorological rocket, considering methods for measuring atmospheric parameters and design 01 p0144 A66-11063

Petrographic microscopy has led to through optical characterization of phase composition of aged solid-propellant thin sections 02 p0278 A66-11540

Steady state composition mechanism of solid /heterogeneous/ propellants noting linear pyrolysis, exothermal oxidizers, fuels, etc
[ONERA TP 240] 02 p0278 A66-11681

Behavior and parameter variability of solid propellants and criteria for failure and for rejection 03 p0414 A66-12734

Pulse technique employing gunpowder charges to evaluate combustion instability in solid propellant rocket motors 03 p0416 A66-13106

Solid propellant difficulties like tail-off or grain cracking avoided, using radial slits molded into grain 03 p0415 A66-13226

Temperature at which predecomposition or decomposition of ammonium perchlorate occurs, changed by perchlorate surface treatment and reflected in burning rate of propellant containing perchlorate
[CI PAPER WSCI-65-36] 05 p0744 A66-15151

Theoretical detonation characteristics of ammonium perchlorate-polyurethane solid composite propellants 05 p0744 A66-15781

Acoustic combustion instability of solid fuel rocket dependence on response of burning propellant surface to sound field 05 p0744 A66-15783

Solid propellant ramjets for target aircraft, missiles and space vehicle boosters, noting advantages as compared to liquid propellant ramjets 05 p0745 A66-15847

Physical model of composite solid propellant combustion which includes oxidizer particle size and surface heat generation
[AIAA PAPER 66-112] 06 p0941 A66-17098

Mechanical constitutive theory and methods of stress analysis for physically nonlinear solid propellants
[AIAA PAPER 66-124] 07 p1110 A66-18460

Binder-oxidizer interaction separation in composite solid propellants containing preirradiated ammonium perchlorate 08 p1279 A66-18825

Combustion of solid rocket propellants, using potassium nitrate as oxidizer and phenol formaldehyde as fuel 08 p1319 A66-19201

Servomechanism measurement of solid propellant burning rate 08 p1227 A66-19697

Controlled interruption of combustion in solid propellant engine as applied to rockets and missiles 09 p1435 A66-20576

Specific impulse of solid and liquid propellants to increase performance 09 p1433 A66-20801

Thermomechanical response studies of solid propellants subjected to cyclic and random loading
[AIAA PAPER 65-160] 10 p1590 A66-21776

Prediction of failure behavior in composite hydrocarbon fuel binder propellants
[AIAA PAPER 65-156] 10 p1590 A66-21946

Prediction of thermal conductivity of binary mixture of solids, particularly solid propellants utilizing metallic filaments 10 p1590 A66-21957

Subliming materials chemistry determining parameters governing selection of subliming solids for microthruster engines
[AIAA PAPER 65-595] 11 p1759 A66-22460

Microwave attenuation characteristics of rocket exhaust, examining effects of propellant composition, motor configuration and missile trajectory
[AIAA PAPER 65-181] 12 p1820 A66-24689

Cast-double-base propellant mechanical behavior and failure during slow cooling and rapid pressurization of case-bonded rocket motors
[AIAA PAPER 65-161] 12 p1934 A66-24704

Photographic method for measuring surface strain in solid propellant grains
[AIAA PAPER 65-170] 12 p1970 A66-24712

Microstructural response and tensile failure mechanisms in solid propellant 13 p2171 A66-26117

Oscillatory behavior in rocket engines, analyzing interaction between shock wave and burning solid propellant surface and stressing gas dynamics 15 p2572 A66-29298

Burning rate equation and constant volume burning of solid propellant to determine ballistic properties 15 p2617 A66-29606

Mechanical properties of solid propellants, determining elastic modulus from tensile tests via stress-strain diagram 16 p2790 A66-31193

Advantages of higher combustion velocities shown by comparative analysis of radially and axially burning solid artillery rocket propellants 16 p2790 A66-31195

Specimen anisotropy during tensile elongation to rupture of composite solid propellants, based on analysis of dilatational

behavior 17 p2989 A66-32457

Patents relating to chemistry of solid propellants for rockets over period 1945-1964 17 p2989 A66-33237

Ignition of powder prepared from nitroglycerin and nitrocellulose by shock wave in sectioned low-high pressure chamber 18 p3260 A66-33727

Radiant heat transfer from hot solid combustion products to combustion chamber walls
[AIAA PAPER 65-559] 18 p3260 A66-33817

Response of burning solid propellant to pressure wave of finite amplitude studied by shock tube
[AIAA PAPER 66-601] 18 p3160 A66-34217

Pressure deflagration limit of high energy solid propellants increased to superatmospheric pressures by composition changes
[AIAA PAPER 66-679] 18 p3163 A66-34226

Solid propellant characteristics for application to supersonic combustion, tabulating combustion properties of selected fuels and solid propellants
[WSCI 66-32] 18 p3161 A66-34416

Laboratory burners used as experimental analogs of actual propellant deflagration process, examining dependence of composite solid propellant deflagration on mixture ratio
[WSCI 66-25] 18 p3161 A66-34417

Kinetic factors in diffusion flames, noting fuel/ oxidizer ratios, equilibrium in terms of flame geometry, burning of metallic elements, etc
[WSCI 66-10] 18 p3263 A66-34419

Metal combustion in porous plug configuration for application to solid propellants, noting aluminum porous plug fabrication
[WSCI 66-7] 18 p3161 A66-34420

Cinephotomicrographic studies of metallized fuel-rich propellants with high aluminum powder content, discussing composition, burning rates, etc
[AIAA PAPER 66-616] 18 p3162 A66-34433

Combustion of solid or hybrid propellants with one or more solid phases, noting properties, erosive and hybrid combustion, etc 18 p3165 A66-35240

Tungsten erosion by Co, N, Hg, alumina, H₂ water vapor, carbon dioxide, etc, in rocket exhaust of aluminized propellant 19 p3385 A66-36152

Viscoelastic stress-strain equations for treating strong material nonlinearities, comparing experimental and theoretical results for solid propellants 19 p3449 A66-36428

Mathematical model of combustion instability in solid propellant rocket engines, noting system dynamic behavior, appearance of limit cycle and effect of large amplitude oscillations on burning rate 20 p3627 A66-36889

Equilibrium control and burning rate control of solid propellant in heat exchanger 20 p3629 A66-38155

Lead loss in thermocouple imbedded in burning propellant, noting possibility of loss reduction by using flattened junction parallel to burning surface 20 p3681 A66-38177

Cyclomethylenetrinitramine-hexamethylphosphortriamide complex preparation 20 p3627 A66-38416

Continuous pneumatic mixing of liquid and solid propellant ingredients into composite type propellant 22 p3968 A66-39869

Unsteady-state solid-propellant combustion subjected to acoustic pressure oscillations, noting effect of combustion parameters 22 p3971 A66-40352

Stability criteria for solid propellant burning for case of linear variation in propellant thermal conductivity, noting parameters and shift in instability modes 22 p3969 A66-40353

Physical model of composite solid propellant combustion which includes oxidizer particle size and surface heat generation
[AIAA PAPER 66-112] 22 p3970 A66-40356

Polymer chemistry for solid propellant binder development, examining attempts to introduce oxidants into binder structure 23 p4117 A66-41228

- crease of specific impulse of solid propellants by introducing endothermic cups into binder 23 p4117 A66-41230
- Structure 23 p4117 A66-41230
- Solid propellant combustion stability and viscomechanical properties evaluated by measuring and calculation 23 p4120 A66-41437
- Stress and strain analysis of polyurethane-grained solid propellant grains under high internal pressure, determining mechanical characteristics and test procedures prior to rocket launching 23 p4120 A66-41438
- Rocket motor burning tests, discussing relation of mechanical properties of polyurethane solid propellants to combustion characteristics 23 p4120 A66-41439
- Computer technique for constitutive relations of viscoelastic modulus, using space transform and Volterra integral equation, applied to data on solid propellants 24 p4289 A66-42279
- ### SOLID PROPELLANT IGNITION
- Hypergolic ignition and restart in Plexiglas window hybrid rocket motor, including oxidizer flow transient, flame propagation, chamber pressurization rates, etc [AIAA PAPER 66-69] 07 p1111 A66-18452
- Flame spreading velocity over surface of igniting solid rocket propellants as function of atmospheric pressure and chemistry and specimen surface condition [AIAA PAPER 66-68] 08 p1317 A66-18949
- Heat transfer processes during ignition of solid propellant rockets, considering radiative and convective components [AIAA PAPER 66-66] 08 p1279 A66-18992
- Prediction of solid propellant hot-gas ignition based on preignition transient convective heat transfer model [AIAA PAPER 66-67] 08 p1317 A66-18993
- Mass flow rate of gas evolution from burning solid rocket propellant during transient depressurization of combustion chamber [AIAA PAPER 65-104] 08 p1282 A66-19163
- Solid, heterogeneous and gas phase ignition theories of solid propellants [AIAA PAPER 66-64] 08 p1280 A66-19728
- Ignition temperatures of powdered metals in simulated atmospheres of Venus and Mars suggest potential chemical energy sources 11 p1786 A66-22458
- Polystyrene exposure to oxygen, causing ignition in shock tube but failing to ignite under surface exposure 14 p2370 A66-27476
- Ignition mechanisms of solid composite propellants containing ammonium perchlorate as oxidizer 15 p2569 A66-29308
- Ignition of solid propellant rocket motors, considering igniter characteristics, components and materials 18 p3160 A66-34187
- Solid propellant ignition and ignition propagation for rocket exhaust and hypergolic-type igniters 18 p3161 A66-34225
- Igniter performance in solid propellant rocket motors, examining mass discharge rate effect on chamber pressure transients [AIAA PAPER 66-680] 18 p3161 A66-34227
- Solid rocket propellant quenching by depressurization, noting gas-side heat transfer coefficient [ASCI 66-21] 18 p3161 A66-34413
- Solid propellant ignition, discussing deflagration wave propagation along gas-lid grain surface, flux equilibrium equation, etc [AIAA PAPER 66-668] 18 p3165 A66-34441
- Solid, heterogeneous and gas phase ignition theories of solid propellants [AIAA PAPER 66-64] 18 p3162 A66-34580
- Ignition analysis of condensed phase fuel suddenly exposed to stationary hot oxidizing gas, noting strong pressure effect due to feedback mechanism 20 p3626 A66-37386
- Solid propellant motor ignited from aft end, noting igniter 20 p3629 A66-38261
- Laplace transform analysis of solid or hybrid propellant ignition by exothermic heterogeneous reactions in presence of radiant energy flux 21 p3806 A66-38688
- Hypergolic ignition of composite solid propellants, examining oxidizer concentration, heat flux and exothermic reactions 22 p3969 A66-39871
- Integral equation for heat flux in inverse heat conduction for infinite flat plate as in solid rocket igniters 22 p3998 A66-40031
- Ignition of simulated propellants based on ammonium perchlorate, determining empirical relations 22 p3969 A66-40354
- ### SOLID PROPELLANT ROCKET ENGINE
- #### SA ATHENA ROCKET
- Reliability and maintainability concepts applied to solid propellant subsystems of mobile ballistic missiles 01 p0129 A66-10108
- Analog design technique for pellet motors, gas-generating devices in which propellant is in form of numerous small individual grains [AIAA PAPER 65-193] 03 p0415 A66-12759
- Rocket engine generated voltage as source of electromagnetic interference and electronic component damage on interplanetary vehicles 04 p0480 A66-13628
- Manufacturing large production quantities of precise solid propellant mixtures to meet space booster propulsion system [SAE PAPER 650766] 05 p0743 A66-15005
- Present state and future development trends for large solid-fuel rocket boosters 06 p0960 A66-16804
- Operational problems and costs of staged solid-propellant rocket vehicles for atmosphere only, noting aerodynamic stabilization, spin motors, stage separation, jet plume, etc 07 p1140 A66-17612
- Solid propellants for future large launch vehicles noting motor configurations, costs, thrust, size, etc 07 p1110 A66-17613
- Solid propellant rockets including stop-restart and variable-thrust engines, materials, propellant structural characteristics, nozzles, thrust-deflection systems, etc 08 p1280 A66-18573
- Two-component solid propellant composition and configuration for spherical rocket engine 08 p1281 A66-18721
- Book on quasi-stationary conditions in open systems with short reaction times in solid propellant rocket engines 09 p1432 A66-20487
- Ultrasonic testing of solid propellant rocket motors, describing technique for separation of propellant from steel combustion chamber 09 p1385 A66-20965
- Solid propellant second stage of Diamant launch vehicle with steerable nozzles 10 p1611 A66-21259
- Nozzle weight determination for preliminary design of solid propellant rocket motors 10 p1595 A66-21950
- Hybrid rocket motor HR 4, using fuming nitric acid as oxidizer and mixture of polyesters and acrylic plastics as other solid propellant 12 p1935 A66-23867
- Combustion of ammonium perchlorate propellants in solid propellant rockets 12 p1978 A66-23965
- Titan 3C 120-inch diameter solid-propellant rocket motor 12 p1935 A66-24405
- Solid propellant electric thruster /SPET/ for attitude control and drift correction of space vehicles [AIAA PAPER 66-229] 12 p1937 A66-24525
- Cumulative damage and fatigue applicability to solid propellant-liner bonds failure, noting useful life and stress-time relationship [AIAA PAPER 65-191] 12 p1937 A66-24705
- Bonding strength of polyurethane and polybutadiene composite propellants in cast-in-case rocket motors depends on propellant cohesive strength 12 p1934 A66-24706
- Limited nozzle throat area variation for combustion termination in rocket motor [AIAA PAPER 65-194] 12 p1937 A66-24707
- Strain rate and pressure effects on tensile behavior of viscoelastic composite solid propellant 13 p2171 A66-26116
- High speed testing to determine viscoelastic properties of composite propellant polymers, for use in solid propellant rockets 13 p2115 A66-26119
- Solid propellant rocket engine omniaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700
- Elastic stress-strain distribution by photoelastic method for case-bonded grains of solid propellant rocket, noting effect of propellant cavity geometry [AIAA PAPER 65-190] 14 p2402 A66-27871
- Fabrication of ablative liners for solid propellant rocket motor nozzles [AIAA PAPER 65-167] 14 p2375 A66-27872
- Positioning and aligning operations for Titan IIIC solid propellant rocket motors 14 p2271 A66-28421
- Rocket engines for Black Arrow satellite launcher, noting solid propellant motor in third stage, payload mass ratio, etc 16 p2791 A66-30349
- Influence of relative thickness of elastic case on acoustic stability of radial modes in solid propellant rockets 16 p2791 A66-31474
- Effect of spin on internal ballistics of solid propellant motor [AIAA PAPER 66-523] 16 p2791 A66-31485
- Vortex structure of internal flow upstream of nozzles of various models of solid propellant rockets 17 p2838 A66-32330
- Test program for data on plug nozzle behavior especially for solid propellant rockets, noting similarity with de Laval type nozzles 17 p2990 A66-32373
- Linear stability boundary for acoustic modes in cylindrical solid-propellant rocket 17 p2990 A66-32479
- Unsteady flow field, combustion processes and interaction regions during shock propagation in solid-propellant rocket combustors 17 p2991 A66-32486
- Increased payload capability of Saturn IB launch vehicle by addition of zero stage to core vehicle which ignites before first stage [SAE PAPER 660451] 17 p3017 A66-33160
- Combustion instabilities in solid propellant rocket motors, including acoustic and nonacoustic instabilities 18 p3163 A66-34003
- Wound fiber structures with reference to solid propellant motors, discussing optimum angle of winding 18 p3254 A66-34005
- Propellant composition influence on finite-amplitude axial wave mode instability in solid propellant rockets [AIAA PAPER 66-600] 18 p3161 A66-34431
- Ignition pressure transient of rocket motor, discussing initial ignition event, flame spreading and final chamber filling, convective heating effect on burning rate, etc [AIAA PAPER 66-666] 18 p3165 A66-34449
- Applicability of refractory metals to solid propellant rockets, lifting and guidance structure for glide reentry vehicles and liquid metal containment for nuclear space power systems 19 p3382 A66-36105
- Fabrication process parameters for producing solid-rocket nozzles by shear and conventional spinning of tungsten plate 0.250-inch thick and thicker 19 p3369 A66-36130
- Thermally induced circumferential-longitudinal cracking of refractory metal inserts in solid propellant rocket engine nozzles 19 p3385 A66-36153
- External and internal loads and environment effects on space vehicle, especially motor case, noting stresses, structural design, fatigue behavior, safety, etc 19 p3474 A66-36313
- Heating from Saturn solid propellant S-II and S-IVB ullage motor exhausts and S-IB, S-IVB and Centaur retro motor exhaust theoretically and experimentally analyzed [AIAA PAPER 66-653] 19 p3479 A66-36600
- Solid propellant rocket engine space probe for telemetric study of upper atmosphere 20 p3659 A66-37048
- Nitrogen powered hydraulic attitude control system of Little Joe II solid propellant launch vehicle for flight testing escape mechanism used on Apollo 20 p3499 A66-37314
- Acoustic oscillations in solid propellant rocket chambers, discussing cases of small amplitude perturbations and solving wave equations 20 p3628 A66-37387
- Solid propellant motor ignited from aft end, noting igniter 20 p3629 A66-38261
- Microwave attenuation magnitude associated with exhaust plasma of nonaluminized and aluminized composite propellant 21 p3807 A66-38687
- Thrust magnitude control for solid rocket by fluid injection just upstream of throat 21 p3818 A66-38699
- Rotational axisymmetric mean flow and damping of acoustic waves in solid propellant rocket 21 p3807 A66-38720
- Radiographic examination of large filament-wound solid propellant motor cases 21 p3744 A66-39152

Thermal IR inspection for bond integrity in solid propellant rocket motors 21 p3808 A66-39154

Sequential and concurrent chemical engineering operations in solid-propellant Apollo launch motor manufacturing 22 p3968 A66-39867

Thermodynamic and reaction kinetic parameters in solid rocket motor efficiency, examining Le Chatelier effect of environmental pressure, influence of propellant temperature and system thermal losses 22 p3970 A66-39873

Chemical nonequilibrium losses in solid propellant systems calculation based on heat release of recombination reactions [AICE PREPRINT 28B] 22 p3971 A66-39883

Solid propellant rocket engines and control problems 22 p3971 A66-40122

Nonmetallic solid-propellant rocket motor component manufacture and assembly, noting process control 22 p3927 A66-40284

Particle growth in rocket nozzle, particle size distribution, effect of channeling, determining increase of mass-median diameter of distribution 22 p3971 A66-40364

Short duration technique providing simulation of thermodynamic properties and composition of exhaust products of liquid and solid propellant rocket engines [AIAA PAPER 66-760] 22 p3894 A66-40643

Structural integrity studies of gravitational and inertial loading effects on British solid propellant grains 23 p4115 A66-41112

Thermal and physical properties of elastomeric internal insulating materials for solid propellant rocket engine 23 p4120 A66-41116

Skylark upper atmosphere research sounding rocket, unguided vehicle powered by Raven solid propellant rocket motor 23 p4132 A66-41169

Japanese Aeronautical Research Institute Solid Rocket and Special Small Rocket projects, examining propellant design for performance requirements 23 p4132 A66-41418

Japanese special small rocket design characterized by extreme slenderness and use of aluminum as principle structural material 23 p4132 A66-41419

Pressure record of HF combustion oscillations observed in solid propellant rocket motor developed under special small rocket /SSR/ program 23 p4121 A66-41430

Heat insulation coating on cylinder wall of solid propellant rocket motor using epoxy resin, polysulfide plastic, metal oxides, etc 23 p4148 A66-41431

Minuteman first-stage or Titan III-C strap-on solid rocket motors provide additional thrust to intermediate vehicle comprised of S-II and S-IVB [SAE PAPER 660442] 24 p4281 A66-42395

Ablation velocity, rocket motor working conditions and combustion instabilities for hybrid rockets, using solid fuel and liquid or gaseous oxidizer 24 p4261 A66-42695

Absorption cross section, scattering cross section and angular scattering distribution of solid alumina particles emitted in homogeneous solid propellant rocket plume 24 p4294 A66-42778

SOLID ROTATION

Asymptotic solution to motion of solid containing cylindrical or spherical cavities filled with viscous liquid 12 p1863 A66-24356

Joint motion of two solids and motion of rotating body relative to other due to external forces 12 p1914 A66-24359

Axisymmetric solid motion about fixed point under constant momentum, using chain fractions and Lagrange method 14 p2336 A66-28063

SOLID SOLUTION

Thermal and electrical properties of copper antimony telluride/tin telluride system as function of composition 01 p0116 A66-10190

Refractory metal carbide solubility in cobalt dependent on carbon content, crystal structure and metal-carbon bonds 01 p0085 A66-10287

Microstructural and X-ray studies of solid solutions of Ga-Sb-Te system to determine solubility region in gallium antimonide section of phase diagram 01 p0120 A66-10458

Solubility and concentration curves for

elements in solid solutions of alpha and beta titanium at eutectic and peritectic temperatures 01 p0087 A66-10660

Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 01 p0124 A66-10768

Pore formation in decomposition of solid solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 01 p0125 A66-10777

Thermoconductivity decrease of bismuth-telluride based solid solutions due to forbidden bandwidth and majority and minority carrier mobility 01 p0127 A66-11029

Electrical resistivity, Hall effect and magnetoresistance of bismuth antimony single crystal solid solutions 02 p0272 A66-11712

Thermoconductivity of alloyed solid silicon-germanium solutions 05 p0731 A66-14652

Effect of gamma phase aging and phase cold hardening on austenitic strength of Fe-Ni-Ti steels, noting martensitic point and segregation 05 p0699 A66-14689

Solid solution and carbide strengthened arc melted alloys of hafnium with tungsten and ternary alloys of tantalum, columbium, rhenium and carbon 06 p0894 A66-16078

Hall coefficient, electric resistance and thermoelectric power in indium-rich solid solutions measured at various pressures and at 110 degrees C 06 p0922 A66-16172

Ferroelectric properties and morphotropic phase boundary in phase diagram of ternary system of compounds of lead, titanium and nickel 06 p0927 A66-16720

Phase diagram of copper gallium telluride-gallium telluride semiconductor alloy 07 p1091 A66-17219

Solubility range of 75 atomic percent vanadium-gallium system to determine phases in equilibrium and ascertain presence or absence of superconductivity 07 p1052 A66-18352

Conductivity and Hall coefficient for zinc-mercury-telluride solid solution 07 p1105 A66-18366

X-ray characteristic temperature of germanium-silicon solid solution of equiatomic composition 07 p1106 A66-18379

Solid solubility of Be in W and properties of tungsten-richest 08 p1235 A66-18623

beryllide 08 p1235 A66-18623

Gold diffusion into silicon and formation of segregations in surface layers and crystal disturbances 08 p1268 A66-18661

Beryllium-containing alloys, properties and effect of beryllium 08 p1237 A66-18848

addition 08 p1237 A66-18848

Concentration dependence of thermodynamical functions of interstitial solid solutions, calculating energy of formation 08 p1258 A66-18897

Conditions of preparation and properties of pseudobinary boron carbide-boron silicide hard alloys 08 p1239 A66-18899

Equation for entropy of formation of interstitial solid solution with two interstitial sublattices, using phase diagram for constants in free energy and activity equations 08 p1258 A66-18903

Temperature dependence of optical birefringence on single crystals of lead zirconate-titanate solid solution measured, noting they are optically negative 08 p1269 A66-19006

Microstructures of rapidly solidified aluminum-chromium-silicon alloys 09 p1389 A66-20804

Nitriding of zirconium at 1400 to 1700 degrees C in nitrogen atmosphere 09 p1390 A66-20861

Mossbauer spectra of Sn-doped metal-oxide semiconductors at room and liquid-nitrogen temperature 10 p1590 A66-22175

Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 11 p1748 A66-22279

Pore formation in decomposition of solid solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 11 p1749 A66-22289

Solubility of niobium carbide in gamma iron from carbon content of series of iron-niobium alloys equilibrated with hydrogen-methane mixtures 11 p1719 A66-23401

Classification of titanium alloying element by effect on strength of chemical bonds in process of formation of alpha-solid solutions 12 p1892 A66-23511

Hall effect and galvanic magnetoresistance measurements in single crystal /mercuric manganese/ telluride solid solutions 12 p1927 A66-23721

Metastable Ti-Mo-Fe-Al beta-alloy system discussing metal hardening, heat effects etc 12 p1893 A66-23761

Ettingshausen-Nernst effects in InAs-InP solid solutions, discussing differential thermal emf, scattering at acoustical and thermal oscillations of lattice, ionic impurities, etc 12 p1930 A66-24681

Segregation by controlled solidification of small quantities of dissolved tantalum in niobium, using titanium as third component in ternary alloy 12 p1897 A66-24911

Kinetics of two-phase decomposition of solid solution of magnesium-aluminum alloy, using X-ray analysis, noting grain orientator and size 12 p1898 A66-25027

Piezoelectric constants of polycrystalline ferroelectrics of barium titanate type, noting dependence on ceramic sintering temperature and applied constant voltage 13 p2160 A66-25099

Electrical resistance and thermoelectric power of Ni-Cu solid solutions near Curie point 13 p2162 A66-25407

Thermoconductivity of alloyed solid silicon-germanium solutions 13 p2167 A66-25927

Corrosion mechanism for eutectic or near-eutectic Mg-Zn alloys in halide solution 13 p2110 A66-26026

Magnetic and semiconducting properties of solid solutions of LaMnO sub 3 and LaCoO sub 3 14 p2353 A66-26900

Phase composition and nonmetallic inclusion distribution in molybdenum and its alloys determined with electron microscope and microdiffraction 14 p2315 A66-27600

Saturation conditions and alloying elements effect on depth, phase composition and properties of borided 14 p2316 A66-27831

X-ray and thermographic methods to study structure and phase composition of alloys belonging to silver indium selenide systems 15 p2557 A66-28558

X-ray diffuse scattering analysis of peculiarities of atomic structure of solid solution of Ta-Nb 15 p2520 A66-28559

Large quantities of high-purity carbides and carbide solid solutions produced by auxiliary metal bath in carbon tube furnace 16 p2723 A66-30638

Distribution of recombination centers over energy levels of CdS-CdSe solid solutions 16 p2787 A66-31737

Work function of solid solutions of tungsten with molybdenum and tantalum explained by surface adsorption effects 16 p2728 A66-31772

Phase diagram of copper gallium telluride-gallium telluride semiconductor alloy 17 p2975 A66-31996

Strain hardening of high temperature titanium multiphase solid solution by deformation and subsequent rapid cooling 17 p2940 A66-33229

Laser based on excitation of gallium phosphorus arsenide solid solution by beam of fast electrons 17 p2937 A66-33304

Particle growth during coalescence of fine phases of metallic alloys 18 p3123 A66-34403

Mossbauer spectra of Sn-doped metal-oxide semiconductors at room and liquid-nitrogen temperature 19 p3441 A66-35789

Order-to-disorder structural transition in binary alloys studied by method based on spectral parameters of probability distribution of various atomic configurations 19 p3402 A66-35938

Niobium dissolution kinetics in iron carbide 19 p3386 A66-36447

Effect of partial substitution of silicon, germanium and lead for tin on thermal emf and thermoconductivity of solid solutions of tin telluride 20 p3612 A66-37123

Magnetic, electric and SHF properties of oxides and solid solutions of bivalent europium from 1.6 to 300 degrees K 20 p3617 A66-37478

Solubility and phase transformation in titanium-zirconium system, using X-ray

- diffraction techniques 20 p3585 A66-37786
Critical temperature of several bulk dilute
solid solutions of transition metals in Al,
In, Sn, examining effect of
transition-metal
impurities 21 p3796 A66-38556
Microstructural and superconductivity
analyses of Nb-Ti-O compound as function of
thermomechanical processing treatment,
plotting critical current density against
transverse magnetic field 22 p3960 A66-39780
Titanium-rich end of Ti-Al solid solution
equilibrium diagram 22 p3934 A66-39781
Superconductivity of Ta-Ti solid solution
alloy wires subject to steady magnetic high
field 22 p3960 A66-39782
Solid solutions of titanium, tungsten,
chromium prepared by carbidization of
mixtures in hydrogen medium and obtained
as fine-grained carbide
powders 22 p3934 A66-39865
Melting point and microhardness of carbon-
saturated TiC-VC solid solutions, noting
temperature of eutectic of TiC-VC with
graphite 22 p3934 A66-39866
Thermal conductivity of InP-GaAs solid
solutions in vacuum 22 p3962 A66-40051
Applications for new class of materials
termed oxide-dispersion strengthened
materials offering stability at high
temperatures and high thermal and
electrical conductivity 22 p3935 A66-40526
Self-diffusion parameters of Nb in solid
solutions with beta-Ti and beta-Zr at high
temperatures 22 p3937 A66-40925
X-ray and thermographic methods to study
structure and phase composition of alloys
belonging to silver indium selenide
systems 23 p4112 A66-41279
X-ray diffuse scattering analysis of
peculiarities of atomic structure of solid
solution of Ta-Nb 23 p4080 A66-41280
Thermoelectric properties of solid solution
of germanium telluride in copper antimony
telluride 23 p4114 A66-41572
Alpha and gamma solubility limits in Fe-Ni
phase diagram at temperatures above 500
degrees C, using quench-and-anneal and
diffusion-couple techniques and electron
probe microanalyzer 24 p4227 A66-42365
New phase in mercury-indium alloy system
established by resistance, superconductivity
transition temperature and X-ray diffraction
measurements 24 p4255 A66-42486
Carbon solubility in Ta, Nb and V at
temperatures from 1500 degrees C to
eutectic temperatures 24 p4228 A66-43062
Notch and heat treatment effect on
compressive buckling of WC/Co
alloys 24 p4228 A66-43063
SOLID STATE
Improvement of heat resistance of nickel
by high temperature thermomechanical
treatment 03 p0385 A66-13173
Measuring thermal fluxes in solid bodies
by high temperature gas jets, noting
Kastelin-Bronskiy method 04 p0596 A66-13653
Transport coefficients of intrinsically
conducting InSb above room temperature in
magnetic field of medium
strength 04 p0566 A66-14288
Electronic solid state goniometer for
producing navigation information for
transmission from VHF omnirange /VOR/
ground station 05 p0645 A66-14582
Desirable TEM wave instabilities in solid
state plasma in electromagnet
field 14 p2362 A66-27515
Propagation and amplification of helical
waves in germanium bar solid state plasma
in magnetic field parallel to bar current at
room temperature 14 p2363 A66-27519
Numerical data for common solid state
reaction equations which are functions of
alpha, fraction of material reacted in time,
t 21 p3797 A66-38594
HF long wavelength conductivities of solid
state plasmas in thermal equilibrium
derived, using variational
formalism 21 p3791 A66-39106
Solid state plasma microwave oscillations
and dispersion conditions for ion-cyclotron
instability excitation in
semiconductor 21 p3804 A66-39335
Solid state plasma microwave oscillations
and dispersion conditions for ion-cyclotron
instability excitation in
semiconductor 22 p3959 A66-39705
Dispersion characteristics of helicon wave
in extrinsic solid state
plasmas 23 p4034 A66-41018
SOLID STATE DEVICE
SA DIFFERENTIAL AMPLIFIER
SA LASER
SA MASER
SA PARAMETRIC DIODE
SA SEMICONDUCTOR DEVICE
Microwave interactions in solid state
plasmas 01 p0029 A66-10584
Combined Peltier-Ettingshausen device
evaluated for cryogenic refrigeration to 70
degrees K 02 p0272 A66-11490
Solid state flip-flop store element arranged
on multilayer printed
circuit board 02 p0193 A66-11929
Charged particles in auroral zone,
measuring energy and pitch angle
distribution of electrons and protons with
rocket mounted solid state
detectors 03 p0417 A66-12653
Solid state camera system for aerospace
application incorporating monolithic
phototransistor mosaic sensor, molecular
digital readout system,
etc 04 p0519 A66-13631
Varactor circuits as source of solid state
microwave power discussing basic theory,
varactor-multiplier chains and
upconverters 04 p0503 A66-13728
LF/VLF pulse radiation using solid state
elements in switching mode to generate RF
power, presenting time and energy
functions 05 p0652 A66-14596
All-optical computer techniques, noting
semiconductor laser digital devices for near
future 05 p0637 A66-14824
Laser digital devices, examining quenching
of gain and optical
absorption 05 p0693 A66-14826
Radiation test data on solid state
equipment of tracking and command system
in SNAP-10A
environment 05 p0740 A66-15495
Book on space communications techniques
covering equipment design and components
and communications subsystems, with two
bibliographies 05 p0635 A66-15805
Average energy expended per ionized
electron-hole pair in silicon and germanium
as function of
temperature 05 p0742 A66-15871
Solid state camera system consisting of
monolithic phototransistor mosaic sensor and
molecular digital readout
system 06 p0878 A66-15975
Solid state output devices in
communication satellites 06 p0850 A66-16399
Improved resolution of scanning electron
microscope used to define geometry of
electrode areas during fabrication of solid
state devices 06 p0855 A66-16769
Binary counter circuit, discussing relevance
to solid state design, performance and
operation 06 p0857 A66-16973
C-band weather radar AVQ-10 incorporating
tunnel diode amplifier and p-i-n solid state
protector switch 07 p1008 A66-17711
Space-charge reduction of shot noise for
space-charge-limited current in solid
dielectric diode 07 p1097 A66-17737
Crystal oscillator described, using quartz as
series resonant element with integrated
solid state circuit
amplifiers 07 p1010 A66-18250
Wide bandwidth and high power electron
tube applications in face of encroachment of
solid state devices 07 p1011 A66-18271
Gamma-electric cell, solid state device for
direct conversion of gamma-ray energy into
electrical energy 07 p1079 A66-18323
Solid state transmitters for Gemini
spacecraft telemetry system, noting PCM
system operation and
design 08 p1181 A66-18728
High resolution solid state precision star
tracking system using magnetoresistance
multiplier and image
phototube 08 p1250 A66-19349
Solid state voltage-controlled subcarrier
oscillator for satellite and spacecraft low-
power telemetry systems 08 p1196 A66-19519
Noise suppression in solid state space
charge limited diodes calculated, using open
and short circuited
output 09 p1359 A66-20973
model
Nonresonant solid state magnetic,
semiconductor and dielectric devices, noting
operation characteristics, control parameters,
etc 10 p1509 A66-21418
Solid state amplifiers using streaming
carriers analyzed, noting different role
played by collisions when electron stream
interacts with TM and TEM
waves 10 p1584 A66-22072
Gain bandwidth and stability of solid state
multicavity masers 11 p1712 A66-22765
High-ratio multipliers and tunnel diode
generators as solid state microwave sources
considered in analysis of varactor
circuits 11 p1670 A66-23196
Lens technique for measuring yield and
energy spectrum of secondary electrons
generated by fission fragments through
metal foil 12 p1916 A66-23704
Miniaturized AM-diode signal detector in
form of solid state circuit for frequencies in
excess of 450 kc 12 p1830 A66-23735
FM and AM noise spectra of low-noise
microwave tubes, solid state klystrons and
solid state chains 12 p1835 A66-24135
Solid state microwave devices, discussing
transistors, tunnel diodes, parametric
amplifiers, power transistors, varactors,
module systems, etc 12 p1836 A66-24154
Properly controlled high-stress life testing
used to evaluate failure rate of high
reliability solid state components of
integrated circuits 12 p1846 A66-24913
Magnetic material and field application to
solid state electronics, noting amplification
of microwaves, magnetoelastic waves,
application of microwave ferrite
components, low temperature circulators,
etc 13 p2165 A66-25520
Germanium alloy transistor for high
current and low saturation voltage
requirements, noting high efficiency,
physical properties, application,
etc 13 p2037 A66-25543
500 channel system for measuring time
intervals, based on modified vernier
chronotron method of Lefevre and Russell,
using solid state circuits 13 p2083 A66-26553
Programmable patching system at Cape
Kennedy for communications network
composed of two individual switching
subsystems, using solid state devices and
glass-reed relays 14 p2233 A66-26805
Variable efficiency harmonic with shunted
varactor diode for microwave power level
control 14 p2247 A66-27042
Solid state tuned RF radiometric receiver
using low-noise broadband tunnel diode
amplifier 14 p2290 A66-27063
Book on solid state communications and
design of equipment using
semiconductors 14 p2260 A66-28367
Solid state communications devices,
discussing HF small signal amplifiers,
transistor circuits, varactor diodes for
frequency multiplier chains,
etc 14 p2261 A66-28368
L-3 rocket observation of proton and
electron fluxes at high altitudes, using solid
state detectors 15 p2574 A66-28910
Solid state linear amplifier noting block
diagram, use of synthesized waveform type
method and semiconductors in vector sum
unit 15 p2429 A66-29604
Continuous flow, solid state
electrochemical device for simultaneous
carbon dioxide removal and oxygen
generation
[AICE PREPRINT 47E] 17 p2867 A66-32675
X-band solid state source using chain of
frequency multiplier stages and driven by
transistor crystal controlled driver
unit 17 p2893 A66-32923
Wide tuning range solid state microwave
source consisting of transistor oscillator and
varactor diode harmonic generator
chain 17 p2893 A66-32926
Textbook on circuits in transistor
electronics, discussing LF, pip, video and
DC amplifiers, radar, radio telemetry,
etc 17 p2894 A66-32986
High energy electron acceleration detected
in shock transition region of terrestrial
magnetosphere, using Au-Si surface barrier
solid state detector and IMP-I satellite
mounted GM counter 18 p3177 A66-34753
Reproducible ohmic contact preparation for
high resistivity n-type GaAs in fabrication of
Gunn oscillators 19 p3313 A66-35351

Multicolor laser display, discussing components and future application 19 p3355 A66-35532

Airborne UHF telemetry receiver utilizing solid state components and high-density packaging technique 19 p3316 A66-35691

Hybrid photomultiplier tubes using silicon diodes and transistors for low and medium gains 19 p3359 A66-35908

Properties and performance capabilities of solid state delay lines composed of materials such as quartz, sapphire and YIG having low loss acoustic propagation 19 p3319 A66-36032

Solid structure tunnel diode, discussing design and manufacture, noting use of thin film photolithographic process for improved reliability 19 p3319 A66-36164

Varactor characteristics, applications, equivalent circuits, measurement problems, etc 19 p3319 A66-36165

Solid state time domain multiplexers using advanced devices 19 p3321 A66-36670

J-band multiplier design noting extension of frequency coverage, components, noise performance, frequency stability, tuning range, etc 21 p3711 A66-38837

Solid state frequency multipliers for LEM landing and rendezvous 21 p3715 A66-39525

Miniaturized AM-diode signal detector in form of solid state circuit for frequencies in excess of 450 kc 22 p3875 A66-40078

Advances in HF solid state transmitter systems - WESCON, Los Angeles, August 1966 22 p3879 A66-40721

Overlay transistors at microwave frequencies for amplifiers, oscillators, etc, used in telemetry 22 p3879 A66-40722

High power microwave frequency multiplier matching very low varactor impedances 22 p3879 A66-40723

Microwave solid state multiplier for space use noting temperature variations, vibration-induced noise, outgassing, etc 22 p3879 A66-40724

Solid state millimeter wave receivers for space vehicle environments, discussing integral mixer IF amplifiers, oscillators and varactor multipliers 22 p3879 A66-40733

Backward wave oscillator /BWO/ design parameters and components 22 p3880 A66-40736

Power and control integrated circuits - WESCON, Los Angeles, August 1966 22 p3880 A66-40739

Inverter with integrated components and direct coupled inverter circuit not needing transformers for space applications 22 p3880 A66-40740

Dual-element power devices for solid state inverters, evaluating potential hazards of reverse second breakdown 22 p3881 A66-40741

Integrated circuit arrays for solid state inverters, noting Johnson counter and packaging 22 p3881 A66-40742

Solid state components and techniques applicable to spectrum signature measurements 23 p4047 A66-41599

Gas chromatography analysis of ambient gas and vapor effects on semiconductor and solid state devices at low temperatures 24 p4179 A66-42095

Electron effective mobility variation in AC for small signals as function of operating frequency of thin film transistors and dielectric diodes 24 p4181 A66-42392

SOLID STATE LASER

Semiconductor-based pulse generator for laser excitation 01 p0083 A66-11042

Two-and three-step laser cascades detected experimentally in helium-neon mixtures, analyzing two-step cascade starting with density matrix formulation 02 p0241 A66-11477

High power relaxation oscillation in multilevel solid state ruby maser due to magnetic field modulation 03 p0380 A66-13327

Electro-optical shutter for Q-factor modulation in neodymium glass laser 04 p0529 A66-13431

Application, problems and state of low noise amplifiers and traveling wave tubes, maser and Adler tubes gain in radar systems 04 p0500 A66-14123

Regular periodic spiking in output of pulsed neodymium doped borate glass laser at pumping levels slightly above threshold 06 p0892 A66-16672

Derivation of two equations for electromagnetic field and population inversion in solid state laser 06 p0893 A66-16773

Solid state laser system, describing quantum mechanical treatment of self-sustained oscillation for one mode 07 p1044 A66-17817

Apparatus for fluoridation of hydroxyl and oxygen contaminated fluoride compounds, obtaining optically clear crystals with no Tyndall scattering for laser application 07 p1047 A66-18488

Gallium arsenide luminescent diodes with triangular resonator producing coherent emission at high density 08 p1193 A66-19195

Solid state laser output exhibiting regular and irregular spikes analyzed through relaxation oscillations and classical physics 09 p1387 A66-20568

Semiconductor-based pulse generator for laser excitation 11 p1714 A66-23289

InAs laser emission, discussing radiative transitions, coherent emission from InAs diodes, recombination mechanisms in IR radiation spectra, etc 13 p2089 A66-25065

Neodymium doped YAG crystal and lithium meta niobate as CW laser materials and potassium tantalum niobate as optical modulator material 13 p2164 A66-25518

Automodulation of emission from solid state laser 13 p2093 A66-26041

Nonlinear quantum effect in solid state lasers using paramagnetic crystals, noting Raman effect and gain dependence on pumping power 13 p2098 A66-26172

Nonequilibrium population buildup and detection for IR solid state lasers and IR-optical double resonance in lanthanum chloride crystal 13 p2098 A66-26177

Superradiance in n-type gallium arsenide at room temperature excited by electron beam 14 p2306 A66-27028

Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 14 p2308 A66-27595

Causes of failure and guidelines for design of solid state lasers 14 p2309 A66-27669

Recent developments in laser generation and application 14 p2309 A66-28037

Experimental observation of regular spiking in neodymium doped glass laser rod attributed to simultaneous oscillation of many transverse and longitudinal modes 15 p2513 A66-28727

Zero magnetic field millimeter maser using trivalent iron ion in host crystalline structure of rutile /titanium dioxide/ as active material 15 p2514 A66-29018

Gallium arsenide laser design using p-n junction obtained by diffusion of zinc in tellurium doped n-GaAs single crystal 15 p2514 A66-29057

Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix 16 p2718 A66-30865

Nonuniform pumping effects on near-axial low-order transverse mode structure in solid state laser cavity 16 p2719 A66-31087

Coherent optical transducer for optical information processing 16 p2657 A66-31244

High power continuous wave four-level solid neodymium glass laser showing length and host loss as dominant factors in limiting output power 17 p2937 A66-33334

Solid state CW optically pumped microwave maser, using divalent thulium doped calcium fluoride 18 p3117 A66-33614

Mode characteristics of solid state lasers from analytical solution of conservative equation 18 p3118 A66-33839

Energy and power of Q-switched neodymium glass laser measured, using calorimetric devices, vacuum photodiodes, etc 18 p3120 A66-34904

Derivation of two equations for electromagnetic field and population inversion in solid state laser 19 p3372 A66-35370

Laser output energy controller having eight-to-one improvement in pulse repeatability in solid state lasers 19 p3374 A66-36034

Solid state laser application to fusion welding 22 p3926 A66-40274

Radiation noise effect on laser optical properties, noting density vs resonator characteristics, energy spectrum, etc 22 p3933 A66-40917

Compact discharge lamp designed for continuous pumping of solid state laser with integral mounts for crystals and enclosure providing cooling circuits for lamp and crystal 23 p4076 A66-41247

Theory of steady multimode oscillation of solid state laser extended to cavities with inefficient end mirrors or losses dependent on frequency 23 p4077 A66-41274

Spectral width of peak type and monopulse type radiation of solid-body laser in nonstationary regime 24 p4219 A66-42131

Book on lasers covering optical cavities, gas lasers, solid state lasers, optical pumping, Q-switching, population inversion, etc 24 p4220 A66-42319

Molecular oscillation difference frequency generation in IR spectrum by beating together laser and laser-stimulated Raman emission 24 p4221 A66-42544

Solid state maser oscillator operating in zero field configuration, using ferric ion substituted as impurity in aluminum nitrate host crystal 24 p4221 A66-42551

Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 24 p4224 A66-42729

Radiation of giant pulses of superluminescence by highly excited active medium of Nd glass with rapid cut-in of amplification 24 p4224 A66-42755

Crystalline solid lasers, considering rare earth and transition metal impurities and host materials, noting CW laser characteristics 24 p4224 A66-42799

SOLID STATE PHYSICS

SA HOLE MOBILITY

Parametric excitation of first order magnon/phonon instabilities in ferrimagnetic or antiferromagnet by photon or phonon parallel-pump 01 p0120 A66-10519

Field controlled plasmas in doped semiconductors and modulation of millimeter and submillimeter waves, noting method based on Franz-Keldysh shift in intrinsic absorption edge 01 p0121 A66-10562

Thermomagnetic current density in semiconductors and metals with temperature gradient 01 p0125 A66-10779

Theory of interband magnetodispersion effects in crossed field semiconductors, obtaining expressions for Faraday and Voigt effects 02 p0272 A66-11711

Quantum levels of electron moving in periodic field of semiconductor crystals in strong electric field 02 p0274 A66-11733

New semiconductor materials and recent developments in standard materials 02 p0274 A66-11767

Electron distribution function in semiconductors discussing steady state illumination effects, energy and spectral characteristics and photoconductivity oscillations at low temperatures 03 p0410 A66-12938

Jahn-Teller effect in excited 4-T-2 state of trivalent Cr ions in ruby, discussing unilateral elastic strain effect splitting of pure electronic line 597 nm in U band 03 p0410 A66-12941

Macroscopic quantum interference in multiply connected superconductors utilizing Josephson tunneling, noting phase coherence and modulation 04 p0560 A66-13719

Acoustic-mode scattering theory obtained with tight-binding approximation of band theory and applied to narrow-band semiconductor in organic molecular crystals 04 p0560 A66-13721

Characteristics of solid state plasma conditions necessary for existence of plasma in semiconductor or semimetal 04 p0563 A66-13943

Nuclear magnetic resonance and relaxation in solids - Conference, Louvain, Belgium, September 1964 04 p0548 A66-14029

German text on electronic semiconductors introducing physics of rectifiers and transistors 04 p0570 A66-14458

Roll reduction diffusion bonding for sandwich structures based on solid state diffusion process [SAE PAPER 650778] 05 p0687 A66-15006

Effective mass of electrons and holes in

- semiconductors from magneto-optical laser
mission studies 05 p0741 A66-15832
- Physics of semiconductors - International
Conference, Paris-Royaumont, July 1964,
volume 3, Radiation damage in
semiconductors 06 p0930 A66-17111
- Plasma effects in solids - Conference,
Paris, July 1964 07 p1100 A66-18197
- Helicon and Alfvén wave propagation in
solid state plasma 07 p1101 A66-18198
- Polarization and Alfvén wave attenuation
Doppler-like change in transverse wave
velocity when drift current is passed
parallel to magnetic field in solid-bismuth
plasma 07 p1102 A66-18209
- Pronounced quantum effects of solid-
state plasma properties at quantum limit
at low temperature 07 p1082 A66-18212
- Nonharmonicity effect on dispersion of
light by impurity centers of solid
body 08 p1273 A66-19256
- Book on heuristic approach to theory of
physics of semiconductor electronics and
analysis of semiconductor
devices 08 p1195 A66-19462
- Plasma instability in solids occurring in
microwave frequency
region 10 p1576 A66-21537
- Amplification of electromagnetic waves in
solid state plasma in presence of carrier
drift in external electric and magnetic
fields 10 p1586 A66-22147
- Thermomagnetic current density in
semiconductors and metals with temperature
gradient 11 p1749 A66-22291
- Monographs on field effect
transistors 11 p1671 A66-23460
- Soviet book on theory of solid state,
treating Mossbauer effect and electron
theory of highly doped
semiconductors 12 p1928 A66-23878
- Properties and utilization of solid state
plasma 14 p2355 A66-26923
- Vacuum UV instrumentation for optical
studies of solids 14 p2293 A66-27333
- Josephson tunnel effect in
semiconductors 14 p2370 A66-28357
- Hall effect and related phenomena, noting
magnetic-temperature-impurity
effect 16 p2785 A66-31572
- Secondary electron interaction with solid
state plasma, noting energy distribution,
Boltzmann equation solution,
etc 16 p2789 A66-31783
- Solid state physics, collection of articles in
research and application 17 p2977 A66-32398
- Amplification of electromagnetic waves in
solid state plasma in presence of carrier
drift in external electric and magnetic
fields 19 p3440 A66-35761
- Solid state experiments in pulsed magnetic
fields extended to explosively generated
high field region 21 p3804 A66-39511
- Dictionary of semiconductor physics and
electronics, English-German,
German-English 22 p3871 A66-39701
- Monograph on semiconductor
materials 22 p3966 A66-40789
- Solid state mechanics - All-Union
Conference, Moscow, January-February
1964 23 p4134 A66-40988
- Solid state mechanics and reliability
theory 23 p4135 A66-40992
- Magnetic breakdown on usual effective
Hamiltonian theory for Bloch electrons in
magnetic field, using simple two-dimensional
rectangular model 24 p4249 A66-42223
- LID SURFACE**
Heat transfer through contact zone of two
solids which are joined 13 p2209 A66-25445
- Quasi-linearization applied in boundary
layer calculations, noting simple flow over
solid surface 15 p2479 A66-29299
- Surface temperature of semiinfinite solid
exposed to one-dimensional heat flux
calculated with method allowing accuracy at
long time intervals 20 p3678 A66-37388
- Tin and zinc diffusion from doped
pyrolytic silicon oxide layers used to form
base regions of planar n-p-n and p-n-p-GaAs
transistors 24 p4254 A66-42384
- LID SUSPENSION**
A COLLOID
Sedimentation rates of metallic particles in
cyclohexane medium measured by light
absorption 01 p0069 A66-10750
- Steady cooling regime of pseudoliquidified
layer, determining cooling time and heat
transfer coefficients of solid particles and
liquid media 08 p1317 A66-18865
- Dispersed material concentration at various
cross sections of ascending two-phase gas
flow 13 p2065 A66-26484
- Linear flow equation motion of fluid with
suspended impurities, noting that under
certain assumptions velocity fields can be
described by family of potential
functions 21 p3729 A66-39448
- SOLIDIFICATION**
Closed-form solution for constant velocity
solidification of spheres initially at fusion
temperature 10 p1622 A66-21889
- Miele solidification principle for uniformly
spinning rotor mounted on rigid body
applied to case where modulus of angular
velocity of rotor is allowed to
vary 17 p2909 A66-32478
- Structure effect on superconducting
properties of eutectic alloys solidified under
variety of growth conditions, discussing
interphase boundary, current density and
residual strain 24 p4250 A66-42296
- SOLIDS**
SA INFINITE SOLID
Text on deformable solid statics including
indeterminate systems, strain, stress,
elasticity, continuum energy, plasticity and
mathematical appendix 09 p1467 A66-20500
- Instantaneous center of vector
accelerations of free solid
body 11 p1736 A66-22848
- Correlation expressing reduced coefficient
of thermal expansion as function of reduced
Debye temperature for metallic solids used
for predicting coefficient at any
temperature 14 p2411 A66-27375
- Dielectric constant of gold-plated
rectangular parallelepiped solid at
hyperfrequencies determined via resonant
frequency method 14 p2366 A66-27944
- Pressure effect on magnetic moment of
solids, noting magnetic transition point,
ferromagnetic anomalies,
etc 15 p2565 A66-29067
- Electrical failure in solids from excess
energy storage or internal
disordering 15 p2568 A66-29669

exercises in UK involving sonic boom generation 09 p1330 A66-20682
 Nomograms for rapid calculation of maximum ground sonic-boom overpressure for different flight conditions 09 p1330 A66-20747
 Ground reflection shock, compression and expansion waves caused by supersonic aircraft examined, noting correlation between wave intensity, incidence and pressure jump 13 p2062 A66-25403
 Nonoptimum flight conditions effects on SST fuel performance, noting sonic boom and atmospheric temperature variations 14 p2224 A66-28230
 Sonic boom shape distortion due to reflection and scattering by ground surface with finite acoustic impedance 17 p2905 A66-31947
 Sonic boom - Symposium, Saint Louis, November 1965 17 p2846 A66-33020
 Overall nature and problem of sonic boom, noting roles of aircraft design, aircraft operations and atmosphere 17 p2847 A66-33021
 Digital computer utilization to estimate sonic boom characteristics of complex airplane configuration 17 p2847 A66-33022
 Aircraft design to minimize sonic boom pressure field energy 17 p2847 A66-33023
 Effect of stratified atmospheric models on sonic boom generated by aircraft in steady level flight, using propagation of weak shock waves theory as base for analysis 17 p2847 A66-33024
 Sonic boom measurement instrumentation noting use of frequency response, vibration isolation, wind screening, etc 17 p2926 A66-33025
 Sonic boom phenomena, noting atmospheric dynamic effects, acceleration and lateral spread, variations in pressure signatures, etc 17 p2847 A66-33026
 Human reaction to sonic boom 17 p2868 A66-33027
 Sonic boom effect on people, noting ground overpressure measurement and data obtained from interviews, formal complaints, building damage, etc 17 p2868 A66-33028
 Sonic bang experience in United Kingdom from supersonic flights and explosive charges, noting intensity, waveform, damage, etc 17 p2868 A66-33029
 Laboratory physiological-psychological responses to impulsive acoustic stimuli and sonic booms from supersonic aircraft 17 p2868 A66-33030
 Sonic boom requirements for supersonic transports 17 p2847 A66-33031
 XB-70A research aircraft and flight tests to aid SST 18 p3051 A66-33957
 XB-70A flight testing, examining effect of aerodynamic lift, gross weight, altitude, temperature and similar parameters on sonic boom signatures 18 p3052 A66-33959
 Sonic boom reduction by aircraft shape modification 19 p3279 A66-36180
 SST in nonoptimum conditions, discussing cost penalties due to navigation error, air traffic conditions, sonic boom restrictions, clear air turbulence and weather 21 p3695 A66-38451
 Energy spectral density of ideal sonic boom pressure signatures and equations for HF and LF asymptotic spectral behavior 22 p3848 A66-40301
 Wind tunnel tests of sonic boom phenomena, noting weak pressure field measurement, construction of extremely small models, boundary layer effects, etc [AIAA PAPER 66-765] 22 p3894 A66-40646
 Pressure-perturbation produced by supersonic aircraft near caustic, deriving differential equations 23 p4016 A66-42040
 Extended explosive charge giving rise to pressure waveform for analysis of sonic boom 24 p4159 A66-42417

SONIC FLOW
 Viscosity and thermoconductivity effects on asymptotic sonic flow structure near profiles and bodies of revolution 12 p1863 A66-24342
 Airfoil cascade oscillation in near-sonic gas flow 12 p1798 A66-24432
 Gas flow regulator system conforming to prescribed time-dependent program, based on mass flow limitation properties of sonic orifices and polynomial approximation for

exponential 12 p1859 A66-24713
 Constant section mixture of flows with different enthalpies, noting sonic blocking for terminal temperature differences 13 p1991 A66-25470
 Prediction of local flow conditions at crest of aerofoil section in sonic stream 13 p1992 A66-26697
 Stream function for plane free sonic gas jet flowing past profile 16 p2630 A66-31290
 Nozzle precombustion chamber base pressure for sudden pulsating sonic flow propagation 17 p2909 A66-32582
 Critical jets of symmetrical perfect-gas flow determined by analogy between impedance network node equation and velocity potential and stream function in Tricomi plane 19 p3341 A66-36250

SONIC NOZZLE

Condensation in underexpanded jet issuing from sonic orifice into quiescent atmosphere 01 p0007 A66-10617
 Condensation in underexpanded jet issuing from sonic orifice into quiescent atmosphere 13 p1990 A66-25178
 Supersonic flow of reacting gases in de Laval nozzle for Mach number near unity 21 p3724 A66-38721

SONIC SPEED**S SUBSONIC SPEED****SORET COEFFICIENT**

Optical determination of Soret coefficient by direct measurement 04 p0524 A66-14488
 Soret Zone Plate simulation by longitudinally distributed coaxial aperture system, noting system activation and operation 23 p4068 A66-41622

SORPTION**SA ABSORPTION****SA ADSORPTION****SA CHEMISORPTION****SA CRYOSORPTION****SA DESORPTION**

Sorption of low energy argon ions by titanium films as function of ion energy, density of ion beam and method of preparation of film 06 p0928 A66-16886
 Monte Carlo calculation of probability of free molecular conductance of cylindrical tube with wall sorption 17 p2906 A66-31977
 Regenerative sorbents for removal of carbon dioxide with minimal drying of process air stream 17 p2865 A66-32186
 High temperature, low pressure solubility of nitrogen /gas/ in niobium /solid metal/ 18 p3121 A66-33730

SOUND**S ACOUSTICS****SOUND AMPLIFICATION**

Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 01 p0118 A66-10259
 Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 01 p0123 A66-10727
 HF acoustic amplification using parameters of conductivity, electric field strength and acoustic wavelength based on Hutson and White theory 07 p1002 A66-17825
 Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field amplitude 09 p1428 A66-20592
 Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 13 p2159 A66-25085
 Hot-wire analysis of permanent sound fields during varied flow velocity around flat plate boundary layer, noting resonance effect of sound amplitude 13 p2063 A66-25901
 Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 13 p2168 A66-25976
 Acoustic amplification in piezoelectric semiconductors, examining present state of the art 17 p2892 A66-32919
 Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 20 p3619 A66-37664
 Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field amplitude 20 p3622 A66-38125
 Ultrasonic generation and amplification in

CdS crystals with barrier layer under constant drift field 21 p3795 A66-38511
 Continuous wave ultrasonic piezoelectric amplifiers at gigacycle frequencies, noting desirability of high velocity sound in active medium and unimportance of high mobility 21 p3713 A66-39461
 Mathematical theory of gain mechanisms of acoustic amplification 22 p3862 A66-39741

SOUND FIELD

Difference between earphone /MAP/ and sound field /MAF/ threshold sound pressure levels /SPL/ for spondee words 09 p1338 A66-20995
 Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 13 p2127 A66-25085
 Hot-wire analysis of permanent sound fields during varied flow velocity around flat plate boundary layer, noting resonance effect of sound amplitude 13 p2063 A66-25901
 Standing sound field effect on MHD flow past flat plate 15 p2551 A66-29241
 Sound power from nonuniform flow determined by summing surface and volume integral over sound sources 17 p2905 A66-31949
 Sonic diffraction mechanism used in tropospheric transhorizon propagation 17 p2876 A66-33361
 Inertia and pressure effects on energy potential of homogeneous and isotropic turbulence in weakly compressible medium 18 p3100 A66-34601
 Experimental study of isotropic term of acoustic radiation intensity in gas 18 p3136 A66-34721
 Sound field parameter dependence of coefficient of heat transfer from horizontal cylinder at near zero Grashof numbers 19 p3478 A66-35751
 Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 21 p3769 A66-38511
 Ultrasonic field intensity in liquid measured with microradiometer, discussing instrument design concepts, advantages and operation 21 p3735 A66-38518

SOUND INTENSITY**SA NOISE INTENSITY**

Sound pressure and acoustic spectrum associated with it calculated for predetermination of ground noise during takeoff period of future aircraft [ONERA TP 250] 02 p0177 A66-11679
 Psychophysical method measuring effects of several variables on loudness fluctuation of binaural beats when amplitude modulated 05 p0628 A66-15733
 Magnitude estimation of loudness, comparing experimental results of observers estimates to sone scale 07 p1000 A66-17732
 Auditory threshold location and uncertainty as function of tone parameters and fatigue examined for pulsed and continuous tones, using Bekeasy audiometer 09 p1337 A66-20954
 Masking-level differences /MLD/ for 600-cps low-pass transient noise explored as function of interaural time difference, interaural intensity difference and combinations of both 09 p1338 A66-20956
 Damage-risk criteria for exposure to sound, including graphs of maximum steady-sound pressures and durations of exposures that can be tolerable 14 p2230 A66-27657
 Sound power from nonuniform flow determined by summing surface and volume integral over sound sources 17 p2905 A66-31949
 Sound pressure in external auditory meatus and near center of cat head in absence of animal as function of frequency 22 p3854 A66-40166
 Apollo launch escape tower electroexplosive bolts produced heat transfer to surrounding structural members, obtaining sound intensity maps 23 p4119 A66-41310

SOUND LOCALIZATION

Binaural interaction phenomena, examining end point of lateralization for dichotic clicks 09 p1337 A66-20952

SOUND MEASUREMENT

Refraction of injected point source of sound by cold nitrogen jet, noting effects of temperature and velocity fields 07 p1080 A66-17500

Data acquisition of acoustic, vibration and heat flux during static rocket testing, using balloon rigging 08 p1202 A66-18927

Noise exposure duration indicator, recording cumulative time exceeding one of five preset sound pressure levels of noise, noting amplifier, rectifier, 10 p1536 A66-21742

Atmospheric wind measurement technique utilizing acoustic noise of rocket exhaust [AIAA PAPER 66-440] 16 p2741 A66-30601

Anisotropic acoustic attenuation measured from surface excitation in novel resonant cavity configuration, discussing validity in quartz and effective viscosity in silicon 22 p3866 A66-40407

Low accuracy of interferometric measurement of coefficient of ultrasound absorption in gas 23 p4068 A66-41414

SOUND PROPAGATION

Shear flow influence on sound attenuation in lined duct, considering upstream and downstream propagation 03 p0356 A66-12822

Acoustic propagation at microwave frequencies discussing generation, propagation, detection and reflection experiments with quartz crystals and ZnO transducers 04 p0480 A66-13680

Measurement of elasto-optic performance of solids in Bragg diffraction devices 04 p0531 A66-13958

Horizontal propagation of sound from jet engine at ground proximity, discussing effects of vector wind, ground absorption and temperature gradient 07 p1080 A66-17730

Ducted axial flow fan noise generation and noise spectrum 10 p1483 A66-21743

Sound propagation in transparent gas with specific heat nearly one as affected by radiative heat transfer 10 p1621 A66-21810

Linearized one-dimensional Krook equation solved for half-space of gas bounded by oscillating wall 11 p1736 A66-22902

Sound wave propagation in rarified gas dynamics, using kinetic theory 11 p1736 A66-22903

Steady state sound disturbances induced in monatomic gas by oscillating plane boundary 11 p1737 A66-22904

Charge sheath role at discharge wall in determining boundary conditions for LF wave in low pressure discharge, using hydrodynamical model 12 p1923 A66-24571

Ion acoustic waves propagating along cylindrical plasma column analyzed, deriving boundary condition at plasma surface 12 p1923 A66-24572

Justification for multiple isothermal layer approximation to real atmospheric acoustic-gravity wave propagation 14 p2234 A66-26857

Hooke law extension to include term expressing dependence of stress on spatial variation of strain, noting rotation of polarization plane in sound wave propagation in isotropic medium 14 p2334 A66-27478

Acoustic wave generation and amplification in weakly ionized plasma, explaining sound emission in glow discharge and modulation in plasma afterglow 15 p2556 A66-29808

Thunderlike acoustic effects associated with extinction of meteors 16 p2796 A66-30272

Nonlinear ionic-acoustic wave propagation in collisionless hot electron plasma with at least one cold ion stream 17 p2973 A66-32976

One-dimensional problem of sound propagation in two-component reactive gas mixture 19 p3341 A66-35745

Properties and performance capabilities of solid state delay lines composed of materials such as quartz, sapphire and YIG having low loss acoustic propagation 19 p3319 A66-36032

Sound propagation characteristics in isotropic gas, considering acoustic absorption and relaxation effects 19 p3341 A66-36288

Sound absorption in air at 1/3-octave frequency intervals as function of humidity and temperature at normal atmospheric pressure for studies in room acoustics 21 p3769 A66-38648

Screening of sound in infinite tube with circular cross section and finite wall thickness placed in compressible fluid 21 p3729 A66-39444

Refraction due to acoustic focusing of sound waves in lower troposphere, noting effect of wind profile 24 p4203 A66-43108

SOUND TRANSMISSION

Effect of radiative sound absorption in atmosphere, calculating absorption due to radiation by water vapor in far-IR rotation spectrum 14 p2334 A66-27659

Transceiver subsystem of two-way voice communication system consisting of ear device and master station 19 p3288 A66-35694

Limitations imposed on upper atmospheric sonic thermometry by lowering of density with increasing altitude 21 p3741 A66-39428

Increased ambient pressure effect on hearing function in divers 22 p3853 A66-39787

Response patterns to tone-burst stimulation of cochlear nucleus and dependency on stimulus parameters 22 p3855 A66-40375

SOUND VELOCITY

Equilibrium thermodynamics from transport theory including interaction studied up to second virial coefficient, determining velocity of first sound and zero sound 01 p0161 A66-10327

Stimulated Brillouin and Raman scattering in gases, discussing sound velocity calculation from frequency shift and argon, hydrogen and nitrogen 04 p0531 A66-13981

Speed of sound in ionized argon, noting electronic excitation influence 05 p0723 A66-15167

Gas and sound velocity measurements downstream of shock wave in electromagnetic tube for subsonic and supersonic flows 07 p1023 A66-18119

Rocket grenade measurement of temperature, pressure, density and wind velocity in upper atmosphere 10 p1533 A66-21832

Ultrasonic measurements in studying molecular interactions in fluids, noting variation relative to pressure, volume and sound velocity variation 13 p2016 A66-25093

Hot-wire analysis of permanent sound fields during varied flow velocity around flat plate boundary layer, noting resonance effect of sound amplitude 13 p2063 A66-25901

Equation relating sound velocity in polymer sample with angle between axes of molecules and fibers of sample 13 p2113 A66-25910

Sound velocity measurements in liquid argon, liquid oxygen and liquid nitrogen 14 p2336 A66-28276

Coupling of electron motion to lattice longitudinal acoustic mode in n-gallium antimonide leading to variations in sound velocity 16 p2775 A66-30732

Stimulated Brillouin scattering from nitrogen and methane using giant pulse laser, noting convergence angle of backscattered beam sound, velocity measurement, etc 17 p2961 A66-32627

Spark discharge generated blast wave application to shock on shock simulation, free-stream sound speed determination and hypervelocity flow measurements [AIAA PAPER 66-763] 22 p3894 A66-40645

Dual path ultrasonic measurement of fluid flow and speed of sound, using two sound-speed meters in opposition to produce sum and difference frequencies 22 p3921 A66-40896

Domain propagation with velocity of sound from negative to positive electrodes in GaAs single crystal rods under acoustoelectric oscillation 23 p4112 A66-41297

Deformation of surface of removable wave front discontinuity in acoustically anisotropic medium with variable sound velocity 23 p4090 A66-41415

Argon entropy diagram calculation from sound velocity data and P-V-T relation 24 p4238 A66-42887

SOUND WAVE

SA ELECTROACOUSTIC WAVE

SA PLASMA SOUND WAVE

Energy dissipation of acoustic waves propagating in liquid medium and producing cavitation 01 p0106 A66-10417

Geometrical acoustics in magnetic materials, examining control of direction and shape of beam by introducing inhomogeneities in medium 01 p0120 A66-10508

Plasma kinetic theory effect of magnetic field on dispersion relation for ionic sound wave 02 p0269 A66-11836

Brillouin scattering in liquids examining velocity, frequency and lifetime of thermally excited hypersonic sound waves, using laser light sources 03 p0376 A66-12422

Dispersion relation for plane longitudinal waves within macroscopic theory, considering collisions and viscosity of neutral particles, noting acoustical and ionic modes 03 p0404 A66-12983

Nucleation of ice formation in supercooled clouds as result of lightning-initiated sound waves 04 p0542 A66-13674

Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 04 p0483 A66-14048

Interaction of charge carriers with acoustic waves by deformation potential in semiconductors 05 p0732 A66-14669

Acoustic images arising from binaural repetitive wideband acoustic transients, noting tonal harmonic images and two dominant images of impulsive character 05 p0628 A66-15734

Acoustic fluctuations from transmission through water whose refractive index varies randomly in space and time related to range from source to receiver, acoustic frequency and scattering medium parameters 05 p0717 A66-15737

Attenuation and velocity of shear acoustic waves propagating parallel to magnetic field for spin density wave metal 06 p0922 A66-18074

Two-dimensional problems of diffraction of weak shock or acoustic and elastic waves on obstacles of various shapes, equivalent to supersonic gas flow three-dimensional problems 06 p0909 A66-18706

Propagation mode in waveguide filled with partially ionized magnetoplasma, obtaining dispersion relations for hydromagnetic and acoustic waves by three-fluid method 07 p1091 A66-18408

Growth or decay of plane, cylindrical or spherical sonic discontinuity moving in nonhomogeneous gas in isentropic equilibrium under external forces 08 p1208 A66-19230

Uniqueness theorem for problems of reinforcing rib on plane sound wave reflected from thin plate 08 p1257 A66-19758

Resonant excitation by external forces, propagation and reflection of ion acoustic standing waves between electrodes in mercury vapor discharge 10 p1568 A66-21831

Energy dissipation of acoustic waves propagating in liquid medium and producing cavitation 11 p1735 A66-22601

Boundary value problem of acoustic point source antenna within compressible plasma region with assumed rigid boundary, noting acoustic power conversion into electromagnetic waves 12 p1920 A66-24116

Multiple diffraction of circular, or linear front acoustic wave at polygon apices 12 p1914 A66-24350

Ion acoustic waves propagating along cylindrical plasma column analyzed, deriving boundary condition at plasma surface 12 p1923 A66-24572

Effect of heterophase fluctuations at high and low frequencies near first order phase-transition point on elastic oscillation propagation, noting role of acoustic wave 12 p1972 A66-25020

Intensity modulation of light using acoustic standing waves in megacycle range and requiring no high voltages 13 p2091 A66-25540

Acoustic waves and convection effect on asymmetries of weak to medium-strong solar lines 13 p2183 A66-25614

Dilatational wave resonance scattering of waterborne sound waves on hollow cylinder excited to oscillation by incident sound 14 p2401 A66-27863

Sound wave propagation in relativistic MHD 14 p2345 A66-28046

Acoustoelectric effects for various sound waves, using rate of energy exchange between two coupled systems in relative motion 15 p2564 A66-28970

Excitation of ion-acoustic waves in potassium-cesium plasma when passing current through it, finding natural frequencies of system when plasma is drifting along axis 15 p2550 A66-29214

Formant frequency parameter of speech spectrum pattern by cancel method 16 p2653 A66-30800

Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 17 p2873 A66-32214

Transverse electromagnetic wave transformation into ion-acoustic plasma oscillations with formation of intermediate Langmuir electron wave 17 p2969 A66-32542

Standing ion acoustic waves in mercury vapor discharges 17 p2973 A66-32983

Acousto-thermal effect in semiconductors in which carriers are characterized by isotropic effective mass and relaxation time, both dependent on energy 18 p3154 A66-33944

Acoustic wave energy absorption by superconductors in intermediate state 18 p3158 A66-34692

Transverse boundary effects on ionic-acoustic wave propagation in magnetoplasma 18 p3150 A66-34938

Spatial distribution of acoustoelectric field in photoconductive CdS measurement under conditions of current saturation, determining carrier drift mobility 19 p3435 A66-35415

Trajectories of light rays through medium subjected to acoustic waves examined knowing that acoustic waves in laser medium function as optical waveguide 20 p3580 A66-38238

Longitudinal sound waves attenuation in superconductor with spatially dependent energy gap by Green function method applied to ultrasonic attenuation in type II superconductor 21 p3795 A66-38548

Simultaneous existence /triple resonance/ of spin, helical and acoustic waves in ferromagnetic conductor in strong magnetic field 22 p3964 A66-40310

Pressure-perturbation produced by supersonic aircraft near caustic, deriving differential equations 23 p4016 A66-42040

10.6 micron output of carbon dioxide-He laser modulated, using Bragg diffraction from longitudinal acoustic waves in Te 24 p4219 A66-42251

Traveling disturbance in ionosphere due to nuclear detonation detected as acoustic-gravity wave modes, noting range-time diagrams 24 p4200 A66-42594

Configurations for realization of multiple laser light scattering using microwave acoustic waves and two Porro prisms 24 p4224 A66-42636

Textbook reissue on diffraction of electromagnetic and acoustic waves at open end of waveguide studied, using Wiener-Hopf-Fock factorization method 24 p4177 A66-43225

SOUNDING

SA BALLOON SOUNDING

SA IONOSPHERIC SOUNDING

SA RADIOSONDE

SA ROCKET SOUNDING

Half-hourly variability and short-term evolution of strato- and mesospheric winds in autumn and summer 15 p2530 A66-28618

SOUNDING ROCKET

SA AEROBEE ROCKET

SA DORNIER PARAGLIDER ROCKET

SA METEOROLOGICAL ROCKET

SA NIKE-CAJUN ROCKET

SA RAVEN ROCKET

SA ROCKET SOUNDING

SA SKUA ROCKET

European Space Research Organization /ESRO/ objectives and program including sounding rockets, satellite payloads and astronomical satellite 01 p0170 A66-10248

Sounding and research rockets of eleven countries classified into three categories in terms of ceiling, takeoff and payload weight, diameter, length, thrust and cost 01 p0144 A66-11070

ESRO projects include sounding rocket experiments, small satellites launched by Scout, small space probes and Astronomical Satellite 04 p0599 A66-13500

Two-dimensional ascending trajectories used to determine performance and structural parameters of reusable high altitude research rocket 04 p0584 A66-13524

Electric currents in ionosphere measured by sounding rockets equipped with nuclear free precession magnetometers and

Langmuir probes launched near Peru 05 p0688 A66-14800

Design of small rocket launch equipment that remains near ground 06 p0960 A66-16498

Evaluation of sounding rockets for meteorology for 30 to 200-km altitude range, noting role in X and gamma ray detection, sporadic E layer, etc 07 p1140 A66-17610

Spinning rocket attitude measured from geomagnetic field and solar cell data, using digital computer technique, noting instrumentation 08 p1225 A66-19492

Calculation method for pinpointing design characteristics and performance parameters of sounding rockets 09 p1464 A66-20543

Equations governing thrust, weight of fuel and launch velocity of sounding rockets, noting problems in booster effect, drag coefficient, trajectory, etc 13 p2189 A66-25132

Approximation method for evaluating body flexibility effects on slender aircraft static stability, noting application to sounding rocket 13 p1994 A66-26734

Results of approximate computation of rocket apogee from data on flight duration between different trajectory points 14 p2383 A66-27815

Catalog of sounding rocket launchings and meteorological rocket firings prepared for COSPAR 15 p2599 A66-29900

Sounding rocket measurement of ionospheric electron temperature 15 p2494 A66-30043

Luster micrometeoroid sampling payload launched during Leonid meteor shower November 16, 1965 at White Sands Missile Range 15 p2604 A66-30066

UHF telemetry system to withstand high shock of gun launched vertical sounding probes 16 p2650 A66-30557

Sounding rocket trajectory determination by double integration of longitudinal acceleration 16 p2652 A66-30566

Approximate analytical solution for pitching and rolling motion near resonance of sounding rocket, using nonlinear differential equation [AIAA PAPER 66-463] 16 p2811 A66-31470

Radio-controlled reusable sounding rocket design characteristics, trajectory analysis, drag and lift, reentry stress control system, guidance, stabilization, etc 17 p3015 A66-32367

Aerospace research programs in India 1965-1966, emphasizing equatorial aeronomy including meteorology up to 170 km 18 p3238 A66-35234

Rocket probe measurements indicate existence of maximum ion concentration in stratosphere and lower ion concentration at equator than at midlatitudes 19 p3345 A66-35288

Galactic and atmospheric X-ray characteristics determined by two scintillation counters borne on sounding rocket booster 19 p3452 A66-35354

Falling sphere experiment instrumentation for aerospace density determination including sensor, transit-time accelerometer and telemetry system 19 p3356 A66-35672

Data recording and telemetry system for sounding rocket, noting operation and testing results 19 p3307 A66-35680

German-French high-altitude rocket measurement of inner radiation belt and artificial ion clouds at altitude of 2000 km 19 p3348 A66-36286

Aeroelastic effects due to changes in aerodynamic gain, load factor and structural stresses relative to infinitely stiffened structure in multistage slender missiles 20 p3666 A66-37430

TACITE rocket sounding of characteristics of IR contrast between Earth and space 20 p3663 A66-38033

Reentry aerodynamics research in Japan including sounding rocket program, optimum reentry trajectory, nonequilibrium flow in nose region of blunt body, wind tunnels, etc [ICAS PAPER 66-36] 22 p3847 A66-40659

Skylark upper atmosphere research sounding rocket, unguided vehicle powered by Raven solid propellant rocket motor 23 p4132 A66-41169

Side forces and moments on Tomahawk sounding rocket with and without spin at high Reynolds number and Mach 5

[AIAA PAPER 66-754] 23 p4008 A66-4132

Recoverable and reusable radio controlled sounding rocket equipped with deployable flexible wings attached to paraglider beams 24 p4284 A66-4307

SPACE CABIN

Physicochemical methods of creating life support systems in spacecraft cabins 24 p4169 A66-43143

SPACE CABIN ATMOSPHERE

SA CLOSED ECOLOGICAL SYSTEM

Alkali metal superoxide applied by Soviet as active chemical for space cabin air revitalization 06 p0819 A66-16830

Rats exposed to space cabin atmosphere for two weeks, noting mortality rate, organism functioning, growth rate, etc 07 p0998 A66-17663

Spacecraft-cabin microatmosphere composition, theoretically analyzing applicability of helium-oxygen mixtures 15 p2444 A66-29459

Environmental conditions in space station noting optimum pressure, gas concentrations and temperatures 16 p2641 A66-30346

Low atmospheric pressure and oxygen-rich environment effect on characteristics of uninterrupted long-term exposure to toxic gases of space cabin atmospheres, noting animal testing 16 p2642 A66-30623

Feasibility of oxygen-helium atmosphere at 380 mm Hg total pressure proven by two-week exposure of four men 16 p2639 A66-31120

Pulmonary effects of two-week exposure of

men to helium-oxygen atmosphere at total pressure of 380 mm Hg 16 p2639 A66-31121

Thermal balance and heat exchange between four men exposed to helium-oxygen atmosphere at 380 mm Hg total pressure 16 p2639 A66-31122

Space cabin contamination control, discussing temperature effects, analysis by R gas chromatography and chemical methods 17 p2863 A66-32144

Burning properties of oxygen-nitrogen and oxygen helium spacecraft atmospheres determined for increasing safety of crew members in case of emergency 17 p3033 A66-32147

Simulated orbital flights with extravehicular activities, determining incidence and severity of flyers bends due to decompression and exercise 17 p2856 A66-32148

Oxygen consumption of rabbits decreases in proportion to inert gas concentration dissolved in tissues 17 p2857 A66-32174

Oxygen reclamation for manned spacecraft considering stored, nonregenerative and molten carbonate systems 17 p2864 A66-32175

Particle and droplet contamination of spacecraft cabin atmosphere, examining exogenous and endogenous sources, medical aspects of inhalation and exhalation, effect of weightlessness, etc 17 p2866 A66-32207

Contamination problems in space program, discussing clean room equipment, maintenance, cleaning problems, etc 17 p2866 A66-32210

Contamination control of manned spacecraft, noting problem of biological interactions and methods of monitoring 17 p2866 A66-32211

Aerospace life support - Conference, American Institute of Chemical Engineers, Houston, February 1965 17 p2866 A66-32667

Bosch process closed cycle oxygen production unit for space application [AICE PREPRINT 47A] 17 p2867 A66-32670

Oxygen regeneration from solid electrolytic reduction of carbon dioxide for space cabin atmosphere [AICE PREPRINT 47D] 17 p2867 A66-32673

Hydrolysis under space cabin atmosphere conditions using hydrogen diffusion cathode to remedy current-blocking effect of gas between electrodes [AICE PREPRINT 47F] 17 p2867 A66-32674

Contamination control and space program, objectives, achievements, NASA courses, etc 17 p2868 A66-32894

Space cabin atmosphere and closed environment - ACS Symposium, Atlantic City, September 1965 19 p3292 A66-36230

Physical and chemical variables of space cabin environment and effect on human body, discussing oxygen toxicity, decompression sickness, fire and blast hazards and radio protection 19 p3292 A66-36232

Integrated program approach for contamination control of space cabin atmospheres based on identification, estimation of concentration and system specifications 19 p3293 A66-36238

Carbon dioxide control by enzymatic reaction in spacecraft atmosphere by hydrolyase and multienzyme system 19 p3293 A66-36240

Prolonged exposures to acute anoxia cause reductions in viability of hydrated rye seeds, findings suggest helium may be harmful as atmospheric component in manned space capsules 22 p3855 A66-40480

Regenerative air conditioning systems of spacecraft cabins for long missions, analyzing principal parameters of gas mixtures for life requirements 24 p4169 A66-43142

SPACE CABIN SIMULATION

Human reaction to noise under various simulated acoustical conditions of space cabin 13 p2015 A66-25890

Oxygen compatibility environmental test chambers noting design, performance and results of operation 16 p2679 A66-30471

Space chamber molecular kinetics, noting importance of molecular flux upon simulation fidelity and effect of various gases and chamber geometry on flux profile 20 p3544 A66-38161

SPACE CABIN SIMULATOR

Program for engineering development of integrated spacecraft environmental control and life support systems and solution of man-machine integration problems [SAE PAPER 650813] 01 p0021 A66-10820

Aerospace medical research of USAF 06 p0815 A66-16049

Space cabin simulator to test premise that in-flight physical exercise can be used for early detection of deteriorative trends for mission preservation 17 p2924 A66-32172

Human behavioral effects during 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure, presenting temperature, psychomotor and sleep performances 18 p3061 A66-33780

SPACE CAPSULE

SA SPACECRAFT

Orbiter injected sterilized ballistic skipout capsule for in-flight Martian stratosphere measurements, using nonablative heat shield and outside atmospheric propulsion maneuvers [AIAA PAPER 65-23] 03 p0431 A66-12764

SPACE CHARGE

Incremental-elasticity vs charge relationship used for impurity profile of p-n junction measurement 01 p0119 A66-10398

Propagation of longitudinal oscillations in plasma with thermal velocity spread 01 p0029 A66-10576

Growth and propagation of space charge waves in presence of differential negative resistance in n-GaAs 01 p0122 A66-10577

Node in radial velocity as boundary condition for ion waves in low pressure plasma and dispersion relations for space charge sheath 01 p0113 A66-10622

Electric field intensity in disturbed quasi-neutral plasma homogeneity when problem is formulated as one-dimensional 01 p0115 A66-11107

Microplasma and avalanche diode noise pulse rate determined by carrier generation within space charge layer of breakdown region 02 p0197 A66-11431

Zero-bias capacitance of thin intrinsic semiconductor film sandwiched between identical electron-injecting contacts compared with value for noninjecting contacts 02 p0270 A66-11437

Space charge convection effect on magnetic field transition, with reference to pressure-balance condition of unfilled rarefied plasma flow and wall 03 p0417 A66-12324

Silicon p-n junction analysis using electron photographic developers when space charge region is present 04 p0563 A66-13881

Recombination in space charge region near semiconductor surface 04 p0569 A66-14359

Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 04 p0570 A66-14366

Fission heated generator using cesium ion space charge neutralization for operation in pile 05 p0620 A66-15568

Space-charge wave propagation on nonuniform drifting electron beam explained, using coupled mode theory 06 p0855 A66-18767

MOS capacitance measurements, utilizing graphical relations between silicon surface parameters 06 p0940 A66-17165

Potential distribution, field intensity and carrier concentration in space charge region under direct bias 06 p0940 A66-17188

Space-charge reduction of shot noise for space-charge-limited current in solid dielectric diode 07 p1097 A66-17737

Space-charge-limited currents and electron traps in CdS crystals thermally stimulated after electron injection 07 p1097 A66-17738

Electron energy levels in CdS single crystals from Hall effect, conductivity and space-charge-limited current measurements 07 p1098 A66-17739

Electrical properties of carrier generation-recombination centers in silicon p-n junctions, noting energy levels, effective capture cross sections for holes, etc 07 p1107 A66-18402

Surface layers on ferroelectric barium-titanate crystals, noting parameters of RF induced electroluminescence 07 p1107 A66-18405

Two-dimensional distribution of carriers in

semiconductor space charge region with current flow 08 p1267 A66-18654

Effective thickness of space charge layer at surface of cylindrical body immersed in plasma 08 p1264 A66-19185

Space charge effects on electrical field and plasma structure in vicinity of charged cylinder of small radius 08 p1299 A66-19790

Photoimpedance measurement as function of AC field of CdS crystals coated with SiO films or situated between polystyrene foils 09 p1425 A66-20189

Characteristic TWT equation solved for large space-charge parameter 09 p1357 A66-20779

Parasitic oscillations in E-type oscillators and action of HF space-charge fields 09 p1358 A66-20794

AC current measurement to determine contribution in semiconductors, which appears as displacement current, from space charge caused by injected and alternatively modulated carriers 09 p1432 A66-20970

Noise suppression in solid state space charge limited diodes calculated, using open and short circuited output model 09 p1359 A66-20973

Static characteristics of insulated gate field effect transistor with gate electrodes at both sides of semiconducting channel, including space charge limited currents analysis 09 p1359 A66-20974

Amplification coefficient for weak electric field arising on surface of large body in ionosphere in absence of magnetic effect, photoeffect and secondary emission 09 p1465 A66-21019

Ion propulsion by electrostatic acceleration of cesium ions subjected to transverse magnetic field, using negative space charge sheath [AIAA PAPER 66-256] 10 p1563 A66-21461

Space charge theory of one-dimensional, monoenergetic, unipolar and bipolar currents traversing on otherwise evacuated space between infinite plane parallel electrodes 10 p1557 A66-21572

Space-charge theory for steady one-dimensional current flow across evaluated space between plane electrodes 10 p1557 A66-21573

Gunn effect in terms of time-independent negative-differential bulk-conductivity medium for understanding of space charge domain dynamics 10 p1584 A66-22068

Growth and propagation of infinitesimal space charge waves under differential negative resistance and inhibition of dipole waves and domains in gallium arsenide, estimating thermoelectric effects 10 p1584 A66-22069

Gunn effect oscillations in high resistivity gallium arsenide cease when product of conduction electron density and sample length drops below certain level 10 p1585 A66-22076

One-dimensional small signal analysis of negative resistance in p-n junctions under avalanche breakdown 10 p1586 A66-22083

Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 11 p1655 A66-22722

Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 11 p1751 A66-22733

Cadmium sulfide space charge limited diodes, noting current voltage characteristics and field and electron density distributions 11 p1668 A66-23026

Formation of oxide films on metals using polarized light to measure film thickness and vibrating capacitor measurements of changes in Volta potential, noting extension of Mott theory 11 p1718 A66-23211

Sources and effects of electrical charge accumulation and dissipation on spacecraft 11 p1778 A66-23485

Coefficients of space charge effects for growing oxide films, derived from perturbation treatment, evaluated in terms of boundary concentrations of diffusing species 12 p1811 A66-23624

Monograph on microwave frequency space-charge waves in electron beams including electron-wave oscillators, resonators and

magnetrons 12 p1813 A66-23740
 Current voltage characteristics of dielectric films 13 p2157 A66-25040
 Current limitation by space charge in polycrystalline barium titanate, noting voltage characteristics and hysteresis effects 13 p2164 A66-25472
 Gabor type auxiliary discharge thermionic converter producing ions for space charge neutralization by impact, noting critical converter equation 13 p1998 A66-25530
 Applicability region of Mott-Gurney square law for space-charge limited currents in dielectrics 14 p2266 A66-27574
 Silicon p-n junction analysis using electron photographic developers when space charge region is present 14 p2363 A66-27579
 Surface charge of semiconductor in strong electric field, considering quantization 14 p2364 A66-27644
 Recombination in space charge region near semiconductor surface 14 p2368 A66-28257
 Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 14 p2369 A66-28265
 Electron beam analyzer for determining crossed field space charge beam analyzer 15 p2549 A66-28719
 Decay of space-charge waves as due to ballistic or free-streaming process in electron beam with velocity spread 15 p2550 A66-28724
 Electric potential and space charge density near Langmuir probe in hot rarefied plasma at rest, calculating current collected from plasma 16 p2759 A66-30372
 Multistage ion gun using separate acceleration and deceleration stages and emitters 16 p2760 A66-30428
 Space charge polarization in glass films, discussing parameters of shift of capacitance-voltage characteristics, diffusion coefficient in metal-glass-silicon dioxide-silicon double-layer capacitor 16 p2779 A66-31089
 Single trapping center effect on growth of small amplitude space charge waves and propagation velocity, deriving dispersion relations 16 p2781 A66-31216
 Space charge formation and decay during passage of electric current through plasma moving in electric field, obtaining V-I characteristics 16 p2766 A66-31598
 Space charge limited currents theory in thin semiconductor layers, showing relationship of current-voltage characteristics and effect of traps 17 p2976 A66-32261
 Laminar electrohydrodynamic flow in plane diffusor, taking into account molecular diffusion of space charge 17 p2969 A66-32544
 Space charge density in p-n junction found to be unrelated to charge density assumed in Schottky theory 17 p2979 A66-32641
 Space-charge-limited electron current in silicon 17 p2980 A66-32646
 Axially symmetric or two-dimensional electrode system with emitting surface, discussing convergence and accuracy criteria of iteration methods 17 p2887 A66-32700
 Ionizing radiation effect on FET with silicon nitride as insulating layer, noting reduction of shift in gate turn-on voltage 17 p2983 A66-33105
 Damped oscillations and velocity of sound waves in semiconductors and metals in presence of strong magnetic field 18 p3158 A66-34684
 Time and space dependent voltage variations in differential channel zone of field effect transistor with insulated gate 18 p3088 A66-35039
 Layer of CdS crystals photoconduction measurements suggesting change in space charge under illumination due to increase of free electron concentration in volume 19 p3438 A66-35478
 Potential distribution, field intensity and carrier concentration in space charge region under direct bias 19 p3439 A66-35546
 Spatial charge region, excess electron concentration, capacitance and conductivity in semiconductor layer with Lorentz forces acting on carrier determined as functions of surface potential and applied electromagnetic field 19 p3442 A66-35819
 Continuous channel electron multiplier

operated in pulse saturated mode, noting space charge limiting as major cause of gain saturation 19 p3359 A66-35911
 Nonaccelerated electron beam envelope trajectory equation reformulated and solved allowing for finite emittance, space charge and self-magnetostatic forces 19 p3319 A66-36170
 Surface space-charge region associated with p-n junction characteristics when not in equilibrium, using MOS structures theory 20 p3527 A66-37403
 Work function of semiconducting barium titanate as function of temperature for testing Heywang theory of polycrystalline material anomalous resistance behavior 20 p3616 A66-37404
 Space-charge-limited current voltage-dependent behavior in gallium arsenide 20 p3616 A66-37457
 Space charge wave equation and impedance and stability of electron diodes, using Nyquist analysis and transit time and RF beam current 20 p3528 A66-37489
 Domain velocity, stability and impedance in Gunn effect, presenting framework for analyzing space-charge waves in two-valley semiconductor 20 p3618 A66-37599
 Digital computer program for solution of space-charge-flow problem applied to design of thrusters with variable thrust vector, analyzing two ion-thruster configurations with aid of computer 20 p3629 A66-38179
 Space charge effects on electrical field and plasma structure in vicinity of charged cylinder of small radius 21 p3812 A66-38786
 Electron gun with voltage drop across cathode using space charge streams for M-beam generation 21 p3710 A66-38833
 Thermal noise hypothesis applied rigorously to space charge limited diodes 22 p3872 A66-39747
 Characteristic TWT equation solved for large space-charge parameter 22 p3874 A66-39838
 Parasitic oscillations in E-type oscillators and action of HF space-charge fields 22 p3874 A66-39853
 Stable space-charge layers in two-valley semiconductors 22 p3963 A66-40101
 Surface magnetoconcentration in intrinsic-conductivity semiconductors, noting space-charge region characteristics dependence on surrounding fields 23 p4110 A66-41131
 Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 23 p4037 A66-41460
 Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 23 p4113 A66-41471
 Scattering mechanism in space charge region as possible explanation of temperature fluctuations of carrier mobility in n-and p-type indium arsenide 23 p4115 A66-41829
 Radiative recombination within space-charge region in germanium exposed to increasing surface field 24 p4251 A66-42308
 Space-charge-limited current dependence on time in semiconductor taking trapping into account 24 p4252 A66-42350
 Time dependence of space-charge limited current in Fe-doped p-silicon used for determining capture probability, noting retrapping significance 24 p4252 A66-42351
 Surface photovoltage theory for small signals in Si and Ge, considering photocarrier trapping on surface and conductivity in space charge region 24 p4253 A66-42358
 Thin film space-charge-limited triode employing dielectric surface gate structure 24 p4183 A66-42627
 Small signal forward and reverse transfer parameters derived for metal oxide semiconductor and junction-gate field effect transistors from simple unified charge-control analysis 24 p4185 A66-43030

SPACE COMMUNICATION SA INTERPLANETARY COMMUNICATION

Voice communication in space discussing Gemini subsystem, Apollo Command Module system and laser communication techniques 04 p0477 A66-13588
 Apollo unified S-band system covering

station locations, uplink and downlink spectrums, spacecraft gross parameter theory of operation, etc 04 p0478 A66-13511
 Earth-to-space communications using millimeter-wave region of spectrum, noting atmospheric attenuation, propagation losses etc 04 p0479 A66-13601
 Exoionospheric communications system with ideal matched filter and signal processing at transmitter for increased range and secure coding possibilities 04 p0480 A66-13621
 Book on electronic systems constituting space communications systems, noting orbital motions, space environment, noise propagation, satellites, etc 04 p0481 A66-13811
 Book on space communications techniques covering equipment design and component and communications subsystems, with two bibliographies 05 p0635 A66-15801
 Space communications antennas, discussing ground to space systems, satellite relay methods, etc 05 p0651 A66-15831
 Signal design for space communication and tracking, comparing performance of harmonic and pseudorandom systems 06 p0834 A66-16861
 Morphological method of analysis for space communications, suitable for problems with independent unknowns 09 p1345 A66-20541
 Italian participation in COMSAT 09 p1473 A66-20541
 Communication with extraterrestrial civilizations 12 p1947 A66-23881
 Detection of information transmitted by extraterrestrial civilizations 12 p1814 A66-23881
 Information-bearing artificial signal from extraterrestrial civilizations is indistinguishable from natural noise 12 p1814 A66-23891
 Possibility of detection of extraterrestrial civilizations by radio communications 12 p1814 A66-23891
 Search for intelligent signals from space 12 p1880 A66-23891
 Communication with extraterrestrial civilizations in radio wavelength range 12 p1814 A66-23891
 Frequency stability requirements for space communications and tracking systems 12 p1815 A66-24131
 Operation results of Mariner and Pioneer telecommunication systems, including system design and future capabilities 12 p1819 A66-24609
 USN contributions to space communications, noting Syncom program, communications by Moon relay, design of antenna aboard Kingsport vessel, etc [AIAA PAPER 66-270] 12 p1820 A66-24743
 Communications requirements for manned deep space missions, using optical links, with PPM, PCM/PL and coherent reception for each link [AIAA PAPER 66-317] 12 p1823 A66-24782
 Deep space network /DSN/ for navigational and communications support to NASA lunar and planetary space programs 13 p2021 A66-25248
 Link design and transmission rates for entry and surface measurements during space exploration to Mars 13 p2021 A66-25249
 Direct and relay link communication from Martian surface station 13 p2021 A66-25250
 Optical communication for Mars exploration with outline of laser modulators and antennas 13 p2021 A66-25251
 Space telecommunications for mass media, detailing use of point-to-point, distribution and broadcasting satellites 14 p2239 A66-27678
 Propagation disturbances causing degradation of performance of space instrumentation and communication links, noting types of space channels, plasma and multipath effects, etc 16 p2650 A66-30555
 FM 10 watt S-band transmitter for space telemetry and data application 16 p2651 A66-30560
 Book on communications satellites design, testing, operation and power systems for Echo, Telstar, Relay, Syncom, ground stations, etc 16 p2809 A66-30877
 Laser and maser development, discussing design improvements and application for television, space communications,

- communication systems at microwave and optical frequencies for future Mars missions 17 p2934 A66-32353
- computer optimization of baseband design angle-modulated unified carrier space-bound communication 18 p3067 A66-33793
- system design analysis of laser methods of deep-space communication, examining local heterodyne system /LHS/, direct detection system /DDS/ and transmitted reference system 19 p3299 A66-35664
- optimal design of one-way and two-way coherent communication links for space communication 19 p3300 A66-35666
- antisolar astronomical probe data transmission system requiring large high-gain antenna for transmission at 40 GHz 19 p3300 A66-35669
- high-power microwave transmitters for deep-space communication with unmanned spacecraft 19 p3316 A66-35684
- ultralow-noise planetary radar receiving system with high-performance feed and laser preamplifiers, noting aperture utilization 19 p3301 A66-35690
- millimeter wave solutions compared with band solutions in deep space communication system, using typical space-to-Earth communication 19 p3302 A66-35704
- commercial space communication and growth of regional-national organizations 19 p3481 A66-36205
- global space communications and international cooperation 19 p3482 A66-36209
- legal problems involved in space communications systems and organizations, assessing rule of ITU in outer space technology 19 p3483 A66-36219
- total electron component of ionosphere column between satellite and Earth calculated, using differential Doppler effect 19 p3361 A66-36654
- space telecommunications techniques, examining reduction of all transmissions to digital type, using current theoretical coding methods and recurrent codes and block codes for error detection 20 p3516 A66-37432
- monograph on TV transmissions from space covering application to space missions, theoretical studies and existing and planned facilities 20 p3561 A66-38031
- data compression for TV transmission from space, using improved gray scale /IGS/ and coarse-fine PCM systems 20 p3561 A66-38262
- space modulation systems characteristics, considering data flow rate, spacecraft weight and power, antenna gain, noise figure, etc 21 p3706 A66-39477
- communications subsystem providing S-band link between LEM and Earth and VHF link between LEM and Command Module 21 p3714 A66-39521
- erectable antenna for S-band communication between LEM and Earth 21 p3714 A66-39522
- LEM rendezvous radar for tracking transponder on lunar surface or on Command Module 21 p3714 A66-39523
- programmed oscillators to control Doppler tracking radar systems for space communications and radar astronomy 22 p3862 A66-39731
- optimal design of one-way and two-way coherent communication links for space communication 22 p3864 A66-40060
- space communications systems with increasing traffic-handling capacity, noting antenna and repeater design 22 p3865 A66-40126
- long distance communications satellite, considering effect on traditional methods and organization of global communication system 22 p3867 A66-40699
- space antenna arrays - WESCON, Los Angeles, August 1966 22 p3881 A66-40747
- translunar communication using pumice-like outer layer as propagation medium 23 p4036 A66-41151
- antenna systems for deep space communication emphasizing ground station, balancing of ground antenna aperture with spacecraft performance, arrays, etc 24 p4171 A66-42244
- small and low cost voltage-tunable audio filter using field effect transistors as tuning element in place of inductors for space communications 24 p4180 A66-42334
- phase-lock servo-loop circuit for space communication providing estimate of incoming signal through correlation process 24 p4175 A66-42826
- SPACE DEBRIS**
Tektites, approximate age and probable lunar origin 14 p2383 A66-27823
- SPACE DENSITY**
SA ATMOSPHERIC DENSITY
Interplanetary electron number density determination by Pioneer VI radio propagation experiment 18 p3233 A66-34541
- SPACE ELECTRIC ROCKET TEST /SERT/**
SERT capsule tested two ion engines in space 08 p1281 A66-18735
Power conditioning system for ion engine used in Sert-I flight test [AIAA PAPER 64-681] 12 p1937 A66-24691
- SPACE ENVIRONMENT**
SA EXTRATERRESTRIAL ENVIRONMENT
Spacecraft Thermal environment control to insulate cryogenics in bulk for space use 01 p0161 A66-10290
Artificial matching of shape of extraterrestrial solar curve and full intensity under its envelope in space environmental test systems 02 p0212 A66-11221
Space environment factors in designing electrical insulation systems for space vehicles 02 p0247 A66-11290
Simulated space environment effects on performance of silicone insulating materials 02 p0247 A66-11291
Space environment effects on optimum multiwall structural design 02 p0298 A66-11640
Gemini V failures and successes, evaluating spacecraft and rendezvous guidance and navigation systems performances and prolonged exposure to space environment 02 p0296 A66-12011
Space hazards to spacecraft include extreme temperatures, micrometeorites, low pressures and electromagnetic and corpuscular radiations 03 p0425 A66-12860
Shaft seals to contain liquid metals in mechanisms exposed to space environment 03 p0374 A66-13108
Design guide-lines for vehicles which must survive thermal environment of space 03 p0433 A66-13335
Interplanetary plasma origin, behavior and effects on space flight studied by space probe 04 p0576 A66-13501
Interstellar and intergalactic gas, dust and magnetic fields 05 p0765 A66-15381
Atlas-Agena and Atlas-Centaur launch vehicles to investigate comets 06 p0951 A66-15903
Space environment effect on fatigue, tensile and creep behavior of metals 07 p1141 A66-17210
Steady state temperature distribution for cylindrical shells under space conditions, calculating effect of internal radiation and surface coatings 07 p1143 A66-17591
NASA biosatellite study of organism in space environment, with emphasis on weightlessness and radiation effect 07 p0999 A66-17615
Effect of space environment on ceramic materials, considering atmosphere /including vacuum/, thermal, radiation and meteoroid environments 07 p1147 A66-18307
Manned interplanetary flight, emphasizing nonstop flybys past Mars and Venus, reviewing launch and departure modes, energy requirements, environmental control, navigation spacecraft power source, etc 08 p1286 A66-18561
Design of recoverable biosatellite spacecraft for studying effects of space environment on living organisms 08 p1301 A66-18580
Biosatellite for TV monitoring of development of opossum embryonic fetus in space environment 08 p1174 A66-18583
Handbook of geophysics and space environments, 1965 09 p1370 A66-20267
Text on life into space covering space biology, extraterrestrial environment, temperature, pressure, acceleration, radiation effects, etc 10 p1492 A66-22062
Surface properties of materials exposed to space environment 11 p1718 A66-23164
- Sliding contact wear under very dry high altitude or space conditions due to lack of contact film prevented by using chemical compounds like graphite or lithium carbonate 12 p1888 A66-24664
Solar simulator with pumping setup to obtain low pressure atmosphere for simulated space environment, noting construction, operation and results 13 p2057 A66-25495
Structural metal adhesion in space environment as affected by time, pressure and temperature 13 p2108 A66-25646
Noncontact liquid and vapor screw-type shaft seals in potassium cooled and lubricated electric power generator for space environment, noting dynamic slinger seal and viscoseal 16 p2714 A66-30627
Solar simulation testing of thermal control systems for nuclear test detection spacecraft [AIAA PAPER 64-209] 16 p2682 A66-30890
Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615
Space environment in Earth or interplanetary orbit, emphasizing engineering design of spacecraft, components and human survival 18 p3231 A66-34209
Environment influence on design and development of Black Knight rocket engine 18 p3163 A66-34211
Space environment effect on satellite materials and components 18 p3231 A66-34213
Possible adaptation of asteroids to support human life for indefinite periods of time 19 p3285 A66-36241
Space environmental effects on thermal control coating, describing simulation facility design, components and functions 20 p3543 A66-37315
Book on space electrodynamics noting application of MHD, plasma properties, waves, interaction with magnetic field, shock waves, solar atmospheric motion, etc 20 p3631 A66-37984
Coordinated laboratory and flight test program, determining stability of solar concentrator reflective surfaces in orbital environment 22 p3889 A66-40220
Digital computer program for analysis and weight optimization of thermoelectric generators for space applications 24 p4161 A66-42119
Environment influence on design and development of Black Knight rocket engine 24 p4261 A66-42573
- SPACE ENVIRONMENTAL LUBRICATION**
Gamma ray and neutron irradiation and temperature effects on wear-life of solid lubricants for aerospace application [ASLE PREPRINT 65AM 5C4] 04 p0524 A66-13398
Chemical and thermal stability of fluoride solid lubricants measured and tested for aerospace environment [ASLE PREPRINT 65AM 5C5] 07 p1039 A66-18284
Lubricants for space environment, noting experiences with satellites and application to ball bearings and electrical contacts 13 p2086 A66-25770
Grease lubricants for aerospace application, determining physical properties and testing them at 400 degrees F and under high vacuum [ASLE PAPER 66AM 3C2] 16 p2711 A66-30409
Transfer of dry lubricant particles on to contact surfaces during service by using separate rubbing elements, for equipment operation in space environment 19 p3363 A66-35833
- SPACE ERECTABLE STRUCTURE**
Manned automatic spaceborne structural assembly systems considering sectionalizing, fasteners and kinematics for antenna reflectors, solar concentrators, reentry bodies, etc [SAE PAPER 650787] 01 p0078 A66-10813
First-stage decelerator and stabilization balloon system for payload recovery for Mach 4 and 10 flight 04 p0585 A66-13531
Inflatable plastic structures for space application in U.S. and Germany 06 p0960 A66-17077

Mechanics of catenaries for structures and machines in space, noting equations for behavior [AIAA PAPER 66-99] 07 p1037 A66-17899

Orbiting eye/space telescope/ construction featuring membrane optics with smooth and symmetric surfaces, inflatable body and laser transceiver 12 p1876 A66-23646

Resin fiberglass sandwich materials for reinforcement of plastic laminated space structures 14 p2402 A66-27876

Lightweight packageable structurable materials capable of expansion, erection and rigidization in space 14 p2317 A66-28016

Space maintenance and extravehicular activities - National Conference, Orlando, Florida, March 1966 19 p3289 A66-35946

Extravehicular space activities related to assembly and maintenance of large space stations, antennas and solar collectors 19 p3290 A66-35947

Extravehicle manufacture of large space structures from storable tubular members in form of steel strip heat-treated to concave section 19 p3363 A66-35953

Space modular assembly of paraboloidal antenna having rigid truss frame structure 19 p3363 A66-35954

SPACE EXPLORATION

SA LUNAR EXPLORATION

Space studies of Cosmos and Elektron satellites including space radiation hazards, particle observation, ionosphere chemical composition, onboard equipment, etc 01 p0136 A66-10415

European space program and establishment of space agency to study and explore space 02 p0305 A66-11248

Apollo hardware and technology for future manned space exploration, noting MORL spacecraft use 02 p0288 A66-11507

NASA international program including satellite experiments, sounding rocket investigations, etc 02 p0306 A66-12232

X-15 aircraft and future research noting previous flight data on hypersonic aerodynamics, structural and aerodynamic heating, etc 02 p0179 A66-12238

Devices on ESRO satellite to be launched in 1967 by NASA rocket, noting photometers for auroral measurements, plasma probe for electron density, scintillation counter, etc 03 p0430 A66-12484

Orbital space station development based on multimission space station module for six persons and multipurpose logistics vehicles for ferry resupply 03 p0432 A66-12904

Sovereignty with respect to outer space especially celestial bodies and space stations, noting international law for free exploration, navigation, etc 03 p0447 A66-13075

Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 04 p0575 A66-13361

Remote extraterrestrial surface navigation, discussing image-tube based stellar field acquisition system parameters 04 p0543 A66-13590

Space exploration discussing terrestrial effects of electromagnetic and corpuscular solar radiation 04 p0574 A66-13805

Space travel and exploration covering biological and technical difficulties such as radiation, meteor impact, vehicle sterilization, etc 04 p0469 A66-13806

Basic environmental problems of man in space - International Symposium, Paris, October 1962 04 p0463 A66-14063

Energy patterns from space accessible to human senses through data sensors and information acquisition 04 p0472 A66-14093

Comet missions, discussing spacecraft exploration criteria for short period and long period first-apparition comets 06 p0952 A66-15923

Developing trends in space flight, considering eventual exploration and conquest of entire solar system 07 p1156 A66-17832

Color TV for exploration of space environment, noting techniques for signal transmission via satellites 08 p1180 A66-18611

Solar system exploration, predicting future activities of U.S. space

program 10 p1602 A66-21066

Post-Apollo experiments for space 11 p1775 A66-23075

Space travel and exploration 12 p1946 A66-23634

Space travel and exploration and relationship to scientific research, with comments on exobiology 12 p1946 A66-23635

Space exploration, discussing terrestrial effects of electromagnetic and corpuscular solar radiation 12 p1938 A66-23638

Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 12 p1946 A66-23639

Space travel and exploration, biological and technical difficulties, radiation, meteor impact, vehicle sterilization, etc 12 p1807 A66-23640

Development and performance of cesium ion engines for satellite control, noting lifetime, fuel consumption reliability, thrust vector control, etc 13 p2172 A66-25173

[AIAA PAPER 66-234] 13 p2172 A66-25173

Audio signal processing techniques in future space exploration, discussing channel capacity, speech processing, bandwidth narrowing, etc 13 p2025 A66-26024

Soviet monograph on celestial mechanics of satellites and space probes covering trajectory problems, two-and three-body systems, space flight duration between two points, etc 13 p2188 A66-26465

Electric propulsion for spaceflights, discussing nuclear rocket technology, mission planning, payload optimization, etc 13 p2173 A66-26610

Role of man in space exploration, noting astronauts personal reports, scientific ability, superiority over instruments, etc 14 p2229 A66-26919

Unmanned space flight, considering experiments, instrumentation, space probes and satellites 16 p2801 A66-30876

Soviet and international space exploration, examining past, present and future developments 18 p3267 A66-33698

High energy missions for Saturn such as solar system probes, cometary intercepts, flights to Earth-Moon libration points, etc [SAE PAPER 660448] 18 p3246 A66-33894

Low cost approach to development of vehicle for European-based space exploration 18 p3246 A66-33972

Remote maneuvering unit, discussing principle, functions, feasibility, composition and application 19 p3469 A66-35959

Unmanned spacecraft trajectories, discussing flight mechanics of solar system exploration 22 p3983 A66-40700

Military value of unmanned exploration of solar system, noting coordinated activities of DOD and NASA 24 p4296 A66-42656

SPACE FLIGHT

SA INTERPLANETARY FLIGHT

SA INTERSTELLAR TRAVEL

SA PLANETARY SPACE FLIGHT

SA SUBORBITAL FLIGHT

Physiological test results on cosmonauts during Voskhod I and II flights including electrocardiograms, electroencephalograms, pneumograms, blood tests, space suit parameters, etc 01 p0017 A66-10416

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 02 p0182 A66-11647

Space transportation systems for Moon exploration and beyond noting nuclear, nuclear pulse and electric propulsion 02 p0295 A66-11649

Astronaut physiological responses to space flight conditions measured for clinical or experimental purposes 04 p0471 A66-14091

Comparison of manned and unmanned spacecraft 04 p0472 A66-14092

Space flight posture of U.S. at completion of AES program and alternate approaches for further lunar exploration and exploitation [SAE PAPER 650833] 05 p0760 A66-15015

Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 06 p0953 A66-18263

Manufacturing methods in space, flight technology - German Symposium, Munich, November, 1964 06 p0887 A66-17066

Rarified gas dynamics in space flight and hypersonic low density wind tunnel of Goettingen Aerodynamics Research Facility 07 p1017 A66-17477

European and U.S. space transport model characteristics, noting possible cooperation because of costs 09 p1473 A66-20555

Dynamic characteristics of human operator in tracking system under spaceflight conditions onboard Voskhod II spacecraft 11 p1648 A66-23040

Analytic determination of basic parameter of time, consumption and acceleration for spacecraft maneuvers 12 p1948 A66-23911

Changes of surface optical properties of metal surfaces determined through equilibrium temperature measurements in space flight experiments 17 p3033 A66-32446

Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 18 p3234 A66-34599

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 20 p3509 A66-38163

Space flight simulator including performance requirements, facility design applications, etc 21 p3721 A66-38850

Handbook on theory of space flight and navigation of spaceships in interplanetary space, emphasizing characteristics of space trajectories, rocket engines and space vehicles 21 p3812 A66-38944

Mechanics of spiral flight noting characteristics, minimum thrust condition and transfer trajectories for rendezvous purposes 21 p3817 A66-39644

Preflight consideration of astronaut performance testing program for Gemini X flight, noting manual operations and devices used 24 p4168 A66-42742

Celestial bodies nature and structure effect on space flights, detailing interplanetary space properties and orbital motion 24 p4280 A66-43131

SPACE FLIGHT STRESS

SA MANNED SPACE FLIGHT

Vibration, acceleration and radiation effects on cell division, chromosome behavior and mitotic activity of bone marrow and spleen cells in mice 02 p0182 A66-11665

Biological stresses of manned space flight in limiting flight duration, noting isolation effect 04 p0469 A66-13507

Dynamic environmental influences on man during space flight covering force fields, inertial forces due to acceleration and methods of protection 04 p0466 A66-14074

Soviet biological and physiological investigations in rockets and satellites, particularly nonpathological character of physiological reactions to stress factors 04 p0466 A66-14076

Three-axis acceleration control task designed to detect space flight-induced decrements in piloting skills 06 p0818 A66-16246

Emotional problems of astronauts during space flight 11 p1642 A66-22488

Chromosome configuration and mitosis impairment in micropores Tridascantia paludosa due to space flight effects of Voskhod I 11 p1645 A66-23050

Medical tests of spacemen Bellaev and Lenov during training and orbital flight 15 p2442 A66-28502

Space flight effect on wheat seeds and plants grown from wheat seeds carried onboard Vostok V and VI spacecraft 15 p2429 A66-28503

Soviet monographs on problems of space biology 15 p2431 A66-29439

Pharmacological protection from radiation injuries during space flights 15 p2435 A66-29453

Entropy concept of information theory applied to space flight physiological data analysis 15 p2444 A66-29461

Electroencephalograms, cutaneous galvanic reactions and electrooculograms of Nikolaev, Popovich, Bykovskii and Tereshkova as recorded during space flight 15 p2436 A66-29463

Biological and medical tests during training and flight of Russian

astronauts 15 p2436 A66-29464
 Space phytophysiology and UV irradiation effect on photosynthesis of plants 15 p2439 A66-29488
 Lowering of psychic tone, absentmindedness and vigilance decline during astronaut weightlessness on long space flights 15 p2442 A66-30003
 Space medicine and biology studies of space flight environmental factors based on experiments with animals and manned spacecraft 18 p3056 A66-33699
 Medical problems of weightlessness 18 p3059 A66-34365
 Physical and psychological aspects of man in space, examining oxygen supply, temperature extremes, meteorites, radiation and effects of confinement, isolation and sensory impoverishment 19 p3287 A66-36645
 Human vestibular responses to combined stimulation by angular and linear accelerations tested, noting relation between tolerance and habituation 19 p3287 A66-36647
 Cosmic radiation and space flight effects on lysogenic bacteria and human cells in culture 21 p3700 A66-39315
 Physiopathological phenomena of space flight stresses, especially weightlessness 22 p3856 A66-40506
 Soviet papers on effect of space flight factors on functions of central nervous system 23 p4025 A66-41334
 Vestibular analyzer changes of guinea pigs exposed to twofold vibration and prolonged gamma irradiation 23 p4028 A66-41350
 Cardiopulmonary hemodynamics in dogs under transverse acceleration studied in terms of changes in heart and lungs 24 p4163 A66-42450
 Biomedical monitoring systems for crews during rest and during dynamic stress testing 24 p4167 A66-42451
 NASA Biosatellite Program exploring dynamic space flight effects on terrestrial organisms and Earth diurnal rotation effect on biological rhythm 24 p4168 A66-42675
 Professional training of Soviet astronauts, instilling high resistance to weightlessness, isolation, radiation, acceleration and other space flight stimuli 24 p4169 A66-43148
SPACE FOOD
 Zero gravity effect on design of food handling systems for extended duration space flight programs 06 p0817 A66-16236
 Rapid decompression and exposure of fresh foods to near vacuum conditions 22 p3856 A66-39789
 Space diet effect on aerobic and anaerobic microflora of human feces 22 p3854 A66-39796
 Storage, dumping and regeneration techniques in air, water and food needed to keep astronauts alive 22 p3857 A66-40022
SPACE GLIDER
 Glider reentry descent trajectories from near Earth orbit calculated, emphasizing landing accuracy and mechanical and thermal stresses 04 p0584 A66-13525
 Protective coating problems of superrefractory alloys for use in space gliders at temperatures above 1000 degrees C 23 p4081 A66-41655
 Relation between weight, drag and cost of single trip single-stage glider 23 p4016 A66-41789
SPACE LABORATORY
 Tests of advanced life support and environmental control systems in manned space laboratory 02 p0186 A66-11646
 Future of environmental biology, discussing space research on living organisms in extraterrestrial environment 04 p0470 A66-14069
 International cooperation in space law in connection with future space laboratories and lunar and Martian landings 09 p1473 A66-20558
 Laboratory payload concept of automated laboratories for planetary exploration, noting systems engineering advantages 13 p2179 A66-25237
 Manned orbiting astronomical observatories would enable astronomer astronauts to erect large sensors in space and avoid atmospheric effects 13 p2192 A66-25689
 Auxiliary power generating systems for 24-man space laboratory, evaluating power

requirements, cost, weight and deployed area [AIAA PAPER 64-719] 13 p2004 A66-26614
 Solar eclipse observations by orbiting spacecraft will provide data on solar atmosphere, Earth upper atmosphere and role of multiple scattering 17 p3001 A66-32349
 Space systems for astronomical observations including OAO, rocket and balloon programs and manned space observatories 19 p3466 A66-36648
 Computer operational center for orbiting space laboratory that will navigate, arrange experiments and devise work schedules 24 p4177 A66-42335
 Tests of advanced life support and environmental control systems in manned space laboratory simulator 24 p4168 A66-42779
SPACE LAW
 Law of Outer Space Colloquium, Warsaw, September 1964 03 p0447 A66-13074
 Sovereignty with respect to outer space especially celestial bodies and space stations, noting international law for free exploration, navigation, etc 03 p0447 A66-13075
 Responsibility for damage caused by space launchings 03 p0447 A66-13076
 Legal problems in organization and establishment of manned Lunar International Laboratory noting exploitation of lunar lands, sovereignty, communications, etc 03 p0447 A66-13077
 Forensic medicine in space environment with reference to international responsibility noting risks, medicolegal implications, cybernetics, contamination, pollution, etc 03 p0447 A66-13078
 Codification to determine international law of celestial bodies resulted in formulation of general principles 03 p0448 A66-13079
 Space law basis with practical application noting sources, future legal systems, cooperation, etc 03 p0448 A66-13080
 Air and space flight legal problems concerning property, noise, liability, aircraft mortgaging and seizure and penal laws 04 p0599 A66-13506
 Future development of space law discussing UN resolutions, trends, directions and recommended proposals 05 p0794 A66-14676
 Space medical jurisprudence involved in present and future space technology 06 p0972 A66-16047
 Rule of exhaustion of local remedies and liability for space vehicle accidents 06 p0973 A66-16403
 Book on space law including UN resolutions, 1963 telecommunications conference, war and neutrality in outer space, territorial rights to heavenly bodies, etc 06 p0973 A66-17004
 Traffic control for space vehicles and probable flight data 07 p1140 A66-17228
 Text on international law of territorial air space, discussing civil aviation, trespassing and crime aboard aircraft 08 p1322 A66-19237
 Text on space law including historical, scientific and political background of activities in space 09 p1472 A66-19952
 International cooperation in space law in connection with future space laboratories and lunar and Martian landings 09 p1473 A66-20558
 Text on international cooperation in space, institutions involved and technical and political constraints 10 p1623 A66-21765
 Communications satellites, legal analysis and prognosis [AIAA PAPER 66-277] 12 p1982 A66-24749
 International RF space allocation for astronautical purposes 15 p2449 A66-28743
 International coordination of satellite communications by nongovernmental agencies [AIAA PAPER 66-333] 15 p2621 A66-29866
 Legal question of Moon ownership, discussing international implications of manned landing 19 p3480 A66-35733
 Law of outer space - Colloquium, Athens, September 1965 19 p3480 A66-36201
 Space vehicle and astronaut assistance and liability for damage 19 p3481 A66-36202
 Proposals for international convention on

liability for damage caused by spacecraft, noting principles, preparatory work done and future measures 19 p3481 A66-36203
 Noncoercive and coercive processes of international law for space use, discussing factors, functions and applications 19 p3481 A66-36204
 Commercial space communication and growth of regional-national organizations 19 p3481 A66-36205
 Space legal liability and damage in UN resolution 19 p3482 A66-36206
 Space salvage activities and present maritime salvage laws 19 p3482 A66-36207
 Liability resulting from space activities 19 p3482 A66-36208
 Global space communications and international cooperation 19 p3482 A66-36209
 COMSAT and commercial era in space 19 p3482 A66-36210
 Space law in planetary explorations 19 p3482 A66-36211
 Legal problems of liability and rescue obligation with respect to spacecraft and personnel 19 p3482 A66-36212
 Legal status of Moon and celestial bodies 19 p3483 A66-36213
 Space law development and influences of U.S. and U.S.S.R. 19 p3483 A66-36214
 Legal aspects of spacecraft, space stations and space navigation 19 p3483 A66-36215
 Influence of outer space activities on development and evolution of international law 19 p3483 A66-36216
 Space law education 19 p3483 A66-36217
 International agreements as sources of law of outer space including atomic weapons testing, Comsat agreement, etc 19 p3483 A66-36218
 Legal problems involved in space communications systems and organizations, assessing rule of ITU in outer space technology 19 p3483 A66-36219
 Legal problems in space law, noting automation and new space public domain 19 p3484 A66-36220
 Monist and dualist theories and upper limit of state sovereignty 19 p3484 A66-36221
 UN General Assembly resolutions on outer space as sources of space law 19 p3484 A66-36222
 Relationships among space activity, space law and intellectual property, i.e., copyright and patent law 19 p3484 A66-36223
 Legal problems and general principles of space law 19 p3484 A66-36224
 Proposal of epiatmosphere as term for outer space, noting advantages and disadvantages of terms space, upper space, cosmic space, etc 19 p3484 A66-36225
 Proposal that International Civil Aviation Organization /ICAO/ might serve as specialized agency for administering outer space 19 p3484 A66-36226
 Subjective approach to work of UN Committee on Peaceful Uses of Outer Space 19 p3485 A66-36227
 Legal problems concerning name, definition and classification of space objects, noting special problems space stations will entail 19 p3485 A66-36228
 Objections of Soviet bloc to COMSATCO 19 p3485 A66-36229
 Space law extended to satellites, rockets and astronauts, recognizing territory, inhabitants and state power consisting of legislation, administration and judiciary 20 p3683 A66-37533
SPACE LOGISTICS
 Moon, Martian satellites and minor planetoids for possible use in refueling space ships by generating propellants from natural chemical planetary resources 04 p0577 A66-13577
 Maintenance and logistic support of present and future missile and space systems described in terms of parameters 11 p1789 A66-23443
 Mission and vehicle requirements of space station logistics spacecraft influencing selection and integration of power generation system [AIAA PAPER 64-720] 13 p2004 A66-26615
 Lunar astronomical research, establishment of lunar observatory and mathematical model for analysis of logistics implications 14 p2390 A66-28410
 Large launch vehicle cryogenic propellant

logistics including storage and production capacity optimization, cost and heat loss analyses by computer simulation [AIAA PAPER 65-259] 16 p2789 A66-30900

Mathematical model of supply support for space operations 19 p3339 A66-35397

Using Mars and Phobos to advance interplanetary flight 19 p3464 A66-36315

Economic space transportation systems using air breathing booster or VTO recoverable rocket system 21 p3821 A66-39243

Lunar environmental effects and logistics problems in industrial chemical processing of lunar resources [AICE PREPRINT 46A] 22 p3977 A66-39894

EUROSPACE-supported research carried out by Germany and England on space-shuttle system between Earth and orbiting station [ICAS PAPER 66-3] 23 p4134 A66-42067

SPACE MAINTENANCE

Low friction environment effects on maintenance operations in simulator noting torqueing-force capability, hand-eye coordination, etc 02 p0186 A66-11645

Lubricants for space environment, noting experiences with satellites and application to ball bearings and electrical contacts 13 p2086 A66-25770

Low friction environment effects on maintenance operations in simulator noting torqueing-force capability, hand-eye coordination, etc 18 p3061 A66-33821

Lubrication for spacecraft application under space conditions of vacuum, temperature and radiation 18 p3117 A66-34650

Space maintenance and extravehicular activities - National Conference, Orlando, Florida, March 1966 19 p3289 A66-35946

Maintenance on long-duration manned space flight facilitated by maintenance job aid information stored in high density retrieval and display system 19 p3309 A66-35950

Modular maneuvering unit for crew members providing independent propulsion, life support, power supply and communication capability 19 p3450 A66-35961

Gemini extravehicular spacecraft maintenance experiments under simulated conditions 19 p3364 A66-35965

Energy storage and pulse power tools for space assembly, maintenance and repair operations 19 p3364 A66-35968

Hard shell constant-volume pressure suit affords secure self-contained extravehicular environment capable of fulfilling variety of space maintenance roles 19 p3291 A66-35971

Man/machine problems in performance of space maintenance, noting conditions for shirtsleeve and pressurized suit, glove-tool interface, etc 19 p3292 A66-35974

Spacecraft in-flight interior and exterior maintenance problems for long missions 19 p3469 A66-35975

Maintenance problems in long space missions by simulation type computer program 19 p3469 A66-35976

Spacecraft maintenance and repair cost minimization and system effectiveness increase by controlling contamination due to personnel, static electrification and bacteria 20 p3567 A66-37899

Maintainability program for lunar excursion module considering prelaunch, inflight and lunar launch operations 20 p3574 A66-37962

SPACE MECHANICS

Derivability of cosmological equations from first law of thermodynamics and hydrodynamics equations, without using general relativity 07 p1132 A66-17207

Idealized rockets with constant rate of mass-change and thrust 13 p2184 A66-25756

Low thrust space flight mechanics and optimal control of low thrust engine spacecraft 15 p2596 A66-29157

SPACE MISSION

Apollo spacecraft for manned near-Earth orbital mission, noting Apollo command and service modules and Lunar Excursion Module 02 p0288 A66-11508

Propulsion system with solar energy for space exploration near Sun 03 p0416 A66-13224

Propellant combination selection for space flight missions with no unpowered periods 04 p0571 A66-13540

Life support closed cycles for missions to outer space lasting 12 months or longer, considering recovery and replenishing of water, food and oxygen from wastes 07 p0998 A66-17229

NASA program, national and international participation, scientific missions, launching of manned and unmanned satellites, etc 10 p1623 A66-21518

Unmanned space missions with regard to dynamical requirements, propulsion systems, tracking methods, guidance and control 12 p1953 A66-23636

Nuclear lunar base power plant based on SNAP-8 components [AIAA PAPER 64-712] 13 p2004 A66-26606

Rendezvous techniques and mission requirements involving space docking for transfer of personnel to and from manned space and lunar laboratories 16 p2812 A66-31683

Computer program for current profile and trajectory analysis for cesium contact thruster leading to integral focus configuration of multistrip contact engines for long space missions [AIAA PAPER 66-206] 16 p2792 A66-31690

Psychiatric evaluation of candidates for space mission, developing rank order of candidates and stressing empathic approach of psychiatrist 17 p2862 A66-31982

Visual requirements of space missions, discussing navigation, rendezvous and docking, lunar landing and lunar exploration 17 p2862 A66-32136

Reliability, maintainability, and spacecrew safety in hypothetical manned Mars mission 17 p2930 A66-33174

Spacecraft mission to libration centers of Earth-Moon system for collecting meteoroids and photographic program carried out for establishing presence of material at centers 18 p3236 A66-34955

Extravehicular activity (EVA) mission simulation, discussing design parameters effect on operating characteristics 19 p3469 A66-35969

Requirements, simulation and design approach of auxiliary controllable satellites which can be operated from manned orbiting space stations 19 p3469 A66-35970

Maintenance problems in long space missions by simulation type computer program 19 p3469 A66-35976

Aircraft, missile and space launch systems, considering in-flight transportation and separate and multiple orbital missions [AIAA PAPER 65-344] 20 p3664 A66-38150

Environmental simulation of aerospace missions including solar radiation, high vacuum, zero g, micrometeorites, etc 22 p3886 A66-40131

Nuclear electric propulsion applied to manned Mars missions, presenting analytical tool to simultaneously optimize interplanetary vehicle design and trajectory [AIAA PAPER 65-414] 23 p4120 A66-41110

Payload capabilities of launch vehicles, particularly for missions with high velocity requirements, analyzing various propulsion systems 23 p4121 A66-41315

SPACE NAVIGATION

SA ASTRONAUTICS

SA INTERPLANETARY NAVIGATION

Recursive space navigation applied to navigating in near orbit of planet by measuring directions to known landmarks 01 p0100 A66-10025

Manned Space Navigation Conference, St. Petersburg, Florida, April 1964 02 p0254 A66-11314

USAF manned space navigation experiment on Gemini and implications on MOL 02 p0255 A66-11318

Autonomous spacecraft navigation system with data processed by optimal filtering from star/local vertical observation 02 p0255 A66-11630

Axissymmetric cluster of hyperbolic trajectories of material particle near planet, for space navigation application 02 p0289 A66-11652

USAF manned space navigation experiment on Gemini and implications for MOL 02 p0257 A66-12028

Defining position fixing and navigation in air and space application 02 p0257 A66-12036

Launch vehicle guidance, premidcourse

orbit determination and midcourse maneuver of Ranger IX spacecraft lunar mission and merger 02 p0260 A66-12054

Navigation concepts and techniques in Apollo manned lunar landing mission 02 p0260 A66-12054

Navigator sighting accuracy in midcourse guidance system for manned space flight using simulated vehicle mounted space sextant [AIAA PAPER 64-651] 03 p0390 A66-12740

Navigation and control simulation portion of overall manned space cabin test program [AIAA PAPER 65-277] 03 p0328 A66-12776

Automatic pattern recognition and application to space navigation 04 p0543 A66-13511

Data processing procedures of Apollo onboard navigation system for determination of position and velocity 05 p0712 A66-14646

Principle of recursive navigation 06 p0906 A66-15912

Onboard lunar orbital navigation system simulation, using minimum variance estimation 08 p1249 A66-18818

Gravity gradient sensor application to manned orbital spacecraft, noting instrumentation for various functions 10 p1535 A66-21533

Electro-optic system superiority over radio and inertial techniques for space navigation determined by simulation 10 p1554 A66-21893

Manual control sextant sighting performance for space navigation, using simulated and real celestial targets 10 p1554 A66-21894

Onboard guidance scheme as backup to Earth-based orbit determination techniques and for approach navigation and orbit correction in planetary capture maneuver 13 p2123 A66-25253

Horizon profile of Earth calculated from solutions of plane-parallel Rayleigh scattering atmosphere 14 p2328 A66-27880

Inertial navigation - Colloquium, Dusseldorf, January 1965 15 p2535 A66-29891

Inertial navigation application to space navigation and guidance systems, considering optimum design requirements 15 p2536 A66-29895

Spaceflight radio navigation, detailing position finding methods, active and passive radar control and interferometer control 18 p3133 A66-35241

Legal aspects of spacecraft, space stations and space navigation 19 p3483 A66-36215

Radar-updated inertial navigation of continuously-powered space vehicle during deboost phase of flight prior to lunar landing 20 p3596 A66-37221

Autonomous celestial and selenocentric spacecraft navigation and orbit prediction without using ground tracking stations 20 p3598 A66-38253

Interstellar space navigation, considering problem of observables, navigation schemes and instrumentation 21 p3767 A66-38894

SPACE ORIENTATION

Inertial system using gyros and accelerometers, determining autonomously plant curvilinear coordinates and plant space orientation parameter 02 p0260 A66-12168

Spatial orientation disturbances and vegetative disorders occurring in cosmonauts during space flight due to disturbances in physiological interplay of sensing mechanisms governing space perception 04 p0468 A66-14084

Perception of apparent vertical without visual cues depending on longitudinal axes of body and head to direction of resultant acceleration above 1 g 04 p0468 A66-14086

Spacecraft orientation during interplanetary flights, using system employing two rigidly connected telescopes, one aimed at Sun and other aimed at stars 15 p2447 A66-28506

Extravehicular activity during Voskhod II flight, discussing motion and orientation of Soviet cosmonaut in space 21 p3701 A66-39337

SPACE PHOTOGRAPHY

SA ASTRONOMICAL PHOTOGRAPHY

Space photography, camera-film systems and TV/videotape systems for space environments 11 p1707 A66-23162

Mariner IV photographs, detailing camera

straints and optical specifications, discussing constraints involved in determining what features of Martian surface were to be photographed, etc 13 p2188 A66-26383

Mariner IV photographs of Mars, discussing mission objectives, functioning of camera system and interpretation of features 15 p2602 A66-29957

comparison of surface structure of Earth, Moon and Mars based on analysis of photographs from Mariner 16 p2802 A66-31013

image interpretation in manned space surveillance systems 18 p3060 A66-33742

triangulation technique for correlating film points on films of chemical cloud masses in space from two different sites to determine winds and wind direction 18 p3110 A66-33743

organized convection as photographed by Gemini astronauts 18 p3129 A66-34214

dark areas in West Texas photographs taken by Gemini IV shown to indicate heavy rainfall 18 p3129 A66-34215

space photography developments and achievements, discussing electrical and photochemical techniques 18 p3114 A66-34897

spacecraft mission to libration centers of Earth-Moon system for collecting meteoroids 18 p3129 A66-34215

photographic program carried out for establishing presence of material at centers 18 p3236 A66-34955

combined computer and physical simulation of manual tracking system for coupled-camera photography of one space vehicle from another when weldable periscope is used 20 p3597 A66-37233

Meteorological studies from manned spacecraft discussing interpretation of cloud features and optical inhomogeneity of troposphere 21 p3760 A66-39363

photography required for Voyager Mars missions to carry out effective biological exploration, noting Apollo 16 24 p4276 A66-42665

SPACE POWER UNIT REACTOR /SPUR/ SNAP-50/SPUR nuclear-electric space power plant program and potential application 13 p2126 A66-26624

iterative process used in parametric studies and preliminary designs of advanced nuclear thermionic space power plants [AIAA PAPER 64-766] 13 p2005 A66-26629

SPACE PROBE

DUMBBELL SPACE PROBE

MARINER II SPACE PROBE

MARINER IV SPACE PROBE

MARINER SPACE PROBE

MARS PROBE

PIONEER V SPACE PROBE

PIONEER VI SPACE PROBE

PIONEER SPACE PROBE

SOLAR PROBE

VENUS PROBE

ZOND I SPACE PROBE

ZOND II SPACE PROBE

Data on planets obtained by optical and radio techniques with emphasis on space vehicle observation 01 p0133 A66-10176

Optical technique for satellite and space probe tracking noting equipment, orbit determination, checkpoints, etc 02 p0192 A66-12008

Comet mission study using space probes hosted by Atlas Agena and Atlas Centaur launch vehicles for interception from 1967 to 1975 04 p0577 A66-13579

Zond III photographs of lunar far side taken July 20, 1965 noting Oceanus Procellarum, Mare Orientale and albedo 04 p0578 A66-14023

Ionosphere and plasma in near space, discussing Soviet rocket observations on ionospheric structure, expansion and space ionization 05 p0749 A66-15231

Low energy charged particle measurements, describing satellite mounted chemical electrostatic analyzer 05 p0751 A66-15373

Mars capture probe planned for 1971 using twilight orbit with optimization of payload, propulsion and trajectory 08 p1303 A66-18830

Experiments for space dust collection, describing rocketborne micrometeorite collection during Venus Fly Trap and Nike-Apex flights 11 p1771 A66-22649

Monograph on methods and equipment used by Soviet satellites and space probes

to study Earth radiation belts 12 p1938 A66-23802

Three-day battery capable of operation at temperature of 425 degrees C for use on lunar and planetary probes 13 p1999 A66-25691

Space probe observations of solar wind, solar magnetic field and interplanetary magnetic field 13 p2187 A66-26286

Space probe at Trojan libration point of Earth-Sun system 14 p2384 A66-27890

Spherical semipassive probe for density/altitude and pressure/altitude profile of planetary atmospheres, notably Mars and Venus 16 p2801 A66-30889

Small scale MHD fluid flywheel attitude control systems applied to deep space probes, suitable for overcoming cyclical additions of angular rate to satellite of 10 revolutions per day 16 p2811 A66-31253

Bit-plane encoding technique used for reducing redundancy in data gathered in space probes 18 p3073 A66-34249

Solid propellant rocket engine space probe for telemetric study of upper atmosphere 20 p3659 A66-37048

Relativity theory application to space probes, discussing experimental verification, relevance to cosmological problems and utilization to particles with large energy and momentum 20 p3650 A66-37389

Space modulation systems characteristics, considering data flow rate, spacecraft weight and power, antenna gain, noise figure, etc 21 p3706 A66-39477

Adaptive antenna system circuitry for maximum signal to noise ratio of signals reaching ground station from deep space probe 22 p3881 A66-40750

Deep space payloads, booster probes, sensors and communication systems for missions from Jupiter to Pluto 24 p4281 A66-42678

SPACE PROGRAM

SA EUROPEAN SPACE PROGRAM

SA NASA PROGRAM

SA U.S.S.R. SPACE PROGRAM

India space research program 01 p0170 A66-10437

Suggestions concerning cooperation of U.S. and European industry in space projects 02 p0305 A66-11250

Advantages and disadvantages between U.S. and Europe in space projects 02 p0305 A66-11251

Space research and spaceflight projects of smaller nations 03 p0448 A66-13113

Manned space flight program with biomedical data collection for integration of crewman into spacecraft operation 04 p0471 A66-14090

Astronautics Year, International astronomical and military space/missile review of 1964 07 p1155 A66-17414

Developing trends in space flight, considering eventual exploration and conquest of entire solar system 07 p1156 A66-17832

Military aspects of U.S. space program, reviewing work from ballistic missile to Manned Orbiting Laboratory 08 p1321 A66-18550

Mars capture probe planned for 1971 using twilight orbit with optimization of payload, propulsion and trajectory 08 p1303 A66-18830

Present status of U.S. aerospace investigation projects with description of individual mission goals, launch schedules and financial requirements 09 p1453 A66-20167

Book on structure and performance of aerospace industry and governmental relations 09 p1473 A66-20689

Space research activities in U.S. /1964 and early 1965/, condensed comprehensive report to COSPAR 09 p1458 A66-20690

Upper atmosphere sounding rocket program in increased space research activities in Australia 09 p1458 A66-20707

Brazilian space research program including geomagnetic field, radio propagation and development of sounding rocket station near magnetic equator 09 p1458 A66-20709

Canadian aerospace research including study of high latitude atmospheric phenomena by universities and government 09 p1458 A66-20710

Sounding rocket experiments at Thumba

Equatorial Rocket Launching Station in India 09 p1458 A66-20715

Aerospace and related research conducted at various universities, institutes and agencies in Israel during 1964 and 1965 09 p1458 A66-20716

Japanese space research during 1964, particularly meteorological rocket observation, satellite tracking and space experimental techniques and data 09 p1458 A66-20718

Space and atmospheric research programs in Pakistan 09 p1459 A66-20720

Gemini and Apollo Earth Orbital flights as precursors to Apollo extension and ORL Earth Orbital missions 10 p1611 A66-21528

U.S. nuclear rocket propulsion program costs, technology and application, noting empirical law of space nuclear program economics 11 p1734 A66-23078

Evolutionary manned interplanetary exploration program with modular elements used for flyby, orbital capture and Mars landing, noting influence of Apollo program 13 p2179 A66-25241

Technological, economic, natural and political considerations for manned Mars exploration in 1981 13 p2180 A66-25242

Inspection techniques for NASA, discussing control of supplier plants, Quality Requirements for Hand Soldering of Electrical Connections and personnel accountability 15 p2506 A66-28792

Space flight effect on living cells examined by using higher plants as biological dosimeters 15 p2436 A66-29469

U.S. space research in 1965 including lunar missions, Venus and Mars projects, manned space flights, meteorological satellites, etc 15 p2599 A66-29899

Space research in Federal Republic of Germany during 1965 15 p2599 A66-29901

U.S. space science program 1965, report to COSPAR 15 p2600 A66-29903

Swiss space research program, apparatus and experiments 15 p2600 A66-29904

Space research activities in Iran 15 p2600 A66-29905

Finnish space research program in 1965, outlining optical satellite tracking experiments by various observatories 15 p2600 A66-29906

Australian space program noting rocket soundings, Beacon satellites, station development, etc 15 p2600 A66-29909

Pakistan space program including rocket soundings, satellite tracking, meteorological research, etc 15 p2601 A66-29913

Canadian space program including nonmilitary activities, upper atmosphere research, rocket sounding, aurora studies, satellite use, etc 15 p2601 A66-29937

Space research programs in Italy since May 1965 and cooperation with NASA 15 p2602 A66-29940

Future spacecraft projects, emphasizing roles of space scientist and industrial manager as illustrated by using Jupiter flyby mission spacecraft design 16 p2808 A66-30364

Answers to oft-repeated questions about space program 16 p2798 A66-30367

Space technology jargon, noting language used, origin and formation of words, acronyms, etc 16 p2831 A66-31151

Reliability procedures in converting Thor tactical system to advanced booster in space program, noting time and costs savings 17 p3015 A66-31985

Planetary-exploration priorities delineated by Space Science Board of National Academy of Sciences in 1965 17 p3003 A66-32690

U.S. space sciences program, noting launch-vehicle activities, lunar/planetary exploration costs, etc 17 p3040 A66-32691

U.S. progress in space applications program including communications, geodesy, meteorology and navigation 17 p3040 A66-32692

Aerospace research programs in India 1965-1966, emphasizing equatorial aeronomy including meteorology up to 170 km 18 p3238 A66-35234

Noncoercive and coercive processes of international law for space use, discussing factors, functions and applications 19 p3481 A66-36204

Interplanetary mission planning including energy requirements, payload definition, spacecraft design, launching, cost data, etc 19 p3470 A66-36314

Design and performance of vacuum-insulated pipe used to transfer cryogenic fluids in space program 20 p3541 A66-37069

Systems analysis for space programs, emphasizing systematic quantitative studies of reliability and maintainability 20 p3684 A66-37910

Management role in NASA Space Applications Program 20 p3687 A66-37973

Large modular assembly space station in synchronous equatorial orbit described as key in Nth country planning for orbital science applications and manned planetary missions 20 p3657 A66-38184

LEM program at RCA, discussing history, management, lunar landing, rendezvous, tracking antenna, radar, etc 21 p3714 A66-39515

Problems arising in production and implementation of ballistic missiles and spacecraft programs 23 p4074 A66-41652

Space project planning through detailed knowledge and correlation of various disciplines, noting role of universities, industry and government 24 p4296 A66-42242

Antenna systems for deep space communication emphasizing ground station, balancing of ground antenna aperture with spacecraft performance, arrays, etc 24 p4171 A66-42244

Launch vehicle and spacecraft cost trends including larger vehicles, post Saturn phase, performance improvement by throttling, etc [SAE PAPER 660463] 24 p4281 A66-42394

U.S. long-range planning for space exploration 24 p4274 A66-42512

Solar system exploration and Air Force participation in missile and space program 24 p4296 A66-42654

Space program and solar system exploration noting reliability for missions 24 p4296 A66-42657

U.S. space program evaluated for Europeans, noting effects on international economics, technology and politics 24 p4297 A66-43072

SPACE RADIATION

SA GAMMA RADIATION

SA INTERSTELLAR RADIATION

SA PRIMARY COSMIC RADIATION

Ionization chamber for measuring interplanetary space radiation, using Geiger-Mueller counter as secondary detector 01 p0073 A66-11115

Optical system concepts for simulating solar, planetary emission and albedo radiation experienced by space vehicle 02 p0211 A66-11215

Penetration of electric field into metallic sphere located in stationary plasma as prototype of electric fields about Earth-Sun system 02 p0267 A66-11656

Satellite observation of solar protons from flares in September 1963, measuring impact zone effect, differential spectrum, latitude distribution of proton energies, proton fluxes, cosmic noise absorption, etc 03 p0417 A66-12649

Charged particles in auroral zone, measuring energy and pitch angle distribution of electrons and protons with rocket mounted solid state detectors 03 p0417 A66-12653

Balloon measurements of solar protons and auroral X-rays discussing radiation detectors, flight techniques, instrumentation and results 03 p0417 A66-12654

Cosmic ray helium nuclei along with heavier nuclei, traverse interstellar and interplanetary matter propagation in space and slope of energy spectrum 03 p0423 A66-12927

Soviet monograph on continuous measurement of cosmic ray mu component, covering experimental apparatus, data analysis, atmospheric dynamics, etc 03 p0423 A66-13287

Meteor radiation curves showing that integral radiation calculated for nondisintegrating meteoric body is greater than observed radiation 04 p0577 A66-13845

Space radiation of solar and cosmic origin and biological effects, examining DNA structure and radiation induced

changes 04 p0463 A66-13897

Nuclear and space radiation effects - IEEE Conference, University of Michigan, Ann Arbor, July 1965 05 p0733 A66-14844

Particle space radiation environment and latest models 05 p0747 A66-14845

Near-Earth radiation damage to silicon semiconductor devices with respect to minority-carrier diffusion length degradation and ionization dose 05 p0733 A66-14846

Particle spin orientation by resonance radiation in space 05 p0748 A66-14876

Planetary distribution and interpretation of abrupt increases in cosmic ray intensity observed during periods of maximum solar activity but not related to visible solar phenomena 05 p0755 A66-15404

Experiments in measurement of solar, cosmic and geomagnetically trapped /Van Allen/ radiation to be undertaken by ESRO II satellite 06 p0879 A66-16507

Physics of cosmic rays - All-Union Conference, Moscow, October 1963 07 p1111 A66-17534

Cosmic rays - International Conference, Jaipur, India, December 1963 07 p1118 A66-17977

Total radiation intensity in interplanetary space before and after solar events of March 29 and April 9, 1960 07 p1120 A66-17978

Accelerator energies to simulate space radiation damage effects in spacecraft systems 07 p1018 A66-18145

Degradation of silicon dioxide coated silicon planar transistors after exposure to space-type ionizing radiation, using MOS structure 07 p1010 A66-18148

Space radiation environment and guidelines for designing satellite electronic equipment for reliable operation in space 08 p1301 A66-18731

Formula for energy deposition from charged particle beams used in techniques for shielding nuclear particles from space 08 p1259 A66-19124

Eight discrete cosmic X-ray sources observed by rocket techniques 09 p1442 A66-20409

Brightness distribution of cosmic radio noise at 4.7 mc/s 09 p1456 A66-20410

Scattered Lyman alpha radiation measurements near Earth and in interplanetary space by Zond I, using NO-filled photon counters with LiF windows 10 p1596 A66-21049

Ionospheric focusing of extraterrestrial radio waves received by satellite antenna 10 p1496 A66-21120

Self-contained environmental control system for biosatellite study of prolonged effects of weightlessness and radiation [AICE PREPRINT 19D] 10 p1491 A66-21186

Weightlessness, radiation and chemical and biological contamination problems of future manned orbital space flight 10 p1486 A66-21530

Charged particle fluxes of 1 kev energy measured by spherical electrostatic analyzer aboard Cosmos XV 11 p1762 A66-22423

Flyable space radiation detector based on spark chamber technology for measuring unidirectional proton spectra in six energy intervals 12 p1877 A66-23686

Dispersion angle of radio waves in interplanetary plasma 14 p2242 A66-28153

Cosmic ray origin and space plasmas 14 p2377 A66-28359

Space radiation environmental hazard to manned space flight 14 p2231 A66-28415

Cosmic radiation measurements beyond radiation belts as observed by Cosmos XVII 15 p2573 A66-28497

Adiabatic motion of charged particles in space-and time-variant magnetic field studied, using guiding-center approximation 15 p2574 A66-28902

Radiation environment in near Earth space and effect on humans during space flight to Moon 15 p2435 A66-29454

Rocket and balloon-borne exposure study of terrestrial microorganism survival in space 15 p2441 A66-29965

Two-fluid model of solar wind, assuming spherical symmetric flow without rotation, magnetic fields or viscous stress 16 p2792 A66-30183

Unscanned large area uniform electron

beams for space /Starfish/ radiati environmental studies, using magnet quadrupole pair and beam collimation 16 p2676 A66-304

Dose-equivalent plastic manikin simulation interaction of all types of radiation with human body geometry for space radiation research 16 p2643 A66-311

Space radiation monitoring systems for categorizing particle types and intensities 17 p2924 A66-321

Multidirectional high-counting-rate mesocounting array 18 p3114 A66-348

Geomagnetically trapped proton and electron fluxes in immediate vicinity of Earth 18 p3186 A66-348

Seventy-channel scintillation spectrometer high atmospheric measurement of cosmic gamma radiation of extraterrestrial origin 18 p3192 A66-348

Angular sizes of sources of Jovian radio bursts measured by using interferometer suggest they are produced by diffraction focusing process in interplanetary space 18 p3237 A66-350

Average radiation fluxes on satellites lower radiation belt 20 p3644 A66-383

Charged-particle shielding technology for spacecraft noting particle interaction with matter, penetration calculation and mass data 20 p3665 A66-383

Interplanetary electrons and associated solar flares 22 p3974 A66-4056

Coherent amplification of RF radiation in cosmic space 24 p4265 A66-4276

SPACE RADIATOR

Directional reflective coating consisting of cylindrical dielectric fibers oriented perpendicular to absorbing substrate [AIAA PAPER 65-671] 01 p0160 A66-1025

Optimization of design parameters for parabolic radiating fins [ASME PAPER 65-HT-42] 05 p0784 A66-1475

Thermal radiation into space of limited areas of inner walls of space radiator determined, assuming cylinder and cone as isothermal black body radiators 08 p1317 A66-1883

SPACE RENDEZVOUS MANEUVER

Trajectory vs line-of-sight space rendezvous, using direct visual cue only 02 p0187 A66-1183

Pontryagin maximum principle used for solving optimization problems of space interception and rendezvous 04 p0584 A66-1352

Gemini guidance and control, discussing design, ground monitoring, launch and flight guidance, spacecraft instrumentation, maneuvering, etc 06 p0906 A66-1592

Flyby landing excursion mode compared with standard manned planetary stopover missions [AIAA PAPER 66-36] 06 p0953 A66-1641

Docking of logistics vehicle to space station investigated, using airbearing postimpact dynamic docking simulator 08 p1303 A66-1880

Optimal cooperative state rendezvous and Pontryagin maximum principle for two independently controlled systems having common goal 11 p1765 A66-2222

Rendezvous techniques and mission requirements involving space docking for transfer of personnel to and from manned space and lunar laboratories 16 p2812 A66-3168

Orbital transfer and rendezvous maneuver between inclined circular orbits, particularly bielliptic transfer with plane change Hohmann transfer with plane change and in plane modified Hohmann transfer 20 p3657 A66-3815

SPACE SCIENCE

New research techniques from growing space technology for experimental science like physics 01 p0134 A66-1020

Max Planck Institute activities in space and atmospheric artificial ion cloud production and radiation measurement 01 p0170 A66-1036

Radio astronomy - British Science Research Council Report, 1961-1964 01 p0139 A66-1115

Communications of Lunar and Planetary Laboratory 02 p0287 A66-1149

Space research developments over next 2 years in fields of atmospheric science and lunar and planetary exploration including

- biology 02 p0291 A66-12069
- goals of future space exploration including atmospheric studies, solar activity effects, planetary characteristics and interstellar space interaction effects 02 p0291 A66-12071
- general report of West German Research Institute for Aeronautics and Astronautics 1964 02 p0216 A66-12073
- space physics - Proceedings of Summer School, Alpbach, Austria, July-August 1973 03 p0419 A66-12839
- NASA sponsored papers on space science 05 p0766 A66-15741
- cosmic rays and problems in space physics Conference, Yakutsk, U.S.S.R., August 1972 06 p0945 A66-16568
- French National Center of Space Studies, facilities and functions 06 p0973 A66-16934
- NASA Space Science Program, discussing flight schedules, spacecraft under development, biosciences, geophysics, astronomy, lunar and planetary program and construction of facilities 07 p1139 A66-18091
- factors in shaping policy for aerospace activity, stressing role of scientist 08 p1321 A66-18551
- aerospace industry contribution to science and technology, noting relationship with U.S. government 08 p1321 A66-18552
- SRO/ELDO Space Documentation Service, describing system characteristics, NASA agreement, indexing and search strategy 09 p1473 A66-20658
- aerospace studies in Argentina during 1964 using rockets and balloons and including winds, E layer, satellite tracking, etc 09 p1458 A66-20706
- space research in West Germany including super atmosphere time-dependent structure, geomagnetism, space radiation, artificial ion cloud, etc 09 p1458 A66-20713
- aerospace research in Italy including San Marco project, ionospheric measurements, cooperation with NASA, rocket experiments, etc 09 p1458 A66-20717
- NASA program, national and international participation, scientific missions, launching manned and unmanned satellites, etc 10 p1623 A66-21518
- stepping stones to Mars - AIAA-AAS conference, Baltimore, March 1966 13 p2177 A66-25234
- non-technical book on extraterrestrial life including origin of life, life signs in meteorites, Moon and Mars, man-machine combinations for space purposes, etc 13 p2011 A66-26317
- New astronomical techniques for observations outside Earth atmosphere, noting X-ray sources and neutron stars 14 p2378 A66-26915
- aerospace technology, spacecraft and spacecraft systems, launching, control, recovery, etc - Space Congress, Cocoa Beach, Florida, March 1966 14 p2388 A66-28401
- space research activities in Romania 15 p2599 A66-29896
- British space research for 1965-66 including rocket development, satellite tracking, solar radiation, ionospheric sounding, etc 15 p2599 A66-29898
- space research in Hungary in 1965 including satellite tracking, ionospheric sounding, solar activity, etc, noting international data transmission 15 p2600 A66-29907
- space research activities and facilities in Greece 15 p2600 A66-29908
- Dutch space research program noting solar and stellar research, cosmic radiation, wind measurement, rocket sounding, etc 15 p2600 A66-29910
- space research activities in Austria 15 p2601 A66-29934
- space research activities in Brazil 15 p2601 A66-29935
- French space program including FR-1 satellite and research in meteorology, space biology, rocket probes, electromagnetic propagation, etc 15 p2601 A66-29938
- space research in Japan in 1965 15 p2602 A66-29941
- space research in Argentina in 1965 15 p2602 A66-29942
- Text on atomic and space physics with special emphasis on astronomy 16 p2804 A66-31316
- Space research and effect on other branches of science, especially applied mechanics 17 p3040 A66-32008
- Space astronomy discussing history, solar XUV, galactic UV, galactic X-rays and gamma rays, visible and IR observations, laboratory astrophysics, etc 17 p3002 A66-32549
- Atomic clocks, frequency standards of atomic beam resonators, masers and gas cells and application to space research 18 p3110 A66-33982
- Book on advances in space science and technology including solid propellant rocket motor cases, solar system exploration vehicles, undulation in selenology, etc 19 p3464 A66-36311
- Dynamic power generating systems using Rankine and Brayton cycles for space application 20 p3598 A66-37256
- Chemico-physical and biological fluctuation and causality dependence on space phenomena 21 p3811 A66-38630
- Planetary composition, structure, origin and history in light of recent space research 22 p3978 A66-40020
- SPACE SELF-MANEUVERING UNIT /SMU/**
- Simulation testing of modular maneuvering unit for stabilized and untethered maneuvers in free space 02 p0215 A66-11625
- Astronaut maneuvering unit, discussing experiments, performance requirements, design concepts, system tradeoffs, packaging and configuration 19 p3290 A66-35958
- Modular maneuvering unit for crew members providing independent propulsion, life support, power supply and communication capability 19 p3450 A66-35961
- Computer simulation and performance prediction of MMU astronaut maneuvering system, discussing acceleration, velocity, displacement, fuel consumption, propulsion efficiency 19 p3291 A66-35964
- Controller, employing voice recognition principle, for attitude control system of astronaut maneuvering unit in various space tasks 19 p3291 A66-35973
- Telemetry system design for astronaut maneuvering unit /AMU/ involving digital combination and filtering of serial PCM pulse train used to modulate RF transmitter 20 p3513 A66-37206
- Cleaning techniques for zip gun or hand-held maneuvering unit and environmental life support system or ventilation control module used for astronaut White walk in space 22 p3886 A66-40039
- SPACE SIMULATION**

- Pitting of stainless steel, coated and uncoated, occurring when exposed to nitrogen tetroxide during propulsion system testing in space simulation chamber 22 p3890 A66-40221

Man rating requirements of space environment simulation laboratory, consisting of two large chambers with floors which can be cooled by liquid nitrogen down to 92 degrees K 22 p3892 A66-40239

Instrumentation in aerospace simulation facilities - International Conference, Stanford, August 1966 24 p4205 A66-42166

SPACE SIMULATOR

JPL 25-ft space simulator tests Ranger, Mariner and Surveyor spacecraft under conditions of extreme cold, high vacuum and intense solar radiation 02 p0213 A66-11228

Interior design problems in artificial g spacecraft simulator 02 p0185 A66-11624

Integrated operating mode of Apollo mission simulator with mission control center for combined training of Apollo flight and ground crews 03 p0353 A66-12777

Design aspects of satellite motion simulators in U.S. and Germany 04 p0507 A66-13550

Six degree of freedom moving base simulator for testing orbital space rendezvous 06 p0868 A66-15961

Instrumentation 06 p0868 A66-15961

Goddard Space Flight Center Space Environment Simulator instrumentation subsystems reliability design factors 06 p0868 A66-15962

Two-man space station simulator for 15-day integrated test program, primarily to study maintenance of operational mission element 06 p0868 A66-16242

Space environment simulator of CNES at Bretigny-sur-Orge 06 p0870 A66-16955

Docking of logistics vehicle to space station investigated, using airbearing postimpact dynamic docking simulator 08 p1303 A66-18808

Gas capture coefficient prediction for cryopumping based on critical velocity model in space chamber simulator 10 p1520 A66-21937

Aerospace and space simulation including rendezvous and docking, lunar landing and operation of supersonic transports 12 p1858 A66-24605

Simulated space vacuum environment by cryosorption pumping system 12 p1858 A66-24709

Space simulator incorporating 4-foot solar beam as radiation source 16 p2681 A66-30500

Visual simulation device for aircraft pilot and astronaut 16 p2643 A66-30952

T-27 space flight simulator design, system performance and use for training and research at USAF Aerospace Research Pilot School 18 p3093 A66-33789

[AIAA PAPER 65-265] 18 p3093 A66-33789

Simulator results on guidance and control during supercircular atmospheric entry maneuvers 18 p3244 A66-33878

ONERA space environment simulating chambers, giving function and characteristics of each apparatus 18 p3094 A66-34008

Space simulator design for testing of ESRO II satellite, noting three-level operating concept, independent control of main shroud sections, etc 18 p3096 A66-34620

Factors in operation of manned space chambers - ASTM Symposium, Seattle, October-November 1965 19 p3288 A66-35837

Man-rating criteria in Boeing space environmental simulation chamber, discussing structural design, vacuum chambers, repressurization, manlock pumping systems, aerospace medical training, etc 19 p3289 A66-35841

Man-rating of low-pressure chambers at Crew Systems Division and Structures and Mechanics Division of NASA Manned Spacecraft Center /MSC/ at Houston 19 p3289 A66-35842

Man-rating Douglas space simulator, 39-ft-diam sphere with pumping speed adequate for manned operation while maintaining simulated space vacuum 19 p3340 A66-35843

Rapid repressurization of space simulation chamber reliably affected by use of commercially available muffler 19 p3340 A66-35844

T-27 Space Flight Simulator, for extravehicular activity training, utilizing closed-circuit TV system 19 p3291 A66-35966

High vacuum pumping system techniques

to meet requirements for space simulation chambers 19 p3371 A66-36649

Closed cycle helium refrigerator noting thermodynamic cycle, equipment arrangement and cost estimate for space simulator and wind tunnel application closed 20 p3541 A66-37070

Cryogenic system used to remove heat from space simulator solar radiation source 20 p3541 A66-37071

Thin insulating Teflon film bonding to internal surface of space cryopanel for increased heat transfer and faster cooling 20 p3677 A66-37100

Integrated manned systems simulator for optimizing displays, controls and vehicle dynamics in manned aerospacecraft 20 p3542 A66-37249

Automatic feedback table leveling system, noting tilt to simulate aerodynamic drag 21 p3722 A66-38887

Adaptation to prolonged exposures in revolving space station simulator 22 p3853 A66-39786

Fabrication and installation problems in integration of solar simulator into space-simulation chamber 22 p3887 A66-40207

Half-scale thermal model of Mariner IV spacecraft for solar simulation and high vacuum testing in JPL 10-ft space simulator 22 p3888 A66-40213

Three Japanese space/solar simulators, two small-size simulators used to obtain basic design data for larger simulator and for surface coating and thermal balance tests of small models 22 p3890 A66-40222

Space environment simulator for analysis of spacecraft material reliability during long-duration space mission 22 p3890 A66-40225

Small liquid propulsion systems testing in space environment simulator with high vacuum and low pumping capacity 22 p3890 A66-40226

Thermal control surface contamination due to rocket exhaust plumes and effects on solar absorptance and IR emittance of protective coatings 22 p3891 A66-40231

Hydrogen, nitrogen, oxygen and helium gas pumping by ionization pressure gauges in space simulators 22 p3891 A66-40233

Cryogenic fuels evaluated for operational safety in space environment simulation laboratory /SES/ 22 p3891 A66-40235

Low pressure low temperature ignition of hypergolic propellants, particularly hydrazine-nitrogen tetroxide systems, in space environment simulator and conclusions on gas phase reactions 22 p3892 A66-40237

Space simulation chamber determination of contamination causes and effects 22 p3892 A66-40238

SPACE STATION

SA MANNED ORBITAL LABORATORY

/MOL/

SA MANNED ORBITAL RESEARCH LABORATORY /MORL/

U.S.S.R. space-travel program and establishment of manned space station by 1966 01 p0136 A66-10441

Flight control system for manned orbital space station using momentum storage devices and reaction control to counteract gravity effects and aerodynamic disturbances 01 p0104 A66-10683

Planar motion examined for space station having cable-connected manned compartment and counterweight configuration [AIAA PAPER 64-493] 03 p0431 A66-12742

Nonlinear dynamics of free rotating flexibly connected double-mass space station 03 p0431 A66-12744

Electron beam welding for in-space welding of spacecraft and space stations noting welding modes, power requirements, environmental influences, etc 06 p0888 A66-17072

Suitability of beryllium reinforced plastics and various light metals for application in manned space stations 10 p1545 A66-21216

Space station design trends, noting functional requirements, payload capability, logistics and launch requirements 13 p2193 A66-25759

Nuclear-electric power supply for manned space stations using radioactive isotopes [AIAA PAPER 64-711] 13 p2004 A66-26605

Nuclear power supply adapted as electrical

power source for manned space station [AIAA PAPER 64-713] 13 p2068 A66-266

Multi-kw solar cell power system meeting requirements of orbiting space station [AIAA PAPER 64-717] 13 p2004 A66-266

Power source comparison for manned space stations including solar cell thermionic, Mercury-Rankine and Brayton systems [AIAA PAPER 64-721] 13 p2004 A66-266

Versatile air-bearing table with three-axis attitude control system for variety nonspinning zero-g space stations 15 p2534 A66-293

Manned Orbiting Research Laboratory design for experimental program requirements and mission flexibility 18 p3240 A66-337

Titan III as ferry-resupply system with analysis of performance as affected by orbit altitude and inclination parameters [SAE PAPER 660446] 18 p3245 A66-338

Extravehicular space activities related assembly and maintenance of large space stations, antennas and solar collectors 19 p3290 A66-359

Digital computer programmed optimization model of Earth-orbiting space station missions including reliability, maintainability and cost considerations 20 p3663 A66-3790

Passive wobble damping system with pendulum damper designed for manned rotating space station 20 p3664 A66-3811

Large modular assembly space station with synchronous equatorial orbit described as key in Nth country planning for orbital science applications and manned planetary missions 20 p3657 A66-3811

Attitude control system and actuator locations in flexible spinning toroid manned space station 21 p3819 A66-3884

Emergency escape from multicrew orbital vehicles during launch, orbit, reentry and landing by lifting reentry module [ICAS PAPER 66-35] 22 p3988 A66-4066

Control moment gyros with reaction control jet torque sources for attitude control of spinning and nonspinning space stations [AIAA PAPER 65-405] 23 p4132 A66-4109

EUROSPACE-supported research carried out by Germany and England on space shuttle system between Earth and orbiting station [ICAS PAPER 66-3] 23 p4134 A66-4206

Primary factors affecting passive stability of spinning cable-connected satellite including perturbations due to gravity gradient, out and in reeling, etc 24 p4283 A66-4276

SPACE STORAGE

Test for space storability of liquid propellants by suitably coating storage tank [AIAA PAPER 65-534] 19 p3448 A66-35613

SPACE SUIT

SA PRESSURIZED SUIT

Apollo space suit design discussing construction, purpose and operating conditions of liquid-cooled life support system 03 p0328 A66-1263

Heat loss in space, discussing temperature regulation during space walk via heat exchangers in air ventilated space suit 04 p0470 A66-1407

Metabolic rates in pressurized pressure suit, affecting heat balance of subjects metabolic heat with heat removed by environmental control 07 p0997 A66-1765

Extravehicular mobility unit /EMU/ to be worn by astronauts on Apollo lunar landing mission 08 p1176 A66-1858

Acute hemodynamic effects of G-suit inflation, noting elevation of central venous pressure, cardiac output falling due to depressor reflexes and role of ganglionic blockade 12 p1811 A66-2501

Integrated space suit, suit loop and backpack system for intravehicular operation on Interplanetary missions 13 p2013 A66-2527

Space suit for thermal, radiation and exposure protection for man on Moon 14 p2231 A66-2841

Full pressure suit design for high altitude and space missions, discussing material selection, physiological requirements, etc 16 p2642 A66-3046

Water conditioned suit performance

characteristics noting cooling rate, inlet and outlet temperatures, etc 16 p2643 A66-31131
Mathematical solution for expressing comfort level of man in gas-cooled space suit and space cabin, noting environmental parameters 17 p2863 A66-32142
Crash and ballistic protective flight helmets, noting use of improved energy dissipating materials 17 p2863 A66-32146
Ideal operation of portable life support system /PLSS/ requires anticipatory response to astronauts changing heat dissipation needs 17 p2863 A66-32152
Human performance in space simulation chambers and physiological limitations 19 p3288 A66-35838
Astronaut maneuvering unit, discussing experiments, performance requirements, design concepts, system tradeoffs, packaging and configuration 19 p3290 A66-35958
Hard shell constant-volume pressure suits afford secure self-contained extravehicular environment capable of fulfilling variety of space maintenance roles 19 p3291 A66-35971
Extravehicular environment and mobility constraints affecting design of anthropomorphic space suit for working astronaut 19 p3291 A66-35972
Man/machine problems in performance of space maintenance, noting conditions for shirt-sleeve and pressurized suit, glove-tool interface, etc 19 p3292 A66-35974
Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164
Apollo environmental control system simulation chamber for suit and manned system evaluation and operational verification 22 p3892 A66-40241
Radiation doses measured by onboard dosimeters and those fastened to space suits of crews of Voskhod I and Voskhod II compared, noting radiation composition analysis by means of nuclear emulsions 22 p3855 A66-40473
Safety and survival in manned space flights, discussing space suits, escape, life preservation after soft landing, etc 24 p4169 A66-43145
SPACE SURVEILLANCE SYSTEM
U.S. military and strategic posture in aerospace, discussing intelligence and defense systems, strike capabilities and support programs 09 p1472 A66-20170
Image interpretation in manned space surveillance systems 18 p3860 A66-33742
Phase comparison telemetry consisting of massive VHF receivers and CW transmitters for satellite detection 19 p3301 A66-35692
Operational effectiveness and maintainability verification for surveillance and control systems influence by quantitative reliability 24 p4179 A66-42094
SPACE SYSTEMS ENGINEERING
Coordinated orbital technology experiment program discussing guidance and control, ground test, low-g accelerometer test, error sources, elimination, etc 04 p0507 A66-13592
Heat pipes as heat removal systems in space thermionic power supplies, discussing laminar, turbulent flow and heat transfer efficiency 05 p0789 A66-15542
Reliability K-factors for space system electronics 05 p0650 A66-15825
System costs and pharmacological techniques as function of exercise program designed to maintain space crew physical fitness 07 p0999 A66-17658
Reliability engineering concepts for manned spacecraft development and test program to achieve operational readiness with minimum flight tests 12 p1884 A66-23742
Space power systems engineering - Conference Philadelphia, September 1964 13 p2002 A66-26604
Effect of limited quantity and short delivery requirement orders for electronic components in reliability and quality control 15 p2508 A66-28803
Space system operational requirements for maintainability, noting design principles for spacecraft, boosters, support equipment, crew safety, etc 16 p2681 A66-30662
Sealed nickel-cadmium batteries for space power systems, noting 100 amp-hr cell with hydrode and systems considerations

relating to heat transfer and charge control 20 p3497 A66-37161
Mechanical reliability research and development for space systems, noting effect of random dynamic loading, fatigue damage, etc 20 p3573 A66-37959
Microwave solid state multiplier for space use noting temperature variations, vibration-induced noise, outgassing, etc 22 p3879 A66-40724
Reliability analysis and measurement program used by space contractor to indicate failure rates for various components and systems 24 p4217 A66-42648
SPACE-TIME CONTINUUM
Book on space, time and relativity for nonmathematicians noting geometry, kinematics, dynamics and Einstein theory 08 p1255 A66-18893
Book on time and space, weight and inertia in terms of relativity theory, including accelerations and rotations, dynamical tensor of matter, ideal clock, rigid body, etc 14 p2330 A66-26808
Relation between moving matter and geometrical properties of space-time 14 p2333 A66-27217
Relation between gravitation and cosmological infinity 14 p2333 A66-27221
Conception of infinite space and time 14 p2333 A66-27222
Configuration-space photon number operators in quantum optics, discussing photoelectric measurements of field, photon localization in space-time regions, commutator formalisms, etc 15 p2543 A66-28942
Fluctuation scattering and absorption cross section derived for space and time dispersive plasma 18 p3149 A66-34914
Elliptic Kruskal-Schwarzschild space, discussing identification of points which limit Kruskal space into Minkowski space 19 p3389 A66-35942
Methodological bases and demonstration of interrelationship of space and time in special theory of relativity 21 p3769 A66-38586
Singularities in universe, discussing properties of space-time continuum, matter and Einstein equations for strong fields 21 p3771 A66-39265
Singularities in closed universes, discussing closed solutions to Einstein equations and inevitability of singularity, based on Hawking theorem 21 p3771 A66-39266
Two-dimensional time-space analysis of Doppler-effect-like phenomena in refraction and reflection of waves propagating through moving boundary between two media 21 p3706 A66-39574
Einstein gravitation theory relation to general and special relativity, space time, unified four-dimensional continuum metric and chronogeometric theories 24 p4238 A66-43015
SPACE-TIME FUNCTION
Space-time correlation function of response of finite cylindrical shell to purely random pressure field and to subsonic boundary layer pressure fluctuations 01 p0147 A66-10131
Asymptotic behavior of gravitational field studied by Peeling theorem for case where curvature tensor of space-time has direction that can be demonstrated as geodesic trajectory 07 p1080 A66-17451
Invariance of differential equation systems in real gas dynamics considered in affine space-time 07 p1022 A66-18104
Space-time distribution of perturbed solar diurnal variation at high latitudes during IGY 08 p1214 A66-19033
Dirac equation for spin-half particles in curved space-time formulated by using Cartan calculus, applied to treatment of neutrinos in homogeneous nonisotropic universes and plane wave geometries 12 p1905 A66-24563
Effective diffusion cross section of ultrasonic and laser beam while acting on turbulent flow 13 p2062 A66-25404
Quasi-stellar radio sources evolution as function of space-time 16 p2799 A66-30591
Initial pulse in luminous emission of discharge laser, using photomultiplier preceded by mobile iris, determining geometrical distribution of discharge

brightness 16 p2719 A66-31209
Electromagnetic cavity resonances in rotating systems investigated through covariant space-time formulation of classical electromagnetic field theory 18 p3119 A66-34451
Coefficients of Taylor expansion of correlation function in various velocities defined to describe space-time behavior 21 p3770 A66-38749
SPACE-TIME METRIC
SA CARTAN SPACE
SA SCHWARZSCHILD METRIC
Vector tetrad in mathematical formulation of general theory of relativity and cosmological red shift 02 p0287 A66-11470
Photon tracks near very massive star, deriving motion equations with independent time coordinate for spherically symmetric four-dimensional manifold 02 p0291 A66-12184
Aberration, Thomas precession and forms of relativistic collision invariants on Lobachevsky or hyperbolic space simplify relativistic kinematics 03 p0392 A66-12608
Gravitational waves and radiation, relating waves and null elements in space-time 05 p0757 A66-14525
Euclidean nature of relativistic rotating disk in conclusions of Eddington and Lorentz 08 p1255 A66-18857
Retarded observer time as coordinate in relativistic spherical hydrodynamic equations prevents Schwarzschild surface formation 11 p1772 A66-22779
Fantappie relativity theory using elementary projective geometry and based on group theory, obtaining cosmology leading to double time scale and origin of universe from point 15 p2599 A66-29658
Radiation coordinates for gravitational radiation in general relativity 16 p2746 A66-30528
Lorentz invariant space-time gravitational field theory, Maxwellian gravitokinetic field of potential and kinetic components and precession of orbit of Mercury analyzed by Einstein restricted theory of relativity 16 p2802 A66-31011
General relativistic dyadic formalism applied to metrics of rigid bodies moving in Einstein space of uniform space-time curvature 17 p2958 A66-32294
Structure of general relativity theory space examined, using analytic continuation of geodesic equations 20 p3602 A66-37375
SPACE TOOL
Space tool kit development and evaluation program, examining design requirements for in-orbit and lunar surface repair and assembly tasks 19 p3363 A66-35948
Applicability of electron beam welding techniques for in-space welding and maintenance, examining fabrication of typical aerospace joints 19 p3363 A66-35951
Tool fastener interface problems peculiar to extravehicular environment examined by measurement of torque and linear /or push-pull/ forces 19 p3363 A66-35952
Energy storage and pulse power tools for space assembly, maintenance and repair operations 19 p3364 A66-35968
SPACE TRACK PROJECT
Deep space tracking stations, discussing digital computers for monitoring functions such as real time measure, station performance, failure detection, etc [ISA PREPRINT 1.11-1-65] 05 p0635 A66-15498
NASA Space Tracking and Data-Acquisition Network, describing command telemetry, tracking handling and recording system operations 08 p1180 A66-18587
Statistics of product of Gaussian noise process and pseudorandom binary code 09 p1342 A66-19919
SPACE TRAJECTORY PROGRAM
Russian book on three-dimensional problem of reaching Moon, covering power optimized trajectories, initial velocity minimum, lunar orbit, perturbation factors, etc 06 p0954 A66-16563
Powered manned Mars flyby departing Earth near minimum velocity point, considering required maneuver within Mars influence for valid return legs 11 p1768 A66-22455
Equations for perturbative derivatives of two sets of elements in terms of universal

formulation, discussing low thrust orbits 12 p1946 A66-23591

Sequential linear estimation when measurement function is nonlinear, not considering system dynamics, applied to space trajectories 17 p2946 A66-32456

Handbook on theory of space flight and navigation of spaceships in interplanetary space, emphasizing characteristics of space trajectories, rocket engines and space vehicles 21 p3812 A66-38947

Error correcting problem in space trajectory of continuous powered space vehicle, discussing optimal terminal guidance [AIAA PAPER 65-696] 22 p3945 A66-40367

SPACE VEHICLE

SA EXTRAVEHICULAR OPERATION

SA RECOVERABLE SPACE VEHICLE

SA SATELLITE

Radar for tracking satellites and space vehicle, considering transponder beacons and comparing pulsed and CW systems 04 p0487 A66-14131

Tanks for cryogenic fluids on space vehicles noting structure, insulation, manufacturing techniques, materials, construction, etc 06 p0887 A66-17069

Papers on interactions of space vehicles with ionized atmosphere 08 p1302 A66-18742

Plasma compression effect of space vehicle in magnetolonic medium, discussing injection and removal of quasi-trapped ions 08 p1302 A66-18756

Coupling situations involving two flush-mounted antennas such as those used in space vehicles, noting interference problems and use of nomographs 19 p3313 A66-35514

Trajectory corrections of space vehicle launched toward planet, noting fuel consumption 20 p3595 A66-36872

Simultaneous observation of two trial distances of stars, stellar occultation, etc, for determining position of space vehicle during mission from Earth to Moon 20 p3597 A66-38014

Heating environment for space vehicle, examining wind and incident radiation effects on heat transfer to liquid hydrogen, insulation surface thermal properties and optimization of insulation system 22 p3986 A66-39777

Book on rocket construction 1963-65 and winged space vehicles including manned orbital space station, design, structural schemes, reentry, etc 23 p4128 A66-41277

Welding and adhesion techniques in aircraft and space vehicle construction - Conference, Hanover, West Germany, May 1966 23 p4073 A66-41530

Economics of various orbital boosters from completely expendable to completely recoverable vehicles, noting concept of cost-optimum vehicle 23 p4133 A66-41775

Interplanetary trajectories, considering gravity effect, free flight trajectory and forces acting on space vehicle 24 p4280 A66-43132

SPACE VEHICLE CHECKOUT PROGRAM

Practice reliability used in systems testing as final check on Titan program 01 p0140 A66-10100

Reliability program for Gemini Launch Vehicle examining hardware changes, hydraulic redundancy, guidance, power distribution and addition of malfunction detection system 01 p0141 A66-10111

Automated techniques for providing reliability assurance in launch operations of Saturn IB space vehicle system 01 p0052 A66-10112

Coordinated program for airborne and ground support equipment testing of Gemini spacecraft and launch vehicle by two different manufacturers 02 p0294 A66-11635

Gemini System Interference Monitor (SIM) for simultaneous monitoring and remote control of many widely separated test points from central location 05 p0645 A66-14592

Increased automation of checkout procedures and part played by man in checkouts of space vehicles 06 p0869 A66-16803

Error in checkout systems for space or weapon systems 08 p1223 A66-18740

Facility for sterilization of space flight vehicles permitting sterile access to flight hardware for assembly, checkout and repair 13 p2057 A66-25270

S-IC stage instrumentation systems and ground support equipment checkout methods used at Kennedy Spaceflight Center 14 p2271 A66-28420

Integrated checkout of Apollo payloads, command module, lunar excursion module and service module 14 p2271 A66-28423

Onboard testing and checkout of manned space vehicles 14 p2272 A66-28424

Checkout criteria and requirements for manned spacecraft, specifically Apollo [AIAA PAPER 65-284] 18 p3093 A66-33791

SPACE VEHICLE CONTROL

Inertially augmented radio altimeter guidance system for space booster missions with over-horizon orbital injection requirements 01 p0100 A66-10023

Pulse operated bipropellant control valve design for attitude control systems of space vehicles 01 p0015 A66-10668

Gemini spacecraft and launch vehicle interface design, development and configuration control 02 p0294 A66-11636

Fuel optimum guidance law to achieve required velocity 06 p0906 A66-15928

Spacecraft attitude perturbation due to meteoroid impacts, anisotropy of incident flux and possibility of steady state disturbance torque 14 p2392 A66-27878

Controller synthesis for three-axis reaction-wheel control of space vehicle in negligible gravitational field, using optimization theory and Pontryagin maximum principle 19 p3468 A66-35883

On-line and off-line self-organizing control systems for space vehicle application 19 p3333 A66-36661

Closed loop control system for space vehicle guidance, formulating efficient steering algorithm 19 p3471 A66-36685

Integrated manned systems simulator for optimizing displays, controls and vehicle dynamics in manned aerospaceraft 20 p3542 A66-37249

Low-thrust rockets for spacecraft attitude control, noting subliming solid rockets 21 p3807 A66-38800

Minimum of maximum overload in braking of vehicle in atmosphere, examining aerodynamic lift on basis of Pontryagin maximum principle 22 p3986 A66-40465

Inertially augmented radio altimeter guidance system for space booster missions with over-horizon orbital injection requirements 23 p4088 A66-41099

Monograph on manned space flight, discussing environment, crew, spacecraft, navigation, guidance, control, communications, etc 16 p2809 A66-30878

SPACECRAFT COMMUNICATION

Communication system for 1969 Apollo spacecraft 01 p0037 A66-10502

Electronically steerable antennas for spacecraft-to-spacecraft communication for frequencies from 1 to 35 gc, considering maximum antenna gain, bandwidth, spacecraft stabilization, etc 04 p0501 A66-14443

Short-wave frequency range spacecraft communications, discussing Earth signal reception, signal trajectories from orbits above and below F-2 layer, etc 09 p1348 A66-21013

Spacecraft communications system design

steps, discussing radiation pattern coverage, tradeoff, operating frequencies, signal strength, etc 14 p2244 A66-28420

Fading channel simulator for performance testing of spacecraft communication and ranging equipment 14 p2271 A66-28420

Apollo Manned Space Flight Network (MSFN) tracking and communication systems for tracking lunar spacecraft 15 p2450 A66-28749

Acquisition and reacquisition in spacecraft and spacecraft-to-Earth communications using laser systems 18 p3067 A66-33791

VHF communications system for S-band transmission link 20 p3515 A66-37229

Interplanetary medium and S-band telecommunications obtained from tracking data from Mariner II and Mariner IV spacecraft 20 p3520 A66-38186

Spacecraft and Earth-terminal antennas for interplanetary communication via high power information transmission 22 p3881 A66-40749

Antenna patterns for spacecraft antenna array with aperiodic arrangement of large elements provide high aperture efficiency 22 p3882 A66-40755

Electronically-scanned K-band passive phased array for spaceborne radiometry 22 p3882 A66-40755

Mars data transmission difficulty in long life Mars flyby and orbiter and Earth-return mission 24 p4277 A66-42666

Noncoherent low power spacecraft communication system with 1 watt transmitted power and omnidirectional spacecraft antenna 24 p4173 A66-42688

SPACECRAFT COMMUNICATIONS SYSTEM

Mariner Mars telecommunications system using PCM/PSK/PM modulation-demodulation in combination with pseudorandom sync codes 03 p0335 A66-12909

Planetary radar system at Venus site of NASA Deep Space Instrumentation Facility for space communications, noting continuous-wave transmitters and receivers 04 p0478 A66-13609

Microwave amplifier, electrostatically focused klystron, for spaceborne equipment used in telecommunications of deep space 04 p0493 A66-13609

Radio, telemetry and command subsystems of Mariner Mars 1964 telecommunications system 04 p0479 A66-13604

Logical design for phase-coherent and comma-free biorthogonal telemetry system less RF carrier 06 p0823 A66-15965

Stabilization, communication, data handling and power subsystem requirements for AOSO [AIAA PAPER 64-333] 08 p1303 A66-18812

Externally caused radio frequency interference (RFI) in electronic subsystems of ballistic vehicles at orbital altitudes 13 p2027 A66-26744

Interplanetary spacecraft telecommunications system design including block diagrams 14 p2239 A66-27822

Flexible commutation system for routing numerous signal-carrying leads to centrally located multiplexer for Saturn 16 p2649 A66-30540

Space communication requirements using lasers and microwaves in manned Mars flights [AIAA PAPER 65-324] 18 p3067 A66-33791

Multilevel pulse code modulation system for space communication that uses increased power availability due to larger boosters while meeting reduced bandwidth requirement 20 p3513 A66-37198

Reliability design requirements for Data Transmission System for Jupiter Precursor Spacecraft 20 p3513 A66-37208

Data management system synthesis for acquisition, processing and transmission of data aboard manned spacecraft 20 p3514 A66-37205

Space vehicle telemetric data transmission by FM, PCM, frequency multiplex, etc 21 p3717 A66-39633

SPACECRAFT COMPONENT

NASA procurement technique including incentive contracting, improved performance, timely delivery and reduced cost 05 p0795 A66-15831

Nonstructural materials for space

ization including lubricants, sliding electrical contacts and 14 p2319 A66-28006
 live technology for spacecraft and rocket engine applications, discussing zero-gravity valve, zero leakage valve, insensitive seat and solenoid actuator [AIAA PAPER 66-MD-61] 21 p3742 A66-38494
 ariner 1964 parts screening program including philosophy, program implementation, screening results and conclusions 24 p1478 A66-42089
SPACECRAFT CONFIGURATION
 lunar orbiter objectives, mission and spacecraft configuration, detailing inertial reference unit 04 p0543 A66-13581
 environmental testing, spacecraft configuration, data retrieval and flight simulation in OAO 08 p1203 A66-19517
 multistage space transporter with retrieval capabilities, using controlled reentry 18 p3247 A66-34678
 recoverable space boosters, discussing technological and economic aspects of use 19 p3469 A66-36082
SPACECRAFT CONSTRUCTION MATERIAL
 beryllium properties and fabrication process in space 01 p0085 A66-10364
 fabrication characteristics of ablative plastics prepreg reinforced tape for construction of large rocket nozzles 06 p0885 A66-16289
 optimization of reinforced plastics in ablative rocket nozzle and reentry body application, considering compression loading 06 p0885 A66-16290
 thermal response of ablative materials for nozzles and leading edges in terms of specific thermal and mechanical properties 06 p0899 A66-16291
 suitability of beryllium reinforced plastics and various light metals for application in manned space stations 10 p1545 A66-21216
 construction and design of Apollo spacecraft, examining high temperature aluminum and titanium alloys and fabricating methods 10 p1545 A66-21217
 Directional characteristics of radiation properties of surfaces and materials as factor in spacecraft thermal control 11 p1777 A66-22459
 Balsa-wood impact limiter for hard landing on Mars surface, noting testing, performance, parameters and manufacture 13 p2191 A66-25264
 Materials for manned spacecraft with emphasis on Gemini 14 p2406 A66-28003
 spacecraft metal-metal composites consisting of continuous filaments in metal matrix 14 p2317 A66-28013
 Space environment effect on satellite materials and components 18 p3231 A66-34213
 Test for stiffness of fabrics used to measure flexural stiffness of thin plastic films and metal-plastic laminates for spacecraft application 20 p3588 A66-37793
 Vacuum pressure effect on separation distance for arcing of DC current between spacecraft material 21 p3771 A66-39214
 Design and fabrication of welded titanium spacecraft structures noting material control, quality, weight factor, etc 22 p3924 A66-40259
 Metal adhesives in aircraft and space industry, particularly in construction of laminar and sandwich elements of wings 23 p4073 A66-41532
 Laminated reinforced plastics used in construction of jettisonable fuel tank, spacecraft equipment components, radomes, missiles and satellite 23 p4074 A66-41654
SPACECRAFT CONTAMINATION
 Accidental biological contamination of planets during space exploration, noting different physical and chemical sterilization methods 02 p0184 A66-11609
 Correlation and prediction of adsorption levels of gaseous contaminants for removal from space cabin atmospheres [AIAA PAPER 65-277] 10 p1491 A66-21189
 Biological burden estimation of Mars probes and capsules and various fabrication and decontamination

procedures 13 p2014 A66-25287
 Probability of planetary contamination by terrestrial life from flyby or orbital spacecraft 13 p2014 A66-25290
 Toxic hazards of trace contaminants at reduced pressures associated with spacecraft 14 p2228 A66-28008
 Planetary quarantine constraints, noting prevention of Martian atmosphere contamination 15 p2441 A66-29966
 Space cabin contamination control, discussing temperature effects, analysis by IR gas chromatography and chemical methods 17 p2863 A66-32144
 Particle and droplet contamination of spacecraft cabin atmosphere, examining exogenous and endogenous sources, medical aspects of inhalation and exhalation, effect of weightlessness, etc 17 p2866 A66-32207
 Contamination problems in space program, discussing clean room equipment, maintenance, cleaning problems, etc 17 p2866 A66-32210
 Contamination control of manned spacecraft, noting problem of biological interactions and methods of monitoring 17 p2866 A66-32211
 Correlation and prediction of adsorption levels of gaseous contaminants for removal from space cabin atmospheres [AICE PREPRINT 26B] 17 p2868 A66-32679
 Contamination control and space program, objectives, achievements, NASA courses, etc 17 p2868 A66-32894
 Space molecular sink design to create vacuum environment, emphasizing pumping instrumentation 18 p3093 A66-33797
 Microbial contaminants evaluation for sterility in interiors of spacecraft, noting culturing technique 19 p3287 A66-35575
 Spacecraft trace contamination control requirements quantitatively defined, emphasizing physical and chemical sorbents and combustion catalysts 19 p3293 A66-36237
 Integrated program approach for contamination control of space cabin atmospheres based on identification, estimation of concentration and system specifications 19 p3293 A66-36238
 Spacecraft maintenance and repair cost minimization and system effectiveness increase by controlling contamination due to personnel, static electrification and bacteria 20 p3567 A66-37899
 Particulate contamination control of ultraclean collecting surface for extraterrestrial matter in Aerobee 150 22 p3922 A66-40041
 Cleaning procedures for Saturn S-IB tubes with specifications on cleaning equipment, solutions, etc 22 p3922 A66-40042
 Microbiological decontamination of lunar spacecraft during mechanical integration and assembly 22 p3857 A66-40044
 Space simulation chamber determination of contamination causes and effects 22 p3892 A66-40238
 Welding, thermal flux control and contamination prevention of Saturn rockets, particularly fusion welding 23 p4073 A66-41534
SPACECRAFT CONTROL
 Self-organizing adaptive systems for spacecraft attitude control in which reward-punishment reinforcement process is used to obtain on-line synthesis of plant actuation signals 01 p0140 A66-10019
 Spacecraft attitude control system selection constraints and tradeoffs of components 01 p0142 A66-10681
 Gemini flight control system performance during second unmanned flight 01 p0104 A66-10684
 Microelectronic digital system for spacecraft stabilization and control 01 p0105 A66-10689
 Problem areas in long duration manned space flight noting vehicle maintenance, extravehicular activities, visual skill performance, spacecraft control, etc [SAE PAPER 650809] 01 p0021 A66-10818
 Mission simulation techniques for training Gemini flight controllers 02 p0186 A66-11802
 Three-axis control system of Mariner IV for midcourse maneuver, communication, scientific instruments orientation, etc 03 p0430 A66-12480

Star pattern recognition system for spacecraft attitude control [AIAA PAPER 64-652] 03 p0390 A66-12755
 Navigation and control simulation portion of overall manned space cabin test program [AIAA PAPER 65-277] 03 p0328 A66-12776
 Thrust modulation with minimum limit cycle in bang-bang system, reducing fuel consumption for spacecraft attitude control system 03 p0432 A66-13206
 LEM mission and pilot role in spacecraft control including guidance and control systems, retromaneuvering, landing-site inspection, etc 05 p0713 A66-15186
 Simulation study of human performance in manual control tasks in orbital rendezvous and lunar landing 06 p0818 A66-16245
 Mariner IV maneuver and attitude control using Sun and star Canopus for reference frame 06 p0959 A66-16317
 Conically spiraling ascent or descent trajectory of spacecraft in application of jet lift, noting characteristic mission parameters 09 p1457 A66-20557
 Ion thruster, including mercury feed system and shielded neutralizer, designed and tested for spacecraft station keeping and attitude control [AIAA PAPER 66-247] 10 p1593 A66-21456
 Gas dynamic problems in low pressure microthruster engines, noting parameters such as type of nozzle flow, pressure drop causes, etc 11 p1761 A66-22461
 Gemini Systems Interference Monitor /SIM/ including signal conditioner having simultaneous monitoring and remote control from central location 11 p1687 A66-23480
 Solid propellant electric thruster /SPET/ for attitude control and drift correction of space vehicles [AIAA PAPER 66-229] 12 p1937 A66-24525
 Impulse bit-size, gas consumption and specific impulse of cold-gas attitude control reaction jet system 12 p1954 A66-24710
 Motion equations and simulation of spin-stabilized interplanetary spacecraft closed-loop pitch control system, using low-thrust gas jet torquers with rate gyro sensors 14 p2392 A66-27881
 Low-thrust engine spacecraft control during boost phase, independent of velocity vector determination, by stabilizing osculating orbit plane relative to planetocentric coordinate system 15 p2534 A66-28490
 High precision attitude control system using pulse width modulation evaluated by hardware fabrication and digital computer simulation 15 p2606 A66-29651
 Simulated lunar landing maneuver of Apollo spacecraft, determining pilot control problems and handling qualities 16 p2743 A66-30886
 Lifting reentry test phases and effect of pilot performance on miss distance in first manned Gemini flight, discussing spacecraft control 17 p3016 A66-32685
 Systems and operation of quantized data attitude control system for spacecraft [AIAA PAPER 64-660] 18 p3240 A66-33787
 Control of spacecraft internal temperature, using movable shutters reflecting diffusely [AIAA PAPER 65-425] 18 p3260 A66-33826
 Optimum three-dimensional attitude control of spacecraft with two pairs of reaction jets 18 p3244 A66-33863
 Automatic control systems for attitude control of Apollo spacecraft 18 p3244 A66-33876
 Russian research dealing with optimal control functions of spacecraft powered by low thrust rocket engines 18 p3228 A66-33883
 Automatic failure detection, location and correction system for failures in unmanned spacecraft using frequency-shift-keyed subcarrier 19 p3316 A66-35679
 Space control system using digital SUBORDINATE OR logic blocks to add optimum response capability to maneuver commands 20 p3662 A66-37229
 Microrocket technology utilizing solid, liquid and gaseous propellants for spacecraft control, including performance measurement techniques [AIAA PAPER 65-620] 20 p3629 A66-38149
 Adaptive control system requirements for launch vehicles includes insensitivity to parameter variations and adjustability as

- function of measured flight conditions 20 p3664 A66-38182
- Rotating spacecraft attitude changes due to energy dissipation from angular deformation treated by modal method 21 p3819 A66-38844
- Spacecraft attitude reference system using passive temperature control device and four gyros in skewed position 21 p3764 A66-38853
- Flight control system of Saturn V launch vehicle, discussing attitude/attitude rate scheme, gain required and stability achieved 21 p3820 A66-38875
- Simulation results of adaptive tracking filter application to stabilization of structural bending modes of SI-B launch vehicle 21 p3821 A66-38877
- Linear dynamic analysis of angular motion of spinning axisymmetrical rocket or spacecraft, emphasizing rigid body with thrust malalignment and another motion caused by deflection of control surfaces or jets 22 p3988 A66-40618
- Book on space navigation guidance and control covering manned lunar landing guidance, pulse torquing and inertial measurement units, computer utilization, control systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43122
- Optical measurements and navigation during midcourse and orbital phases of space mission, deriving linear equations for propagation of time dependent navigation errors [AGARDOGRAPH 105] 24 p4176 A66-43127
- Apollo spacecraft attitude control, noting phases of application [AGARDOGRAPH 105] 24 p4284 A66-43129
- Engineering psychology of man-machine interface and relation to spacecraft piloting and systems control 24 p4169 A66-43147
- ### SPACECRAFT DESIGN
- Spacecraft Thermal environment control to insulate cryogens in bulk for space use 01 p0161 A66-10290
- Spacecraft design for manned planetary missions, emphasizing early Mars landings 01 p0143 A66-10802
- Design of reusable space launch vehicle systems considering propulsion, structural weights, heat protection and cost [SAE PAPER 650801] 01 p0144 A66-10816
- Terrestrial transportation via space vehicle with land-recovered reusable booster utilizing Pegasus principle, emphasizing application, speed and commercial feasibility 03 p0433 A66-13222
- Design guide-lines for vehicles which must survive thermal environment of space 03 p0433 A66-13335
- Optimum design employing merit function of cost and weight for structural/material components and subsystems applied to space vehicles [SAE PAPER 650785] 05 p0773 A66-15010
- Aerothermoelasticity effect on longitudinal stability and control of winged aerospace vehicles [AIAA PAPER 64-489] 05 p0775 A66-15075
- Spacecraft for studying space radiation and ionosphere by ESRO 06 p0958 A66-15995
- Physiological and psychomotor test performed in revolving space station simulator for design criteria for spacecraft with artificial gravity 06 p0815 A66-16051
- Human performance measurement capability and limitations for defining mans role in future space missions 06 p0818 A66-16244
- Spacecraft design influenced by man in capacity as designer and crew member 06 p0818 A66-16248
- Manned lifting body sizing, discussing system requirements, constraints and relationship to parametric vehicle design data [AIAA PAPER 66-47] 06 p0958 A66-16259
- Apollo lunar landing spacecraft design noting command, service, lunar excursion module, etc 08 p1300 A66-18553
- Design and program for Apollo Lunar Excursion Module, noting propulsion, guidance, control, ground support, etc 08 p1300 A66-18554
- MOL program noting design requirements, operation, functions, etc 08 p1300 A66-18556
- Military approach to standardized space vehicle system, specifically Titan III 08 p1301 A66-18571
- Design of recoverable biosatellite spacecraft for studying effects of space environment on living organisms 08 p1301 A66-18580
- System constraint effects on mechanical design of spacecraft structures 08 p1302 A66-18737
- Mechanical design of spacecraft including equipment layout in spin-stabilized satellite and stress analysis 08 p1302 A66-18738
- Structural fatigue effect on spacecraft design 08 p1302 A66-18739
- Study of protection requirements for resistance of meteorite penetration damage for various interplanetary spacecraft systems [AIAA PAPER 63059-63] 08 p1303 A66-18807
- One-man lunar Rover craft design and performance, considering bipropellant rocket powered platform kinesthetically controlled by astronaut 08 p1303 A66-18822
- Mars Excursion Module, considering requirement for cross orbit capability during entry and optimization of engine vehicle integration 08 p1303 A66-18823
- Instrumentation and design of scientific payload carried by Mariner IV 09 p1464 A66-20181
- Orbital flight of cosmonauts Beliaev and Leonov on March 18, 1965 includes description of spacecraft and extravehicular activity 09 p1464 A66-20460
- Full-scale prototype docking mechanism design and evaluation tests in rendezvous simulator 10 p1612 A66-21932
- Problems of manned spacecraft design such as weight restriction, structural problems, heat protection, thermal control, vibration, etc 11 p1778 A66-23073
- Long duration manned spacecraft material and structural requirements in radiation and meteoroid shielding, thermal control, cabin sealing, etc 11 p1778 A66-23074
- Atmospheric environment effects on Saturn IB launch vehicle design, showing density profiles for various altitudes and listing extremes of thermodynamic variables at specific altitudes [AIAA PAPER 66-347] 12 p1906 A66-24479
- Mars atmosphere definition important in advanced landing vehicle design with increased payload capability and reduced complexity [AIAA PAPER 65-22] 12 p1952 A66-24697
- System design technique for extraterrestrial vehicles which maximizes effectiveness of complex system operating in partially defined environment 13 p2057 A66-25247
- Guidance and control of Mars orbiter-lander mission 13 p2123 A66-25254
- Design and feasibility studies of Mars atmosphere probe vehicle 13 p2192 A66-25292
- Reliability feasibility evaluation of Voyager spacecraft, determining launches necessary, chances of success and program cost 13 p2192 A66-25509
- Design characteristics and status of SNAP Mercury Rankine nuclear power plant system 13 p2005 A66-26625
- Mariner spacecraft design, discussing space flight operations, deep space instrumentation, launch vehicle and spacecraft systems 14 p2391 A66-27469
- Conceptual unmanned spacecraft designs for Jupiter exploration including flyby and orbiter missions [AIAA PAPER 65-388] 14 p2394 A66-28176
- Surveyor I data analyzed, noting lunar photographs, topography and instrumentation 15 p2599 A66-29657
- Structural design of various unmanned space vehicles as function of developmental and technical problems 16 p2807 A66-30298
- Unmanned interplanetary long-duration Mariner space flights and instrumentation, guidance, control, stabilization and communications of Mariner II and IV 16 p2807 A66-30362
- Atmospheric density statistics from cumulative frequencies for seasons as function of altitude for design of booster vehicles 16 p2741 A66-30602
- Hybrid type two-or three-stage aerospace vehicle design to place payload in orbit, discussing recoverable stages, drives and air breathing engines 16 p2635 A66-31682
- Digital computer analysis of mission parameters governing spacecraft thermal behavior 17 p3034 A66-325
- Optimum entry vehicle design using aerobreaking for manned Earth entry hyperbolic speeds, examining blunted con biconic and tetrahedral configurations [AIAA PAPER 66-489] 18 p3239 A66-336
- Low cost approach to development vehicle for European-based space exploration 18 p3246 A66-339
- Space environment in Earth or interplanetary orbit, emphasizing engineering design of spacecraft, components and human survival 18 p3231 A66-342
- Spacecraft design requirements for achieving successful landing on Mars 18 p3247 A66-349
- Extravehicular activity /EVA/ mission simulation, discussing design parameters effect on operating characteristics 19 p3469 A66-359
- Spacecraft in-flight interior and exterior maintenance problems for long missions 19 p3469 A66-359
- First half of Gemini program noting design, prelaunch operations, astronaut training, EVA, etc 19 p3469 A66-359
- Interplanetary mission planning including energy requirements, payload definition, spacecraft design, launching, cost data, etc 19 p3470 A66-363
- Pioneer VI spacecraft design, noting performance and instrument payload 20 p3664 A66-380
- Mechanical design requirements, criteria and processes of Mariner IV spacecraft configuration [ASME PAPER 66-MD-63] 21 p3817 A66-384
- Thermal vacuum solar simulation system for spacecraft thermal design, examining operational characteristics and development 22 p3888 A66-402
- Book on problems of return from space, including heat protection, materials, development testing, life support, design simulation and other related activities 22 p3988 A66-4087
- Welding, thermal flux control and contamination prevention of Saturn rocket, particularly fusion welding 23 p4073 A66-4153
- Problems arising in production and implementation of ballistic missiles and spacecraft programs 23 p4074 A66-4165
- Launch vehicle and spacecraft cost trend including larger vehicles, post Saturn phase performance improvement by throttling, etc [SAE PAPER 660463] 24 p4281 A66-4239
- Mariner spacecraft design and flight examining configuration differences and mission requirements for Venus and Mars versions 24 p4282 A66-4268
- Trajectory and performance analysis instrument unit and payload envelope for Saturn IB space vehicle program 24 p4282 A66-4269

- Satellite communication, noting satellite and ground terminal design performance criteria 01 p0030 A66-1080
- Western Electronic Show and Convention San Francisco, August 1965, Part 5, Space electronics 01 p0072 A66-1110
- Space environment factors in designing electrical insulation systems for spacecraft vehicles 02 p0247 A66-1129
- Pulse operated miniature RF switch for space use and design from command decoder 03 p0348 A66-1334
- Practical component packaging system for compatible use of integrated and thin film circuits in spaceborne digital command and data handling equipment 04 p0492 A66-1346
- Cybernetics role in space flight including control circuits for guidance and electronic equipment automation and development 04 p0469 A66-1345
- Space electronics - IEEE International Symposium, Miami Beach, November 1965 04 p0475 A66-1357
- Spacecraft and ground equipment design for lunar orbiter telecommunications system 04 p0477 A66-1358
- Corpuscular radiation effect on electronic components during interplanetary flight

- igning safety margins to each component 04 p0493 A66-13606
- Microelectronic integrated circuits and functional blocks in future aerospace electronic system 04 p0493 A66-13632
- Spacecraft microelectronic device failure modes and mechanisms 05 p0650 A66-15630
- Book on space electronics including satellite for TV observation of zero g effects, water reclamation in spacecrafts, ion lines, spacecraft design, 08 p1222 A66-18725
- Pulse-radar altimeter for Saturn launch vehicle incorporating molecular and molibthic integrated circuits 08 p1225 A66-19521
- Low cost OVE-1 orbiting vehicle electronic item 10 p1612 A66-22049
- Computer capability and probable growth in aerospace vehicle applications considered in mission requirement
- Constraints 11 p1659 A66-22959
- Increased oscillation stability and efficiency of traveling wave tubes for global satellite communications systems [AIAA PAPER 66-301] 12 p1844 A66-24768
- Sterilization requirements of spacecraft electronic systems and relation to equipment reliability 13 p2013 A66-25269
- Lifetime and reliability requirements of electronic systems for projected unmanned and manned space missions 13 p2039 A66-25690
- Secondary sensing technique for testing aerospace electronic systems by measuring die effects 13 p2079 A66-25692
- Electronic predictor instruments for dynamic control and simulation and possible application to lunar spacecraft 13 p2048 A66-25896
- Sterilization problem connected with voyager life probe to Mars 15 p2442 A66-28653
- Aerospace tape recorder characteristics of models from 20 manufacturers 15 p2502 A66-29359
- Continuous loop magnetic tape recorders used in Vanguard, Tiros and Nimbus satellites 15 p2502 A66-29360
- Test program for Gemini Attitude Control and Maneuver Electronics /ACME/ system, establishment and execution 16 p2676 A66-30438
- Centralized Flexible Automatic Computer Telemetry System /FACTS/ for spacecraft, providing capability of revising sampling structure 16 p2651 A66-30563
- TRW Systems MARCO 4418, small high-speed lightweight reliable digital computer, for use in manned space missions 19 p3306 A66-35503
- Aircraft and spacecraft digital systems including computers for production engineering, ground telemetry and communication with aerospace vehicle and onboard equipment for tracking, guidance and simulation of flight conditions 21 p3709 A66-39629
- Electronic devices for ignition of firing mechanisms designed for carrier rocket stage separation 21 p3822 A66-39632
- French FR-1 satellite equipment for amplifying, filtering and transposing VLF signals from ground station 22 p3866 A66-40157
- Methodology for definition of space vehicle display system based on mission objectives and human factors 22 p3892 A66-40288
- Miniature welding of joints, discussing wire-to-wire welding and advantages over soldered connections in light of environmental parameters 23 p4043 A66-41195
- Parts sterilization at Jet Propulsion Laboratory 24 p4180 A66-42290
- Computer operational center for orbiting space laboratory that will navigate, arrange experiments and devise work schedules 24 p4177 A66-42335
- Book on space navigation guidance and control covering manned lunar landing guidance, pulse torquing and inertial measurement units, computer utilization, control systems, etc 24 p4235 A66-43122
- SPACECRAFT ENVIRONMENT**
- A CLOSED ECOLOGICAL SYSTEM**
- Program for engineering development of integrated spacecraft environmental control and life support systems and solution of man-machine integration problems [SAE PAPER 650813] 01 p0021 A66-10820
- Computer method using spectrometer for rapidly measuring spectral distribution of solar simulator and determining effects on thermal balance evaluation of spacecraft 02 p0212 A66-11222
- JPL 25-ft space simulator tests Ranger, Mariner and Surveyor spacecraft under conditions of extreme cold, high vacuum and intense solar radiation 02 p0213 A66-11228
- Thermal energy balance of orbiting spacecraft simulated, using tungsten-filament lamp without duplicating solar spectrum 02 p0214 A66-11239
- Astronaut selection including dynamic testing, discussing examination methods, biological parameters, laboratory and radiological procedures, blood chemistry techniques, etc 04 p0469 A66-14064
- Artificial environment in manned spacecraft for preserving human life, comparing physical, chemical and biological processes 04 p0470 A66-14079
- Spacecraft cabin atmosphere, comparing pure oxygen with two-gas atmosphere 06 p0814 A66-15925
- Biointstrumentation and monitoring device which relates complex environmental variables to development of psychophysiological stress evaluation for controlling environment of space capsules 06 p0878 A66-15963
- Alkali metal superoxide applied by Soviet as active chemical for space cabin air revitalization 06 p0819 A66-16830
- Thermal control of spacecraft 08 p1301 A66-18736
- Oxygen recovery from metabolic carbon dioxide for spacecraft environment 08 p1177 A66-18821
- Mitotic phases of Tradescantia paludosa microspores as affected by spaceflight factors of Voskhod I 10 p1486 A66-21989
- Spacecraft thermal control by fusible or phase-change materials 11 p1787 A66-23165
- French EOLE experiment for measuring tropospheric parameters, describing balloon transponder, balloon and spacecraft electronic packages, telemetry, etc 12 p1956 A66-24934
- Chemical analysis of permanent and trace organic gases in 30-day manned experiment, using gas chromatography 12 p1811 A66-25011
- Thermal and fluid mechanics problems in Gemini spacecraft environment control system development 14 p2226 A66-27813
- Soviet monographs on problems of space biology 15 p2431 A66-29439
- Spacecraft crew training, noting universal multipurpose, complex and specialized functional training facilities 15 p2443 A66-29440
- Astronaut training based on environmental factors, rated efficiency and physical and mental condition 15 p2443 A66-29441
- Sport-type knit suit indicated as most suitable astronaut clothing in small-volume cabin during comfortable microclimatic conditions 15 p2443 A66-29458
- Regenerative life support system for four-man crew on long duration tests, noting biological constraint parameters 17 p2862 A66-32138
- Carbon dioxide control for manned spacecraft, discussing regenerative methods for eliminating system weight dependence on mission duration 17 p2863 A66-32141
- Mathematical solution for expressing comfort level of man in gas-cooled space suit and space cabin, noting environmental parameters 17 p2863 A66-32142
- Simulated orbital flights with extravehicular activities, determining incidence and severity of flyers bends due to decompression and exercise 17 p2856 A66-32148
- Environmental control manufacture discussing cleaning, design and maintenance problems, historical background, etc 17 p2903 A66-32208
- Aerospace life support - Conference, American Institute of Chemical Engineers, Houston, February 1965 17 p2866 A66-32667
- Suitability of oxygen-helium atmosphere for manned space missions proven by 56-day human exposure at 258 mm Hg total pressure 18 p3057 A66-33768
- Major and minor constituents of oxygen-helium atmosphere to which humans were exposed for 56 days 18 p3057 A66-33769
- Human renal response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33770
- Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-33772
- Urinary excretion of steroids and catecholamines as measure of emotional stress of man in 56-day exposure to oxygen-helium environment 18 p3057 A66-33773
- Respiratory effects of 56-day human exposure to oxygen-helium atmosphere 18 p3058 A66-33774
- Bite-size foods included in feeding study of man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33775
- Nutritional evaluation of feeding bite-size foods to man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33776
- Enteric microbial flora changes in man exposed 56 days to oxygen-helium atmosphere 18 p3058 A66-33777
- Cryodeposits effects on spacecraft thermal control systems with respect to surface radiative properties and to shadow shield surfaces 19 p3468 A66-35955
- Design and operational performance criteria for adequate simulation of thermal environment of spacecraft at lunar surface 22 p3888 A66-40209
- Fluid venting effects on thermal control surfaces studied, using vacuum chamber for thermal environment simulation tests 22 p3891 A66-40236
- Premature pressure vessel failure prevention in Apollo spacecraft 23 p4072 A66-41124
- SPACECRAFT GUIDANCE**
- Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 01 p0100 A66-10027
- Lunar landing site selection by Earth-based manual control, using televised landing area picture 01 p0104 A66-10682
- Gemini navigation problems considering launch vehicle standby guidance, post insertion orbit correction, catch-up maneuvers, rendezvous terminal guidance, orbit navigation and reentry guidance 02 p0254 A66-11315
- Apollo unified S-band system covering station locations, uplink and downlink spectrums, spacecraft gross parameters, theory of operation, etc 04 p0478 A66-13589
- Coordinated orbital technology experiment program discussing guidance and control, ground test, low-g accelerometer test, error sources, elimination, etc 04 p0507 A66-13592
- Optimal interplanetary guidance, discussing optimization of variable observation rate and correction schedule to achieve desired terminal accuracy 04 p0544 A66-13992
- Gemini guidance and control, discussing design, ground monitoring, launch and flight guidance, spacecraft instrumentation, maneuvering, etc 06 p0906 A66-15924
- Direct and analytical solution of polynomial-type guidance functions for optimal space flight [AIAA PAPER 66-94] 06 p0907 A66-17093
- Slide wire accelerometer, considering factors responsible for sensitivity loss and gain 07 p1031 A66-17410
- Manned interplanetary flight, emphasizing nonstop flybys past Mars and Venus, reviewing launch and departure modes, energy requirements, environmental control, navigation spacecraft power source, etc 08 p1286 A66-18561
- Navigation, guidance and control of spacecraft in interplanetary space, considering free-fall flight and thrust-vector stabilization during accelerated flight 08 p1248 A66-18586
- Multimission standardized guidance and control system and evaluation of cost effectiveness 08 p1253 A66-19540
- Electro-optical automatic celestial guidance system for spacecraft and satellites 13 p2124 A66-25643

Unmanned spacecraft trajectory and guidance considerations for close flyby of planet Mercury [AIAA PAPER 65-90] 16 p2801 A66-30885

Textbook on automatic guidance of missiles and space vehicles 17 p2951 A66-33151

Peaceful uses of automation in outer space - Symposium, International Federation of Automatic Control, Stavanger, Norway, June 1965 18 p3240 A66-33845

Optimized spacecraft control process eliminates gravitational field-caused nonlinearities by taking as control parameters osculating characteristics of planetocentric motion 18 p3242 A66-33851

Spacecraft guidance during distant approach stage of rendezvous with orbital station and information on rotation of sighting line 18 p3245 A66-33885

Injection phenomena of theory of perturbational optimal guidance of space vehicles 18 p3132 A66-33887

Guidance, navigation, propulsion and course correction specifications for Mars or Venus manned flyby missions 20 p3596 A66-37226

Guidance scheme for control of multistage rocket vehicle through ascent phase of complex space mission [AIAA PAPER 64-640] 20 p3597 A66-38156

Strapdown attitude reference system with two rotor gyros using gas bearing in space vehicle 21 p3763 A66-38847

Modulation of L/D and bank angle to achieved heading, range and trajectory stabilization, using closed form equations 21 p3765 A66-38868

Airborne guidance computations using prescribed-h method, representing two-body motion in inertial space, presenting equations for target hitting, circular orbit, etc 21 p3765 A66-38869

Autonomous orbital navigation by optical tracking of unknown landmarks 21 p3766 A66-38881

Iterative guidance mode with application to three-dimensional upper stage vacuum flight 21 p3768 A66-38897

Guidance, navigation and two phases of targeting of Saturn V lunar landing mission, analyzing launch, boost to orbit and iterative guidance 21 p3768 A66-38898

Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 24 p4235 A66-42766

Space vehicle guidance and navigation, noting instrument techniques, gyroscopic units for reference coordinate realization, inertial navigation systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43123

Onboard calculation for navigation and guidance of Apollo mission vehicle [AGARDOGRAPH 105] 24 p4236 A66-43125

Apollo guidance computer, discussing memory storage, central processing unit and sequence generator [AGARDOGRAPH 105] 24 p4236 A66-43128

SPACECRAFT INSTRUMENTATION

Function of instruments and ancillaries of Mariner Mars science subsystem 01 p0072 A66-11111

Designing space telescopes to perform astronomical observations from Earth orbit and integration into manned spacecraft 02 p0229 A66-11627

Spacecraft instrumentation and orientation techniques for solar electromagnetic radiation study 03 p0370 A66-12863

Langmuir probes in spacecraft, considering plasma effects 03 p0370 A66-12876
